A FOLLOW-UP STUDY ON DISCONTINUING STUDENTS AT GROSSMONT

COLLEGE.

BY- HUGHES, HAROLD G. AND OTHERS

GROSSMONT COLL., EL CAJON, CALIF.

EDRS PRICE MF-\$0.25 HC-\$1.52 36P.

DESCRIPTORS- *JUNIOR COLLEGES, *FOLLOWUP STUDIES, *STUDENT CHARACTERISTICS, *DROPOUTS, QUESTIONNAIRES, *DROPOUT CHARACTERISTICS, DROPOUT ATTITUDES, DROPOUT RESEARCH, EL CAJON, CALIFORNIA,

BASED ON DATA FROM 61 RESPONSES TO 100 QUESTIONNAIRES, THIS FOLLOWUP STUDY OF THE DISCONTINUING STUDENT AT GROSSMONT COLLEGE SHOWS THAT HE IS TYPICALLY A DAY STUDENT, IS MARRIED, HAS NOT DONE MILITARY SERVICE, IS WORKING A 26-40 HOUR WEEK, HAS PARENTS WITH ABOUT 12 YEARS OF SCHOOLING, HAS ONE PARENT AT THE PROFESSIONAL OR MANAGERIAL LEVEL, AND PLANS TO TRANSFER FOR AN AB OR HIGHER DEGREE. TABLES SHOW HIS REASONS (AT THE TIME OF REGISTRATION AND CURRENTLY) FOR ATTENDING COLLEGE, HIS OPÍNIONS ON THE COLLEGE'S FACILITIES AND SERVICES, HIS OPINIONS ON EXTRACURRICULAR FACTORS AND INFLUENCES OF THE COLLEGE, HIS REASONS FOR DISCONTINUING, HIS PLANS AT THE TIME OF DROPPING OUT, AND THE KIND OF SCHOOL, IF ANY, HE SUBSEQUENTLY ATTENDED. THE DROPOUTS DIFFER LITTLE FROM THE CONTINUING STUDENTS EXCEPT THAT THEY HAVE MORE CONSISTENT HIGH SCHOOL AND COLLEGE GPA AND THAT, EVENTUALLY, 80 PERCENT OF THEM DO FIND THEIR WAY BACK TO COLLEGE. THE DROPOUTS, THEREFORE, NEED NOT BE A SOURCE OF GREAT INSTITUTIONAL CONCERN. THIS CONCERN MIGHT BETTER BE DIRECTED TO THE ENTERING STUDENTS IN AN EFFORT TO MAKE THEM AWARE OF THE ADVANTAGES OF STAYING ON. SAMPLES OF THE QUESTIONNAIRE AND THE COVERING LETTERS ARE INCLUDED. (HH)

THIS DOCUMENT HAS BEEN REPRODUCED EXACTLY AS RECEIVED FROM THE PERSON OR ORGANIZATION ORIGINATING IT. POINTS OF VIEW OR OPINIONS STATED DO NOT NECESSARILY REPRESENT OFFICIAL OFFICE OF EDUCATION POSITION OR POLICY.

CLEARINGHOUSE FOR JUNIOR COLLEGE INFORMATION

Research supported in Part by NDEA Title V-A Project Member V-453

Background of the Problem:

Institutional "guilt" can be aroused momentarily just by uttering the word "drop-out". The prevailing value system of the academician is such that any attrition is viewed as bad, and further that it is an indication of the institution's failure to fulfill its role when students discontinue attendance. This situation continues to exist even in the face of the overwhelming body of information that those factors over which the institution has control contribute very little to the over-all drop-out phenomenon. (3)

Research in the area of the 'drop-out' have led to the following conclusions:

- (1) The drop-out" is characterized by a lack of academic progress, poor attendance, family problems and lack of interest. (5)
- (2) Employment is the primary reason for withdrawal. (7)
- (3) "Drop-outs" tend to be more aggressive, more resistant to authority and control, and have more problems with sexual adjustment than survivors. (1)
- (4) "Drop-outs" show greater maladjustment than survivors, are least interested in literature, art, and philosophy. They tend to be illogical, irrational; uncritical in their approach to problem solving; to dislike reflective and abstract thought. (6)
- (5) There appears to be a familial influence in "dropping-out."

 Children of "drop-outs" are most apt to discontinue their college education. (2)

The Problem:

Grossmont College has made repeated efforts to follow-up the graduate and those students who have completed a vocational program. Prior to the present study no formal effort has been made to determine the characteristics of the students who have survived the equivalent of one full year's college experience but did not complete sixty units.

Subjects:

Subjects for the present study were those students who had completed a minimum of 30 units and a maximum of 59 units at Grossmont College and who discontinued attendance during, or at the end of, the 1964-65 academic year.

A total of 126 students met the above criteria. Valid addresses were available for 100 of the above 126 students.

Methods:

The following information was gathered for each subject:

- (1) Total high school grade point average.
- (2) Total Grossmont College grade point average.
- (3) School and College Ability Test (SCAT) scores, and
- (4) Student Characteristics questionnaire responses.

A modified form of the questionnaire used by Iffert (4) was mailed to all subjects. A return receipt was requested for each piece of mail. Through this method 100 valid addresses were obtained.

From the 100 questionnaires mailed to the above obtained addresses 61 were completed and returned.

Results:

Table I lists the characteristics of the total sample of students discontinuing attendance during the 1964-65 academic year.

In comparing the characteristics of the discontinuing students with the total student population one finds very little discrepancy. The one area of difference is the disproportionate numbers of day students (this includes day and day and night in the present description) in the discontinuing population i.e., 85.7% as compared to 66.7%.

A description of the "typical" discontinuing student, as defined in this study, would be similar to the following:

He is a day student; married; has not had prior military service; works from 26 to 40 hours per week; his father and mother have completed a minimum of twelve years of formal education; primary working parent is employed at the professional or managerial level; and is a transfer student working toward an A.B. or higher degree.

The mean and standard deviation of the School and College Ability

Test (SCAT) scores are presented in Table 2. The difference between

means for the Day and Night students, althought not tested for significance,

has been noted each time this comparison has been made. The mean performance on the two sections of the SCAT would indicate that the discontinuing students, as a group, were, at the time they took the test, quite typical of college freshmen.

MEAN AND STANDARD DEVIATION OF SCHOOL AND COLLEGE ABILITY TEST (SCAT) SCORES

ENROLLMENT

Day Only	Day & Night	Night Only
Mean 30.74	31.83	36.61
S.D. 11.32	10.37	11.99

DAY & NIGHT NIGHT DAY SCAT .49* SCAT Verbal .43** .22 SCORES SCAT .08 Quantative .25* .53* N = 65N = 42N = 18

Table 3 presents the correlation between the two subtests of the School and College Ability Test and the total college grade point average for the discontinuing population. It will be noted that the relationship is significant for the day only students and the night only students.

^{*} Significant at the .05 level of confidence * Significant at the .01 level of confidence

TOTAL HIGH SCHOOL GRADE POINT AVERAGE vs. TOTAL COLLEGE GRADE POINT AVERAGE

	Mean High School	Mean College	
Day Students	2.30	2.32	N = 59
Day & Night Students	2.20	2.18	N = 38
Night Students	2.47	2.44	N = 8

Table 4 compares the mean high school grade point average with the mean college grade point average on those students for which both sets of data were available. The two sets of average data are remarkably similar.

TOTAL COLLEGE GRADE POINT AVERAGE

	Mean	Standard Deviation
Day Students	2.32	.44
Day & Night Students	2.26	.46
Night Students	2.63	.48

Table 5 presents the mean and standard deviation of the total college grade point average for the total discontinuing population.

Table 6 lists the results of the questionnaire in the area of "Reasons For Going To College." In responding to the questions the subject was instructed to first rate the reasons for going to college at the time of attendance. The subject was then asked to again rate the reasons as he now sees them.

The results of the initial response to the reasons for attending college section of the questionnaire leaves one with the impression that going to college was an autonomous decision for the bulk of the respondents. Neither the encouragement of, nor respect for community leaders were factors of importance. Parental insistence also did not play an important part in this decision. The reasons for attending college of greatest importance were specifically vocational in nature, i.e., to get a better paying job in the kind of work they wanted to do in a special-ized field.

The basic reasons of importance for attending college from the present frame of reference had not changed to any great degree. It is interesting to note, however, that three times as many now see the satisfaction of intellectual curiosity as an important reason for attending college. Also, learning to get along with other people, being able to be a better husband or wife and living an easier life took on added importance with the passage of time.

24.	In my family young people had always gone to college.	THEN	44 44	07	07 04	02

By and large the reactions to the facilities and services were quite satisfactory. (Table 7) This was particularly true in relation to the teaching ability of instructors. Over half of the respondents rated instructors as very satisfactory.

The areas of disatisfaction related to the broad area of vocational and educational guidance. The specific items rated as being unsatisfactory were "Assistance from Counselors on how to study techniques," and, "Recreational facilities on campus." The "gray" areas were "Opportunity for testing and counseling to help determine educational and vocational goals," and "Degree of emphasis in college on vocational guidance."

(Table 9)

Items 5, 12, 16 and 17 of the section of the questionnaire presenting reasons for discontinuing college relate to academic difficulty or deficiencies. These items accumulated a total of 58 responses of great importance.

Items 3, 4, and 8 deal with employment and financial difficulties.

There were a total of 34 responses indicating that financial need was an important factor in discontinuing.

The one item that received the largest number of responses indicating some degree of importance as a factor in discontinuing was related to marriage.

The remaining reasons presented did not elicit sufficient responses of importance to warrant comment although they undoubtedly took their toll.

3.	Undecided regarding future plans to attend college	09	09	52

Discussion and Implications:

It appears that the results require little discussion. The perennial problem of definitive research, i.e., asking the right questions, has perhaps reared its ugly head once more. The results of this study would indicate that the discontinuing population studied is very similar to the typical continuing population at Grossmont College. The areas of exception being a more consistent high school grade point average-college grade point average record, and fewer "undecided" responses to "The Program Planned at Grossmont College" and "Degree Intended to Achieve."

One other area which warrants comment relates to the actual "drop-out" rate. Of the 61 subjects who completed the follow-up questionnaire, 27 have continued their education at other institutions of higher learning. Of the 34 remaining respondents 22 intend to return to college, 3 have no intention of returning and 9 are undecided. If one were to include the 9 undecided with the 3 who have no intention of attending college again

this would represent 20% of the discontinuing respondents. This would then lead to the conclusion that 80% of those who discontinue attendance at Grossmont College eventually find their way to other institutions of higher education thus greatly reducing the actual "drop-out" rate.

The results of this study would tend to indicate that those students who discontinue after completing the equivalent of one full year or more at Grossmont College need not be the source of excessive institutional concern. The focus of future research designed to study the "drop-out" phenomenon could perhaps be oriented toward the entering student. It also appears that variables of a less cognitive nature than those studied in the present research should receive primary consideration.

If the results of such research should indicate that the reasons for discontinuance are largely "psychological" in nature, i.e., out of awareness, then efforts to bring these reasons into awareness for the student would need to be made.

Dear Former Student:

Grossmont College is interested in finding out why you left us. Our records show that you have completed at least 30 units with us but that you did not go on and complete your degree. We would like to have a program which encourages students to stay and we wonder whether or not something here at the college may have brought about your withdrawal.

As you can see, the follow-up questionnaire is quite long but it only takes a code mark here and there to complete it. I hope you will help us make Grossmont College the best college in California and that you will fill out our questionnaire and send it back to us in the enclosed return envelope.

Please note we are not asking for your name or any other identification so we hope you will be completely honest with us.

Thank you,

Dr. Charles .. Stanley

Director of Institutional Research

A. Reasons for Going to College

Some of the reasons students give for going to college are listed below. Looking back to the period <u>before</u> you entered college, show the degree of importance each of the reasons had in influencing your decision to attend college. After each statement write the appropriate code symbol in Column A. Some find it easier to go through the statements and mark all of the O's first, then the I's, and so on. Do it the way it is easiest for you.

	DEGREE OR	LE	VEL	UF	11	MPU	KIF	INC	, E				code
0 f	no importance, or does	no	t a	ppl	у								(0)
0 f	slight importance	•					•	•	•		•	•	(1)
0f	moderate importance .	•		•	•		•	•	•	•	•	•	(2)
0f	great importance	•		•	•		•	•	•	•	•	•	(3)

Try to record your reactions in Column A, not according to what you consider now to be "good" reasons, but according to what you feel were your reasons at the time you decided to go to college. Add any you wish.

You will find instructions for column B when you come to the end of the section.

	Reasons	Code Sym	
1.	I felt a college degree was necessary for the kind of work I wanted to do		1
2.	Business, church, or other community leaders encouraged me to go to college		2
3.	I hoped to make many new friends in college		3
4.	It had always been expected that I would go to college		4
5.	The persons I respected most in my community had gone to college		5
6.	I had serious intellectual curiosities which only college could satisfy	<u> </u>	6
7.	I wanted to prepare myself for a better paying job than I would otherwise be able to get		7
8.	I wanted to learn how to get along with other people		8
9.	I hoped to acquire some qualifications for leadership in civic affairs		9
10.	My parents insisted on my going to college		10
11.	Most of my friends were going to college		11

Follow-up Questionnaire (con't) Page 2

12.	I thought college life would help me to develop socially		12
13.	I had a compelling interest in one particular field in which I wanted to specialize, namely:		
	(Write in the field)		13
14.	I wanted to explore several lines of work to see what I would be most interested in		14
15.	I felt I could live an easier life if I had a college education		15
16.	I wanted to find out more about certain fields of knowledge		16
17.	I felt college acquaintances and contacts would prove advantageous in finding a position after graduation		17
18.	I thought a college education would enable me to be more influential in community affairs		18
19.	I thought that college would be a good place to meet the type of person I'd like to marry		19
20.	I hoped that college training would enable me to be a better husband or wife		20
21.	I enjoyed studying and wanted to continue academic work		21
22.	There was not much for me to do around home		22
23.	My teachers thought I was good college material		23
24.	In my family young people had always gone to college .	<u></u>	24
	Other (write in)		

INSTRUCTIONS FOR USE OF COLUMN B

Please go back over the reasons and write the code number, 0, 1, 2, or 3, to show how you <u>now</u> rate the importance of each reason as a motive for going to college or for remaining in college.

B. Reactions to College Experiences

The statements in this section refer to certain of the facilities and services at Grossmont College. An attempt is being made in this study to get realistic appraisals by college students themselves of their experiences while in college. If you transferred from Grossmont College to another college, record your reactions to Grossmont College only.

Use the following code to show the degree or level of satisfaction you experienced in connection with each facility or service described:

	DEGREE OR LEVEL OF SATISFACTION Code	
	Does not apply to me, or no opinion (0) Very unsatisfactory (1) Somewhat unsatisfactory	
	COLLEGE FACILITIES AND SERVICES	Code Symbol
1.	Services of the admissions office prior to enrollment	1
2.	Orientation program at the start of my freshman year	2
3.	Teaching abilities of my instructors	3
4.	Size of my classes	4
5.	Opportunity to take elective courses along with required program	5
6.	Assistance from instructors on "how to study" techniques	6
7.	Assistance from counselors on "how to study" techniques	7
8.	Assistance from college officials in receiving part-time employment	8
9.	Opportunity to have private conferences with instructors on academic questions stemming from course work	9
10.	Opportunity to have private conferences with instructors on personal questions stemming from college life in general	10
11.	Opportunity for informal social contacts with faculty members .]]
12.	Opportunity for testing and counseling to help determine educational and vocational goals	12
13.	Opportunity to participate in organized student activities outside of the classroom	13

Follow-up Questionnaire (con't) Page 4

14.	Opportunity to secure adequate housing
15.	Services and facilities of library
16.	Opportunity for informal social contacts with students16
17.	Quality of counseling assistance received on problems of educational and vocational choice
18.	Availability of courses and facilities for training in my major field
19.	Availability of occupational information for help in choosing an occupation
20.	Degree of emphasis in college on intellectual and cultural pursuits outside of the classroom
21.	Opportunity to compete for scholarship aid
22.	Opportunity to secure loans from the college22
23.	Study conditions in the library and elsewhere on campus23
24.	Study conditions in my room
25.	Ability of instructors to set forth clear-cut and interesting course objectives
26.	Degree of emphasis in college on vocational guidance26
27.	Recreational facilities on campus
28.	Services of the business office
29.	Services of the registrar's office
	Other (write in)
	The factors listed below are not necessarily related to college facilities and services. Use the same code.
1.	College rules relating to social activities
2.	College rules governing academic life, such as class cuts2
2	Nasina ku atudanta
