THE SCOVILL MANUFACTURING COMPANY AND UAW LOCAL 16D4 OF WATERBURY, CONNECTICUT JOINTLY SPONSORED A RETIREMENT EDUCATION FROGRAM FOR ALL EMPLOYEES OVER 55 YEARS OF AGE. TRAINING LEADERSHIP FROM MANAGEMENT AND THE UNION TO CONDUCT PROGRAMS ON COOPERATIVE BASIS. THIRTEEN DISCUSSION LEADERS AND 13 COMPANY AND COMMUNITY RESOURCE PERSONS TOOK PART IN THE LEADERSHIP TRAINING PROGRAM. A GROUP OF OLDER EMPLOYEES VOLUNTEERED TO TAKE PART IN THE DEMONSTRATIONS. THE TWO-WEEK TRAINING FROGRAM HAD FIVE PHASES -- (1) ORIENTATION (BACKGROUND INFORMATION ON THE AGING PROCESS, PROGRAM OBJECTIVES), (2) DEMONSTRATION (RETIREMENT EDUCATION PROGRAM CONDUCTED BY AN EXPERIENCED LEADER EVALUATED BY TRAINEES), (3) PRACTICE (LEADERS IN TRAINING CONDUCTED DISCUSSIONS IDENTICAL TO THE DEMONSTRATION), (4) PROGRAM DEVELOPMENT (PLANNING FUTURE PROGRAMS), AND (5) EVALUATION (PRE- AND POST-TRAINING QUESTIONNAIRES TO ASSESS TRAINING RESULTS). IMMEDIATELY FOLLOWING THE TRAINING PROJECT, SIX LEADERSHIP TEAMS LAUNCHED THEIR FIRST PROGRAMS AND COMPLETED 12 EIGHT-WEEK PROGRAMS FOR 100 OLDER EMPLOYEES AND THEIR SPOUSES. (APPENDIXES ARE ROSTERS, TRAINING SCHEDULE, COMMITTEE WORK SHEETS, AND THE EVALUATION QUESTIONNAIRES.) (AJ)

Foreword

Cooperation has become a lively issue in all modern-day economic, social, and political relationships. In any event, one hears a great deal nowadays about the benefits of cooperation, and, as a matter of fact, a new kind of social science is being developed which concerns itself with relationships of people in groups and with conditions which encourage or discourage cooperation between people, organizations, and nations.

Although in this project the primary objective of Scovill Manufacturing
Company and UAW Local 1604 of Waterbury, Connecticut, was to train discussion
leaders for retirement education programs, the project was also intended to create
the basis for the Company and the Union to develop and conduct programs on a
cooperative basis. The record shows that to a considerable degree both of these
objectives were realized. It will surprise no one that people were the most
important element in making initial successes possible.

J. Milton Burrall, Director, Employee Relations, Scovill Manufacturing Company; Ralph Daddesio, President, UAW Local 1604; John W. Moore, Manager, Labor Relations, Scovill Manufacturing Company; and Frank Santaguida, International Representative, Older and Retired Workers Department, UAW, members of the Scovill-UAW Human Relations Committee, deserve credit for the success of the program along with Rocco J. Palladino, Executive Director, Waterbury Area Retired Workers Council, and Charles Rietdyke, Assistant to the Director, Employee Relations, Scovill Manufacturing Company, coordinators for the program, and Charles E. Odell, Director, Older and Retired Workers Department, United Auto Workers (AFL-CIO), who served as consultant throughout the project.

These, then, are the men who deserve primary credit for getting the program underway but there are a good many others who deserve special recognition for their contributions to the training program and for their help as resource persons

in the retirement education programs including Myrtle Babcock, Executive Director, Waterbury Nutrition Council; Robert W. Butler, M.D., Director, Medical Services, Scovill Manufacturing Company; James J. Donahue, Executive Director, Waterbury Housing Authority; Thomas Hogenauer, Manager, Connecticut State Employment Service, and his associate, Ruth Mitkowsky; James E. Moran, Assistant Superintendent, Waterbury Department of Education; Geraldine Novotny, University of Connecticut; Genevieve Ramsey, Assistant Librarian, Silas Bronson Library; Henry J. Tiedemann, Jr., District Manager, Social Security Administration, and his associates, C. Anthony Marafino and Michael Giacondino; and Fred W. Wilson, Manager, Employee Activities, Scovill Manufacturing Company.

The training program could not have provided the same learning experiences had not two groups of Scovill employees participated in demonstration programs.

Their enthusiastic cooperation made it easy to observe firsthand retirement education programs in action. Rocco J. Palladino and members of a Waterbury Area Retired Workers Council Center also made it possible to study an activity center program for older people.

Rarely has there been the opportunity to work with a more dedicated group of people than those from management, union, and the community who took part in the Scovill-UAW retirement education training project. Their willingness to work long hours in order to learn how to conduct retirement education programs will not readily be matched. At this writing they have completed 8-week programs for 12 different groups of Scovill employees with considerable success.

Finally, a project of this sort could not have been achieved without the encouragement and full endorsement of Malcolm Baldrige, President, Scovill Manufacturing Company, and Walter Reuther, President, United Auto Workers (AFL-CIO).

Woodrow W. Hunter, Training Program Leader The University of Michigan Ann Arbor, Michigan March, 1965

T. INTRODUCTION

The Scovill-UAW Innovation

Although retirement education was conceived and offered originally in a university setting, it is now offered in many settings including public school adult education departments, university extension services, libraries, YMCA's, churches, governmental agencies, labor unions, and industries. In fact, sponsorship has become so diverse in the past 15 years since the first program was offered at a Midwest university that questions have been raised about responsibility for educating adults for the retirement years. Is it industry's responsibility? Is it public education's responsibility? Is it labor's responsibility? Whose responsibility is it?

Some observers contend that it makes little difference how many or what kinds of organizations do the job as long as the job gets done. But this is the problem: the job is not being done in many communities; and, often, the quality of the programs being offered leaves something to be desired.

For these and other reasons the position has been taken that primary responsibility for retirement education rests with public educational institutions and that public education should seek the closest cooperation and assistance from other agencies in the community. For some time, now, it has also been recognized that considerable impetus might be generated were management and labor cooperatively to take the initiative in a community and encourage other agencies including public education to become involved. However, there have been no substantial attempts to realize this objective, that is, until the Scovill Manufacturing Company and UAW Local 1604 of Waterbury, Connecticut, made the decision to sponsor jointly a retirement education program for all Scovill employees 55 years of age and older. Moreover, the Scovill-UAW program, to the extent that it trained its

own leadership from management and union to conduct programs on a cooperative basis, is truly an innovation in American retirement education.

The purpose of this report is to trace the beginnings of the Scovill-UAW innovation and to describe its development in enough detail to permit its replication by other interested groups.

Important Beginnings

Certainly, the foremost contingency in the realization of a cooperative project of this or any other kind is that the parties involved have respect for each other and want to cooperate. The record shows that for some time the labor relations climate at Scovill has been conducive to cooperation rather than conflict. In addition, during contract negotiations in 1963 a Human Relations Committee comprised of representation from management and labor was created to facilitate discussion of topics of mutual interest away from the bargaining table. The question of management-labor cooperation in a retirement education program was among the first projects to be considered by the Human Relations Committee.

To help develop the first Scovill-UAW program the Human Relations Committee turned to Charles Odell and the Older and Retired Workers Department of United Auto Workers (AFL-CIO) for advice and information and in conjunction with the Department made the following basic decisions before initiating the program:

- 1. that expenses of the programs would be shared jointly by the Company and the Union;
- 2. that leadership teams made up of company and union personnel would be trained by the Division of Gerontology of The University of Michigan to conduct Scovill-UAW programs;
- 3. that The University of Michigan preparation for retirement program and materials would be used;
- 4. that all Scovill employees 55 years of age and older, salaried and hourly-rated, and their spouses would be eligible for the program;

- 5. that employee participation would be on a voluntary basis;
- 6. that the program would be offered one-half on company time and one-half on the employee's time;
- 7. that leaders from various community groups including public school adult education, public library, social security, public employment service, public health, and public housing would be invited to participate in as much of the leadership team training program as possible to familiarize them with the program and to facilitate their participation as resource persons in subsequent programs;
- 8. that the jointly sponsored Scovill-UAW retirement education program would be titled "Looking Forward to Retirement;"
- 9. that all levels of leadership in the Union and in the Company would be made fully aware of the objectives and methods of the program and encouraged to help promote it among older employees.

Having made these decisions, the Committee turned its attention to promoting the program and to assessing reactions to it. The higher echelons of management and labor were represented on the Human Relations Committee and, accordingly, were well informed from the beginning. There remained, however, the important task of bringing together leaders from the community and foremen and stewards and inviting them to share the task of promoting the program. The Committee also brought together representatives from the local press, radio, and television and made arrangements to have them publicize various aspects of the program including a mass meeting of all interested employees for purposes of finding out about the program and indicating their desire to participate. The mass meeting was attended by 350 employees and their spouses, approximately half of all Scovill employees 55 years of age and older employed in the Waterbury plants. Personal invitations sent to the homes of all employees 55 years of age and older, 4' x 8' posters displayed in the plants, articles in the Scovill Bulletin, the endorsement

of the program by union and company leaders, outstanding coverage by local mass media, and personal contacts by foremen and stewards undoubtedly played a part in developing the unusual amount of employee interest that was shown.

A large proportion of the 350 employees and their spouses who attended the mass meeting were enthusiastic about the program and indicated their desire to participate. Employees who could not attend the mass meeting also made their interest known. Thus, following the exploratory meeting there was very little question about employee reaction and plans were made immediately to conduct the leadership training program. I

II. THE LEADERSHIP TEAM TRAINING PROGRAM

Participants in the training program were of two kinds: 1) prospective discussion leaders from management and labor who following the training program agreed to conduct retirement education programs (see Appendix A) and 2) older Scovill employees who volunteered to take part in demonstration and practice programs so that those in training could observe and practice leadership skills required to offer programs.²

Characteristics of Leaders in Training

The thirteen discussion leaders who were selected for training, six from management and seven from the union, ranged in age from 36 to 62 years of age.

There was only one woman among them. In addition, thirteen leaders from the community and two others from the Company took part in various aspects of the training

²More will be said about the demonstration and practice groups in the section on training methods. The demonstration program was conducted by an experienced leader while the leaders in training observed and criticized. The practice program was conducted by the leaders in training while the staff and other leaders observed and evaluated.

See Scovill Manufacturing Company and UAW Local 1604, "Looking Forward to Retirement," Waterbury, Connecticut: The Company and Union, 1964. This is an excellent pictorial presentation of the various steps taken in the initial development of the program.

project in order to learn their roles as resource persons but their participation, of necessity, was not as intensive as that of the Company and Union discussion leaders (see Appendix B). There were eight men and five women among the community and Company resource persons. Altogether, then, there were twenty-six persons who took part in the leadership training program.

The positions which the twenty-six leaders from the Company, Union, and community occupied are shown in Table 1. The listing of positions shows the

outstanding leadership which the Company, the Union, and the community made available for a cooperative Scovill-UAW retirement education program.

Characteristics of Older Employees in Pilot Programs

The other important participants in the leadership team training program were the older Scovill employees who volunteered to take part in the demonstration and actice retirement education programs, and thereby give the leaders in training opportunity to observe and practice program skills. One contribution of the pilot groups to the ongoing program was not anticipated, namely, their enthusiastic support and promotion of the program among other employees.

Characteristics of the participants in the demonstration and the practice programs are shown in Table 2. The two groups were similar in most respects

including their age and sex composition, marital status, place of birth, and years of school completed. There was more occupational diversity, however, in the demonstration than in the practice group (see Appendix C), and the demonstration group appeared to be somewhat further away from retirement than the practice group. Approximately half of each group had not decided about a retirement date. Training Objectives

The primary objective of the two-week training program was to develop leadership for retirement education programs which were to be offered to all employees of Scovill Manufacturing Company at Waterbury, Connecticut. However, in order to conduct the programs on a cooperative basis it was decided more specifically to train leadership teams made up of company and union personnel. A goal was established of training a minimum of six leadership teams, each team made up of one person from management and one person from labor. The need for as many as six leadership teams to conduct programs was underscored by the fact that there were approximately 1,000 employees in the Waterbury divisions of Scovill who were 55 years of age and older and eligible for the program.

Content and Methods

The two-week training program was divided into several phases--1) orientation, 2) demonstration, 3) practice, 4) program development, and 5) training evaluation (see Appendix D):

The Orientation Phase. During the first two days efforts were concentrated on presenting background information about the meaning of work and retirement, the social, psychological and physical aspects of aging, and the relation of the older individual to the community in which he lives. The orientation phase also included a ceries of presentations related specifically to the practical aspects of planning and conducting preretirement education programs. For the most part the orientation phase depended upon the lecture

method. However, time was scheduled for group discussion following the presentations, and leaders in training were encouraged to develop some preliminary guidelines for program development based on the presentations and discussions.

The orientation phase was also concerned with increasing an understanding of objectives, with developing an organization and ground rules for the training program, with giving participants the opportunity to select specific assignments, and with encouraging the maximum amount of cooperation between the leaders in training. Arrangements were made for the training group and staff to eat lunch together each day so that additional time was available for special events of significance to the over-all training objective such as orientation of resource persons, reports to company and union officials, community leaders, and persons representing the press, radio, and television, and preparation of a local television presentation covering the training program.

The Demonstration Phase. Following the orientation phase six days were devoted to demonstration and practice phases. During the morning of each of the six days the staff conducted a demonstration program with a group of Scovill employees on the following topics (see Appendix E):

- a. Work and Retirement -- An Introduction to the Program
- b. Physical and Mental Health
- c. Family, Friends, and Living Arrangements
- d. Financial Planning
- e. Legal Affairs of Older People
- f. The Good Use of Leisure Time and Summary

While the demonstration program was being conducted the leaders in training served on one of three committees in order to observe and evaluate various aspects of the program:

a. Arrangements Committee. Members of this committee assisted the discussion leader for the demonstration program by arranging the meeting

room, setting up and operating projection equipment, serving refreshments, helping the older people become better acquainted; and they observed and evaluated these kinds of factors in relation to the reactions of the participants and the progress of the program.

- b. Leadership and Member Participation Committee. Members of this committee were responsible for observing and evaluating the discussion leader and resource persons and the techniques they employed to promote learning, group discussion, and decision-making. The quantity and quality of participation by the older people in the demonstration program were also assessed by members of this committee.
- c. Program Materials Committee. In conducting the demonstration a variety of reading and visual materials was used. The function of the program materials committee was to scrutinize all materials carefully beforehand and to evaluate their effectiveness during the program.

Following each session of the demonstration program the three committees were given time to discuss their observations and prepare a verbal report for presentation to the training group as a whole. Outlines were issued to each committee to guide development of observational and reporting plans and procedures (see Appendices F, G, H).

In sum, therefore, the six-session demonstration program provided the opportunity to learn by observing and evaluating a retirement education program conducted by an experienced leader.

The Practice Phase. During the afternoon of each of these six days leaders in training took responsibility for conducting an identical group discussion retirement education program with a different group of Scovill employees.

Responsibility for the practice sessions was assumed jointly by a leadership

team made up of representatives from the Company and the Union. In all sessions, however, one of the team members served as the discussion leader while the other member of the team helped to plan the meeting, make necessary arrangements, or served as a resource person for the discussion. During the practice phase the staff observed and evaluated the performance of the leaders in training. Moreover, the leaders who were not assigned to conduct the practice sessions were members of the three observational committees mentioned earlier and, thus, augmented their own learning and the observations and evaluations of the staff.

The Program Development Phase. As will be noted in Appendix D, this phase of the training took place on the last two days of the program. It was designed primarily to provide full opportunity to develop guidelines and plans for promoting future programs for Scovill employees, and included such things as make a careful review of specific plans of leaders for each session of the retirement education program, determining future needs for program materials, supplies, and equipment, reviewing applications of older employees to participate in programs, determining a schedule for future programs, assigning members to leadership teams, and reporting requirements of future programs to company, union, and community groups.

The Evaluation Phase. The final afternoon of the training program consisted of efforts to evaluate results. "Before" and "after" questionnaires were administered to assess training results, but before we discuss results of the training evaluation let us summarize some of the more important aspects of the training program.

Some Conclusions

Those aspects of the training program which impressed the leaders in training as much as anything else were the opportunity to observe and evaluate a program

in action and to practice various leadership skills. However, to be effective teaching devices and to minimize any adverse effects of having as many as twelve observers in the same room as the discussion group, the demonstration and practice phases require careful planning and execution. Here, then, are some of the more important considerations:

1. Selection of Demonstration Groups. The Scovill-UAW leadership team training project was based on two different pilot groups, one for the demonstration and the other for the practice program. In other training projects the same group has been used for the demonstration and the practice programs. Each approach has its advantages and disadvantages.

When the same group is used one reduces the work required to secure cooperation of two groups of older people in a retirement education program, and discussion leaders in training have fewer unknowns to face when it comes their turn to perform.

The use of different groups, on the other hand, introduces new and different leadership situations and enriches the learning experience.

One of the major disadvantages when using different groups arises from the feeling that the practice group has been "short-changed" on leadership.

2. Orientation of the Demonstration Groups. Although the demonstration and practice aspects of the program should be mentioned when persons are being invited to participate in the pilot programs, there appears to be no need to describe these aspects of the program in any detail. At the first meeting of the retirement education program, however, the leader must be prepared to explain the demonstration situation more fully and to encourage its acceptance by emphasizing the benefits which will accrue as additional leaders are trained. It usually helps, also, to state clearly that the leaders in training are expected to observe but not to enter into the discussion.

- 3. Orientation of Leaders in Training. The leaders will profit from careful instruction on what and how to observe in a discussion group, and if they can be given some practice are ad of time so much the better. In addition, experience shows that movement in and out of the room, gestures, laughing, whispering, talking, and passing of papers should be kept to a minimum. To be on the safe side observers should be in their seats before the meeting, and they should keep from interacting with the group during the discussion, the break period, and after the discussion.
- 4. Physical Arrangements. There appears to be no need to isolate the observers at any great distance from the discussion group as long as the observers maintain quiet and make no effort to interact with members of the discussion group. To maximize opportunity to observe facial expression, to hear what is said, and to assess interaction, observers should be arranged in a circle surrounding the discussion group but far enough away from the discussion group to forestall any tendency for the "inner" group to include the "outer" group in its deliberations. Obviously it takes a good-sized room to make possible ideal arrangements of these kinds.
- 5. Transition in Leadership. Having stressed the importance of a minimum of interaction between observers and participants, the stage is reached when observers change their role to that of discussion leaders. As might be expected, groups differ in their tolerance for new and different discussion leaders. Some of them resent the change and are quick to express their disapproval. Other groups take the change in their stride and even help the new leader over some of the more difficult times in the discussion. In any event, most groups accept the change if the training project director is on hand to smooth over the various transitions in leadership and to assist the leader in training if it appears that he

- cannot by himself handle a situation. Assistance must be given, however, in such a manner that the leader in training is not embarrassed.
- 6. Leader Participation. Active participation of the discussion leaders in all phases of the project was considered the primary prerequisite of a successful training program especially because the major goal of the training was to make possible effective teamwork for future programs. Accordingly, the leaders were given the opportunity on the first day of the project to discuss and revise training plans. Thereafter during the various phases of the training the leaders were given primary responsibility for evaluating everything that transpired including their own performances.

In addition, some of the leaders had the opportunity to plan and take part in a local television program and all of them took part in a field trip for purposes of evaluating an activity center program for older people in Waterbury (see Appendix I).

III. RESULTS OF THE LEADERSHIP TRAINING PROGRAM

Expectations of the Training Group

The first morning of the training program, before anything else had been done, the leaders were asked to fill out a questionnaire which among other things asked them to list the benefits they expected to derive from participation in the training program (see Part I, Item 8, Appendix J). Table 3 summarizes their responses and shows that everyone was concerned with learning how to conduct a retirement education program and, in addition, all but three of the leaders wanted to acquire a better understanding of older people and their problems. It is quite possible that these particular two objectives were closely related in the minds of the leaders.

Table 3. Anticipated Benefits From the Leadership Team Training Program.

Kinds of Benefits	Number of Times Mentioned (n-13)
To learn how to conduct a retirement education program To understand older people and their problems better To achieve closer working relationships between management	13 10
and union	3
To increase my knowledge in general	3
To help me prepare for my own relirement	1
To acquire a better knowledge of community resources	1

TOUGIT	

Reactions to the Training

A post-training program questionnaire was administered during the final phase of the project and leaders in training were asked to react to several aspects of the training program (see Part I, Items & through 15, Appendix K). First, as indicated in Table 4, the leaders were asked to list things which they liked most

Table 4. Things Which the Leaders Liked Most About the Training Program.

Things Liked Most	Number of Times Mentioned (n-13)
The friendly and cooperative atmosphere during the training program	6
"feeling of warmth and friendship shown by all" "enthusiasm and cooperation of all concerned" "the emphasis on teamwork and cooperation" "the easy give and take of the trainees" "the way people cooperated" "the opportunity it provided for association and working together"	
Interest and participation of the leaders in training "sincere interest of participants" "I enjoyed the active group participation" "the outstanding manner in which the group took part i the discussion" "the leaders' interest and participation"	Ц n

Table 4. (cont'd)

Things Liked Most	Number of Times Mentioned (n-13)
The kinds and amounts of information The opportunity to evaluate a "live" program The program opened up a new field and challenge The opportunity to learn firsthand what retirement means to people The satisfaction of seeing the program take shape The opportunity for each of us to develop our own style The performance of the resource people	2 2 1 1 1 1
Total	19

about the training project, and in view of training objectives it is especially interesting to see that all but three of the leaders emphasized the friendly or cooperative atmosphere which prevailed during the training project and the interest and participation of the leaders in training. Presumably these two results are interrelated.

Table 5 shows what it was the leaders liked least about the program.

Leaders mentioned the lack of time to cover the various aspects of the program

Table 5. Things Which the Leaders Liked Least About the Training Program.

Things Liked Least	Number of Times Mentioned (n-13)
The lack of time The redundancy of some observational committee reports The lack of definite guidance at times Disliked nothing	7 1 1 5
Total	14

more often than any other dislike and, accordingly, as shown in Table 6, additional time was suggested more often than anything else to improve the training program.

Table 6. Things Which the Leaders Suggested to Improve the Training.

Suggestions for Improving the Training	Number of Times Mentioned (n-13)
Allow more time for the program Give leaders more training Prepare a directory of community resources for use of	6 3
leaders and older people Review and evaluate the program after everyone has served as a leader Orient resource people better Streamline the material Make greater use of visual aids Encourage greater participation of older people	1 1 1 1
Total	15

The leaders were also asked to indicate in what ways participation in the training program gave them a better understanding of older people and retirement (see Part I, Items 8 and 9, Appendix K). In this respect almost everyone had something to say. Here, then, are some of their comments:

- "I became aware of their (older people) problems and attitudes."
- "I learned new information about older people."
- "I heard firsthand how older people feel about retirement."
- "I feel a closer relationship to older people and their problems."
- "I found out older people can be interesting."
- "I was amazed at their willingness to talk over their problems."
- "I realized I am growing older too."

A great deal of retirement education material was made available for the leaders to read and study. Two of the leaders said they read all of it; seven,

about half of it; and four, some but not half of it. All of the leaders reported they wanted to use the material in retirement education programs they planned to offer. In general, the leaders endorsed the training by saying that they thought the time was well spent. However, all but one of the leaders said they hoped to have additional follow-up training. Thus, there are plans upon completion of the first cycle of preretirement education programs to evaluate results and offer whatever additional training is needed.

Self-Evaluation of Leadership Skills

The training program provided the opportunity to observe and, more importantly, to practice a number of leadership skills which, it was assumed, are required to plan, organize, conduct, and evaluate retirement education programs. Table 7 summarizes these skills and the leaders' self-estimate of proficiency in

Table 7. Self-estimate of Proficiency in Leadership Skills for Retirement Education Programs.

them at the beginning and again upon completion of the training program. In all instances, leaders estimates changed in the desired direction. There was, however, greater improvement in skills associated with program methods than with skills associated with program organization and program evaluation.

Readiness of Leaders to Develop Programs

Several items of the pre- and the post-training questionnaires were designed to determine whether the students thought themselves prepared to conduct retirement

b"Strongly Agree" and "Agree" were combined.

c"Strongly Disagree" and "Disagree" were combined.

dFive of these persons changed from "Agree" on the pre-test to "Strongly Agree" on the post-test.

education programs and whether they intended, in fact, to do so. Table 8 presents these items and the leaders' responses to them. Responses to item 4 show the

aSee Part II of Appendix K: Postworkshop Questionnaire.

leaders expected the training program to make them better discussion leaders for a retirement education program and that the training program did, as a matter of fact, improve their skills. Table 8, item 5, also shows whereas only four of the leaders felt adequately prepared initially to conduct a discussion program, ll of them felt adequately prepared after taking part in the training.

b"Strongly Agree" and "Agree" were combined.

c"Strongly Disagree" and "Disagree" were combined.

IV. SPECIAL CONSIDERATIONS

The training program appears to have achieved a number of worthwhile results: almost all of the leaders from company and union felt confident in their ability to serve as discussion leaders and together with a number of community and company resource persons they appeared to have worked out effective cooperative roles for retirement education programs. Immediately following the training project six leadership teams launched their first programs, and in a few months' time they had completed a total of 12 8-week programs for approximately 100 older employees and their spouses. The initiation and successful completion of programs is probably as good a test of the effectiveness of the training project as anything else.

Despite these gains it was agreed that much more must be done to realize a total community approach to retirement education in Waterbury, Connecticut. At the present time the major responsibility has been assumed by a labor union and a company to offer a program only to their own constituents. During the course of the training project, however, the Assistant Superintendent of Schools stated he was willing to make an investment in the program, especially if this would mean that anyone interested in retirement education would have the opportunity to participate.

Everyone agreed that more time should have been devoted during the training program to reading and study, and to additional discussion of retirement education methods. It was also generally agreed that the number of consecutive hours spent in training each day should have been reduced. To achieve training objectives in a two-week period, it was necessary to commence training at eight-thirty in the morning and for some people to continue training uninterruptedly until nine or ten o'clock in the evening. Under these circumstances an intervening weekend for rest and relaxation was extremely important.

Having the noonday meal together, although not planned originally as part of the training program, yielded many benefits including the opportunity for everyone to become better acquainted, to discuss progress with company, union, and community leaders who were not directly involved in the project, to brief community leaders who were to take part as resource people in the program, to prepare publicity for the press, and to develop a script for a local television show. Of all these benefits, however, the most impressive one was the cooperation and friendliness which the luncheon hour promoted.

Finally, the group decided that as soon as everyone has had experience as a discussion leader in a retirement education program, there should be a somewhat shorter review and evaluation session. In the meantime, plans were made for the co-discussion leaders on the leadership teams to help the discussion leader assess each session and make appropriate changes during the program.

Having invested so much of their time and energy in a training program, participants from the Company, the Union, and the Community have good reason to feel a great deal of pride in having launched a quality retirement education program for Scovill employees. They also have good reason to feel pride in having pioneered a cooperative approach to retirement education. Hopefully, their achievements will serve as a model for further developments in Waterbury and in other communities where questions are arising about responsibility for preparation for retirement.

LEADERSHIP SKILLS AND MEMBER PARTICIPATION COMMITTEE

Date _____

		Name
disc whic	purpose of this worksheet is to help you oussion leader, the manner in which he cond he used and results he achieved, and, a rvations of the manner in which the member discussion, and the changes that took pla	lso, to help you organize your rs of the group participated in
	What to Observe	Your Evaluation
I.	Preparation for the Meeting	
	 Were the people seated so they could talk to each other easily? Was the comfort of members considered from the standpoint of lighting, acoustics, temperature, distracting noise, stairs and bathroom facilities? Had the leader prepared for the meeting? Knew something about members. Had objectives clearly in mind. Was able to clearly state objectives. Had a discussion plan in mind. 	
II.	Opening the Meeting	
	 What was done to welcome members? Were members introduced to each other and were they encouraged to learn each other's name? How? What about the length and content 	
	of the introduction? 4. Did it create interest and antici-	
	pation? 5. Did the leader give members the opportunity to express expectations and interests?	
III.	Developing Discussion	
	 What techniques did the leader use to develop discussion? Did the leader succeed or fail to stimulate discussion? Why? 	

Your Evaluation What to Observe 3. How did the leader behave toward mema. Friendly or reserved. b. Domineering or democratic. c. Rejecting or accepting. d. Humorously or seriously. e. Calmly or nervously or insecure. f. Understandingly or lacking in understanding. g. Willing to listen or did all the talking himself. h. Appeared to like members or didn't like home i. Respected members or showed disrespont, j. Talked down to group, Quantity of Discussion 1. How many pre-redirees were at the meeting? 2. How many different pre-retirees took part in the discussion V. Quality of Discussion 1. Did the chrussian flow back and forth within the group? 2. Was the discussion primarily between leader and individual members? 3. How did the members react to the leader? 4. How did members react to each other? 5. Did some member(s) monopolize the discussion' 6. What did you observe about the nontalkers? 7. Do you think the member: learned anything from its discussion? 8. Were members assistled with their part in the meeting? 9. Did any of the members initiate discussion on the in own? 10. Did members on the group discipline each other? 11. Did the members stay on the topic?

12. Did the members seem relaxed?

IV.

What to Observe

Your Evaluation

VI.	Closing the Meeting	
	 Did the leader summarize the meeting? Did he prepare members for the next meeting? 	
	3. Did the members appear eager to come to the next meeting?	
	4. What was done to create anticipation for the succeeding meetings?	
VII.	General Observations	
	A. From the standpoint of the leader- ship: 1. What were the weak points of	
	this meeting?	
	2. What do you think were the strong points?	
	3. What improvements would you sug- gest making at the next meeting?	
	4. Did the leader appear to learn anything from results of previous meetings?	
	B. From the standpoint of member participation:	

- 1. What were the weak points of this meeting?
- 2. What were the strong points?
- 3. How would you improve member participation at the next meeting?
- 4. Was participation at this meeting different from participation in previous meetings?

WORKSHEET FOR PROGRAM MATERIALS COMMITTEE

The purpose of this worksheet is to help you identify and assess the various kinds of materials which were used during the meeting.

I.	Program	Materials

1.	What types of materials were employed? (List the different kinds of materials and evaluate the use of each of them.)	
	a.	
	b.	
	c.	
	d.	
	e.	
2.	What methods were used relative to the various kinds of materials?	
3.	What evidence was there during the meeting that the participants were interested in the materials?	
4.	What evidence was there that the materials provoked discussion?	
5.	What other kinds of materials could have been used effectively during the meeting?	

Appendix I

WORKSHEET FOR OBSERVING ACTIVITY PROGRAM

What to Observe

Your Evaluation

I. THINGS

- 1. What are the physical arrangements?
- 2. What kinds of equipment are available?
- 3. What about accessibility, lighting, washroom facilities, etc.?
- 4. What is the general atmosphere of the meeting place--appearance, decor, etc.?

II. THE PEOPLE

- I. Age of the members.
- 2. What is the sex composition of the group?
- 3. What is physical status of the members?
- 4. Marital status of members.
- 5. To what social strata do members belong?
- 6. Occupational background of members.
- 7. What general appearance (dress, orderliness) do members make? Any differences between men and women?

III. LEADERSHIP

- I. Is the program supervised by paid leadership?
- 2. To what extent do members serve in leadership roles?
- 3. What type(s) of leadership is given to group? (Evaluate the leader(s).)

IV. THE PROGRAM

- 1. Describe following aspects of the program:
 - a. Objectives.
 - b. Frequency.
 - c. Program content.

What to Observe

Your Evaluation

- d. Financial support.
- e. Reactions of members (how they feel about the program).
- f. Formal or informal organization.
- g. Fees or dues.

V. THE GROUP

- I. Describe the following aspects of the group:
 - a. Participation of members.
 - b. Group cohesiveness.
 - c. Mutual assistance among members.
 - d. Friendship patterns.
 - e. Isolates in the group.

VI. RELATIONSHIP OF PROGRAM TO COMMUNITY

- 1. Is the community informed about the program?
- 2. Is there informal and official sanction?
- 3. Is the community (group or individuals) concerned about continuity of the program?
- 4. Who in the community shares responsibility for the center and its program?

Part III Your Choice of a Discussion Leader From Among Workshop Members								
Instructions: Assume that you are responsible for organizing a preretirement education program and for selecting a discussion leader for it. Look over the enclosed list of workshop members and select the person who would be your first choice. Who would be your second choice? Who would be your third choice? Write their names below.								
	First:							
Second:								
	Third:							

Part IV Trainee Evaluations of Other Trainees

Instructions: At one time or another during the program you had the opportunity to observe the following workshop members serving as discussion leaders, reporters, panelists or resource people. What is your over-all evaluation of the kind of job each of them did? Check one rating for each trainee except yourself.
