THE PURPOSE OF THIS DOCUMENT IS TO PROVIDE A GUIDE TO STUDY FOR VOCATIONAL AGRICULTURE COOPERATIVE EDUCATION STUDENTS PREPARING FOR EMPLOYMENT IN FEED SALES AND SERVICE. THE MATERIAL WAS DESIGNED BY SUBJECT MATTER SPECIALISTS ON THE BASIS OF STATE ADVISORY COMMITTEE RECOMMENDATIONS, TESTED IN OPERATIONAL PROGRAMS, AND REFINED. UNITS IN THE COURSE ARE -- (1) AGRICULTURAL SALESMANSHIP, (2) FEED BUSINESS ORGANIZATION AND FUNCTION, (3) BUSINESS PROCEDURES, (4) SERVICE FUNCTIONS, (5) REGULATIONS, (6) RATION FORMULATION, (7) FEED PREPARATION, AND (8) RELATED AGRICULTURAL SUPPLIES AND SERVICE. THE COURSE IS DESIGNED FOR 175 PERIODS OF 50 MINUTES, FOR MALE AND FEMALE STUDENTS, 16 TO 20 YEARS OF AGE, WHO ARE EMPLOYED PART-TIME IN THE INDUSTRY. SUPPLEMENTAL TEXTBOOKS, BULLETINS, AND COMMERCIAL DATA ARE NECESSARY, AND LISTS ARE PROVIDED IN THE DOCUMENT. THE PRINTED DOCUMENT IS LOOSELEAF. THIS DOCUMENT IS AVAILABLE IN LIMITED NUMBERS FOR \$2.50 EACH FROM AGRICULTURAL EDUCATION TEACHING MATERIALS CENTER, TEXAS AGRICULTURAL AND MECHANICAL UNIVERSITY, COLLEGE STATION, TEXAS 77843. (JM)

VOCATIONAL AGRICULTURE

## ACKNOWLEDGEMENT

This course of study is designed for the vocational agriculture student of Texas who is enrolled in a Cooperative Part-time Training Program in Agriculture.

Much of the material for this course was prepared by J. T. Wiggs, Vocational Agriculture Teacher of Wills Point, Texas, who assisted at the Teaching Materials Center for a four-week period during the summer of 1966.

Members of the staff of the Teaching Materials Center contributed also to the preparation of the course of study.

Several sections of the materials are based upon work produced at the Center for Research and Leadership Development in Vocational and Technical Education at The Ohio State University, Columbus, Ohio.

Assignment Sheet  
for  
AGRICULTURAL SALES AND SERVICE

- UNIT: Agricultural Salesmanship
- TOPIC: Introduction, Agricultural Salesmanship
- OBJECTIVE: To develop an understanding of the importance of salesmanship in agricultural business.
- REFERENCES: Required:
1. Information Sheet, "Agricultural Salesmanship"
- Supplemental:
2. Feed and Farm Supplies, The University of Texas, Division of Extension, Distributive Education Division, Austin, Texas
  3. Salesmanship Fundamentals, Ernest and Davall, 2nd edition, McGraw-Hill Book Co., New York, N. Y.
  4. Let's Analyze and Sell, The University of Texas, Division of Extension, Distributive Education Division, Austin, Texas
- QUESTIONS  
or  
ACTIVITIES:
1. Name and give an example from your experience of three reasons customers fail to buy.
  2. What are the main differences between need and desire for a product?
  3. What six things must the agricultural salesman know to be successful?
  4. Give five principal advantages of agricultural sales as a career.
  5. What is one of the best forms of advertising?
  6. Who benefits from efficient selling?

UNIT: Agricultural Salesmanship  
TOPIC: Introduction, Agricultural Salesmanship  
(Assignment Sheet continued)

7. Good selling does two things connected with human wants.  
What are the two?
8. What five basic decisions are made by a customer before  
purchasing an item?
9. What product should be sold to a customer?
10. Give two things that help to make permanent customers.
11. Give a good short definition of "selling".

Information Sheet  
on  
AGRICULTURAL SALESMANSHIP

Selling is the key function of all business activity. This is as true in agriculture as in other areas. Selling is the act of assisting and persuading individuals or groups to make a buying decision which is to the mutual advantage of both the buyer and the seller.

Selling is really explaining to, persuading, and reminding the public of a particular business concern and of the opportunities and values to be gained from doing business with this concern.

The retailer's function is that of selling goods and services to the ultimate consumer. This is the final step in the distribution of agricultural goods and services.

Efficient salesman realize that customers are lost because of:

1. Poor service rendered
2. Discourteous treatment received
3. Indifferent attitude exhibited on the part of the salesman

The salesman must know the psychology of selling if he is to become a successful salesman. In other words, he knows that a customer buys primarily because of need and desire. These are influenced by reason, by emotion, or by a combination of these. A person may need something, but does not buy until he desires it, i. e., he feels the need.

In summary, to be successful, the agricultural salesman must know the selling process, the merchandise itself, and the firm, as well as understand himself, his relations to the customer, and the customer.

Here is an opportunity for a salesman to (a) deal directly with the public, (b) help other people make decisions, (c) face something new everyday, (d) know that his worth is quickly recognized in terms of advancement, and (e) enjoy the prestige of big business. This big business is made up of over 1,700,000 retail stores where Americans spend 70 percent of the family income each year.

Agricultural Salesmanship  
(Information Sheet continued)

Good selling does not happen incidentally, but is the result of sound training.

Successful selling produces a satisfied customer who in turn becomes the best form of advertising.

The good salesman must realize that everyone benefits from efficient selling. High sales volume not only insures the salesman's position, but also lowers the price of products or services to the customer.

Good selling awakens and satisfies human wants. Selling is a challenge and every customer is an opportunity for a salesman to get positive reaction from the customer on five basic buying decisions, namely; the need, the thing, the source, the price, and the time. Selling is helping the customer to buy intelligently.

The customer will gain the most personal satisfaction from his purchase if the salesman makes sure that the product will best fit the customer's need. When the salesman demonstrates courtesy and a sincere interest to be of service, the result is a permanent customer.

AGRICULTURAL SALES AND SERVICE

UNIT: Agricultural Salesmanship

TOPIC: Meeting the Customer

OBJECTIVE: To develop an understanding of the importance and techniques in making a good impression with customers.

REFERENCES: Required:

1. Information Sheet, "Meeting the Customer"

Supplemental:

2. Let's Analyze and Sell, The University of Texas, Division of Extension, Distributive Education, Division, Austin, Texas
3. Feed and Farm Supplies, The University of Texas, Division of Extension, Distributive Education Division, Austin, Texas

QUESTIONS  
or

1. Why is the first contact with a customer very important?
2. Why should a salesman be well-groomed?
3. Why should a salesman like his work?
4. Give three "earmarks" of good salesmanship.
5. Give a short description of the proper way to treat a customer.
6. Select one of your classmates that you know well and fill out the "information needed about a customer" given in part 1-a of the information sheet you are using.
7. How could you secure the information you gave in question 6 if you did not know the person well, and if he were an adult?

UNIT Agricultural Salesmanship  
TOPIC Meeting the Customer  
(Assignment Sheet continued)

8. Pick a store (not the one in which you work) in which you purchased something recently and give your impressions about these characteristics of the store:
  - a. Was the store neat and attractive? What made it appear that way?
  - b. Was the store well-lighted?
  - c. Did the equipment (not the merchandise) look good to you? Why or why not?
  - d. Was the merchandise arranged in a manner you understood, or was it confusing to you? Why?
  - e. Did the person who "waited upon you" have a pleasing appearance? Briefly describe him as he appeared that day.
9. Pick an item from the store in which you work or plan to work and give from memory these characteristics of the product:
  - a. Why is it designed as it is?
  - b. The trade name
  - c. How it is constructed or manufactured
  - d. Its special features
  - e. In what other forms it is available
  - f. What help the store can give if something "goes wrong" with the product
10. Now pick an item your family purchased recently from another store and give the same information as you gave in No. 9 from memory about it.
11. List the preparation a salesman needs to make before he is ready to make a sale.
12. What may cause a salesman to fail to be prompt in greeting a customer?
13. How does the salesman find out about a customer's problem?
14. Give three examples of proper methods of greeting a customer.
15. Give the elements of a good salutation to a customer.
16. Name 11 physical and physiological factors that cause a customer to want to buy a product.
17. Give eight good attitudes for salesmen.

Information Sheet  
on  
MEETING THE CUSTOMER

The impression of the agricultural business that the customer carries away often results from his first contact with the salesman. Appearance and actions play an important part in forming this impression.

A well-groomed salesman attracts customers and inspires their confidence. Undivided attention on the job is essential to good salesmanship.

A good approach presupposes a proper attitude toward the job. Love for one's work is expressed in the enthusiasm with which it is carried out. Enthusiasm is shown through words, actions, and expression.

Salesmanship is demonstrated through promptness, alertness, and interest in the customer and his problems.

Treat the customer like a guest. This means that good manners and courtesy are practiced at all times; that the house is in order, neat and clean; that the merchandise is conveniently located; and that the salesman is trained in the fundamentals of selling to maximize the opportunity of being of service to customers.

Points to be considered when meeting the customer:

1. The preapproach Preparation

a. Information needed about the customer

- (1) Name - Address
- (2) Personal characteristics
- (3) Mental make-up
- (4) Hobbies and interests
- (5) Common interests
- (6) Buying habits or policies

b. Sources of this information

- (1) Participation in community activities and events
- (2) Chamber of Commerce information
- (3) Comments made by other members of civic clubs

Meeting the Customer  
Information Sheet (continued)

- (4) A personal notebook on customers
- (5) Past sale records, credit department records
- (6) Interview with people in the community
- (7) Local newspaper

c. Check of facilities and surroundings

- (1) General appearance of the store
- (2) Lighting
- (3) Equipment
- (4) Merchandise arrangement
- (5) Personnel

d. Knowledge of benefits the customer will receive from merchandise sold

- (1) Design or appearance
- (2) Quality of the source - trade name
- (3) Composition and construction
- (4) Special features
- (5) Assortment of sizes, colors, and styles available
- (6) Service available

e. Preparation by the salesman

- (1) Neatness of appearance
- (2) Preparation of an appealing display arrangement
- (3) Knowledge of contents of the merchandise in stock
- (4) Knowledge of the contents of newspaper advertising being circulated
- (5) Knowledge of names, background, and interests of customers
- (6) Knowledge of the competitors product
- (7) Preparation of a few selling sentences
- (8) Preparation of a record of common customer objections and development of methods of meeting them

2. Timing the Approach

- a. Importance of the impression created by the salesman's appearance and actions
- b. Suggestions for:
  - (1) Promptness - clues for failure in being prompt:

**Meeting the Customer**  
**(Information Sheet continued)**

- (a) Involved group conversations of salesmen
  - (b) Stock duties
  - (c) Timidity in approaching customers
  - (d) Indifference to the needs of the customers
- (2) Alertness - based on accurate and careful observation;  
 look for clues on:
- (a) How and when to greet the customer
  - (b) When to present the merchandise
  - (c) How to talk about merchandise
- (3) Interest in customer's problem
- (a) Take all the time necessary to understand his problem.
  - (b) Probe to determine if problem is what customer first says that it is.
  - (c) Determine the procedure to be followed to assist the customer with his problem.

**3. The Proper Approach - Greeting the Customer**

**a. Type of salutations**

- (1) Conventional
- (2) Question
- (3) Stating a fact about the merchandise

**b. Elements of a salutation**

- (1) Courteous
- (2) Short
- (3) Requires no decision
- (4) Affirmative
- (5) Emphasizes the desire to serve

**c. Tone of voice - pleasant, enthusiastic, distinct, articulate, ordinary**

**d. Facial expressions**

- (1) A pleasant smile
- (2) Cheerful expression

**Meeting the Customer**  
(Information Sheet continued)

Different physical and psychological factors, operating alone or together, motivate a customer to buy a product. Among them are comfort, pleasure, appetite, possession, fear, devotion, curiosity, ornamentation, imitation, construction, and loyalty.

Developing the proper attitudes necessary for success in meeting a customer is important if the student is to develop effective sales abilities. Among them are:

1. Developing professional feeling toward selling
2. Constant courtesy
3. Enthusiasm for selling
4. Interest in customer and his problems
5. Willingness to develop self-confidence
6. Developing sincere attitude of service
7. Developing integrity
8. Appreciating proper psychology such as gaining the customer's attention and interest, creating a desire, and ending with de-action on the part of the customer

on  
PRESENTING SUPPLIES AND SERVICES TO CUSTOMERS

Successful selling requires a careful presentation by the seller. A salesman must recognize the importance of each of the psychological steps in a sale. He must gain the attention, develop interest, kindle desire, and induce action on the part of the customer.

Attracting attention is one thing, developing interest is quite another thing. Attention is more or less involuntary. Almost anything can attract attention; interest is the result of voluntary reaction on the part of the customer. Interest comes only when attention is prolonged voluntarily and is accomplished by concentration.

Next, one must combine the merits of the article with the needs or wants of the customer to kindle desire. Then, by demonstrating a complete understanding of the interest, needs, desires, and motivating factors that cause a customer to buy, the salesman will be able to make a successful sale. Sales are made by showing the farmer how to increase yields, make more profit, or reduce the labor required, etc.

The attention of customers to a supply or service may be secured in many ways.

- Reading an advertisement about a beef concentrate
- Seeing a new herbicide on a TV commercial
- Talking to a neighbor about his new 5-plow tractor
- Mailing a circular on early fertilizer purchase discount
- Meeting a new petroleum delivery truck on the road
- Hearing from a friend about the good service on baler repairs
- Reading in the newspaper about a new bulb shipment received at the garden center
- Viewing an attractive display of seed at the supply center

Developing interest in a product can be initiated by the customer, the salesman, or serviceman.

Customers can move from the attention, interest, and desire steps very rapidly at times with little or no encouragement. Example - the customer sees a new field sprayer just the size and kind for which he has a preference--the desire is developed. Often, however, the customer's interest in a product needs to be kindled. This can be done by:

**Presenting Supplies and Services to Customers**  
(Information Sheet continued)

Talking to him about the new features on this planter  
Inviting him to a field day where the effectiveness of newly developed herbicides will be shown  
Showing him the results of this product in test trials  
Demonstrating how simple it is to mount this new corn picker  
Pointing out to the customer the number of people in the community who are already using this feed, lawn seed, or grease

Desire for a product may be obtained by relating it to a need of the customer,

Explain how this feed will increase net income by improving an animal's rate of gain.

Show him, with proof from variety trials, how the new oat variety will stand, thereby reducing all those combining problems.

Show him that the chemical weed spray will reduce cultivation, allowing time to get the hay harvested, go fishing, etc.

Sell the merits of the tractor seat, not its cost.

Provide appointments for the customer to try the product on a trial basis.

To be able to present items effectively, you will need to:

Know the features of the item.

Be able to answer all questions about the item.

Demonstrate its use, operation, value, and advantages

Information Sheet  
on  
OVERCOMING CUSTOMER RESISTANCE

It is nature<sup>1</sup> for people to have sales resistance. Most of them did not come by the money in their possession easily. It is perfectly natural for people to want to get all they can for the money spent.

Each sale has two sides. The customer must sacrifice something in order to get something else. Since one cannot have everything, each sale means a choice between one product and another product or one product and another form of pleasure.

The customer must decide which of the choices will give the most satisfaction or pleasure.

It is the salesman's job to convince the customer that his product or service will provide this pleasure, satisfaction, or need. If this cannot honestly be done, perhaps he should not make the sale at all. Anything else is high pressure selling that is unethical and cannot be classified as salesmanship. It will invariably lead to ill will and dissatisfaction.

There are several reasons why customers are resistant to purchasing. The first objection is rarely the actual objection. Identify the real reason for such resistance and try to explain away the objection. To do this you are going to need to be well informed on the supply or service. Types of objections are:

1. Need - Objections to need are overcome by stressing the usefulness and benefits of the product.
2. Quality - Objections to quality are overcome by:
  - a. Showing a better quality
  - b. Pointing out a specific feature
3. Source - Objections to the source are met by:
  - a. Providing names and experiences of satisfied customers
  - b. Providing information about the company or by reference to national advertising

Overcoming Customer Resistance  
 Information Sheet continued)

- c. Courteously straightening out misunderstandings
  - d. Asking for a fair trial of this new firm or by offering something another firm does not carry
  - e. Others correcting the shortcomings of the salesman if he is at fault
4. Price - Objections to price are overcome by:
- a. Revealing hidden values - building up values
  - b. Emphasizing the quality or usefulness
  - c. Providing an article that is not as expensive and doesn't have as many selling points
  - d. Knowing competitors product so that any question or different values can be explained
5. Time - Objections to time are overcome by:
- a. Making a future appointment
  - b. Inviting the customer to look at additional merchandise
  - c. Continuing to show a positive interest in the customer whether the salesman is busy or not
  - d. Trying to handle objections promptly as they arise
  - e. Not trying to close a sale until all bonafide objections have been satisfied. Make feelers during the sales presentation to preclude objections to a reasonable closing of the sale because of the time.
6. Thing - Objections to the thing are overcome by:
- a. Showing more suitable goods
  - b. Admitting the validity of objection but showing another feature to offset the objection

Overcoming Customer Resistance  
(Information Sheet continued)

- c. Admitting that the objection is reasonable but showing that it does not really apply
- d. Changing the objection into a selling point in favor of the article
- e. Avoiding:

Generalizations which mean nothing  
Contradiction of a customer's statement  
Display of a negative or discouraging attitude

Again, do not pressure customers to purchase; they are not likely to return if pressured.

Information Sheet  
on  
AGRICULTURAL SALES AND SERVICE

Obviously, closing the sale is the most important of all the steps in the selling process. Everything that has been done so far comes to naught, if the customer leaves without making a purchase. Closing starts at the beginning of the sales presentation and "trial" closes are appropriate as it proceeds.

Customers resent being hurried into making a purchase. The salesman must take an active part in inducing a favorable action on the part of the customer, but his attitude must be one of helping the customer in making a wise decision.

Sales are lost because the salesman fails to tailor the sales presentation to the individual needs and requirements of the customer.

A salesman is performing a useful service by offering suggestions to customers who are not aware of their needs or to customers who rely upon displays to remind them of what they came to purchase.

Anybody can sell a customer something he wants. It takes a salesman to sell the customer needed items of which he was unaware.

Closing the sale will be more or less automatic if the need for the article has been definitely established. One of the salesman's functions is to help the customer decide by making "trial" closures.

Don't trip on the last step. The time to close the sale is just after the customer has decided to buy.

Indications that the customer is making up his mind occur when the customer asks the salesman to repeat the advantages of each item and when he wants unwanted goods removed. This is when the salesman should repeat the advantages of the item in which the greatest interest was shown by the potential customer.

The decision to buy occurs after the following conditions have been met:

1. The customer has exhibited attention, interest, and desire in the product.

**Agricultural Sales and Service**  
**(Information Sheet continued)**

2. A relationship between need and the merchandise has been established..
3. All important objections have been overcome.
4. The price is low in comparison with value.
5. The product meets the customer's approval.
6. The customer has the power to make the purchase.

The above decision is reached by taking steps during the presentation to make buying "action" easy. Such steps include leading the customer to make a number of small favorable decisions himself, making these decisions progressively more forceful, seeking agreement more frequently as the presentation progresses, and narrowing the selection. This is done by concentrating upon items in which the customer is interested, by removing merchandise in which the customer is not interested, by repeating demonstrations in more detail, and by soliciting the opinion of others. Always ask for the order. Use the "choice" method in beginning the closing phase, i. e., 2 or 3 dozen.

Failure to close the sale may be due to:

1. Assuming that the customer is not going to buy
2. Hurrying the customer
3. Failing to help the customer decide
4. Stumbling over sales obstacles
5. Stressing the wrong selling points
6. Trying to force action
7. Being discourteous at any point in the process

When engaged in suggestion selling, the salesman must:

1. Make definite suggestions to the potential customer.
2. Give an acceptable justification for the suggestion made.
3. Demonstrate the merchandise thoroughly and unhurriedly.

**Agricultural Sales and Service**  
(Information Sheet continued)

4. Not overwhelming the customer with more facts, decisions, etc., then he can face comfortably

Sales are often increased by displaying related merchandise, handling larger quantities, comparing with higher priced merchandise, introducing new merchandise, developing "special" sales, demonstrating new uses for merchandise, and specializing in merchandise for special occasions.

When recording the sale, the salesman, in preparing the sales check, should:

1. Write legibly.
2. Be accurate with items, amounts, and price.
3. List the complete name and address if needed for files or for delivery.
4. Write down any special directions needed to help the customer.

When operating a cash register, make change accurately. Never put a bill away until the customer is satisfied that he has received the correct change. Use the right compartment for paper money and change. Also, learn to count out change properly.

Just because the register bangs shut does not mean that the sale is completed. A proper, courteous farewell often means repeat visits by the customer.

Give the customer a friendly farewell whether or not he makes a purchase and invite him back soon.

Assignment Sheet  
for  
AGRICULTURAL SALES AND SERVICE

- UNIT:** Agricultural Salesmanship
- TOPIC:** Evaluating Salesmen
- OBJECTIVE:** To develop an understanding of the methods employed in evaluating sales personnel and to encourage self-evaluation.
- REFERENCES:** Required:  
  
Information Sheet, 920-I-7
- QUESTIONS  
or  
ACTIVITIES:** In the information sheet accompanying this topic are four check sheets.
- Your assignment is to fill out each check sheet, making two marks in each item.
- The first mark, a small "x", is your evaluation of a salesman from whom you recently made a purchase. If you wish, use a different salesman for each sheet.
- The second mark, a small "o", is your own performance in the place in which you work. Use any customer contact during the past two weeks, and use a different one for each sheet, if you wish, but make an honest appraisal of your performance.

Check Sheet -- Customer Approach

	Did so effectively	Did so partially	Did not	Could have
<b>1. APPROACHED CUSTOMER PROMPTLY</b>				
a. Was on the lookout for customers				
b. Stopped what he was doing				
c. Approached the customer mentally and physically				
<b>2. WELCOMED THE CUSTOMER</b>				
a. Smiled				
b. Used appropriate approach				
c. Treated the customer as a guest				
<b>3. HELPED TO START CONVERSATION</b>				
a. Adapted himself to situation				
b. Made comment about merchandise				
c. Anticipated customer's interest

**AGRICULTURAL SALES AND SERVICE**

- UNIT:** Business Procedures
- TOPIC:** Importance of Accurate Records
- OBJECTIVE:** To develop an understanding of the necessity for accurate business records.
- REFERENCES:** Required:
1. Information Sheet , 920-III-1
- Supplemental:
2. Merchandising Products Used in the Farm Business,  
Ohio State University, Columbus, Ohio 43210
- QUESTIONS  
or  
ACTIVITIES:**
1. a. Give five reasons why management must have records.  
b. Which of the five is most important? Why?
  2. What does an "operating statement" show?
  3. How does a "balance sheet" differ from an "operating statement"?
  4. Where does management get the "figure" for the operating statement and balance sheet?
  5. Why are cash registers balanced daily?
  6. Why are "merchandise purchases" not the total cost of the merchandise sold?
  7. What are two good reasons for having periodic records of "stocks and inventories"?
  8. If the firm in the "statement of operations" had received \$1000 less during this year for storage and handling (with all entries being the same), what would have been the gross margin?

UNIT: Business Procedures  
TOPIC: Importance of Accurate Records  
(Assignment Sheet continued)

9. Where, in the "statement of operations" do you think these items are included?
  - a. Wages paid a Co-Op Vocational Agriculture student?
  - b. The electricity bills?
  - c. A radio "commercial" for the firm?
  - d. The sacks for small items of merchandise?
  - e. The decrease in value of a delivery pick-up?
10. In the "sample balance sheet" why is there no entry under "accumulated depreciation" for land?
11. If on December 30, 1965, this firm had paid an additional \$5000 of its "accounts payable", how would these four numbers have been changed?
  - a. Cash on hand and in bank?
  - b. Total assets?
  - c. Accounts payable?
  - d. Total liabilities?

Information Sheet  
on  
**IMPORTANCE OF ACCURATE RECORDS**

Most people are familiar with the sales ticket and some of the other ordinary papers used in conducting business. These papers and procedures are so important in helping to make an operation successful that they need considerable attention.

To understand the importance of these items, an overview of the entire records of a business is necessary. Management of a business, to be successful, needs records of the business as a whole, and of each department, in order to:

1. Know the financial picture of the business at any given time.
2. Give proper information to board of directors, stockholders, and others involved.
3. Satisfy legal requirements.
4. Plan desirable changes in management and procedures.
5. Prepare state and federal tax returns.

One record needed by management is an "operating statement." It is sometimes called a "statement of operations" or a "profit and loss statement." These are prepared either annually, biennially, quarterly, or monthly, whichever is desired. The operating statement summarizes the receipts and expenses for a given period of time and shows the profit or loss for that period. Many businesses have this statement broken down by departments in order to ascertain the profit or loss of each department.

The other standard overall record used by businesses is the "balance sheet". The balance shows the financial condition of the business at a given time, but generally on the last day of the period covered by the operating statement. The balance sheet lists the assets, liabilities, and net worth of the business. The liabilities and net worth show the methods of obtaining capital for the business. The sum of the liabilities and net worth must "balance" with the assets of the business at any given time.

The balance sheet and the operating statement make up the financial report for a business. (Note attached sample forms.)

Importance of Accurate Records  
(Information Sheet continued)

The daily, weekly and monthly records all help contribute to the final make-up of the "balance sheet" and "operating statement".

A record of "cash sales" for the period desired (day, week, month, or quarter) must be secured. In addition, the cash register must be balanced daily to be sure that all cash is accounted for and that all records are correct.

"Charge sales" must be correctly made and entered in appropriate ledgers, according to the policies of the particular business.

Records must be made of all "merchandise purchases," including the cost of transportation and other incidental expenses.

Periodic records of "stocks and inventories" must be made, both for knowing the business' financial condition, and also for determining stock needs and sales.

In addition to those items directly concerned with sales, the costs of payroll, property expense taxes, supplies, services, advertising, interest, depreciation, losses and legal costs must be paid before any profit is returned to the business.

Assignment Sheet  
for  
AGRICULTURAL SALES AND SERVICE

UNIT: Business Procedures

TOPIC: Sales Tickets

OBJECTIVE: To develop an understanding of the necessity for completeness and accuracy in sales tickets and skill in their completion.

REFERENCES: Required:

Information Sheet, 920-III-2

QUESTIONS  
or  
ACTIVITIES:

1. Secure 10 sales tickets of the type or types used in the place of business in which you are employed.

Attach the first to a sheet of paper, and letter each part of the ticket in a manner similar to the sample in Information Sheet, 920-III-2. Letter the parts in the order in which you would fill out the ticket. Then, on another sheet of paper, give the reason or the use for each part represented by a letter.

2. In making change, the salesman uses the \_\_\_\_\_ denomination of bills and coins possible.
3. A numerical file accounts for \_\_\_\_\_ sales tickets.
4. A record of the customers' business is provided by sales tickets in the \_\_\_\_\_ file.
5. Completely make out 9 sales tickets with at least 5 items each without repeating the same item,

Texas Education Agency  
Texas A&M University  
(Cooperating)

Information Sheet  
on  
**SALES TICKETS**

The heart of the accounting system is the billing of merchandise to customers. This is necessary to provide accurate records of transactions. Many businesses have triplicate sales tickets, one for the customer and two for the office files. Sales tickets need to be numbered consecutively in advance for filing and checking purposes and to avoid loss of merchandise through carelessness. Sales tickets will provide the company with the following.

1. Information necessary to make an analysis of the day's business.
  - a. Amount of cash taken in. This also serves as a check on the cash that should be in the cash register at the close of the day's business.
  - b. The amount of merchandise sold
  - c. The amount of sales tax collected
2. Information needed for the accounts receivable ledger for the customers who charged their purchases
3. A record of each transaction for future reference. After the information contained on the sales ticket has been recorded in the proper journals, the two copies should be filed as follows:
  - a. One in a numerical file. Since all sales tickets are accounted for in this file, a sales person cannot accept cash from a customer, prepare a sales ticket, give the customer his copy, destroy the office copies and keep the money.
  - b. One in a client file. This will serve as a record of the customers' business.

Many factors are important in the preparation of the sales ticket:

1. In spite of the importance of sales tickets, many mistakes are made in their use. Some common mistakes are as follows:

**Sales Tickets**  
 (Information Sheet continued)

(Use examples to show how important common mistakes are to the net profit of a business, e.g. how much more is needed in sales to make up for an order for a ton of feed not filled.)

- a. The ticket cannot be read
  - b. Some merchandise is not billed when sold
  - c. Price list and discount policies are not followed
  - d. Mistakes in arithmetic
  - e. Employees do not keep all of their sales tickets
2. Although each business will have its own procedure for completing sales tickets the following shows one procedure to follow in making out a sales ticket correctly: (A sample sales ticket is included.)
- a. Enter the correct date
  - b. Write the customer's correct name and address. If a partnership, it should be noted. The name and address becomes absolutely necessary if the purchase is charged.
  - c. Give a complete description of each article sold. Quantity and unit should be thought of as one item (for example, 100 lbs. of fertilizer or 10 gals. of insecticide).  
 The description should clearly designate the type of merchandise being sold, and not merely be a commodity classification. For example, 100# calf manna, not 100# feed. (On sales tickets, pounds are usually indicated by #.) This is necessary for checking price and for inventory controls. Show the price per unit for all merchandise. (Some sales tickets will have a column heading marked "price".) Bill all merchandise at the retail price. If the customer is entitled to a discount because of volume, damage, etc., this amount is deducted from the retail price. Extensions must be mathematically accurate and legibly written.
  - d. Make a sub total of the extension.

**Sales Tickets**  
(Information Sheet continued)

- e. Calculate the sales tax on all taxable items and enter under the first total. (Sales tax policies will vary according to state laws.)
- f. Next, calculate any delivery, mixing, grinding or shelling charges, and enter under the sales tax calculations
- g. Add the extension column to obtain the grand total of charges for the sale.
- h. Check the block on the ticket to indicate the method of payment (cash, check, charge, returned, account).
- i. If settlement is to be made by a check larger than the ticket total, it is necessary to note both the amount of the check on the face of the sales ticket, and the change to be given. A similar calculation is recommended when a large bill is given in payment.
- j. Get the signature of the person receiving the merchandise when the settlement is other than cash.
- k. When a customer pays on account, make out a sales ticket and mark the items for which he is paying (for example, fertilizer, feed, balance on note, etc.).
- l. In all cases where an employee ruins a ticket for any reason, the word "void" should be written across the front of the ticket, and the original placed with the other tickets. Sales tickets must be numbered consecutively. Each ticket must be accounted for at the end of the day's business.
- m. The salesman initials the ticket in the appropriate block.

Properly prepared sales tickets giving full information about the transaction provide the manager with the information he needs in conducting the business. Sales tickets may prevent many misunderstandings with customers when a transaction is questioned.

Sales Tickets

**Sales Tickets**  
(Information Sheet continued)

Making change following a purchase can be done accurately by using the following procedure:

1. Count from the cost of the purchase to the total amount of payment. For example, if the cost is \$2.98 and a \$5 bill is tendered, count "\$2.99, \$3.00, \$4.00, \$5.00."
2. Use the largest denomination of coins and bills possible in making change.
3. Positively identify the amount (e. g. \$5, \$10, etc.) of a bill or check and lay it on top of the cash drawer until after the change is given in order to avoid mistakes.
4. If in doubt as to the correct change, or if payment is by check, the computation should be made with pencil and paper.
5. Use a flannel board and proportionately enlarged coins and bills to bring the class into a discussion and demonstration on the change-making process.

Information Sheet  
on  
CREDIT

The capital required to finance modern farming operations is so great that most farmers must either borrow money to pay for their purchases, or charge their purchases, making use of credit plans made available by businesses.

Credit is a very useful tool in conducting business. A vast majority of business done anywhere in the world proceeds with little transfer of actual cash. The retailer buys from the wholesaler or the distributor on credit just as the farmer buys on credit from the farm supply store.

Credit may be extended for only a short time (30 days or less, the same as cash) in which case the business establishment may do the financing. Credit may be extended for several months or longer, in which case a credit institution such as a bank or loan association will usually finance the purchase. Large amounts are secured by credit instruments such as commodity notes and mortgages.

Each business will establish credit policies. These policies will state the conditions under which credit will be extended, the maximum credit to be allowed, and the payment plans and penalties.

Assignment Sheet  
for  
AGRICULTURAL SALES AND SERVICE

UNIT: Business Procedures

TOPIC: Determining Selling Price

OBJECTIVE: To develop an understanding of the factors that enter into the determination of the selling price of merchandise.

REFERENCE: Required:  
Information Sheet, 920-III-4

QUESTIONS  
or  
ACTIVITIES:

1. What must the selling price of an article include besides the original cost?
2. Which 5 of the "overhead" cost items listed in the information sheet will remain almost the same from year to year?
3. Which three of the overhead items will fluctuate most widely?
4. When overhead costs vary little or not at all, what are they called?
5. Why is an increase in volume of business usually advantageous to the firm?
6. What is "markup"?
7. A merchant buys an item delivered to his store for \$10.00. He prices it at \$13.00.
  - a. What is the markup?
  - b. What is the percent markup?
8. What is gross margin? How does it differ from markup?
9. An item costing \$10.00 is marked up to \$13.00 and sold. What is the gross margin?

UNIT: Business Procedures  
TOPIC: Determining Selling Price  
(Assignment Sheet continued)

10. Give a "rule of thumb" for determining a necessary gross margin.
11. What are feed "turn over" goals higher than hardware?

**Texas Education Agency  
Texas A&M University  
Cooperating**

**Information Sheet  
on  
DETERMINING SELLING PRICE**

The original cost of merchandise is the actual purchase price, including the cost of transportation. The selling price must include the original cost plus merchandising costs, overhead costs, and a reasonable profit.

The overhead costs may reflect some, or all, of the following conditions:

1. Merchandise may become obsolete before sold.
2. Merchandise becomes shop-worn.
3. Some merchandise will be overstocked and will not sell.
4. The price of merchandise may drop before the stock is sold.
5. Interest on investment in inventory items.
6. Insurance on inventory items.
7. The cost of warehousing the merchandise
8. Delivery costs (to the customer)
9. Taxes on the merchandise carried in inventory
10. Theft of merchandise
11. Shrinkage of merchandise
12. Damage to merchandise in stock
13. Wages and salaries
14. Office and accounting expenses

Overhead costs may be grouped into areas of fixed costs (insurance, interest, taxes, etc.) which will be constant per \$1,000 of inventory, and variable costs (raw materials, product containers, packaging materials, etc.) which change according to volume of business done, and the expenses of doing this business.

### Determining Selling Price (Information Sheet continued)

Some companies may find the annual cost of keeping items in stock as low as 10% of value while other companies may need an increase in cost of 15% or more in order to pay the expense of just keeping stock on hand.

In addition to overhead costs, some companies may provide free services to their customers. Services like mixing or spreading fertilizers will also increase the costs of doing business.

A graph may help explain the need for increasing the volume of business in order to cover both fixed and variable expenses and make a profit;

#### BREAK EVEN CHART

**Determining Selling Price**  
(Information Sheet continued)

The merchant must determine a selling price for his products that is high enough to cover the cost of the item, overhead expenses, service costs, and allow a reasonable profit.

There are two terms used to describe the difference between the merchant's cost of an item and his selling price.

1. "Markup" - The amount added to the cost to make the selling price. As a percentage, it is the relation of the amount of markup to the cost. For example,

$$\begin{array}{r} \text{Cost} \quad \text{Markup} \quad \text{Selling Price} \\ 20 \quad + \quad 5 \quad = \quad \$25 \\ \text{The markup is 25\% of the cost.} \end{array}$$

**Example:**

Merchant purchases vegetable dust	\$1.00
Merchant prices vegetable dust at	1.25
Cash markup. . . . .	.25
Percent markup. . . . .	

$$\frac{\text{Cash markup}}{\text{Purchase price}} = \frac{.25}{1.25} = 25\%$$

2. "Gross margin" - Is determined by dividing the markup by the selling price.

**Example:**

Merchant purchases vegetable dust	
from wholesaler for. . . . .	\$1.00
Merchant prices vegetable dust at	1.25
Cash markup. . . . .	.25
Percent gross margin	

$$\frac{\text{Cash markup}}{\text{Selling price}} = \frac{.25}{1.25} = 20\%$$

Markup and gross margin are often confused. They are always the same in dollars and cents, but never the same in percentage because markup is figured on cost and margin on selling price.

Examples of the gross margins and markups used by one farm supply business to cover their expenses and to secure a reasonable profit is as follows:

**Determining Selling Price**  
(Information Sheet continued)

	<u>Percent Gross Margin</u>	<u>Percent Markup</u>
Fertilizer	12.0 %	13.6%
Grain	6.0 %	6.4%
Hardware	33.3 %	50.0%
Commercial Feed	18.0%	22.0%

A rule of thumb that may be used to determine gross margin is as follows: In order to make a large enough profit to remain in business, the number of times an item turns over in stock during the year times the gross margin should equal 100.

**Example:** Refer to the vegetable dust used in the illustration for markup and gross margin.

Vegetable dust turnover 5 times in stock during the year.

$$\begin{aligned}
 5 \times X \text{ (gross margin)} &= 100 \\
 5X &= 100 \\
 X &= 20\% \text{ gross margin}
 \end{aligned}$$

The suggested turnover goals for one business are as follows:

Feed . . . . 15	Seed . . . . . 8-10	Farm equipment . . . . 3
Fence . . . . 4	Oil & grease . . . . 4	Building material . . . 4
Paint . . . . 4	Tires & tubes . . . . 4	Electrical merchan-
Hardware . . 3	Miscellaneous	dise . . . . . 4
Machinery . 4	merchandise . . . . 4	Farm supplies, gen-
		eral . . . . . 4

Information Sheet  
on  
**BUSINESS RECORDS, ORDERING AND RECEIVING MERCHANDISE**

In purchasing and receiving merchandise in a business, the following are typical procedures and business forms used.

1. A decision is made on the type, amount, and cost of merchandise to be ordered, and the company from which it is to be ordered.
2. A purchase order is completed.
3. Company policy usually assigns the responsibility in ordering merchandise to specific employees. Duplicate records or purchase orders are kept in order to check them against the materials, the invoice, and bill of lading when merchandise is received. Note specifically on the sample purchase order the complete items, including the company's order number.
4. When the shipment is received, a "receiving record" or "receiving report" are typical forms used to record the receipt of merchandise. Other similar records may be used.
5. The receiving record must be a complete record of the merchandise received, including its condition when received. The primary use of a receiving record is to check incoming merchandise against invoices and bills of lading.
6. Commercial carriers, such as railroads and trucking companies, will charge for hauling the products from the originating point to the delivery point. Prior to placing the order, an agreement should be made on who pays the delivery charges, the shipper or the receiver. Freight may be prepaid or sent C. O. D.
7. Forms used by the carriers are called "bills of lading" or "shipping records". An employee should know how to receive merchandise. He should understand the forms used.
8. The final business form to be considered in the ordering and receipt of merchandise is the "invoice". An invoice is a bill or statement due a company for merchandise delivered. Since

**Business Records: Ordering and Receiving Merchandise  
Information Sheet continued)**

the payment for goods is made from the invoice, it must be accurate. The invoice should be checked against all previous papers--the purchase order, the receiving record, and the bill of lading. All businesses have an established policy as to the checking of invoices for payment. The discount terms must appear on the invoice and be used in computing the amount to be paid.

Information Sheet  
on  
INVENTORIES

An inventory is a correct count of a concern's merchandise, including its value. An inventory is necessary for several reasons:

1. An accurate account of value is necessary for year-end or periodic analysis of the business.
2. Periodic merchandise counts enable the business to determine the freshness of its stocks, and to decide whether some items are obsolete.
3. Inventory counts will show the extent to which items are moving. They will show whether items are overstocked or understocked.
4. Physical count inventories are necessary to determine possible losses. (These are different than book inventories.)

Businesses will use inventories in additional ways. "Inventory control" is a system of keeping on hand adequate amounts of any given merchandise. A business needs to be sure that the customers' needs are met, but does not want to have surplus, outdated merchandise on hand which frequently may be in poor condition.

There are several types of inventories:

1. Perpetual inventories

Many businesses have some or all of their stock listed so that they know at any given time the number of items of merchandise on hand. This is done by systematically adding the purchases to the inventory, and by subtracting the sales taken from the daily sales slips or totals which are then subtracted from these inventories. This results in maintaining a "book" inventory level as purchases and sales are made. To be sure it is correct, periodic physical counts must be made and checked against the perpetual inventory.

Inventories  
(Information Sheet continued)

2. Physical inventory

The physical inventory is an actual count of all merchandise on hand at a given time. This must be done at the end of the fiscal year, and is of considerable value at other times during the year. Procedures in making the count will vary but will include many or all of the following procedures:

- a. Arrange stock in an orderly fashion.
- b. Check stock for condition; count only that which is salable.
- c. Count and record every item, listing the cost price unless the particular business prefers that the selling price be used.
- d. Keep inventories separate for different departments and types of goods.
- e. Compute totals.

Businesses will have special forms used for taking the inventory. These forms may include:

1. Location of merchandise
2. Department to which merchandise is charged
3. Names of persons taking the inventory
4. Information concerning the age and/or quality of merchandise

Information Sheet  
on  
**RECEIVING AND STORING MERCHANDISE**

One of the important functions of any agricultural business is the receipt and storing of merchandise. To properly receive merchandise, whether it be feed, fertilizer, chemicals or miscellaneous merchandise, several steps must be followed:

1. A definite plan must be used in unloading, moving, and storing items. This involves consideration of who does the work, how various types of merchandise must be handled (by hand, fork lift, etc.), and how and where it is to be stored.
2. Damage or breakage must be determined as the unloading proceeds. Both damage and breakage must be noted on the receiving form. Damaged merchandise must be destroyed, returned, or kept and sold at a reduced price. The person in charge should determine, at the time of unloading, whether there is any shortage.
3. The possibility of shortage must always be checked by exact count or weight at the time of receiving the merchandise. The quantity of goods received must always agree with the goods signed for on the bill of lading, or other shipment record.
4. Policies vary on checking goods against the invoice to check against substitutions. Invoices may be with the goods or they may arrive before the goods. The person checking the shipment should be sure that the merchandise received is in accord with the purchase order before signing the delivery slip. Many businesses will use a duplicate copy of their purchase order to check against merchandise received.
5. The quality of the merchandise, insofar as it can be determined by visual examination or by approved testing procedures, should be checked at the time of arrival. Quality must be checked against what was ordered to be sure it meets the standards specified in the order.
6. The employee who receives the merchandise will usually sign for it. He will also complete a receiving report for his business. Note on the receiving report form the fact that accurate count, condition of merchandise, description of merchandise as well as other pertinent facts, are listed.

Texas Education Agency  
Texas A&M University  
(cooperating)

Information Sheet  
on  
**STOCKING AND MERCHANDISE PLANNING**

Businesses have numerous decisions to make in determining the quantity of any certain item to order. The quality of stock and time to order are also important. Some factors which businesses must keep in mind in ordering supplies are:

1. Will this merchandise have a slow or fast turnover?
2. Will it keep if some remains unsold?
3. What will be the probable demand for this product this year or this season?
4. When will the demand come?
5. How long will it take to get replacement merchandise?
6. How much money may we have tied up in inventory stock?
7. Where can we secure quality merchandise at the lowest cost?

Although only certain employees will have the responsibility of ordering stock, all employees must be responsible for calling attention to low stocks and for keeping the stock neat and orderly.

An employee should know the exact location of merchandise. He should have a good working knowledge of the amount of a product on hand at a given time in relation to the probable demand.

Assignment Sheet  
for  
FEED SALES AND SERVICE

UNIT: Regulations

TOPIC: Regulations in Formulating and Labeling of Feeds

OBJECTIVE: To develop an understanding of the regulations regarding formulating, labeling and subsequent use.

INTRODUCTION: Nearly all the states in the United States have adopted laws or rules and regulations in regard to formulating and labeling of feeds. These laws are not only of benefit to the stockman or poultryman, but also the the feed manufacturer that is conscientiously striving to be honest in placing a product on the market to adequately supply the needs of the person using them in his live-stock or poultry feeding program. The laws, in general, require that a feed be licensed, the chemical composition, and feed ingredients be guaranteed.

REFERENCES: Required:

1. Feeds and Feeding, Morrison, abridged, 8th edition, page 13.
2. Rules and Regulations adopted by the Texas Feed and Fertilizer Control Service, Bulletin MP-466, Texas A&M University, Texas Agricultural Experiment Station, College Station, Texas.
3. "Texas Commercial Feed Control Act of 1957", Bulletin MP-291, Texas A&M University, Texas Agricultural Experiment Station, College Station, Texas.

QUESTIONS  
or  
ACTIVITIES:

1. Name three things that feed laws generally require or enforce.
2. May color be added to feeds?
3. What is meant by "brand" of feed?
4. What is meant by "product" name?

UNIT: Regulations

TOPIC: Regulations in Formulating and Labeling of Feeds

(Assignment Sheet continued)

5. What amendment was passed in 1958 that greatly effected the feed business?
6. What information should be contained on labels for feed?
7. What are closed formula and open formula feeds?
8. Before a feed is registered that contains drugs, what are five things that are required.
9. Collect and study labels from the feeds sold by your employer. Place sample tags or labels in your notebook.
10. What organization controls formulating and labeling of feeds in Texas? Where is it located?
11. What four principal things about feeds are affected by federal regulations?
12. Name four things that medicated feed tag must contain, in addition to those on regular feed mixtures.
13. What fee is paid for inspection by the Texas Feed Control Service?
14. What is an adulterated feed?
15. What is misbranding?

Texas Education Agency  
Texas A&M University  
(cooperating)

Information Sheet  
on  
FACTORS TO CONSIDER IN FORMULATING FEEDS

The factors to consider when formulating feeds are:

1. Protein - Protein is frequently the most limited nutrient in a ration. All essential amino acids must be supplied. Limiting nutrients can be compared to the amount of water in a stave barrel. The barrel will hold only the amount up to the shortest stave, regardless the length of other staves. Quality of protein becomes a limiting factor when less nutritious feeds are the total ration.
2. Cost - When formulating rations, the lowest cost protein feeds, to supply the need should be used. The mixture should still be palatable and contain adequate amounts of other nutrients.
3. Variety - Variety in the feeds used in a ration brings about a more palatable mixture, however it is not always the most economical.
4. Palatability - A balanced ration will not supply the nutrient requirement needs of an animal that does not eat the mixture. Quality of feed, storage, age and feeding methods are several factors that may alter palatability.
5. Fiber Content - Caution must be taken to insure that a ration is not too bulky or containing too much fiber. Young animals, swine and poultry must have less fiber, where horses or dairy animals and beef animals may take more fiber.
6. Mineral Content - Make sure animals are being fed the required minerals, or see that they are provided in a ration.
7. Vitamin Content - Rations, if properly balanced, generally contain adequate vitamin content however young animals, chicks or cattle on poor winter rations need their rations fortified with vitamin D or A.

Factors To Consider In Formulating Feeds  
(Information Sheet continued)

8. Energy Content - Balanced rations normally contain enough carbohydrates and fats necessary, however special attention may be necessary for high producing cows as well as high producing laying hens. This is also true with horses used excessively on the range or track.

for  
FEED SALES AND SERVICE

- UNIT:** Formulating Rations
- TOPIC:** Common Methods of Balancing Rations
- OBJECTIVE:** To develop an understanding of the two common methods of balancing rations.
- INTRODUCTION:** After a person has an understanding of the feeding standards and feed analysis tables, and the factors to consider in formulating feeds, he must determine the best method of combining the proper kinds of feeds in the proper amounts to economically supply the needs of the animal.
- There are two common methods used in balancing rations; the "Total Digestible Protein" method, and the "Square" method.
- The remainder of this assignment will attempt to explain the two methods.
- REFERENCES:** Required:
1. Feeds and Feeding, Morrison, 8th Edition, abridged, pp. 140-148.
  2. Stockman's Handbook, Ensminger, 3rd Edition, pp. 72-82.
- QUESTIONS  
or  
ACTIVITIES:**
1. What are the two most common methods for balancing rations?
  2. Give four advantages of the "Square" method.
  3. Which one nutrient receives major attention by the "Square" method?

UNIT: Formulating Rations

TOPIC: Common Methods of Balancing Rations  
(Assignment Sheet continued)

4. What two things must be available before balancing rations by either method?
5. Why does the "Total Digestible Nutrient" method more completely supply the needs of an animal?
6. What is the "Handy Feeding Recommendations"?
7. Develop a 15% protein ration of corn and cob meal and cottonseed meal for a 400 lb. baby beef.
8. Balance a ration for a 500 lb. dairy heifer requiring .81 - .92 lbs. of Digestible Protein and 6.9 - 8.1 lbs. of Total Digestible nutrients. Use the following feeds:  
corn and cob meal  
wheat bran  
cotton seed meal  
Heifer has free choice good grass hay.

Assignment Sheet  
for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Formulating Rations for Dairy Cows

OBJECTIVE: Develop an understanding of formulating rations for dairy cows.

INTRODUCTION: Profitable dairy production may be achieved by, first, selecting foundation stock with inherited ability to produce, and secondly, feeding and management of the herd in such a manner as to reach maximum production

It makes little difference how well an animal is bred if the cow is not given the proper kind and amounts of nutrients for manufacturing milk.

REFERENCES: Required:

1. Dairy Production, Diggins and Bundy, 2nd Edition, pp. 133-161.
2. Feeds and Feeding, Morrison, 8th Edition, abridged, pp 365-397.

QUESTIONS  
or  
ACTIVITIES:

1. Why is it important that the amount of concentrates for each cow be according to her actual yield of milk and butterfat?
2. Name ten (10) essentials in proper feeding and care of dairy cows.
3. Why is good pasture necessary for low cost milk production?
4. Why is it important that cows have a dry period?

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Dairy Cows  
(Assignment Sheet continued)

5. Why are roughages considered the basis for dairy cow rations?
6. What information is necessary to balance a dairy cows rations?
7. To maintain efficient production, a 1000 lb. cow giving 48 lbs. 4% milk will need:
  - a. How many pounds of digestible protein?
  - b. How many pounds of total digestible nutrients?
8. Show how you would determine the protein and total digestible nutrients for a 950 lb. dairy cow, producing 40 lbs. of 4.5% milk.

Assignment Sheet  
for  
**FEED SALES AND SERVICE**

- UNIT:** Formulating Rations
- TOPIC:** Formulating Rations for Fattening Cattle
- OBJECTIVE:** To develop an understanding of formulating rations for fattening cattle.
- INTRODUCTION:** Cattle feeding demands a great amount of capital investment in both cattle and feed, and consequently much risk. Those who are thoroughly planning their feeding operation, and understand cattle feeding are the ones who will realize some profit. Mistakes in judgement can be expensive, therefore a thorough understanding of fattening cattle is of major importance to the feeder.
- REFERENCES:** Required:
1. Feeds and Feeding, Morrison, abridged, eighth edition, pp. 426-433.
  2. Livestock and Poultry Production, Bundy and Diggins, second edition, pp. 246-270.
  3. The Stockman's Handbook, Ensminger, third edition, page 53, pp. 74-75.
- QUESTIONS  
or  
ACTIVITIES:**
1. What are the sources of profit from feeding fattening cattle?
  2. What grains are commonly used in beef cattle rations?
  3. Name the most common protein supplement for Texas.
  4. What two roughages are most desirable for fattening cattle?

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Fattening Cattle  
(Assignment Sheet continued)

5. What are four advantages of pasture fattening?
6. Using Feeds and Feeding, determine the nutrient needs for fattening yearling cattle, 600 pounds in weight.
7. What is urea and what advantage does it have in a ration?
8. Of what advantage are hormones in a fattening ration?
9. What advantage is the addition of antibiotics in a fattening ration?
10. What is an all concentrate ration?

Assignment Sheet  
for  
FEED SALES AND SERVICE

- UNIT: Formulating Rations
- TOPIC: Formulating Rations for Breeding Ewes
- OBJECTIVE: To develop an understanding of formulating rations for breeding ewes.
- INTRODUCTION: Healthy productive flocks of good breeding ewes require special attention to the feeding and management program. The breeding flock will require different rations depending on whether they are bred, open, stage of pregnancy, or age of the suckling lamb. Shepherds who do not plan their feeding program according to the animals' particular needs will not be able to produce strong healthy lambs.
- REFERENCES: Required:
1. Sheep Production, Diggins and Bundy, pp. 101-119.
  2. Feeds and Feeding, Morrison, eighth edition, abridged, pp. 434-450.
  3. The Stockman's Handbook, Ensminger, third edition, pp. 59-61.
- QUESTIONS  
or  
ACTIVITIES:
1. What three things are sold in sheep production to make profit?
  2. Why are sheep similar to cattle in their feeding habits?
  3. Name five periods of the ewe's productive cycle and tell how they are related to feeding the ewes.

UNIT Formulating Rations

TOPIC: Formulating Rations for Breeding Ewes  
(Assignment Sheet continued)

4. How are sheep able to produce more salable products on less grain in proportion to forage, than any other common kinds of livestock?
5. Using Feeds and Feeding, abridged, eighth edition, determine the needs in digestible protein and total digestible nutrients for a 100 pound breeding ewe, nursing a lamb.

Assignment Sheet  
for  
**FEED SALES AND SERVICE**

- UNIT:** Formulating Rations
- TOPIC:** Formulating Rations for Fattening Lambs
- OBJECTIVE:** To develop an understanding of formulating rations for fattening lambs.
- INTRODUCTION:** Lamb production and feeding methods vary with various climatic, economic and feed conditions. Some areas are able to produce lambs on a good forage program and milk, some sold as feeders, and others sell lambs dropped in fall as hothouse lambs. Regardless of the method of production a person working with feeding lambs should have a thorough understanding of the problems involved in formulating good rations for lambs.
- REFERENCES:** Required:
1. Sheep Production, Bundy and Diggins, pp. 120-159.
  2. Feeds and Feeding, Morrison, abridged, eighth edition,
  3. The Stockman's Handbook, Ensminger, third edition, pp. 59-61.
  4. Livestock and Poultry Production, Bundy and Diggins, second edition, pp. 491-506.
- QUESTIONS  
or  
ACTIVITIES:**
1. What three methods are commonly used in the production of fat lambs?
  2. What is creep feeding of lambs?

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Fattening Lambs  
(Assignment Sheet continued)

3. How does the lamb feeder expect to make his profit?
4. Approximately how much concentrates and roughage will a lamb on full feed consume or eat daily?
5. What are the requirements for 50 pound fattening lamb.

\*\*\*\*\*

Texas Education Agency

(cooperating)

Assignment Sheet  
for  
**FEEL SALES AND SERVICE**

**UNIT:** Formulating Rations

**TOPIC:** Formulating Rations for Brood Mares

**OBJECTIVE:** To develop an understanding in formulating rations for brood mares.

**INTRODUCTION:** Skill and good judgment in feeding enter into the success or failure in feeding horses, probably more than any other class of livestock. The variation in feeding of horses comes about in the different use for horses and also the small digestive tract of horses. The total digestible nutrient requirements for horses approximately double between a horse idle and a horse at work. This means the rations will consist more of grain for horses as the work increases. Thorough understanding of these various differences will help to maintain a well balanced ration for a horse.

**REFERENCES:** Required:

1. Feeds and Feeding, Morrison, Abridged, eighth edition, pp. 451-465.
2. The Stockman's Handbook, Ensminger, third edition, pp. 69-71.

**QUESTIONS  
or  
ACTIVITIES:**

1. What nutrient is most likely to be deficient in a ration for a brood mare?
2. Should horses be allowed to eat all the hay they want?
3. Why are oats popular as a grain for horses?
4. How much grain and hay is the average allowance for a pregnant mare?
5. How is the "production" of horses different from other livestock?

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Brood Mares  
(Assignment Sheet continued)

6. Give the requirements for a brood mare, weighing 1000 lbs. nursing a foal.

Assignment Sheet  
for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Formulating Rations for Growing Colts

OBJECTIVE: To develop an understanding of formulating rations for growing colts.

INTRODUCTION: The colt should make about half of its growth during the first year. It should be fed liberally, so that its growth will not be slowed at any point of its development. A thorough understanding of the colt's feeding requirements, after it has received colostrum from the mare, is very important to its growth.

REFERENCES: Required:

1. Feeds and Feeding, Morrison, abridged, eighth edition, pp. 463-464.
2. The Stockman's Handbook, Ensminger, third edition, pp. 70.

QUESTIONS  
or  
ACTIVITIES:

1. Why does a colt need to be fed liberally the first year?
2. Should a colt receive the colostrum from the mare?
3. What value is the colostrum to the colt?
4. Should a colt learn to eat grain early? Why?
5. What is a good feed mixture for colts?
6. Will reducing the feed to the mare and colt help control diarrhea?
7. What are the daily requirements for a 600 lb. growing colt after weaning?
8. How many pounds of concentrates should a colt be eating by the time they are weaned?

Texas A&M University  
Cooperating

Assignment Sheet  
for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Formulating Rations for Brood Sows

OBJECTIVE: To develop an understanding in formulating rations for brood sows

INTRODUCTION: In order to produce a good number of thrifty pigs, the brood sow must have proper feeding and care. The profit or loss from a swine breeding herd is basically determined by the number of pigs weaned and marketed by the sow. Good breeding with poor feeding programs usually causes loss. The proper understanding of the needs of a brood sow during various cycles of production will assist in bringing about greater profits.

REFERENCES: Required:

1. Livestock and Poultry Production, Bundy and Diggins, second edition, pp. 84-97.
2. Feeds and Feeding, Morison, abridged, eighth edition, pp. 466-490.
3. The Stockman's Handbook, Ensminger, third edition, pp. 62-69.

QUESTIONS  
or  
ACTIVITIES:

1. How do swine differ from cattle sheep and horses in their nutritional needs?
2. Why do swine suffer from poor nutrition more than other livestock?
3. Name four periods in the cycle of production for a sow.
4. Name six essentials in the feeding and care of brood sows.

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Brood Sows  
(Assignment Sheet continued)

5. Name two types of feeding brood sows.
6. What two things does the sow use her feed to accomplish?
7. Should a sow or gilt gain during pregnancy?
8. What is the advantage of hand feeding over self feeding the sows?
9. What percent protein should rations for sows contain?
10. Give the requirements for a 300 lb. sow nursing and a litter.

Texas Education Agency  
Texas A&M University  
Cooperating

Assignment Sheet  
for  
**FEED SALES AND SERVICE**

**UNIT** Formulating Rations

**TOPIC** Formulating Rations for Growing and Fattening Pigs

**OBJECTIVE** To develop an understanding of formulating rations for growing and fattening pigs.

**INTRODUCTION** The primary aim of growing and fattening pigs is to produce rapid economic gains. To accomplish this, the rations for growing and fattening pigs must be adequate in protein. Also the rations must supply mineral and vitamin needs. Approximately one third of the cost of producing a 220 pound market hog is raising to weaning age, and the other two thirds is from weaning to market age. Since about twice the amount invested is in the latter period, it is very important to have an understanding of providing adequate and economical rations.

**REFERENCES:** Required:

1. Livestock and Poultry Production, Bundy and Diggins, second edition, pp. 120-145.
2. Feeds and Feeding, Morrison, abridged, eighth edition, pp. 466-490.
3. The Stockman's Handbook, Ensminger, third edition, pp. 62-68.

**QUESTIONS**  
or  
**ACTIVITIES**

1. What are the two primary aims of growing and fattening pigs?
2. How much of the cost of producing a 220 pound hog is from weaning to market?

UNIT: Formulating Rations  
TOPIC: Formulating Rations for Growing and Fattening Pigs  
(Assignment Sheet continued)

3. Why are the use of complete rations in fattening swine becoming more popular?
4. Name two methods in feeding fattening pigs.
5. Do growing pigs require more protein vitamins and minerals than mature hogs?
6. What particular feed should make up the main part of a fattening ration?
7. What are the two most common systems of self feeding fattening pigs?
8. What percent protein does a fattening pig, 150 pounds up, need?
9. What is a good mixture to meet mineral needs of fattening pigs?
10. What are the feed requirements for a 100 lb. growing and fattening pig?

(cooperating)

Assignment Sheet  
for  
**FEED SALES AND SERVICE**

**UNIT:** Formulating Rations

**TOPIC:** Formulating Feeds for Poultry

**OBJECTIVE:** To develop an understanding in formulating rations for poultry.

**INTRODUCTION:** The production of poultry in confinement, and the peculiar digestive system of poultry, creates problems for the poultryman in formulating rations for poultry. Poultry have very little ability to digest fiber, thus, their feeds must be concentrated in nature. A thorough understanding of these and other factors will enable a poultryman to more easily formulate rations for poultry that will be adequately balanced.

**REFERENCES:** Required:

1. Feeds and Feeding, Morrison, abridged, eighth edition, pp. 491-512.
2. Profitable Poultry Production, Parnell, pp. 137-168.
3. Livestock and Poultry Production, Bundy and Diggins, second edition, pp. 570-612.

**QUESTIONS  
or  
ACTIVITIES:**

1. How does digestion of poultry differ from other farm animals?
2. What is an all mash ration for hens?
3. Why does careful consideration for minerals, vitamins, and protein become more important in poultry?
4. What group of feeds make up a major portion of poultry feeds?

UNIT: Formulating Rations  
TOPIC: Formulating Feeds for Poultry  
(Assignment Sheet continued)

5. Why are feeding standards for poultry usually expressed or stated in amounts of protein and other nutrients?
6. How are feeding standards for poultry stated?
7. Using the standard on page 493, Feeds and Feeding, abridged, eighth edition, determine the protein requirements for starting chicks and laying hens.

Assignment Sheet  
for  
FEED SALES AND SERVICE

UNIT: Feed Preparation

TOPIC: Forms of Feeds

OBJECTIVE: To develop an understanding of the various forms of feed preparation and the benefits derived from each form.

INTRODUCTION: The problem of proper feed preparation or the proper form to feed is one of the most difficult problems for the feeder. It is very important that the feeder have reliable information on feed preparation in order to make maximum use of his feeds without extravagant investment in equipment.

REFERENCES: Required:

1. Feeds and Feeding, Morrison, abridged, eighth edition, pp. 40-45.
2. The Stockman's Handbook, Ensminger, pp. 124-125.

QUESTIONS  
or  
ACTIVITIES:

1. What are seven forms of feed preparation?
2. What two factors determine the value of crushing, chopping or grinding feeds?
3. What is the chief advantage of pellet or cube feeds?
4. Does grinding and mixing make feeds more palatable?
5. Name five advantages to an all pellet ration.
6. What particular class of feeds are improved in digestibility by grinding?
7. Does grinding induce show animals to consume more feed?
8. Do older cattle with poor teeth benefit from grinding or chopping?

Assignment Sheet  
for  
FEED SALES AND SERVICE

- UNIT:** Feed Preparation
- TOPIC:** Forms of Feed for Various Classes of Livestock
- OBJECTIVE:** To develop an understanding of the forms of feed preparation for various classes of livestock.
- INTRODUCTION:** It is very desirable for a stockman or poultryman to know whether or not any specific kind of feed preparation will be profitable. The kind of livestock being fed will determine the value of grinding or crushing, along with the kind of feed. An understanding of the value of the various forms for different types of livestock and poultry, essential.
- REFERENCES:** Required:
1. Feeds and Feeding, Morrison, abridged, eight edition. pp. 40-45.
  2. The Stockman's Handbook, Ensminger, third edition, pp. 124-125.
- QUESTIONS or ACTIVITIES:**
1. What two classes of livestock may benefit from soaking or cooking feeds?
  2. Do sheep need as much grinding of their feeds as other farm animals?
  3. Why is finely ground or chopped feeds harmful to horses?
  4. Do smaller animals need smaller pellets in pelleted feeds?
  5. Why should hog feeds be ground instead of rolled?
  6. Why is rolling of feeds better for horses than grinding?

UNIT: Feed Preparation

TOPIC: Forms of Feed for Various Classes of Livestock

(Assignment Sheet continued)

7. Why are rolled grains preferred over ground grains for show cattle?
8. Should calves under 9 to 12 months have their grain ground?
9. Does soaking improve the feeding value of a feed?
10. What class of feeds are now being pelleted that were formerly not considered for pelleting?

Assignment Sheet  
for  
FEED SALES AND SERVICE

- UNIT**                      Related Agricultural Supplies and Equipment
- TOPIC**                      Miscellaneous Agricultural Supplies and Small Equipment
- OBJECTIVES**
- 1 To develop an understanding of the wide range of related agricultural supplies and small equipment, which may be carried by an agricultural supply business.
  - 2 To develop an understanding of the specific characteristics of related agricultural supplies and equipment which would be useful to the employee
  - 3 To develop an understanding of the services that might be provided pertaining to various agricultural supplies and equipment
- INTRODUCTION**        The wide range of various types of agricultural supplies and equipment that are being stocked and sold by feed sales and service businesses, makes it imperative that any employee of such businesses realize and have a thorough understanding of these supplies and equipment. The particular types handled by the business will vary according to communities because of customer demand, local farming and ranching conditions and the opportunities for profit.
- REFERENCES**            Required
- 1 Information Sheet, "Common Agricultural Supplies and Equipment found in Feed Sales and Service Business"
- Supplemental
- 2 Sales and service literature on the particular brands of the equipment and supplies being carried by the employer

UNIT Related Agricultural Supplies and Equipment  
TOPIC Miscellaneous Agricultural Supplies and Small Equipment  
(Assignment Sheet continued)

QUESTIONS  
or  
ACTIVITIES:

- 3 Catalogues of agricultural supply companies.
- 1 Make a complete list of all agricultural supplies and equipment handled by your employer.
- 2 Make a scrapbook or file of literature concerning characteristics of all of the agricultural supplies and equipment sold by your employer
3. Name the services that need to be provided for all existing lines of agricultural supplies and equipment
- 4 Make a list of the different types of farming and ranching served by your employer.
- 5 Which supplies and equipment are most common in demand in your store?

Information Sheet  
on  
COMMON AGRICULTURAL SUPPLIES AND EQUIPMENT  
FOUND IN THE FEED SALES AND SUPPLY BUSINESS

- 1 Veterinary Supplies and Equipment
  - a Thermometers
  - b. Veterinary Syringes
  - c Balling guns
  - d. Hose syringes
  - e Trocars
  - f. Mouth speculums
  - g Calf pullers
  - h Mastitis control and detection equipment
  - i Stockmen's knives
  - j. Hardware disease magnets
  - k Castrating equipment and supplies
  - l Dehorning equipment and supplies
  - m Animal health products such as:
    - 1) Phenothiazine boluses
    - 2) Piperazine wormer
    - 3) Screw worm medicine
    - 4) Scour medicine
    - 5) Sulfa drugs
    - 6) Penicillin preparation
    - 7) Pinkeye treatments
    - 8) Udder ointments
    - 9) Milk fever remedies
    - 10) Blackleg bacteria
    - 11) Mange, lice and tick treatments
    - 12) Fly killers
    - 13) Bloodstop powder
    - 14) Bloat remedy
    - 15) Drenching kits
  
- 2 Large Animal Supplies and Equipment  
Among such items commonly sold in agricultural supply businesses are those listed below.
  - a Neck chains and tags
  - b. Ear tags
  - c. Tattoo markers
  - d. Branding irons

Coramon Agricultural Supplies and Equipment  
 Found in the Feed Sales and Supply Business  
 (Information Sheet continued)

- e. Cattle nose leads and neck straps
- f. Leather and rope halters
- g. Grooming supplies such as curry combs, brushes, soaps, polishes, coat dressings, and clippers
- h. Horn weights and horn trainers
- i. Hoof trimmers
- j. Horsebridles and bits
- k. Saddles and related tack
- l. Horse shoeing supplies and equipment
- m. Hog ringers
- n. Feed carts
- o. Calf weaners
- p. Electric cow prods
- q. Milking supplies and equipment
  - 1) Milk filters
  - 2) Milker inflations
  - 3) Cleaning supplies such as scouring sponges, toweling, brushes, and pipeline cleaners
  - 4) Pails
  - 5) Dairy scales
  - 6) Milk thermometers
- r. Hobbles
- s. Nose twitches
- t. Creep feeders
- u. Farrowing crates
- v. Hog troughs

Some of the larger equipment sold through supply centers would be beyond the technical ability of the salesperson just entering the business. Examples of such items sold would be automated feeding and watering equipment, slatted floors, farrowing stalls, gutter cleaners, bulk tanks, and pipeline milker systems.

### 3. Poultry Supplies

The following are commonly sold over the counter in farm supply stores.

- a. Egg candlers
- b. Egg graders
- c. Egg scales
- d. Egg baskets
- e. Egg washers and washing compounds
- f. Chick hovers and brooders
- g. Small incubators
- h. Wing bands

Common Agricultural Supplies and Equipment  
 Found in the Feed Sales and Supply Business  
 (Information Sheet continued)

- i Electric debeakers
- j Poultry scales
- k Poultry waterers
- l Poultry feeders
- m Poultry nesting units

Larger equipment, which must be adapted to individual farm situations would probably be beyond the capacity of the retail salesperson without special training. Examples would include caged layer systems, fogging systems, and automated feeding systems

4. Agricultural Hardware

Some hardware items are primarily used on the farm, ranch, or horticultural operation and thus are found in many agricultural supply businesses. They include

- a Fence stretchers
- b Wire pliers
- c Wire splicers
- d Gate irons
- e Mower repair blocks
- f Portable air tanks
- g Feed chopper and mowing machine knives
- h Shear bars and mower guards
- i Husking hooks and corn knives
- j Grassboards
- k Soil sampling augers and tubes
- l Soil testing kits
- m Seed cleaners and graders
- n Hand sprayers, dusters, and their repair parts
- o Grass, tree, and hedge shears or trimmers
- p Pruning shears and lopping shears
- q Pruning saws and pole pruners
- r Lawn and garden rakes, hoes, and trowels
- s Root feeders and waterers
- t Budding, grafting, and pruning knives
- u Brush hooks, mattocks and grab hoes
- v Axes, sledges, and saw wedges
- w Rain or sprinkler gauges
- x Home pasteurizers
- y Shallow and deep well pumps and replacement parts
- z Butchering supplies such as hog scrapers, butcher's saws, meat pumps, and skinning knives
- aa Irrigation siphons, sprinkler heads and sprinkler systems
- bb Stock tank heaters

Common Agricultural Supplies and Equipment  
 Found in the Feed Sales and Supply Business  
 (Information Sheet continued)

- cc. Animal traps
- dd. Corn cribs and cribbing materials
- ee. Farm levels and transits

5. Basic Hardware

Other hardware items often sold by agricultural supply centers are also found in the regular hardware store. The salesperson working in farm and garden supply centers will need to be able to sell these items. Among the more common items sold are the following:

- a. Hand and power tools such as hammers, saws, electric drills, carpenters' squares, braces, levels and planes
- b. Bolts, screws, nails, and builders' hardware
- c. Glass
- d. Screening
- e. Smooth barbed, and woven wire field and poultry fencing
- f. Electric fencing
- g. Rope, chain, block and tackle
- h. Tarpaulins and polyethylene sheeting
- i. Wood preservatives
- j. Wood and aluminum ladders
- k. Replacement wheels
- l. Plumbing supplies
- m. Electrical supplies
- n. Wood or metal paints, enamels, varnishes, lacquers, or primers
- o. Roofing materials

6. Small Equipment

This term is generally used to describe small horsepower gasoline engine equipped, wheeled implements used in farm, lawn, and garden work such as garden tractors, steam cleaners, rototillers, lawn mowers, brush cutters, power sprayers, and small centrifugal pumps. However, included in this category for sales purposes, are hand powered lawn mowers, seeders, fertilizer spreaders, wheel cultivators, and sprayers. Also included for sales purposes are small, power operated, hand tools such as hedge trimmers, sidewalk edgers, lawn sweepers, and chain saws. Stationery equipment sometimes included in the small equipment category are compost mills, power grinders, and air compressors.

The sales of small equipment in an agricultural supply or garden center are usually seasonal. A sizeable volume of sales is usually possible in such stores where the sales and service of small equipment is organized as a separate department stressing service and

Common Agricultural Supplies and Equipment  
Found in the Feed Sales and Supply Business  
(Information Sheet continued)

acceptance of "trade-ins" as standard policy. When grouped as a separate department, a specialized salesperson with a greater knowledge of capabilities and "product knowledge" is highly desirable. Such salespersons may be taken from other departments during a slack time if they have the "feel" for this type of work and can demonstrate competence as "talk about" merchandise being handled.

7. Tires, Batteries, Oils, and Accessories

The product knowledge needed for these items which are usually stocked in a farm supply center as well as made available through route salesmen is fully covered in Module No. 11 of this course on Petroleum and Petroleum Products, Sales and Service. The entire module need not be covered to train retail salespersons where such accessories are likely to be of secondary importance, but competencies IV, V, and VII are applicable. The subject matter of these competencies is arranged so that the minimum product knowledge needed by a retail salesperson is presented first under each heading.

8. Pet Supplies and Equipment

The large number of suburban residents who own pets of all kinds such as birds, rabbits, guinea pigs, tropical fish, cats, and dogs have created a market for many accessory items with sizeable "mark ups." Such items include feeds, cages, beds, blankets, grooming tools, deodorants, feeders, waterers, leashes, muzzles, and medicines for parasite control. Practically all garden centers handle pet supplies. An increasing number of farm supply stores also stock them. The salesperson working in centers handling such lines will need to have considerable product knowledge about these items if he is to be successful.

9. Outdoor Living Equipment

Increased interest in outdoor living both at home and in nearby park or recreation areas has caused many garden centers and farm supply centers to stock such items as lawn furniture, grills, patio paving blocks, swimming pools, outdoor lighting, insect repellants, swings, sand boxes, boats and outboard motors. Many stores feature these with garden displays in the spring and summer seasons. Special displays are often built and every effort is made to catch the "impulse" buyer. As with all seasonal merchandise, the profit to the store is high if the stocks are moved before the end of the usual buying period.

AGRICULTURAL SALES AND SERVICE

UNIT: Agricultural Salesmanship

TOPIC: Introduction, Agricultural Salesmanship

1. a. Poor service rendered  
b. Discourteous treatment received  
c. Indifference on the part of the salesman  
(Personal experiences may be varied)
2. Need - may or may not be recognized by the customer. It is based upon reason.  
Desire - is a feeling of need. It may not be based upon reason.
3. a. The selling process  
b. The merchandise  
c. The firm  
d. Himself  
e. His relation to the customer  
f. The customer
4. a. Deals directly with the public  
b. Helps others make decisions  
c. Something "new" every day  
d. Success is quickly recognized  
e. Enjoys high prestige
5. A satisfied customer
6. Everyone; the salesman, the firm, the customer and the public
7. a. Awakens human wants  
b. Satisfies human wants
8. a. His need  
b. The price  
c. The product needed  
d. The source (firm or store)  
e. The time
9. The product that best fits his needs
10. a. Courtesy  
b. Sincere interest
11. Helping the customer to buy intelligently

AGRICULTURAL SALES AND SERVICE

UNIT: Agricultural Salesmanship

TOPIC: Presenting Supplies and Services to Customers

1. a. Attention                      c. Desire  
   b. Interest                      d. Action
2. Attention may be involuntary. Interest is a voluntary reaction.
3. A combination of the needs or wants of the customer with the merits of the merchandise.
4. a. Desire for increased yields  
   b. Desire for more profits  
   c. Desire for less difficult work  
   Others acceptable
5. a. Newspaper advertising  
   b. TV or radio advertising  
   c. Talk with a neighbor  
   d. Direct mail circulars  
   Others acceptable
6. Student activity. He should include: a. Attention step  
  b. Interest step  
  c. Desire step
7. a. Know the features of the product.  
   b. Be able to answer questions about the product.  
   c. Be able to demonstrate the product, including its advantages

Answer Sheet  
for  
AGRICULTURAL SALES AND SERVICE

UNIT: Agricultural Salesmanship

TOPIC: Overcoming Customer Resistance

1. The seller and the buyer must "give up" something to secure something.  
The seller "gives up" merchandise; the buyer, money. Each sale represents a choice.
2. The customer's a. pleasure, b. satisfaction, and/or c. need
3.
  - a. Need - Stress usefulness of a product
  - b. Quality - Point out good features
  - c. Source - Name satisfied customers; provide company information or reliability
  - d. Price - Revealing values of product
  - e. Time - Show positive interest; counter all objections
  - f. Thing - Showing suitability of the product

Answer Sheet  
for  
AGRICULTURAL SALES AND SERVICE

UNIT: Agricultural Salesmanship

TOPIC: Closing the Sale

1. When the need for the merchandise has been definitely established
2. That of helping the customer make a wise decision
3. When the customer is not aware of his needs or not well aware of product choices
4. Immediately after the customer decides to buy
5.
  - a. The customer has exhibited attention, interest, and desire for the product.
  - b. The relationship between the need and the product has been established.
  - c. Objections have been overcome.
  - d. The price is acceptable.
  - e. The product is approved by the customer.
  - f. The customer has the "power" (ability) to make the purchase.
6. Giving the customer a small decision to make, based upon the major decision to buy. Example: "Do you prefer the red or the green?", "Would you prefer sacks or paper bags?"
7.
  - a. Assuming failure in the beginning
  - b. Hurrying the customer
  - c. Failing to help the customer decide
  - d. Failing to overcome obstacles
  - e. Stressing the wrong selling points
  - f. Trying to force the customer
  - g. Discourtesy at any point
8. 

a. Write legibly.	c. Name and address completed
b. Accuracy	d. Special directions noted

TOPIC: Importance of Accurate Records

1. a. (1) To know the financial status of the business  
(2) To give proper information to company officers and stockholders  
(3) To satisfy legal requirements  
(4) To plan for desirable change in management and procedures  
(5) To prepare tax returns  
b. To plan for desirable change in the business
2. Profit or loss for a stated period of time
3. A balance sheet shows all assets and liabilities. The two always are equal.
4. All daily records of the firm, including sales tickets, invoices of purchases, and other records
5. To be sure that this part of the firm's records are correct for the day
6. Because transportation and many other items of expense are involved in the true "cost" of the merchandise to the firm.
7. a. To assist in determining the firm's financial condition  
b. To plan for purchases of stock
8. \$103,048.16
9. a. Salaries and wages c. Advertising  
b. Heat, power, and water e. Depreciation d. All other expenses
10. Because the land did not become less valuable.
11. a. \$23,173.70 b. \$305,444.24 c. \$10,649.42 d. \$305,444.24

TOPIC Determining Selling Price

1. a. Merchandising costs      b. Overhead      c. Profit
2. a. Interest on investment      c. Warehousing      e. Office and accounting ex-  
    b. Insurance      d. Taxes      penses
3. a. Drop in price      b. Theft      c. Damage
4. Fixed costs
5. Fixed expenses will increase little with increased volume; variable costs will increase more, but opportunities for total profits become greater.
6. The amount that is added to the cost to arrive at the selling price
7. a. \$3.00      b. 30% ( $3.00 \div 10.00 = 30\%$ )
8. The gross margin is obtained by dividing the markup by the selling price (not the cost).
9.  $\$3.00 \div \$13.00 = 23 \frac{1}{3}\%$
10. Number of times an item "turns over" per year times gross margin should equal 100.
11. Feed is consumed, requiring more frequent purchase.

FEED SALES AND SERVICE

UNIT: Regulations

TOPIC: Regulations in Formulating and Labeling of Feeds

1. a. Feeds be licensed  
b. Chemical composition  
c. Feed ingredients guaranteed
2. Yes, only if it is harmless to animals and does not conceal inferiority.
3. "Brand" is a sales or business trade name.
4. "Product" denotes type of feed, such as "dairy feed."
5. Feed additives amendment (Delaney clause)
6. a. Net weight  
b. Brand or trade  
c. Product name  
d. Purpose of medication  
e. Active drug ingredients, by common names; expressed in percent or grams  
f. Guaranteed analysis of feed  
g. Feed ingredients, by common names  
h. Name and address of manufacturer  
i. Detailed feeding directions:  
(1) Purpose                      (3) How to feed                      (5) Warning statement  
(2) When to feed                (4) Precautions
7. "Closed formula" means listing only ingredients. "Open formula" means listing ingredients and percent of each.
8. a. Show the name of and purpose for the presence of the drug.  
b. Furnish data in support of the claims to demonstrate the efficiency of the product.  
c. Show the minimum and maximum quantity required to accomplish the purpose.

UNIT: Regulations  
 TOPIC: Regulations in Formulating and Labeling of Feeds  
 Answer Sheet (continued)

- d. Show the safety of the feed when used according to directions.
  - e. Furnish a written statement that given adequate written or printed warnings and feeding directions which would accompany delivery of feed.
9. Student activity!
10. Texas Feed and Fertilizer Control Service, Texas A&M University, College Station, Texas
11. 1. Additives that can be added to feeds  
 2. Level of additives  
 3. How medicated feed is to be fed  
 4. Proper labeling of medicated feeds
12. a. Purpose of medication  
 b. Directions for use of the feed  
 c. Common names and amounts of all active drug ingredients  
 d. Warning statement of a withdrawal period, when required, for a particular drug in a feed
13. 10% per ton of feed
14. a. When its composition, quantity, or quality falls below or differs from that which is reported or represented by the label.  
 b. When it is moldy, sour, heated, or otherwise damaged whereby it is rendered injurious to animals.  
 c. When an ingredient has been whole or in part omitted or extracted therefrom.  
 d. When any ingredient has been in whole or in part substituted.  
 e. When any substance has been added thereto or mixed or packed therewith so as to deceptively increase its bulk or weight, or reduce its quality or strength, or make it appear better or of greater value than it is.  
 f. When damage or inferiority has been concealed in any manner.  
 g. When it bears or contains any poisonous or deliterious substance which may render it injurious to animals under ordinary conditions  
 h. When it contains any low grade material, unless the name and percentage of such material are cleanly and prominently printed on the label and labeling thereof.  
 i. When it consists in whole or in part of an diseased, filthy, putrial, or decomposed substance, unless such substance has been rendered harmless by sterilization or other effective processes.  
 j. When it is otherwise unfit for feeding to animals.

UNIT. Regulations

TOPIC. Regulations in Formulating and Labeling of Feeds

(Answer Sheet continued)

15. a. A commercial feed does not bear a tag (certificate) as required.  
b. When its container does not bear the labeling required.  
c. When labeling is false.  
d. When container is so made, formed or filled as to be misleading.  
e. When it purports to be or is represented as a commercial feed for which a definition of identity and a minimum standard have been prescribed by regulation, unless it conforms to such definitions and standards.  
f. When it is not subject to the provisions of the Section 9(e) of the Act.  
g. When any medicines, drugs or any of the other items named in Section 5(a) (4) of the Act are incorporated in the feed and the quantity of such items and warning statements and directions for use are not shown on label as required.

for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Factors to Consider in Formulating Feeds

1. Because of additional energy used up in muscular work of grazing
2. Protein rich feeds are usually higher in cost.
3. Yes, feeds must be palatable to the animal or they will not eat as much, therefore cutting down on production.
4. Cost of the ration
5. A ration which provides an animal the proper proportions and amounts of all the required nutrients for a period of 24 hours
6. a. Experience  
b. Born livestock intuition or "know how"
7. Antibiotics, Hormones
8. Bacteria

- e. Minerals

Texas Education Agency  
Texas A&M University  
Cooperating

Answer Sheet  
for  
FEED SALES AND SERVICE

UNIT - Formulating Rations

TOPIC - Common Methods in Balancing Rations

1. a. "Square" method or Pearson Square  
b. "Total Digestible Nutrient" method
2. a. Simple  
b. Direct  
c. Easy  
d. Permits quick substitution of feed ingredients
3. Protein
4. a. Feed standards      b. Feed Analysis Tables
5. Because it considers more than protein alone, such as dry matter, total digestible nutrients and protein.
6. General daily recommendations for various description of animals as to forage per day and concentrates per day, based on types of animals under various feeding conditions.
7. Corn and cob meal - 5.9 digestible protein  
Cottonseed meal (exp) - 33.1 digestible protein

Cottonseed meal 33.1    9.1 parts of cottonseed meal  
Corn and cob meal 5.9    18.1 parts of corn and cob meal  
Total 27.2 parts

$18.1 \div 27.2 = 66.5$  lbs. corn and cob meal in 100 lbs. of mixture for 15% protein

$9.1 \div 27.2 = 33.5$  lbs. of cottonseed meal in 100 lbs. for 15% protein

Feed 12.5 to 15 lbs. per day for a 400-500 lb. fattening calf.

UNIT - Formulating Rations  
 TOPIC - Common Methods in Balancing Rations  
 Answer Sheet (continued)

## 8. Ration for 500 lb. dairy heifer

Requirements:	Digestible Protein .81 - .92	Total Digestible Nutrients 6.9 - 8.1
Corn and cob meal	5.4	73.2
Wheat bran	13.2	66.9
Cottonseed meal	32.2	69.1
Bermuda hay	3.6	44.2

Feeds and Feeding recommends 2-4lbs. of concentrates daily. Hay is fed free choice.

<u>Feed</u>	<u>lbs. Fed</u>		<u>T. D. N.</u>
Corn and Cob meal	4	.216	2.93
Wheat bran	2-1/2	.333	1.70
Cottonseed meal	1/2	.161	.346
Bermuda hay	5	.160	2.310
		<u>.870</u>	<u>7.286</u>

Answer Sheet  
for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Formulating Rations for Dairy Cows

1. So that each cow can maintain a high level of production, based on her needs in size as well as production
2. 

a. Economical well-balanced rations	e. Kindness by the herdsman
b. Comfortable surroundings for all seasons	f. Regularity in feed and care
c. Palatable rations, with plenty of good roughage and variety of feeds	g. Dry periods of proper length
d. Adjust concentrates for each cow's actual production	h. Plenty of good fresh water
	i. Rations slightly laxative
	j. Some succulent feeds in ration
3. Good pastures are necessary because a cow can keep up her production on less concentrates, making for more economical production.
4. Dry periods are important for a cow so they can rest from production, and will actually produce more than when milked continuously.
5. Without plenty of good quality roughage, it is difficult to obtain economical milk production, and dairy cows are efficient users of roughage in large amounts.
6. 

a. Weight	b. Daily milk production	c. Butterfat percent
-----------	--------------------------	----------------------
7. Digestible protein - 2,748 lbs.      Total digestible - 22.89 lbs.
8. If we have a 950 lb. cow, producing 40 lbs. of 4.5% milk, she will need .6 lb. of protein and 6.65 lbs. of total digestible nutrients per day for maintenance. In addition, she needs .05 lb. of protein and 136 lbs. of total digestible nutrients for each lb. of milk produced daily. Example:

	<u>Digestible Protein</u>	<u>Total Digestible Nutrients</u>
Maintenance	.6	6.65
Milk Production -(40x.05)	<u>2.0</u>	<u>14.40</u>
Total requirements	2.6	21.05

for  
FEED SALES AND SERVICE

UNIT: Formulating Rations

TOPIC: Formulating Rations for Dairy Heifers

1.
  - a. Plenty of protein
  - b. Protein of good quality
  - c. Enough total digestible nutrients to permit normal growth
  - d. Sufficient minerals, especially calcium, phosphorous and salt
  - e. Liberal amounts of vitamins
  
2. The rumen, or larger part of stomach, does not begin to develop and function for several days and therefore is not able to manufacture some nutrients which older cattle are able to manufacture.
  
3. 

a. Liberal milk feeding	c. Limited milk plus a calf starter
b. Using milk replacers	
	d. Nurse cow
  
4. Because it is nature's formula for starting the young calf. If it is rich in vitamins, protein, and minerals and contains these feeds in proper amount to meet the needs of the calf
  
5. Approximately ten days
  
6. By rubbing some starter or dry feeds on its nose and mouth after each milk feeding
  
7. Dry feed mixture that can be changed to a liquid with the addition of water, and fed as a replacement for milk
  
8. 4 to 6 lbs. daily

UNIT Formulating Rations

TOPIC Formulating Rations for Breeding Beef Cows

1. a. Feeding efficiency  
b. Calf crop percentage  
c. Vigor and size of calf at market time
2. To maintain healthy breeding herd and produce calves higher in weaning weights, and more health and vigor. Calves are marketed younger now, therefore much of the early development is through the breeding cows nutritional program.
3. No, excessive fattening is expensive and the producer is not paid any extra for the excess.
4. Yes, when a good quality legume hay is the source.
5. Yes
6. a. Size of cow                      c. Condition of cow  
b. Feeds being fed                d. Conditions of feeding
7. Vitamins and minerals
8. Digestible protein -- .65-.70 lb.  
Total digestible nutrients -- 6.9-9.7 lb.

FEED SALES AND SERVICE

UNIT Formulating Rations

TOPIC Formulating Rations for Fattening Cattle

1. a. Margin or higher price per lb.  
b. Gain  
c. Manure value
2. Corn                      Oats                      Grains sorghums
3. Cottonseed meal
4. Legume or grass and legume mixture
5. a. Gains are cheaper.  
b. Less labor required  
c. Manure well distributed  
d. No shelter or special equipment required
6. 

	<u>Per head lbs daily</u>
Digestible protein	1.18-1.32
Total digestible nutrients	10.7-12.3
7. Urea is a synthetic nitrogen compound, that cattle can convert to protein. It is used to make rations cheaper.
8. Hormones are materials secreted by glands in animals body that affects growth and development and fattening. It can be produced synthetically or artificially
9. Antibiotics cuts down on internal infections; thus allowing greater gains at cheaper cost
10. A low roughage, high energy ration.

FORMULATING RATIONS FOR BREEDING BEEF COWS

Student: \_\_\_\_\_ School: \_\_\_\_\_

Date: \_\_\_\_\_ Score: \_\_\_\_\_

**PART I: Fill in the blanks:**

1. The breeding beef herd must be kept as \_\_\_\_\_ as possible.
2. Good \_\_\_\_\_ is a vital key in economical beef production.
3. Calves are \_\_\_\_\_ earlier, therefore well balanced rations are important.
4. \_\_\_\_\_ fattening is expensive.
5. Three things important to consider in feeding the breeding herd are:
  - (a) \_\_\_\_\_.
  - (b) \_\_\_\_\_.
  - (c) \_\_\_\_\_.
6. Winter feeding sometimes causes deficiencies in \_\_\_\_\_ and \_\_\_\_\_.
7. Calf crop \_\_\_\_\_ is greatly affected by the rations for the breeding beef cow.
8. Cows can be fed in winter on \_\_\_\_\_ alone, but it must be a good quality \_\_\_\_\_ hay.

FORMULATING RATIONS FOR FATTENING CATTLE

Student: \_\_\_\_\_ School: \_\_\_\_\_

Date: \_\_\_\_\_ Score: \_\_\_\_\_

PART I: Place a check under T for true or under F for false for each of the following statements.

- | <u>T</u> | <u>F</u> |   |
|----------|----------|---|
| _____    | _____    | 1. Cattle fattening requires little risk or capital outlay.                         |
| _____    | _____    | 2. Margin and gain are two sources of profit in beef fattening.                     |
| _____    | _____    | 3. Hormones and urea does not have to be fed cautiously or require thorough mixing. |
| _____    | _____    | 4. Pasture fattening is very expensive.   |
| _____    | _____    | 5. All grains may not be fed successfully to cattle.                                |
| _____    | _____    | 6. Urea may be substituted for part of the protein in ration for economy.           |
| _____    | _____    | 7. Silage is a dry roughage.  |
| _____    | _____    | 8. Cattle should be placed on feed slowly and gradually.                            |
| _____    | _____    | 9. Older cattle make more gain per 100 pounds of feed fed.                          |
| _____    | _____    | 10. Fattening cattle as yearlings utilizes more roughage.                           |

FORMULATING RATIONS FOR BREEDING EWES

Student: \_\_\_\_\_ School: \_\_\_\_\_  
Date: \_\_\_\_\_ Score: \_\_\_\_\_

PART I:

1. Name five feeds commonly fed breeding ewes.

a. \_\_\_\_\_

b. \_\_\_\_\_

c. \_\_\_\_\_

d. \_\_\_\_\_

e. \_\_\_\_\_

2. How is the feeding of sheep similar to that of cattle? \_\_\_\_\_  
\_\_\_\_\_.

3. Determine need for a pregnant ewe, weighing 110 pounds, 6 weeks before lambing. (use Feeds and Feeding, abridged, eighth edition.)

FORMULATING RATIONS FOR FATTENING LAMBS

Student: \_\_\_\_\_ School: \_\_\_\_\_

Date: \_\_\_\_\_ Score: \_\_\_\_\_

PART I: Fill in the blanks:

1. Lambs dropped in the fall and pushed to market in 6 to 12 weeks and weigh in 30 to 60 pounds are called \_\_\_\_\_ lambs.
2. \_\_\_\_\_ makes up a large part of the lamb's ration.
3. A "creep" is a \_\_\_\_\_ with \_\_\_\_\_ available at all times.
4. Lambs on full feed usually eat \_\_\_\_\_ pounds of hay and \_\_\_\_\_ pounds of concentrates per head daily.
5. The most economical lamb fattening ration \_\_\_\_\_ percent concentrates and \_\_\_\_\_ percent legume hay.
6. \_\_\_\_\_ of a pound gain per day is the grain that might be expected to be average.
7. The feed requirements for 100 pounds of gain on lambs is \_\_\_\_\_ to \_\_\_\_\_ pounds of grain and \_\_\_\_\_ to \_\_\_\_\_ pounds of legume hay.
8. Using Feeds and Feeding, Morrison, eighth edition; give the digestible protein and total digestible nutrients for a 60 lb. lamb.

FORMULATING RATIONS FOR BROOD SOWS

Student: \_\_\_\_\_ School: \_\_\_\_\_

Date: \_\_\_\_\_ Score: \_\_\_\_\_

Place a check under T for true or under F for false for each of the following statements:

   T       F

- 1. The brood sow must have proper feeding to produce thrifty litters.
- 2. Swine have the same type of digestive system as cattle.
- 3. Sows must use their feed for maintaining their body and producing pigs.
- 4. One requirement for rations for brood sows is for the ration to be in amounts not to cause over fattening.
- 5. Swine grow more rapidly than other livestock.
- 6. Rations for sows must be self fed.
- 7. The corn-hog ratio is number of bushels of corn required to buy 100 lbs. of pork.
- 8. Sows do not need pasture and plenty of exercise.
