INDUSTRY WAGE SURVEY--BANKING, NOVEMBER-DECEMBER 1964.

BUREAU OF LABOR STATISTICS (DEPT. OF LABOR)

REPORT NUMBER BLS-1466

PUB DATE NOV 65

EDRS PRICE MF-\$0.25 HC-\$1.72 41P.

DESCRIPTORS- \*OCCUPATIONAL SURVEYS, \*WAGES, \*NATIONAL SURVEYS,  
\*BANKING, OFFICE OCCUPATIONS, FRINGE BENEFITS, SEX  
(CHARACTERISTICS), CLERICAL OCCUPATIONS,

THE RESULTS OF A SURVEY OF WAGES AND SUPPLEMENTARY PRACTICES IN THE BANKING INDUSTRY COVERING 27 STANDARD METROPOLITAN STATISTICAL AREAS AS OF NOVEMBER-DECEMBER 1964 ARE SUMMARIZED. BUREAU FIELD ECONOMISTS, IN PERSONAL VISITS, STUDIED 458 OF 1,286 BANKS EMPLOYING 20 OR MORE WORKERS. THE AVERAGE WEEKLY SALARIES OF WORKERS IN SELECTED NONSUPERVISORY OFFICE OCCUPATIONS WERE GENERALLY HIGHEST IN THE SAN FRANCISCO, OAKLAND, AND CHICAGO AREAS AND LOWEST IN THE PROVIDENCE, PAWTUCKET, ST. LOUIS, AND LOUISVILLE AREAS. WOMEN ACCOUNTED FOR THREE- TO FOUR-FIFTHS OF THE NONSUPERVISORY OFFICE WORKERS IN ALL AREAS EXCEPT NEW YORK, WHERE 45 PERCENT OF THE EMPLOYEES WERE MEN. AMONG THE WOMEN'S JOBS STUDIED, SECRETARIES WERE THE HIGHEST PAID. THEIR AVERAGE PAY RANGED FROM \$100 A WEEK IN THE SAN FRANCISCO-OAKLAND, LOS ANGELES-LONG BEACH, MILWAUKEE, AND NEW YORK AREAS TO APPROXIMATELY \$82 IN THE PROVIDENCE-PAWTUCKET, BALTIMORE, MEMPHIS, AND LOUISVILLE AREAS. AVERAGES FOR ROUTINE FILE CLERKS, USUALLY THE LOWEST PAID JOB STUDIED, RANGED FROM \$66.50 A WEEK IN THE SAN FRANCISCO-OAKLAND AREA TO \$52.50 IN THE MINNEAPOLIS-ST. PAUL AREA. MEN'S AVERAGE WAGES WERE HIGHER THAN WOMEN'S IN THE SAME OCCUPATIONAL CLASSIFICATIONS IN MOST INSTANCES WHERE COMPARISONS WERE POSSIBLE. PAID VACATIONS AND HOLIDAYS WERE PROVIDED FOR THE MAJORITY OF EMPLOYEES. LIFE, HOSPITALIZATION, SURGICAL AND MEDICAL INSURANCE BENEFITS WERE COMMON. IN 19 AREAS, A MAJORITY OF EMPLOYEES WERE ON A 40-HOUR SCHEDULE. SHORTER SCHEDULES WERE THE RULE IN THE OTHER AREAS. THIS DOCUMENT IS AVAILABLE FOR 30 CENTS FROM SUPERINTENDENT OF DOCUMENTS, U.S. GOVERNMENT PRINTING OFFICE, WASHINGTON, D.C. 20402. (PS)

## Preface

This bulletin summarizes the results of a Bureau of Labor Statistics survey of occupational wages and supplementary practices in the banking industry covering 27 selected areas as of November-December 1964. Separate releases for these areas, issued within a few months after the payroll period studied, may be obtained from the Bureau of Labor Statistics, Washington, D.C., 20212, or from any of its regional offices.

The study was conducted in the Bureau's Division of Occupational Pay, Toivo P. Kanninen, Chief, under the general direction of L. R. Linsenmayer, Assistant Commissioner, Wages and Industrial Relations. The analysis was prepared by Joseph C. Bush, under the immediate supervision of L. Earl Lewis. Field work for the survey was directed by the Assistant Regional Directors for Wages and Industrial Relations.

Other reports available from the Bureau's program of industry wage studies, as well as the addresses of the Bureau's six regional offices, are listed at the end of this bulletin.

## Industry Wage Survey—

### Banking, November—December 1964

#### Summary

Average weekly salaries of workers in selected nonsupervisory office occupations in banks were generally highest, where comparisons were possible, in San Francisco—Oakland and Chicago and lowest in Providence—Pawtucket, St. Louis, Louisville, and other southern cities, among the 27 areas studied by the Bureau of Labor Statistics in November—December 1964.<sup>1</sup> Women accounted for from three-fifths to four-fifths of the nonsupervisory office workers, the group from which the occupations were selected for study, in all areas except New York, where 45 percent of the employees were men. Among the women's jobs studied, secretaries were the highest paid in most areas, their average earnings ranged from slightly more than \$100 a week in San Francisco—Oakland, Los Angeles—Long Beach, Milwaukee, and New York to approximately \$82 in Providence—Pawtucket, Baltimore, Memphis, and Louisville. Area averages for routine (class C) file clerks, usually the lowest paid job studied, ranged from \$66.50 a week in San Francisco—Oakland to \$52.50 in Minneapolis—St. Paul.

Salary data for the five teller classifications studied were tabulated by length of service. Average weekly salaries in excess of \$100 were recorded in several areas for men tellers (mainly note and commercial tellers) with 5 years or more of service. Where comparisons were possible, tellers with this length of service usually averaged between \$10 and \$20 more than those with less service.

Paid vacations and holidays were provided for the large majority of the employees in each area. Life, hospitalization, surgical, and medical insurance benefits were also common. In 19 areas, banks employed a majority of their workers on a 40-hour schedule; shorter schedules were the rule in the other areas.

#### Industry Characteristics

Employment. At the time of the survey, total employment in banks within scope of the survey in the respective areas ranged from less than 3,000 in Louisville, Memphis, and New Orleans to about 92,000 in New York. Other major areas included Los Angeles—Long Beach (approximately 36,000), Chicago (28,000), San Francisco—Oakland (21,000), Philadelphia (19,000), and Boston (18,000). The six major areas combined accounted for about two-thirds of the 331,397 employees within scope in the 27 areas studied. Employment in 13 areas was between 3,000 and 6,000.

Method of Wage Payment. Salaries for a majority of the nonsupervisory office employees, in 22 of the 27 areas studied, were determined by formal policies providing rate ranges for specific jobs. In 15 of the 22 areas, at least

---

<sup>1</sup> See appendix A for scope and method of survey, and for definitions of areas covered and terms (nonsupervisory office employees, etc.) as used in this bulletin. See appendix B for job descriptions.

three-fourths were employed in banks having formal rate structures. The five areas that did not report formal rate policies for a majority of the employees were: Washington (formal rate policies for 48 percent), Houston (42 percent), and Kansas City (17 percent); and Miami and Indianapolis, where none of the banks visited reported formal rate policies. In these areas, salaries for a majority were determined on the basis of the qualifications of individual employees.

Unionization. Banks which had labor-management contracts covering a majority of their nonsupervisory office workers were found in only 5 of the 27 areas studied (Newark and Jersey City, Dallas, Milwaukee, Portland, and Seattle). In all areas combined, less than 2 percent of the work force were in unionized banks. Milwaukee was the only area in which a majority of all the workers were in such establishments.

### Occupational Earnings

The occupations for which earnings data are provided in table 1 accounted for 35 percent of the 260,393 nonsupervisory employees in banks within scope of the 27-area survey; the five teller classifications together accounted for 15 percent of this employment. As indicated in the following tabulation, the largest number of tellers were employed as commercial-savings tellers, who service customers' checking and savings accounts.

Number of bank tellers, by classification and sex and as percent of all nonsupervisory employees, 27 areas combined

	Both sexes		Men		Women	
	Number	Percent	Number	Percent	Number	Percent
All nonsupervisory employees-----	260,393	100.0	83,568	100.0	176,825	100.0
Tellers—total studied -----	39,737	15.3	11,024	13.2	28,713	16.2
Tellers:						
All-round -----	4,244	1.6	1,213	1.5	3,031	1.7
Note-----	5,399	2.1	1,825	2.2	3,574	2.0
Commercial-savings -----	16,289	6.3	3,534	4.2	12,755	7.2
Commercial -----	7,834	3.0	2,938	3.5	4,896	2.8
Savings -----	5,971	2.3	1,514	1.8	4,457	2.5

Two-thirds of the men and a similar proportion of the women classified as tellers had less than 5 years of service with the bank in which employed.

Average weekly salaries of women employed as commercial-savings tellers with less than 5 years of service ranged from \$79.50 in Chicago to \$55.50 in Providence-Pawtucket. In 10 of the 27 areas, the average for this classification was between \$70 and \$75; in 12, between \$60 and \$70. Women in this occupation with 5 years or more of service averaged at least \$10 a week more than those with less service, in most areas.

Note tellers, who perform operations required for the collection of exchange charges and payments on notes, drafts, rents, and contracts for deeds, had higher average weekly earnings than commercial-savings tellers in most cases where comparisons were possible. The pay relationships between the various teller classifications studied, however, were by no means consistent

among the areas. In some areas, averages for these classifications were closely grouped. In Chicago, for example, averages for women with less than 5 years of service ranged from \$72.50 a week for all-round tellers to \$79.50 for commercial-savings tellers.

Proof-machine operators, mostly women in all areas, were numerically one of the larger occupations studied. These workers (who sort checks, debits, credits, and other items) usually averaged less than tellers and, in all areas where comparisons were possible, more than routine file clerks (class C), generally the lowest paid occupation. Secretaries were usually the highest paid women's job, with averages ranging from slightly more than \$100 a week in San Francisco-Oakland, Los Angeles-Long Beach, Milwaukee, and New York to about \$82 in Baltimore, Louisville, Memphis, and Providence-Pawtucket.

Men averaged more than women employed in the same occupational classification in most instances where comparisons were possible. As indicated in the following tabulation of averages for two teller classifications in five areas, the amount of this difference varied by occupation and area.

Area	Commercial-savings tellers			Note tellers		
	Men	Women	Difference	Men	Women	Difference
Atlanta -----	\$82.50	\$83.50	-\$1.00	\$86.50	\$83.00	\$3.50
Chicago-----	102.50	89.00	13.50	117.00	88.00	29.00
New York -----	97.00	89.50	7.50	100.50	95.00	5.50
San Francisco--						
Oakland -----	100.00	91.50	8.50	107.50	100.50	7.00
Washington-----	97.00	87.50	9.50	97.00	96.00	1.00

Differences in average pay levels for men and women in the same job and area may be the result of several factors, including variations in the distribution of the sexes among establishments with disparate pay levels. In some banks, women averaged as much as or more than men in the same occupational classification. The pay differences may also reflect minor differences in duties. Job descriptions used to classify workers in wage surveys are usually more generalized than those used in individual establishments because allowance must be made for minor differences among banks in specific duties performed. Also, to the extent that individual salaries are adjusted on the basis of length of service, longer average service for one sex can result in higher average pay when both sexes are employed within the same salary range. As pointed out previously, time-rated systems providing a range of rates for a specific occupation were widespread in the industry.

Reflecting in part the predominant use of formalized wage structures with a range of rates, individual salaries of employees varied considerably within the same occupational classification and area (tables 2-7). As illustrated in the following tabulation for proof-machine operators in five areas, this variation was so great that the salaries of some employees in areas with comparatively low average salaries exceeded those of some employees in areas with markedly higher averages.

Number of women proof-machine operators  
earning specified salaries in—

	Providence- Pawtucket	Atlanta	Chicago	New York	San Francisco- Oakland
Under \$50-----	1	-	21	-	-
\$50 and under \$60-----	41	34	152	34	7
\$60 and under \$70-----	26	50	482	356	129

\$100 or more-----	-	-	-	-	15
Total number of workers----	76	120	1,185	1,394	558
Average weekly salaries----	\$60.50	\$66.00	\$69.00	\$75.00	\$77.00

### Establishment Practices and Supplementary Wage Provisions

Data were also obtained on certain establishment practices, including women's minimum entrance salaries paid to inexperienced typists and other clerical employees, work schedules, overtime premium pay, and selected supplementary wage benefits such as paid holidays; paid vacations; selected health, insurance, and pension plans; and nonproduction bonuses.

Minimum Entrance Salaries for Women Office Employees. A large majority of the banks surveyed in each of the 27 areas hired inexperienced clerical employees (except typists) under formally established policies governing minimum salaries (table 8). These entrance salaries were usually between \$50 and \$55 a week in 22 of the areas. The salaries of new clerical workers were usually higher in New York, Washington, Chicago, Los Angeles-Long Beach, and San Francisco-Oakland than in other areas where comparisons were possible. Formal minimum entrance salaries for inexperienced typists were not as prevalent. Such provisions were reported for a minority of the banks in seven areas, exactly half in three areas, and a majority in the remaining areas. The entrance salary at a majority of the banks that had formal policies was between \$50 and \$55.

Scheduled Weekly Hours. In 19 of the 27 areas, banks employed a majority of their nonsupervisory office workers on weekly work schedules of not more than 40 hours (table 9). In 13 of the 19 areas, over nine-tenths had 40-hour workweeks. Shorter workweeks were generally in effect in Boston, Newark and Jersey City, New York, Philadelphia, Baltimore, Louisville, Cincinnati, and St. Louis. Approximately half of the employees in New York, for example, were scheduled to work 35 hours a week.

Overtime Premium Pay. The prevailing overtime pay practice was time and one-half pay after 40 hours a week in all except two areas (including establishments with regular work schedules of less than 40 hours) (table 10). In Memphis and New Orleans, weekly overtime pay for over nine-tenths of the workers was based on the "fluctuating workweek";<sup>2</sup> this principle also applied to between one-fifth and two-fifths of the workers in Dallas, Houston, Kansas City, Louisville, and Washington; and to smaller proportions in seven other areas.

<sup>2</sup> See footnote 2, table 10, for explanation of the "fluctuating workweek" principle.

A majority of the office workers in New York, Los Angeles—Long Beach, Portland, and San Francisco—Oakland were eligible for daily overtime—usually time and one-half after 8 hours (table 11). In 10 areas, a minority received daily overtime.

Paid Holidays. Paid holidays were provided by virtually all of the banks in each area. Prevailing practices ranged from 5 days annually in Atlanta and Memphis to 12 days in Newark and Jersey City and Philadelphia (table 12). All of the employees in New York and more than half of those in Boston and Chicago received 11 paid holidays a year.

Paid Vacations. Provisions for paid vacations after qualifying periods of service were universal in virtually all areas (table 13). The large majority of the workers in all areas were in banks providing 2 weeks of vacation pay after 1 year of service. Three-week paid vacations were commonly provided to employees with 10 years of service in about half of the areas, and to those with 15 years of service in 22 areas. A majority of the employees in 11 areas were in banks providing 4 weeks or more of vacation pay after 25 years of service; in four additional areas between 40 and 50 percent were in establishments that had these provisions.

Health, Insurance, and Pension Plans. Life insurance benefits, financed at least in part by the employer, were available to nine-tenths or more of the employees in all areas (table 14). Hospitalization, surgical, medical, and catastrophe (extended medical) insurance benefits were also available to the large majority of the workers in most areas. The proportion of employees in banks providing paid sick leave ranged from less than a tenth in Atlanta, Memphis, and New Orleans to more than half in nine areas. In nearly all instances, these plans provided full pay (for a specified period of time) with no waiting period.

Retirement pension benefits (other than those available under Federal social security) were provided by banks with more than four-fifths of the employees in 21 areas. The proportions ranged from nearly three-fifths to three-fourths in Chicago, Houston, Kansas City, Miami, New Orleans, and St. Louis.

Nonproduction Bonuses. Nonproduction bonuses, usually paid at Christmas or yearend, were provided by banks accounting for two-thirds or more of the employees in 21 areas, about half in Atlanta, Dallas, and San Francisco—Oakland, two-fifths in Boston, and approximately an eighth in Portland (table 15). None of the banks visited in Memphis provided nonproduction bonuses.

Fluctuating workweek principle <sup>2</sup>	-	-	-	-	11	7	-	38	39	26	91	10	92	25	-	-	-	-	-	-	-	15	-	-	-	-	-	-
Employees in establishments having no formal policy for overtime pay	3	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

<sup>1</sup> Graduated provision; for premium pay are classified under the first effective premium rate. For example, a plan calling for no pay or pay at regular rate after 37 1/2 hours and time and one-half after 40 hours would be considered as time and one-half after 40 hours.  
<sup>2</sup> Under the principle of the fluctuating workweek, pay for overtime work is determined by dividing the weekly salary by the total number of hours worked during the week (to obtain the base hourly rate for the week) and then applying the established overtime pay ratio for overtime hours worked. Thus, the hourly rate of pay for overtime decreases as the number of hours worked increases. For example, an employee with a \$60-a-week salary who worked 45 hours and had an overtime rate of time and one-half for hours worked over 40 would receive his base salary of \$60 and \$3.33 premium overtime pay  $(\$60 \div 45 \text{ hours} = \$1.33, (5 \text{ hours} \times \$1.33) \div 2 = \$3.33)$ . The pay for the same employee working 60 hours in a week would be \$60 and \$10 overtime premium pay  $(\$60 \div 60 \text{ hours} = \$1, (20 \text{ hours} \times \$1) \div 2 = \$10)$ .

NOTE: Because of rounding, sums of individual items may not equal totals.

1 Graduated provisions for premium pay are classified under the first effective premium rate. For example, a plan calling for time and one-half after 8 hours and double time after 10 hours a day would be considered time and one-half after 8 hours.

NOTE: Because of rounding, sums of individual items may not equal 100.

<sup>1</sup> Vacation payments such as percent of annual earnings were converted to an equivalent time basis. Periods of service were arbitrarily chosen and do not necessarily reflect the individual provisions for progressions. For example, the changes in proportions indicated at 10 years of service may include changes in proportions occurring between 5 and 10 years.  
<sup>2</sup> Less than 0.5 percent.

NOTE: Because of rounding, sums of individual items may not equal totals.

29 32 1 5 8 0

## Appendix A. Scope and Method of Survey

### Scope of Survey

The study covered commercial and stock savings banks and trust companies engaged in the business of accepting deposits from the public and extending credit by means of loans and investments, and savings banks operating on a mutual basis, without capital stock (industry 602, Commercial and Stock Savings Banks, and 603, Mutual Savings Banks, as defined in the 1957 edition of the Standard Industrial Classification Manual, prepared by the U.S. Bureau of the Budget). Mutual Savings Banks are located chiefly in the Northeast.

The establishments studied were selected from banks employing 20 workers or more at the time of reference of the data used in compiling the universe lists.

The number of establishments and workers actually studied by the Bureau, as well as the number estimated to be in the industry during the payroll period studied, are shown in the following table.

Estimated Number of Establishments and Employees Within Scope of Survey and Number Studied in the Banking Industry,  
27 Selected Areas, November-December 1964

Area <sup>1</sup>	Payroll period	Number of establishments <sup>2</sup>		Employees in establishments		
		Within scope of survey	Studied	Within scope of survey		Studied

<sup>1</sup> For definition of areas, see p. 28.

<sup>2</sup> Includes only establishments with 20 employees or more at the time of reference of the universe data.

<sup>3</sup> Includes executive, professional, and other employees excluded from the nonsupervisory office employees category.

### Method of Study.

Data were obtained by personal visits of Bureau field economists under the direction of the Bureau's Assistant Regional Directors for Wages and Industrial Relations. The survey was conducted on a sample basis. To obtain appropriate accuracy at minimum cost, a greater proportion of large than of small establishments was studied. In combining the data, however, all establishments were given their appropriate weight. All estimates are presented, therefore, as relating to all establishments in the industry, excluding only those below the minimum size at the time of reference of the universe data.

An establishment for the purpose of this study includes all outlets of a bank in an area. An establishment is not necessarily identical with the company, which may consist of one establishment or more.

### Area Definitions

The areas studied were Standard Metropolitan Statistical Areas as defined by the U.S. Bureau of the Budget in 1961 and include: Atlanta—Clayton, Cobb, DeKalb, Fulton, and Gwinnett Counties, Ga.; Baltimore—Baltimore city and Anne Arundel, Baltimore, Carroll, and Howard Counties, Md.; Boston—76 cities and towns in Suffolk, Middlesex, Essex, Norfolk, and Plymouth Counties, Mass.; Chicago—Cook, DuPage, Kane, Lake, McHenry, and Will Counties, Ill.; Cincinnati—Hamilton County, Ohio, and Campbell and Kenton Counties, Ky.; Dallas—Collin, Dallas, Denton, and Ellis Counties, Tex.; Denver—Adams, Arapahoe, Boulder, Denver, and Jefferson Counties, Colo.; Detroit—Macomb, Oakland, and Wayne Counties, Mich.; Houston—Harris County, Tex.; Indianapolis—Marion County, Ind.; Kansas City—Clay and Jackson Counties, Mo., and Johnson and Wyandotte Counties, Kans.; Los Angeles—Long Beach—Los Angeles and Orange Counties, Calif.; Louisville—Jefferson County, Ky., and Clark and Floyd Counties, Ind.; Memphis—Shelby County, Tenn.; Miami—Dade County, Fla.; Milwaukee—Milwaukee and Waukesha Counties, Wis.; Minneapolis—St. Paul—Anoka, Dakota, Hennepin, Ramsey, and Washington Counties, Minn.; Newark and Jersey City (a combination of the two SMSA's)—Essex, Hudson, Morris, and Union Counties, N.J.; New Orleans—Jefferson, Orleans, and St. Bernard Parishes, La.; New York—New York City and Nassau, Rockland, Suffolk, and Westchester Counties, N.Y.; Philadelphia—Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa., and Burlington, Camden, and Gloucester Counties, N.J.; Portland—Clackamas, Multnomah, and Washington Counties, Oreg.; and Clark County, Wash.; Providence—Pawtucket—the following areas in Rhode Island: Central Falls, Cranston, East Providence, Pawtucket, Providence, and Woonsocket cities and seven towns in Providence County; Narragansett and North Kingston towns in Washington County; Warwick city and three towns in Kent County; all of Bristol County; and Jamestown town in Newport County; and in Massachusetts: Attleboro city and eight contiguous towns in Bristol, Norfolk, and Worcester Counties; St. Louis—St. Louis city and Jefferson, St. Charles, and St. Louis Counties, Mo., and Madison and St. Clair Counties, Ill.; San Francisco—Oakland—Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties, Calif.; Seattle—King and Snohomish Counties, Wash.; and Washington—District of Columbia, Montgomery and Prince Georges Counties, Md., and Alexandria and Falls Church cities and Arlington and Fairfax Counties, Va.

### Employment

The estimates of the number of workers within the scope of the study are intended as a general guide to the size and composition of the labor force included in the survey. The advance planning necessary to make a wage survey requires the use of establishment lists assembled considerably in advance of the payroll period studied.

### Nonsupervisory Office Employees

The term "nonsupervisory office employees," as used in this bulletin, includes nonsupervisory employees such as tellers, general office clerks, office machine operators, and stenographers. All workers engaged in nonoffice functions, such as maintenance and custodial, were excluded.

### Occupations Selected for Study

Occupational classification was based on a uniform set of job descriptions designed to take account of interestablishment and interarea variations in duties within the same job. (See appendix B for these job descriptions.) The occupations were chosen for their numerical importance, their usefulness in collective bargaining, or their representativeness of the entire job scale in the industry. Working supervisors, apprentices, learners, beginners, trainees, handicapped, part-time, temporary, and probationary workers were not included in the occupations selected.

### Average Weekly Hours and Earnings

Average weekly hours were rounded to the nearest half hour and average weekly earnings were rounded to the nearest half dollar. Standard hours reflect the workweek for which employees receive their regular straight-time salaries; earnings correspond to these weekly hours. Cost-of-living bonuses were included as part of the employee's regular salary, but nonproduction bonuses were excluded.

Average weekly earnings for each occupation were calculated by weighting each rate (or weekly earning) by the number of workers receiving the rate, totaling, and dividing by the number of individuals.

### Established Minimum Rates

The tabulation for established minimum rates refer to the entrance rates for women groups: (1) Inexperienced typists, and (2) other inexperienced clerical workers (such as file clerks or junior clerks). For the purposes of this study, inexperienced workers are defined as those who at the time of employment either lack previous work experience or whose previous work experience has little or no transferability to the job for which they are hired. Rates applicable to messengers, office girls, or similar subclerical jobs were excluded.

### Weekly Hours

Data refer to the predominant work schedule for nonsupervisory office workers, regardless of sex.

### Overtime Premium Pay

Provisions for overtime premium pay were considered as applying to all nonsupervisory office workers in an establishment, if half or more of such workers were covered, and nonexistent in an establishment if fewer than half were covered. Weekly overtime refers to work in excess of a specified number of hours per week regardless of the day on which it is performed, the number of hours per day, or number of days worked. Daily overtime refers to work in excess of a specified number of hours a day, regardless of the number of hours worked on previous days of the pay period.

### Supplementary Wage Provisions

Supplementary benefits were treated statistically on the basis that if formal provisions for supplementary benefits and practices were applicable to half or more of the nonsupervisory office workers in an establishment, the practice or benefit was considered applicable to all such workers. Similarly, if fewer than half were covered, the practice or benefit was considered nonexistent in the establishment. Because of length-of-service and other eligibility requirements, the proportion of workers receiving the benefits may be smaller than estimated. Because of rounding, sums of individual items may not equal totals.

Paid Holidays. Paid holiday provisions relate to full-day and half-day holidays provided annually.

Paid Vacations. The summary of vacation plans is limited to formal arrangements, excluding informal plans whereby time off with pay is granted at the discretion of the employer or the supervisor. Payments not on a time basis were converted; for example, a payment of 2 percent of annual earnings was considered the equivalent of 1 week's pay. The periods of service for which data are presented were selected as representative of the most common practices but they do not necessarily reflect individual provisions for progression. For example, the changes in proportions indicated at 10 years of service include changes in provisions occurring between 5 and 10 years.

Health, Insurance, and Pension Plans. Data are presented for selected health, insurance, and pension plans for which all or a part of the cost is borne by the employer, excluding only programs required by law, such as workmen's compensation and social security. Among the plans included are those underwritten by a commercial insurance company and those paid directly by the employer from his current operating funds or from a fund set aside for this purpose.

Death benefits are included as a form of life insurance. Sickness and accident insurance is limited to that type of insurance under which predetermined cash payments are made directly to the insured on a weekly or monthly basis during illness or accident disability. Information is presented for all such plans to which the employer contributes at least part of the cost. However, in New York and New Jersey, where temporary disability insurance laws require employer contributions,<sup>3</sup> plans are included only if the employer (1) contributes more than is legally required, or (2) provides the employees with benefits which exceed the requirements of the law.

Tabulations of paid sick leave plans are limited to formal plans which provide full pay or a proportion of the worker's pay during absence from work because of illness; informal arrangements have been omitted. Separate tabulations are provided according to (1) plans which provide full pay and no waiting period, and (2) plans providing either partial pay or a waiting period.

Medical insurance refers to plans providing for complete or partial payment of doctors' fees. Such plans may be underwritten by a commercial insurance company or a nonprofit organization, or they may be self-insured.

Catastrophe insurance, sometimes referred to as extended medical insurance, includes plans designed to cover employees in case of sickness or injury involving an expense which goes beyond the normal coverage of hospitalization, medical, and surgical plans.

Tabulations of retirement pensions are limited to plans which provide, on retirement, regular payments for the remainder of the worker's life.

Nonproduction Bonuses. Nonproduction bonuses are defined for this study as bonuses that depend on factors other than the output of the individual worker or group of workers. Plans that defer payments beyond 1 year were excluded.

---

<sup>3</sup> The temporary disability insurance laws in California and Rhode Island do not require employer contributions.

## Appendix B. Occupational Descriptions

The primary purpose of preparing job descriptions for the Bureau's wage surveys is to assist its field staff in classifying into appropriate occupations workers who are employed under a variety of payroll titles and different work arrangements from establishment to establishment and from area to area. This permits the grouping of occupational wage rates representing comparable job content. Because of this emphasis on interestablishment and interarea comparability of occupational content, the Bureau's job descriptions may differ significantly from those in use in individual establishments or those prepared for other purposes. In applying these job descriptions, the Bureau's field economists are instructed to exclude working supervisors, apprentices, learners, beginners, trainees, handicapped, part-time, temporary, and probationary workers.

### BOOKKEEPING-MACHINE OPERATOR

Operates a bookkeeping machine (Remington Rand, Elliott Fisher, Sundstrand, Burroughs, National Cash Register, with or without a typewriter keyboard) to keep a record of business transactions.

Class A. Keeps a set of records requiring a knowledge and experience in basic bookkeeping principles and familiarity with the structure of the particular accounting system used. Determines proper records and distribution of debit and credit items to be used in each phase of the work. May prepare consolidated reports, balance sheets, and other records by hand.

Class B. Keeps a record of one or more phases or sections of a set of records usually requiring little knowledge of basic bookkeeping. Phases or sections include accounts payable, payroll, customer's accounts (not including a simple type of billing done by a biller, machine), cost distribution, expense distribution, inventory control, etc. May check or assist in preparation of trial balances and prepare control sheets for the accounting department.

### CLERK, FILE

Class A. In an established filing system containing a number of varied subject matter files, classifies and indexes file material such as correspondence, reports, technical documents, etc. May also file this material. May keep records of various types in conjunction with the files. May lead a small group of lower level file clerks.

Class B. Sorts, codes, and files unclassified material by simple (subject matter) headings or partly classified material by finer subheadings. Prepares simple related index and cross-reference aids. As requested, locates clearly identified material in files and forwards material. May perform related clerical tasks required to maintain and service files.

Class C. Performs routine filing of material that has already been classified or which is easily classified in a simple serial classification system (e.g., alphabetical, chronological, or numerical). As requested, locates readily available material in files and forwards material; and may fill out withdrawal charge. Performs simple clerical and manual tasks required to maintain and service files.

KEYPUNCH OPERATOR

Class A. Operates a numerical and/or alphabetical or combination keypunch machine to transcribe data from various source documents to keypunch tabulating cards. Performs same tasks as lower level keypunch operator but, in addition, work requires application of coding skills and the making of some determinations, for example, locates on the source document the items to be punched; extracts information from several documents; and searches for and interprets information on the document to determine information to be punched. May train inexperienced operators.

Class B. Under close supervision or following specific procedures or instructions, transcribes data from source documents to punched cards. Operates a numerical and/or alphabetical or combination keypunch machine to keypunch tabulating cards. May verify cards. Working from various standardized source documents, follows specified sequences which have been coded or prescribed in detail and require little or no selecting, coding, or interpreting of data to be punched. Problems arising from erroneous items or codes, missing information, etc., are referred to supervisor.

PROOF-MACHINE OPERATOR

Under general supervision, operates a sorting machine to sort checks, debits, credits and other items. Records totals of specific items in appropriate ledgers. May perform additional clerical duties in connection with sorting.

SECRETARY

Performs secretarial and clerical duties for a superior in an administrative or executive position. Duties include making appointments for superior; receiving people coming into office; answering and making phone calls; handling personal and important or confidential mail, and writing routine correspondence on own initiative; and taking dictation (where transcribing machine is not used) either in shorthand or by Stenotype or similar machine, and transcribing dictation or the recorded information reproduced on a transcribing machine. May prepare special reports or memorandums for information of superior.

STENOGRAPHER, GENERAL

Primary duty is to take dictation involving a normal routine vocabulary from one or more persons, either in shorthand or by Stenotype or similar machine; and transcribe dictation. May also type from written copy. May maintain files, keep simple records, or perform other relatively routine clerical tasks. May operate from a stenographic pool. Does not include transcribing-machine work.

SWITCHBOARD OPERATOR

Class A. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. Performs full telephone information service or handles complex calls, such as conference, collect, overseas, or similar calls, either in addition to doing routine work as described for switchboard operator, class B, or as a full-time assignment. ("Full" telephone information service occurs when the establishment has varied functions that are not readily understandable for telephone information purposes, e.g., because of overlapping or interrelated functions, and consequently present frequent problems as to which extensions are appropriate for calls.)

Class B. Operates a single- or multiple-position telephone switchboard handling incoming, outgoing, intraplant or office calls. May handle routine long distance calls and record tolls. May perform limited telephone information service. ("Limited" telephone information service occurs if the functions of the establishment serviced are readily understandable for telephone information purposes, or if the requests are routine, e.g., giving extension numbers when specific names are furnished, or if complex calls are referred to another operator.)

### TABULATING-MACHINE OPERATOR

Class A. Operates a variety of tabulating or electrical accounting machines, typically including such machines as the tabulator, calculator, interpreter, collator, and others. Performs complete reporting assignments without close supervision, and performs difficult wiring as required. The complete reporting and tabulating assignments typically involve a variety of long and complex reports which often are of irregular or nonrecurring type requiring some planning and sequencing of steps to be taken. As a more experienced operator, is typically involved in training new operators in machine operations, or partially trained operators in wiring from diagrams and operating sequences of long and complex reports. Does not include working supervisors performing tabulating-machine operations and day-to-day supervision of the work and production of a group of tabulating-machine operators.

Class B. Operates more difficult tabulating or electrical accounting machines such as the tabulator and calculator, in addition to the sorter, reproducer, and collator. This work is performed under specific instructions and may include the performance of some wiring from diagrams. The work typically involves, for example, tabulations involving a repetitive accounting exercise, a complete but small tabulating study, or parts of a longer and more complex report. Such reports and studies are usually of a recurring nature where the procedures are well established. May also include the training of new employees in the basic operation of the machine.

Class C. Operates simple tabulating or electrical accounting machines such as the sorter, reproducing punch, collator, etc., with specific instructions. May include simple wiring from diagrams and some filing work. The work typically involves portions of a work unit, for example, individual sorting or collating runs, or repetitive operations.

### TELLER, ALL-ROUND

Receives deposits and pays out withdrawals on savings accounts, receives deposits and cashes checks for checking accounts; and receives payments on notes, etc. May record daily transactions and balance accounts. May supervise one or more clerks who record details of transactions, such as names, dates, serial numbers, and amounts involved so that pertinent data may be distributed among the several departments for recording, filing, and clearing.

For wage study purposes, tellers, all-round, are classified on the basis of length of service with present employer, as follows:

- Under 5 years of service
- 5 years or more of service

### TELLER, NOTE

Collects exchange charges and payments on notes, drafts, rents, and contracts for deeds. May accept and give receipts for collateral on maturity notes. Is in charge of sending out notices of maturity. Receives renewal notes. Protests items when it is necessary. Causes notes to be presented at other places, when place of payment is other than the bank. Follows up on the value of collateral. In the case of real estate notes, sees that mortgages are properly recorded and checks certificates of title. Checks fire insurance coverage. Must be familiar with Negotiable Instruments Act and standard terms of extension agreements. Included in this classification are tellers specializing in a single function such as: Exchange tellers, discount tellers, and real estate tellers.

For wage study purposes, tellers, note, are classified on the basis of length of service with present employer, as follows:

- Under 5 years of service
- 5 years or more of service

### TELLER, COMMERCIAL AND SAVINGS

Cashes customers' personal or other checks and receives deposits on checking and/or savings accounts and/or pays out withdrawals on savings accounts. Makes entries in customers' account books or provides receipts for deposits. Writes up or signs deposit slips

TELLER, COMMERCIAL AND SAVINGS—Continued

to be used later in balancing books. May record the daily transactions and balance accounts. May supervise one or more clerks who record details of transactions, such as names, dates, serial numbers, and amounts involved so that pertinent data may be distributed among the several departments for recording, filing, and clearing.

For wage study purposes, tellers, commercial and savings, are classified on the basis of length of service with present employer, as follows:

Teller, commercial-savings  
Under 5 years of service  
5 years or more of service

Teller, commercial  
Under 5 years of service  
5 years or more of service

Teller, savings  
Under 5 years of service  
5 years or more of service

TYPIST

Uses a typewriter to make copies of various materials or to make out bills after calculations have been made by another person. May include typing of stencils, mats, or similar materials for use in duplicating processes. May do clerical work involving little special training, such as keeping simple records, filing records and reports, or sorting and distributing incoming mail.

Class A. Performs one or more of the following: Typing material in final form when it involves combining material from several sources or responsibility for correct spelling, syllabication, punctuation, etc., of technical or unusual words or foreign language material; and planning layout and typing of complicated statistical tables to maintain uniformity and balance in spacing. May type routine form letters varying details to suit circumstances.

Class B. Performs one or more of the following: Copy typing from rough or clear drafts; routine typing of forms, insurance policies, etc.; and setting up simple standard tabulations, or copying more complex tables already set up and spaced properly.

## Industry Wage Studies

The most recent reports for industries included in the Bureau's program of industry wage surveys since January 1950 are listed below. Those for which a price is shown are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, or any of its regional sales offices. Those for which a price is not shown may be obtained free as long as a supply is available, from the Bureau of Labor Statistics, Washington, D.C., 20212, or from any of the regional offices shown on the inside back cover.
