EDUCATIONAL AND OCCUPATIONAL ASPIRATIONS AND EXPECTATIONS OF
HIGH SCHOOL JUNIORS AND SENIORS IN THE STATE OF WASHINGTON.
FINAL REPORT, PART 1.

BY- SLOCUM, WALTER L. BOWLES, ROY T.

WASHINGTON

THE SOCIAL AND CULTURAL FACTORS WHICH AFFECT THE
EDUCATIONAL AND OCCUPATIONAL PLANS OF HIGH SCHOOL STUDENTS,
ESPECIALLY THOSE WHO DO NOT EXPECT TO OBTAIN A COLLEGE
DEGREE, WERE IDENTIFIED. DATA WERE COLLECTED FROM JUNIORS AND
SENIORS OF 28 HIGH SCHOOLS IN THE STATE OF WASHINGTON. THIS
DATA CONSISTED OF (1) INFORMATION DRAWN FROM SCHOOL RECORDS,
(2) INTERVIEWS WITH STUDENTS, AND (3) QUESTIONNAIRES
COMPLETED BY STUDENTS, PARENTS, AND COUNSELORS. MOST OF THE
STUDENTS RECOGNIZED THAT EDUCATION WAS IMPORTANT AND,
ALTHOUGH THEY DIDN'T HAVE A HIGHLY FAVORABLE ATTITUDE TOWARD
VOCATIONAL COURSES, THEY FELT THAT MORE SUCH COURSES SHOULD
BE OFFERED BY THE HIGH SCHOOL. EDUCATIONAL ASPIRATIONS WERE
HIGH. THREE FOURTHS OF THE STUDENTS EXPECTED TO ATTEND
COLLEGE, AND 43.5 PERCENT EXPECTED TO GRADUATE. OCCUPATIONAL
ASPIRATIONS AND EXPECTATIONS WERE ALSO HIGH. MORE THAN SIX
OUT OF TEN ASPIRED TO ENTER PROFESSIONAL OCCUPATIONS.
RELATIVELY FEW STUDENTS ASPIRED TO BE FARMERS, SALES WORKERS,
OPERATIVES, OR LABORERS. THE AMOUNT OF UNCERTAINTY FOUND TO
EXIST AMONG THESE ADOLESCENTS SUGGESTED A NEED FOR PRESENTING
SUFFICIENT SYSTEMATIC INFORMATION ABOUT OCCUPATIONS THROUGH
THE CURRICULUM TO PERMIT THEM TO MAKE WELL-INFORMED CHOICES.
SAMPLES OF QUESTIONNAIRES AND TABLES OF FINDINGS WERE
INCLUDED IN THE APPENDIX. THIS VOLUME REPRESENTS PART 1 OF
THE 13-PART FINAL REPORT ON THE VOCATIONAL-TECHNICAL
EDUCATION RESEARCH AND DEVELOPMENT PROJECT OF WASHINGTON
STATE UNIVERSITY. RELATED VOLUMES ARE ED 010 652 THROUGH ED
010 664. (AH)

ACKNOWLEDGMENTS

The cooperation of superintendents, principals, counselors, classroom teachers and students in the cooperating schools is gratefully acknowledged. The authors also wish to acknowledge the support of the State Board of Vocational Education, the assistance of numerous professional colleagues at Washington State University and the assistance of individuals who worked as interviewers and coders.

Among those who assisted the investigators, the contributions of the following deserve special mention: Professor Gordon McCloskey, for helping us to solve many problems in project operations; Athol Congalton, Visiting Professor at Washington State University February 1965 - February 1966, for assistance in questionnaire construction; William A. Rushing, Associate Professor of Sociology, for assuming the primary responsibility for the design of the B interview sample and the B data collecting instruments; Mrs. Belinda S. Starkie, Mrs. Pat Roberts, and Mrs. Barbara Lentz, for assistance in keeping the records in order and for performance of essential secretarial tasks; Mrs. Kathleen Warila, for secretarial assistance and advice; Miss Sandra Naumchik, for her work as a graduate assistant; and Mrs. Ardith Mathison for computer programming.

INTRODUCTION

This report presents selected data concerning the educational and occupational aspirations and expectations of a sample of boys and girls who were juniors and seniors in Washington high schools in the 1965-66 school year. It also describes the methods used in obtaining and processing the data.

The educational and occupational aspirations aspects of the Vocational-Technical Research and Development Project at Washington State University is focused on the characteristics, values and attitudes and educational and occupational plans of students who do not expect to obtain a college degree. It must be pointed out at the outset, however, that most of the substantive data in this particular report do not pertain specifically to these students. This is the first of a number of reports based on form A of the classroom questionnaire; the data in it were selected primarily for the information of the high school principals, teachers, counselors and others who helped us make the study. Similar data for form B of the classroom questionnaire will be available in the near future and a report will then be prepared for the information of high school principals, teachers, counselors and others who helped us with this part of the study.

BACKGROUND

The function of formal education as occupational preparation is increasingly important. The high school or elementary school drop-out has extremely limited opportunities for employment except in menial and unskilled tasks. Such jobs are rapidly decreasing in number. These facts are well known to most parents of high school students. As a consequence, the majority of adolescents now graduate from high school, although some drop out of school earlier. College enrollments are rising but there is little possibility that the majority of our high school graduates will finish a four-year college course. This does not mean that participation in formal education will necessarily end with high school graduation. There is a growing realization that post-high school training of some type will be important for successful occupational adjustment in the future. At the same time it is doubtful whether many high school students, or parents of high school students, have a clear idea of the types of post-high school training, other than college, that are useful means of acquiring occupational skills.

The increasing importance of formal education as occupational preparation is a consequence of radical changes in the occupational opportunity structure. These changes are in turn, attributable to the rapid adoption of technological and scientific innovations (11). New occupations with more demanding educational requirements are replacing older, simpler occupations. Unskilled manual employment opportunities are rapidly declining in all industries, including agriculture, and the emphasis is shifting instead to skills based on higher levels of scientific knowledge. An increasing proportion of the labor force is involved in skilled manual work or white-collar work. The old middle status of independent farmers and small businessmen is rapidly being replaced by the new middle status of white-collar occupations such as clerks, sales people, technicians, employed managers, and salaried professionals. These new occupations generally require more specific educational training than did the older occupations (1). While these trends affect adult workers whose jobs are being eliminated or radically altered, they are of paramount importance to the career plans of boys and girls who will soon enter the labor force.

Associated with the rapidly changing technology is an awareness that both the welfare of the individual and the stability of the national economy depend on effective occupational performance. The Federal Government's War on Poverty and widespread discussions of the causes and consequences of poverty have focused on the idea that a satisfying and constructive personal and family life is extremely difficult to obtain by those who do not have meaningful and rewarding roles in the productive aspects of the economy. Since the depression of the 1930's, it has been widely recognized that neither a prosperous nor a politically stable society can be maintained unless nearly all adults who wish to earn incomes have occupational skills which permit them to do so.

The nature of the occupational opportunity structure and the importance of effective occupational participation emphasize the importance of educational and occupational planning by adolescents. The young person who does not make adequate occupational plans and who does not get adequate educational preparation will likely find himself following an opportunistic policy--taking whatever job is available and moving whenever opportunity beckons elsewhere. It is unlikely that he will be able to establish a stable occupational career or to acquire the skills necessary to shift easily to new occupations at the same or higher levels as technological changes modify the occupational opportunity structure. Research has revealed that few American men other than professionals, executives, civil service workers, farmers, and skilled craftsmen have had occupational careers which provide either stability or opportunity for upward mobility through a series of graded steps (5, 2, 4, 12).

As technological development continues to accelerate change and make occupations more complex, these hazards are accentuated. Consequently, the growing importance of education as occupational preparation presents a tremendous challenge to the educational system.

One of the most pressing problems at present is the emerging need for the schools to provide vocationally useful education to students who for one reason or another will not graduate from college. These students will eventually enter nonprofessional occupations of various types. At present they are in the majority.

Traditionally many of our schools have been oriented primarily toward the college-bound. In such schools the other students have received little, if any, recognition or encouragement. Many reacted by regarding school as a sort of prison to be left as soon as legally possible.

This definition of the situation by a school may have been defensible in earlier times before educational attainments became crucial in obtaining employment and in occupational success. The consequences of a poor education are now so great, however, that there is no justification for it in contemporary society. Public recognition of the changed situation is reflected in the Vocational Education Act of 1963.

What can be done to provide the necessary vocation-related education and to persuade youngsters who are not academically oriented that they should stay in school and work hard at their studies? Obviously, these questions do not have simple answers. Many different types of studies will be required. In this report, we will present information about our respondents which will be useful in appraising the dimensions of the task.

OBJECTIVES

The principal objective of this aspect of the Vocational-Technical Research and Development Project is to identify social and social-psychological factors associated with different patterns of educational and occupational aspirations and expectations. Phrased in another way, the main objective is to identify the social and cultural factors which affect the educational and occupational plans of high school students, especially those who do not expect to obtain a college degree.

More specifically, as the analysis proceeds, we expect to find at least provisional answers to the following major questions:

1. To what occupations do students aspire and what occupations do they actually expect to have as their life's work?
2. How much and what type of education would students like to get and how much and what type of education do students actually think they will be able to get?
3. How do students who are oriented toward different types of education (technical, business, college) differ from each other?
4. To what extent are the educational and occupational aspirations and expectations of students crystallized? How do students who are crystallized in their decisions differ from those who are not?
5. Among students who are low in academic performance, how do those who aspire to high levels of education and high occupations differ from those who do not have high aspirations?
6. How is the individual's self-image--his self-esteem and his perception of his own abilities and talents--related to his occupational and educational aspirations and expectations?
7. How do family characteristics, family attitudes and values, and adolescent's subjective feelings about his relationship to the other members of his family affect occupational and educational aspirations and expectations?
8. How are educational and occupational aspirations and expectations related to: (1) the prevailing attitudes in the school with regard to vocational-technical training and manual occupations, (2) the composition of the school curriculum, (3) school grades and activities, and (4) the student's attitudes toward school?
9. How do the attitudes and values of peer groups, activities of peer groups, and the status of peer group members affect educational and occupational aspirations and expectations?
10. How are post-high school educational and occupational aspirations and expectations related to socio-economic status and to subjectively sensed status deprivation?
11. Do educational and occupational aspirations and expectations relate to social and economic characteristics of the student's home community, especially to the objective occupational and economic structure of the community?
12. To what extent are educational and occupational aspirations and expectations a product of generalized mobility aspirations or achievement motives?

13. What are the results of a belief on the part of a student that he will not be able to achieve his educational or occupational aspirations?

Answers to these questions will provide much useful knowledge of the methods that students who do not expect to graduate from college plan to use in preparing themselves for occupations. These answers will permit identification of factors associated with low aspirations. They will also yield information about the characteristics of those students who are not planning for preparation which will equip them for effective occupational performance. These answers will have practical value in educational and occupational counseling.

The results of this study should have important implications for the field of vocational education. The study will identify the characteristics of those students who aspire or expect to acquire vocational training. It will show what attitudes high school students and their parents hold toward various aspects of vocational education. And perhaps most important, it may help identify the characteristics of students whose aspirations and expectations are unrealistically high and who need careful vocational counseling to help them select realistic vocational goals.

In addition, this study will contribute to several areas of basic social science research. It will provide information concerning occupational decision making, its nature, and the factors influencing it. It will add to the knowledge of the processes involved in the transition of adolescents to adulthood in American society. That is, it will provide information about the processes by which the occupational role, one of the major adult roles, is acquired. It will also contribute to knowledge in the field of social stratification by increasing the available information about mobility aspirations, their sources, and their consequences for decisions likely to lead to actual mobility or lack of it.

CONCEPTUAL FRAME OF REFERENCE

The conceptual frame of reference to be used in this study is sociological and social psychological (7). The student is viewed as a person in a decision-making situation. As a person he is a member of several concrete social systems. Within each of these systems he engages in social interaction with other group members. Each social system possesses a fairly distinct subculture, i.e., a set of norms and values. As a person interacts with other members of a given social system he will internalize some of these norms and values. In addition, the members of each social system

hold expectations to which he must respond. The direction taken by an individual's decision will, therefore, reflect the norms and values of the groups to which he belongs.

As a result of his experiences, each person develops an image of himself. The image includes: (1) self-esteem, i.e., self-respect and ideas of personal worth; (2) an image of abilities and capacities; and (3) a set of personal goals. Each person evaluates the various possibilities open to him in terms of their anticipated effect on these aspects of his self-image. As a result, the choices he makes will be affected by his self-image.

Each person also possesses attitudes and motives. These are products of his experiences, especially his experiences in the family and other social groups. The attitudes and motives which the person acquires have an impact on his reaction to the different possibilities open to him and hence on the nature of the decision he makes.

Finally, the person exists in an objective economic situation and has objective physical and mental characteristics which place limitations on his capacity to follow some of the alternatives otherwise open to him. He will take these limitations, as he perceives them, into account in making his decision.

METHOD

The subjects for this study were juniors and seniors enrolled in a sample of public high schools in the State of Washington. The data consist of questionnaires completed by students, interviews with students, questionnaires completed by parents, questionnaires completed by counselors, and information drawn from school records. Two forms (A and B) of each instrument were constructed.

A stratified random sample of Washington State high schools was drawn. This sample was divided into two parts (A and B). Form A student questionnaires were administered to all juniors and seniors in the A sample schools; form B questionnaires were administered to all students in the B sample schools. A sub-sample of students who completed each version of the questionnaire was interviewed. Either the mother or the father of each student in the interview sample was mailed a questionnaire. The counselor in each school was asked to complete a brief questionnaire for each student who was interviewed. Information concerning school grades and I. Q. scores was collected from the school records for each student who was interviewed. The table below summarizes the data collected.

SUMMARY OF DATA COLLECTED

	<u>Form A</u>	<u>Form B</u>
Number of Schools Participating	12	14
Student Questionnaires	3117	3678
Student Interviews	631	938
Parent's Questionnaires	441	701
Counselor's Questionnaires	631	938
Grade and I. Q. Records	631	938

Appendix A presents details concerning sample design, relationships with school authorities, procedures followed in administering questionnaires, and interview procedures.

Appendix B includes sample copies of data collection instruments.

RESULTS

In this section we will present data derived from the answers of students to selected questions on form A of the student questionnaire. The principal purpose of this analysis is to provide administrators in the schools where form A instruments were administered with information about the responses of students. Accordingly, we have selected those questions which we thought would be of interest to local school personnel. This discussion is organized under three major headings: Educational Aspirations and Expectations, School Experiences and Attitudes, and Occupational Aspirations and Expectations.

Appendix C contains detailed tables presenting the responses of students to the questions included. Respondents are classified according to sex and grade in school. An overview of the data will be presented here, but the reader will probably be able to find in Appendix C data to answer many other questions. (The principal of each participating school will be provided with two copies of a computer print-out showing how the students in his school responded to the questions discussed in this report.)

EDUCATIONAL ASPIRATIONS AND EXPECTATIONS

Students were asked to indicate their educational aspirations and their educational expectations. Tables C-1, C-2, C-4, and C-5 in Appendix C present detailed tabulations of the responses to these questions. Table 1 shows the highest level of aspirations and expectations. In Table 2, figures have been combined to show the proportion of students who aim for or expect to acquire various types of education.

Nearly all students aspired and expected to graduate from high school and to get some kind of post-high school education. Only 0.2 percent of the respondents either desired or expected to leave high school before graduation. Six and one-half percent wanted to terminate their education with high school graduation and 8.5 percent expected to do so. Data presented in Appendix C show that boys and girls and juniors and seniors are very much alike in their desire to continue their education after high school.

Over three-fourths (77.6 percent) of the respondents aspired to attend college (including junior college) at some time during their educational careers. Nearly as many (75.9 percent) expected to do so. Not all of those who attend college will receive a degree. However, 51.5 percent of the respondents indicated that they wanted to graduate from college and 43.5 percent expected to do so.

One-fifth of the students (21.5 percent) said they would like to pursue graduate or professional studies. Fourteen percent expected to continue their education after receiving a bachelor's degree.

TABLE 1 - HIGHEST LEVEL OF EDUCATIONAL ASPIRATIONS AND EXPECTATIONS OF HIGH SCHOOL JUNIORS AND SENIORS IN WASHINGTON STATE, 1965-66.^a

Educational Level	Aspirations Percent	Expectations Percent
Quit High School	0.2	0.2

Other	0.6	0.5
Number of Respondents	3077	3059
Number of Nonrespondents	23	41

^aBased on responses to questions 7 and 9 in form A of the student questionnaire.

TABLE 2 - HIGHEST LEVEL OF EDUCATIONAL ASPIRATIONS AND EXPECTATIONS OF HIGH SCHOOL JUNIORS AND SENIORS IN WASHINGTON STATE, 1965-66*

Educational Level	Aspirations Percent	Expectations Percent
Attend College **	77.6	75.9
Attend Junior College	18.3	21.5
Graduate from College - or More	51.5	43.5
Attend Business or Vocational School	14.6	14.8
Take Vocational Training	15.9	17.1
Take Business Training	11.0	11.1

*Data adapted from Table 1. **Includes those who marked attend junior college, attend college or university, graduate from college, attend graduate school.

The relatively high proportions who said that they wished or expected to attend a junior college show that the community college system is very important in Washington. Nearly one-fifth of the students (18.3 percent) expressed a desire to terminate their education with some junior college experience and slightly more than one-fifth (21.5 percent) expected to do so. The figures in Tables C-1 and C-4 indicate that many other respondents also desired and expected to spend some part of their educational careers in junior colleges. Since students were permitted to check as many categories as they desired, the figures in Tables C-1 and C-2 cannot be combined. A special tabulation of the responses of a subsample of 666 cases showed, however, that 40.2 percent of the students desired and 40.5 percent of the students expected to attend a junior college at some time during their educational careers.

Emphasis on the findings that a large proportion of students are oriented toward college attendance should not be allowed to obscure the fact that the responses indicate that there is a substantial contingent of students who want and expect to get vocational training (in both the technical and the business fields) after leaving high school. Business or vocational school was the highest educational goal of 14.6 percent and the expectation of

14.8 percent of the sample. When technical and business training in the junior colleges is combined with that in non-college institutions, it appears that over one-fourth of the sample chose post-high school vocational education as their highest goal and even more expected this type of education to be their ultimate educational achievement. That is, 15.9 percent of the students aspired to take vocational or technical training and 11.0 percent aspired to business or commercial training. When expectations are considered, 17.1 percent marked vocational or technical training as their highest expectation and 11.1 percent marked business training. When the information in Tables C-1 and C-4 is compared with that in Tables C-2 and C-5, it can be seen that many students desire and expect to acquire business or technical education without terminating their education at this stage.

While the aspirations and expectations reported by students in this study may seem high, they are comparable with results of other studies. Slocum and Garrett found in a study of students enrolled in thirty rural high schools in Washington in 1964 that 75.1 percent of the boys and 65.2 percent of the girls expect to attend college (9). Data collected by the United States Census in October of 1965 indicate that in the West, 72 percent of the students between the ages of 14 and 19 who were enrolled in public schools below the college level expected to attend college (6).

Data indicate that levels of educational expectations are higher now than they were a decade ago. In a study of rural and urban students in the State of Washington conducted in 1954-55, it was discovered that only 37.6 percent of high school seniors planned to attend a college or university the following fall (10).

While educational aspirations and expectations are high for the total sample used in the study, it would be erroneous to conclude that they are homogeneously high for all segments of the population. Table 3 shows the variations in levels of aspirations and by schools. (Schools are not identified by name, because school officials were promised that no information concerning individual schools would be released without the express written permission of superintendents.)

Aspirations to graduate from college or to get more education varied from 19.7 percent in one school to 72.4 percent in another. The pattern of expectations is generally comparable to that of aspirations although the gap between aspirations and expectations is larger in some schools than

^aBased on responses to questions 7 and 9 in form A of the student questionnaire. Percentages may not total 100 because categories "Nursing School" and "Other" are not included.

it is in others. The proportion of students expecting to at least graduate from college varies from a low of 14.1 percent to a high of 63.8 percent. The desire to go to college but quit before receiving a degree ranges from 5.3 percent to 20.5 percent. The expectation of doing this ranges from 10.6 percent to 34.2 percent. (Apparently many of those who want, but do not expect to receive a bachelor's degree, do expect to attend college.)

The popularity of vocational or technical education also varied greatly from one community to another. Aspirations for this type of training ranged from 6.1 percent to 39.5 percent. Expectations ranged from 7.1 percent to 42.1 percent. The desire to receive a business or commercial education ranged from 4.7 percent to 22.6 percent. The expectation to do so varied from 4.6 percent to 17.5 percent.

Only 2.0 percent of the students in one school desired to terminate their education with high school. In another school 14.1 percent desired to do so. Expectations for terminating education with high school ranged from 2.2 percent to 21.1 percent. In other words, students in one school were ten times as likely as those in another to think that they would get no further education after high school.

These differences between schools suggest that educational orientations of students and their families may vary greatly from one community to another. This variation is not a simple product of school size; the smallest school is second highest in proportion of students aspiring to attend college. This information is, of course, not new but it should remind the person who contemplates the introduction of a new program into a school that he will need specific information about the aspirations and expectations of students in that school.

Choosing an educational goal is a complex process involving doubt and constant reexamination for many students. Table C-3 reports answers to the question, "How certain are you that this is what you want to do about your future education?" Less than one-tenth of the students said that they were not at all sure. Therefore, uncertainty does not seem to be rampant. On the other hand, only 40.3 percent of the students reported that they were very sure. Apparently the majority of students were still in the process of making their choice of an educational goal. As would be expected, seniors were more likely than juniors to feel that they were certain of their educational choice.

Table C-6 reports responses to a question concerning certainty of educational expectations. A comparison of Tables C-3 and C-6 indicates that students are more likely to be certain of their goals than they are of their plans. (Only 31.7 percent were very sure that they would actually attain the highest level of education they expected.)

Students were asked how much thought they had given to their future educational needs and plans. The importance of educational decisions in the subjective life of a contemporary Washington adolescent is seen in the fact that very few students (only 4.2 percent) reported that they had given no thought or very little thought to their educational plans. Nearly half of the students reported that they had given a great deal of thought to this subject. Not surprisingly, seniors were more likely than juniors to report that they had given a great deal of thought to their educational plans. Girls were more likely than boys to have expressed great concern with this problem.

SCHOOL EXPERIENCES AND ATTITUDES

Students were asked several questions concerning their experiences in school and their attitudes toward school. Selected information drawn from their responses to these questions will be presented below.

School Grades

On the basis of self-reported grades, it appears that the great bulk of the students were doing satisfactory work. Only 3.9 percent reported receiving mostly D's or mostly D's and F's on their last report cards. High grades (defined as mostly A's or mostly A's and B's) were reported by a fourth of the students. More of the girls (31.5 percent) than of the boys (19.1 percent) reported high grades; this finding is consistent with previous studies conducted in the State of Washington by the Department of Rural Sociology at Washington State University.

Participation in Organized Activities

Students were asked to indicate the extent of their participation in organized activities of various types. Except for church youth groups, all of the organized activities listed are normally sponsored by the schools. The percentages of those responding who indicated that they were either "very active" or "quite active" in various activities are presented in Table 4.

TABLE 4 - PARTICIPATION IN ORGANIZED ACTIVITIES^a

Activities	Proportion "Very Active" or "Quite Active" ^b				Total
	Boys		Girls		
	Juniors	Seniors	Juniors	Seniors	
Athletics	53.7	53.2	41.4	34.1	46.1
Music	19.9	20.0	33.5	29.8	25.8
Dramatics	5.1	8.5	16.8	12.3	10.7
Debate	4.2	5.7	5.1	3.7	4.7
School Paper or Annual Student Government	7.0	9.0	15.0	18.1	12.2
FFA or FHA	15.1	25.3	19.8	25.4	21.2
Hobby Clubs	4.6	3.6	3.5	2.8	3.7
Pep Club or Pep Rallies	13.2	14.4	13.6	15.3	14.1
Church Youth Groups	35.8	30.1	63.5	58.0	47.4
Hi-Y or Tri-Hi-Y	30.7	29.8	50.7	48.4	40.0
	7.0	7.2	15.7	18.1	11.8

^aBased on responses to question 18 in form A of the student questionnaire.

^bPercentages are based on responses of students who reported the extent of participation in each activity listed.

Athletics headed the list for boys, followed by participation in church youth groups for the senior boys and by pep club or pep rallies for the junior boys. A fourth of the senior boys and 15.1 percent of the junior boys participated actively in student government. A fifth of the boys were active in organized musical activities. Organized activities which were participated in on an active basis by less than 10 percent of the boys include dramatics, debate, school paper or annual, Hi-Y or Tri-Y, and Future Farmers of America.

Among the girls, active participation in pep club or pep rallies occupied the leading position, followed by church youth groups, athletics and music. A fourth of the senior girls and almost a fifth of the junior girls were active in student government. Other organized activities in which 10 percent or more of the girls were active included dramatics, school paper or annual, hobby clubs and Hi-Y or Tri-Y. The only organized activities listed in which less than 5 percent of the girls were active were debate and Future Homemakers of America. (Since the percentages above are based on responses of students who reported the extent of participation in each activity listed, the extent of participation may be overstated. It is quite possible that students who did not participate in a particular activity may have been more likely to leave the question unanswered.)

We asked the students, "Are there any activities you would like to take part in that you aren't now participating in?" In response to this question, a substantial number of students indicated that they did have such desires. We did not attempt to discover why these students are not active in existing programs of organized activities, nor do we have any specific suggestions concerning possible action by the schools to meet the apparent unmet demand.

The proportion reporting a desire to participate in specified activities were as follows: school paper or annual, 28.1 percent; student government, 26.3 percent; athletics, 20 percent; dramatics, 18.1 percent; music, 16.3 percent; hobby club, 12.4 percent; debate, 12.1 percent; pep club or rallies, 8.5 percent; Hi-Y or Tri-Hi-Y, 6.6 percent; FFA or FHA, 2.7 percent. Eight percent indicated a desire to participate in church youth groups. Only 21 percent failed to list at least one desired additional organized activity.

School administrators in the individual schools participating in the study will be provided with information concerning the apparent unmet demand for specific types of organized activities in their schools for such consideration as they may wish to give to it.

School Subjects Liked Best

Table C-15 shows the responses which students gave to the question, "What school subjects do you like best?" Students were permitted to mark more than one subject. Very few students (0.6 percent) manifested total alienation from school by stating that they like no school subjects. (In this connection we should recognize, however, that most of the completely alienated students leave school prior to the junior year of high school.) The six most popular subjects, in order of popularity are: history, physical education, English, art and music, biology, algebra. Four of these subjects are "solids." These data do not support the popular stereotype of the student as one who likes only easy subjects. Physics and chemistry appear at the bottom of the list. As would be expected, boys are more likely than girls to be interested in mathematics, physical sciences, shop, and agriculture. Girls are more likely than boys to like humanities courses, business, and home economics.

Vocational Training Students Think Should Be Available

Students were asked what types of vocational education they thought should be available in high school. Responses (see Table C-16) indicate that a large proportion of the students appreciate vocational courses in high school. The courses which received the most support are the most likely to result in marketable skills, namely, business training (64.3 percent) and training in skilled trades (58.5 percent). Differences between the patterns of responses of girls and boys suggest that students are most likely to be interested in courses which could be of direct benefit to them, but the large number of students endorsing vocational courses indicates that many students take a broader view.

Nearly half of the sample (45.9 percent) marked the response, "A course in careers so that I would know what is involved in various jobs." This seems to indicate that many students feel that they do not have adequate knowledge about occupations and feel that they could benefit from a systematic presentation of more information about the occupational world.

As would be expected, the demand for various types of vocational education varies from school to school. An examination of Table 5 makes this very clear. Only 8.2 percent of the students in one school thought that vocational agriculture should be offered, 62.5 percent of those in another school thought that it should. The range of the proportion thinking that each course should be available is as follows: home economics, 35.1 percent

TABLE 5 - VOCATIONAL TRAINING STUDENTS THINK SHOULD BE AVAILABLE,
BY SCHOOL^a

Courses	Percent in Each School											
	A	B	C	D	E	F	G	H	I	J	K	L
Agriculture	8.2	16.1	12.7	31.2	40.1	21.6	53.6	62.5	22.4	29.7	26.5	44.1

Number of Respondents	801	616	511	337	302	102	97	72	49	37	34	34
Number of Nonrespondents	22	34	17	14	10	0	5	0	0	2	4	0

^aBased on responses to question 14 in form A of the student questionnaire. Percentages total to more than 100 because more than one response could be marked by the respondent.

to 59.7 percent; business training, 32.4 percent to 73.3 percent; industrial arts, 23.6 percent to 70.6 percent; training in skilled jobs, 29.7 percent to 68.9 percent; trades for girls, 20.6 percent to 41.7 percent; a course in careers, 32.4 percent to 57.1 percent; counseling, 29.4 percent to 54.1 percent.

The level of demand for a given vocational subject in a school probably reflects the student's perception of the benefit that that subject would be to him. This would, in part, reflect the occupational structure of the community and the attitudes of parents. The presence of a good and popular program could, however, create its own demand. Students in a school where a certain course is not offered may have failed to check that course because they were not aware of the benefits that they could derive from it.

Attitudes Toward Vocational Education

Students were asked to respond to a series of statements relevant to vocational education in the high school curriculum by indicating the proportion of the students in their school who held the attitude described in each statement. The responses appear in Tables C-17 through C-25.

An examination of these tables suggests that although vocational education was not ranked very high by most students, few students would exclude such courses from the curriculum. A substantial minority felt that their high school should concentrate more on vocational education than it currently does.

We were interested in learning the extent to which schools differ in the cultural definition of vocational education which is present among the students. Data relevant to this question are presented in Table 6.

Schools do differ in respect to the proportions of students having attitudes favorable or unfavorable to vocational education in the curriculum. This is indicated most clearly by the responses of students in two schools to the first four statements. The largest school (823 students) was lowest in the proportion of students feeling that the high school curriculum should be more closely related to specific jobs, lowest in proportion feeling that there should be more emphasis on vocational and technical courses, and lowest in proportion feeling that high school should concentrate more on skills useful in jobs. It was highest in the proportion saying that every student should try to go to college. The school with 312 student respondents was highest on the first three questions and lowest on the fourth.

TABLE 6 - PERCEIVED ATTITUDES OF STUDENTS TOWARD VOCATIONAL EDUCATION
IN THE HIGH SCHOOL CURRICULUM, BY SCHOOL^a

Statements	Percent saying "All of Them" or "Most of Them" Agree											
	A	B	C	D	E	F	G	H	I	J	K	L
The high school curriculum should be more directly related to specific jobs.	12.8	20.5	19.0	22.8	31.9	22.7	23.2	26.1	17.0	22.6	23.5	21.8
There should be more emphasis on vocational and technical courses and less on college preparation.	7.5	14.5	13.4	15.6	22.8	15.3	9.9	11.9	12.8	8.1	19.4	9.4
High school should do more to provide students with skills useful in jobs and should not worry so much about college preparation.	11.2	16.3	13.2	16.8	27.8	17.4	12.6	20.9	23.9	10.8	31.4	12.5
Every student should try to go to college. If he can't make it there he can always get an ordinary job.	68.6	45.0	49.2	49.2	33.4	39.8	41.1	34.4	41.3	35.1	36.1	35.1
Courses like welding and wood working have no place in today's high school.	8.7	2.4	5.8	2.6	5.1	9.2	6.6	4.5	2.1	10.8	0.0	6.0
Students enrolled in vocational courses generally don't have the ability to master college preparatory courses.	27.9	23.8	20.8	20.7	19.0	21.4	8.9	23.9	12.8	6.1	8.8	24.2
Business courses like typing and shorthand are as important for girls as are college preparatory courses.	61.4	64.9	64.1	67.3	66.3	62.2	59.1	77.3	70.2	56.7	75.8	59.4
Shop courses are good preparation for the kind of work many students will be doing.	42.7	60.8	47.3	50.0	40.5	42.9	49.4	62.7	38.3	37.4	47.0	58.1
In modern society the skilled craftsman is as important as the scientist or professional.	38.1	53.0	41.5	47.8	47.0	49.0	41.1	46.2	31.9	43.2	60.6	37.5

^aBased on responses to question 62 in form A of the student questionnaire.

Attitudes Toward School

Students were asked to respond ("agree," "neither agree nor disagree," or "disagree") to a series of statements depicting attitudes toward various aspects of school. The statements (presented in order of the proportion agreeing) and the percent agreeing with each are presented below:

<u>Statements</u>	<u>Percent</u>
Education is important in preparing for a job	95.5
I appreciate the opportunity to learn more	76.9
Most of my teachers are very helpful	65.9
I like school very much	42.4
I often watch TV instead of doing homework	40.8
Classes are boring so I watch the clock	30.3
I enjoy lunch time most	21.6
Teachers are most helpful to good students	18.7
School is difficult for me	16.2
I would rather read than go to a movie	15.4
High school is 'serving time' until I get out and go to work	10.8
The most important aspect of school is the diploma	6.8

Nearly all students feel that education is important in preparing for a job. Most students displayed positive feelings about school by agreeing that they appreciate the opportunity which school provides them to learn and that their teachers are helpful. Less than half of the students agreed with the statement "I like school very much," but only 8.9 percent disagreed with it. Nearly one-third of the students indicated that they find classes boring. A minority of the students revealed some alienation from school by saying that lunch time is the most pleasant part of the day, and that teachers show favoritism to the best students. Only a very few students felt that the diploma is the most important thing that one gets from school. Most of today's high school students recognize the importance of education and apparently derive some satisfaction from it. Only a minority appear to be alienated from school, but this minority is large enough numerically to be the subject of serious concern.

OCCUPATIONAL ASPIRATIONS AND EXPECTATIONS

To ascertain occupational aspirations and expectations, students were asked, "What occupation would you most like to have as your career if you could do whatever you chose?" They were also asked, "What occupation do you really expect to have as your life's work?" Responses to these questions, classified according to the census categories and shown separately for boys and girls and juniors and seniors, are presented in Tables C-8 and C-9. In Table 7 responses of the students are compared to the actual occupational distributions of the labor force in Washington and in the United States. (It should be noted that a large number of students did not respond to the questions on occupational aspirations and expectations. Eight and one-half percent of the total sample, and 11.5 percent of the boys, did not specify an occupational aspiration. Nineteen percent of the total sample, and 28.4 percent of the boys, did not answer the question on expectations. Since percentages in Table 7 are based on the number of respondents, they can be used to make generalizations about only those students who have specified occupational aspirations and expectations. The patterns might be quite different if those not answering were placed in the categories they will eventually select.)

Among the respondents, professional occupations were desired by 62.8 percent and 43.1 percent said that they expected to be professionals. The reduction was due principally to the expectations of many girls that said they will be housewives; fifty-seven percent of the boys who provided information said they expected to be professionals. (As noted in footnote C of Table 7, housewives have been classified as private household workers. The occupational expectations of girls will be described in greater detail later.)

The occupational aspirations and expectations of students who participated in this study differed relatively little from those of students who participated in the 1964-65 study of students in rural high schools. Slightly fewer students in that study desired or expected to be professionals. Fewer of the boys desired or expected to be managers. More of the boys desired and expected to be farmers and craftsmen. Fewer of the girls listed professional occupations as their aspirations, more listed housewife, and more listed clerical work (9).

Viewed over a longer time perspective, there appears to have been a considerable increase in preferences for professional occupations. A much smaller proportion (37 percent) of the 1954-55 Washington high school seniors aspired to enter professional occupations (10).

TABLE 7 - OCCUPATIONAL ASPIRATIONS AND EXPECTATIONS
OF HIGH SCHOOL JUNIORS AND SENIORS IN WASHINGTON COMPARED TO
OCCUPATIONAL DISTRIBUTION OF THE WASHINGTON^a AND
UNITED STATES^b POPULATIONS

Occupational Categories	Aspirations Percent	Expectations Percent	Washington ^a Percent	United States ^b Percent
Professional	62.8	43.1	13.0	11.2

^aUnited States Census of Population, 1960, Washington, Detailed Characteristics, Table 120.

^bUnited States Census of Population, 1960, United States Summary, General Social and Economic Characteristics, Table 89.

^cThe occupation of housewife is included in this category. It would not be included in the census category of employed persons.

There were substantial differences among the schools included in the study. For example, the proportion of respondents aspiring to professional or technical occupations ranged from 48.9 percent to 70 percent and the proportions expecting to enter such occupations ranged from 18.6 percent to 47.5 percent. The proportions aspiring to be craftsmen ranged from 2.1 percent to 17.6 percent while the proportions expecting to be craftsmen ranged from 3.6 percent to 19.7 percent. Details are presented in Appendix Tables C-52 and C-53. These differences do not appear to be primarily due to size of school, but rather to other factors, including the socio-economic status and occupational composition of the community.

There were, as expected, differences between the occupational aspirations of girls and those of boys. Girls were less likely to be uncertain about their occupational goals or expectations. Only 5.5 percent of the girls, as opposed to 11.5 percent of the boys, failed to answer the question on aspirations. The proportion of girls not answering the question on expectations was only one-third as large (9.6 percent compared to 28.4 percent) as the proportion of boys failing to answer the same question. Girls were more likely than boys to say they aspired or expected to enter clerical and service occupations. Boys were more likely than girls to say they aspired or expected to enter managerial occupations or crafts.

Homemaking and Work Plans of Girls

During the past generation there has been a marked increase in the number of women working outside the home. In order to determine the role which high school girls expect work to play in their lives, the researchers asked girls answering the questionnaire to mark one of a group of categories which combined work and homemaking in various ways. Results are presented in Table C-11.

Only 3.8 percent of the girls indicated that they did not want to marry. Nearly three-fourths of the girls (72.7 percent) said that homemaking would be their major interest. Marriage and family life are apparently strong values for teenage girls. However, few girls feel that they will want to spend all of their lives at home. Only 12.1 percent said that they would not want to work at all after marriage. Girls were more likely to see themselves combining family life with occasional or part-time work than they were to think of any other combination. The most popular single combination (43.5 percent) was homemaking with occasional or part-time work. However if we add the responses to the last four categories in Table C-11, we find that 44.4 percent of the girls indicated that they would like to work much of their time.

Further information concerning the extent to which girls plan to participate in work outside the home can be found in Tables C-9 and C-10. Girls who had said that they expected to be housewives were asked whether they expected to have another occupation and if so what it was. About 40 percent of the girls listed housewife as their occupational expectation. Two-thirds of these girls said that they expected to have an occupation other than housewife. Thus only 13.3 percent of the girls who responded to the question on occupational expectations failed to indicate an expectation of participation in some occupation other than or in addition to that of housewife.

These data indicate that most Washington girls now nearing the age for marriage and/or entry into the labor force feel that work outside the home will play a major role in their lives.

Plans for Occupational Preparation

Once a student has selected an occupation he must formulate some plan for gaining entry into it. To gather information relevant to the question of how students conceptualized the problem of preparing for an occupation, the researchers included a question which asked students what they think they must do to prepare themselves for work. The results appear in Table C-12. Five percent of the students indicated that they had never thought of the problem, 1.9 percent felt that the job of their choice would require no special preparation, and 2.5 percent said they would wait until they found a job before worrying about preparation. Just over half of the respondents thought that their task would be to select a specific occupation and prepare for it. One-third of the respondents indicated a belief that they could postpone choice of a specific occupation while acquiring skills that would be useful in several jobs.

Occupational Plans and Mobility Expectations

Choice of an occupation affects and can be affected by choice of a place of residence. How do high school students, living in an era where geographic mobility is common, perceive the relationship between occupation and mobility and how do they feel about moving from their home community? Only about one-fourth of the students believed that they would be able to find the kind of a job they want and live the way they would like to live in the home community (see Table C-14). Nearly 40 percent indicated that they thought they would have to move to achieve these goals. Most students did not appear to be disturbed by the prospect of moving from their home community (see Table C-13). Over forty percent

said they would prefer to leave; another 28.7 percent did not care whether they would stay or leave; only 25.0 percent expressed a preference to stay; and a mere 3.5 percent said that they definitely want to stay.

DISCUSSION

Although we have not presented evidence to substantiate this view, it seems highly probable to the investigators that the high levels of educational and occupational aspirations and expectations revealed by these data reflect the hopes and expectations of parents as well as those of the students themselves. These, in turn, rest upon their perceptions of the occupational opportunity structure including educational requirements for occupational competition.

Granting that only a fourth of the respondents appeared to be primarily oriented to vocational-technical education, a much larger proportion indicated a desire to take some vocational education during their careers. An even larger number felt that high schools should offer vocational training of various types. In addition, it is evident from the responses that most students who expect to graduate from college feel this way. We do not know why this should be so, but it is possible that some of the college-bound wish to gain skills which they can use to earn their way through college. Perhaps some see the skills they will acquire as useful or enjoyable in their personal lives, apart from their occupational value.

A few comments should be made about the meaning and consequences of educational aspirations and expectations. The differences indicate that not all students expect to attain the goals they would like to attain. Experience also shows that many students who expect to get certain types of education will not do so. Responses to questions concerning certainty of decisions indicate that students themselves recognize that achievement of their goals is problematic. Nevertheless aspirations and expectations will influence the behavior of individuals. The student who expects to attend college or vocational school, for example, will probably plan his high school curriculum to make this possible. Interestingly, the findings of a 1962 nation-wide study conducted by the University of Pittsburgh show that of those students who indicated that they planned to attend college, 92 percent of the boys and 78 percent of the girls actually did so (3).

We noted earlier that a higher proportion were sure that they knew what further education they wanted than were sure that they would be able to get the education they planned to obtain. This may reflect a tendency of students to make plans conditional upon their success at each stage or it may indicate that some students who do not think that they can achieve that which they wish to achieve are unable to settle on an alternate goal.

Given the high occupational goals reflected in the percent of students who aspire or expect to enter the professions, it is somewhat anomalous that the proportion of students aspiring or expecting to enter the managerial ranks is less than the proportion of employed persons in this category. Perhaps some students who aspire to be managers phrased their answers in such a way that this fact could not be recognized. But it is also possible that managerial occupations are not as attractive to today's youth as are other high level occupations.

Very few students desired or expected to become farmers. This suggests that many are aware that the proportion of farmers in the labor force is decreasing, and there are relatively few attractive career opportunities on farms.

The fact that many students (especially boys) failed to name a specific desired or expected occupation suggests that many students leave high school without knowing what they want to do for a living and, even more, leave without knowing what they will actually do. Their uncertainty may be due in part to inadequate information coupled with half-truths about the probable impact of automation on unskilled and semiskilled occupations which in the past have been the predominant entry occupations for young people.

The finding that fewer girls than boys appeared uncertain about their occupational plans may reflect the fact that the choice of an occupation is less problematic for girls since nearly all will be homemakers (though many will have other jobs too). Girls are only a little less likely than boys to aspire to professional occupations but much less likely to expect to enter them. This difference should not be interpreted as showing a greater tendency for girls to scale down their expectations. Most of the shift results from the fact that many girls indicated professional occupations as aspirations but housewife (classified with private household workers) on expectations. Girls who said that they expected to be housewives were asked whether they expected to have some other occupation in addition, and if so, what. Half of those who responded to this question listed a professional occupation. The drop between girls' aspirations and their expectations may not be as great as it first appears. (Girls are more likely than boys to aspire or expect to enter clerical and service occupations. Boys are more likely than girls to aspire and expect to enter managerial occupations and crafts.)

We observed that there were substantial differences among the schools in our sample in respect to students' evaluations of vocational education. There were also differences among schools in the proportion of students aspiring and expecting to obtain each of the

various kinds of education and enter each of the various occupational fields. The list of possible reasons for these differences includes the socio-economic status of students' families, family and community values, the occupational structure of the community, and the attitudes of teachers and administrators toward vocational education. It is also probable that differences in student culture have an effect on the educational and occupational planning of students. If students who are equal in other respects are compared, we suspect that those in schools where many students hold negative attitudes toward vocational courses are less likely to be oriented toward vocational education (and the jobs for which it prepares) than are those in schools where few students hold negative attitudes toward vocational education.

CONCLUSIONS AND IMPLICATIONS

CONCLUSIONS

The results described above indicate that juniors and seniors in Washington high schools have very high levels of educational aspirations and expectations. Most of them apparently like school quite well and appear to be convinced that further education beyond high school is desirable.

Even though the great majority indicated a preference for a college education and a professional occupation, a substantial minority, nearly one fourth, appeared eager for further vocational-technical education.

Occupational aspirations and expectations were also found to be high. About six out of ten students aspired to enter professional occupations. More than four out of ten students expect to enter professions.

IMPLICATIONS

We found that very few students in our sample aspired or expected to become sales workers, operatives, or laborers. The proportion of respondents who aspired or expected to be clerical workers or craftsmen was also much smaller than the proportion of these occupations in the labor force. If the occupational structure does not change drastically, many students who neither desire nor expect to enter a blue-collar occupation or a lower-level white-collar occupation will actually do so.

More than six out of ten respondents aspired to professional or technical occupations. Even though there is a substantial drop between aspirations and expectations, the proportion of students expecting to be in the professional and technical occupations is nearly four times as large as the percent of United States labor force in this category and more than three times as great as the percent of the Washington State labor force in these occupations. Furthermore, as we have already noted, much of the drop between aspirations and expectations is accounted for by the fact that many girls who aspired to a professional occupation expect to be housewives.

If the structure of the existing labor force is used as a criterion, it appears that the desires and expectations of many young people are unrealistically high. At the same time, it should

be recognized that the occupational structure is likely to be greatly modified in the future so that there may be need for many more professionals than in the past.

Today's high school students have apparently accepted the models of success promulgated by society. These high levels of aspirations and expectations are, no doubt, functional for society in that they motivate a large number of young people to strive for positions which are important to the economy. We have yet to learn the consequences of filling many of the lower paid and less prestigious occupations with people who were frustrated in their pursuit of higher occupational goals.

American educators and public leaders have, especially since the beginning of the space race, been attempting to motivate students to continue their education after high school. Data presented in this report indicates that this campaign has been successful. Educators and public leaders must now deal with the consequences of this success. Unless post-high school educational facilities are greatly increased, many students who wish to continue their education will be unable to find openings. The families of many students who aspire to college or other types of education will not have the resources to pay for it. Unless these problems can be overcome, many students will experience frustration and the society will not achieve the gains in skilled personnel and educated citizens which it otherwise might.

It appears that a counseling problem has been created by the high levels of aspirations. Many students may be aspiring or expecting to complete education for which they do not have the intellectual capability. Counselors are thereby presented with a great challenge in helping students assess their own abilities and select realistic goals without suffering a damaging loss of self-esteem in a society which emphasizes the importance of upward mobility and success.

Finally, since the majority of students apparently feel that it is important to make a fairly specific occupational choice before starting their training, it would seem wise to present sufficient information about occupations to permit well informed choices. This might well be done systematically through the curriculum.

SUMMARY

This is a report of the Educational and Occupational Aspirations Study conducted as a part of the Vocational-Technical Education Research and Development Project at Washington State University. The principal objective of this study is to identify the social and social-psychological factors associated with different patterns of educational and occupational aspirations. Special emphasis is placed on the characteristics, values, attitudes, educational plans, and occupational plans of those students who do not expect to graduate from college. The results of this study should have important implications for the field of education.

The data for this study consist of information about 6795 juniors and seniors enrolled in a stratified random sample of twenty-six high schools in Washington State. Data were collected by means of questionnaires completed by all students, interviews with a sub-sample of students, questionnaires completed by parents of the sub-sample of students, questionnaires completed by counselors, and information from school records.

The substantive data presented in this report consist of an analysis of the responses of 3100 students to selected questions in form A of the student questionnaire. The principal purpose of this analysis was to provide personnel in the schools where form A instruments were used with information about students' aspirations, expectations, and attitudes. The highlights of the findings are presented in the following paragraphs.

Educational aspirations and expectations were both relatively high but aspirations were slightly higher than expectations. Nearly one hundred percent of the students expected to complete high school. Over ninety percent expected to get some post-high school education. Three-fourths of the students expected to attend college (including junior college) and 43.5 percent expected to graduate from college. Fourteen percent of the students expected to attend graduate or professional school. When vocational-technical and business training offered in junior colleges is combined with that offered in other schools, we find that over one-fourth of the students expected to complete their education with this type of training.

Nearly all of the students expressed a desire to have vocational courses in the high school curriculum. The courses receiving most support were those most likely to result in marketable skills. Nearly half of the sample felt that high schools should offer a course providing information about different careers.

Students were asked about their attitudes toward vocational education in the high school curriculum and toward school itself. While vocational education is not ranked high by most students, few students would exclude vocational education courses from the high school. Even those who expect to obtain advanced college degrees appear to believe that vocational courses are valuable.

Most of today's high school students recognize the importance of education and derive some satisfaction from school. A small proportion of the students appear to be alienated from school; in this connection it should, of course, be noted that most of the alienated drop out prior to the last two years of high school.

Occupational aspirations and expectations were high. More than six out of ten respondents aspired to enter professional occupations. Relatively few students aspired to be farmers, sales workers, operatives, or laborers. The proportion expecting to be craftsmen or clerical workers was smaller than the proportion of the labor force currently in these categories.

Uncertainty about the future is reflected in the failure of 28.4 percent of the boys to name the occupation they expected to have as their life's work.

Comparison of responses revealed a considerable amount of difference between schools in student's evaluation of vocational education courses, in the proportion of students aspiring or expecting to attain different types of education, and in the proportion of students aspiring or expecting to enter different occupations.

The data suggest that most high school students have accepted the values of educational and occupational achievement promulgated by the society. Most students expect that they will be able to achieve their educational goals. If they are to be enabled to do so, the facilities and faculties of community colleges and other institutions of higher learning must be enlarged.

Unless employment in professional and technical occupations expands greatly in the future, a substantial proportion of Washington high school students will be unable to achieve their high career goals even though they manage to obtain the type and amount of education desired.

The amount of uncertainty found to exist among these adolescents suggests a need for presenting sufficient systematic information about occupations through the curriculum to permit them to make well-informed choices.

APPENDIX A:
METHODOLOGICAL DETAILS

SAMPLE DESIGN

The population for this study consists of all juniors and seniors enrolled in public high schools in the State of Washington during the 1965-66 school year, except those enrolled in the 30 rural high schools which participated in the 1964-65 study of farm youth conducted by the Department of Rural Sociology at Washington State University (8). Schools were divided into strata according to size of combined junior and senior classes as follows:

750 and above
500 to 749
250 to 499
100 to 249
50 to 99
0 to 49

Each of the four strata having less than 500 students was divided into two equal strata, according to the proportion of students enrolled in vocational courses.

The schools within each stratum were assigned numbers. Using a table of random numbers, schools were drawn from each stratum until the proportion of students drawn from that stratum equalled the proportion which that stratum was of the total population of juniors and seniors in the state.

The sample schools in each stratum were divided into two groups (A and B). This was accomplished by randomly assigning the first school to either A or B and then alternately assigning the remainder of the schools.

Two alternate schools were drawn from each stratum. If a sample school refused to participate, it was replaced by one of the alternates.

Questionnaires were administered to all of the juniors and seniors in each school who were willing to participate.

A sample was selected from the completed questionnaires for interview. In the A sample schools, the interview sample was selected in the following way. The questionnaires were sorted into four piles: (1) males who plan to attend a junior college or get less education, (2) males who plan to attend a college or university or get more education, (3) females who plan to attend a

junior college or get less education, (4) females who plan to attend a college or university or get more education. In the schools where interviews were conducted first, a 20 per cent systematic sample was drawn from each pile. Later, the sampling ratio was increased to 25 per cent.

In the B sample schools, the criteria for including females in the interview sample were different from the criteria for including males. Females were sorted into three categories, according to responses on question 45 of the Form B student questionnaire: (1) those who said they did not want to spend much effort in homemaking, (2) those who said they did not want to work at all, or only wanted to work part time after marriage, and (3) those who said that they would want to work most of the time or that work would be their major interest but they still wanted to have a family. All girls who responded in category (1) were included in the sample. An equal number of girls from each school who answered in category (2) were included in the interview sample. No girls from category (3) were included in the sample. Males were sorted into four categories according to their highest level of educational aspirations: (1) quit high school or graduate from high school, (2) take business or vocational training either in business or vocational school or in a junior college, (3) attend a junior college, take a regular college course, or attend a four-year college or university, (4) graduate from a college or do graduate work. The sampling pattern was varied slightly from school to school in order to maximize the number of males with low educational aspirations in the sample. In general, either 45 or 50 per cent of the males in each school were included in the sample, all males who indicated high school graduation or less as their highest level of aspirations were included in the sample, the remainder of the sampling quota for each school was distributed equally between the three other categories of educational aspirations.

School counselors were asked to complete a brief questionnaire for each student in the interview sample. Information concerning school grades and I. Q. scores was collected from school records for each student in the interview sample.

A parent's questionnaire was mailed to either the mother or the father of each student who was interviewed.

ADMINISTRATION OF THE CLASSROOM QUESTIONNAIRE

Questionnaires were administered in the schools by classroom teachers.

The principal in each participating high school was asked to assume responsibility, or to designate some other person to do so, for receiving the questionnaires, arranging with teachers for their administration, collecting completed questionnaires, and returning them to Washington State University. The person who performed these tasks was paid a token honorarium of \$20 (more in some of the larger schools) for his services.

Questionnaires to be used in a school were sent to the person in that school who had assumed responsibility for making local arrangements. He was asked to distribute the appropriate number of questionnaires to each teacher. He was also asked to explain the study to the teachers and to give them a set of written instructions prepared by the researchers.

Instructions emphasized that participation was voluntary and that the information provided by students would be given strict confidential treatment.

In an attempt to minimize the possible effect of intervention by teachers, teachers were asked to refrain from interpreting any question for the students and each questionnaire was accompanied by a letter explaining the study to the student.

In general, the administration of questionnaires went smoothly. There were, however, a few cases in which school personnel either misunderstood, or chose not to comply with, the instructions. The researchers had asked that questionnaires be administered to all students in the junior and senior class. In one sample A school, questionnaires were given to such a small proportion of the students that that school had to be eliminated from the study. Some other schools did not secure participation as complete as would have been desirable. Some of the conversations which the staff director had with teachers during the interviewing visits indicated that some teachers did not understand the purpose of the study and the importance of certain instructions they had received. Classroom administration by teachers seems to be a sound policy but it would probably be wise, when feasible, to have a member of the project staff go to each school to explain the study to the teachers and to supervise their administration of questionnaires.

OBTAINING THE COOPERATION OF THE SAMPLE SCHOOLS

An individually typed form letter was sent to the superintendent of each of the sample schools requesting cooperation. The letter explained the objectives of the study and the procedures to be followed in the administration of the questionnaire, including precautions to be taken to insure confidentiality of information. The letter suggested that it might be desirable to contact the board of directors of the school. Copies of the project outline and copies of a near final version of the questionnaire were enclosed.

If no response was received from the superintendent within two weeks, the staff director either wrote to him again or called him on the telephone. In some cases, the staff director visited the schools and explained the study in more detail to school personnel.

All of the sample A schools which were contacted agreed to participate. Before the questionnaires were administered in the Seattle school district, however, a public furor developed over the use of autobiographical essays including family data by a high school counselor. Because officials in the Seattle school district thought that additional negative public reaction might be created by participation in a questionnaire study, they decided to withdraw from the study. Therefore, one school was lost from the A sample. Because of the late date, no replacement was made for this school. Questionnaires completed in one school (outside of the Seattle area) were not usable because the specified administration procedures were not followed.

Five of the sample B schools which were asked to participate declined to do so. Some of these were schools that had been drawn as replacements. All sample B schools that declined to participate were replaced by alternates. One of the sample B schools agreed to participate, but did not obtain the names of participating students. Consequently, student questionnaires are the only data available from that school.

STUDENT INTERVIEWS

Student interviews were conducted in the schools by graduate and undergraduate students in the social sciences.

Training sessions were conducted prior to the actual interviewing. Each interviewer was given and instructed to read a copy of the project outline and copies of all data-gathering instruments used in the study. In the training session the staff

director explained the study and the interviewing techniques. Each interviewer conducted at least one practice interview.

Prior to the arrival of the interviewing team at a school, the person in charge of local arrangements was contacted by telephone or letter and informed of the number of interviews to be conducted. He was asked how many interviewers could be accommodated and to arrange for space in which interviews could be conducted. He was sent a list of the names of students to be interviewed and asked to schedule interviews.

When a team arrived at a school, the team leader contacted the local representative and cooperated with him in making arrangements. In all but a very few cases, school personnel were extremely helpful and cooperative. In a few schools it was necessary to return for a second time to interview students who had been absent on the first visit.

It was possible to interview 93.5 per cent of the students in interview sample A and 93.6 per cent of the students in interview sample B.

COUNSELOR'S QUESTIONNAIRE

The counselor or counselors in each school were asked to complete a brief questionnaire concerning each student in the interview sample that they knew well enough to evaluate. Copies of these questionnaires appear in Appendix B. A package of these questionnaires, together with the names of the students to be evaluated, was sent to the counselor prior to the visit of the interviewing team or left by the interviewing team. In the larger schools, where there were many students to be evaluated, the counselors were offered compensation for their effort. Counselors were generally cooperative; questionnaires were returned from all schools.

GRADE AND I. Q. INFORMATION

The study representative in each school was asked to have some trusted person collect information concerning grades and I. Q. scores from the school records. This person was paid by the study. This method of data collection was successful for grades but in a few cases the I. Q. information obtained is somewhat difficult to evaluate. It would probably be wiser to have information collected from records by a person more directly aware of the needs of the project.

PARENT'S QUESTIONNAIRE

Either the mother or the father of each student who, during the interview, was willing to provide the name and address of his parents was mailed a questionnaire with a postage free return envelope. A letter explaining the purpose of the study and asking cooperation accompanied the questionnaire. If a reply had not been received within two weeks, a follow-up letter was sent. If a reply was not received in an additional two weeks, a second follow-up letter and a new copy of the questionnaire was sent. The rate of return was 78 per cent for the parents who received form A of the questionnaire and 77 per cent for the parents who received form B of the questionnaire.

CODING AND EDITING OF DATA

All completed questionnaires and interview schedules were edited and coded by a staff of coders working under the direct supervision of the staff director. Responses to all open ended questions were assigned numerical codes. Responses to all other questions were checked to determine whether the respondent had marked his answer in accordance with instructions. After one coder had coded and edited an instrument, it was checked by another coder.

COMPUTER PROCESSING

Because of the work load of key punching facilities, there was a considerable time lag between the completion of coding of most instruments and the completion of key punching.

At the present time, computer analysis of data is going as smoothly as can be expected for such large masses of data. The beginning of work was delayed, however, by difficulty in the development and adaptation of programs. Considerable difficulty in achieving uninterrupted computer service during the next few months is anticipated because the Washington State University Computing Center is changing over from an IBM 709 computer to an IBM 360. This change in machines will necessitate a translation and retesting of programs.

WASHINGTON STATE UNIVERSITY
DEPARTMENT OF EDUCATION

Dear Student:

Washington State University is making a scientific study of the factors that influence the educational and occupational desires and plans of high school juniors and seniors in the State of Washington.

We are going to ask about 4,000 students in schools all over the state to fill out this questionnaire. The information you and other students provide will help teachers and school officials plan educational programs that meet the needs of students. This information will also provide answers to scientific questions.

Previous research has shown that students with similar scholastic ability may have very different educational plans. There may be several reasons for this. These include family background, the attitudes of friends, personal experiences in the classroom, other school related activities, and encouragement from teachers, counselors, or others. We hope to be able to determine the importance of each of these things on the basis of answers to the questions in this questionnaire.

Names and addresses are desired so that research workers can contact some students later to ask additional questions which have a bearing on educational and occupational plans. Special precautions have been set up to insure that your replies will be kept confidential and not revealed to anyone. After you write your name and address on the card which is attached to the front of the questionnaire, remove this card and send it to the front of the room. All name cards will be placed in an envelope which will be sealed immediately. It will not be opened until it is delivered to Washington State University.

WORK RAPIDLY. DO NOT MULL OVER ANY QUESTION. If you are not sure about the meaning of a question just answer it in keeping with your general impression of what the question means. If you are not sure what answer is best, give the one that is closest to your own feelings or opinion and move on. Your first impressions are generally the best. Do not change your answer unless you feel it is absolutely necessary. Work as rapidly as you can without feeling rushed.

You are not required to answer this questionnaire or any question in it if you do not wish to do so. Participation is entirely voluntary. However, we hope that you will decide to cooperate by answering the questions frankly and honestly.

Thank you very much.

CONFIDENTIAL

DEPARTMENT OF EDUCATION
WASHINGTON STATE UNIVERSITY

EDUCATIONAL AND OCCUPATIONAL PLANS OF HIGH SCHOOL STUDENTS

	01
--	----

1. Sex

- (1) Boy
 (2) Girl

2. What grade are you in?

- (1) 11th
 (2) 12th

3. How old are you at your nearest birthday?

- (1) 14 or younger
 (2) 15
 (3) 16
 (4) 17
 (5) 18
 (6) 19 or older

4. Where do you live?

- (1) City (2,500 or more)
 (2) Town (under 2,500)
 (3) On a farm
 (4) Country, but not farm

5. What is your race? (optional)

- (1) White
 (2) Negro
 (3) Oriental
 (4) American Indian
 (5) Other (what?) _____

6. How much thought have you given to your future educational needs and plans?

- (1) None at all
 (2) Very little
 (3) Some
 (4) A great deal

7. Mark the boxes at the left of the phrases that best describe your desires for future education. (Check all that apply.)

- (1) Quit high school and not go to any kind of school again
 (2) Graduate from high school
 (3) Attend a business or commercial school (not college level)
 (4) Attend a technical or vocational school (not college level)
 (5) Attend a junior college - take a business or commercial course
 (6) Attend a junior college - take a vocational or technical course
 (7) Attend a junior college - take a regular college course
 (8) Attend a college or university
 (9) Graduate from a college or university
 (10) After graduating from college spend one or more years doing advanced study in a specialized field
 (11) Other (what?) _____

8. How certain are you that this is what you want to do about further education?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

20523

NAME _____

MAILING ADDRESS _____

NAME OF SCHOOL _____

AFTER WRITING YOUR NAME AND ADDRESS ON THIS CARD DETACH
IT FROM THE QUESTIONNAIRE AND PASS IT TO THE FRONT OF
THE ROOM.

9. Mark the blanks at the left of the phrases which best describe that education you think you will actually be able to get. (Check all that apply.)

- (1) Quit high school and not go to any kind of school again
 (2) Graduate from high school
 (3) Attend a business or commercial school (not college level)
 (4) Attend a technical or vocational school (not college level)
 (5) Attend a junior college - take a business or commercial course
 (6) Attend a junior college - take a vocational or technical course
 (7) Attend a junior college - take a regular college course
 (8) Attend a college or university
 (9) Graduate from a college or university
 (10) After graduating from college spend one or more years doing advanced study in a specialized field
 (11) Other (what?) _____

10. How sure are you that you will actually get the highest level of education you marked in question 9?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

11. If you plan to get further education after high school, please name the school or schools you plan to attend. (Examples: Eastern Washington State College, Renton Vocational School, Spokane Beauty College.)

- 11a. What subject do you plan to major in?

12. Since completing the eighth grade, how many semesters will you have studied each of the following subjects by the end of high school? Circle the appropriate number.

(1) Agriculture	0	1	2	3	4+	(8) History	0	1	2	3	4+
(2) Art and music	0	1	2	3	4+	(9) Home economics	0	1	2	3	4+
(3) Biology	0	1	2	3	4+	(10) Mathematics	0	1	2	3	4+
(4) Business	0	1	2	3	4+	(11) Physical ed.	0	1	2	3	4+
(5) Chemistry	0	1	2	3	4+	(12) Physics	0	1	2	3	4+
(6) English	0	1	2	3	4+	(13) Shop	0	1	2	3	4+
(7) Foreign language	0	1	2	3	4+	(14) Social studies	0	1	2	3	4+

13. What school subjects do you like best? More than one can be marked.

- | | |
|---|--|
| <input type="checkbox"/> (1) Agriculture | <input type="checkbox"/> (10) History |
| <input type="checkbox"/> (2) Art and music | <input type="checkbox"/> (11) Home economics |
| <input type="checkbox"/> (3) Algebra | <input type="checkbox"/> (12) Physical education |
| <input type="checkbox"/> (4) Biology | <input type="checkbox"/> (13) Physics |
| <input type="checkbox"/> (5) Business | <input type="checkbox"/> (14) Shop |
| <input type="checkbox"/> (6) Chemistry | <input type="checkbox"/> (15) Social studies |
| <input type="checkbox"/> (7) English | <input type="checkbox"/> (16) Trigonometry |
| <input type="checkbox"/> (8) Foreign language | <input type="checkbox"/> (17) I don't like any of them |
| <input type="checkbox"/> (9) Geometry | <input type="checkbox"/> (18) Other (what?) _____ |

02

14. What types of vocational training do you think should be available in your high school? Mark the types already available if you think they are important. More than one can be marked.

- (1) Agriculture
 (2) Home economics
 (3) Business training
 (4) Industrial arts
 (5) Training in skilled trades - for example, electronics, carpentry and mechanics
 (6) Training in trades for girls - for example, hair dressing and practical nursing
 (7) A course in careers so that I would know what is involved in various jobs
 (8) Vocational counseling to help me decide what job to choose
 (9) None, school should concentrate on academic subjects
 (10) Something else (what?) _____

15. How much of your school work are you interested in?

- (1) A lot
 (2) Most
 (3) Some
 (4) Little
 (5) None

16. Circle a number to show how you feel about each of the statements below.

	(1)	(2)	(3)	
	Agree	Neither agree nor disagree	Disagree	
(a)	1	2	3	I like school very much.
(b)	1	2	3	Most of my teachers are very helpful.
(c)	1	2	3	I often find myself watching the clock because my classes are so boring.
(d)	1	2	3	Lunch time is the most enjoyable time of the day.
(e)	1	2	3	School is difficult for me.
(f)	1	2	3	My teachers are the most helpful to the very good students.
(g)	1	2	3	The most important thing one gets out of high school is the diploma.
(h)	1	2	3	In my free time I would rather read than go to a movie.
(i)	1	2	3	In the evening I often find myself watching TV instead of doing my homework.
(j)	1	2	3	Education is important in preparing for a job.
(k)	1	2	3	High school seems to be little more than "serving time" until I can get out and go to work.
(l)	1	2	3	I appreciate the opportunity education gives me to learn more and broaden myself.

17. On your last report card did you get mostly: (Mark only one)

- (1) A's
- (2) A's and B's
- (3) B's
- (4) B's and C's
- (5) C's
- (6) C's and D's
- (7) D's
- (8) D's and F's

18. In which of the following organized activities do you participate? Circle a number to show how active you are in each.

	(1) Don't participate	(2) Not very active	(3) Quite active	(4) Very active	
(a)	1	2	3	4	Athletics
(b)	1	2	3	4	Music
(c)	1	2	3	4	Dramatics
(d)	1	2	3	4	Debate
(e)	1	2	3	4	School paper or annual
(f)	1	2	3	4	Student government
(g)	1	2	3	4	FFA or FHA
(h)	1	2	3	4	Hobby clubs
(i)	1	2	3	4	Pep club or pep rallies
(j)	1	2	3	4	Church youth groups
(k)	1	2	3	4	Hi-Y or Tri-Hi-Y
(l)	1	2	3	4	Others _____
(m)	1	2	3	4	_____
(n)	1	2	3	4	_____
(o)	1	2	3	4	_____

19. How many high office positions (president, vice president, captain) have you held in the organized activities that you marked in the question above? _____

20. Are there any activities you would like to take part in that you aren't now participating in? Mark all that apply.

- | | |
|---|---|
| <input type="checkbox"/> (1) Music | <input type="checkbox"/> (7) Church youth groups |
| <input type="checkbox"/> (2) Athletic | <input type="checkbox"/> (8) Hi-Y or Tri-Hi-Y |
| <input type="checkbox"/> (3) Dramatics | <input type="checkbox"/> (9) FFA or FHA |
| <input type="checkbox"/> (4) Debate | <input type="checkbox"/> (10) Hobby club |
| <input type="checkbox"/> (5) School paper or annual | <input type="checkbox"/> (11) Pep rallies or pep club |
| <input type="checkbox"/> (6) Student government | <input type="checkbox"/> (12) None of these |

21. On the following items compare yourself to the rest of your classmates. Circle a number to show how you think your ability to do the things listed compares to the ability of your classmates.

	(1) Very much below average	(2) Somewhat below average	(3) About average	(4) Somewhat above average	(5) Very much above average	
(a)	1	2	3	4	5	Read and understand textbooks and other material assigned by teachers.
(b)	1	2	3	4	5	Memorize and remember facts and figures.
(c)	1	2	3	4	5	Write term papers, book reviews and short reports.

	(1) Very much below average	(2) Somewhat below average	(3) About average	(4) Somewhat above average	(5) Very much above average	
(d)	1	2	3	4	5	Study and prepare for tests.
(e)	1	2	3	4	5	Use encyclopedias, dictionaries, and other types of reference.
(f)	1	2	3	4	5	Understand and use new materials presented in class such as: a theory in science, formula in math, the cause of a historical event.
(g)	1	2	3	4	5	Take good notes from lectures or out of class reading.
(h)	1	2	3	4	5	Recite in class: give oral reports, participate in class discussion.
(i)	1	2	3	4	5	Get along with most teachers.

22. On the scale below please circle the number which best represents the way you feel about yourself.
 EXAMPLES: I feel that I am slightly heavy, therefore, in the first sample (S-1) I circled the number "4" on the heavy side of the scale. In the next sample (S-2) I feel that I am very healthy; therefore, I circled the number "1" on the healthy side of the scale.

EXAMPLES:		Very	Slightly	Neutral	Slightly	Very	
S-1	light	1	2	3	4	5	heavy
S-2	healthy	1	2	3	4	5	unhealthy

	Very	Slightly	Neutral	Slightly	Very	
intellectual	1	2	3	4	5	not intellectual
fast	1	2	3	4	5	slow
successful	1	2	3	4	5	unsuccessful
sharp	1	2	3	4	5	dull
alert	1	2	3	4	5	not alert

03

23. **GIRLS ONLY.**
 Which of the following statements best describes what you think your interests and desires will be for most of your adult life? (Mark only one.)

(1) Homemaking will be my major interest; I will not want to work at all after I am married.

(2) Homemaking will be my major interest, but I will want to work occasionally or part time.

(3) Homemaking will be my major interest, but I also want to work most of the time.

(4) Work will be my major interest, but I will also want to have a family and be a homemaker.

(5) Work will be my major interest. I will not want to spend much effort in homemaking.

(6) Work will be my only interest. I don't want to marry.

24. Please circle a number to show whether or not each of the statements in this list agrees with your ideas of work.

	(1) Strongly agree	(2) Agree	(3) Neither agree nor disagree	(4) Disagree	(5) Strongly disagree	
(a)	1	2	3	4	5	Everyone who possibly can should work.
(b)	1	2	3	4	5	Even if I were financially secure and did not need a job I would probably work.
(c)	1	2	3	4	5	It is a person's duty to work.
(d)	1	2	3	4	5	If I did not work I would feel that I was not leading a "right life."
(e)	1	2	3	4	5	I find it hard to respect a man who doesn't work.
(f)	1	2	3	4	5	If I were financially well off, I think I could lead a perfectly happy and satisfying life without working.
(g)	1	2	3	4	5	A person who has never worked has missed a valuable experience.
(h)	1	2	3	4	5	If a person can live the way he wants to without working there is no reason for him to work.

GIRLS ONLY:

(i)	1	2	3	4	5	If I were married I would want my husband to do some kind of work even if he were financially secure and did not need a job.
-----	---	---	---	---	---	--

25. Which of the following statements best describes the things you think you must do in order to prepare yourself for the kind of work you think you want to do?

- (1) I have never thought much about what I should do.
 (2) I must decide on a specific occupation and prepare myself for it.
 (3) I will develop abilities or skills useful in a number of different jobs and later make my choice.
 (4) I am not going to worry about preparing for a job until I see what type of job I can get.
 (5) The type of job I will get doesn't require any special preparation.

26. After finishing your education do you want to live in the community you are living in now?

- (1) Yes, definitely
 (2) Yes, I would prefer to
 (3) I don't care
 (4) No, I would rather leave
 (5) No, I definitely want to leave

27. Considering the kind of job and way of life you eventually wish to have, do you think it will be necessary for you to move from your present community?

- (1) No
 (2) I don't know
 (3) Yes

28. What kind of occupation would you most like to have as your career if you could do whatever you chose?
(Please be as specific as you can.)

29. How sure are you that this is the occupation you really would want as your life's work?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

30. For the occupation mentioned in question 28, the one you would most like as your life's work, do you think your abilities are:

- (1) Very much above average
 (2) Above average
 (3) Just average
 (4) Below average
 (5) Very much below average
 (6) I don't know yet because I have not yet made a choice

31. If an opportunity occurred to work in the occupation you listed in question 28, would you be willing to complete the training and education necessary to get the job?

- (1) Yes
 (2) No
 (3) No occupation listed

32. What do you think are the possibilities that you might actually work at the occupation you listed in question 28?

- (1) Very probable
 (2) Quite probable
 (3) Chances are 50-50
 (4) Unlikely
 (5) None at all

33. What would be your father's (or stepfather's) attitude if you told him you were going to choose the occupation you listed in question 28 as your life's work?

- (1) Very favorable
 (2) Favorable
 (3) Indifferent
 (4) Unfavorable
 (5) Very unfavorable
 (6) I don't know
 (7) Does not apply

34. What would your mother's (or stepmother's) attitude be if you told her you were going to choose the occupation you listed in question 28 as your life's work?

- (1) Very favorable
 (2) Favorable
 (3) Indifferent
 (4) Unfavorable
 (5) Very unfavorable
 (6) I don't know
 (7) Does not apply

35. How much education do you think you would need to qualify for the occupation that you think you would really like to be in? (the one mentioned in question 28).

- (1) Don't know
 (2) I have enough now
 (3) High school graduate
 (4) Vocational or technical school
 (5) Business or commercial school
 (6) Some college, but not graduate from college
 (7) Graduate from college
 (8) Advanced study after graduation from college

36. Name some other occupations you would like almost as much as the occupation you listed in question 28.

- a. _____
- b. _____
- c. _____

37. What occupation do you really expect to have as your life's work? (Please be as specific as you can.)

38. How sure are you that you will actually have the occupation named in question 37 as your life's work?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

38a. GIRLS WHO LISTED HOUSEWIFE OR HOMEMAKER IN QUESTION 37: Do you also expect to have some other job or occupation? If yes, what occupation do you have in mind?

39. For the occupation mentioned in question 37, do you think your abilities are:

- (1) Very much above average
 (2) Somewhat above average
 (3) Just average
 (4) Somewhat below average
 (5) Very much below average
 (6) I don't know yet because I have not yet made a choice

40. How much education do you think you would need to qualify for work in the occupation that you say you expect to have? (the one mentioned in question 37).

- (1) I don't know
 (2) I have enough now
 (3) Vocational or technical school
 (4) Business or commercial school
 (5) High school diploma
 (6) Some college, but not graduate from college
 (7) College degree
 (8) Specialized study after graduation from college

This is not the end of the questionnaire. Please turn it around and answer the succeeding pages.

41. What would be your father's (or stepfather's) attitude if you told him you were going to choose the occupation you listed in question 37 as your life's work?

- (1) Very favorable
- (2) Favorable
- (3) Indifferent
- (4) Unfavorable
- (5) Very unfavorable
- (6) I don't know
- (7) Does not apply

42. What would be your mother's (or stepmother's) attitude if you told her you were going to choose the occupation you listed in question 37 as your life's work?

- (1) Very favorable
- (2) Favorable
- (3) Indifferent
- (4) Unfavorable
- (5) Very unfavorable
- (6) I don't know
- (7) Does not apply

43. What is the marital status of your mother and father?

- (1) Both alive, living together
- (2) Both alive, separated
- (3) Both alive, divorced
- (4) Father not living
- (5) Mother not living
- (6) Neither father nor mother living

44. Mark all of the following who live in your house at present.

- (1) Father
- (2) Mother
- (3) Stepfather
- (4) Stepmother
- (5) Brothers
- (6) Sisters
- (7) Grandmother
- (8) Grandfather
- (9) Husband
- (10) Wife
- (11) Other relatives
- (12) Persons who are not relatives

45. How many living brothers and sisters do you have?

46. Are you:

- (1) The oldest child in your family
- (2) The youngest child
- (3) In between
- (4) The only child

47. What kind of work does your father (or stepfather) do for a living? What is his job called, what kind of business or industry does he work in, and what does he do? (For example: "Carpenter, works on a construction crew building new houses"; "Sales clerk, waits on customers in a department store"; "Owner and operator of a grocery store.")

48. With what kind of firm or outfit is your father associated in his work?

- (1) Own business
 (2) Own farm
 (3) Own professional office
 (4) Small private firm, organization or factory (50 employees or less)
 (5) Large private firm, organization or factory (over 50 employees)
 (6) Educational institution
 (7) Social agency
 (8) Other non-profit organization (what?) _____
 (9) Government bureau or agency
 (10) Other (what?) _____
 (11) Don't know

49. Does your mother work outside the home for pay?

- (1) Yes, full time
 (2) Yes, part time
 (3) No

50. In terms of income or wealth in my community, I think my family is

- (1) Considerably above average
 (2) Somewhat above average
 (3) Average
 (4) Somewhat below average
 (5) Considerably below average

	04
--	----

51. Think for a minute about your family (father, mother, brothers and sisters). Some or maybe all of them have expressed certain attitudes concerning formal education (high school and college). When you look at the following statements, think of the members of your family and respond to the statements on the basis of your knowledge of the attitudes of those members. Mark only one answer for each statement.

	(1) All of them	(2) Most of them	(3) About half of them	(4) Only a few of them	(5) None of them	
(a)	1	2	3	4	5	They feel that formal education tends to take people away from their home community; and because of this is is undesirable.
(b)	1	2	3	4	5	They are opposed to formal education beyond high school.
(c)	1	2	3	4	5	They expect the younger members of the family to get all the education they can.
(d)	1	2	3	4	5	They think formal education is very important.
(e)	1	2	3	4	5	They believe that the most important thing in formal education is the diploma or degree.

52. What is the highest grade completed by your father?

- (1) Grade school 1-7
- (2) Grade school 8
- (3) High school 9-11
- (4) High school 12
- (5) College 1-3
- (6) College 4
- (7) College 5 or more

53. What is the highest grade completed by your mother?

- (1) Grade school 1-7
- (2) Grade school 8
- (3) High school 9-11
- (4) High school 12
- (5) College 1-3
- (6) College 4
- (7) College 5 or more

54. In which of the following would your parents be willing and able to help you financially? Mark all that apply.

- (1) Farming
- (2) College
- (3) Vocational schooling
- (4) Setting up a business of my own
- (5) None of the above

55. Below is a list of statements dealing with your general feelings about yourself. Please circle a number to indicate your answer to each statement.

	(1)	(2)	(3)	(4)	(5)	
	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(a)	1	2	3	4	5	I feel that I am a person of worth at least on an equal plane with others.
(b)	1	2	3	4	5	I feel that I have a number of good qualities.
(c)	1	2	3	4	5	All in all, I am inclined to feel that I am a failure.
(d)	1	2	3	4	5	I am able to do things as well as most other people.
(e)	1	2	3	4	5	I feel I do not have much to be proud of.
(f)	1	2	3	4	5	I take a positive attitude toward myself.
(g)	1	2	3	4	5	On the whole, I am satisfied with myself.
(h)	1	2	3	4	5	I wish I could have more respect for myself.
(i)	1	2	3	4	5	I certainly feel useless at times.
(j)	1	2	3	4	5	At times I think I am no good at all.

56. About how many close friends do you have?

57. When you do things with these friends, do you usually do them together as a group or with only one of them at a time?

- (1) As a group, usually
 (2) One at a time, usually
 (3) Sometimes as a group, sometimes one at a time

58. Did any of your close friends drop out of school before graduating?

- (1) Yes
 (2) No

59. If yes, how many? _____

60. Think for a minute about your close friends. Circle a number in front of each of the statements listed below to show how well you think it describes the feelings of your friends about formal education (high school and college). How many of your close friends feel this way?

	(1) All of them	(2) Most of them	(3) About half of them	(4) Only a few of them	(5) None of them	
(a)	1	2	3	4	5	They feel that formal education tends to take people away from their home communities and because of this it is undesirable.
(b)	1	2	3	4	5	They are opposed to formal education beyond high school.
(c)	1	2	3	4	5	They feel that a good education helps a person to lead a better life.
(d)	1	2	3	4	5	They think that formal education is very important.
(e)	1	2	3	4	5	They believe that the most important thing in formal education is the diploma or degree.
(f)	1	2	3	4	5	They expect the members of our group to get all of the education they can.

61. Think for a minute about your close friends. Think about the things they do in school. Mark the following statements according to how well you think they describe your group of friends. (Circle the appropriate number.)

	(1) All of them	(2) Most of them	(3) About half of them	(4) Only a few of them	(5) None of them	
(a)	1	2	3	4	5	They would probably quit school if they could find a way to quit without getting into an unpleasant situation.
(b)	1	2	3	4	5	They sometimes get into trouble with teachers and school officials.
(c)	1	2	3	4	5	For entertainment during out-of-school hours they generally run around with friends and do whatever seems interesting at the time, rather than go to school sponsored activities such as ball games, plays and dances.
(d)	1	2	3	4	5	They enjoy high school.
(e)	1	2	3	4	5	They participate in such activities as academic honor societies, science and language clubs, and other scholastic organizations.
(f)	1	2	3	4	5	High grades (A's and B's) are important to them.

	(1) All of them	(2) Most of them	(3) About half of them	(4) Only a few of them	(5) None of them	
(g)	1	2	3	4	5	They are planning to go to college.
(h)	1	2	3	4	5	They are planning to take vocational training.
(i)	1	2	3	4	5	The boys are active in athletics.
(j)	1	2	3	4	5	They are leaders in school activities.
(k)	1	2	3	4	5	They are from farms.

62. Please circle a number to indicate the extent to which each of the statements below reflects the attitudes or feelings of the students you know at your school. (Think of all the students you know, not just your close friends.) How many of the students, in your opinion, have the feelings expressed in each of the statements?

	(1) All of them	(2) Most of them	(3) About half of them	(4) Only a few of them	(5) None of them	
(a)	1	2	3	4	5	The high school curriculum should be more directly related to specific jobs.
(b)	1	2	3	4	5	Every student should try to go to college. If he can't make it there he can always get an ordinary job.
(c)	1	2	3	4	5	There should be more emphasis on vocational and technical courses and less on college preparation.
(d)	1	2	3	4	5	Courses like welding and wood working have no place in today's high school
(e)	1	2	3	4	5	In modern society the skilled craftsman is as important as the scientist or the professional.
(f)	1	2	3	4	5	Students enrolled in vocational or technical courses generally don't have the ability to master college preparatory courses.
(g)	1	2	3	4	5	Shop courses are good preparation for the kind of work many students will be doing.
(h)	1	2	3	4	5	Business courses like typing and shorthand are as important for girls as are college preparatory courses.
(i)	1	2	3	4	5	High school should do more to provide students with skills useful in jobs and should not worry so much about college preparation.

63. Which person expects you to accomplish the most in the future?

- (1) Father
- (2) Mother
- (3) Older brother or sister
- (4) A friend in school
- (5) A person about my own age (who is not in my school)
- (6) A teacher, counselor or principal
- (7) An adult other than those listed
- (8) No other person

05

64. Please consider each occupation listed below and on the next page. Check a blank to show how well you think you would like that kind of work. Work quickly. Your first impression is the most valuable. (If you feel that you do not know enough about a particular occupation to make a realistic decision, place a check mark in the blank to the left of that occupation.)

ANSWER THE REST OF THE QUESTIONNAIRE ONLY IF YOU HAVE LIVED ON A FARM

65. How many years have you lived on a farm?

- _____ (1) Less than one
- _____ (2) One to three
- _____ (3) Four to seven
- _____ (4) Eight to twelve
- _____ (5) Thirteen or more

66. If you did live on a farm, when was that?

- _____ (1) Sometime between birth and 12 years of age
- _____ (2) After 12 years of age
- _____ (3) Most of my life
- _____ (4) All of my life
- _____ (5) Other (what?) _____

67. How do you like farm life?

- (1) Like it greatly
- (2) Like it
- (3) Neutral
- (4) Dislike it
- (5) Dislike it greatly

68. What is the most important factor in the choice of farming as an occupation? Mark the one factor you consider most important. (Mark only one.)

- (1) Farming background
- (2) Desire to farm
- (3) Availability of an adequate farm
- (4) Adequate financing

69. Is there a farm available if you want to go into farming?

- (1) Yes
- (2) No
- (3) I don't know

70. If "yes," where is the farm located?

- (1) Present home address
- (2) Farm in present locality
- (3) Farm in other section of Washington
- (4) In a nearby state

71. Does most of your family income come from farm or non-farm employment?

- (1) Mostly from farm
- (2) Mostly from non-farm

Thank you for your cooperation.

DEPARTMENT OF EDUCATION
 WASHINGTON STATE UNIVERSITY
 EDUCATIONAL AND OCCUPATIONAL PLANS OF
 HIGH SCHOOL STUDENTS

JANUARY 1966
 STUDENT INTERVIEW

I.D. NO. _____ DATE _____

INTERVIEWER'S NAME _____ TIME (MINUTES) _____

HELLO, GOOD MORNING, GOOD AFTERNOON, ETC. I am _____
 from Washington State University. As you know, Washington State University is
 conducting a study of the educational and occupational plans of young people.
 You may recall filling out a questionnaire a few weeks ago. I'd like to ask you a
 few additional questions. Your answers will be confidential. Do you mind being
 interviewed?

IF CONSENTS: First let me get some general information about you.

1. How old will you be on your next birthday?

2. When is your next birthday?

_____ month _____ day _____ year

3. Are you a junior or a senior?

_____ JUNIOR _____ SENIOR

4. (INTERVIEWER: CHECK ONE) _____ MALE _____ FEMALE

5. Now, what would you like to do about your further education if you had a free
 choice? INTERVIEWER: PROBE TO THE FOLLOWING CATEGORIES. MARK HIGHEST LEVEL
 MENTIONED.

DESIRES

EXPECTED

- | | |
|---|------------|
| _____ (1) QUIT HIGH SCHOOL AND NOT GO TO ANY KIND OF SCHOOL AGAIN | (1) _____ |
| _____ (2) GRADUATE FROM HIGH SCHOOL | (2) _____ |

6. How much education do you think you will actually be able to get?
 MARK "EXPECTED" BOXES.

FORM A

7. Education is sometimes considered training for a job. Besides the education you have mentioned above, is there anything you plan to do to get the skills and knowledge you will need in the occupation you expect to be in?

____ YES

____ NO

If yes, what is it? (INTERVIEWER: CONTINUE TO PROBE UNTIL NO OTHER THINGS ARE MENTIONED).

8. What kind of a job do you expect to get as your first full time job, that is is, what occupation do you expect to be in when you first go to work?

9. Is this the type of job you expect to have as your life's career?

____ YES

____ NO

IF NO, ASK: What occupation do you expect to have as your life's career?

10. What are the chances that you will actually enter the job you mentioned as the one you expect to have as your career? INTERVIEWER: CODE TO THE FOLLOWING CATEGORIES.

- ____ (1) CERTAINLY WILL
____ (2) PROBABLY WILL
____ (3) CHANCES ARE 50-50
____ (4) PROBABLY WILL NOT
____ (5) NO JOB LISTED

11. Is there a particular person in this occupation whom you admire?

 YES

 NO

IF YES, ASK: Who is this person? (INTERVIEWER: IDENTIFY BY RELATIONSHIP TO STUDENT. e.g., FATHER, AUNT, FRIEND OF FAMILY, TEACHER, ETC.)

12. Has this person influenced you to choose this occupation?

 YES

 NO

IF YES, ASK: What did (he)(she) do or say that encouraged you?

13. Has anyone tried to influence you against this occupation?

 YES

 NO

IF YES, ASK: What did (he)(she) do or say?

14. As you may recall, several weeks ago you filled out a questionnaire. One of the questions in that questionnaire asked what occupation you expected to have as your life's work. Do you remember what occupation you named as the one you expected to have as your career?

 YES

 NO

IF YES, ASK: Was it the same occupation that you have just told me you expect to have as your life's work, or was it a different one?

 SAME

 DIFFERENT

IF DIFFERENT, ASK: What happened in the meantime that led you to change your mind?

People frequently find themselves in situations where they encounter the disapproval of some people.

15. Suppose that for reasons you considered important, you decided to drop out of high school. You know that your parents and your friends may disapprove of this. Whose disapproval would be hardest for you to take?

 DISAPPROVAL OF PARENTS

 DISAPPROVAL OF FRIENDS

16. Suppose you have been offered a job which you think you will like and you decide to accept it. You know that your parents and friends may not approve of the job you are going to accept. Whose disapproval would be hardest for you to take?

 DISAPPROVAL OF PARENTS

 DISAPPROVAL OF FRIENDS

17. Suppose that you have decided not to go to college. You know that your parents and your friends may disapprove of this decision. Whose disapproval would hurt you most?

 DISAPPROVAL OF PARENTS

 DISAPPROVAL OF FRIENDS

18. Suppose you have been offered a good job in a distant city and have decided to accept it. You know that your parents and your friends may disapprove of your moving so far away. Whose disapproval would hurt you most in this situation?

 DISAPPROVAL OF PARENTS

 DISAPPROVAL OF FRIENDS

19. Here is a card with several statements on it. Please read these statements and tell me the number of the one that best describes the attitude of your mother toward the question of whether you get any education after high school. (HAND RESPONDENT CARD I.)

 (1) NOT INTERESTED IN MY PLANS--DOESN'T CARE WHETHER I GET ANY MORE EDUCATION OR NOT.

 (2) INTERESTED IN MY PLANS BUT WANTS ME TO DO WHAT I WANT.

 (3) INTERESTED IN MY PLANS--HOPES THAT I GET A PARTICULAR KIND OF EDUCATION.

 (4) INTERESTED IN MY PLANS--INSISTS THAT I GET A PARTICULAR KIND OF EDUCATION.

 (5) I DON'T KNOW.

INTERVIEWER: IF ANSWERS 3 OR 4, HAND RESPONDENT CARD II AND ASK: Which of these statements describes the education she wants you to get?

- (1) ATTEND A BUSINESS OR COMMERCIAL SCHOOL (NOT COLLEGE LEVEL)
- (2) ATTEND A TECHNICAL OR VOCATIONAL SCHOOL (NOT COLLEGE LEVEL)
- (3) ATTEND A JUNIOR COLLEGE, TAKE A BUSINESS OR COMMERCIAL COURSE
- (4) ATTEND A JUNIOR COLLEGE, TAKE A VOCATIONAL OR TECHNICAL COURSE
- (5) ATTEND A JUNIOR COLLEGE, TAKE A REGULAR COLLEGE COURSE
- (6) ATTEND A COLLEGE OR UNIVERSITY
- (7) GRADUATE FROM A COLLEGE OR UNIVERSITY
- (8) AFTER GRADUATING FROM COLLEGE SPEND ONE OR MORE YEARS DOING ADVANCED STUDY IN A SPECIALIZED FIELD
- (9) OTHER (WHAT?)

A

CARD I

1. Not interested in my plans--doesn't care whether I get any more education or not.
2. Interested in my plans but wants me to do what I want.
3. Interested in my plans--hopes that I get a particular kind of education.
4. Interested in my plans--insists that I get a particular kind of education.
5. I don't know.

A

CARD II

1. Attend a business or commercial school (not college level).
2. Attend a technical or vocational school (not college level).
3. Attend a junior college, take a business or commercial course.
4. Attend a junior college, take a vocational or technical course.
5. Attend a junior college, take a regular college course.
6. Attend a college or university.
7. Graduate from a college or university.
8. After graduating from college spend one or more years doing advanced study in a specialized field.
9. Other (what?)

20. Now look at the statements again. Please tell me the number of the statement that best describes the attitude of your father toward the question of whether you get any education after high school.

- ____ (1) NOT INTERESTED IN MY PLANS--DOESN'T CARE WHETHER I GET ANY MORE EDUCATION OR NOT.
- ____ (2) INTERESTED IN MY PLANS BUT WANTS ME TO DO WHAT I WANT.
- ____ (3) INTERESTED IN MY PLANS--HOPES THAT I GET A PARTICULAR KIND OF EDUCATION.
- ____ (4) INTERESTED IN MY PLANS--INSISTS THAT I GET A PARTICULAR KIND OF EDUCATION.
- ____ (5) I DON'T KNOW.

INTERVIEWER: IF ANSWERS 3 OR 4, SAY: Please look at card II again and tell me which statements describe the education you father wants you to get.

- ____ (1) ATTEND A BUSINESS OR COMMERCIAL SCHOOL (NOT COLLEGE LEVEL)
- ____ (2) ATTEND A TECHNICAL OR VOCATIONAL SCHOOL (NOT COLLEGE LEVEL)
- ____ (3) ATTEND A JUNIOR COLLEGE, TAKE A BUSINESS OR COMMERCIAL COURSE
- ____ (4) ATTEND A JUNIOR COLLEGE, TAKE A VOCATIONAL OR TECHNICAL COURSE
- ____ (5) ATTEND A JUNIOR COLLEGE, TAKE A REGULAR COLLEGE COURSE
- ____ (6) ATTEND A COLLEGE OR UNIVERSITY
- ____ (7) GRADUATE FROM A COLLEGE OR UNIVERSITY
- ____ (8) AFTER GRADUATING FROM COLLEGE SPEND ONE OR MORE YEARS DOING ADVANCED STUDY IN A SPECIALIZED FIELD
- ____ (9) OTHER (WHAT?)

21. Here is another card. Please read the statements on this card and tell me the number of the one which best describes the way you think your mother feels about your occupational plans. (HAND RESPONDENT CARD III.)

- ____ (1) NOT INTERESTED IN MY OCCUPATIONAL PLANS--DOESN'T CARE WHAT I DO.
- ____ (2) INTERESTED IN MY OCCUPATIONAL PLANS--WANTS ME TO CHOOSE THE OCCUPATION I WANT.
- ____ (3) INTERESTED IN MY PLANS--HOPES I CHOOSE A PARTICULAR KIND OF WORK.
- ____ (4) INTERESTED IN MY PLANS--INSISTS THAT I CHOOSE A PARTICULAR KIND OF WORK.
- ____ (5) I DON'T KNOW HER FEELINGS.

A

CARD III

1. Not interested in my occupational plans--doesn't care what I do.
2. Interested in my occupational plans--but wants me to choose the occupation I want.
3. Interested in my plans--hopes I choose a particular kind of work.
4. Interested in my plans--insists that I choose a particular kind of work.
5. I don't know (his) (her) feelings.

INTERVIEWER: IF RESPONDENT SELECTS RESPONSE 3 OR 4 ASK: What kind of work does she want you to choose?

22. Now read the statements again. Please tell me the number of the statement which best describes the way your father feels about your plans for your future occupation.

___ (1) NOT INTERESTED IN MY OCCUPATIONAL PLANS--DOESN'T CARE WHAT I DO.

___ (2) INTERESTED IN MY OCCUPATIONAL PLANS--BUT WANTS ME TO CHOOSE THE OCCUPATION I WANT.

___ (3) INTERESTED IN MY PLANS--HOPES I CHOOSE A PARTICULAR KIND OF WORK.

___ (4) INTERESTED IN MY PLANS--INSISTS THAT I CHOOSE A PARTICULAR KIND OF WORK.

___ (5) I DON'T KNOW HIS FEELINGS.

INTERVIEWER: IF RESPONDENT SELECTS RESPONSE 3 OR 4 ASK: What kind of work does he want you to choose?

23. Some people say that the plans of young people are usually similar to those of their close friends. Others disagree. We would like to check this out on a scientific basis and it will help us to do this if you would be willing to tell us the names of the juniors and seniors in this school who are your best friends. Would you also tell us the occupations you think these students plan to enter.

NAMES

OCCUPATIONS

_____	_____
_____	_____
_____	_____
_____	_____

24. We would like to send letters to some parents of high school students to find out how they feel toward education and certain occupations. Would you have any objections if we sent a questionnaire to your parents?

IF NO OBJECTIONS ASK: What is you father's name and address?

Is your mother's address the same as your father's?

YES

NO

IF NO, ASK: What is her name and address?

NAME _____

I.D. NUMBER _____

FORM A

EDUCATIONAL AND OCCUPATIONAL ASPIRATIONS STUDY
Department of Education
Washington State University

Counselors and Administrators Questionnaire

A. Do you know this person well enough to give any opinions about (him)(her)?

____(1) yes ____ (2) no

B. What is your impression of the intellectual ability of this person?

____(1) High ____ (4) Below average
____(2) Above average ____ (5) Poor
____(3) Average

C. In relation to (his)(her) ability (he) (she) is:

____(1) An over achiever
____(2) Average
____(3) An under achiever

D. What level of education do you think this person would be able to obtain?

____(1) Should probably drop out of high school
____(2) High school only
____(3) Junior College
____(4) College
____(5) Post graduate

E. Do you think this person should obtain some type of vocational or technical education?

____(1) yes ____ (2) no
____(3) I don't know the student well enough to judge.

F. If yes, what type would you suggest?

____(1) Stenographer or typist
____(2) Clerical or business
____(3) Mechanical
____(4) Electrical
____(5) Other trades for men (e.g., carpentry, plumbing.)
____(6) Other trades for girls (e.g., hair dressing, practical nursing.)
____(7) Other (what?) _____

G. Have you ever talked to this person about (his)(her) educational plans?

____(1) yes ____ (2) no

If yes, did you:

H. Encourage to go to college
____(1) yes ____ (2) no

I. Encourage to finish high school
____(1) yes ____ (2) no

J. Encourage to attend vocational-technical school
____(1) yes ____ (2) no

K. Have you ever talked to this person about (his)(her) occupational plans?

____(1) yes ____ (2) no

If yes, did you:

L. Explain job requirements or duties
____(1) yes ____ (2) no

M. Informed them of specific job opportunities
____(1) yes ____ (2) no

N. Recommended specific occupations to (him) (her)

____(1) yes ____ (2) no

O. Other

P. What type of work would you say this person is best suited for?

____(1) Professional
____(2) Managerial or administrative
____(3) Technical (lab technician, etc.)
____(4) Manual-skilled (carpenter, electrician, etc.)
____(5) Manual-unskilled
____(6) Clerical
____(7) Sales
____(8) Farm operator
____(9) Farm laborer
____(10) Other (specify) _____

Q. Any other comments pertaining to educational or occupational abilities or prospects of this student.

WASHINGTON STATE UNIVERSITY
DEPARTMENT OF EDUCATION

Educational and Occupational Plans
of High School Students

Washington State University and the Washington State Office of Public Instruction are making a study of the factors which influence the educational and occupational plans of high school students. The results of this study will be used to plan educational programs that will help students reach their goals.

You can help in this work by taking a few minutes to answer the questions in this questionnaire. We will be grateful if you will do this.

The information you give will be used to check some ideas which people have about high school students and their parents. Some people say that nearly all parents want their children to go to college or take some other kind of schooling, but we are not sure this is the case. If the views of teenagers and their parents are not always the same, teachers and counselors can be more helpful to students if they know what the similarities and differences are. Facts about how much the desires of young people reflect the wishes of their parents will be helpful.

It will be greatly appreciated if you will take the time to fill out this questionnaire and return it in the enclosed postage-free envelope. Your replies will be handled in a confidential manner. We will use the information for statistical purposes only. We are not asking that names be placed on the questionnaires. This insures that the clerks who code the answers will not know whose questionnaires are being coded. The number which appears on the questionnaire will enable us to keep track of the returns as they come in, and thus avoid bothering you with a reminder if you have already returned your questionnaire.

Thank you for your cooperation.

Sincerely yours,

Roy T. Bowles
Staff Director

DEPARTMENT OF EDUCATION
WASHINGTON STATE UNIVERSITY

Educational and Occupational Plans
of High School Students

Parent's Questionnaire

1. How many children in your family? (Include stepchildren and those no longer at home.) _____
2. How many of these were in high school any time during the 1965-66 school year? Boys _____ Girls _____

Now we would like to ask some questions concerning your feelings about the plans of your son or daughter who is a junior or senior in high school. IF YOU HAVE MORE THAN ONE CHILD IN THE ELEVENTH AND TWELFTH GRADES, Please answer these questions in terms of the oldest child who is in one of these grades. In each question, please circle the word "son" or "daughter" to indicate the sex of the child you are thinking of.

3. Mark the blank at the left of the phrase which best describes the highest level and type of education that you would like your son daughter (circle one) to achieve.

- (1) Quit high school and not go to any kind of school again.
 (2) Graduate from high school.
 (3) Attend a business or commercial school (not college level).
 (4) Attend a vocational or technical school (not college level).
 (5) Attend a junior college, take a business or commercial course.
 (6) Attend a junior college, take a vocational or technical course.
 (7) Attend a junior college, take a regular college course.
 (8) Attend a college of university.
 (9) Graduate from a college or university.
 (10) After graduating from college spend one or more years doing advanced study in a specialized field.
 (11) Other (what?) _____

4. What course of study would you like your son daughter (circle one) to take? That is, what would you like him or her to major in?

5. What occupation or line of work would you most like your son daughter (circle one) to go into?

6. In which of the following would you be willing and able to help your son daughter (circle one) financially? Mark all that apply.

- (1) Farming
 (2) College
 (3) Vocational schooling
 (4) Business schooling
 (5) Setting up a business of his or her own
 (6) None of the above

7. Now we would like to know your general feelings about certain aspects of work and education. Please circle a number to show whether or not each of the statements in this list agrees with your ideas of work and education. (If retired, please give the responses which you would have given prior to retirement.)

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(a)	1	2	3	4	5	Everyone who possibly can should work.
(b)	1	2	3	4	5	Even if I were financially secure and did not need a job I would probably work.
(c)	1	2	3	4	5	It is a person's duty to work.
(d)	1	2	3	4	5	If I did not work I would feel that I was not leading a "right life."

- (e) 1 2 3 4 5 I find it hard to respect a man who doesn't work.
- (f) 1 2 3 4 5 If I were financially well off, I think I could lead a perfectly happy and satisfying life without working.
- (g) 1 2 3 4 5 A person who has never worked has missed a valuable experience.
- (h) 1 2 3 4 5 If a person can live the way he wants to without working there is no reason for him to work.

WOMEN ONLY:

- | | | | | | | |
|-----|---|---|---|---|---|--|
| (i) | 1 | 2 | 3 | 4 | 5 | I would want my husband to do some kind of work even if he were financially secure and did not need a job. |
|-----|---|---|---|---|---|--|
- (j) 1 2 3 4 5 The high school curriculum should be more directly related to specific jobs.
- (k) 1 2 3 4 5 Every student should try to go to college; if he can't make it there he can always get an ordinary job.
- (l) 1 2 3 4 5 There should be more emphasis on vocational and technical courses and less on college preparation.
- (m) 1 2 3 4 5 Courses like welding and woodworking have no place in today's high school.
- (n) 1 2 3 4 5 In modern society the skilled craftsman is as important as the scientist or the professional.
- (o) 1 2 3 4 5 Students enrolled in vocational or technical courses generally don't have the ability to master college preparatory courses.
- (p) 1 2 3 4 5 Shop courses are preparation for the kind of work many students will be doing.
- (q) 1 2 3 4 5 Business courses like typing and shorthand are as important for girls as are college preparatory courses.
- (r) 1 2 3 4 5 High school should do more to provide students with skills useful in jobs and should not worry so much about college preparation.
- (s) 1 2 3 4 5 I feel that formal education tends to take people away from their home communities and because of this it is undesirable.
- (t) 1 2 3 4 5 I am opposed to formal education beyond high school.
- (u) 1 2 3 4 5 I think that formal education is really very important.
- (v) 1 2 3 4 5 I believe that the most important thing in formal education is the diploma or degree.
- (w) 1 2 3 4 5 I expect my children to get all of the education they can.

8. Please consider each occupation listed below and on the next page. Check a blank to show how you would feel if your son daughter (circle one) told you that he or she was going to choose this occupation as his or her life's work.

9. Where do you live?
- (1) City of 150,000 or larger
 - (2) City of 100,000 to 150,000
 - (3) City of 50,000 to 100,000
 - (4) City of 10,000 to 50,000
 - (5) City of 2,500 to 10,000
 - (6) Town under 2,500
 - (7) On a farm
 - (8) Country but not farm

10. If you live on a farm, do you own or rent the farm?
- (1) Own the farm
 - (2) Rent the farm

11. If you live in town, do you own or rent the house in which you are living?
- (1) Own the house
 - (2) Rent the house

12. The 1965 income for my family from all sources was: (if you do not know exactly, make the best guess you can).
- (1) Under \$2,000
 - (2) \$2,000 - 2,999
 - (3) \$3,000 - 3,999
 - (4) \$4,000 - 4,999
 - (5) \$5,000 - 5,999
 - (6) \$6,000 - 7,499
 - (7) \$7,500 - 9,999
 - (8) \$10,000 - 14,999
 - (9) \$15,000 or over

13. In terms of income or wealth of families in my community, I think my family is:
- (1) Considerably above average
 - (2) Somewhat above average
 - (3) Average
 - (4) Somewhat below average
 - (5) Considerably below average

14. What kind of work do you do for a living? What is your job called, what kind of business or industry do you work in, and what do you do? (For example: "Carpenter, work on construction crew building new house;" "Sales clerk, wait on customers in a department store;" "Owner and operator of a grocery store.") Mothers: Give husband's occupation.

15. What kind of firm or outfit are you (or is your husband) associated with in your work?
- (1) Own business
 - (2) Own farm
 - (3) Own professional office
 - (4) Small private firm, organization or factory (50 employees or less)
 - (5) Large private firm, organization or factory (over 50 employees)
 - (6) Educational institution
 - (7) Social agency
 - (8) Other non-profit organization (what?) _____
 - (9) Government bureau or agency
 - (10) Other (What?) _____

This questionnaire was completed by a _____ man _____ woman.

DIRECTIONS FOR COLLECTING GRADES AND I. Q. SCORES

Attached you will find forms designed for recording the grades and I. Q. scores of students. The names of several students are listed on these forms. Please check the school records for each student listed.

1. Record the cumulative grade point average if it is available. If it has not already been computed, leave this space blank.
2. Record the student's Intelligence test score (if available).
3. Record the name of the Intelligence test used. (This is necessary because scores on different tests do not mean exactly the same thing.)
4. Record the grades which the student received for the last semester. PLEASE BE CERTAIN TO LIST THE NUMBER OF CREDITS AND THE GRADE FOR EACH COURSE THE STUDENT WAS ENROLLED IN.
5. Please complete the information requested in the blanks below.

SCHOOL _____ NAME OF PERSON COMPLETING FORM _____

DATE _____

ENDING DATE OF LAST SEMESTER _____

IF SEMESTER GRADES ARE NOT COMPUTED IN YOUR SCHOOL, report grades for last grading period and complete blanks below.

LENGTH OF LAST GRADING PERIOD _____

ENDING DATE OF LAST GRADING PERIOD _____

6. Please complete the enclosed "Employee's Withholding Exemption Certificate - Form W-4" and return it with the forms. Make special note to record the number of hours worked. You will be paid \$1.50 per hour.
7. Return all materials to:

WASHINGTON STATE UNIVERSITY
DEPARTMENT OF EDUCATION

Dear Student:

Washington State University is making a scientific study of the factors that influence the educational and occupational desires and plans of high school juniors and seniors in the State of Washington.

We are going to ask about 4,000 students in schools all over the state to fill out this questionnaire. The information you and other students provide will help teachers and school officials plan educational programs that meet the needs of students. This information will also provide answers to scientific questions.

Previous research has shown that students with similar scholastic ability may have very different educational plans. There may be several reasons for this. These include family background, the attitudes of friends, personal experiences in the classroom, other school related activities, and encouragement from teachers, counselors, or others. We hope to be able to determine the importance of each of these things on the basis of answers to the questions in this questionnaire.

Names and addresses are desired so that research workers can contact some students later to ask additional questions which have a bearing on educational and occupational plans. Special precautions have been set up to insure that your replies will be kept confidential and not revealed to anyone. After you write your name and address on the card which is attached to the front of the questionnaire, remove this card and send it to the front of the room. All name cards will be placed in an envelope which will be sealed immediately. It will not be opened until it is delivered to Washington State University.

WORK RAPIDLY. DO NOT MULL OVER ANY QUESTION. If you are not sure about the meaning of a question just answer it in keeping with your general impression of what the question means. If you are not sure what answer is best, give the one that is closest to your own feelings or opinion and move on. Your first impressions are generally the best. Do not change your answer unless you feel it is absolutely necessary. Work as rapidly as you can without feeling rushed.

You are not required to answer this questionnaire or any question in it if you do not wish to do so. Participation is entirely voluntary. However, we hope that you will decide to cooperate by answering the questions frankly and honestly.

Thank you very much.

NAME _____

MAILING ADDRESS _____

NAME OF SCHOOL _____

AFTER WRITING YOUR NAME AND ADDRESS ON THIS CARD DETACH
IT FROM THE QUESTIONNAIRE AND PASS IT TO THE FRONT OF
THE ROOM.

DEPARTMENT OF EDUCATION
WASHINGTON STATE UNIVERSITY

Educational and Occupational Plans
of High School Students

CONFIDENTIAL

	01
--	----

FIRST, WE WANT TO ASK SOME GENERAL QUESTIONS ABOUT YOU AND YOUR BACKGROUND.

1. Sex

- (1) Boy
 (2) Girl

2. What grade are you in?

- (1) 11th
 (2) 12th

3. Course of study:

- (1) General
 (2) Vocational
 (3) Academic (including college preparatory)
 (4) Commercial
 (5) Other (please specify _____)

4. How old are you at your nearest birthday?

- (1) 14 or younger
 (2) 15
 (3) 16
 (4) 17
 (5) 18
 (6) 19 or older

5. Are you:

- (1) The oldest child in your family
 (2) The youngest child
 (3) In between
 (4) The only child

6. How many living brothers and sisters do you have?

7. Where do you live?

- (1) City of 150,000 or larger
 (2) City of 100,000 to 150,000
 (3) City of 50,000 to 100,000
 (4) City of 10,000 to 50,000
 (5) City of 2,500 to 10,000
 (6) Town under 2,500
 (7) On a farm
 (8) Country but not farm

250354

8. What is your race? (Optional.)

- (1) White
 (2) Negro
 (3) Oriental
 (4) American Indian
 (5) Other (what?) _____

9. What is the marital status of your mother and father?

- (1) Both alive, living together
 (2) Both alive, separated
 (3) Both alive, divorced
 (4) Father not living
 (5) Mother not living
 (6) Neither father nor mother living

Some of the questions that follow ask about your father and mother. If you live with your stepfather or stepmother, substitute "stepfather" for "father" or "stepmother" for "mother."

10. What kind of work does your father do for a living? What is his job called, what kind of business or industry does he work in, and what does he do? (For example: "Carpenter, works on a construction crew building new houses"; "Sales clerk, waits on customers in a department store"; "Owner and operator of a grocery store.")

11. With what kind of firm or outfit is your father associated in his work?

- (1) Own business
 (2) Own farm
 (3) Own professional office
 (4) Small private firm, organization, or factory (less than 50 employees)
 (5) Large private firm, organization, or factory (50 employees or more)
 (6) Educational institution
 (7) Social Agency
 (8) Other nonprofit organization (what?) _____
 (9) Government bureau or agency
 (10) Other (what?) _____

12. How much education did your parents get?

Father Mother

- | | | |
|--------------------------|--------------------------|--|
| <input type="checkbox"/> | <input type="checkbox"/> | (1) Eighth grade or less |
| <input type="checkbox"/> | <input type="checkbox"/> | (2) Some high school, but did not finish |
| <input type="checkbox"/> | <input type="checkbox"/> | (3) High school graduate |
| <input type="checkbox"/> | <input type="checkbox"/> | (4) Some college, but did not finish |
| <input type="checkbox"/> | <input type="checkbox"/> | (5) College graduate |
| <input type="checkbox"/> | <input type="checkbox"/> | (6) More than four years of college |
| <input type="checkbox"/> | <input type="checkbox"/> | (7) Don't know |

13. Did your father attend a vocational or technical school?

- (1) Yes
 (2) No
 (3) I don't know

14. What are the occupations of the fathers of your three closest friends?

- (1) _____
- (2) _____
- (3) _____

15. Approximately how many times did you change schools before you were 16 years of age (other than by graduation)?

- (1) Never
- (2) Once
- (3) Two to four times
- (4) Five to seven times
- (5) More than seven times

16. When you finish your education do you want to live in the community in which you are living now?

- (1) Yes
- (2) No
- (3) Not sure

17. Considering your future occupational plans, would you be able to do what you want to do in the community in which you are now living?

- (1) Yes
- (2) No
- (3) I don't know

18. If you were asked to use one of these names to describe your family's social group, which would you say your family belonged to?

- (1) Upper class
- (2) Upper-middle class
- (3) Middle class
- (4) Lower-middle class
- (5) Working class
- (6) Lower class

19. People in all communities make judgments and evaluations of each other regarding their respective rank in the community. Some people are considered low, others are placed more toward the middle, while others are judged to be toward the top. Place an X in the box to the right that best reflects what you think is your family's general standing in your community. ("1" represents very low standing and "10" represents very high standing.)

10		Above average

3		
2		
1		Below average

20. How confident are you that this is where other people in your community would rank your folks?

- (1) Very sure
- (2) Slightly sure
- (3) Not very sure
- (4) Not sure at all

21. Now place an X in the box at the right that best reflects the standing that you hope to achieve in the community in which you live when you become fully established in your own home or occupation. (Again, "1" represents very low standing and "10" represents very high standing.)

NOW WE WOULD LIKE TO KNOW SOMETHING ABOUT YOUR EDUCATIONAL PLANS AND DESIRES BEYOND HIGH SCHOOL, AS WELL AS YOUR ATTITUDES AND ACTIVITIES AS THESE RELATE TO HIGH SCHOOL

22. Mark the boxes at the left of the phrases that best describe what you would like in the way of future education. (Mark all that apply.)

- (1) Quit high school and not go to any kind of school again
 (2) Graduate from high school
 (3) Attend a business or commercial school (not college level)
 (4) Attend a technical or vocational school (not college level)
 (5) Attend a junior college - take a business or commercial course
 (6) Attend a junior college - take a vocational or technical course
 (7) Attend a junior college - take a regular college course
 (8) Attend a college or university
 (9) Graduate from a college or university
 (10) After graduating from college, spend one or more years doing advanced study in a specialized field
 (11) Other (what?) _____

23. How certain are you that this is what you want to do about further education?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

24. Mark the blanks at the left of the phrases which describe the education you think you will actually be able to get. (Mark all that apply.)

- (1) Quit high school and not go to any kind of school again
 (2) Graduate from high school
 (3) Attend a business or commercial school (not college level)
 (4) Attend a technical or vocational school (not college level)
 (5) Attend a junior college - take a business or commercial course
 (6) Attend a junior college - take a vocational or technical course
 (7) Attend a junior college - take a regular college course
 (8) Attend a college or university
 (9) Graduate from a college or university
 (10) After graduating from college, spend one or more years doing advanced study in a specialized field
 (11) Other (what?) _____

25. How certain are you that you will actually get the highest level of education you checked in question 24?

- (1) Not very certain
 (2) Chances are 50-50
 (3) Probably will
 (4) Practically certain

26. **ANSWER ONLY IF YOU ARE NOT PLANNING TO GO TO COLLEGE.** Would you go to college if your parents could afford to send you?

- (1) Yes
 (2) No

27. **ANSWER ONLY IF YOU WOULD LIKE TO TAKE VOCATIONAL, TECHNICAL, OR BUSINESS TRAINING, BUT DO NOT PLAN TO:** Would you take vocational, technical, or business training if your parents could afford to pay for it?

- (1) Yes
 (2) No

28. On your last report card did you get mostly: (Check only one.)

- (1) A's
 (2) A's and B's
 (3) B's
 (4) B's and C's
 (5) C's
 (6) C's and D's
 (7) D's
 (8) D's and F's

29. How many high school activities are you active in and how many organizations do you belong to? (For example: Athletics, Music, Dramatics, Debate, School paper or annual, Student government, FFA or FHA, Hobby clubs, and any other clubs or organizations.)

30. Which of the following best describes your relationship with persons of the opposite sex? (Mark only one.)

- (1) Married
 (2) Formally engaged
 (3) Not formally engaged, but have definite understanding to be married soon
 (4) Going steady
 (5) Date frequently
 (6) Date occasionally
 (7) Have some dates, but very few
 (8) Do not date

31. **GIRLS ONLY. BOYS GO DIRECTLY TO QUESTION 32.**
If you are married or expect to get married soon, what occupation does (or will) your husband have?

02

HOW DO YOU THINK YOUR CLOSEST FRIEND WOULD RATE YOU IN THE FOLLOWING THINGS?

32. What kind of grades does your closest friend think you are capable of getting?

- (1) Mostly A's
- (2) Mostly B's
- (3) Mostly C's
- (4) Mostly D's
- (5) Mostly F's

33. How would your closest friend rate you in school ability compared with those in your class at school?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

34. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How would your closest friend rank your capability for completing such advanced work?

- (1) Very capable
- (2) Somewhat capable
- (3) Average capability
- (4) Incapable
- (5) Very incapable

35. Does your closest friend think you have the ability to complete college?

- (1) Yes, definitely
- (2) Yes, probably
- (3) Not sure either way
- (4) Probably not
- (5) No

36. How do you think your closest friend would grade your work?

- (1) Excellent
- (2) Good
- (3) Average
- (4) Below average
- (5) Much below average

37. Where do you think your closest friend would rank you in your class in high school?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

38. How do you think your closest friend would rate you in school ability compared with your other close friends?

- (1) The best
- (2) Better than most
- (3) About the same
- (4) Not as good as most
- (5) The poorest

39. Where do you think your closest friend would rank you in your class in college (if you actually go)?

- (1) Among the best
 (2) Above average
 (3) Average
 (4) Below average
 (5) Among the poorest

NOW WE WOULD LIKE TO KNOW SOMETHING ABOUT YOUR JOB-RELATED DESIRES, PLANS AND ATTITUDES.

BOYS ONLY. GIRLS GO TO QUESTION 45.

40. Most students have daydreams about what they would like to be and do when they are adults. What kind of occupation would you most like to have as your career if you could do whatever you chose? (Please be specific:)

41. How sure are you that this is the occupation you will actually have?

- (1) Very sure
 (2) Fairly sure
 (3) Not at all sure

42. How sure are you that you know what kind of occupation you really want as a life-long career?

- (1) Absolutely certain
 (2) Quite certain
 (3) Somewhat certain
 (4) Very uncertain

43. Now, leaving your daydreams and wishes aside, what occupation do you really plan to have as your career?

- (a) I have no definite plans

44. How often do you worry because you are not quite certain what you want in the way of an occupational career?

- (1) Almost all the time
 (2) Quite often
 (3) Sometimes
 (4) Seldom
 (5) Never

GIRLS ONLY. BOYS GO TO QUESTION 52.

45. Which of the following statements best describes what you think your interests and desires will be for most of your adult life?

- (1) Homemaking will be my major interest. I will not want to work at all after I am married.
 (2) Homemaking will be my major interest, but I will want to work occasionally or work part time.
 (3) Homemaking will be my major interest, but I will also want to work most of the time.
 (4) Work will be my major interest but I will also want to have a family and be a homemaker.
 (5) Work will be my major interest. I will not want to spend much effort in homemaking.
 (6) Work will be my only interest. I will not want to spend much effort in homemaking.

GIRLS ONLY, continued. BOYS GO TO QUESTION 52.

46. If you checked 2, 3, 4, 5, or 6 in question 45, what occupation would you most want to have?

47. Do you actually expect to work after you finish your education?

- _____ (1) No
 _____ (2) Yes

48. If yes, what kind of job or occupation do you expect to have?

49. Do you agree or disagree with the following statements? Circle the appropriate number.

	(1) Strongly agree	(2) Agree	(3) Neither agree nor disagree	(4) Disagree	(5) Strongly disagree	
(a)	1	2	3	4	5	The abilities of women too often go unrecognized.
(b)	1	2	3	4	5	Women should be allowed to compete on equal terms with men in the occupational world.
(c)	1	2	3	4	5	The place for the adult female is in the home.
(d)	1	2	3	4	5	There would probably be fewer problems in the world if women had as much say-so in running things as men.
(e)	1	2	3	4	5	It is natural for women to have occupational positions which are inferior to those of men.

50. Do you feel that you personally will be prevented from realizing your educational or occupational ambitions because you are a female?

- _____ (1) Yes
 _____ (2) No

51. How do you personally feel about competing with males in the occupational world?

- _____ (1) Would like it very much
 _____ (2) Would like it somewhat
 _____ (3) Wouldn't make much difference
 _____ (4) Wouldn't usually like it
 _____ (5) Would never like it

52. Have you worked at all during the past year?

- _____ (1) Yes
 _____ (2) No

53. If you have worked, was the work that you did related to the kind of work you want as your career?

- _____ (1) Yes
 _____ (2) No

54. If yes, did this work change or influence your vocational preference?

- (1) Yes
 (2) No

BOYS ONLY. GIRLS GO TO QUESTION 57.

55. People have different opinions about the importance of a man's job. We would like to know high school students' opinions about this. Please indicate how you feel about the following statements by circling the appropriate number. Although it is possible that you may agree with a statement as it applies to most cases but can think of one or two exceptions, indicate how you feel about the statement as a general rule. Circle the appropriate number for each statement.

	(1) Strongly agree	(2) Agree	(3) Neither agree nor disagree	(4) Disagree	(5) Strongly disagree	
(a)	1	2	3	4	5	The most important thing in a man's life is his occupation.
(b)	1	2	3	4	5	Many times it is more important to have time for recreation than it is to work hard and achieve occupational advancement.
(c)	1	2	3	4	5	A man should always accept an occupational promotion even if this means moving to a strange community away from his close friends.
(d)	1	2	3	4	5	A man who already has a secure job with a modest income is foolish to go back to school even if additional education is necessary before he can expect to have a better job.
(e)	1	2	3	4	5	A man should be willing to give up time with his family and devote it to his job if this will help his occupational advancement.
(f)	1	2	3	4	5	A man should try hard to get farther ahead in the world than his parents.
(g)	1	2	3	4	5	The most important purpose of education is to prepare people for success.

56. When the time comes for you to take a job, would you take a job that required you to move far away from your community and parents?

- (1) Definitely take the job
 (2) Probably take the job
 (3) Probably turn the job down
 (4) Definitely turn the job down

57. BOYS:

Below are several pairs of occupations. The income for the two occupations in each pair is approximately equal. Please consider each pair of occupations and answer the following question: If you had to work in one or the other of these occupations as your life's work, which of the occupations in each pair would you choose? Please circle a number in each pair.

GIRLS:

Below are several pairs of occupations. The income for the two occupations in each pair is approximately equal. Please consider each pair of occupations and answer the following question: If your husband had to work in one or the other of these occupations as his life's work, which one of the occupations in each pair would you most like him to have? (Assume that he would be equally happy working at either job.) Please circle a number in each pair.

- | | |
|--|--|
| (a) 1. Railroad brakeman
2. Draftsman | (g) 1. High school teacher
2. Electrician |
| (b) 1. Clergyman (minister, priest, rabbi)
2. Upholsterer | (h) 1. Tool and die maker

| (f) 1. Foreman in a factory
2. Editor or reporter | (l) 1. Medical or dental technician
2. Baker |

	03
--	----

NOW WE WANT TO ASK YOU SOME QUESTIONS ABOUT YOURSELF AND YOUR OPINIONS.

Students have different opinions of their abilities. We would like to know how you evaluate your ability.

58. Where do you think you would rank in your class in high school?

- (1) Among the best
 (2) Above average
 (3) Average
 (4) Below average
 (5) Among the poorest

59. Do you find yourself day-dreaming about the type of person you expect to be in the future?

- (1) Very often
 (2) Sometimes
 (3) Rarely or never

60. Do you think you have the ability to complete college?

- (1) Yes, definitely
 (2) Yes, probably
 (3) Not sure either way
 (4) Probably not
 (5) No

This is not the end of the questionnaire. Please turn it around and answer the succeeding pages.

61. How important to you personally is it to get ahead in life?

- (1) Very important
- (2) Fairly important
- (3) Not very important
- (4) Very unimportant

62. How do you rate yourself in school ability compared with those in your class at school?

- (1) I am among the best
- (2) I am above average
- (3) I am average
- (4) I am below average
- (5) I am among the poorest

63. How much does it bother you to find that someone has a poor opinion of your intellectual abilities?

- (1) Bothers me very much
- (2) Bothers me somewhat
- (3) Bothers me a little

64. Forget for a moment how others grade your work. In your own opinion how good do you think your work is?

- (1) My work is excellent
- (2) My work is good
- (3) My work is average
- (4) My work is below average
- (5) My work is much below average

65. What kind of grades do you think you are capable of getting?

- (1) Mostly A's
- (2) Mostly B's
- (3) Mostly C's
- (4) Mostly D's
- (5) Mostly F's

66. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How capable do you think you are of completing such advanced work?

- (1) Very capable
- (2) Somewhat capable
- (3) Not sure if you are capable
- (4) Incapable
- (5) Very incapable

67. Where do you think you would rank in your class in college (if you actually go)?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

68. How do you rate yourself in school ability compared with your close friends?

- (1) I am the best
- (2) I am better than most
- (3) I am about the same
- (4) I am not as good as most
- (5) I am the poorest

All high school students have ambitions and plans for life beyond high school. Your future occupational career and additional education are often included in these ambitions. There are people who say, however, that some students have more opportunities to realize their ambitions than others. How do you feel about the following statements?

69. Do you think you will be kept from achieving your educational or occupational desires because of your race?

- (1) Yes
 (2) No
 (3) Uncertain

70. Do you think you will be kept from achieving your educational or occupational desires because of your family background?

- (1) Yes
 (2) No
 (3) Uncertain

71. Do you think you will be kept from achieving your educational or occupational desires because of your parents' insufficient income?

- (1) Yes
 (2) No
 (3) Uncertain

72. Do you think you will be kept from achieving your educational or occupational desires because of your religion?

- (1) Yes
 (2) No
 (3) Uncertain

73. Studies show that adults in different occupations respond differently to most of the following statements and we would like to know if students with different educational and occupational plans also respond differently. Please indicate whether you agree or disagree with the following statements by circling the appropriate number. Although you may not completely agree or disagree with a statement, give the answer that comes closest to your own feelings.

	(1) Agree	(2) Disagree	
(a)	1	2	Most public officials are not really interested in the problems of the average man.
(b)	1	2	Teenagers should not be permitted to drive.
(c)	1	2	These days a person doesn't know whom he can count on.
(d)	1	2	Anyone who has the ability should have the opportunity to get a college education.
(e)	1	2	Nowadays a person has to live pretty much for today and let tomorrow take care of itself.
(f)	1	2	Everyone can be trusted.
(g)	1	2	In spite of what some people say, the lot of the average man is getting worse, not better.
(h)	1	2	Individuals have more freedom under a democracy than under a dictatorship.
(i)	1	2	Most people don't really care what happens to the next fellow.

74. Do you agree or disagree with the following statements? Please circle the appropriate number.

	(1) Strongly agree	(2) Agree	(3) Slightly agree	(4) Slightly disagree	(5) Disagree	(6) Strongly disagree	
(a)	1	2	3	4	5	6	I wish my father (or mother) had a better job.
(b)	1	2	3	4	5	6	I wish I lived in a nicer house.
(c)	1	2	3	4	5	6	The neighborhood I live in is not as nice as I would like.
(d)	1	2	3	4	5	6	My father's standing in the community is lower than the fathers' standing of my friends.
(e)	1	2	3	4	5	6	I wish I had nicer clothes.
(f)	1	2	3	4	5	6	The town I live in is a nice place to live.
(g)	1	2	3	4	5	6	I am sometimes embarrassed because I have to do without things that other kids have.
(h)	1	2	3	4	5	6	I am sometimes embarrassed because my folks do not have a car or because the car they have is not as nice as I would like.

75. How often do you have the feelings described below? Please circle the appropriate number.

	(1) Often	(2) Sometimes	(3) Never	
(a)	1	2	3	I feel bad because I don't have as much money to spend as most other kids do.
(b)	1	2	3	I have a hard time because it seems that my folks hardly ever have enough money.
(c)	1	2	3	I try to keep boys and girls away from my house because it isn't as nice as theirs.
(d)	1	2	3	I have to do without things that I like because my folks can't afford them.

WE NOW WANT TO ASK YOU SOME QUESTIONS ABOUT SITUATIONS THAT SOMETIMES OCCUR IN OCCUPATIONS AND IN EDUCATIONAL INSTITUTIONS. Many people find themselves in these kinds of situations every day, and many have a hard time choosing between the alternatives available. Although you may never find yourself in any of these exact situations, you will probably find yourself in similar situations several times during your life. In any case, we would like to know what you think about the following problems.

76. Joe Smith is in charge of the desk at the school library. A certain book is in very heavy demand. Joe's close friend, Jack Jones, is pressed for time and can only use the book at a certain hour. Jack suggests that Joe hide the book for a while before his arrival so that he will be sure to get it. Jack needs it badly. What right does Jack have to expect Joe to hide the book?

- _____ (1) He has a definite right as a friend to expect Joe to hide the book for him.
 _____ (2) He has some right as a friend to expect Joe to hide the book for him.
 _____ (3) He has no right as a friend to expect Joe to hide the book for him.

77. If you were Joe Smith, would you hide the book in view of your obligations to Jack as a friend and your obligations to the library?

- (1) Yes
 (2) No

78. Doctor X is a doctor for an insurance company. He examines a close friend who is getting old and needs more insurance. He finds that his friend is in pretty good shape, but is doubtful on one or two minor points which are difficult to diagnose. What right does Doctor X's friend have to expect Doctor X to shade the doubts in his favor?

- (1) He would have a definite right as a friend to expect Doctor X to shade the doubts in his favor.
 (2) He would have some right as a friend to expect Doctor X to shade the doubts in his favor.
 (3) He would have no right as a friend to expect Doctor X to shade the doubts in his favor.

79. If you were Doctor X, do you think you would shade the doubts in favor of your friend?

- (1) Yes
 (2) No

80. John Brown is a New York drama critic. Henry Long, a close friend of his, has invested all his savings in a new Broadway play. Brown really thinks the play is no good. What right does Long have to expect Brown to go easy on the play in his review?

- (1) He has a definite right as a friend to expect Brown to go easy on his play.
 (2) He has some right as a friend to expect Brown to go easy on his play.
 (3) He has no right as a friend to expect Brown to go easy on his play.

81. If you were in Brown's shoes, would you go easy on Long's play in your review in view of your obligations to your readers and your obligations to Long, your friend?

- (1) Yes
 (2) No

82. Smith and Jones share a partnership in a department store. They wish to hire a young man to manage part of the operation. They received two applications for the position. Applicant A had the best test scores and his work experience was what Smith and Jones wanted. Smith wanted to hire Applicant A. Jones wanted to hire Applicant B. Jones argued that because Applicant A came from another community, and because B and his father were close friends of Smith and Jones, they were obligated to give the job to B. Whom do you agree with?

- (1) Smith
 (2) Jones

83. Mr. Davis teaches high school mathematics. He has a pupil, Tom Black, who is failing Mr. Davis' course. Because Mr. Davis and Tom's parents are close friends, Mr. Davis has gotten to know Tom quite well. He knows that Tom is one of the brightest students in his class and that he is doing poor work because he must work at night to help support his family. Since the school policy requires Davis to flunk a certain number of students each term, he will have to flunk some other student who is really passing if he passes Tom. What do you think Mr. Davis should do?

- (1) Pass Tom and flunk the other student
 (2) Flunk Tom and pass the other student

ONLY FOR THOSE WHO HAVE AT LEAST ONE BROTHER OR SISTER. OTHERS GO TO QUESTION 85.

84. Everything considered, one or more brothers or sisters has a happier life with your family than you have.

- (1) Completely agree
 (2) Agree
 (3) Agree a little
 (4) Disagree a little
 (5) Disagree
 (6) Completely disagree

85. Which parent do you think you resemble most in personality?

- _____ (1) Mother
 _____ (2) Father

NOW WE WANT TO ASK SOME QUESTIONS ABOUT YOUR PARENTS.

Some people believe that the way a teenager thinks his parents assess his ability will influence his educational and occupational ambitions and plans. Some people also believe that the relationship between parents and teenagers influences teenagers' ambitions and plans. We would like to check on these beliefs by having you answer the following questions.

FIRST SOME QUESTIONS ABOUT YOUR FATHER. IF YOU LIVE WITH YOUR STEPFATHER, ANSWER IN TERMS OF YOUR STEPFATHER.

86. Where do you think your father would rank you in your class in high school?

- _____ (1) Among the best
 _____ (2) Above average
 _____ (3) Average
 _____ (4) Below average
 _____ (5) Among the poorest

87. My father tries to understand my problems.

- _____ (1) Always
 _____ (2) Most of the time, but not always
 _____ (3) Sometimes
 _____ (4) Very rarely or never

88. What kind of grades does your father think you are capable of getting?

- _____ (1) Mostly A's
 _____ (2) Mostly B's
 _____ (3) Mostly C's
 _____ (4) Mostly D's
 _____ (5) Mostly F's

89. My father lets me know that he loves me.

- _____ (1) Frequently
 _____ (2) Sometimes, but not very often
 _____ (3) On rare occasions
 _____ (4) Never

90. How do you think your father would rate you in school ability compared with your close friends?

- _____ (1) The best
 _____ (2) Better than most
 _____ (3) About the same
 _____ (4) Not as good as most
 _____ (5) The poorest

91. How do you think your father would grade your work?

- _____ (1) Excellent
 _____ (2) Good
 _____ (3) Average
 _____ (4) Below average
 _____ (5) Much below average

92. How close would you say you were to your father?

- _____ (1) Extremely close
- _____ (2) Very close
- _____ (3) Considerably close
- _____ (4) Somewhat close
- _____ (5) A little close
- _____ (6) Not close at all

93. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How would your father rank your capability for completing such advanced work?

- _____ (1) Very capable
- _____ (2) Somewhat capable
- _____ (3) He would not be sure if I am capable
- _____ (4) Incapable
- _____ (5) Very incapable

94. It helps me just to talk with my father when I am nervous or upset about something.

- _____ (1) Always
- _____ (2) Most of the time
- _____ (3) Sometimes
- _____ (4) Very rarely or never
- _____ (5) I never talk with my father

95. How would your father rate you in school ability compared with those in your class at school?

- _____ (1) Among the best
- _____ (2) Above average
- _____ (3) Average
- _____ (4) Below average
- _____ (5) Among the poorest

96. My father is an easy person to talk with.

- _____ (1) Always
- _____ (2) Most of the time, but not always
- _____ (3) Sometimes, but not very often
- _____ (4) Rarely or never

97. Does your father think you have the ability to complete college?

- _____ (1) Yes, definitely
- _____ (2) Yes, probably
- _____ (3) Not sure either way
- _____ (4) Probably not
- _____ (5) No

98. Where do you think your father would rank you in your class in college (if you actually go)?

- _____ (1) Among the best
- _____ (2) Above average
- _____ (3) Average
- _____ (4) Below average
- _____ (5) Among the poorest

99. My father feels warm and affectionate toward me.

- _____ (1) Rarely or never
- _____ (2) Sometimes, but not very often
- _____ (3) Most of the time, but not always
- _____ (4) Always

100. In comparison to your friends and their relationship with their fathers, how close do you think you are to your father?

- (1) Much less close than most of my friends
- (2) Somewhat less close than most of my friends
- (3) About the same as most of my friends
- (4) Somewhat closer than most of my friends
- (5) Much closer than most of my friends

NOW WE WANT TO ASK SOME QUESTIONS ABOUT YOUR MOTHER. IF YOU LIVE WITH YOUR STEPMOTHER, ANSWER IN TERMS OF YOUR STEPMOTHER.

101. My mother tries to understand my problems.

- (1) Always
- (2) Most of the time, but not always
- (3) Sometimes
- (4) Very rarely or never

102. My mother lets me know that she loves me.

- (1) Frequently
- (2) Sometimes, but not very often
- (3) On rare occasions

103. How close would you say you were to your mother?

- (1) Extremely close
- (2) Very close
- (3) Considerably close
- (4) Somewhat close
- (5) A little close
- (6) Not close at all

104. It helps me just to talk with my mother when I am nervous or upset about something.

- (1) Always
- (2) Most of the time
- (3) Sometimes
- (4) Very rarely or never
- (5) I never talk with my mother

105. My mother is an easy person to talk with.

- (1) Always
- (2) Most of the time
- (3) Sometimes, but not very often
- (4) Rarely or never

106. My mother feels warm and affectionate toward me.

- (1) Rarely or never
- (2) Sometimes, but not very often
- (3) Most of the time, but not always
- (4) Always

107. In comparison to your friends and their relationship with their mothers, how close do you think you are to your mother?

- (1) Much less close than most of my friends
- (2) Somewhat less close than most of my friends
- (3) About the same as most of my friends
- (4) Somewhat closer than most of my friends
- (5) Much closer than most of my friends

	04
--	----

108. Do you agree or disagree with the following statements? Circle the appropriate number.

	(1)	(2)	(3)	(4)	(5)	
	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(a)	1	2	3	4	5	When I make plans, I am fairly sure that I can make them work.
(b)	1	2	3	4	5	It is not wise to plan too far ahead because most things turn out to be a matter of good or bad fortune anyhow.
(c)	1	2	3	4	5	People are lonely because they don't try to be friendly.
(d)	1	2	3	4	5	There's not much use in trying to please people; if they like you, they like you.
(e)	1	2	3	4	5	Many times I feel that I have little influence over the things that happen to me.
(f)	1	2	3	4	5	I do not believe that chance and luck are very important in life.
(g)	1	2	3	4	5	I have usually found that what is going to happen will happen, no matter what I do.
(h)	1	2	3	4	5	Many times I might just as well decide what to do by flipping a coin.
(i)	1	2	3	4	5	Becoming a success is a matter of hard work; luck has little or nothing to do with it.
(j)	1	2	3	4	5	Getting a good job depends mainly on being in the right place at the right time.
(k)	1	2	3	4	5	Most of the unhappy things in my life have been due to bad luck.
(l)	1	2	3	4	5	Most people don't realize how much their lives are the result of accidental happenings.

109. Do you agree or disagree with the following statements? Circle the appropriate number.

	(1) Strongly agree	(2) Agree	(3) Neither agree nor disagree	(4) Disagree	(5) Strongly disagree	
(a)	1	2	3	4	5	High school should be more concerned with developing social and personal skills; less concerned with developing vocational skills
(b)	1	2	3	4	5	There is too much emphasis on extra-curricular activities in high school, and not enough emphasis on developing job-related abilities.
(c)	1	2	3	4	5	In high school there should be more courses to prepare students for jobs in the outside world and fewer purely "academic" courses such as literature and history.
(d)	1	2	3	4	5	The primary function of a high school education should be to teach occupational skills.
(e)	1	2	3	4	5	High schools should be concerned more with occupational training than with preparation for college.
(f)	1	2	3	4	5	High schools should be more concerned with sponsoring activities that allow students to make friends with other students than with teaching vocational skills.

DEPARTMENT OF EDUCATION
WASHINGTON STATE UNIVERSITY
EDUCATIONAL AND OCCUPATIONAL PLANS
OF HIGH SCHOOL STUDENTS

JANUARY 1966
STUDENT INTERVIEW

I.D. NO. _____ DATE _____
INTERVIEWER'S NAME _____ TIME (MINUTES) _____

HELLO, GOOD MORNING, GOOD AFTERNOON, ETC. I am _____
from Washington State University. As you know Washington State University is
conducting a study of the educational and occupational plans of young people.
You may recall filling out a questionnaire a few weeks ago. I'd like to ask you
a few additional questions. Your answers will be confidential. Do you mind
being interviewed?

IF CONSENTS: First let me get some general information about you.

1. How old will you be on your next birthday?

2. When is your next birthday?

3. Are you a junior or a senior? _____ JUNIOR _____ SENIOR

4. INTERVIEWER: CHECK ONE. _____ MALE _____ FEMALE

5. Now, what would you like to do about your future education if you had a
free choice? INTERVIEWER: PROBE AND CODE TO THE FOLLOWING CATEGORIES.
MARK THE HIGHEST LEVEL MENTIONED.

- _____ (1) QUIT HIGH SCHOOL AND NOT GO TO ANY KIND OF SCHOOL AGAIN.
- _____ (2) GRADUATE FROM HIGH SCHOOL.
- _____ (3) ATTEND A BUSINESS OR COMMERCIAL SCHOOL (NOT COLLEGE LEVEL)
- _____ (4) ATTEND A TECHNICAL OR VOCATIONAL SCHOOL (NOT COLLEGE LEVEL)
- _____ (5) ATTEND A JUNIOR COLLEGE, TAKE A BUSINESS OR COMMERCIAL COURSE
- _____ (6) ATTEND A JUNIOR COLLEGE, TAKE A VOCATIONAL OR TECHNICAL COURSE
- _____ (7) ATTEND A JUNIOR COLLEGE, TAKE A REGULAR COLLEGE COURSE
- _____ (8) ATTEND A COLLEGE OR UNIVERSITY
- _____ (9) GRADUATE FROM A COLLEGE OR UNIVERSITY
- _____ (10) AFTER GRADUATING FROM COLLEGE SPEND ONE OR MORE YEARS DOING ADVANCED
STUDY IN A SPECIALIZED FIELD.
- _____ (11) OTHER (WHAT?) _____

FORM B

Now we would like to know something about your job-related desires, plans and attitudes.

BOYS ONLY:

6. Most students have daydreams about what they would like to be and do when they are adults. What kind of occupation would you most like to have as your career if you could do whatever you chose? (Please be specific.)

6a. _____
Why does this occupation appeal to you?

7. Now, leaving your daydreams and wishes aside, what occupation do you really plan to have as your career?

_____ (1)

_____ (2) I HAVE NO PLANS

GIRLS ONLY:

8. I now want to show you a card. HAND STUDENT CARD NO. 1. On this card there are six different things that you can do during your adult life--be a homemaker and not work to having a career without ever marrying. Look at each alternative carefully and tell me the number of the one alternative that you think best describes what you think your interests and desires will be for most of your adult life? INTERVIEWER: RECORD STUDENT'S RESPONSE BELOW.

_____ (1) HOME MAKING WILL BE MY MAJOR INTEREST. I WILL NOT WANT TO WORK AT ALL AFTER I AM MARRIED.

_____ (2) HOME MAKING WILL BE MY MAJOR INTEREST, BUT I WILL WANT TO WORK OCCASIONALLY OR WORK PART TIME.

_____ (3) HOME MAKING WILL BE MY MAJOR INTEREST BUT I WILL ALSO WANT TO WORK MOST OF THE TIME.

_____ (4) WORK WILL BE MY MAJOR INTEREST BUT I WILL ALSO WANT TO HAVE A FAMILY AND BE A HOME MAKER.

_____ (5) WORK WILL BE MY MAJOR INTEREST. I WILL NOT WANT TO SPEND MUCH EFFORT IN HOME MAKING.

_____ (6) WORK WILL BE MY ONLY INTEREST. I DON'T WANT TO MARRY AND BE A HOME MAKER.

9. IF RESPONDENT ANSWERS QUESTION 8 WITH 2, 3, 4, 5 OR 6 ASK: What occupation would you most want to have?

B

CARD I

1. Homemaking will be my major interest; I will not want to work at all after I am married.
2. Homemaking will be my major interest but I will want to work occasionally or work part time.
3. Homemaking will be my major interest but I will also want to work most of the time.
4. Work will be my major interest but I will also want to have a family and be a homemaker.
5. Work will be my major interest. I will not want to spend much effort in homemaking.
6. Work will be my only interest. I don't want to marry and be a homemaker.

We want to know how students think their mothers feel about their ability. HAND STUDENT CARD II. When I read you a question you look at the answers on this card and tell me the answer that you think is most like your mother's feelings.

Question 10. What kind of grades do you think your mother thinks you are capable of getting?

- (1) MOSTLY A'S
- (2) MOSTLY B'S
- (3) MOSTLY C'S
- (4) MOSTLY D'S
- (5) MOSTLY F'S

Question 11. How do you think your mother rates you in school ability compared with those in your class at school?

- (1) AMONG THE BEST
- (2) ABOVE AVERAGE
- (3) AVERAGE
- (4) BELOW AVERAGE
- (5) AMONG THE POOREST

Question 12. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How do you think your mother would rank your capabilities for completing such advanced work?

- (1) VERY CAPABLE
- (2) SOMEWHAT CAPABLE
- (3) AVERAGE CAPABILITY
- (4) INCAPABLE
- (5) VERY INCAPABLE

Question 13. Do you think your mother thinks you have the ability to complete college?

- (1) YES, DEFINITELY
- (2) YES, PROBABLY
- (3) NOT SURE EITHER WAY
- (4) PROBABLY NOT
- (5) NO

Question 14. How do you think your mother would grade your work?

- (1) EXCELLENT
- (2) GOOD
- (3) AVERAGE
- (4) BELOW AVERAGE
- (5) MUCH BELOW AVERAGE

CARD II

10. 1. Mostly A's
2. Mostly B's
3. Mostly C's
4. Mostly D's
5. Mostly F's
11. 1. Among the best
2. Above average
3. Average
4. Below average
5. Among the poorest
12. 1. Very capable
2. Somewhat capable
3. Average capability
4. Incapable
5. Very incapable
13. 1. Yes, definitely
2. Yes, probably
3. Not sure either way
4. Probably not
5. No
14. 1. Excellent
2. Good
3. Average
4. Below average
5. Much below average
15. 1. Among the best
2. Above average
3. Average
4. Below average
5. Among the poorest
16. 1. The best
2. Above average
3. Average
4. Below average
5. Among the poorest
17. 1. Among the best
2. Above average
3. Average
4. Below average
5. Among the poorest

Question 15. Where do you think your mother would rank you in your class in high school?

- (1) AMONG THE BEST
- (2) ABOVE AVERAGE
- (3) AVERAGE
- (4) BELOW AVERAGE
- (5) AMONG THE POOREST

Question 16. How do you think your mother would rate you in school ability compared to your close friends?

- (1) THE BEST
- (2) ABOVE AVERAGE
- (3) AVERAGE
- (4) BELOW AVERAGE
- (5) THE POOREST

Question 17. Where do you think your mother would rank you in your class in college (if you actually go)?

- (1) AMONG THE BEST
- (2) ABOVE AVERAGE
- (3) AVERAGE
- (4) BELOW AVERAGE
- (5) AMONG THE POOREST

18. People in all communities make judgements of each other regarding their rank in the community. Some people are considered low, others are placed toward the middle, others are judged to be toward the top. Here is a card with ten boxes on it. HAND RESPONDENT CARD III. Number "1" represents very low standing, number "10" represents very high standing. Please tell me the number of the box that you think best reflects the standing of your family in the community.

10		Above average

| _____ | _____ | 5. Time spent on homework |
| _____ | _____ | 6. Against going around with certain boys |
| _____ | _____ | 7. Against going around with certain girls |
| _____ | _____ | 8. Eating dinner with the family |

Now I would like for you to answer some questions about your feelings and attitudes. I am going to give you a booklet with a number of questions in it. The questions are not difficult; you should have no trouble answering them. INTERVIEWER: GIVE THE IPAT "SELF ANALYSIS FORM" TO THE RESPONDENT, READ THE INSTRUCTIONS WITH HIM, AND THEN APPEAR TO BE BUSY UNTIL THE RESPONDENT TELLS YOU HE HAS FINISHED.

As you know, students vary in their ability. Some are capable of doing excellent work in school, while others are only fair. We want to know what students think of their own ability. You may recall that several weeks ago we asked you some questions about this. We would like to ask you a few additional questions today. Would you please read and answer the questions on this page while I arrange some of my papers. INTERVIEWER: SCORE THE IPAT WHILE RESPONDENT ANSWERS SELF-ASSESSMENT ITEMS.

PLEASE WRITE THE STUDENT'S NAME ON QUESTIONNAIRE SCHEDULE SUPPLEMENT.

21. . Some people say that the plans of young people are usually similar to those of their close friends. Others disagree. We would like to check this out on a scientific basis and it will help us to do this if you would be willing to tell me the names of the juniors and seniors in this school who are your best friends. Would you please also tell me the occupations you think these students plan to enter.

NAME	OCCUPATION
_____	_____
_____	_____
_____	_____

22. . We would like to send letters to some parents of high school students to find out how they feel toward education and certain occupations. Would you have any objections if we sent a questionnaire to your parents?

IF NO OBJECTIONS: What is your father's name and address?

Is your mother's address the same as your father's?

 YES

 NO

IF NO, what is her name and address?

23. Where do you think you would rank in your class in high school?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

24. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How capable do you think you are of completing such advanced work?

- (1) Very capable
- (2) Somewhat capable
- (3) Not sure if you are capable
- (4) Incapable
- (5) Very incapable

25. Do you think you have the ability to complete college?

- (1) Yes, definitely
- (2) Yes, probably
- (3) Not sure either way
- (4) Probably not
- (5) No

26. How do you rate yourself in school ability compared with those in your class at school?

- (1) I am among the best
- (2) I am above average
- (3) I am average
- (4) I am below average
- (5) I am among the poorest

27. Forget for a moment how others grade your work. In your own opinion how good do you think your work is?

- (1) My work is excellent
- (2) My work is good
- (3) My work is average
- (4) My work is below average
- (5) My work is much below average

28. What kind of grades do you think you are capable of getting?

- (1) Mostly A's
- (2) Mostly B's
- (3) Mostly C's
- (4) Mostly D's
- (5) Mostly F's

29. Where do you think you would rank in your class in college (if you actually go)?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

30. How do you rate yourself in school ability compared with your close friends?

- (1) I am among the best
- (2) I am above average
- (3) I am average
- (4) I am below average
- (5) I am the poorest

I P A T SELF ANALYSIS FORM

NAME _____ TODAY'S DATE _____
First Middle Last

SEX _____ AGE _____ OTHER FACTS _____
(Write M or F) (Nearest Year) (Address, Occupation, etc., as instructed)

CONFIDENTIAL

Inside this booklet you will find forty questions, dealing with difficulties that most people experience at one time or another. It will help a lot in self-understanding if you check Yes, No, etc., to each, frankly and truthfully, to describe any problems you may have.

Start with the two simple examples just below, for practice. As you see, each inquiry is actually put in the form of a sentence. By putting a cross, X, in *one* of the three boxes on the right you show how it applies to you. Make your marks now.

1. I enjoy walking..... Yes Occasionally No

A middle box is provided for when you cannot definitely say Yes or No. But use it as little as possible.

2. I would rather spend an evening:

(A) talking to people, (B) at a movie..... A In between B

About half the items inside end in A and B choices like this. B is always on the right. Remember, use the "In between" or "Uncertain" box only if you cannot possibly decide on A or B.

Now:

1. Make sure you have put your name, and whatever else the examiner asks, in the place at the top of this page.
2. Never pass over an item but give some answer to every single one. Your answers will be entirely confidential.
3. Do not spend time pondering. Answer each immediately, the way you want to at this moment (not last week, or usually). You may have answered questions like this before; but answer them as you feel *now*.

Most people finish in five minutes; some, in ten. Hand in this form as soon as you are through with it, unless told to do otherwise. As soon as the examiner signals or tells you to, turn the page and begin.

1. I find that my interests, in people and amusements, tend to change fairly rapidly..... True In between False
2. If people think poorly of me I can still go on quite serenely in my own mind..... True In between False
3. I like to wait till I am sure that what I am saying is correct, before I put forward an argument..... Yes In between No
4. I am inclined to let my actions get swayed by feelings of jealousy..... Sometimes Seldom Never
5. If I had my life to live over again I would:
(A) plan very differently, (B) want it the same..... A In between B
6. I admire my parents in all important matters..... Yes In between No
7. I find it hard to "take 'no' for an answer", even when I know what I ask is impossible..... True In between False
8. I doubt the honesty of people who are more friendly than I would naturally expect them to be..... True In between False
9. In demanding and enforcing obedience my parents (or guardians) were: (A) always very reasonable, (B) often unreasonable..... A In between B
10. I need my friends more than they seem to need me..... Rarely Sometimes Often
11. I feel sure that I could "pull myself together" to deal with an emergency..... Always Often Seldom
12. As a child I was afraid of the dark..... Often Sometimes Never
13. People sometimes tell me that I show my excitement in voice and manner too obviously..... Yes Uncertain No
14. If people take advantage of my friendliness I:
(A) soon forget and forgive, (B) resent it and hold it against them..... A In between B
15. I find myself upset rather than helped by the kind of personal criticism that many people make..... Often Occasionally Never
16. Often I get angry with people too quickly..... True In between False
17. I feel restless as if I want something but do not know what..... Very rarely Sometimes Often
18. I sometimes doubt whether people I am talking to are really interested in what I am saying..... True In between False
19. I have always been free from any vague feelings of ill-health, such as obscure pains, digestive upsets, awareness of heart action, etc..... True Uncertain False
20. In discussion with some people, I get so annoyed that I can hardly trust myself to speak..... Sometimes Rarely Never

- ____ (7) Other (what?) _____

H. What kind of grades do you think this student is capable of getting?

- ____ (1) Mostly A's
- ____ (2) Mostly B's
- ____ (3) Mostly C's
- ____ (4) Mostly D's
- ____ (5) Mostly F's

I. How would you rate this person in school ability compared with those in (his)(her) class at school?

- _____ (1) Among the best
- _____ (2) Above average
- _____ (3) Below average
- _____ (5) Among the poorest

J. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How would you rate the capability of this student for completing such advanced work?

- _____ (1) Very capable
- _____ (2) Somewhat capable
- _____ (3) Average capability
- _____ (4) Incapable
- _____ (5) Very incapable

K. Do you think this student has the ability to complete college?

- _____ (1) Yes, definitely
- _____ (2) Yes, probably
- _____ (3) Not sure either way
- _____ (4) Probably not
- _____ (5) No

L. How would you grade this student's work?

- _____ (1) Excellent
- _____ (2) Good
- _____ (3) Average
- _____ (4) Below average
- _____ (5) Much below average

M. Where would you rank this student in (his)(her) class in high school?

- _____ (1) Among the best
- _____ (2) Above average
- _____ (3) Average
- _____ (4) Below average
- _____ (5) Among the poorest

N. How would you rate this student in school ability compared with (his)(her) friends?

- _____ (1) The best
- _____ (2) Better than most
- _____ (3) About the same
- _____ (4) Not as good as most
- _____ (5) The poorest

O. Where do you think this student would rank in (his)(her) class in college if (he)(she) actually goes?

- _____ (1) Among the best
- _____ (2) Above average
- _____ (3) Average
- _____ (4) Below average
- _____ (5) Among the poorest

WASHINGTON STATE UNIVERSITY
DEPARTMENT OF EDUCATION

Educational and Occupational Plans
of High School Students

Washington State University and the Washington State Office of Public Instruction are making a study of the factors which influence the educational and occupational plans of high school students. The results of this study will be used to plan educational programs that will help students reach their goals.

You can help in this work by taking a few minutes to answer the questions in this questionnaire. We will be grateful if you will do this.

The information you give will be used to check some ideas which people have about high school students and their parents. Some people say that nearly all parents want their children to go to college or take some other kind of schooling, but we are not sure this is the case. If the views of teenagers and their parents are not always the same, teachers and counselors can be more helpful to students if they know what the similarities and differences are. Facts about how much the desires of young people reflect the wishes of their parents will be helpful.

It will be greatly appreciated if you will take the time to fill out this questionnaire and return it in the enclosed postage-free envelope. Your replies will be handled in a confidential manner. We will use the information for statistical purposes only. We are not asking that names be placed on the questionnaires. This insures that the clerks who code the answers will not know whose questionnaires are being coded. The number which appears on the questionnaire will enable us to keep track of the returns as they come in, and thus avoid bothering you with a reminder if you have already returned your questionnaire.

Thank you for your cooperation.

Sincerely yours,

Roy T. Bowles

Roy T. Bowles
Staff Director

DEPARTMENT OF EDUCATION
WASHINGTON STATE UNIVERSITY
Educational and Occupational Plans
of High School Students
Parent's Questionnaire

1. How many children in your family? (Include stepchildren and those no longer at home.)

2. How many of these were in high school any time during the 1965-66 school year?

Boys _____ Girls _____

Now we would like to ask some questions concerning your feelings about the plans of your son or daughter who is a junior or senior in high school. IF YOU HAVE MORE THAN ONE CHILD IN THE ELEVENTH AND TWELFTH GRADES, please answer these questions in terms of the oldest child who is in one of these grades. In each question, please circle the word "son" or "daughter" to indicate the sex of the child you are thinking of.

3. Mark the blank at the left of the phrase which best describes the highest level and type of education that you would like for your son daughter (circle one) to achieve.

- (1) Quit high school and not go to any kind of school again.
- (2) Graduate from high school.
- (3) Attend a business or commercial school (not college level)
- (4) Attend a vocational or technical school (not college level)
- (5) Attend a junior college, take a business or commercial course.
- (6) Attend a junior college, take a vocational or technical course.
- (7) Attend a junior college, take a regular college course.
- (8) Attend a college or university.
- (9) Graduate from a college or university.
- (10) After graduating from college spend one or more years doing advanced study in a specialized field.
- (11) Other (What?) _____

4. What course of study would you like your son daughter (circle one) to take? That is, what would you like him or her to major in? _____

5. What occupation or line of work would you most like your son daughter (circle one) to go into? _____

6. Below are several pairs of occupations. The income for the two occupations in each pair is approximately equal. Please consider each pair of occupations and answer the following question if you have a son in the eleventh or twelfth grade: If your son had to work in one or the other of these occupations as his life's work, which of the occupations in each pair would you prefer him to have?

Or if you have a daughter in the eleventh or twelfth grade, answer in terms of the question: If your daughter's husband had to work in one or the other of these occupations in each pair which would you prefer him to have?

Answer in terms of your oldest child who is in the eleventh or twelfth grade. This child is a son daughter (circle one).

A. Railroad brakeman
B. Draftsman

A. Longshoreman or stevedore
B. Bookkeeper

A. Cabinet maker
B. Bank teller

A. Clergyman (minister, priest, rabbi)
B. Upholsterer

A. Foreman in a factory
B. Editor or reporter

A. College professor
B. Locomotive engineer

A. Plumber
B. Photographer

A. High school teacher
B. Electrician

A. Bus driver
B. Manager of a service station

A. Radio operator
B. Locomotive fireman

A. Tool and die maker
B. Insurance agent

A. Medical or dental technician
B. Baker

7. In which of the following would you be willing and able to help your son daughter (circle one) financially? Mark all that apply.

- (1) Farming
- (2) College
- (3) Vocational schooling
- (4) Business schooling
- (5) Setting up a business of his or her own
- (6) None of the above

As everyone knows, not all children are alike in ability. We would like to know what you think of your son's (daughter's) ability. How would you rate your son daughter (circle one) on the following? Please answer in terms of the oldest child who is in the eleventh or twelfth grade.

8. Where do you think your son (daughter) would rank in his (her) class in high school?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

9. In order to become a doctor, lawyer, or university professor, work beyond four years of college is necessary. How capable do you think your son (daughter) is of completing such advanced work?

- (1) Very capable
- (2) Somewhat capable
- (3) Not sure if he (she) is capable
- (4) Incapable
- (5) Very incapable

10. Do you think your son (daughter) has the ability to complete college?

- (1) Yes, definitely
- (2) Yes, probably
- (3) Not sure either way
- (4) Probably not
- (5) No

11. How do you think your son (daughter) rates in school ability compared with those in his (her) class at school?

- (1) Among the best
- (2) Above average
- (3) Average
- (4) Below average
- (5) Among the poorest

12. In your own opinion how good do you think your son's (daughter's) school work is?

- (1) Excellent
- (2) Good
- (3) Average
- (4) Below average
- (5) Much below average

13. What kind of grades do you think your son (daughter) is capable of getting?

- (1) Mostly A's
- (2) Mostly B's
- (3) Mostly C's
- (4) Mostly D's
- (5) Mostly F's

14. Where do you think your son (daughter) would rank in his (her) class in college (if he or she actually goes)?

- (1) Among the best
 (2) Above average
 (3) Average
 (4) Below average
 (5) Among the poorest

15. How would you rate your son (daughter) in school ability compared with his (her) close friends?

- (1) The best
 (2) Above average
 (3) About the same
 (4) Below average
 (5) The poorest

Parents usually have ambitions and plans for their children's educational and occupational careers. There are people who say, however, that some students have more opportunities to realize their ambitions than others. How do you feel about the following statements?

16. Do you think your son (daughter) will be kept from achieving his (her) educational or occupational desires because of race?

- (1) Yes
 (2) No
 (3) Uncertain

17. Do you think your son (daughter) will be kept from achieving his (her) educational or occupational desires because of family background?

- (1) Yes
 (2) No
 (3) Uncertain

18. Do you think your son (daughter) will be kept from achieving his (her) educational or occupational desires because of insufficient family income?

- (1) Yes
 (2) No
 (3) Uncertain

19. Do you think your son (daughter) will be kept from achieving his (her) educational or occupational desires because of religious beliefs?

- (1) Yes
 (2) No
 (3) Uncertain

20. Now we would like to know your general feelings about certain aspects of work and education. Please circle a number to show whether or not each of the statements in this list agrees with your ideas of work and education. (If retired, please give the responses which you would have given prior to retirement.)

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(a)	1	2	3	4	5	Everyone who possibly can should work.
(b)	1	2	3	4	5	Even if I were financially secure and did not need a job I would probably work.
(c)	1	2	3	4	5	It is a person's duty to work.
(d)	1	2	3	4	5	If I did not work I would feel that I was not leading a "right life."
(e)	1	2	3	4	5	I find it hard to respect a man who doesn't work.
(f)	1	2	3	4	5	If I were financially well off, I think I could lead a perfectly happy and satisfying life without working.

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(g)	1	2	3	4	5	The most important thing in a man's life is his occupation.
(h)	1	2	3	4	5	Many times it is more important to have time for recreation than it is to work hard and achieve occupational advancement.
(i)	1	2	3	4	5	A man should always accept an occupational promotion even if this means moving to a strange community away from his close friends.
(j)	1	2	3	4	5	A man who already has a secure job with a modest income is foolish to go back to school even if additional education is necessary before he can expect to have a better job.
(k)	1	2	3	4	5	A man should be willing to give up time with his family and devote it to his job if this will help his occupational advancement.
(l)	1	2	3	4	5	A man should try hard to get farther ahead in the world than his parents.
(m)	1	2	3	4	5	The most important purpose of education is to prepare people for success.

21. Now we would like to know your attitudes on some other issues. Please circle a number to show how you feel about the statements listed below.

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	
(a)	1	2	3	4	5	It is not wise to plan too far ahead because most things turn out to be a matter of good or bad fortune anyhow.
(b)	1	2	3	4	5	There's not much use in trying to please people. If they like you, they like you.
(c)	1	2	3	4	5	The average citizen can have an influence on the way the government is run.
(d)	1	2	3	4	5	This world is run by the few people in power, and there is not much the little guy can do about it.
(e)	1	2	3	4	5	Many times I feel that I have little influence over the things that happen to me.
(f)	1	2	3	4	5	I do not believe that chance and luck are very important in my life.
(g)	1	2	3	4	5	Many times we might just as well decide what to do by flipping a coin.
(h)	1	2	3	4	5	Becoming a success is a matter of hard work; luck has little or nothing to do with it.
(i)	1	2	3	4	5	Getting a good job depends mainly on being in the right place at the right time.

22. Please circle a number to show whether you agree or disagree with the following statements. Although you may not completely agree or disagree with a statement, give the answer that comes closest to your own feelings.

- | | Agree | Disagree | |
|-----|-------|----------|--|
| (a) | 1 | 2 | Most public officials are not really interested in the problems of the average man. |
| (b) | 1 | 2 | Honesty is always the best policy. |
| (c) | 1 | 2 | These days a person doesn't know whom he can count on. |
| (d) | 1 | 2 | Anyone who has the ability should have the opportunity to get a college education. |
| (e) | 1 | 2 | Nowadays a person has to live pretty much for today and let tomorrow take care of itself. |
| (f) | 1 | 2 | Everyone can be trusted. |
| (g) | 1 | 2 | In spite of what some people say, the lot of the average man is getting worse, not better. |
| (h) | 1 | 2 | Individuals have more freedom under a democracy than under a dictatorship. |
| (i) | 1 | 2 | Most people don't really care what happens to the next fellow. |

Now we would like to ask some general questions about you and your family.

23. How much education did you get? (check one)

- (1) Eighth grade or less
 (2) Some high school, but did not finish
 (3) High school graduate
 (4) Some college, but did not finish
 (5) College graduate
 (6) More than college

FATHERS ONLY:

24. Have you ever attended a vocational or technical school?

- (1) Yes
 (2) No

If yes, what type of school was it? _____

25. Where do you live?

- (1) City of 150,000 or larger
 (2) City of 100,000 to 150,000
 (3) City of 50,000 to 100,000
 (4) City of 10,000 to 50,000
 (5) City of 2,500 to 10,000
 (6) Town under 2,500
 (7) On a farm
 (8) Country but not farm

26. If you live on a farm, do you own or rent the farm?

- (1) Own the farm
 (2) Rent the farm

27. If you live in town, do you own or rent the house in which you are living?

- (1) Own the house
 (2) Rent the house

2 The 1965 income for my family from all sources wa. (if you do not know exactly, make the best guess you can).

- (1) Under \$2,000
 (2) \$2,000 - 2,999
 (3) \$3,000 - 3,999
 (4) \$4,000 - 4,999
 (5) \$5,000 - 5,999
 (6) \$6,000 - 7,499
 (7) \$7,500 - 9,999
 (8) \$10,000 - 14,999
 (9) \$15,000 or over

29. In terms of income or wealth of families in my community, I think my family is:

- (1) Considerably above average
 (2) Somewhat above average
 (3) Average
 (4) Somewhat below average
 (5) Considerably below average

30. What kind of work do you do for a living? What is your job called, what kind of business or industry do you work in, and what do you do? (For example: "Carpenter, work on construction crew building new houses"; "Sales clerk, wait on customers in a department store"; "Owner and operator of a grocery store.") Mothers: give husband's occupation.

31. What kind of firm or outfit are you (or is your husband) associated with in your work?

- (1) Own business
 (2) Own farm
 (3) Own professional office
 (4) Small private firm, organization or factory (50 employees or less)
 (5) Large private firm, organization or factory (over 50 employees)
 (6) Educational institution
 (7) Social agency
 (8) Other non-profit organization (what?) _____
 (9) Government bureau or agency
 (10) Other (What?) _____

32. About how many clubs and organizations in your community would you say you belonged to? (Include civic clubs, churches, lodges, fraternal orders, and other groups.)

MOTHERS ONLY

33. Do you work outside the home for pay?

- (1) Yes full-time
 (2) Yes part-time
 (3) No

If Yes, what kind of work do you do?

WASHINGTON STATE UNIVERSITY
DEPARTMENT OF EDUCATION

DIRECTIONS FOR COLLECTING GRADES AND I. Q. SCORES

Attached you will find forms designed for recording the grades and I. Q. scores of students. The names of several students are listed on these forms. Please check the school records for each student listed.

1. Record the cumulative grade point average if it is available. If it has not already been computed, leave this space blank.
2. Record the student's Intelligence test score (if available).
3. Record the name of the Intelligence test used. (This is necessary because scores on different tests do not mean exactly the same thing.)
4. Record the grades which the student received for the last semester. PLEASE BE CERTAIN TO LIST THE NUMBER OF CREDITS AND THE GRADE FOR EACH COURSE THE STUDENT WAS ENROLLED IN.
5. Please complete the information requested in the blanks below.

SCHOOL _____ NAME OF PERSON COMPLETING FORM _____

DATE _____

ENDING DATE OF LAST SEMESTER _____

IF SEMESTER GRADES ARE NOT COMPUTED IN YOUR SCHOOL, report grades for last grading period and complete blanks below.

LENGTH OF LAST GRADING PERIOD _____

ENDING DATE OF LAST GRADING PERIOD _____

6. Please complete the enclosed "Employee's Withholding Exemption Certificate - Form W-4" and return it with the forms. Make special note to record the number of hours worked. You will be paid \$1.50 per hour.
7. Return all materials to:

15. ABSTRACT (250 words max.) This report contains an outline of the objectives and methods of The Educational and Occupational Aspirations Study being conducted as a part of the Vocational-Technical Education Research and Development Project at Washington State University. It also contains data relevant to the educational and occupational aspirations and expectations and the school attitudes and experiences of 3100 juniors and seniors in a sample of 12 high schools in Washington State.

Educational aspirations and expectations are relatively high, but aspirations are the higher of the two. Three-fourths of the students expect to attend college and 43.5 percent expect to graduate. One-fourth of the students expect to terminate their education with vocational training, some of it taken in junior colleges.

Occupational aspirations and expectations are high. Over 60 percent aspired to be professional or technical workers and over 40 percent expected to enter these occupations. Few students aspired or expected to be farmers, sales workers, operatives, or laborers. Twenty-eight percent of the boys did not name an expected occupation.

Most of the students recognized the importance of education and derived some satisfaction from school. Most students did not have a highly favorable attitude toward vocational courses but nearly all felt that the high schools should offer vocational courses.

Schools differ in the proportion of students aspiring or expecting to acquire each type of education or enter each type of occupation. They also differ in the proportion of students expressing different attitudes toward school and toward vocational courses.
