A DESCRIPTIVE CLASS PROFILE REPORT ON THE FRESHMAN CLASS FOR THE 1965-1966 ACADEMIC YEAR. STUDENT PERSONNEL STUDIES, SECTION B. MIRACOST COLL., OCEANSIDE, CALIF.

PUB DATE 66

EDRS PRICE MF-\$0.09 HC-\$1.36 34F.

DESCRIPTORS- STUDENT PERSONNEL WORK, *JUNIOR COLLEGES, *STUDENT CHARACTERISTICS, *COLLEGE FRESHMEN, NATIONAL NORMS, ACADEMIC APTITUDE, STATISTICAL DATA, DEMOGRAPHY, TABLES (DATA), OCEANSIDE

THIS CLASS PROFILE REPORT, WHICH IS A COMPREHENSIVE DESCRIPTION OF THE MIRACOSTA COLLEGE 1965 FRESHMEN, IS INTENDED FOR THE USE OF COLLEGE OFFICIALS CONCERNED WITH ADMISSIONS, PUBLIC INFORMATION PROGRAMS, AND STUDENT PERSONNEL FUNCTIONS. STUDENT ACADEMIC POTENTIALS ARE SHOWN BY THE AMERICAN COLLEGE TEST SCORES AND HIGH SCHOOL GRADES. GOALS AND ASPIRATIONS WERE MEASURED IN TERMS OF MAJOR FIELD CHOICES, TENTATIVE VOCATIONAL CHOICES, PREFERRED VOCATIONAL ROLES, EDUCATIONAL ASPIRATION LEVELS AND COLLEGE GOALS. SURVEYS OF HOUSING EXPECTATIONS, CAMPUS TRANSPORTATION PLANS, PART-TIME WORK EXPECTATIONS, AND EXTRACURRICULAR PLANS WERE MADE TO ASSESS STUDENT PERSONNEL NEEDS. NONACADEMIC ACHIEVEMENTS IN SIX AREAS ARE DESCRIBED. RESPONSES TO QUESTIONS ON MIRACOSTA COLLEGE'S ADVANTAGES OR WHAT INFLUENCED STUDENT CHOICES ARE ORGANIZED UNDER FOUR MAIN HEADINGS--ATMOSPHERE AND REPUTATION, FACILITIES AND PROGRAMS, PERSONAL INFLUENCES, AND OTHER CONSIDERATIONS. A BRIEF STUDENT SOCIOLOGICAL DESCRIPTION WAS BASED UPON THE STUDENT'S TYPE OF HOME COMMUNITY, HIS RESIDENCE STATUS, AND HIS FAMILY FINANCIAL STATUS. THE RESULTS OF THE MIRACOSTA STUDENT PROFILES ARE CONSISTENT WITH NATIONAL NORMS. COMPLETE TABLES AND GRAPHS ARE INCLUDED IN THE REPORT. (FS)

Section B

A COMPREHENSIVE CLASS DESCRIPTION OF 1965-66 MIRACOSTA COLLEGE FRESHMEN BASED ON THE QUANTITATIVE INFORMATION RECEIVED FROM THE RESEARCH SERVICES OF THE AMERICAN COLLEGE TESTING PROGRAM

The following class profile report is a comprehensive description of the MiraCosta College 1965 freshmen students in terms of their academic and nonacademic potentials, their goals and aspirations, their special campus needs such as housing, financial assistance, and part-time work, their report of factors influencing their choice of college and some demographic characteristics. The report compares MiraCosta College entering students with all college-bound students tested by the American College Testing Program (ACT).

The class profile data was provided by the Research Services of the American College Testing Program. The information contained in this report is intended for the use of college officials concerned with admissions, public information programs and student personnel functions and should be helpful to the administration and the instructional staff.

SUMMARY

In attempting to grasp the implications of the entire report it will be helpful to make a list of the tentative interpretations suggested by a study of each table.

Academic Potentials

Tables I through V: Distributions on the American College Test's four subtests (English, mathematics, social science, natural science) and the composite scores for MiraCosta College and for national norms.

It will be observed that the mean differential for MiraCosta College norms and national norms on all areas of the ACT subtests, except math, was less than one point. The range for English, natural science, and social science was from $-.6$ to $-.8$. The math mean differential was -1.3 . Whereas the national norms for all college-bound students are slightly higher in the overall picture, MiraCosta College students' performance was not significantly different from the representative group.

Tables VI and VII: Distribution of the high school grades and the last grade received before the senior year in English, mathematics, social science, and natural science.

MiraCosta College students' lowest mean grade-point average was in math (2.03); on the national norms 2.34 was the mean grade-point average in math. Table VII shows the distribution of the average of four high school grades as reported by students. In the other subjects the differences would not be significant.

Goals and Aspirations

Table VIII gives the distribution of major field choices made by students at the time they wrote the American College Test examination. Tables IX, X, and XI provide similar distributions of tentative vocational choices, preferred vocational roles, educational aspiration levels and college goals. These tables are concerned with student motivation, a relevant educational variable. Some of the observations and questions which arise from comparing enrolled students with all college-bound students include:

1) Tables VIII and IX: Educational Major and Vocational Choice-

Does our college attract a disproportionate number of students with certain types of educational-vocational interests? Predominately social-religious and educational fields (18%); administrative, political and persuasive (13); and the arts and humanities (14%) were chosen by MiraCosta College students. This is in line with our curriculum offerings.

2) Table X: Vocational Role Preferences-

The greatest percentage were interested in teacher or therapist, practitioner, performer or producer of services and administrator or supervisor.

3) Table XI: Educational Plans and Degree Sought-

The inferences that can be drawn of the general level of academic motivation is that 75% intend to complete a baccalaureate degree. 22% of this group also plan one

or two years of graduate or professional study. Only 22% plan on attending college but obtaining less than a baccalaureate degree.

- 4) Table XII: The Most Important Goals in Attending College-
The following distributions were noted: 56% to secure vocational or professional training; 25% to develop their mind and intellectual abilities; 12% indicated earning a higher income as their primary reason for attending college.

Student Personnel Needs

- 5) Table XIII: Housing Expectations and Campus Transportation Plans-

The greatest percentage planned to live at home; 10% planned on rooms or apartments; 11% indicated expectancies of college dormitories and fraternity or sorority houses. 77% expected to bring a car to the campus. This information can have implications as far as campus parking facilities are concerned.

- 6) Table XIV: Part-time Work Expectations-

Approximately 80% of the students plan to work while attending school. 31% expect to work 20 hours or more per week. Only 20% plan to work less than 10 hours per week. As compared to all college-bound students the number of MiraCosta College students anticipating work is 20% greater than national expectations.

- 7) Table XV: Type of Work the Student is Qualified or Willing to Accept-

Gas station attendant represented the highest percentage

with 11% indicating this was their first choice. General clerical and typist followed with 8% each. 33% indicated interest in jobs that were not listed. The jobs listed were unskilled or semi-skilled occupations only.

8) Table XVI: Extracurricular Plans-

Students indicated several choices. 75% of the students plan to participate in departmental clubs, 38% in inter-collegiate athletics, 22% in acting, and 25% in music.

Non-Academic Achievements

Table XVII describes the number of out-of-class accomplishments reported by students in each of six areas: science, art, writing, leadership, music and dramatic arts. A total of eight accomplishments were listed in each area, and the student checked those which he had attained.

Previous research has shown that there is little relationship between academic potential or accomplishment, on the one hand, and the type of out-of-class achievements reviewed on Table XVII on the other. Students whose high school experiences included many out-of-class accomplishments are more likely to exhibit similar "creative" performance in college. Thus this type of information though predictive of socially-valued accomplishments is different from academic aptitude data.

Science - 23% (39) report one high school achievement in the area of science; 7.7% report two high school achievements; 7% report more than two high school achievements; and 61% report no achievements in science.

Art - 17% (28) report one high school achievement in art; 9% report two or three high school achievements;

5% reported between four and eight high school achievements; and 68% (113) report no participation in art.

Writing - 22% (38) claim one achievement in this area; 13% claim two or three achievements; 4% claim between four and eight high school achievements; and 60% (100) claim no achievements in writing.

Leadership - 20% (35) report one high school achievement in leadership; 28% claim two or three achievements; 17% claim between four and six achievements; and 32% (55) report no leadership activities.

Music - 13% (28) report one high school achievement in music; 15% report two or three high school achievements; 13% report between four and six high school achievements; and 55% (94) report no achievements in music.

Dramatic Arts - 22% claim one high school achievement in the area of dramatic arts; 17% claim two or three; 8% claim between four and six high school achievements; and 50% (82) report no achievements in dramatic arts.

College Attractions

Colleges frequently wonder how students decide to apply. Table XVIII summarizes responses which the students gave to questions about who or what influenced their college choices. Responses are organized under four general headings: atmosphere and reputation; facilities and program; personal influences; and other considerations.

The examination of Table XVIII is useful for several purposes. The most important of these includes understanding of the college image and

the importance of selective circumstances. The table gives the percentage who considered each item of major importance, minor importance or of no importance.

Atmosphere and Reputation - 56% indicated good faculty as the major reason for selecting MiraCosta College. 48% indicated high scholastic standing as major importance.

Facilities-Program - 40% mentioned special curriculum as the reason for their choice. Good facilities ranked second, with 34% indicating this as a primary reason for their choice.

Personal Influences - 40% indicated the advice of a high school or college counselor influenced their decision. 40% mentioned parents as being the source of motivation.

Other Considerations - Low cost was the primary motivation of 64%; location was second with 58%; and close to home was indicated by 57%.

Demographic

Tables XIX and XX are provided to describe where students come from, type of home community; residence status; and the estimated financial status of their families. These data are intended to provide a brief but broad sociological description of students.

Sociologists have established a broad range of correlates of these classifications. For example, students from rural areas have quite different attitudes and values from those students from urban areas; children who grow up under conditions of economic affluence have different needs and beliefs than those from economically marginal homes; older, married students have a different outlook than younger, unattached students; and so forth.

Table XIX is concerned with the type of home community and estimated family income.

Home Community: 80% of our students are from communities of less than 50,000.

Estimated Family Income: Of the 238 students who responded to this item, 22% did not know the family income; 10% considered this information confidential; 6% estimated the family income at less than \$5,000; 17% from \$5,000 to \$7,499; 17% from \$7,500 to \$9,999; 16% from \$10,000 to \$14,999; 6% from \$15,000 to \$19,999; 4% above \$20,000.

This distribution closely paralleled the national norms.

Table XX deals with students' ages and marital and dating status.

Students' Ages: 91% (220) of the students taking the ACT were between 17 and 18 years of age. 8% were 19 years of age, and less than 1% were 21 years of age.

Marital and Dating Status: Only one student reported being married. 13% considered this information confidential and 14% (33) are pinned or going steady. Students usually dating the same person represent 20% (49); students usually dating more than one person 40% (96); students who do not date at all 11% (28). These statistics differ from the total day enrollment. Of the total day enrollment, 11% are married.

While it would be hazardous to infer salient attitudes and values of the entering class from Tables XIX and XX these data in combination with those of earlier tables can assist the careful reviewer in establishing more plausible generalizations about MiraCosta College student characteristics

that will aid in planning curriculum, facilities and providing other services that are in line with students' needs. The most notable observation of the entire report is the consistency with which MiraCosta College students' profiles were similar to the national norms. It would appear that we have quite a typical student body.
