INDEX OF SELECTED OUTDOOR RECREATION LITERATURE.
DEPARTMENT OF THE INTERIOR, WASHINGTON, D.C.

PUB DATE AUG 67

EDRS PRICE MF-\$0.75 HC NOT AVAILABLE FROM EDRS. 156P.

DESCRIPTORS- *BIBLIOGRAPHIES, ANNOTATED BIBLIOGRAPHIES,
*INDEXES (LOCATORS), *NATURAL RESOURCES, *OUTDOOR EDUCATION,
PERIODICALS, RECREATION, RESOURCE MATERIALS, ADULT EDUCATION,
BIOLOGICAL SCIENCES, COLLEGE SCIENCE, CONSERVATION EDUCATION,
CAMPING, ECOLOGY, ELEMENTARY SCHOOL SCIENCE, FEDERAL
LEGISLATION, PHOTOGRAPHY, SECONDARY SCHOOL SCIENCE,
DEPARTMENT OF THE INTERIOR, BUREAU OF OUTDOOR RECREATION,

INDEXED ARE 991 PERIODICALS, REPORTS, BOOKS, AND OTHER PUBLICATIONS CONTAINING INFORMATION PERTINENT TO OUTDOOR RECREATION WHICH WERE RECEIVED BY THE DEPARTMENT OF THE INTERIOR LIBRARY DURING 1966. THIS SHOULD NOT BE MISTAKEN FOR A COMPREHENSIVE BIBLIOGRAPHY OF OUTDOOR RECREATION LITERATURE BECAUSE NOT ALL PUBLICATIONS RECEIVED BY THE DEPARTMENT OF THE INTERIOR LIBRARY HAVE BEEN EXAMINED FOR CONTENT RELATIVE TO OUTDOOR RECREATION. THE FOUR CATEGORIES USED IN CLASSIFYING DOCUMENTS ARE (1) OUTDOOR RECREATION RESOURCES, (2) ADMINISTRATION OF RESOURCES AND PROGRAMS, (3) RECREATION USERS, DEMAND AND VALUES, AND (4) RESEARCH. INFORMATION FOR EACH PUBLICATION INCLUDES A BIBLIOGRAPHIC CITATION AND A BRIEF ABSTRACT. THE MATERIAL IS INDEXED IN THREE FORMS. A SUBJECT INDEX IDENTIFIES CITATIONS BY THE USE OF NEARLY 1,000 KEY WORDS OR DESCRIPTORS RELATED TO OUTDOOR EDUCATION. A NAME INDEX DESIGNATES CITATIONS BY AUTHOR, EDITOR, INDIVIDUALS AND ASSOCIATIONS DISCUSSED IN THE ARTICLE, OR OTHER PROPER NAMES EXCEPT GEOGRAPHIC LOCATIONS. A GEOGRAPHIC INDEX IDENTIFIES CITATIONS BY COUNTRIES, GEOGRAPHIC REGION, STATES, COUNTIES, CITIES, AND RIVERS, AS WELL AS BY PROPER NAMES OF UNITS ADMINISTERED BY FEDERAL AND STATE AGENCIES WHICH APPEAR IN THE DOCUMENT. APPENDICES INCLUDE (1) LISTINGS OF THE PERIODICALS SCANNED IN DEVELOPING THE INDEX; AND (2) A LISTING OF SERIAL PUBLICATIONS. THIS DOCUMENT IS ALSO AVAILABLE FOR \$0.75 FROM SUPERINTENDENT OF DOCUMENTS, GOVERNMENT PRINTING OFFICE, WASHINGTON, D.C. 20402. (DS)

PREFACE

This guide is a partial index to periodicals and certain other reports, books, and other publications received by the Department of the Interior Library during 1966. It also contains indexes to selected materials originating in Canada and the United Kingdom. The periodicals and other documents which are indexed herein are listed in the appendices.

Researchers and others should not mistake this report for a comprehensive bibliography of outdoor recreation literature published during 1966. Not all of the publications received by the Department of the Interior Library have been examined for the purposes of indexing outdoor recreation articles which they may contain.

Sources other than this partial index should be consulted by individuals seeking outdoor recreation information appearing in speeches, press releases, books, newspaper articles, Presidential Orders and Messages to the Congress, State and Federal legislation, reports of Congressional Committees, and publications and reports of National, State, and local recreation agencies and organizations, both public and private. Certain State agency documents are indexed in this publication.

How to Use

In the back of this publication are three indexes and two appendices providing three points of access to the abstracted material. These are:

1. Subject Index. This index contains citations by key words. Nearly 1,000 key words or descriptors by which information relating to outdoor recreation could be organized were compiled by the staff of the Department of the Interior Library in collaboration with the Bureau of Outdoor Recreation, and the Department of Indian Affairs and Northern Development of Canada. The Department of Indian Affairs and Northern Development has assumed the responsibility for scanning the professional journals and the outdoor recreation technical literature originating in Canada and the United Kingdom.

2. Name Index. This indexes citations by author or editor of publications, individuals and associations which are discussed in the articles, and all other proper names except geographic names. References to laws or legislation in the literature are indexed by title. Departments and Bureaus of the Federal Government appear without the designation U. S. preceding the agency name. Only the Congress and the Office of the President are entered under the abbreviation, U. S., i. e., U. S. Congress, U. S. Senate, U. S. House of Representatives, U. S. President.

3. Geographic Index. This indexes citations by countries, geographic regions, States, counties, cities, rivers, as well as by proper names of units administered by Federal and State agencies which appear in the articles cited.

Each citation bears an item number, beginning with 60001. The first digit, 6, represents the year 1966. The remaining four digits indicate citation item numbers. The first sequential number is 0001 and there are 991 citations; the numbers range from 60001 to 60991. To secure copies of an article, a Department of the Interior employee may request a copy by item number from the Documentation and Bibliography Section, Department of the Interior Library. Other users should consult their own libraries.

4. Publications Appendices. Appendix I lists approximately 400 periodicals. An asterisk precedes the title of periodicals which contain articles cited in this issue. The others were scanned but no recreation articles were listed.

Appendix II contains a short list of other periodicals which have articles cited in this Index.

OUTDOOR RECREATION RESOURCES

60001 Bellon, A.L.
"Unknown" coast.
OUR PUBL. LANDS
15(5):4-5, Summer 1966. Photos.

King Range in northwestern California is a land rich in natural resources. Its wilderness character, abundance of timber, wildlife and game, proximity to the Redwood Highway and its scenic beauty make the Unknown Coast worthy of multiple-use management.

60002 Burnett, W.
How do we explain?
COLO. OUTD.
15(5):41-46, Sept.-Oct. 1966.

The author discusses the deterioration of three basic resources — land, air, and water — and suggests ways of restoring our environment through the adoption of enforceable pollution controls.

60003 Clepper, H. E., ed.
Origins of American conservation.
New York, Ronald
193p. 1966. Photos.

An attempt to provide a grounding in the history of the land and its resources, and of the influences that resulted in the establishment of the several fields of resource management. Specialists in their respective fields wrote chapters on wildlife regulation and restoration, forestry, fisheries and aquatic resources, soil, water, range and forage, parks and wilderness, scenic historical and natural sites. The book gives indications of what future developments in the conservation of natural resources might be undertaken in the public interest and suggests the next steps.

60004 Hay, J.; Farb, P.
The Atlantic shore. Human and natural history from Long Island to Labrador.
New York, Harper, Row
246p. 1966. Ref, maps, illus.

The human and natural history of the Atlantic shore from Long Island to Labrador. The book describes the structure of the land; the birds, animals, and plants abounding on the sandy beaches; the rocky promontories; and the salt marshes. Man may have reached the point of no return because of his distortions of this balanced environment, his reduction of its species, and his fragmenting of its unities. Man must recog-

nize that by his neglect and thoughtlessness in the hiding and starving of this environment, he starves himself.

60005 Nelson, D.
Wise use of natural resources has changing values.
J. FOREST.
64(4):227-229, Apr. 1966.

After sketching the development of California's resources during this century, the author admonishes that the wise use of land is a changing value in line with the differing philosophies, needs, and technologies of the times.

60006 Adams, K. A.
Recreational potential on private timber lands.
In International Association of Game, Fish and Conservation Commissioners.
Proceedings, 1966. Kansas City, Mo.
p. 137-142, 1966.

Outdoor recreation needs, problems, and possible solutions are discussed. He includes the opening of some private forest lands for public recreation among the possible solutions. Some lumber industry landowners are doing this, but many private owners hesitate. Their reasons are legal liability, littering, trigger-happy hunters, and possible property damage. Since the author is associated with the California Redwood Association, he illustrates with numerous examples from that state.

60007 Almas, T.
Back country.
ALASKA SPORTS.
32(6):9-13, June 1966. Photos.

Hunting and fishing opportunities are excellent in the back country and wilderness areas of upper Kuskokwim and Tikchuk Lakes country of Alaska.

60008 Arps, L. W.; Kingery, E. E.
High Country names.
Denver, Colorado, The Colorado Mountain Club
224p. 1966. Maps, photos.

This book attempts to trace the origins of the place names in Rocky Mountain National Park and the high country south of it. Some of the names just happened, as names do; but when the park was proposed, various people set out to name features in the area. The story of those people who named the peaks or for whom the peaks are named starts with the very beginnings of the park.

60009 Badgett, B.
Playground of four seasons.
TRAIL. TRAV. MAG.
31(2):47-50, Feb. 1966. Photos.

Cloudcroft, located high in the Sacramento Mountains of the Lincoln National Forest of southern New Mexico, is described. Its abundant wildlife make it one of the largest hunting areas in New Mexico. Year-round activities include golf, bowling, sightseeing, and horseback riding. From December 15 through Christmas Eve, a beautiful candlelight procession winds its way through the streets of Cloudcroft, a procession known as Las Posadas. In addition to the spring and summer recreation programs and the autumn Aspencade, the winter season offers sledding, tobogganing, skiing and ice skating.

60010 Baer, J. G.
The Swiss National Park.
PARK NEWS
2(1): 13-15, Jan. 1966.

A description of the physical features of the Swiss National Park, its scientific role, and its policy concerning tourists.

60011 Banister, R. B.
An artist's look at Cape Foulweather.
FORD TIMES
59(8):11-15, Aug. 1966. Photos.

Envision a jet-black beach, sparkling with mica, backed by a sheer wall of 300 to 1000 feet. Tumbling from these cliffs are four waterfalls, the wind snatching at the spray and throwing it into the air like a shower of diamonds. At the foot of every rock are fantastic grottos and brilliantly colored tidal pools. From an artist's-eye view, this begins to describe the magnificent Cape Foulweather, a jagged stretch of Oregon coastline that has the untouched beauty to inspire a painter or leave a tourist breathless.

60012 Barnes, D.
Deep in the heart of darkest Texas.
SPORTS ILLUS.
24(21):57-66, May 23, 1966.

An example of one of the larger game preserves is the Y. O. Ranch in Texas, which is lavishly stocked with exotic big game.

60013 Bennett, C. F.
Big Bend: Texas trailer mecca.
TRAIL. TRAV. MAG.
31(2): 30-33, 77, 79-80, Feb. 1966. Maps, photos.

The Big Bend National Park is a gathering place for nature lovers, rock hounds, scientists, ornithologists, entomologists, and botanist. Primeval geologic formations in the Chisos Mountains and numerous kinds of wildlife can be seen in this region.

60014 Bennett, D. B.
The Mountain the Indians worshipped.
FORD TIMES
59(8): 43-46, Aug. 1966. Illus.

A beautifully illustrated account of the mountain in the Black Hills of South Dakota that was sacred to the Cheyennes and the Sioux. Bear Butte's recent elevation to a State Park and National Historic Landmark is bound to attract a greater number of tourists to the mountain that was worshipped by the Indians.

60015 Bentall, M.
Have botanic gardens outlived their usefulness?
PARK ADMIN.
31(7): 28-31, 33, July 1966.

A short history of the development of botanic gardens shows the following uses: repositories of medicinal plants, as well as plants of economic importance; distributors of exotic plants, and educators of the general public and students in horticultural pursuits and rare plant appreciation.

60016 Bester, A.
The disappearing seacoast.
HOLIDAY
39(7): 56-69, 108, July 1966. Illus.

Only about 1,000 miles of America's 12,000 miles of shoreline are protected by state or federal ownership. Real estate speculators subdivide, lumbermen cut over, builders bulldoze, factories pollute, and local businessmen participate in the destruction of the American seacoast for their share of the spoils. This deplorable situation is described in detail.

60017 Boardman, W. S.
What is the forest preserve?
ADIRONDAC
30(3): 54-56, May-June 1966.

The forest preserve serves as water supply, wildlife refuge, nature laboratory, and—one of the most precious of all resources—a place of quiet. The New York State Forest Preserve is cited as the best example of state enterprise in wildland preservation that exists today, according to the executive director of the Nature Conservancy.

60018 Bonnell, J.; Bonnell, H.
Camping the floor of a canyon.
TRAIL. TRAV. MAG.
31(3):45-47, 60, Mar. 1966. Photos.

An unusual camping place is California's Steckel Park, located in the very floor of a canyon. En route there from Santa Paula, one may stop to visit Camulos Rancho which was the setting for the story of Ramona. Steckel Park contains an aviary, small zoo and playgrounds for children. Sports offered include volleyball and horseshoe pitching.

60019 Boswell, C.
Utah - fantasyland. Monument Valley.
TRAIL. TRAV. MAG.
31(11):19-20, 47-48, Nov. 1966. Map, photos.

Described are the geologic formations, archeologic ruins, campground facilities, climate, roads and entrance fees of Utah's Monument Valley on the Navajo Indian Reservation. Trailer parks are listed.

60020 Brandborg, S. M.
A special memorandum to members and co-operators.
WILDER. SOC. NEWSLETT.
p. 1-8, May 20, 1966. Map.

Discusses the major points at issue relative to the Great Smoky Mountains National Park wilderness lands. Describes the various alternative plans relative to wilderness boundaries and road development.

60021 Brandborg, S. M.
Statement for Smokies Wilderness Hearing.
LIV. WILDER.
30(92): 19-30, Spring 1966. Photos.

Cooperative action is needed among federal, state, and local agencies in developing regional master plans for units of the National Park System and adjacent public lands. Plans to prevent commercial development, highways, public facilities and mass recreation from destroying or greatly detracting from the essential wilderness nature of the park are outlined. Preservation of the park will require the cessation of all new development in back country areas, restriction of new developments, and pursuit of every way to divert use from the park by using attractive and strategic lands outside.

60022 Brockman, C. F.
A park for the North Cascades.
AMER. FOR.
72(9):8-11, 50-52, Sept. 1966. Map, photos.

To meet the test of national park eligibility, beauty alone is not enough. Nor should the question of managerial responsibility for various portions of the area carry undue influence. Rather, the solution of this problem of eligibility should be based upon true national significance and upon a national long-term interest in maintenance of the recreational quality of the region.

60023 Brooks, K.
The Black Hills.
BET. CAMP.
7(6):32-36, June 1966. Map, illus.

In the surrounding terrain of the Black Hills in South Dakota one can find Indian lore, Wild West hoopla, artifacts of a vanished frontier civilization, and nature at its most brilliant. The physical and cultural settings are related in terms of visitor interests.

60024 Burch, W. R., Jr.
Wilderness — the life cycle and forest recreational choice.
d. FOREST.
64(9):606-610, Sept. 1966. Photo, tables.

"The report empirically examines aspects of the belief that wilderness reservations unfairly deprive elderly citizens and young families of recreation opportunities. Evidence is presented that none of the principal forest-related recreation activities represent a 'majority vote' of the American people and appear to be unappealing to most elderly citizens."

60025 Clawson, M.
Public ownership of forest land.
J. SOIL WAT. CONSERV.
21(3):83-85, May-June 1966. Photos.

No abstract.

60026 Coe, D. L.
Katmai National Monument.
NAT. PARKS MAG.
40(225):4-9, June 1966. Photos.

This article describes the geological features, volcanic history, wildlife, and rugged scenery of the National Park System's largest unit located on the Alaskan peninsula.

60027 Conrad, R. M.
'Big roamin' room'.
OUR PUBL. LANDS
15(5):10-11, Summer 1966. Photos.

Describes the privacy and the roominess of a vast area in 11 Western states and Alaska. There are 460 million acres of public domain on which recreationists can vacation and enjoy varied recreation. The Bureau of Land Management, its role in land disposal programs, and management of consumer resources on the public lands, are discussed.

60028 Crawford, H. D.
British-America's birthplace.
AMER. FOR.
72(9):14-17, 38-39, Sept. 1966. Illus.

A narration of the Roanoke Island "Lost Colony" story and other early American history. Basic historical facts about the first, ill-fated Roanoke Island colonists have been dramatized every summer there since 1937 during July and August.

60029 Crawford, H. D.
Knights of the golden horseshoe.
AMER. FOR.
72(11):28-31, 68-70, Nov. 1966. Photos.

Governor Spotswood's expedition of 1716 traversed the Blue Ridge into the Shenandoah Valley and claimed land for England. Now the George Washington National Forest and Shenandoah National Park lie in the area explored by these early settlers.

60030 Cunningham, J. T.
The wealth of Jersey's Barrens.
AUDUBON
68(4):250-258, July-Aug. 1966. Map, photos.

Despite the pressures for "development" and its proximity to large cities, the New Jersey Pine Barrens may yet be saved. Several sections have been set aside by the state as forest preserves, parks, or public hunting and fishing grounds. And the New Jersey Audubon Society has started a movement to set aside a major portion of the forest land as a national monument. Naturalists find many reasons—abundant wildlife, diverse habitats, rare and endangered species—to preserve this region. A map shows both the existing New Jersey State Forests and the proposed Federal acquisitions.

60031 Czura, P.
To enjoy Nebraska, get lost!
BET. CAMP.
7(5):32-35, May 1966. Photos.

Nebraska's 11,000 miles of streams and more than 3300 lakes should whet the appetite of any outdoorsman. Here are found 4 state parks and 78 wayside, recreation, and special use areas. Camping is free in all but a few designated areas where 50¢ to \$1.00 is charged for an overnight stay. Attractions that lure campers are described.

60032 Davison, D.
Mountain stronghold.
N. MEX. MAG.
44(6/7):12-13, June/July 1966. Photo.

A description of the prehistoric cliff dwellings built by the Mogollon Indians 800 years ago in southwestern New Mexico. Now, because of a new highway, tourists can drive to within a quarter of a mile of the ruins to visit the Gila Cliff Dwellings National Monument.

60033 Dodge, N. N.
Pecos National Monument.
NAT. PARKS MAG.
40(230):14-16, Nov. 1966. Map, photos.

Pecos National Monument was established as an addition to Mesa Verde National Park in New Mexico on June 28, 1965. The Monument preserves the life of a prehistoric Southwestern people, and narrates the exploration and settlement in later years.

60034 Draper, W. H., Jr.
Parks or more people?
NAT. PARKS MAG.
40(223):10-13, Apr. 1966.

As a result of the increase in population in the U. S., the ratio of national park land to each citizen is decreasing despite the addition of 4,000 square miles of land to the national parks system over the past twenty years. Secretary of the Interior Udall predicts that by the middle

of the next century, nine times as many people will be using the facilities of the National Park System. Even though lands may be increased and camping and other facilities improved, the geometric ratio at which population increases is likely to outstrip the benefits of this progress.

60035 Ecological Society of America
The Smokies an ecological asset.
LIV. WILDER.
30(92):35-37, Spring, 1966. Photos.

The abundance of flora and fauna in large wilderness tracts of the Great Smoky Mountains National Park and their potential ecological research and scientific values are emphasized. Recommendations include (1) areas defined as wilderness in the Wilderness Act of 1964 should be incorporated in the National Wilderness Preservation System, (2) the Wilderness Society and the Smoky Mountains Hiking Club of Knoxville plan proposed should be adopted in preference to the National Park Service plan, (3) that no road of any kind be built in the wilderness portions.

60036 Ellis, G.; Kester, F.
The rape of the Elfin Forest.
SIERRA CLUB BULL.
51(6):12-13, June 1966. Photos.

One of California's most attractive features is its Elfin Forest, composed of dwarfed trees and shrubs that have adapted themselves to the scanty soils of the high country's lower slopes. These forests are being ravaged in the name of range improvement in 30 of the states' 58 counties. Since 1950 the Agricultural Stabilization and Conservation Service, USDA, has subsidized stockmen to rid the range of virtually all plant cover, since more grazing land is required. There is great loss in native plants, animals, and soil erosion.

60037 Erickson, R. B.
A proposed marine heritage area for southeastern Connecticut.
HIST. PRESERV.
18(1):24-31, Jan.-Feb. 1966. Map, photos.

No abstract.

60038 Federal Writer's Project. Vermont.
Vermont. A guide to the Green Mountain State.
2nd edition.
Boston, Houghton Mifflin
456p, 1966. Ref., maps, photos.

The first and second parts of this volume are a guide to Vermont history, natural resources, recreation and the general background of the state. The third section includes data on Vermont's tours, cities and a number of the prominent geographical features. Hunting and fishing are described in part two. General recreational activities treated are skiing, golf, and boating. Campfire permits and other regulations are listed; information is provided on state parks and forests, the Long Trail, and the Green Mountain National Forest.

60039 Fenderson, C. N.
Last ditch stand for Hubbard Park.
CONSERV. NEWS
31(16):3, Aug. 15, 1966.

A small group of Meriden, Connecticut, citizens find themselves in a last ditch stand to save three city parks from being incorporated into a proposed new highway.

60040 Fischer, V. L.
Formula for mediocrity.
AMER. FOR.
72(1):16-17, 52-54, Jan. 1966. Photos.

The Wheeler Peak area in Nevada is under consideration to become the Great Basin National Park. Author questions if it is unusual enough. It is in the area of the "basin and range" topography and does contain a representative mountain range, but it is not spectacular nor unique. Author is against lowering standards for national parks to include examples of the typical, the ordinary, and the commonplace.

60041 Fix, J.
A backward turn.
FLA. WILDL.
20(7):28-31, Dec. 1966. Photos.

A well-illustrated description of the rarities of the Corkscrew Swamp Sanctuary in Florida is presented here. The effect on visitors to this sanctuary is an overwhelming feeling that this is the way it has always been, from the very beginning of time.

60042 Fix, J.
A city's ancient forest.
FLA. WILDL.
20(6):12-13, Nov. 1966. Photos.

Simpson Park is about eight acres of primitive wilderness still surviving within the shadow of Miami's towering skyscrapers. Often threatened but always protected, it is the last vestige of virgin forest anywhere within the heart of a great American city.

60043 Flanagan, W. L.
Deplore "onslaught" on lake front.
PRAIRIE CLUB BULL.
(552):10-11, Jan. 1966

There is much controversy over an expressway and its destruction of 1,800 to 2,000 trees in Jackson Park, Chicago. Because of many protests concerning the onslaught of the entire lake front, the Metropolitan Housing Council has recommended an immediate halt to portions of the construction pending a plan for entire lake front. The Daniel Burnham Committee, composed of 5 men appointed by Major Daley of Chicago, advised that the land be restored to park and recreation.

60044 Frome, M.
Beauty or the bulldozer?
AMER. FOR.
72(2):6-9, 40-42, Feb. 1966. Photos.

The future of the Great Smoky Mountains National Park and the Blue Ridge Parkway is in dispute. The National Park Service promised the State of North Carolina a highway to replace their Route 288 which was inundated when Fontana Dam was built. To complete the Blue Ridge Parkway over the top of Grandfather Mountain is now the Park Service plan. North Carolina wants it routed along the ledge of Grandfather Mountain, however, in order not to spoil the primitive scenic beauty. Differences between the federal and state viewpoints are discussed, as well as alternate plans.

60045 Gallaher, J. R.
Let's have honesty in debate about redwoods.
WEST. CONSERV. J.
23(2):23, May-June 1966.

This editorial claims that, in the Redwoods National Park controversy, the preservationists are making charges which ignore the facts. They assert that redwood cutting has been "speeded up." They claim the redwoods are in danger of "extinction." Every responsible lumber company and timber grower in the country is being smeared by the bombast wielded so indiscriminately by the Sierra Club.

60046 Giles H., Jr.
Rich Hole country.
VA. WILDL.
27(3):4-5, 14-16, Mar. 1966.

This article describes the rich potentials in wildlife conservation, watershed management, scientific investigation, and recreational use of the Rich Hole country on the James River District in Virginia.

60047 Gunsky, F.
Motor cars, mountains, and Muir.
SIERRA CLUB BULL.
51(8):5, 22-23, Sept. -Oct. 1966.

No abstract.

60048 Hall, W. M.
The many faces of Padre Island.
AMER. FOR.
72(10):30-32, 54-55, Oct. 1966. Photos.

Many facets of our largest National Seashore are presented—deep sea denizens, historical artifacts, migratory bird flyways, beachcombing assets, and a recreational vista of shifting sands, blue waters and solitude.

60049 Hawkes, A. L.
Coastal wetlands.
NARRAGANS. NATUR.
8(3):3-17, 1966. Ref., photos.

Salt marshes exhibit a wide variety of values and uses in a completely natural state. There are the recreation uses, such as hunting, fishing, shellfishing, and bird watching. Aesthetic and scientific values are based on the age and continuity of the vegetative community, open spaces along otherwise overbuilt and over-commercialized shorelines, and potential as natural marine shore parks. Evaluations of riparian rights and acreage prices are given.

60050 Heald, W. F.
Canyonlands National Park.
ARIZ. HIGHW.
47(7):10-11, 29, 33, July 1966. Map, photos.

Canyonlands National Park in southeastern Utah, established in 1964, includes a sizable area along the Colorado and Green Rivers. This section of the canyon contains some of the most spectacular scenery of the world, but it is such a rough, dry, barren labyrinth that few explorers have penetrated its depths. The entire area is a gigantic museum where even the layman finds geology exciting. Biological conditions vary with the altitude from the Lower Sonoran zone in the deep canyons to areas of pinons and junipers on the rims. To the east of the Needles Country is the area of the superb Angel and Druid arches, with scattered well-preserved cliff dwellings and pictographs of the prehistoric Indian inhabitants. To the south is Glen Canyon Dam which impounds the Colorado River's waters into a reservoir, Lake Powell. Under consideration is a "Golden Circle" which would include most of the canyon counties, national parks, national monuments, national forests, state parks, and new areas raised to park status, all connected by scenic highways. Plans are progressing for the development of facilities in Canyonlands Park, such as overnight accommodations, restaurants, service stations and trailer parks. Park activities are now centered at Moab, Utah.

60051 Hernandez, M.
Lake Havasu City.
ARIZ. HIGHW.
42(2):2-7, Feb. 1966.

Lake Havasu City, Arizona, planned for a population of 60,000 inhabitants, is becoming a sportman's mecca, a vacation resort, and a retirement haven. Boating enthusiasts find more than 75 miles of lake and river on which to travel between Parker and Davis Dams. Boating and skiing events on the lake are international attractions. Fishing is also a major sport. Thirteen thousand acres of Lake Havasu frontage adjacent to the new community have been leased by the federal government to Arizona for public parks and recreation. Bathing beaches, campsites, trailer sites, picnic grounds, and boating facilities are being developed. The lake

affords scenic views which are spectacular. Added attractions are the Lake Havasu National Wildlife Refuge located north of the city and prehistoric Indian petroglyphs at Picture Rock.

60052 Hill, F.
Parks don't just happen.
W. VA. CONSERV.
29(12):24-30, Feb. 1966. Photos.

The four new state parks that are under development in West Virginia are: (1) Canaan Valley State Park, (2) Twin Falls State Park, (3) Pipestem State Park, and (4) Valley Falls State Park. The criteria, the plans, the steps, the cost, and the methods of acquiring the land for a park are discussed.

60053 Hoover, B. H.; Rensch, H. E.; Rensch, E. G.
Historic spots in California. 3rd edition.
Stanford, Stanford Univ. Press
642p. 1966. Ref, maps, photos.
Revised by W. N. Abeloe.

The purpose of this work is three-fold: to create interest in the local history of California among its citizens, to make knowledge of the historic spots in different localities available to tourists, and to arouse a state-wide interest in the preservation of those vanishing historic landmarks. This third edition reflects the tremendous changes which have occurred in California since 1948 and calls attention to the need for immediate action to preserve the rapidly disappearing landmarks. With population increase, vast rural areas have become urbanized. Creeks and rivers have been dammed, and whole canyons and valleys filled with water for agricultural and domestic use. A network of freeways is being built from Oregon to Mexico and from the Sierras to the sea. The 58 counties are presented in alphabetical order, with separate maps for each, and detailed maps showing large concentrations of historic places.

60054 Hunn, M.
Thirteen miles to nowhere.
TRAIL, TRAV. MAG.
31(3):25-27, 71-73, Mar. 1966. Photos.

For real peace and quiet, a journey along a 13-mile road into Florida's Fakahatchee Swamp is recommended. Officially it is known as the Collier County Scenic Road Park. Wildlife and beauty and solitude are abundant.

60055 Jaeger, J., Jr.
National recreation areas.
PARKS RECREAT.
1(8):629, 653-656, Aug. 1966. Photos.

The author covers the history of the National Recreation Areas in the United States. Recent impetus in establishing additional areas is described. A list of National Recreation Areas established as of June 1, 1966 is included.

60056 Janson, D.
People of the blue-green waters.
AUDUBON
68(6):464-469, Nov.-Dec. 1966. Photos.

The Havasupai Indians, living on the floor of the Havasu Canyon which is part of the Grand Canyon gorge, may be inundated by the waters of the proposed Bridge Canyon Dam. The Indians occupy a large reservation on the Grand Canyon's south rim. They have been told that the big lake will make their tribe economically independent through development of its great recreational potential. At present in this area numerous waterfalls and blue-green pools may be visited by foot or on horseback. The rush of civilization has passed by the valley until now, and the Indians hope that no man-made dam will mar their little paradise.

60057 Jaska, B.
Fort Griffin.
TEX. PARKS WILDL.
24(12):19-22, Dec. 1966. Illus., photos.

The story of Fort Griffin typifies the development of Texas in the third quarter of the 19th century. After the Civil War, forts, such as Fort Griffin, were established along the frontier of Texas to protect the settlers from Indian attacks. By 1881 Indian raids were no longer a problem and the Fort was closed. Today Fort Griffin and its surrounding area is a State Park which contains picnicking and camping areas, and a herd of Longhorn cattle which once roamed free over the Texas plains.

60058 Jass, R. F.
Pocket parks.
AMER. CITY.
81(12):86-87, Dec. 1966. Illus.

Pocket parks in the form of novel street planting brighten a community's downtown appearance. Here the Town Planner of Greenwich, Connecticut, tells how it can be done.

60059 Jett, T. S.
Renaissance of the "Grand Mall".
PARKS RECREAT.
1(4):324-326, Apr. 1966. Photos.

Building removal creates dramatic changes that will be evident to delegates visiting our beautiful national capital while attending the National Congress for Recreation and Parks, October 9-13, 1966.

60060 Karn, E.
That's what I like about the South.
TRAIL, TRAV. MAG.
31(3):41-44, 60-62, March 1966. Map, Photos.

Charleston — with its fine old homes, its magnificent flower gardens, and nearby Fort Sumter — symbolizes the charm of the Southland.

60061 Kern, E. E.; Driscoll, L. S.
Marketing of outdoor recreational services in rural areas.
J. SOIL WAT. CONSERV.

No abstract.

60065 Krutch, J. W.
Dam the Grand Canyon?
AUDUBON
68(5):308-311, Sept.-Oct., 1966. Photos.

The Grand Canyon is one of the world's most visited spots, yet solitude and untouched nature can be found by those who desire it. Two dams, one in Marble Canyon, the other in the Lower Granite Gorge, proposed for the Colorado River present a serious threat to the Canyon's scientific value and natural beauty. Proponents stress the monetary return from power generation. This would help pay for Arizona irrigation projects and new recreation facilities. Opponents argue for preservation of the inviolability of the National Park. The value of the beauty of the Grand Canyon is its own reason for being.

60066 Lambert, D.
Over the years with Great Basin Park.
NAT. PARKS MAG.
40(225):12-16, June 1966. Map, photos.

The establishment of Great Basin National Park has been favored by three Presidents, the Nevada legislature, and numerous conservationists. The focus on this proposed park was sharpened by the unwitting destruction in 1964 of a 4900-year old bristle-cone pine —the oldest living tree as of that time.

60067 Lea, C.
Our great opportunity . . . to save Indiana dunes.
GARDENER
26(1):4-5, Jan.-Feb., 1966.

Discusses the value and the importance of the establishment and the preservation of the Indiana Dunes as a national lakeshore.

60068 Lind, C. V.
Hunt here? No!
COLO. OUTD.
15(5):12-14, Sept.-Oct. 1966. Photo.

In a discussion of landowner-sportsman relationship problems, the author suggests ways in which hunters and private landowners can cooperate to solve the major issues.

60069 McCormick, T.
Vermonters build new industry . . . on idled farmland.
EXT. SERV. REV.
37(7):8-9, July 1966. Photos.

Vermont dairying is being concentrated on fewer farms year by year, leaving a land-use and employment vacuum. This article shows how man-made lakes and other commercial outdoor recreation enterprises are moving in to come to the rescue of Vermont's economy.

60070 McElrath, J.
Lamoille Canyon.
NEV. HIGHW. PARKS
26(4):20-25, 44, Winter 1966. Photos.

What's all this about Admiralty?
AMER. FOR.
72(5):38-41, 62-66, May 1966.

This article explores the recreational potential of Admiralty Island in Alaska. It emphasizes the mismanagement of forest lands.

60073 Merrill, W. K.
Wilderness - The Three Sisters Area.
OUTD. CALL.
1(10):34-36, Dec. 1966. Maps, photos.

The sights, recreational activities, and access routes of the Three Sisters Area in Oregon are narrated.

60074 Mohr, C. E.; Poulson, T. L.
The life of the cave.
New York, McGraw-Hill
232p. 1966. Maps, illus, photos.

This authoritative book which describes various forms of life in the dark world of caves is in Our Living World of Nature series. Discussions of the life cycles of the principal inhabitants, temperature and humidity factors, and the scientific importance of leaving cave life undisturbed are included. It also contains a list and brief description of the commercial caves in the U.S., advice to would-be spelunkers, illustrations of cave formations, a glossary and a bibliography. Spectacular photography, maps, charts and drawings are found throughout the book.

60075 Morton, T. B.
Town Hall tonight.
HIST. PRESERV.
18(1):8-19, Jan.-Feb. 1966. Illus.

No abstract.

60076 Napier, A.
Vacationing among the Apaches. In
Roberts, E. A., ed. America Outdoors.
Silver Spring, Md., The National Observer.
p. 92-97, 1966. Maps, photos.

Enterprising Apache Indians are developing their reservation for the tourist trade. They are investing millions of dollars in campgrounds, trout lakes, motels, and other facilities. Native Indian dances, rodeos, arts and crafts, fishing, hunting, and horseback riding are featured. Tourists are encouraged to visit historical sites and explore the archaeological ruins.

60077 Nees, H.
Delaware Water Gap National Recreation Area.
APPALACH. TRAILW. NEWS.
27(2):23, May 1966.

Two possibilities could change what appears to be a permanent location of the Appalachian Trail in New Jersey from the Water Gap to High Point. One is construction of a "skyline drive" along the Kittatinny Ridges; the other is destruction of Sunfish Pond. A substantial number of people prefer unspoiled natural areas to scenic drives.

60078 Netboy, A.
Use of high country in Switzerland.
AMER. FOR.
72(10):6-7, 40, 42-43, Oct. 1966. Photos.

Current debates about the use of the North Cascades highlights the larger problem of how we are going to provide enough outdoor recreation facilities for a population that will top 300 million by the year 2000. The use that the Swiss make of their high country—especially in the Bernese Oberland area—is described. Since this area has many of the same material features as our North Cascades, the North Cascades could be developed somewhat like the Bernese Oberland.

60079 Newcomb, D. G.
We went camping with the Indians.
CAMP. GUIDE
43:10-13, 66-71, May 1966. Photos.

Many Indian reservations are now offering recreational facilities for campers. Not only are campsites, boat docks, etc., provided, but Indian ceremonies, dances, and feasts go on almost all year long. A selected list of campgrounds on Indian reservations is included, with informative notes about each.

60080 Newhouse, D. L.
The battle for wilderness in New York State's Forest Preserve.
LIV. WILDER.
39(93):11-19, Summer 1966. Maps, photos.

There is a controversy over the 2.6 million-acre Forest Preserve in New York State. Some advocate retention of its wilderness; other favor developing it for commercial lumbering, game management, recreation, tourist business and other special uses. A constitutional convention is to be held in 1967 to protect the wilderness status.

60081 Noble, N. W.
Highground Haven.
AMER. FOR.
72(6):30, 31, 50, June 1966. Photos.

The Lake Fork Recreation Area in Hinsdale and Ouray counties of Colorado is an 81,000-acre domain of public land straddling a high range

of Rocky Mountains. It offers awe-inspiring scenery, frontier history, abandoned mining camps, hunting, fishing, mountain climbing, and remote areas for exploration. Cut-throat trout abound. Elk, deer, mountain sheep and black bear are there. Permanent recreational facilities are being planned. A registered national landmark, the Slumgullion Earthflow is one outstanding attraction; an ancient volcanic caldera, the center of old mining interests, is another.

60082 Ogburn, C., Jr.
The winter beach.
New York, Morrow.
321p. 1966. Maps, illus.

The book describes the beaches of winter from the Outer Banks of North Carolina to Maine. Historical sites, geologic formations, wildlife, vegetation, towns and cities and parks are recorded and noted. From this perspective, people seem subjects of a far-reaching mechanism which controls the quality of living. Natural beauty becomes a medium through which life has some purpose. The close association with nature provides balance in the modern world.

60083 Olsson, S. G.
Private forests and public recreation.
FOR. FARM.
25(6):10, 14, Mar. 1966. Photo.

An article that extols private enterprise and the contributions that landowning companies are making to the nation's recreational resources. The author reiterates the strong opposition of the forest products industries to removal of more and more productive forest land from private ownership for a non-economic use.

60084 Parker, C. P.; Nelson, K. J. P.
Arizona, the enchanted land. Land of color and contrast.
ARIZ. HIGHW.
42(11):4-47, Nov. 1966. Maps, photos.

The state of Arizona is described in detail in this issue. A brief description is given of the national parks, monuments, memorials, recreational areas, and national forests. The highlight events for 1967 are listed. There is information on what to do and see in each of the fourteen counties. The various Indian tribes and reservations, the archaeology, history, and art museums are described.

60085 Pearl, M. A.
Public lands under review: Federal commission will study all public land laws.
PARKS RECREAT.
1(5):416-418, May 1966.

The staff director of the Public Land Law Review Commission tells how it is structured. The future establishment, development, and operation of hundreds of parks and recreation areas will depend upon the consideration, judgment, and final recommendations of the Commission.

60086 Peplow, E. H., Jr.
Centered on Sedona.
ARIZ. HIGHW.
42(6):10-11, June 1966. Map.

Sedona - Oak Creek country in northern Arizona is a center for many of Arizona's attractions from the Hopi and Navajo country to the north, Phoenix to the south, the White Mountains to the east, the Hualapi Indian Reservation on the west, the Grand Canyon and Kaibab Forest on the north-east, and the Salt River dams and lakes on the southeast. Some outstanding attractions are: Montezuma Castle; Jerome, a former copper mining town; Prescott, original capital of Arizona; Lowell Observatory in Flagstaff; the Museum of Northern Arizona; Walnut Canyon; Sunset and Meteor Craters; Petrified Forest National Park; the Painted Desert; Wupatki National Monument.

60087 Peplow, E. H., Jr.
The Payson Country.
ARIZ. HIGHW.
42(4):8-11, 30-37, Apr. 1966. Map, photos.

Payson Country, which encompasses 25 miles around Payson City, is an area of prehistoric Indian cliff dwellings and modern summer homes; giant saguaro cacti and Ponderosa Pines; Gila monsters and cougars; desertscapes and mountain lakes. Its areas of national forests providing camping and fishing, and the famous Zane Grey Highway bordering the Mogollon Rim, are described.

60088 Philipson, J.
Tour the Adirondacks.
FORD TIMES
59(8):24-28, Aug. 1966. Illus.

The Adirondack Mountains contains a fantasy-land of natural beauty and man-made attractions that are ideal for family touring, according to this descriptive article.

60089 Phillips, H. S.
International peace gardens.
PARK MAINTEN.
19(10):74-77, Oct. 1966. Map, photos.

In Salt Lake City is a garden where beauty speaks many languages. The procedure has been that each interested nation is allotted a garden plot to design, create and plant entirely at its own expense and discretion. When each garden is finished, it is dedicated with proper ceremony and presented to the city. From then on, the Park Department assumes full responsibility for all care and maintenance aspects. Fifteen different countries already are represented in the International Peace Gardens.

60090 Porter, E.
The place no one knew. Glen Canyon on the Colorado.
San Francisco, Sierra Club
186p. 1966. Ref., photos.

The beauties and rare formations of Glen Canyon and side canyons comprising the "Place

No One Knew" are recorded for history in this book. There are beautiful color photographs and philosophical quotations. In sponsoring the book the Sierra Club provides some thoughts on conservation.

60091 Raymond, S.
The Great Cascades debate.
FIELD STREAM
71(7):10-12, 14-15, 42, Nov. 1966. Maps, photos.

The problem in Washington State is not whether to save this wild area, but how best to do it. Here is narrated the history and varied viewpoints and possible legislative outcome of this controversy. Map illustrations of the North Cascades Report Plan and of the State Game Commission Plan are included.

60092 Robinson, J.; Calais, A.
California state parks.
Menlo Park, Lane
96p. 1966. Maps, photos, tables.

In this book the State parks of California are thoroughly described; generally, they are small and varied from the beach park on the coast to the yellow pine forest or redwood groves in mountainous areas. The parks are grouped geographically into seven sections, with an eighth section on historic parks and monuments. Each one might be reached in a day's drive from a metropolitan center.

7(12):20-25, Dec. 1966. Photos.

No abstract.

60094 Scharff, R.
Canada's mountain national parks.
New York, David McKay.
184p. 1966. Maps, photos.

The large scenic and recreational national parks in Canada's mountains here described include: Banff, Jasper, Waterton Lakes on the east slope of the Rocky Mountains in Alberta; and in British Columbia, Kootenay and Yoho on the west slope, and Glacier and Mount Revelstoke in the Silkirk Mountains. These mountain parks are areas of outstanding grandeur. Locations of the parks are given, followed by brief histories. Information is provided on methods of reaching the parks, general regulations for visitors, park administration, highway traffic regulations, fire prevention, camping, fishing, animal and plant life, wildlife preservation, sightseeing, trails, skiing, roadways, and accommodations.

60095 Schuster, C. N., Jr.
The nature of a tidal marsh.
CONSERVATIONIST
21(1):22-29, 36, Aug. -Sept. 1966. Ref., illus.

The tidal marsh is one of the most dynamic units of nature, an ecosystem where air, land, living things, and water are continuously interacting. In most areas, the extensive geologic development, the elevation of the marsh, and the plants associated with it are recognized as "low" and "high" marsh. Local patterns of weather, day length, and light intensity affect species, as does fresh water.

60096 Sloane, H. N.; Gurnee, R. H.
Visiting American caves.
New York, Crown Publishers
246p. 1966. Ref. maps.

Caves under private or public ownership open to visitors are generally lighted and have a guide service. Limestone, sea, gypsum, ice, lava, as well as caves of archaeological significance, are included. Descriptions of cave formations and man-made structures are given. Regional maps give site locations of caves in the area. Nearby attractions and facilities are also listed. A glossary of cave terms is included. The index contains names of caves believed to be closed as well as names given to formations or scenes in caves.

60097 Smith, A. W.
The trail and campfire country.
NAT. PARKS MAG.
49(228):2, Sept. 1966.

In order to urge that the Smokies be preserved mainly as hiking and horseback country, people came from all over America to the hearings at Gatlinburg, Tennessee and Bryson City, North Carolina conducted by the National Park Service. The editor reports not only on the hearings but on the need to protect the trail and campfire country of the High Smokies as human refuges and as wilderness areas that will serve valuable non-human purposes as well.

60098 Smith, A. W.; Hart, W. J.
A wilderness plan for Craters of the Moon National Monument and the surrounding region.
NAT. PARKS MAG.
40(230):4-9, Nov. 1966. Maps, photos.

The National Parks Association proposes two plans for Craters of the Moon National Monument, namely (1) a Wilderness Plan and (2) a Regional Plan for the area around the National Monument. The Regional Plan calls for a recreation region and the Wilderness Plan proposes four wilderness areas. Visitation to the recreation region may be distributed over a wide area. The four wilderness areas to be established will not impair the existing wildlife environment.

60099 Smith, I.
Arizona's underground wonderland.
ARIZ. HIGHW.
52(9):28-39, Sept. 1966. Photos.

Of Arizona's 120 caves, only two are open to the public under adequate supervision: Colossal Cave, east of Tucson, and Grand Canyon Caverns, west of Seligman. Arizona limestone caves reveal marine fossils of 180 to 270 million years ago. There are three caving groups in Arizona. Two explore for recreation and adventure, the third for scientific study. Rare mineral formations, fossils and animal inhabitants, especially bats, are studied. Conservation of all these caves is emphasized. Many are in private hands and vandalism is rampant.

60100 Stough, D.
Outdoor laboratories.
OUR PUBL. LANDS
15(5):18-20, Summer 1966. Photos.

Discusses the 460 million acres of public domain lands and the approximately 130 natural areas which the Bureau of Land Management is attempting to establish and preserve. These natural areas present rich opportunity for geological and ecological study, educational research and multiple-use recreational management. Examples are cited.

60101 Stradt, G. H.
Georgia's national forests.
FOR. FARM.
25(8):17, 46-47, Apr. 1966. Photos.

A report on the development, management, and expanding role of national forests in Georgia. While there have been changes in wildlife management and timber management, the greatest change has been in the demand for outdoor recreation. Whether hunters, fishermen, campers, hikers, rock hounds — the users of forest land are myriad.

60109 Wadsworth, N.
Yellowstone.
In Roberts, E. A. ed. America Outdoors.
Silver Spring, Md. The National Observer.
p. 56-61, 1966. Photos.

America's largest and oldest national park, set aside by the government 93 years ago, is

still visited by millions. The wildlife and particularly the geologic marvels of the region have fascinated visitors from John Colter in 1806 to the present day. Inspired by the beauty of the area after a visit in 1870, a group of Montana men, including Judge Cornelius Hedges, conceived the idea of a national park to make "a great national preserve for the people, removed forever by law from commercial exploitation."

60110 Wayburn, E.
Moment of truth for redwoods.
SIERRA CLUB BULL.
51(6):8-9, June 1966. Illus., photos.

Redwoods have become news from Maine to Mexico. Logging continues even at this moment of crucial decision. Two choices are indicated: The Administration's proposal of a 43,000-acre park located in the Mill Creek watershed in Del Norte County; the Sierra Club's proposal of a 90,000-acre park in the Redwood Creek region of Humboldt County. Three questions should be answered: (1) which area can best give present and future generations of Americans the experience of knowing the redwoods in their full sweep from coast to mountaintop; (2) which area offers the best conservation opportunity for preservation of the coast redwoods species in its total environment; (3) which area is big enough and varied enough to support a broad program of national park development; estimates project 2 1/2 million people to visit Redwoods National Park by 1983. In the light of these questions, the Redwood Creek area is the best choice. Bold action is needed to curtail logging and establish a Redwood Creek National Park.

60111 Weld, P. M.
Couchsachraga: Vanishing wilderness?
ADIRONDAC
30(2):34-35, Mar. -Apr. 1966.

To help preserve trailless mountain tops, a unique feature of many Adirondack mountains, the prevention of path formations is urged. New climbers should be motivated to think about conservation as well as climbing, else the trailless domain that is a joy to explore will cease to exist in the Adirondacks.

60112 Wharton, D.
Cape Cod.
NAT. WILDL.
4(5):37-40, Aug. -Sept. 1966. Photos.

Describes Cape Cod National Seashore, the first National Park Service area acquired chiefly by purchase. The value of this new National Seashore is increased greatly by its proximity and accessibility to the New England States. The other national seashores are discussed briefly.

60113 Whitely, G. C., Jr.
Escape to Cape Cod.
FRONTIERS

No abstract.

60115 Wilderness Conference, 9th, San Francisco, 1965
Wilderness in a changing world.
San Francisco, Calif., Sierra Club
255p. 1966. Maps, photos.

These biennial conferences on wilderness sponsored by the Sierra Club since 1949 focus attention on the preservation of some of our land in its natural condition. The keynote address describes the relationships of wilderness and man. Wilderness in crisis is discussed in terms of population pressure, economics, and planning problems. The impact of technology is described in papers on conservation of energy, proposed dams in Alaska, and problems of pollution. The meaning of wilderness to man is explored from the humanitarian, spiritual, and psychological viewpoints.

60116 Writers' Program, Arizona
Arizona, The Grand Canyon State.
New York, Hastings House
532p. 1966. Ref., maps, photos.

This guide to Arizona deals with the historical background of the State from the earliest times as depicted from the archaeological sites to the present day. Arizona's eleven principal cities are described, and the recreation opportunities of the area are mentioned. Tours to places of interest are included, with information on campgrounds and accommodations enroute. The concluding section deals with the Grand Canyon National Park and tours available there.

Points of interest along the Appalachian Trail of New York and New Jersey are described.

60118 Western Ranches
DUDE RANCH
35(4):28-34, Fall 1966. Map.

Two types of dude ranches offer recreation opportunities: 1) the working ranch devoted to the raising of livestock and agricultural crops employing western men and increasingly working guests; 2) the mountain ranch designed to care for guests where horses are primarily the only livestock. Most members of the Dude Ranchers' Association make summer pack trips into wilderness areas adjacent to their ranches and outfit big game hunting parties during the hunting season. A list of ranches, members of the Dude Ranchers' Association, is given.

60119 Anderson, R. L.
Wild rivers: an added dimension in water resource use.
Western Agricultural Economics Research Council. Committee on the Economics of Water Resources Development.
Water resources and development of the West.
Pullman, Wash., Wash. State Univ.
p. 33-39, 1966. /Report no. 13/

The idea of setting aside certain rivers in their natural state was derived from recommendations of the Senate Select Committee on Water Resources in 1961 and the ORRRC Report in 1962. Detailed field studies were accomplished in 1963 on 9 western rivers. Evaluation criteria for selection and evaluation of possible wild rivers are: (1) Condition—The river should be relatively free-flowing and unpolluted, the scenery pleasant and of tree wilderness character. (2) Quality—The river and its setting should possess natural and recreational values of outstanding quality. (3) Capacity—The river and its setting should be large enough to sustain existing recreation use or to accommodate more use without undue impairment of the natural values or quality of the recreational experience. (4) Highest Use—Retention of the river in its natural free-flowing condition should outweigh alternative uses. (5) No water development projects are authorized or underway which would permanently or drastically impair the existing natural and recreational values of the river and its setting. Wild rivers will be developed for recreation, education and aesthetic qualities rather than for economic considerations. The author believes the people of the United States can afford the cost of establishing a nationwide system of rivers with varied characteristics.

Under warm Lake Mojave is a cold river. The water temperature difference is enough to provide perfect trout water below and perfect bass water above. Fishing techniques for both kinds of fishing are given.

60126 Cromie, W. J.
The living world of the sea.
Englewood Cliffs, N. J. Prentice Hall
343p. 1966. Ref., illus., photos.

The teeming life of the oceans is described in great detail. The lives, feeding habits and danger to humans of sharks, shales and rays are described; also information on snakes and turtles is given. Fishes and their physiology are described

as a group. The mammals, porpoises, seals, walrus, dolphins, and whales are described last. The book as a whole points up the evolutionary and ecological relationships of species. The treatise concludes with a chapter on man's relationship to the products of the sea and the need to use the great resources of the oceans wisely.

60127 Dietz, L.
The Allagash.
DOWN EAST
13(3):20-23, 50-52, Oct. 1966. Map, photos.

An account of the Allagash—its description, history, geology, and meaning as a sanctuary for the human spirit. It may become established as a wilderness waterway, depending upon the November 8 decision of Maine voters. If they approve the bond issue, the State Park and Recreation Commission will establish a 300,000-acre waterway park in the Allagash region. Federal matching funds will then be made available. It is a golden opportunity for Maine citizens to preserve one of America's last wilderness areas.

60128 Dominy, F. E.
The reformation of "Old Red."
PARKS RECREAT.
1(4):314-315, 358-362, Apr. 1966. Illus.

The Commissioner of Reclamation, U.S. Department of the Interior, assesses the results of dams on the lower Colorado River. The transformation of "Old Red" and a once hostile desert land was set in motion by the construction of Hoover Dam. Lake Mead behind Hoover Dam became a recreation attraction for the entire Southwest. Glen Canyon Dam in Utah and Arizona, and Flaming Gorge Dam in Utah and Wyoming are deemed nationally significant. The blue waters and vast, spectacular settings of these new jewel-like lakes on the Colorado River will delight visitors of all ages.

60129 Farb, P.
Water.
NAT. WILDL.
4(4):4-9, June-July 1966. Photos.

The water supply available is plentiful for man's existence. The shortage of water may be attributed to the following facts: (1) precipitation does not necessarily fall in the right place at the right time, (2) loss of water by "runoff" causing floods, (3) unwise use of water, (4) loss through sedimentation, (5) pollution by factories and cities. These problems can be solved by, (1) transporting unused water from plentiful areas to dry areas, (2) desalinization of water, (3) increasing the yield of water from high mountain forests, (4) conservation of water on small tributaries of rivers, and (5) elimination of water pollution.

60130 Hayden, C.
Utilizing the great river.
PARKS RECREAT.
1(6):501, 524-525, June 1966. Illus.

The Colorado River can produce enough water to serve the power needs of an aqueduct for Arizona. The plan for diverting water from the Colorado River contains as its principal feature the Central Arizona Project Unit. Arizona's right to Colorado River water has been sustained by the U.S. Supreme Court. The project is economically feasible. Construction of Bridge and Marble Canyon Dams as key features has now been challenged. The recreation potential of these project is described. Senator Hayden maintains that Bridge and Marble Canyon reservoirs will not prevent, but enhance, the opportunities for enjoyment.

The glory of Adirondack brooks.
ADIRONDAC
30(3):44-48, May-June 1966. Illus. Photo.

One of the most delightful rewards of mountain climbing in the Adirondacks is the discovery of hidden beauties in the streams. Crystal clear water and coolness and visual beauty and soothing orchestral sounds characterize these Adirondack mountain brooks.

60146 The National Observer
Water to live with. In
Roberts, E. A. ed. America Outdoors.
Silver Spring, Md., The National Observer.
p. 18 - 34, 1966. Photos.

Beyond the obvious primary uses of water—in homes, factories and on farms—there is also the need for abundant clear water for recreation, a use listed as "primary" by many government experts. An Outdoor Recreation Resources Review Commission survey shows that 44% of the population prefers recreational activities directly involving water; many others involve the use of clean water. Tax prods, the concept of eminent domain, access laws and easements are some of the devices for getting the public to the water. Near coastlines, desalination is a research possibility. Research is also probing reuse of water and of pollution control. The Public Health Service was authorized by Congress to devise large-scale programs for eliminating and reducing pollution on interstate waterways: By 1965 eight programs affecting one-third of the country's land and almost half its population were under intensive study. The PHS was also directed to promote uniform state laws concerning pollution abatement and enforcement. It was directed to assist municipalities to build waste treatment plants.

The aging Great Lakes.
SCI. AMER.
215(5):95-100, 102, 194, Nov. 1966. Maps, illus., photos.

The Great Lakes are an inestimable natural resource for the development of the United States and Canada. They supply vast amounts of water for various needs, particularly for drinking and industrial use, and serve as an immense playground for human relaxation through boating, swimming and fishing. The aging of the Great Lakes is accelerated by pollution from industries and sewage. Ecological balance at the bottom of the lakes is disrupted. Some fish species have disappeared. Others have been introduced through canals or stocking. These factors change the nature of the lakes.

Wild rivers preservation and Wisconsin's program.
In International Association of Game, Fish and Conservation Commissioners.
PROCEEDINGS, 55th convention, 1965.
Portland, Oreg.
p. 123 - 129, 1966.

The crux of Wisconsin's problem in river management for wilderness vs. economic development focuses on the pressure from people who want to use and enjoy the state's natural resources. The conservation of wilderness must be accomplished by arbitrary exclusion of hostile economic process and must be conserved in advance of the onslaught of the economic process. A chronological history of various activities and legislation pertaining to the State's wild and free-flowing rivers may be of value in analyzing comparable problems in other States.

60163 U.S. Bureau of Reclamation
Project History, Angostura unit, Cheyenne Division, Missouri River Basin Project, v. 20.
Huron, S. D.
1106p. 1966. Photos.

The overall use of Angostura Reservoir for recreation purposes dropped about one-third during 1965, according to a report from the South Dakota Department of Game, Fish and Parks. The drop in use is attributed to cold, wet rains during spring and early summer. Catfish fishing was the best; bass and walleye were slow; fishing as a whole was termed poor, partly because of lack of fishermen. There were certain indications of a good fish population. Pheasant and deer hunting remain good. A substantial

increase in fox population was noted. Two picnic table shelters and the development of a swimming beach add to the recreational area. Planting of food crops for wildlife in Horsehead and Dry Creek areas is carried on by Department of Game, Fish and Parks and neighboring ranchers on a share basis. The Recreation and Wildlife Summary report for 1965 is included in the appendix.

60164 U.S. Bureau of Reclamation
Project History, Colorado - Big Thompson Project, v. 28.
N.P.
175p. 1966.

Use of the recreation facilities at Colorado - Big Thompson reservoirs decreased nearly 12% from 1964. All reservoirs showed a decrease except Flatiron, Rattlesnake and East Portal. The camping concession at East Portal was a contributing factor in increase in visitation. The Colorado Game, Fish and Parks Department initiated an area use fee in 1965. Green Mountain and Willow Creek reservoirs are administered by this department and visitors are subject to the use fee. Information on the administration, visitor usage and facilities are given for the following areas: Green Mountain Reservoir, Willow Creek Reservoir, Shadow Mountain National Recreation Area, East Portal Reservoir, Marys Lake, Lake Estes, Rattlesnake Reservoir, Flatiron Reservoir, Carter Lake and Horsetooth Reservoir.

SUNSET
136(6):76-85, June 1966. Map, photos.

Boating is the great way to see the Rogue River of southwestern Oregon. The Rogue is noted for fishing, swimming, picnicking, camping, and exploring. The 120-mile section from Grants Pass to the ocean is proposed for inclusion in a National Wild Rivers System. A description of this section is given. Notes accompany a detailed map and provide guidelines to access and trips available at various junctures.

60179
Wild river status for Youghiogheny given strong support by Conservancy.
WATER LAND LIFE
8(1):21-22, Apr. 1966.

Western Pennsylvania Conservancy has reaffirmed its support of the Wild River bill now pending in Congress and has urged that the Youghiogheny River be added to the National Wild River System.

60180 Martin, R.G.
Trout
VA. WILDL.
27(4):6-7, 26, Apr. 1966. Photos, table.

Geographically, Virginia lies on the border of the natural trout range in eastern U.S. Trout fishing as practiced in Virginia today is dependent on a large-scale hatching, rearing and stocking program. The State agency's program and problems are described. A large table gives the statewide 1966 in-season restocking plan.

60181 Spencer, D. A.
Protecting the sportsman's paradise. In
The Yearbook of Agriculture 1966.
Washington, U.S. Govt. Print. Off.
p. 49-54, 1966. Illus.

Advancing civilization is constantly creating new problems in protecting our fish and wildlife. This chapter reports how many of these new problems are being solved and about the continuing programs of Federal agencies to protect our nation's fish and game.

60182 Underhill, A. H.
The role of fish and wildlife in outdoor recreation. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 55th convention, 1965.
Portland, Oreg.
p. 78-82, 1966.

Man's short-sighted and ruthless exploitation of natural resources is common knowledge. Conservationists of all types present divergent and conflicting viewpoints although conservation is most often supported by sportsmen and fishermen. The Bureau of Outdoor Recreation supports the theory that fish and wildlife occupy a significant place among the resources which provide needed outdoor recreation for man. Often the abundance of fish and game is controlled by other resources such as soil, water and forests. Imagination is needed in developing programs which combine hunting thrills, a limited harvest and good wildlife management in spite of mushrooming populations. State plans should reflect the role that hunting, fishing and other recreation uses of fish and wildlife should play in a state's outdoor recreation program.

60183 Weddle, F.
The fish that's too big to keep.
NAT. WILDL.
4(3):29-30, Apr. - May 1966. Photo.

An explanation and a description of the white sturgeon, the largest fresh water fish in the North American waters, is given. The importance of rigid regulations in fishing are discussed for the conservation of the sturgeon.

60184 Woodward, H.R.
The place of fish and wildlife in the national outdoor recreation program. In International Association of Game, Fish and Conservation Commissioners. Proceeding, 55th Convention, 1965.
Portland, Oreg.
p. 82-85, 1966.

State game and fish departments are the real pioneers in outdoor recreation and deserve a prime position in every State under the expanded program sponsored by the Bureau of Outdoor Recreation. Administratively, they should coordinate with the Bureau, and should be allocated sufficient Land and Water Conservation

Funds for their programs. Administrators need adequate and ambitious planning staffs in view of the strong position of fish and game in State Parks and the importance of fish and game in any comprehensive state plan for Outdoor Recreation. Some citizen and professional groups should also work with the Bureau of Outdoor Recreation in support of State viewpoints on fish and game.

60185 Bates, O.
Wanted: hunters.
OUTD. CALL.
1(7):10-17, Sept. 1966. Photos.

In every State, there is game that is going to waste because hunters do not take advantage of the situation. The author discusses their locations and varieties.

60186 Bierly, E. J.
The rescued.
NAT. WILDL.
4(4):23-27, June - July 1966. Photos.

The author discusses the destruction of wildlife before and after 1900. With the efforts of conservationists and conservation legislation for preservation of endangered species, there is a greater survival of wildlife.

60187 Brown, M.
What future for birds of prey?
AUDUBON
68(5):331-342, Sept.-Oct., 1966. Photos.

The destruction of birds of prey by man continues; only in wildlife refuges and national parks are they safe. Pesticides take their toll. Migrating birds of prey may be seen from Hawk Mountain, now a bird sanctuary in Pennsylvania. Hawk shooting in that State was a pastime for 70 years. Although 19 States accord legal protection to all birds of prey and another 26 protect some species, Pennsylvania lags in hawk protection.

60188 Dasmann, R. F.
Wildlife and outdoor recreation.
VA. WILDL.
27(8):4-5, 21-22, Aug. 1966. Photos.

Advice from the Conservation Foundation on the value of wildlife as outdoor recreation resources. Apart from the extent to which they encourage the pursuit of hunting, wild animals contribute to the recreation value of land in many ways. In addition, he discusses what can be done to achieve a city landscape favorable to an abundance of birds and smaller wild animals.

60189 Dufresne, F.
Plight of the ice bear.
AUDUBON
68(6):418-424, Nov.-Dec. 1966. Map.
Photos.

Gaps in knowledge of the ecology of the ice bear's life cycle portend that global regulations

may be needed to save the polar bear from being exterminated within the century. Arctic explorers and Eskimo hunters have observed that females are generally found along the shoreline, while males inhabit the ice fields. Floating ice carries the bears hundreds of thousands of miles in their 30-year life span. Hunting and dwindling arctic ice reduce their numbers. Special international agreements are being considered to conserve the dwindling populations.

60190 Hausman, L. A.
Birds of prey of northeastern North America.
Peterborough, N. H., R. R. Smith
164p. 1966. Illus.

In their "rightful habitat" the birds of prey, so estimable an element of beauty and natural interest and so valuable a factor in the biological balance, should be protected by State and Federal laws. Here are described hawks, vultures, kites, ospreys, gyrfalcons, eagles and owls — their physical structure, habitat and distribution, food, and food-gathering habits.

60214 Stoeckeler, J. H.; Stoeckeler, H. S.
Improper wetland drainage makes water-killed trees a problem in roadside aesthetics.
BET. ROADS
36(8):24-26, Aug. 1966. Photos, table.

In terms of aesthetics and natural beauty, preserving and enhancing the landscape along our highways are important. While it is laudable to add more trees by planting, we should not overlook the need for preserving the natural tree growth already present along and near the right-of-way. In our millions of acres of wetlands lie a serious potential for destruction of roadside beauty. The authors grapple with the problem of roadside trees killed by flooding and make specific recommendations.

60215 Sturz, E.
Master of survival.
BOY'S LIFE
56(5):36-37, May 1966. Illus., photos.

Ken Cole, the "master of survival", is a leading authority on edible wild plants and survival techniques in the outdoors. Ways of identifying and preparing edible plants are discussed. Poisonous plants are identified and warnings given.

60216 Wagar, J. A.
Cultural treatment of vegetation of recreation sites. *In* Society of American Foresters. Proceedings, 1965.
Detroit, Mich.
p. 37-39, 1966. Illus.

Principles of recreation site management are related. He maintains that the emphasis on light use and wide spacing is neither possible nor desirable everywhere. As the number of outdoor visitors increases, the majority will have to be accommodated on rather intensively managed recreation sites.

Living ghosts of the Inyos.
AMER. FOR.
72(12):6-7, Dec. 1966. Photos.

What do they call the living ghosts of the Inyo Mountains? The world's oldest living trees—the Bristlecone Pines. Many are over 4,000 years old. Some of these ancient trees—such as the Patriarch, largest known bristlecone pine; or Methuselah, the oldest living tree known to exist anywhere in the world—are described here. In addition, a brochure and map of the Bristlecone Pine Recreation Area of the Inyo National Forest in California have recently been published by the Forest Service.

60218 Terjung, W. H.
Physiologic climates of the conterminous United States.

ANN. ASS. AMER. GEOGR.
56(1):141-179, Mar. 1966. Maps, illus.

Human comfort is expressed in a physioclimatic classification. Physiological and psychological reactions of man to temperature, relative humidity, wind chill, and solar radiation are combined into two nomograms from which average human reactions can be deduced. Comfort and wind effect indices are applied to meteorological data of the conterminous United States for July and January, daytime and nighttime, respectively. Maps combining both indices for July apply the classification on a larger scale (Southern California), and on a smaller scale (U. S.). A map of annual physioclimatic extremes synthesizes in generalized form how man tends to feel in various areas on a yearly basis. Thus, a three-step system results which attempts to revise certain conventional notions about comfort regions. The scheme is applicable to any dimension, time or region, and is a contribution to medical geography, climatological education, tourism, housing, clothing, and a general analytical tool, introducing greater precision into geography.

The proposed World Wildlife pavilion at the 1967 Universal and International Exhibition would be in the form of a floating ark, moored to one of the Exhibition islands in the St. Lawrence River.

60252 Isley, W. H.
Maintenance: low. How they do it at the Milwaukee County Zoo.
PARK MAINTEN.
19(6):8, 10-11, June 1966. Photos.

Although the zoo covers 117 acres and has as many as 32,000 visitors on a typical summer weekend, the Milwaukee County Zoological Park is one of the most carefully maintained zoos in the country. Its 86 employees operate the zoo at the optimum operating cost and run it efficiently throughout the year in extremes of climate. Industrial systems, such as scheduling of preventive maintenance and checklists, have been adapted to the zoo's special problems and conditions. The rain-making system and other equipment are described.

35(3):18, Mar. 1966.

The Allegheny National Forest which encompasses about 740,000 acres has vast recreation potential. Several camping and fishing areas of the Forest are described.

60256 Larson, R. D.
Ski touring trails.
TRENDS PARKS RECREAT.
3(2):20-22, Apr. 1966. Photos.

In areas where ski facilities are built on public land, the agency involved has controlled permit, extent and design of trail clearing, sanitary facilities and public safety. In areas built on private land the states promote legislation on safety of uphill transportation and licensing of commercial establishments. Financing and construction of trails, ski lifts and essential facilities have been carried on by private interests. Cross country skiing, ski touring, high touring, ski mountaineering are gaining adherents. Vast new areas with trails need to be opened. Touring facilities can be divided into two categories: 1) General outdoor recreation areas; 2) Natural environment areas. The first would serve those who come for the day and is of primary concern to the metropolitan planner, city and country park departments. The second, catering to the weekend or extended vacation skier, concerns interest areas on the state or national level. Trails for both types can combine a combination of public and private lands. Costs for the touring skier are small. Criteria for ski touring trails are provided.

60257 Leicester, J. B.
Movable bulkhead provides flexibility. In
SWIMMING POOL DATA AND REFERENCE
ANNUAL
33:128, 143-144, 146, 148, 1966.

The movable bulkhead answers the problem of flexible pool length, a distinct diving area, and

adequate pool division. The School of Physical Education of the University of Saskatchewan established rigid specifications for a bulkhead, and turned them over to be researched to Underwood McLellan and Associates, a firm of consultant engineers. The requirements for the pool are listed. The ease of movement, stability, and safety of the bulkhead are discussed.

60267 National Conference on Access to Recreational Waters, 4th, San Diego, 1965.
PROCEEDINGS
56p. 1966. Map, photos.

A conference on access to recreational waters is co-sponsored by the Sport Fishing Institute and the Outboard Boating Club of America. The theme of the program is inland arid coastal access facilities—what, when, and how. Major areas of discussion include: piers and reefs, recreation development at new and old national parks, Lakes Powell and Mead, development and safety problems of waterway access, large access, and recreation programs.

60268 National Conference on Areas and Facilities for Health, Physical Education, and Recreation. 3d, Indiana University 1965.
Planning areas and facilities for health, physical education, and recreation. Revised.
Chicago, Athletic Institute
272p. 1965. Illus., tables.

The report concentrates on basic objectives and needs, and deals with specific areas and facilities

such as park and school areas, recreation buildings, aquatic areas, and outdoor education-recreation areas and facilities.

60269 National Council of the Churches of Christ in the U. S. A. Committee on Camps and Conferences.

Site selection and development — camps-conferences-retreats.

Philadelphia, United Church Press
174p. 1965. Ref., maps, illus.

An attempt to provide solutions to the many problems connected with the selection and purchase of a campsite and development of facilities for the welfare of the campers and effectiveness of the program. Although the emphasis is on the solutions as they apply to church camps and conferences, the principles may be applied by any type of organization.

60272 O'Brien, B. R.
The future road system of Yellowstone National Park.
ANN. ASS. AMER. GEOG.
56(3):385-407, Sept. 1966. Ref., maps, photos, tables.

Although provision must be made for sharply increasing park visitation, the modernization of present park roads is adversely affecting the natural environment. The author suggests that a double-tracked "park type" road system could adequately handle twice the present traffic and interfere with park wilderness to a minimum degree. Yet research must be continued, he believes, on all phases of the preservation-utilization conflict within the national parks before anything resembling a permanent solution to park transportation problems is reached.

60273 Paeschke, R. A.
Family swimming outings gaining in popularity. In
SWIMMING POOL DATA AND REFERENCE
ANNUAL
33:85-86, 173, 1966.

In the more successful pool operations, management has found it more profitable to encourage family participation in the use of swimming facil-

ities as it increases revenues and affords greater safety with parental supervision. Picnic areas are often provided adjacent to swimming areas where family activities can be enjoyed; play equipment and play areas also encourage greater family participation.

60274 Parrish, J.
Along the Butterfield Trail.
DESERT
29(6):12-14, June 1966. Map, photos.

A description of two of the few remaining stage line stations is given. Many of the historic and original evidences of the culture of the times remain intact at the Alama Mountain and Cornudas Mountain stage stations along the Butterfield Trail in Texas.

60275 Peterson, J. A.
Recreational use of airports and adjacent lands.
Wheeling, W. Va. Nat. Recreation Park Ass.
41p. 1966. Illus. (Manage. aids bull. No. 60)

Some park and recreation activities and facilities are compatible with airport operations and can be located adjacent to or near airports. An attempt is made to determine what these uses might be and how they might best be combined. The results of a survey to that end are described and examples of how park and recreation uses might best fit into or adjacent to airport lands are outlined.

60276 Peterson, K. L.
Great Smoky road opposed.
TROUT
7(2):6-7, 12-13, Mar.-Apr., 1966. Maps, photo.

The National Park Service agreed upon certain road construction proposals with Swain County, N. C., 23 years ago. This highway construction would split one of the last extensive primitive areas in eastern U. S. It also would sacrifice irreplaceable wilderness country and valuable natural trout fisheries of the Great Smoky Mountains National Park. This article suggests several better alternate plans.

60277 Potomac Appalachian Trail Club, Washington, D. C.
Guide to the Appalachian Trail. Susquehanna River, to the Shenandoah National Park.
Washington.
251p. 1966.

Trail sections on the Appalachian Trail from the Susquehanna River to the Shenandoah National Park are described. Early history and trail distances in miles are stated. The final chapter deals with cabins and shelters available.

60278 Rand McNally
Travel Trailer Guide. 2nd edition.
Chicago
160p. 1966. Maps, tables.

The second edition of Travel Trailer Guide provides updated information on over 6,000 trailer areas across the United States. For each trailer site there is information on facilities, activities, access roads, fees and seasons when open.

60279 Ritter, P.
The in-between joy wheel.
LANDSC. ARCHITECT.
57(1):34-37, Oct. 1966. Maps, photos.

Properly planned and developed bicycle trails might well lead to reduced urban rush-hour auto traffic problems and provide healthful and enjoyable exercise for our citizenry as well. Examples of such planning are presented.

60280 Robinson, D.
Stream access.
W. VA. CONSERV.
30(1):29-31, Mar. 1966.

As a minimum guideline to meet future recreational demands on State waters, one access area for each 300 acres of lake water and for every five miles of stream has been suggested for West Virginia. Stresses importance of continued progress against pollution and a sound stream access program.

60281 Robinson, J.
Rests by the side of the road.
WESTWAYS
58(11):30-31, Nov. 1966. Photos.

Roadside rests and their function in general are explained first. Since the subconscious need for a break sometimes becomes so great on long drives that it imperils those riding in the car, one main purpose is to soothe the tight nerves of travellers to make the freeways safer. The article gives the chief specifications for a roadside rest, including the initial cost and its yearly maintenance expense. It also describes the California program of Safety Roadside Rests.

60282 Rutherford, J.
New ideas in prefab cabins.

60320 McMillan, R.C.
Should public parks upkeep cost be spread over nation.
PARK ADMIN.
31(2):42-43, Feb. 1966.

The Director of Parks, Manchester, England, discusses cost sharing of park maintenance on a nationwide basis at the first Symposium on Sport and Recreation. Other topics of discussion were: the advisability of dual-control of school playing fields for after-school use; regional use of public parks; the facilities a Sports Center should provide; and the comparative popularity of different outdoor recreation activities.

60321 Needy, J. R.
Filing systems.
Wheeling, Nat. Recreat. Park Ass.
36p. 1966. /National Recreation and Park Association. Management Aids Bulletin No. 57./

The author has examined many parks and recreation filing systems. He has compiled here the best features of many of these systems into an outline or sample filing system which could be adapted for use in most departments. Although each department must examine its own needs for filing and establish a system which best suits its own needs, this study provides a basic guide that could be followed in establishing a filing system for park and recreation departments.

60322 Swift, E.
Conservation Indians.
WILDL. N. C.
30(10):18-19, Oct. 1966. Photos.

Armchair planners alone cannot work out practical measures to do the job of recreation development. When reliance is made on the field force, good results will be seen. There must be planning, but it should be realistic and field men should be consulted. A good solid relationship between planners and field men is essential to accomplish any effective conservation of natural resources.

60323 Swift, E.
The folly of face lifting.
KY. HAPPY HUNT. GROUND
22(4):30-31, July 1966.

Comments are made on the speech of Dr. Ira Gabrielson at the recent 31st North American Wildlife Conference in Pittsburgh. Resource conservation is now more widely accepted than previously but it has become a vehicle for political careers. Devious and interesting paths to conservation success are looked for, but hard facts must be faced. Destructive processes of dam building, flood control, and industrial pollution harm our resources. Current issues, such as the preservation of the Redwoods and creation of a North Cascade National Park in Washington are mentioned as subjects for compromise.

60324 Symposium on Forest Watershed Management, Corvallis, Oreg., 1966.
Practical aspects of forest watershed management.
Corvallis, State University
135p. 1966. Ref., illus., tables.

The main objective of the symposium is to stimulate better management of soil and water resources on forest and range lands. Of particular interest from the viewpoint of recreation use is the determination of economic values for sport fishing in waters on forest lands.

60325 Towell, W. E.
Recreation and conservation.
ALA. CONSERV.
36(5):12-13, Aug.-Sept. 1966. Photo.

The President of the International Association of Game, Fish and Conservation Commissioners defines conservation primarily as the protection and management of natural resources. He believes outdoor recreation is of conservation concern only when it is associated with use of natural resources in the wild or semi-wild environment.

60326 Barker, S.O.
Pecos ruins. Newest national monument.
N. MEX. MAG.
44(6/7):30-31, 38, June/July 1966. Photos.

On September 1, 1965, the Pecos ruins near Santa Fe, New Mexico, became Pecos National Monument. Formerly a State Monument, it attracts as many as 14,000 visitors a year. The National Park Service plans to further excavate the ruins, develop more adequate tourist facilities, and furnish a more complete guide service for Pecos National Monument.

AMER. FOR.
72(7):22-24, 40-42, July 1966.

Everglades National Park is suffering from State and local pressure to drain its water level. Such action would destroy wildlife habitat and cause vegetation change. The Corps of Engineers' dikes and dams control the water around Lake Okeechobee where private interests favor land reclamation and farm protection. But drought in the park in 1961 and 1962 increased low water distress; and aroused conservationists asked Congress for studies to keep fresh water in the park for indigenous wildlife ecology. Interim measures of water release are being taken by the Corps of Engineers.

Recovery and recreation.
OUR PUBL. LANDS
15(5):16-17, Summer 1966. Photos.

Prior to 1900, a huge area in the Judith Mountains had been divested of timbers for fuelwood and mining operations. Because of an unusual forest recovery on the mountain ranges, the Bureau of Land Management has designated the Maiden Canyon as a recreational area.

60330 Cain, S.A.
Coordination of fish and wildlife values with water resources development goals. Speech. 2nd annual American Water Resources Assn. Conference, University of Chicago, Nov. 21, 1966.
U.S. DEPT. OF THE INTERIOR. NEWS RELEASE
11 p. Nov. 22, 1966.

These remarks explain the conflict within the ranks of conservation-development vs. preserva-

tion, and suggest ways to resolve it. Dr. Cain proposes that Interior have a veto power over estuarine tampering. This means that anyone intending to dredge or fill an estuary will have to obtain a Dept. of the Interior permit as well as a Corps of Engineers permit. Fish and wildlife values as well as navigational values are important uses of estuaries but estuaries are also places of natural beauty and scientific interest and recreational importance.

60331 Cain, S. A.
Program concepts of the Dept. of the Interior with regard to fish and wildlife. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 55th convention, 1965.
Portland. Oreg.
p.109-116, 1966.

Program concepts are interpreted. The program of the Bureau of Commercial Fisheries is concerned with oceanic resources and calls for expanded investigation of the environments of the seas and of the biological resources associated with them. The international treaty organizations and F.A.O. are supported. Treaties with foreign countries on the natural resource and the production of cheap fish protein for world consumption is part of this Bureau's responsibility. Cooperation is needed between the States and the Federal government on the research of estuaries and the inland water impoundments. Research in fisheries management and wildlife, especially refuge management, is the responsibility of the Bureau of Sport Fisheries and Wildlife in cooperation with the States and neighboring countries. The boundaries between State and Federal jurisdictions with regard to fish and wildlife management are areas of dispute.

60340 Dayton, H.
Conservation — present and future.
RESORT MANAGE.
20(3):16, 18, Mar. 1966.

Conservation is defined as "the planned management of natural resources to prevent exploitation, destruction, and neglect." A resort is only as healthy as the environment that surrounds it, and several examples are provided. In a few years, Federal participation in national outdoor recreation will have as much impact on hotel, motel and resort trends as the Federal highway program of today. We are confounded by the problems of undiminished pollution of air and water, noise and blight.

60341 Delano, S. C.
National Parks: long term problem.
GARD. CLUB AMER. BULL.
54(3):77, May 1966.

The Great Smoky Mountains National Road controversy is reviewed. The Garden Club believes that the National Park Service will make every effort to keep any road away from the areas particularly subject to erosion, from the spectacular primeval hardwoods, the wild trout streams, and the mountain wildernesses that are still unspoiled.

60342 Diamond, H. L.
The politics of beauty.
PARKS RECREAT.
1(2):138-141, 154, Feb. 1966. Photos.

Americans are concerned about the quality of the country as well as the quantity of the gross

national product. Government builds highways; provides the parks; regulates land use and controls water and air pollution. If we want government to do these jobs well, we must go into politics. Politics is the art of the possible. Beauty is going to have to tame the beast. We must accept reasonable compromises to obtain reasonable objectives.

60343 Fischer, V.
The seesaw in the Sawtooth.
AMER. FOR.
72(11):36-39, 78-79, Nov. 1966. Maps, photos.

At the edge of the Sawtooth Wilderness are a series of morainal lakes which are part of the Stanley Basin Recreation Area. Here is a fine water-oriented recreation complex. The Forest Service has done such an excellent job in administering both the wilderness area and recreation facilities in the valley that another agency would have little to offer if the area were to become a national park.

60344 Fiske, H.
Protecting vistas, visitors, and the companionable trees. In Roberts, E. A. ed., America Outdoors. Silver Spring, Md., The National Observer p. 48-55, 1966. Illus., photos.

National forests administered by the Forest Service operate under a multiple use program which permits timber growth for harvest and provides land for hunting, fishing, skiing and other recreational uses. The National Park Service administers its lands under three categories: natural, historical, and recreational. Chief administrative goal in recreation areas is use, not preservation. In contrast, the natural and historical sites are managed for preservation. Statistics show an increase in recreation use in both the national forests and national parks.

60345 Gallavan, P. J.
Summit Lake Gains Natural Landmark Status.
TRAIL TIMBERL.
(566):23-24, Feb. 1966. Illus.

Secretary of the Interior Stewart L. Udall directed establishment of the National Registry of Natural History Landmarks. Criteria for such status are given. Summit Lake met the qualifications and is now designated a Natural History Landmark. This beautiful lake is situated on the north side of Mt. Evans in Colorado in a glacial cirque about 1500 feet from its summit.

60346 Goldman, D.
National parks and the ecology of beauty.
AMER. FOR.
72(11):18-21, 46, 48, 50, 52, Nov. 1966. Photos.

Two inseparable elements, the tangible resources of land and intangible moods of human experience, form the factors dealt with by the National Park Service in creating and preserving

the ecology of natural beauty. Park management involves a study into park landscapes, and the roles of climate, fire, vegetation, animals and all other factors including man so that wise planning may ensue. If the natural beauty of the national parks is to be fully experienced, all facilities must be designed to minimize human impact on the scene and to incorporate natural values into their design. The philosophies and concepts of national park administration must be brought to bear on day-to-day problems of land management and public relations. The crisis apparent in the establishment of values must be met.

60347 Gregg, J.
Channelization of the Lower Colorado.
SIERRA CLUB BULL.
51(1):12-13, Jan. 1966. Illus., photos.

60356 Little, (Arthur D.) Inc.
The impact of the proposed Redwood National Park on the economy of Del Norte County. Report to the National Park Service, U.S. Department of the Interior.
Cambridge, Mass.
163p. 1966. Maps.

The Department of the Interior selects for intensive study a site in Del Norte County for a proposed Redwood National Park. This site includes both the existing Jedediah Smith and Del Norte Coast Redwoods State Parks as well as the area between them and the remainder of the Mill Creek watershed. To assess the possible impact of this park on the economy and on the people of Del Norte County, Arthur D. Little, Inc., prepared short and long-range estimates of the employment and income of the county's residents and analyzed the county's fiscal situation. Estimates are based on two assumptions: (a) there would be no park; (b) that there would be a park. A five-year period 1968-1973 is assumed for the basic development of the park plus an additional 10-year period (to 1983) to contrast the differences in the economy between the alternatives. Findings for the park indicate a general initial depression of employment and salaries in 1973 with an increase of employment and salaries in 1983. Employees in the special category of the lumber and wood pulp industry would decline in 1973 and 1983 if the park is established. The economic impact of outdoor recreation on Del Norte County is also noted.

Storm over the Grand Canyon.
PARKS RECREAT.
1(6):496-500, June 1966. Photos.

The Bureau of Reclamation contends that if the Bridge Canyon and Marble Canyon Dams are built on the Colorado River, that "the recreation, fish and wildlife values accruing from these de-

velopments—aside from their other multi-purpose water benefits—are ample justification for their construction." Not in agreement with this view is that of the Bureau of Outdoor Recreation, which reports that less costly alternatives are available for expanding recreation facilities in the area. It states that it would be an inexcusable act of vandalism to mutilate the Grand Canyon, and the Marble Canyon Dam would flood the entire length of the Grand Canyon National Monument.

60360 The National Observer
Where now is the countryside? In Roberts, E. A.
ed., America Outdoors
Silver Spring, Md., The National Observer
p. 11-16, 1966. Photos.

In our present affluent society more Americans are pursuing outdoor activities. With the establishment of the Outdoor Recreation Resources Review Commission in 1958, Congress promoted a wide range study of the American outdoors. In 1962 the Outdoor Recreation Resources Review Commission reported to Congress that recreation needs were not matched by available areas and facilities and that the problem would quickly get worse. More recreation facilities needed to be provided near great cities. Outdoor Recreation Resources Review Commission recommendations were far-reaching and the Bureau of Outdoor Recreation was established with responsibilities bearing on all aspects of the outdoors. Natural beauty, conservation, and recreation are of great concern to the Federal government.

60361 Olsen, R.K.
50 years of housekeeping.
PARKS RECREAT.
1(8):648, 650, Aug. 1966. Photos.

Maintenance is a vital part of the total National Park Service program, forty percent of the work force engaging in these activities. Roads, trails, buildings, campsites, picnic areas and outdoor interpretive programs require servicing. A modern maintenance program provides that visitors' stay in parks be as pleasant as possible—a challenge in the face of our crowded parks today.

The Civilian Conservation Corps and the origins of the New Mexico State park system.
NATUR. RESOUR. J.
6(2):248-267, Apr. 1966. Ref.

The CCC played a major role in development of State parks in New Mexico. Although more recreation sites could have been developed in that period, the establishment of the State park system should be considered a relative success. That was a time of economic crisis and administrative conflicts. The investment by its builders, both administrators and CCC enrollees, is still paying dividends for New Mexico and many visitors to the State.

60365 Shanklin, J. F.
The Federal role from the standpoint of the Bureau of Outdoor Recreation. In Society of American Foresters.
Proceedings
p. 139-140, 1966.

The role of the Bureau of Outdoor Recreation is to assure that the real voice of outdoor recreation may continue to be heard throughout the Nation. This "real voice" is described. The general policy guidelines promulgated by the Recreation Advisory Council, the three major responsibilities in outdoor recreation suggested by the Council, and the directions specified in the Organic Act of May 1963 are stated. How the Bureau of Outdoor Recreation is carrying out its designated responsibilities is then explained by John F. Shanklin, Assistant Director for Federal Coordination, Bureau of Outdoor Recreation. This explanation includes detailed description of the four major phases of the Nationwide Outdoor Recreation Plan. Mr. Shanklin concludes that—through the tools of a nationwide comprehensive plan backed up by more intensive statewide outdoor recreation plans, through encouraging recreation use of existing Federal areas, through judicious land acquisition, and by the promotion of greater public recreation use of private lands—the Federal Government is beginning to fulfill its responsibilities in the field of outdoor recreation.

Rampart Dam: a costly gamble.
AUDUBON
68(3):173-179, May-June 1966. Photos.

A University of Michigan report shows this Yukon River project would be an economic blunder and a waterfowl catastrophe. Few proposals to exploit and destroy a great segment of this Nation's natural resources have aroused the spontaneous wrath of conservationists as has the Rampart Canyon Dam Project of the Corps of Engineers. The Corps proposes to build a dam 500 ft. high and 4,700 ft. long to provide electric power for anticipated development of Alaskan communities in the nebulous future. The lowest estimate of the cost is \$1.3 billion. The dam would flood the entire 100-mile-wide Yukon Flats, one of the continent's greatest wildfowl nesting areas. It is opposed by the U.S. Fish and Wildlife Service.

60369 Stratton, C.
Forest recreation. The National Park Service viewpoint. In Society of American Foresters. Proceedings, 1965.
Washington
p. 133-134, 1966.

Growth in response to human needs, cooperation with all concerned, and innovations to achieve the new conservation will be objectives of the new National Park Service program that replaces Mission 66. It aims to preserve all areas of national significance which are worthy because of their scenery, historical associations, recreational opportunities, or scientific interest. The National Park Service will continue to improve the park facilities, but it will be geared to meet new changes and demands.

60370 Tilden, P. M.
Oil shale and the public land.
NAT. PARKS MAG.
40(227):2, Aug. 1966. Map.

The eventual management of public lands which are underlain by oil shale represents a conservation issue which has laid dormant a long time. Among the conservation questions are: the impact of strip mining of shale on the natural scene and on vegetation and wildlife; water pollution; soil erosion; the disposition of immense amounts of waste rocks and spent shale from processing plants; and potential air pollution from the distillation plants themselves.

72(2):5, Feb. 1966. Photo.

Legal opinion blocks construction until conservation values are properly considered. Judge Paul R. Hays of the U.S. Court of Appeals in New York postponed the Federal Power Commission's order to license a hydroelectric plant on Storm King Mountain beside the Hudson River, an area of beauty and historic meaning to Americans.

60385
Timber rustling in the nation's capital.
ATLANT. NATUR.
21(2):89-91, Apr. -June 1966. Photos.

The timber rustlers drove into a park in the heart of Washington, D. C., in a truck to remove a section of the trunk of one of the large trees along the canal. They found another desirable tree on the other side of the park and cut it down. Their prime targets are black walnut, black cherry, birdseye maple, yellow birch, and yellow poplar (tuliptree). In dealing with this problem, first alert the proper officials of any suspicious activity.

72(3):12-15, 47, Mar. 1966. Photos.

Recommendations of the Agriculture-Interior study team with Edward C. Crafts, Director, Bureau of Outdoor Recreation, as chairman, are given as well as reports of differences that make this quite a disputed potential national park.

60389 Dominy, F.E.
Multiple-purpose reclamation projects provide public recreation. In Society of American Foresters. Proceedings, 1965.
Washington
p. 136-139, 1966.

Recreation benefits have been included in Bureau of Reclamation project planning in recent years. The Federal Water Project Recreation Act gives this Bureau limited authority to develop recreation opportunities on existing projects. A very large part of the Bureau's recreation development is undertaken in cooperation with other Federal agencies, and with State and local interests; it intends to increase its efforts in recreation development.

60390 Freeman, O.; Udall, S.L.
North Cascades National Park officially proposed.
SIERRA CLUB BULL.
51(2):3, Feb. 1966.

A joint statement by the Secretaries of Agriculture and Interior on the report of the North Cascades Study Team mentions 21 recommendations, on most of which there was unanimity. It was agreed to: establish four new wilderness areas, enlarge Glacier Peak Wilderness Area and Mt. Rainier National Park, provide coordinated management between national park and forest land, declassify three limited areas for lumbering, scenic roads, and trails, and designate portions of the Skagit River as a wild river. Disagreement on the national forest area north of Cascade Pass will be resolved in one of three ways under consideration. These alternatives are described.

Nationwide system of trails study.
APPALACH. TRAILW. NEWS
27(1):10-12, Jan. 1966.

To implement the President's request in the Natural Beauty Message to Congress of Feb. 8, 1965, the Secretary of the Interior, designated to work with colleagues within the Federal government and State and local leaders to promote a cooperative program to encourage a national system of trails, appointed a Steering Committee composed of top officials of Bureau of Outdoor Recreation, Forest Service, National Park Service, and Bureau of Land Management. The Steering Committee distinguished three types of trails to be considered in the course of the study: trunk trails, specific area trails, and regional and local trails. Agency study assignments are given. Metropolitan area trail needs are discussed.

60393 Lerner, L.J.
Development of recreational facilities. In Western Agricultural Economics Research Council. Committee on the Economics of Water Resources Development. Water resources and development of the West. Pullman, Wash., Wash. State Univ. p. 53-58, 1966. /Report no. 13./

Considerations of economic efficiency in recreation development policies are discussed. Two principal criteria of economic efficiency in the development of recreation facilities require: (1) the development of techniques for estimating the demand for recreation facilities; and (2) the development of techniques for estimating recreational benefits. The fee structure for public and private participation is analyzed. Efficient local operation of parks without State or Federal participation includes absence of large benefits outside project boundaries. Local operation may be efficient but competition may exist with other recreation developments with statewide distribution. States have an important role in developing plans which take into account potentialities of Federal, local, and private facilities, as well as facilities involving direct State participation. Conditions under which Federal participation is required for efficient operation include occurrence of substantial benefits in other States or other benefits of nationwide significance, and coordination with other purposes of Federal projects. The Bureau of Outdoor Recreation is coordinating activities of various Federal agencies and various States.

60394 McBroom, J. T.
Fish and wildlife coordination in the highway program.
U. S. DEPT. OF THE INTERIOR. NEWS RELEASE
8p. Sept. 21, 1966.

The Assistant Director of the Bureau of Sport Fisheries and Wildlife addressed the Region III meeting of the American Association of State Highway Officials, Operating Committee on Design, Oklahoma City. The State conservation agencies and the Bureau of Sport Fisheries and Wildlife are working with State highway departments and the Bureau of Public Roads so that fish and wildlife habitats are not needlessly destroyed and maximum benefits can be obtained from the highway program. Optimum development, not least cost-single purpose development, should be the criteria of highway designers and builders and the natural resources agencies.

Potomac Valley. A model of scenic and recreational values.
Washington, Govt. Print. Off.
80p. 1966. Maps, photos.

The wide range of opportunities to protect and enhance scenic and recreation values of the Potomac River Valley is described in a preliminary report designed to acquaint Potomac area governments and citizens with various possibilities for conservation and planning. Potential parks, recreation and wildlife areas, historic landmarks, archeologic sites, geologic formation, parkways, trails and scenic roads are identified.

60400 U. S. National Park Service
Great Smoky Mountains National Park Wilderness.
LIV. WILDER.
30(92):11-18, Spring 1966.

Two public hearings, one in Gatlinburg, Tennessee, June 13, 1966, and the other in Bryson

City, North Carolina, June 15, 1966, were held to discuss proposals for establishment of wilderness areas within the Great Smoky Mountains National Park. The data presented on these proposals are: (1) geographical, (2) management criteria, (3) management principles and administrative policies for natural areas of the National Park System, and (4) description of wilderness proposals.

60401 U.S. North Cascades Study Team
The North Cascades.
Washington, Govt. Print. Off.
190p. 1966. Ref., maps, illus, photos.

The report is a result of a 2-1/2 year-study to determine how Federal lands of the North Cascade Mountains in the State of Washington can best serve the public interest. All resource potentials of the area, as well as the management and administration, are explored. The 6.3 million acres under study embrace all the national forest land north of the White Pass road in Washington: namely, the Mt. Baker, Wenatchee, Snoqualmie, and portions of the Okanogan and Gifford Pinchot National Forests. Also included is Mount Rainier National Park. Twenty-one recommendations are made and those in which the team members are in agreement would establish four new wilderness areas, enlarge Glacier Peak Wilderness Area, add to Mt. Rainier National Park, provide coordinated management between national park and national forest lands, declassify three Forest Service areas for commercial use, provide for a system of scenic roads and trails, and designate portions of the Skagit River as a wild river. Principal recommendation in disagreement is the establishment of a North Cascades National Park.

60402 Whitman, L.
Restoring George Washington's river.
NAT. WILDE.
4(5):5-9, Aug-Sep. 1966. Photos.

The importance of the Potomac River and its water pollution problems are discussed. The Federal Interdepartmental Task Force on the Potomac and the Potomac River Basin Advisory Council established the Potomac Valley Park project to study the reclamation of the River. With Federal, State and local organizations cooperating, the Potomac can be restored.

60403
Destruction of Grand Canyon National Park.
PRAIRIE CLUB BULL.
(554):4, 5, Mar. 1966

The Corps of Engineers and the Bureau of Reclamation have formed the Colorado River Water Development program. The Central Arizona Project and the Southwest Water Plan, a part of this program, proposes to construct two lower dams, Bridge Canyon and Marble Canyon Dams, for future water needs of Arizona and Southern California. Conservationists object to these dams on the grounds that (1) the dams are hydroelectric power devices which produce electricity and do not increase available water;

(2) new methods of atomic power should be explored; (3) natural underground reservoirs be considered, rather than the huge outdoor reservoirs, in order to eliminate evaporation which tends to raise the water table in drought areas and also makes the water more saline; and (4) each dam makes the water used downstream harder to use for growing.

60404
Federal-State agencies unite on Eel River development.
WEST. WAT. NEWS
18(9):1-2, Sept. 1966.

The California State-Federal Interagency Group adopted a joint working program to formulate a single plan of water resources development for the Eel River Basin. Here are the 4-agency coordinated preliminary plans. An interim report is planned for January 1967 which will show the plans as of that point and the agreement on division of work responsibilities.

6(4):560-579, Oct. 1966.

The authors identify the specific activities related to recreation resource management in State government and the organizational arrangements through which these activities take place. Various types of State organizational structures for handling the recreation resource management functions are evaluated.

60411 Charles, G.
The state vs. the predator.
AUDUBON
68(6): 436-442, Nov.-Dec. 1966.

Predators are being uselessly exterminated. Many western States have joined predator control programs in cooperation with the Bureau of Sport Fisheries and Wildlife. A program undertaken by the South Dakota Dept. of Game, Fish and Parks is evidence of the public pressure for extermination, and the dire ecological results. Sound biological principles do not justify that Federal funds be used for this conservation mockery. Conservation education programs are needed to enlighten those who believe that any carnivorous animal is a villain of the wildlife world — and that such species as foxes, coyotes, bobcats, badgers, racoons, and such should be exterminated.

60420 Jones, F. L.
A State parks administrator's viewpoint of the place of fish and wildlife in the national outdoor recreation program. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 55th convention, 1965. Portland, Oreg.
p. 89-91, 1966.

There is room for improvement in the inter-relationship of wildlife management and recreation management. Fees for hunting and fishing have increased the management of these sports; however, the public's wildlife interest within State parks is primarily aesthetic. Thought should be given to controlled hunting of overpopulated wildlife species in State parks. The Scientific Reserves should be maintained as areas of preservation where pure biotic provinces are kept intact for research and the public's enjoyment of the natural scene.

60423 Metzler, D. F.
Planning for State water resources administration.
AMER. WATER WORKS ASS. J.
58(7):793-800, July 1966. Ref.

In the next ten years the most critical water resources decisions will be made in the state capitols. Four basic responsibilities exist for

any State determined to implement a water development and management program. The identification of State needs and the determination of what Federal laws and assistance can help a specific State require planning. Organizing to prepare policies and plans to meet these needs requires more than setting up a particular agency. It requires financial investment, a legal framework, a program of public education, focusing responsibility for policy development, and achieving a unified program to meet the needs.

Potentials for rural recreation.

FARM POLICY FORUM

18(1):29-33, 1965-66.

To make their region more attractive to industry, five Iowa towns joined together to build a community recreation center. It did bring in industry. Other similar community recreation projects are described, as well as farm vacation enterprises and private lake developments.

60451 Stern, J. F.
The legal responsibility of cities, States for pool accidents.
SWIM. POOL AGE
40(4):38, 46, 54-56, 58, Apr. 1966.

This article, by a businessman-lawyer, discusses the variation in the liability law from State to State. In most jurisdictions, the author points out, a municipal corporation is held immune from liability arising out of its operation of swimming pools and other bathing facilities which are available to the public without charge or for a nominal fee insufficient to yield a profit. Most States impose liability where pools are operated by municipalities as profit-making ventures, and a growing number of States are beginning to recognize that a municipality will be liable for negligence in the operation of pools or bathing facilities without regard to the profitability of the operation.

Annual Report 1965.
CAMP. MAG.
38(4):8-11, Apr. 1966. Illus.

The report covers the major developments and programs of the Association during 1965. It

presents information on cooperative relationships, civil rights, finances, long range plans, publications, standards and membership.

60456 Bombay, J.
Safety as we see it.
AMER. WHITE WAT.
11(3):22-23, Winter 1965/66.

American White Water Affiliation Safety Chairman admonishes expert canoeists to observe safety practices so that restrictive State regulations are not forced upon all members and boating enthusiasts.

60457 Bovey, M. K.
What TU is, does.
TROUT
7(3):5, 12, May-June 1966.
No abstract.

60458 Brown, W.
For good conservation.
FISH GAME
19(3-4):8-9, Apr. 1966. Photos.

All types of sportsmen could do much more for good conservation. Fishermen and hunters should not be the only ones. People who just enjoy walking in unspoiled natural areas should be concerned, too, in supporting efforts to protect the outdoors. Education and finance are needed if Canadians are to continue to enjoy outdoor scenes. Some outstanding conservation leaders of Alberta are named in this article as well as active conservation associations of the region.

60459 Buchheister, C. W.
In a great tradition we will stand up and be counted.
FLA. NATUR.
39(3):95-98, July 1966. Photos.

An address to the Florida Audubon Society by the National Society President. His appeal to Audubon members is that unless we care so little as to let the beauty and the grandeur and the resource richness of America go down the drain, we must stand up and be counted for conservation.

60460 Buchheister, C. H.
The President reports.
AUDUBON
68(6):392, Nov.-Dec. 1966.

Anthony Wayne Smith, president of the National Parks Association, eloquently urges the concept of regional planning to protect our national parks from overcrowding and overdevelopment. This means the provision of intelligently planned facilities around and outside the parks, not within them. The National Park Service supplies these facilities within park boundaries but overcrowded conditions would defeat the purpose of providing a bit of solitude for park visitors.

60461 Buchheister, C. W.
The President reports: Allagash victory appears near.
AUDUBON
68(4):213, July-Aug. 1966.

A few paragraphs of praise from the Audubon Society's President for the Governor of Maine, the State legislature, Senator Muskie, the Secretary of the Interior, and local conservationists for their important roles in achieving the Federal-State plan to protect the Allagash River. All that is lacking for the Maine voters to approve the State bond issue. Total victory is very near.

60462 Buchheister, C. W.
The President reports: Conservation is good business.
AUDUBON
68(4):212-213, July-Aug. 1966.

Avenues of potential cooperation have been explored at meetings between representatives of the American Forest Products Industries, Inc., and the National Audubon Society. Some of these are the location and protection of bald eagle nests on AFPI affiliate lands (67 million acres); the inclusion, in all AFPI recreation handouts, of a statement on the need to protect all birds of prey; and a continuous broadening of policies and literature on wildlife management to include non-game species.

60463 Buchheister, C. W.
The President reports: New NAS Sanctuary.
AUDUBON
68(4):212, July-Aug. 1966. Photos.

The new 1600-acre National Audubon Society sanctuary, located in Rookery Bay south of Naples, Florida, is an ideal food-providing area for egrets, herons, and other long-legged wading birds. It will be named for Mr. and Mrs. Lester Norris, leaders in conservation efforts.

60464 Bull, L.; Timmons, J. F.
Outdoor recreation enterprises: a new source of income in Iowa.
IOWA FARM SCIENCE
21(4):11-14, Oct. 1966. Illus., tables.

As the population increases and more people find themselves with free time, some farmers are starting enterprises for recreation at a fee. Some of these private enterprises are described—campgrounds, fishing waters, hunting areas, riding stables, vacation farms, shooting preserves, field sports areas, winter sports areas, and water sports areas.

60465 Chilton Research Services, Philadelphia, Pa.
Private sector study of outdoor recreation enterprises.
Philadelphia
10 v. 1966. Tables.

This study was made in 1965 by Chilton Research Services under contract with the Bureau

of Outdoor Recreation. It presents detailed findings on the private outdoor recreation enterprises in the United States by Census regions. Highlighting the findings, there were about 131,800 of the enterprises, the greatest number of which (20%) were located in the East North Central region.

Conservation.
GARD. CLUB AMER. BULL.
54(1):41-43, Jan. 1966.

This article discusses the dangers inherent in pesticides and relates how a Garden Club officer saved Greenwich, Connecticut, from the hazards of pesticide spraying. Conservationists do not prefer wildlife to people, but people and wildlife are all inhabitants of the same environment and danger to any part of the environment is dangerous to all.

60479 Milton, A. W.
Visiting historic spots now is a favorite pastime.
TENN. CONSERV.
32(3):22-26, 31, Mar. 1966. Photos.

Some 4 million persons tour historic Tennessee landmarks every year. The Association for the Preservation of Tennessee Antiquities (APTA) is engaged in historical preservation; and this article includes reviews and postscripts of APTA and preservation conferences. The preservation of historic homes fits right in the State's conservation program to protect and improve soils, forests, water, wildlife, recreation areas, and other tourist attractions.

60480 Mueller, E. W., ed.; Ekola, G. C., ed.
Mission in the American outdoors.
St. Louis, Concordia Publishing House
165p. 1966. Ref.

This book is the outgrowth of a comprehensive study of outdoor recreation requested in 1963 by the Division of the American Missions Committee of the National Lutheran Council. Part 1 is concerned with outdoor recreation resources and

presents an overview of national surveys, planning, and legislation. Part 2 is concerned with people and discusses social and spiritual values and the role of the church in an era when leisure and recreation are enjoyed by many people.

60481 National Recreation and Park Association
Outdoor recreation space standards.
New York
55p. 1966. Ref., illus., tables.

The National Recreation and Park Association has guided government authorities on problems concerning open space for recreation. Part 1 of this study deals with standards, past and present; various space standard proposals based on population ratios, and statistics on recreation areas for selected cities and counties of certain size populations. Part 2 deals with recommended standards for open space for recreation. These standards are for the maximum population, not present size. Administrative responsibility of each level of government to provide open space for recreation is considered. Statistics for recreation land areas in the most populous cities and counties with largest acreage for recreation facilities per 1,000 population are listed in the appendices.

60482 Nature Conservancy
Natural areas preserved by the Nature Conservancy to April 1, 1966.
NATURE CONSERV. NEWS.

As each part of the recommendations of the North Cascades Study Team's report is discussed, the views and endorsements of the Wilderness Society are included in bold type.

60493 Willey, Mrs. W. H., Jr.
An experiment in civic participation.
GARD. CLUB AMER. BULL.
54(6):25-26, Nov. 1966.

The Goldsmith Civic Garden Center was established with the advice of a member of the Memphis Garden Club as a memorial to the Memphis department store magnate. The Goldsmiths' gift is operated by the Memphis Park Commission, which allocates an annual budget to staff and maintain it. The Center is in constant use for meetings, flower shows, classes, lectures and workshops. Now all of the facilities of the Goldsmith Civic Garden Center and of Audubon Park are incorporated into the city's first full-scale botanic garden, the Memphis Botanic Garden.

60494
Carl Buchheister appeals to McNamara to save Agattu Island.
AUDUBON LEAD. CONSERV. GUIDE
7(18):2, Sept. 15, 1966.

Scenic Agattu Island, nesting area for many birds, including great colonies of pelagic species,

is one of the few islands in the Aleutians large enough and unspoiled enough to qualify for protection under the Wilderness Act. It is a key area in Bureau of Sport Fisheries & Wildlife plans for restoration of the rare and endangered Aleutian Canada Goose. It is one of the best islands in the Aleutian Islands National Wildlife Refuge. Yet the Air Force has designs on Agattu for a "classified mission." The National Audubon Society's President has appealed to Defense Secretary McNamara, in a letter dated September 12, to prevent the invasion of Agattu Island by the Air Force.

60495
Fight to save Grand Canyon.
SIERRA CLUB BULL.
51(5):6-9, May 1966. Map, photos.

The Reader's Digest commits itself "to oppose the construction of Bridge Canyon and Marble Gorge hydroelectric dams on the mainstem of the Colorado River in Grand Canyon." The Digest sponsors a press conference at the canyon itself. The statements of individuals of note who have opposed the dams are recorded. The Sierra Club has introduced a bill to give the entire Canyon National Park status.

60496
Grand Canyon's highest and best use.
SIERRA CLUB BULL.
51(5):4, May 1966.

The Sierra Club is sponsoring legislation which would enlarge Grand Canyon National Park to include the entire canyon and would prohibit any dams or divisions between Lees Ferry where the canyon starts and Grand Wash Cliffs where it ends. The canyon has incalculable scientific value in its present wild state. The proposed Bridge Canyon and Marble Gorge Dams would destroy biota and conceal formations of educational value for anthropologists, archaeologists, biologists, botanists, geologists and the lay public.

60497
Is Interlochen State Park headed for abandonment?
MICH. OUT-OF-DOORS
17(3):3, 10, Mar. 1966.

Strong opposition is expressed by the Board of Directors of the Michigan United Conservation Clubs against a request made by the National Music Camp for 20 acres of the Interlochen State Park. The land is desired for the site of a two-year university.

60498
National youth conference.
LIV. WILDER.
30(93):22-23, Summer 1966.

The National Youth Conference on Natural Beauty and Conservation explored the question—

by speeches, discussion groups, and workshop sessions—of how American youth can promote natural beauty of the land and the conservation of natural resources.

60499
A Pine Barrens National Monument?
ATLANT. NATUR.
21(3):139-140, July-Sept. 1966. Map.

The recommendations of the Smoky Mountains Hiking Club, Knoxville, Tennessee, concerning designations of wilderness areas, are stated and discussed.

60503 Advisory Commission on Intergovernmental Relations
State legislative program 1967.
Washington
601p. 1966.

The Advisory Commission's program for State legislation is presented on: (1) taxation and finance, (2) structural and functional relationships. Suggested legislation is itemized.

The Commission recommends State initiative in several specific program areas. Among the recommended actions are establishment of a State agency for overall water resource planning and policy-making. Legislation is suggested to States in securing and preserving open space by (1) providing for acquisition by States of interests

or rights in real property, including conservation easements; (2) authorizing local units of government to acquire interests or rights in real property within existing metropolitan areas for open space. Acquisition and preservation of open land areas may be justified on grounds of watershed protection for water supply; on the need for parks and recreation areas, and on the prevention of urban blight and deterioration.

A detailed history of public domain lands in America from the beginning of the 1780's until the present is provided, including all congressional actions.

60522 Porter, W.W., II
The public domain, heart of the Republic. Part 4: Natural resources.
AMER. FOR.
72(4):28-31, 53-59, Apr. 1966. Photos.

American forest and mineral conservation policies are explained especially in terms of land policies and legislation, such as the Multiple Use Act and other land laws. The Public Land Law Review Commission organized in 1965 as a result of the enactment of P.L. 88-606, 1964, must review the public land policy and its administration. Non-disposal of land to the private sector for develop-

ment of resources could have a deleterious effect on the economy. Only 19 States—the original 13 colonies plus Maine, Vermont, Kentucky, Tennessee, West Virginia, and Texas—are without public domain.

60523 Prendergast, J.
Hunting and fishing recreation on State and Federal park lands. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 1966.
Kansas City, Mo.
p. 142-151, 1966.

This speech gives laws, rules and regulations about hunting and fishing on State and Federal park lands. All national parks are open to fishing. Public hunting is prohibited on public lands, with one exception: hunting is permitted in the Grand Teton to keep the wintering herds from becoming too large.

60524 Smith, A.W.
Raising the sights for the redwoods. A big national park and national forest.
NAT. PARKS MAG.
40(230):17-19, Nov. 1966. Maps, photo.

The President of the National Parks Association presented the two alternative proposals with his own recommendation for a proposed Redwoods National Park to the Senate Subcommittee on Interior and Insular Affairs. Land acquisition by fee simple and conservation easement are discussed.

Saving the Allagash. A year of decision for a Maine wilderness.
PARKS RECREAT.
1(10):852-854, Oct. 1966. Map, photos.

A discussion of the proposed Allagash River Waterway, to be administered by Maine's State Park and Recreation Commission if approved by the public referendum on November 8, 1966. Highlights of the legislation are given.

60526 Udall, M.K.
The facts about Grand Canyon and dams.
PUBLIC POWER
24(7):22-24, 46, July 1966. Maps, illus.

Rep. Morris K. Udall is sponsor of H. R. 4671, a bill which would authorize the building of two major hydroelectric plants on the Colorado River. He denies that the two dams proposed for building as part of the project will destroy the scenic beauty of the Grand Canyon. He advocates conservation of all our resources—including the vast amounts of hydroelectric power now going to waste on the Colorado River.

60527 U.S. Congress. House. Committee on Government Operations. Water pollution—Great Lakes. Part 3: Western Lake Erie, Detroit River, Lake St. Clair and tributaries. Hearing. Washington, Govt. Print. Off. 834p. 1966. Ref., maps, tables. (89th Congress, 2nd session).

The hearings held at Toledo, Ohio, were conducted to determine how effectively government agencies and others are dealing with the growing problem of water pollution in the Great Lakes area, specifically the water pollution problems of western Lake Erie and the area around it, including Lake St. Clair, the Maumee and Detroit Rivers and their drainage basins. This area is one of the most highly industrialized in the United States. Pollutants in the water include a variety of industrial wastes, as well as sewage from combined storm and sanitary sewers. Some of the pollutants are chemicals that stimulate the growth of plants which absorb from the water the oxygen necessary for fish and aquatic life. Lake Erie, it is said, is dying. Statements from water pollution control experts and citizens of the region interested in wildlife preservation and pure water for human and industrial use are presented. The problems of Federal grants and inspections are clarified. Recommendations are made for improved government assistance in water pollution control.

60528 U.S. Congress. Senate. Committee on Interior and Insular Affairs. North Cascades—Olympic National Park. Hearings. Washington, Govt. Print. Off. 1062p. 1966. Map, tables. (89th Congress, 2nd session).

Hearings on the report of the North Cascades study team and the proposed revisions of the boundaries of Olympic National Park and other issues relate to the development and utilization of the natural resources of the State of Washington. The 2-1/2-year study under the auspices of the Departments of the Interior and Agriculture was undertaken to determine what type of management and administration of those lands would best serve the public interest. The Departments cooperate on development of outdoor recreation resources. Public objections to the North Cascades Park are mainly economic. Many proposals suggest that limited wilderness areas be preserved under the Forest Service and the remainder be put to multiple use of lumbering, mining, watershed development, grazing, and a flexible program for recreation and commerce. It is emphasized that the resources are needed for the economy of the State which already has much national park land. Recommendations of the study team which are summarized fall into seven categories: (1) wilderness areas, (2) North Cascades National Park (proposed), (3) Mt. Rainier National Park, (4) other recreation areas, (5) scenic roads and trails, (6) timber management, and (7) other. Major issues confronting the study team were:

(1) should there be a new park; (2) how much wilderness is enough; (3) how best to provide for the more conventional types of recreation desired by the great mass of people; (4) how to reconcile national and local interests when the two appear to conflict; (5) how to utilize and manage the timber resource in harmony with other multiple uses of the area; and (6) the extent to which scenic roads should be an essential ingredient in making the North Cascades available to large numbers of people. Statements of the National Park Service and Forest Service on the proposed administration and management of the 6.3 million acres are provided. The area obviously includes the unique physical, natural and geological features necessary to qualify for national park status. The proposed park would become one of the outstanding units of the whole national park system because of its superlative mountain features.

60529 U.S. Congress. House. Committee on Science and Astronautics. The adequacy of technology for pollution abatement. Hearings. Washington, Govt. Print. Off. 603p. 1966. Tables. (89th Congress, 2nd session, v. 1).

Research needs and technological problems of pollution abatement are presented. Definitions of pollution are relative to the specific use to which a particular stream or area is dedicated. Quality criteria and standards permit goals and timetables to be established. Greater reuse of resources will be required in the future. The technology to achieve objective of environmental quality and waste management is not yet adequate. Criteria needs to be established for four classes of pollutants: (1) sulphur oxides; (2) photochemical oxidants; (3) nitrogen oxides; (4) carbon monoxide. Major sources of pollution are: motor vehicles; stationary combustion sources; petroleum refineries; steel mills; the chemical industry, both organic and inorganic; foundries and pulp-mills. Clinical studies on animals with air pollutants are described with special emphasis on reactions in man. Departments of the government are involved in counteractive measures.

60530 U.S. Congress. Senate. Committee on Interior and Insular Affairs. Great Salt Lake National Monument. Hearings. Washington, Govt. Print. Off. 117p. 1966. (89th Congress, 2nd session)

Senate bill 25 provides for establishment of the Great Salt Lake National Monument in Utah, and for other purposes. Hearings are concerned with the use of Great Salt Lake as a scenic and recreational attraction and the establishment of the Great Salt Lake National Monument on Antelope Island. A cooperative arrangement between the Federal government and Utah is proposed whereby both may participate in providing facilities on the Island. The bill would authorize acquisition of the land and administration by the Department of the Interior. It provides for interpretive and educational facilities. The

State of Utah would be authorized to operate and manage the recreational facilities and accommodations. User fees would be assessed by the State.

60531 U.S. Congress. Senate. Committee on Interior and Insular Affairs. Guadalupe Mountains National Park. Hearings. Washington, Govt. Print. Off. 133p. 1966. Tables. (89th Congress, 1st and 2nd sessions).

The Subcommittee on Parks and Recreation considers S. 295 and H. R. 698, bills to establish the Guadalupe Mountains National Park in Texas, and authorize the acquisition of land and interests therein. The park will preserve in public ownership an area of 76,302 acres which possess outstanding geological values as well as scenic and other natural values of great significance. Archaeologic and historic sites in the area will also be preserved. Some mineral rights will be acquired at a later date. Costs for acquiring the land and expenditures of staff for the first five years of programs are projected. Statements and communications in support of the bill are provided.

60532 U.S. Congress. Senate. Committee on Interior and Insular Affairs. Redwood National Park. Hearings. Washington, Govt. Print. Off. 2pts. 1966. Maps, tables. (89th Congress. 2nd session).

The bill to establish the Redwood National Park in California proposes to preserve certain remaining virgin and old growth stands of the tallest living trees in the world and to provide an equitable means of assisting the local economy. The portion of the proposed Redwood National Park in Del Norte County will consist of the Jedediah Smith Redwoods and Del Norte Coast Redwoods State Parks, about five miles of frontage on the Smith River, and a coastal strip southward. The separate unit of the Redwood National Park on Redwood Creek in Humboldt County will contain the tallest trees in the world. The establishment of the park will necessitate acquisition by the Federal Government of 24,960 acres of privately owned lands and will remove large acreages from taxation in Del Norte County. Curtailment of the timber industry will cut into the local economy. The bill provides for annual economic adjustment payment for a 5-year period to county and local government bodies after which time the tourist industry is expected to bring increased revenue. Main opposition to the bill comes from the forest products industry and from local authorities in the three northern California counties involved. There are differences of opinion about the appropriate size and proper location of the park. The principal objectives of the bill are to give national recognition and protection to one of the natural wonders, to increase the opportunities for outdoor recreation in northwestern California, to preserve the best virgin growth of redwoods, to afford vital watershed

protection within the park, and to incorporate into the National Park System a nationally significant resource.

60533 U.S. President (Lyndon B. Johnson) Preserving our natural heritage. Washington, Govt. Print. Off. 10p. Feb. 23, 1966. (House Doc. 378, 89th Congress, 2nd session).

In his message to Congress in which he transmits programs for the control of pollution and preservation of our natural and historical heritage, President Johnson proposes a course which will restore America to her people, one with the promise of clear rivers, tall forests and clean air. Means to achieve that promise are set forth. The President also has something to say about costs of land acquisition and expounds a creed to preserve our natural heritage.

60534 U.S. President (Lyndon B. Johnson) The President's remarks to members of the National Recreation and Park Association, Washington Hilton Hotel, Oct. 13, 1966. WEEKLY COMPILATION PRES. DOC. p. 1490-1493, Oct. 21, 1966.

The President talks about conservation, beautification and recreation; notes new parks, forests and recreation areas recently located within easy access of urban centers and new bills passed by the 89th Congress which he proposes to sign.

60535 Wheat, M. C., Jr. Precedent on the Hudson. SIERRA CLUB BULL. 51(3):5-7, Mar. 1966. Photo.

The Consolidated Edison Co. plans to build the biggest pumped storage plant in the world on Storm King Mountain on the Hudson River to provide electricity for New York City. Court rulings against the Federal Power Commission, following a public protest against the proposed destruction of an historic and scenic landmark plus a large bass breeding ground, are evaluated.

Because of the controversy, Congressman Richard L. Ottinger, Yonkers, N. Y., introduced a bill which authorizes the Secretary of the Interior to veto projects which Federal agencies propose to build on scenic sites and also permits the Secretary to negotiate scenic easements.

60536 Conservation bills flood legislature. MICH. OUT-OF-DOORS 17(3):5, Mar. 1966.

A brief general resume is given on proposed bills in the legislature. These bills are relative to the conservation of deer and elk, water pollution, park legislation, littering, federal aid, game proposals, fishing bills, and pertinent administrative bills.

60537

Trails across the nation.
PARKS RECREAT.
1(8):632-633, 664, Aug. 1966. Ref, maps.

A discussion of the provisions of the Administration bill sent to the Congress by Secretary Udall on March 31, 1966. Four general classes of trails are covered. It includes a list of trails requiring additional study.

60543
Two cooks.
SALT WAT. SPORTS.
27(9):3, Sept. 1966.

The Anadromous Fish Act of 1965 is discussed. It is suggested that monies spent on anadromous fisheries problems can be more wisely directed by the Department of the Interior in a concentrated approach on the few anadromous species of major sport and commercial importance to any specific geographical area.

60544 Alberta Fish and Game Association
A water policy.
FISH GAME
19(3/4):10, 21, Apr. 1966. Illus.

With growing concern for their province's water resources, the Alberta Fish and Game Association cites basic principles and proposes a policy for insuring a clean, pure supply of water for livelihood, industry and recreation.

60545 American Association for Health, Physical Education, and Recreation. Recreation Division.
Recreation policy statement.
JOHPER
37(5):43-44, May 1966.

Present major areas of recreation concern defined and approved by Board of Directors of the American Association for Health, Physical Education, and Recreation are: (1) education for leisure, (2) professional preparation and personnel standards, (3) research and evaluation, (4) recreation services, and (5) planning and development.

60546 Crafts, E. C.
The dilemma of America. Remarks before the Nevada Governor's Conference on Natural Beauty and Outdoor Recreation, Las Vegas, Nevada, September 21, 1966.
U.S. DEPT. OF THE INTERIOR NEWS RELEASE
11p. 1966.

Rapid changes in Federal policy in recreation and other programs relating to quality of living, such as pollution control and beautification, portend major public concerns for the future. The change in policy to city-oriented, people-oriented recreation has affected the programs, attitudes, and budgets of all concerned Federal agencies. New philosophies are evolving from the historical foundations of outdoor recreation. Outdoor recreation is evolving as both a desirable public policy and a major concern and responsibility of business. Our nation leads the world in wealth and power, and also leads in the degradation of the human habitat. The dilemma of America today is: Can we have progress without spoliation? We must act with new respect for the land and for ourselves.

60547 Crafts, E. C.
The evolution of outdoor recreation policy. Remarks at the National Conference of Policy Issues in Outdoor Recreation, Logan, Utah, September 6, 1966.
U.S. DEPT. OF THE INTERIOR NEWS RELEASE
12p. 1966.

Outdoor recreation and other major programs relating to quality of environment, such as pollution control and beautification, are major public concerns. The approach to outdoor recreation is being rapidly converted from a resource-oriented byproduct of conservation and preservation, to a people-oriented, city-oriented major public purpose. The historical and philosophical foundations of outdoor recreation and problems discussed lead to 7 major policy trends for consideration: (1) quality environment; (2) orientation to urban areas; (3) people orientation; (4) the acquisition, protection and development of needed land and water resources; (5) education; (6) financing; (7) acceptance of responsibilities by state and local governments and the business community. The final decisions will rest with the Congress and the courts.

60548 Frame, A. P.
Needed—a national outdoor recreation policy.
PARK NEWS
2(3):11-16, July 1966.

An agreement for a national outdoor recreation policy is needed so that an assignment of responsibilities to appropriate levels of government can be made. The first requirement is for an appropriate review authority to assess the resources and demands.

60550 James, W.
Yellowstone National Park nearing 100th anniversary.
WEST. OUTD. NEWS
13(37):6, Sept. 16, 1966.

Yellowstone is not only the Nation's first national park, it also has the unique distinction of being the first in the world. Preservation of the great national parks has been promised top priority by Dr. Stanley A. Cain, Assistant Secretary of the Interior for Fish, Wildlife and Parks. The author, however, deplors the inclusion of active outdoor recreation areas, claiming the National Park Service now manages recreation on the reservoirs formed by Bureau of Reclamation dams. Instead of swimming, motor boating and water skiing, the author believes the National

Park Service should primarily preserve the natural wonders and beauties of great land areas in their primitive condition for the benefit of all of the people.

60551 Laing, A.
A dedication to the future.
PARK NEWS
2(4):4-7, Sept. 1966.

Administrative policy manual.
Wheeling, W. Va., Nat. Recreation Park Ass.
40p. 1966. (Manage. Aids Bull. No. 61)

A sample policy planning guide in this manual deals with administration, community relations, finances, personnel, participants, program, and maintenance. It is a guidance tool for park and recreation departments to follow in developing their own administration policy manual.

60553 McInteer, J. F., Jr.
Rising expectations.
VA. WILDL.
27(11):3, Nov. 1966.

A change in our public policies on outdoor resources and recreation is occurring today. Programs that first improved recreation opportunities were resource-oriented. What's new is that we now think of outdoor recreation in terms of public concern, public responsibility and public policy. As a result programs are becoming more people-oriented. Today's emphasis on providing public recreation facilities must eventually include an equal concern for the quality of our whole environment. Outdoor recreation as an end in itself is not a proper purpose on which to base public policy, since it is but one of many uses that people make of their environment. The rising expectations of people—for material, aesthetic and recreational enjoyment—can be fulfilled only if we keep our resource programs people-oriented and concurrently recognize that environmental quality is our real concern.

60554 Orell, B. L.
On federal land acquisition.
J. SOIL WAT. CONSERV.
21(6):210, 232, Nov.-Dec. 1966.

The land policy pattern of the Federal Government has reversed itself from conveying land in the public domain to private owners to a policy of widespread land acquisition from private owners. For full, proper use of public lands, Federal holdings should be consolidated through changes and its ownership increased proportion-

ately in a given area. Private land owners are helped in managing their lands by the Soil Conservation Society of America, the Soil Conservation Service, State foresters, and other organizations and agencies.

60555 Munro, D. A.

Land management for wildlife and outdoor recreation in Canada. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 55th convention, 1965. Portland, Oreg. p. 64-70, 1966.

A comprehensive report on the development of a program for outdoor recreation in Canada is provided. The problem, not apparent 50 years ago, calls for those recreational outlets which may relate to stability within the community. The aim is to acquire land with the qualities that make it suitable for outdoor recreation, located so that people can use it, and manage it so that it serves the peoples' needs, yet keeps its qualities unimpaired. With respect to wildlife, the aim is to secure habitat in amounts necessary to support viable populations. The allocation of land for park purposes in Canada suffers from a serious regional imbalance. The Canada land inventory is providing a basis for development of parks accessible to areas of dense population.

60556 Ownbey, C.R.

Water quality goals. AMER. WAT. WORKS ASS. J. 58(4):397-402, Apr. 1966. Tables.

A six-step procedure is formulated for the Illinois River Basin Project. Each step is subdivided and its implementation described in detail: 1) General statement of policy, 2) Grouping of water users into categories, 3) Selection of significant parameters or yardsticks of quality for each category, 4) setting of numerical values with the limits of technology and reasonableness of use, to be used as guidelines in the establishment of goals. A table describes the proposed water quality goals for each water source. Water uses are divided into general, recreational, and fish and aquatic life. Some sources are also used for irrigation, industrial processes, and municipal water. Water quality control measures are defined under the headings of exclusion, collection, treatment, ultimate disposal of residue, and operations.

"Sea of troubles"
AMER. FOR.
72(12):34, 38, Dec. 1966.

The National Conference on Outdoor Recreation convened at Utah State University, September 6-8, 1966. The focus was on policy issues. Key thoughts and excerpts from Conference speeches are summarized and presented in this article.

60558 Schiff, A. L.

Outdoor recreation values in the public decision process. NATUR. RESOUR. J. 6(4):542-559, Oct. 1966.

The author analyzes the factors involved in the outdoor recreation policy-making process at all levels of government with emphasis on the Federal Government's role. Reviews the conflicts in resource use and evaluates the attempts at developing a rational approach to guide public investment in recreation opportunities.

60559 Simons, H.

Science: Sense and nonsense. BIOSCIENCE 16(9):607-608, Sept. 1966.

Discusses the basic controversy in the National Park Service's mandate to "conserve" and simultaneously to "provide for the enjoyment of the same." Author makes a plea for more research and administrative action to preserve the unique natural conditions in our national parks.

60560 Smyth, A. V.

Trees, game and people. In International Association of Game, Fish and Conservation Commissioners. Proceedings, 55th convention, 1965. Portland, Oreg. p. 130-134, 1965.

Views of a resource-based industry towards fish and wildlife resources are described. A public relations officer of the Weyerhaeuser Company discusses the policy of a forest products industry in management of the forests to provide the maximum yield of trees as well as the maintenance of wildlife as a recreation resource. Cooperation with the state game commissions is practiced. On the company's forest lands in Washington and Oregon, multiple use includes opening of these vast acres to the public for hunting. The industry wishes to promote wise use of forests and game and thus provide outstanding recreational opportunity to people.

60561 Stoddard, C.H.

Room to roam. The Bureau of Land Management's role in recreation. In Society of American Foresters. Proceedings, 1965. Washington. p. 134-136, 1966.

The purpose of the Bureau of Land Management is to manage the vast public domain lands and their uses by the public. Bureau of Land Management recognizes outdoor recreation as a major management responsibility to be developed and managed in balance with other resource values. Its outdoor recreation program will be coordinated with other units of government.

60562 Swift, E.
One horse for recreation—a rabbit for education.
CONSERV. NEWS
31(16):1-3, Aug. 15, 1966.

"Mass recreation which involves natural resources has a much more seductive interest for the general public than mass education relating to the management of those resources. The public is more interested in what it considers its rights than its obligations". Federal and State agencies attempt to meet the recreational demands by expending grants of tax money. Often they overlook the fact that the protection and management of the resources should be the first consideration and human desires must fit the scope of good husbandry. However, the people themselves are beginning to sense some of the more basic issues and those who get out frequently may learn something in regard to resource husbandry.

39(4):137-140, Oct. 1966.

After a plug for the CBS documentary film, BULLDOZED AMERICA, the author discusses fully three of the urgent problems in conservation today: the population explosion, air pollution, and water pollution.

60568 Fiske, H.
The burden of the Potomac. In Roberts, E. A., ed., America Outdoors.
Silver Spring, Md., The National Observer
p. 34-47, 1966. Maps, illus., photos.

As the population of Washington grows, doubling by the turn of century, conflicting pressures on the Potomac River Basin will increase: on one hand, recreation and health demand the conservation of natural beauty; on the other, clean water and an attractive river frontage for new housing and industry are needed. Historic review of water pollution shows a few industries contaminated the river but multiple sewage remains the main problem. The Interstate Commission on the Potomac River Basin was formed in 1941 to inform the public on pollution and prod the states into passing strong antipollution laws. Government agencies and legislation of the 1950's have improved Potomac water. A separate sewage system for Washington is being developed. For water storage, the Corps of Engineers proposed headwater reservoirs and a large dam at Seneca Creek. The dam has met with opposition from conservationists of land, wildlife, and historic sites. A new approach to Potomac River development with an eye to natural beauty and recreation exists in Washington today. A plan for a system of Potomac parks will provide for wilderness areas, camping, hiking, and historic site visiting.

Salt and water.
MO. CONSERV.
27(8):6-7, Aug. 1966. Illus.

A warning that exercise and hot sun combine to bring on heat exhaustion and heat cramps. When salt tablets are not available, use a teaspoon of salt to a glass of water. Drinking three such glassfuls will partially compensate for the salt and water loss resulting from several hours of moderate activity on a hot day.

60572 Megregian, S.
Great Lakes - Illinois River Basin Project.
AMER. WATER WORKS ASS. J.
58(4):394-397, Apr.1966.

A large portion of the Great Lakes - Illinois River system remains in poor condition, and further population and industrial growth will intensify the present trend toward degradation. Serious measures must be taken now to reverse the pollution spiral. Congress is giving the problem increased attention. The Illinois River Basin Comprehensive Water Pollution Control Program combines the action of all groups including local and state governmental bodies. It is designed to present a solution to water pollution problems which includes optimum use of all methods and mechanisms with the aim of pollution prevention.

60573 Stern, J.
What responsibilities do pool operators have?
In SWIMMING POOL DATA AND REFERENCE ANNUAL.
33:104, 106, 177, 178, 1966.

Legal actions against pool operators for failure to provide proper water equipment, signs for danger zones, and attentive and adequately trained lifeguards are listed. Variations in responsibilities between the private pool owner and a government operated pool's supervisor are discussed.

60574 Weinberg, E.A.
Coast Guard Auxiliary offers free boating courses.
MOT. BOAT.
p.77, Aug.1966. Photos.

The Coast Guard Auxiliary offers courses in outboard boating, safe boating, and basic seamanship.

60575
Colorado hunter safety program.
AMER. RIFLE.
114(8):17-18, Aug. 1966.

Colorado has no statute which requires successful completion of a hunter safety course in order to purchase a hunting license. This State stresses the quality of its course on safe hunting in thirty schools. The program for hunter safety and game management is described. Other groups sponsoring hunter safety are listed.

60576
Columbus Cycle School a first.
AMER. MOTORCYC.
20(10):10, Oct. 1966.

The Ohio Motorcycle Driver Training School, Inc., Columbus, Ohio, chapter is the first regular motorcycle driver training course in the country. At the end of each of the two courses offered, each student is tested. If he has not attained the necessary proficiency for safe cycling, he will be given additional private instruction.

60577 Brigham, A.P.
Recreational uses of watersheds. Operator's view.
AMER. WATER WORKS ASS. J.
58(10):1260-1263, Oct.1966.

Discusses the pollution and siltation problems that result from the use of watersheds and reservoirs for recreational purposes. Multipurpose use of these waters is discouraged.

60578 Clepper, H.
The big five.
AMER. FOR.
72(1):18-21, 63, Jan.1966. Photos.

FAO gave special attention at the biennial conference to five major problem areas in world forestry: (1) tropical forestry, (2) forest tree seed centers, (3) wildlife management; outdoor recreation, (4) forest fire technology, and (5) logging and transportation.

60579 Cowan, I.M.
Conservation and man's environment.
In Smithsonian Institution. Knowledge among men.
New York, Simon, Schuster
p. 61-80, 1966. Ref.

Conservation as we know it today is the expression of the enlightened self-interest of a population arising from the understanding, scientifically gained, of the laws of growth, the known facts of population regulation, and the discovery that for wild crops, as for tame, the environment has a capacity which it cannot exceed but can sustain. The doctrine of wise use indicates that a living resource may not be used at a rate faster than its capacity to replace itself. Conservation in the United States as originally

stated in the Roosevelt Doctrine has evolved through eras of slow acceptance to an era of growing moral power. Public policy was based on the wise use of all outdoor resources considered as a whole and guided by scientific knowledge of the environment. Five areas which deal with man's impact upon his environment are given attention. Of particular interest is the maintenance of natural beauty and opportunity to enjoy the resources. Various conservation principles evolved are set forth.

60580 Godwin, G.
An opinion on the forester's role in resource management.
PARK NEWS
2(3):3-6, July 1966.

This article attempts to place preservation and recreation within the multiple use concept. The author agrees with a no logging policy in national parks and a use of logging company roads for recreation.

60581 Lyman, H., Woolner, F.
Thunder on the Hudson.
SALT WATER SPORTS.
27(6):28-29, 56-58, June 1966.

Consolidated Edison's Storm King Project on New York's Hudson River has been challenged by an irate citizenry. The massive power generating station originally supported by the Federal Power Commission and Governor Rockefeller will be taken under advisement by the U. S. Supreme Court. This is a victory for conservationists since it sets a precedent for future land and water grabs. A discussion of the pros and cons reveals the project's effect upon striped bass in the Hudson.

60582 Neff, P. E.
Applied silviculture in managing outdoor recreation sites. In Society of American Foresters. Proceedings, 1965
Detroit
p. 34-35, 1966.

Silviculture must play an increasing role in recreation management. Positive scenic treatment is discussed under the headings of vista; variety in the woodside; transition vegetation; open woods, and variety in the stand. Some timber cutting is essential to the economy of the West. Almost one-fifth of our existing saw timber is located in the national forests of Oregon and Washington.

60583 Rankin, B.
Ohio's open park policy.
BET. CAMP.
7(6):37-38, June 1966. Illus.

Ohio has inaugurated a new state park policy of keeping campgrounds open 12 months of the year and not turning away any campers. Governor Rhodes kicks off year-round camping in the month of February. Ohio has set up overflow areas in all of its state parks.

60584 Ripley, T. H.
Rehabilitation of forest recreation. In Society of American Foresters. Proceedings, 1965.
Detroit
p. 35-36, 1966.

If foresters have a developed site that is badly damaged or overused, they should decide if it might not be better to relocate the site where it would be much easier to maintain and much less susceptible to degradation through human use. Our failure in the past to recognize the unnatural condition we create by introducing people into a forest environment has created many problems to be corrected.

60585 Taylor, G. D.
Land classification for multiple use—a recreational view. In Proceedings, National Committee on Forest Land.
p. 81-86, 1966.

A proposal to integrate the physical characteristics of land required for recreation into a system designed to classify land for multiple use.

60586 Tufty, B.
Redwoods win protection.
SCIENCE NEWS
89(16):264-266, Apr. 16, 1966.

Stands of ancient California redwoods are being protected by scientists, nature lovers, and politicians in the eternal conflict of beauty versus utility. The trees are endangered by lumber interests and road engineers. Pressure must constantly be maintained by private, State and Federal institutions to promote protection of these trees.

60587 Udall, S. L.
Secretary of Interior writes to lumber company on National Park.
WEST. MOB. HOME NEWS
16(13):7, Sept. 12, 1966.

No abstract.

60588
Multiple use for the North Cascades.
AMER. FOR.
72(12):13, Dec. 1966.

An explanation of the American Forestry Association's endorsement of multiple use management of the North Cascades in the State of Washington, including preservation of wilderness values, as presently administered by the Forest Service.

60589 Appelt, S.; Moorman, R.
Underground cables. An annotated bibliography, 1960-1965.
Portland, Oreg., Bonneville Power Administration
325p. 1966.

Interest in natural beauty has stimulated the need for underground transmission lines. This

aspect is treated in this bibliography as well as the economic and technical aspects of cable design, installation, etc.

60590 Aull, G. H., Jr.
Current trends in recreation and parks.
PARKS RECREAT.
1(7):553-554, July 1966.

The achievement of status of recreation in government organization, and the emphasis upon parks and open space within the community, are two of the major trends in this discussion. Planning standards are under consideration, too. For parks and recreation the planning standards must be based upon more realistic appraisal of the circumstances, the needs, and the forecasts for the future.

60591 Cartsonis, E. M.
"Ten minute town" designed around pathway system.
LANDSC. ARCHITECT.
57(1):40-42, Oct. 1966. Maps, photos.

Describes Litchfield Park, a new town 18 miles west of Phoenix, Arizona. The community is oriented to leisure of movement and non-automobile traffic is provided with a 12-foot wide pathway system.

60592 Caudill, H. M.
An offense against America.
AUDUBON
68(5):357-359, Sept.-Oct., 1966. Photos.

The Poor Fork of the Cumberland River in the Appalachians and U. S. 119 which winds along the banks—an area of unspoiled natural beauty observed by the traveller ten years ago. Now coal and coke operations have cut gashes in the earth and produced taller slopes of unstable soil filling, spoiling the stream and upsetting the natural flora and wildlife. The corporation which extracted the coal has reaped a bumper harvest of ill will. Strip-mining on such steep terrain is wholly inconsistent with the preservation of natural beauty and the natural balance of life. Local and State statutes are unequal to the task of controlling such economic and corporate pressure. Only a national conscience and a Federal strength of purpose can preserve the hills, hollows, streams, fish and wildlife of the yet unravaged lands.

60593 Creese, W. L.
The search for environment.
New Haven, Yale Univ. Press
360p. 1966. Ref., illus., photos.

The thirst for environmental beauty in England reached its peak in the 1890's when the garden city appeared. The cultural implications of this development in architectural form and community planning are set forth. Examples are taken mainly from the British Isles, but the overseas images are also discussed.

60594 Elliott, J. E.
Think multi-use!
CAMP. MAG.
38(4):34-37, 39, Apr. 1966.

Discusses the major planning considerations essential to the development of camp facilities for off-season use.

60595 Flanagan, W. L.
Welfare Council urges land acquisition.
PRAIRIE CLUB BULL.
(556):3, 4, May 1966.

The Open Lands Committee of the Welfare Council of Metropolitan Chicago presents a proposal to solve Northern Illinois' open lands problems. The program recommends that: (1) land be acquired as soon as possible for additional acreage of land for a State park system and a 500% increase in recreation facilities; (2) a multi-park plan be developed by a regional authority to take care of county park systems; (3) park and recreation space be increased immediately in Chicago.

60596 Gold, S. M.
An approach to outdoor recreation planning.
IZAAK WALTON MAG.
31(8/9):17-19, Aug.-Sept. 1966. Photos.

Discusses the general misconception of the duties and responsibilities of the recreation planner. The role of the planner in relation to the citizen, his appointed representatives, is described.

60597 Hughes, W. G.
Historic preservation and urban renewal.
GARD. CLUB AMER. BULL.
54(1):54-57, Jan. 1966.

The interests of historic preservation and urban renewal need not clash. The experience of WHALE (Waterfront Historic Area League) in New Bedford, Massachusetts, is cited as a good example of cooperation. If the historic preservationists have a fair and ready plan, the problems with urban renewal can usually be worked out.

60598 Johnson-Marshall, P.
Rebuilding cities.
Chicago, Aldine
390p. 1966. Illus., photos.

The book presents evidence, both good and bad, of a half century in the building and rebuilding of cities and the evolving principles for creating new urban quarters. The author, professor of urban design and regional planning, University of Edinburgh, treats architecture and urban design as a unified process. He emphasizes the role of the pedestrian core for assembly and meeting place and those elements which allow a city to function culturally and to pass on the cultural heritage and give form to all its subordinate activities. Where the civic nucleus does not

exist or is shrunken, the town becomes an undifferentiated, urbanoid mass. The concept is applied through the use of a wealth of illustrations to modern town planning and city design. The civic nucleus criteria should also be applied in the planning of neighborhoods, precincts and sectors.

60599 Laurie, M.
The California influence on contemporary landscape architecture.
LANDSC. ARCHITECT.
56(4):292-298, July 1966. Photos.

A narrative about the role that Olmsted, Muir, and other California conservation giants played in the shaping of landscape architecture as it is known today.

60600 Lehmann, R. A.
The principles of waterfront renewal: A summary of experiences in fifty American cities.
LANDSC. ARCHITECT.
56(4):286-291, July 1966. Illus., photos.

The article discusses the advantages of waterfronts as urban renewal sites, and the general principles followed in redesigning waterfronts to create a more pleasing environment for recreation, shopping, creative arts, and passive enjoyment.

60601 Mackie, D. J.
Site planning to reduce deterioration. In Society of American Foresters. Proceedings, 1965. Detroit p. 33-34, 1966.

One of the three basic considerations on which the successful park system stands is "recreation area site design." The other two elements are "high quality sites" and "good management". For intelligent recreation site planning, foresters must take soil limitations into account. A discussion of the requirements for picnic areas, trails, and campgrounds are included.

60602 Morrison, C. C., Jr.
A national survey of outdoor recreation participation and preference.
Speech Presented Before the Annual Meeting of the Association of American Geographers, Toronto, Canada, Aug. 30, 1966.
10p, Aug. 1966.

The National Recreation Survey of 1965 conducted by the Bureau of the Census is described: sample design, extent of the interview work, purpose, and subject matter rationale. The subject matter of the surveys included: the respondent's vacations, overnight trips, recreation outings, and their preferences in recreational activities. These surveys will be utilized by the Bureau of Outdoor Recreation in preparing the Nationwide Plan which is scheduled for completion by 1968.

The problems in analyzing and correlating the data from these surveys and in their applications to planning models are discussed. It is pointed out that the essence of planning is policy recommendation.

60603 Murdoch, K. A.
City management speaks out.
PARKS RECREAT.
1(5):413, 456, 457, May 1966.

When city management looks at the parks and recreation service, it takes in the very wide picture of recreation and recreation facilities, both public and private. The day of completely unplanned recreation is past. City Manager Murdoch sets forth what he expects of parks and recreation people.

60604 Pearson, N.
Total planning for a region for recreation.
CAN. AUDUBON
28(1):1-7, Jan.-Feb. 1966.

A description of the legislation and the problems in the planning of the North Georgian Bay Recreational Reserve in Ontario is presented.

"Service stations can be attractive" says Palm Springs Zoning Ordinance.
WEST. CITY
42(7):38, July 1966. Photos.

The Planning Commission and its Architectural Advisory Committee in Palm Springs, California, has been successful in promoting the development of eye-appealing service stations. This has been possible through zoning, architecture, and planning commission policy.

60608 Stein, C. S.
Toward new towns for America.
Cambridge, M. I. T. Press
263p. 1966. Ref., illus., photos.

The 1966 slightly revised edition of an earlier work of the same title re-explores experiences in planning several communities, which were conceived as new projects or towns. The author, a noted architect, believes that urban environment can best be changed by building new towns on new sites. Several projects and famous communities planned or developed in association with other professionals are described and the planning criteria used in their construction are explained. Lewis Mumford, another outstanding American architect and city planner, has prepared the introduction which points out the contribution the author, Clarence Stein, has made to the new town concept in America. The influence on American thought of the British contribution to new town planning is emphasized.

60609 Stroud, R. H.
Key values in outdoor recreation planning.
Washington, Sport Fishing Institute
9p. 1966.

This was the keynote address delivered by the Exec. Vice Pres., SFI, at the Northeastern Fish & Wildlife Conference, Boston, Jan. 17, 1966. Among the outdoor recreation values and problems was the overriding conservation issue of the sixties—the conflict between the philosophies of resource isolation and resource utilization. Preservation is only a part of a more mature conservation philosophy. Proper management of fish and game stocks is vital so resource specialists play a key role in sound conservation. The sports of hunting and fishing play a key recreational role. A re-emphasis on these traditional sports is urged.

60610 U. S. Bureau of Outdoor Recreation
Focus on the Hudson. Evaluation of proposals and alternatives.
Washington, Govt. Print. Off.
51p. 1966. Maps, photos.

The Bureau of Outdoor Recreation, under auspices of the Recreation Advisory Council, completed this study on the Hudson River Valley to provide a basis for Executive Branch comments on the Hudson Highlands National Scenic Riverway bills. The study, prepared by a Bureau of Outdoor Recreation and Park Service team, includes both air and automobile coverage of the Hudson River. The report reviews, summarizes, and evaluates the various proposals for the Hudson River corridor, particularly those relating to the scenic, recreation and historic resources of the area. Basic issues discussed include water pollution, urban blight, inadequate access to the river, piecemeal approach to planning and development, and conflicting land uses. Possible alternative actions and recommendations are considered. Data, findings and recommendations contained in the Hudson River Valley Commission's Summary Report, as well as other

published reports dealing with the existing and future development of the Hudson River area, are presented in summary with appropriate reference to detailed reports in the text.

60611 Weismantel, W.
How the landscape affects neighborhood status.
LANDSC. ARCHITECT.
56(3):190-194, Apr. 1966. Table, maps.

Here is a study of the influence of urban landscape as exemplified in the conserving and renewing influence of Boston's Charles River Basin and Park System.

Forever pastoral.
ADIRONDAC
30(4):75, July-Aug., 1966.

A section of beautiful meadows and eight miles of mountain valley between Keene Valley and Keene are earmarked for unspoiled preservation.

60613
Long line forms as Federal funds become available for county and local parks.
PARK MAINTEN.
19(5):42-43, May 1966.

The plans of a number of local parks for expansion with the aid of federal funds are described.

60614
"The Path is Dead" in Manhattan.
LANDSC. ARCHITECT.
56(3):231, Apr. 1966. Photos.

Many new designs and ideas are exerting a refreshing influence on the course of new playground, park, and housing project design today. The designs and work of Paul Friedberg in Manhattan are symptomatic of these refreshing changes. With city approval, Friedberg is transforming exterior spaces in a three-dimensional land use manner that removes the proprietary look of fenced-off playgrounds. In explaining his "path is dead" concept, Mr. Friedberg reports that the idea is to take away the rigid, coercive path structure imposed on old projects and to look on the entire space as one big path—almost a "happening" for the benefit of the entire community.

60615
Treasure Island, Florida.
AMER. SHORE BEACH PRESERV. ASS. NEWS LETT.
p. 3, Aug. 31, 1966.

A beach restoration project to be undertaken by the Corps of Engineers includes Treasure Island in Pinellas County, Fla. This article explains the benefits, both public and private. The

public would enjoy recreation use of the entire reconstructed beach, while private property owners along the Treasure Island shoreline would benefit from the protection of their existing uplands by the project. Success in the Treasure Island experiment will set a very valuable precedent for public-private cooperation.

60616 Brooks, P. L., Jr.
Asian native conquers desert sands.
DESERT
29(12):10-11, Dec. 1966.

A tree, Tamarix or Athel, native to western Asia, is selected for windbreak planting by the Southern Pacific Railroad in desert areas. Growth quickly proliferates in sandy and rocky soil. Area landowners are requesting assistance in sand control and the tree is being promoted by the Soil Conservation Service.

60617 Cain, S. A.
Program concepts of the Dept. of the Interior with regard to fish and wildlife. In International Association of Game, Fish and Conservation Commissioners, Proceedings, 55th convention, 1965.
Portland, Oreg.
p. 109-116, 1966.

Program concepts are interpreted. The program of the Bureau of Commercial Fisheries is concerned with oceanic resources and calls for expanded investigation of the environments of the seas and of the biological resources associated with them. The international treaty organizations and F.A.O. are supported. Treaties with foreign countries on the natural resource and production of cheap fish protein for world consumption is part of this Bureau's responsibility. Cooperation is needed between the States and the Federal Government on the research of estuaries and the inland water improvements. Research in fisheries management and wildlife, especially refuge management, is the responsibility of the Bureau of Sport Fisheries and Wildlife in cooperation with the States and neighboring countries. The boundaries between State and Federal jurisdictions regarding fish and wildlife management are areas of dispute. More needs to be known about endangered species. Problems in wildlife management involve the growing pressure to use wildlife areas for recreation. Human population, agriculture, industry, and other related causes of habitat destruction and pollution create major problems. The control of the general environment must be achieved regardless of cost; for man himself is the endangered species. Research and cooperation with other nations in developing and controlling the natural environment for mankind is part of the responsibility of the Interior Department.

60618 Chapman, C. W.
The importance of forestry in Georgia's soil conservation program.
FOR. FARM.
25(8):26, 50, Apr. 1966. Photo.

Georgia landowners now realize the importance of woodlands. In making the best use of their land and water resources, the landowners are using trees to control soil erosion, help prevent floods, and make the rural landscape more attractive. The landowners realize that trees have recreational and landscape beauty values as well as their use in erosion control and economic value as timber. Landowners are using soils information to decide the type of trees to plant in specific locations, to predict tree growth, to determine erosion control needs, and other data essential to woodland management.

The principal features of the 15-point proposed program, and estimated average cost, showing Federal participation only, are presented in this article. It summarizes the preliminary plans for a 10-year Department of Agriculture program for forest lands in State, local and private ownership.

60636 Olzendam, R. M.
Keeping America green.
AMER. FOR.
72(6):8-11, June 1966.

The Keep Green program is a national outgrowth of a volunteer Washington state program that is assisted by the state government. During the last 25 years it has witnessed an 82% average

drop in acres of forests burned per year. Thirty-seven States and several Canadian provinces now are organized. Educating the public is an important step in controlling the number of fires set. A national organization, American Forest Products Industries, Inc. distributes materials to schools and colleges. Two points about fires are important: (1) the principal cause of fires is man's carelessness which cause 90% of the forest fires; (2) quick detection is the key to forest fire control. A history of fire fighting techniques is given.

60637 Peterman, W. E.
Rabbit trap and transfer program.
N. J. OUTD.
17(5):15-18, Nov. 1966. Photos.

The Bureau of Wildlife Management has a program for group participation in the stocking of rabbits. This program as well as habitat improvement for low rabbit populations is discussed and illustrated.

60638 Randall, C. E.
You can be a conservationist.
AMER. FOR.
72(4):17-27, Apr. 1966. Illus.

This article explains the meaning of conservation of resources—soil, water, forests, grasslands, etc.—and what can be done about it. Includes a Conservation Pledge: "I give my pledge as an American to revere the living earth of which I am a part and to cherish all things living on, over and beneath its surface."

60639 Reagen, M. V.
New Jersey township solves its emergency rescue problems.
SWIM. POOL AGE
40(8):24-25, Aug. 1966.

Livingston, New Jersey, has solved its aquatic emergencies with the help of members of the Fire Department, the Police Department, paid and volunteer rescue personnel and qualified residents. These people are given the Red Cross Survival swimming course and training in areas of advanced resuscitation, basic water safety, and lifesaving techniques.

60640 Rosen, H.
Conservation education in the action stage.
PA. ANGL.
35(10):20, Oct. 1966.

Here are listed some of the enterprises which have proved effective for a positive training effect on young people. The rewards of this training are not only immediate but lasting. They result in having far better conservation practices for tomorrow's citizenry.

60641 Sage, D.; Bowman, W.
New hope for the Rahway River.
N. J. OUTD.
17(2):10-13, Aug. 1966.

A program sponsored by local community organizations is underway to clean up the Rahway River and build small stone dams to provide "holding water" so trout can thrive again.

60642 Shomon, J. J.
The Greenspan program.
AUDUBON
68(6):414-415, Nov.-Dec. 1966.

A new U. S. Department of Agriculture program called "Greenspan" may become a boon to open space preservation and nature center development. As part of the Federal Cropland Adjustment Program, it provides Federal grants to assist farmers who agree to move land out of production of certain crops and into conservation use. It also offers funds to help local and State governments to acquire land for permanent conversion to open space, natural beauty, wildlife habitat, or public recreation, or for the control of air or water pollution. Application of the plan to Newark, N. Y., is described.

60643 U. S. Dept. of Agriculture
Financing rural recreation facilities.
LEISURE
8(1):9-12, Mar. 1966.

The U. S. D. A. program administered by the Farmers Home Administration to finance rural recreation facilities is explained.

60644 U. S. Dept. of the Interior
Program for advancing underground electric power transmission technology.
Washington
33p. 1966.

In order to accomplish the recommendations of the Panel on Underground Installation of Utilities, of the White House Conference on Natural Beauty, this report charts a cooperative research effort between government and industry. It recommends a research program to lower the cost of placing transmission lines underground and to improve transmission technology. In addition to specific recommendations by Stewart Udall, Secretary of the Interior, and Kenneth Holum, Assistant Secretary, Water and Power Development, all aspects of the program for advancing underground electric power transmission technology are presented and explained in detail.

60645 U. S. Economic Development Administration.
Handbook of Federal aids to communities.
Washington
111p. 1966.

This handbook describes the Federal programs which provide any kind of aid to communities.

Included are discussions of the financial and technical assistance available through the Bureau of Outdoor Recreation.

60646 U. S. President (Lyndon B. Johnson)
Message to Congress on pollution.
TRENDS PARKS RECREAT.
3(2):6-10, Apr. 1966. Photo.

A message to Congress by the President details the pollution of our waters and proposes a Clean Rivers Demonstration Program. The four requirements for participation and benefits in the program and the enforcement authority on pollution vested in the Federal Government are enumerated. The proposal deals with: research for comprehensive pollution control; control of air pollution; pollution from federal activities; human resources for pollution control; impact on cities; and the establishment of a National Water Commission. The president also proposes the completion of our National Park System by 1972; creation of a Redwood National Park in northern California; various Outdoor Recreation programs; a Nationwide Trail System; grants to States and to the National Trust for Historic Preservation; a Wild River System. The costs of land acquisition are to undergo investigative procedures for protecting the government against artificial price spirals. The President proclaims a conservation creed to preserve our natural heritage with rights and the duties to respect those rights.

60647 Wirth, C. L.
The mission called 66.
NAT. GEOGR.
130(1):7-46, July 1966. Photos.

Seldom has a single program which so affects the inspirational heritage of a Nation been implemented in such a short time. Great was the need. In 1956 our national parks were overcrowded, historic sites showed signs of ruinous wear. A system equipped to handle 21 million visitors a year was being flooded by 55 million. The author decided the answer to keeping the park areas intact lay in a 10-year package program called Mission 66. This program has brought about park improvements, additional lands, new methods of visitor protection, better operating procedures, and new interpretation of park values.

60648
America the beautiful, let's keep it that way.
RECREAT. MANAGE.
9(5):10-11, June-July 1966. Illus.

Industrial recreation has much to gain in helping the efforts of community, state and federal campaigns to clean up, fix up, conserve, and keep America beautiful. When Owens-Illinois' Recreation Association joined the "keep America beautiful" movement, the entire town of Toledo gained by it. The true and lasting reward is a cleaner and more beautiful city in which to live, work and play.

60649
New York community starts first "Greenspan"
Project.
CONSERV. NEWS
31(13):5-6, July 1, 1966.

The Village of Newark, N. Y. has a new
"Greenspan" Project. This project is given to
a community action plan provided for in the new
Cropland Adjustment Program which shifts
cropland to other uses. The first Greenspan
area will be developed into a village recreation
area, primarily for children. Present plans
call for a bird sanctuary, wildlife pond, picnic
area, novice ski slope and ice skating rink.

60650
Public access obtained and developed.
IDAHO WILDL. REV.
18(4):11, 14, Mar.-Apr. 1966. Photos.

The Idaho Fish and Game Department has a
five-point program for the future. A key part of
this program is to acquire and develop public
access sites to major fishing and hunting waters.

60651

60669 Heeney, W.; Abbott, S.
Youth fairs: Do they hit the mark?
AMUSE. BUS.
78(23):20-22, June 11, 1966. Photos:

An analysis of the widely varied youth market for recreation. The latest attempt to corral this youth market is the Teen-Age Fair. By the end of this year, there will have been over 25 youth fairs and exhibitions in the U.S. A. Regardless of what it is called, the format is basically the same: exhibits consisting of cars, clothes, records, household furnishings and service firms—with a wraparound of entertainment, games and often carnival rides.

60670 Hood, M. V.; Hood, W.
Nature and the camper.
Los Angeles, Ward Ritchie Press.
157p. 1966. Ref., illus.

Presented is a guide to safety and enjoyment for campers, hikers, hunters, and fishermen on the Pacific Slope and southwest deserts. The book has four objectives: (1) to remove false fear; (2) to alert the prospective camper or hiker to the relatively few natural hazards to be found; (3) to help youth leaders, including parents, appreciate the privilege they have in introducing youngsters to the fun of being out-of-doors; (4) to save the lives of innocent creatures which are often killed on sight because of lack of knowledge concerning their effect on man. The book is divided into the following sections: animals of land and air; animals of the seashore; man and plants; and the camp and the trail.

60671 Miller, D.
Are you using your most valuable asset?
PARKS RECREAT.
1(6):494-495, June 1966. Photo.

A most valuable, and often untapped, asset of many parks and recreation departments can be the youth of the community. This age group most enjoys using the park facilities and participating in recreation programs. High School age boys are exposed to the world of work, and at the same time offered recreation facilities.

60672 Oliver, J. N.
Add challenge with variety in activities.
JOPHER
37(4):30-32, Apr. 1966.

Activities for mentally retarded children suggested, with the best approaches for different age and achievement potential levels. For use primarily by camp counselors in summer day camps for the mentally retarded.

60673 Stein, J. U.
The mentally retarded need recreation.
PARKS RECREAT.
1(7):574-575, 577-578, 594, July 1966. Refs.

A report on the recreation interests and leisure-time pursuits of the mentally retarded.

60674 Swift, E.
Youth and a crucible of self-sufficiency.
N. J. OUTD.
16(10):1, 24-26, Apr. 1966.

The virtues of pioneering are praised, especially the development of self-reliance in boys. As a substitute for frontier ways of life, the old CCC Camp idea is recommended to improve the boys of today—in physical well-being, in ideals, in purpose, and with a little more interest acquired in America, their heritage.

60675 Tupper, M.
No place to play.
Philadelphia, Chilton Books
293p. 1966. Photos.

The author discusses recreation needs, prevention of delinquency, water pollution, the place of private enterprise, the role of government, recreation travel, the village common, and new towns—covering almost the entire spectrum of our troubled human environment. The theme which threads throughout the text is on the disappearance of good play places for children. The final chapter embodies a plea for a green legacy.

60676 Wagar, J.V.K.
Some fundamental characteristics of outdoor recreation.
J. FOREST.
64(10):667-673, Oct. 1966. Ref., photos, tables.

Outdoor recreation management is hampered by many who mistake recognition of happy participants (spending time and money) for understanding of areas, activities, and recreationists. Areas vary principally in condition, size, numbers, and accessibility. Activities vary chiefly in intensity of contest and expertness, and effort expended. Recreationists differ primarily in knowledge, skill, fairness, and honesty. Other definitions and analyses are presented.

60677
Many State parks have that new look.
KY. HAPPY HUNT. GROUND
22(3):27, 29, May 1966. Illus.

A report on tourism reveals the travel industry in Kentucky showed a nine per cent growth last year. The State's Department of Parks records attendance at 33 state parks and shrines of more than 15,000,000 persons. The Department plans a facilities expansion program ranging from deluxe accommodations to primitive camps sites. Twenty major developments are listed and described.

60678 Canada. Dept. of Northern Affairs and National Resources. Natural and Historic Resources Branch.
Visitors to five national historic parks.
Ottawa, Dept. of Northern Affairs and Natural Resources
25p. 1966. (Its Recreational Research Report 19.)

A study of five historical parks provided information on the number of visitors, their characteristics (residence, party size, length of stay, and major interests in the park), and their distribution in the park. This data was collected using traffic counters and observational methods on a sample basis.

60679 Gebelein, H.; Willis, P.W.
The Vermont ski market 1965-66.
Montpelier, Vermont Development Department
35p. 1966. Tables.

Initiated by the Vt. Development Dept. in Feb. 1966 and completed by summer, 1966, the three phases of this study were (1) interviews with skiers at the ski areas, (2) questionnaires sent to a list of 4,562 skiers, and (3) open ended interviews with the ski area managers. Reported here are skier characteristics, skiers' comments, managers' interviews (including analyses of market trends, plans, labor force data, and financial data), plus conclusion and recommendations. Tables include origin of skiers, length of stay, housing, daily expenditures of skiers, media attracting skiers to Vt., choice of ski area, labor force data, and information sources.

60680 Graves, W.A.
Teachers' reading and recreational interests.
NEA J.
55(8):17-19, Nov. 1966. Tables.

A survey of teachers' out-of-school recreational interests revealed that they participated in hiking and swimming more than any other sports. Football was the most frequently watched spectator sport. Tables which dealt specifically with recreation gave the percentage of teachers indicating certain limitations on recreational time; the spectator sports watched by various percentages of teachers; and the sports participated in by various percentages of teachers.

60681 King, D.A.
Characteristics of family campers using the Huron-Manistee National Forests.
St. Paul, Minn., Lake States Forest Experiment Station
11p. 1966. Illus. (U. S. For. Serv. Research Paper LS-19).

All of the campgrounds on both forests were sampled, each one on 24 days during the summer. Each time 25% of the occupied campsites were selected at random, for interviewing with a total of 564 groups being interviewed. Information on the origin, number and length of camping trips taken, campers' socio-economic characteristics and their camping experiences were obtained.

60682 Deasy, G.F.; Griess, P.R.
Impact of a tourist facility on its hinterland.
ANN. ASS. AMER. GEOGR.
56(2):290-306, June 1966. Illus., maps.

An analysis is made of the effect of a facility on its hinterland, the degree of impact being postulated as a function of the friction of distance. The validity of this concept is tested by analyzing the actual impact of two similar tourist attractions in Pennsylvania on their hinterlands. Major discrepancies are found to exist between the pattern of geometrically regular hypothetical impact zones and the highly irregular patterns produced by the two test facilities. Analysis of conditions that might create such irregularities yields null results in the case of (1) invalid data, (2) accessibility, and (3) intervening opportunity factors; and significant correlation in the case of the (4) regional orientation, (5) familiarity, and (6) advertising factors.

60683 Graves, W.
California, the golden magnet. Part 1. The south.
NAT. GEOGR.
129(5):595-640, May 1966. Maps, photos.

The magnitude of California, our third largest State, is described. It has more national parks and national forests than any other State. San Diego has one of the world's finest zoos, an excellent fishing and surfing beach, and a new waterfront recreation area called Mission Bay Park. Los Angeles is an urban sprawl of 75

smaller cities fused together by endless freeways, and land costs are spiralling. Dams on the Colorado River transformed the Imperial and Coachella Valleys from deserts to lush farmlands, but California still has such noted deserts as the Colorado, the Mohave, and Death Valley.

60684 Graves, W.
California, the golden magnet. Part 2. Nature's north.
NAT. GEOGR.
129(5):641-679, May 1966. Photos.

This well-illustrated article about the golden State, California, describes its unique features. Yosemite National Park and northern California's major city, San Francisco, are discussed. Current expansion is described. Northern California is building Oroville Dam, which will deliver water to areas as far south as San Diego. Muir Woods National Monument and other stands of coastal redwoods contribute to the beautiful California shoreline. The scenic beauties of this State should be preserved in the face of expanding population pressure.

60685 Laing, A.
Critical park needs.
PARKS RECREAT. CAN.
24(6):4-5, Nov.-Dec. 1966.

The problem of outdoor recreation on the urban fringe is discussed. The need for parks near cities and the lack of jurisdictional responsibility are pointed out. The start of a study of demand for outdoor recreation in Canada is announced.

60686 LePage, W.F.
Success of campgrounds studied as guide to recreation planners.
Upper Darby, Pa., Northeastern Forest Experiment Station.
7p. 1966. Tables. (U.S. Forest Service Res. Note NE-43.)

Privately owned campgrounds in New Hampshire were studied in 1964 to determine what characteristics were more frequently associated with successful operations. Factors of size, age, location, water attraction, length of stay of campers, advance reservation clientele and membership in the Campground Owners Association are evaluated.

60687 Sharpe, G.W.
Forest recreation. In A look at the year 2000
Society of American Foresters
Proceedings, 1965.
Washington
p. 141-144, 1966. Ref.

Land, population, income, transportation, and leisure are factors affecting recreation uses. The forester must protect, revitalize, and enlarge recreation lands where the leisure of millions may be wisely and pleasantly spent.

60690 Seay, C.
Relaxed or collapsed?
TAM ARCH. WORLD
15(1):13, Jan. 1966.

This is an explanation of the importance of relaxation of action and the use of the proper muscles in the sport of archery.

60691 Smith, J.W.
Archery—an old sport with new interest.
JOHPER
37(9):10, Nov.-Dec. 1966.

Through its Outdoor Education Project, the AAHPER is giving special emphasis to archery, including archery instructors' workshops. They are designed to encourage archery group instruction in schools, colleges, and recreation agencies. Target and field archery, archery games, bow-hunting, and bow fishing are stressed. Archery ranks high as an individual activity which combines a satisfying skill with vigorous outdoor exercise.

60692 Webb, W.; Speaks, L.
The champions' way to do it.
TAM ARCH. WORLD
15(3):8-11, 29, Mar. 1966. Illus., photos.

This article deals with the archer's basic shooting style and tackle preparation as taught by Joe Fries to Les Speaks—both several times National champions in archery.

60693 Witt, J.
"Butterflies".
TAM ARCH. WORLD
15(3):19, 28, Mar. 1966.

How the champion archers have learned to control the tournament jitters known as "Butterflies" to keep their game from becoming affected.

60694
Archery is one sport that's definitely "on the move."
SPORTSCOPE
11(5):2, May 16, 1966.

Survey results show the percentage of archers who include the sport in their vacation, the num-

ber of miles travelled by archers and bowhunters, and the number of contestants in tournament archery. As a sidelight to these figures and, in a way, a reward for all of the enthusiasm is the fact that archery will be entered as one of the official sports in the 1972 Olympic Games.

60695 Pettingill, O. S., Jr.
Bird finding in the Bay State.
AUDUBON
68(6):394, 396, 398-400, Nov.-Dec. 1966.

Bay State bird watchers in both numbers and proficiency outrank those in any other State. The Massachusetts Audubon Society is the largest State organization of its kind with a program in research and public education. A call to the Society provides information on locations and routes to bird sanctuaries where specific species may be observed.

Camping-itis.
W. VA. CONSERV.
30(3):17-21, May 1966. Photos.

Discusses the economy, convenience, fun and the popularity trend in camping. The author describes camping areas, camping maps, camping fees and organizations.

60704 Hood, M. V.; Hood, W.
Nature and the camper.
Los Angeles, Ward Ritchie Press
157p. 1966. Ref., illus.

Presented is a guide to safety and enjoyment for campers, hikers, hunters, and fishermen on the Pacific Slope and Southwest deserts. The book has four objectives: (1) to remove false fear; (2) to alert the prospective camper or hiker to the relatively few natural hazards to be found; (3) to help youth leaders, including parents, appreciate the privilege they have in introducing youngsters to the fun of being out-of-doors; (4) to save the lives of innocent creatures which are often killed on sight because of lack of knowledge concerning their effect on man. The book is divided into the following sections: animals of land and air; animals of the seashore; man and plants; and the camp and the trail.

60705 Lindberg, M.
Fireproof camping.
CAMP. GUIDE
(40):28-29, 50-52, Jan. 1966. Photos.

Precautions are given campers for guarding against fire starting from carelessness, wind,

campfire flare-ups, inflammable tents, or combustion. In addition, a fire extinguisher for your camp and boat is suggested.

60706 Luce, W. P.
Family camping. A self-instruction guide to camp skills and sites.
New York, MacMillan
145p. 1965. Illus.

This manual contains a guide to national parks, forests, State and Federal campgrounds. Equipment analyses are given to help in selecting tents, trailers, sleeping bags, clothing. Instructions with illustrations show campsite methods, such as how to pitch camp, build fires, cook easily and safely.

60707 Riviere, W. A.
The complete guide to family camping.
Garden City, Doubleday
224p. 1966. Illus., photos.

A book on camping and camping equipment is presented. The types, care and repair of the following equipment are described: tents, tent trailers, shelter and comfort accessories, travel trailers, truck campers and camp coaches, camp stoves, cooking pans and accessories, heaters, lanterns, camp kitchens, and camp refrigerators. Camping tips are supplied to enable the camper to get the maximum benefits from the camping experience. The appendix includes lists on camping information sources; campground guides and directories; camping periodicals; national and regional camping clubs and associations; camping workshops; campground owners associations; and other organizations of interest to family campers. Modern camping terminology also is included.

60708 Shedd, D. H.
Purposes and goals of family camping.
TRENDS PARKS RECREAT.
3(3):5-9, July 1966. Photos.

This article presents some of the motivating factors in family camping and the problems of the campground operator in providing camping areas and facilities at reasonable cost and in preserving the natural resources for outdoor recreation.

60709 West, A. G.
For economy, try station wagon camping.
CAMP. GUIDE
(42):14-15, Apr. 1966.

The author explains how it is possible to travel comfortably and inexpensively. She and her husband took a trip from Oregon across the country in a cabana-equipped station wagon.

60710 West, D. E.
Outdoor Life: A Survey of foods for camping and sporting trips.
New York, N. Y., Outdoor Life Research Department
20p. 1966.

A report containing the results of a mail survey sent to a sample of 2501 Outdoor Life subscribers to learn about foods and outdoor cooking on camping, fishing, hunting, and boating trips. Tabulated results from 663 respondents are presented. Selected verbatim comments are included.

60711
Backpacking in the Superstition Mountains.
SUMMIT

Vehicles can raise havoc with the land.

60713 Flint, G. W.
Jeepster jamboree.
OUR PUBL. LANDS
15(5):9, Summer 1966. Photo.

Discusses the outdoor sports that are taking place in sandy dunes and rocky mesas in California. Recreationists have been engaging in mobile sports in central San Bernadino County because of the distance from crowded cities and freeways.

60714 Jackson, J. B.
90-year wonder.
LANDS. ARCHITECT.
57(1):38-39, Oct. 1966.

Discusses the impact on American life brought about by the bicycle. Although motor vehicles as a prime means of transportation have largely displaced cycling today, there are some 33 million bicycle riders in the United States. Cycling is enjoying a remarkable comeback. Actions taken in several places to encourage cycling are described.

60715
Board track racing is back.
AMER. CYCL.
5(7):25, Sept. 1966. Photo.

Board track racing has been brought to Newark, New Jersey, by Sports International. Twice a week crowds are jamming the stands to watch the exciting bicycle races.

60716
Falconry.
IZAAK WALTON MAG.
31(6):18, June 1966. Photos.

Discusses the growing sport of falconry or hawking. In January 1966, falconers from all parts of the country met in Northern Illinois at the Des Plaines Wildlife Area for several days of trials and training.

60717 Ames, F. H.
Fishing the Oregon country.
Caldwell, Idaho, Caxton Printers
324p. 1966. Photos.

For purposes of compiling data for fishing chances at different times of the year, the topographic and climatic material is arranged into four geographic regions, each of which is treated as a piscatorial entity. The lures for and locations of trout, bass, salmon, steelhead, sturgeon, shad, as well as ocean fish, clams and crustaceans are discussed in an autobiographic recount of experiences.

60718 Atts, E.
Float fishing the Allegheny River.
PA. ANGLER
35(9):20, Sept. 1966.

Float fishing is one of the simplest and most relaxing forms of fishing there is. One merely puts his boat in the water and floats along with the current. This article gives advice about methods and equipment.

60719 Bauer, E.
Photography for fishermen.
FISH. WORLD
13(1):Jan. -Feb. 1966. Photos.

The author of the book, Outdoor Photography, gives tips on how to film your fishing trips.

60720 Brooks, J.
Complete guide to fishing across North America.
New York, Harper, Row
613p. 1966. Maps, photos.

A guide to fresh and salt water fishing in the United States, Canada, Mexico. The Bahamas and Bermuda are presented. The book contains 48 state maps which are keyed to the text and show the location of every recommended lake and stream. Fishing regulations, license fees, seasons, and limit of fish catch are defined for each state or area. An index of waterways is included.

60721 Brower, B.
The mystique of surf fishing.
HOLIDAY
39(7):46-47, 88, July 1966. Illus.

The author describes the joys he associates with the sport. It isn't the catch that matters

so much—it is a communion with the sea. It is a deep-seated and arcane pleasure. Characteristics and kinds of surf fishermen are described.

60722 Buss, K.
The history and evolution of sport fishing.
PA. ANGL.
35(8):8-9, Aug. 1966.

The evolution of sport fishing from recreation for the wealthy aristocrat to an activity for the less well-to-do city dweller is depicted. Fishermen who fish to the limit seldom are interested in wilderness areas and anglers are seldom agreed on the various programs of fish stocking offered by state agencies. Trout Unlimited emphasizes a program of limiting the kill rather than killing the limit.

60723 California. Dept. of Fish and Game.
Pismo clamming: a favorite winter sport.
OUTD. CALIF.
27(2):12-14, Feb. 1966.

Discusses annual clam census at Pismo Beach and suggests best methods of harvesting and preparing clams.

60724 Cochran, B.
Fishin' holes.
VA. WILDL.
27(3):10-11, Mar. 1966.

The excellent fishing at Kerr Dam, on the Roanoke River, and the good camping facilities in North Bend Park, Virginia, are discussed.

60725 Corbeau, L.
Sand, sea, surf, and tent trailering.
TRAIL. TRAV. MAG.
31(3):31-33, 70-71, Mar. 1966. Photos.

Camping directly on the beach offers many advantages; among them are surf fishing and beachcombing in your own front yard—all for only pennies a day.

60726 Curtis, R. L.
Full stringer at Folsom Lake.
FISH. WORLD
13(2):40-43, Mar. /Apr. 1966. Photos.

An account of successful fishing efforts at Folsom Lake, California. Happiness is catching a string of lake fish.

60727 Fox, C. K.
The American beginning.
PA. ANGL.
35(3):2-6, Mar. 1966. Illus., photos.

Fly fishing through the years 1800-1900 in Pennsylvania is depicted.

60728 Guy, J.
Secret of the Willoughby.
FISH. WORLD
13(2):36-39, 59, Mar. -Apr. 1966. Map, photos.

The adventures, joys and sorrows of fishing the Willoughby River are delineated.

Jig-fishing comes of age.
PA. ANGL.
35(2):4-6, Feb. 1966. Photos.

In ice fishing, the jigging method is one of the most popular. Descriptions are given of this method and of the equipment required for this sport, including jig rods and ice lures.

60737 Tyler, J.
Fall is for hunting. . . usually!
GA. GAME FISH
1(1):7, Oct. 1966. Photos.

Reasons are provided to support the author's contention that fishing is great in Georgia in the fall.

60738 U. S. Bureau of Sport Fisheries and Wildlife
National Survey of Fishing and Hunting 1965.
Washington, Govt. Print. Off.
76p, 1966. Illus., tables. (U. S. Fish and Wildlife Service. Resource Publication 27.)

The third survey (1955 and 1960, predecessors) has more extensive coverage on the numbers of people engaged in recreational fishing and hunting and the economic value of these two activities. Appendix A contains statistical tables which give detailed data on expenditures of fishermen and hunters, number of recreation days, selected characteristics and total of participants and geographic areas. Comparisons of major findings of the three surveys are listed and the differences analyzed. Definitions and the technique of the survey also are included. Statistics preceding the detailed tables are reproduced graphically.

60746 Arnett, E. A., Jr.
Footloose.
MICH. CONSERV.
35(4):8-11, July-Aug. 1966. Illus.

This lighthearted analysis categorizes hikers in 4 classes: (1) those seeking physical improvement; (2) those seeking mental gains; (3) those looking for material gains; (4) those after no gain. The mental-gain hikers can be divided into the self-preservers seeking freedom from the "hustle and bustle" of modern living; and those out to learn something. The learners include the mountain climbers, the cave explorers, and all who enjoy the study of birds, plants, and wildlife. In the material gains category are the rockhounds, beachcombers, amateur prospectors, and all collectors of leaves, insects, and botanic specimens.

60747 Bauer, E. A.
This summer . . . put yourself in the saddle.
NAT. WILDL.
4(4):41-46, June-July 1966. Photos.

The author discusses the pleasures and recreational benefits from pack tripping or trail riding. The equipment needed, the expenses involved, the arrangements to be made, and the possible hazards of such a trip are described.

Hunting safest since 1948.
N. J. OUTD.
17(1):22-23, July 1966.

Despite the fact that the number of licensed hunters has risen by more than 10,000 since 1948, the 1965-66 hunting season in New Jersey was the safest since then. Much of the credit should go to the efforts of volunteer hunter safety instructors. This article explains State hunting regulations, statistics, and safety programs.

60771 Rockwell, L. G.
". . . Except Thou bless me."
ADIRONDAC
30(5):80-81, Sept. -Oct. 1966. Photo.

Here is an attempt to explain and describe why men climb mountains. One reason the author expresses in this way: "In the mountains your total environment is the quintessence of the elemental—heat, cold, wind, clouds, rain, snow, forests, rock, earth, sky—unpolluted, uncorrupted. These elemental things evoke a sense of reverence for majesty quite outside oneself and one's fellow men."

60772 Wilkins, J.
A conquest of Rainier. In Roberts, E. A., ed.,
America Outdoors.
Silver Spring, Md., The National Observer.
p. 84-91, 1966. Map, photos.

The rigors of climbing Mt. Rainier, the 14,410-foot dormant volcano in Mt. Rainier National Park are not too tough for an experienced mountain climber. Techniques are not difficult and climbers are roped for safety only. Some routes are treacherous and their use seldom permitted. Various climbing clubs schedule ascents. Equipment should be carefully chosen. The author recounts his activities, reactions to scenic grandeur and feelings of personal satisfaction in achievement on his ascent of Mt. Rainier via the Emmons-Winthrop route.

Trailing the voyageur's route.
TRAIL. TRAV. MAG.
31(3):21-24, 30, 77, Mar. 1966. Ref., map, photos.

The Voyageur's Route—tracing the tracks of the early fur traders—is a 575-mile trip which

begins in Duluth, Minnesota. It takes you on a fascinating tour of Lake Superior's shores, up into the untamed Canadian lakelands, including Ontario's 1750-square-mile Quetico Provincial Park, and then re-enters the United State at International Falls. There are sights of deep-draft ocean-vessels, cascading waterfalls, a 20-foot talking statue of Pierre the Voyageur, and vast mining operations.

Spelunking.
WIS. TALES TRAILS
7(3):28-32, Autumn 1966. Photos.

A narrative trip into the world inhabited by spelunkers—hobbyists who explore caves, and speleologists—scientists who study caves and cave phenomena. The history of cave exploration is given. The article also discusses caver groups. Although not all cavers are organized,

the adventures underground of such cavers as the National Speleological Society in general and the Wisconsin Speleological Society in particular are reported. Cave terms, such as "speleothems", "stalactites", "stalagmites", "moon milk", "guano", "petroglyphs", "soda straws", "cave pearls", and "helictites" are explained fully.

60798 Battle, J.
On the crest of the wave.
MICH. CONSERV.
35(4):12-15, July-Aug. 1966. Photos.

In the present booming economy, boating is literally on the crest of the wave. Sailboat sales are accelerating. Michigan now leads the Nation in numbered motorboats. A basic problem is water safety. More people and more boats mean more regulations. Good safety laws are essential. Boating education is also needed. Elementary boating safety courses have been offered to over 3,000 by the Michigan Conservation Department and marine patrolmen report that water safety problems are reduced where the course has had wide exposure.

60799 Bradley, W. P.
The lure of boating.
HOLIDAY
39(7):38-45, 96-97, 110, July 1966. Illus., photos.

The reason Americans are going down to the sea by the millions perhaps is because there is little left to conquer on land. Places to weekend in the country are full of gas fumes, razzmatazz, and noise. The sea rolls on unchanged, a last reservoir of open space, a last great province where the work of man does not show. The lure of the sea is in its beauty and that of its companions, wind and cloud, moonrise and starlight, the revolving of the sun.

Boats for overland camping.
BET. CAMP.
7(6):46-49, June 1966. Illus.

The proportion of new campgrounds that are located on streams, rivers, ponds, and lakes is still increasing. Towing a travel trailer limits you to a boat you can carry on your car top or an inflatable type that will stow inside. Pickup camper owners can tow a boat behind very easily. Tent campers can fasten a boat on top and still pack plenty of gear in a wagon.

60839 Dalrymple, B.
Keeping out of coach trouble.
TRAIL. TRAV. MAG.
31(11):35-36, 66, 69, Nov. 1966. Photos.

Coach and pick-up rigs can travel into out-of-the-way spots but the seasoned camper will be wary of road conditions in rainy weather, slick wet soils, sandy beaches, and camping under trees. Sturdy equipment for changing tires is also necessary.

60840 Etkes, A. B.
The playground revisited. A new evaluation.
TRENDS PARKS RECREAT.
3(3):27-32, July 1966. Photos.

The child's desire to play does need to be turned into a constructive, productive, learning experience, but playground equipment is geared to athletically gifted children and is often physically hazardous. Limitation-minded play equipment is abandoned when mastered. Less than half the child population is psychologically, emotionally or physically equipped to derive value from the traditional playground. Successful games for children orient them toward outdoor activities and present a key to the whole concept of creative, self-directed play. Realistic play equipment depicting natural concepts capture the child's interest with a minimum of adult supervision.

20(2):20, Feb. 1966.

The 1965 resort market survey includes a product report covering the use of boats and outboard motors. Of American resorts, more than 3100 (53% of the resort market) make boats and outboard motors available for guest use. This includes both owned and leased boating equipment. There are more than 34,000 boats and 15,000 outboard motors in use at resorts.

60867
Coloradan reminds customers of vacation savings in camping.
SPORT. GOODS DEAL.
135(2):67, Nov. 1966. Photos.

Here is imaginative merchandising of camping equipment. A Boulder, Colorado, sporting goods retailer placed a large sign in his window comparing initial costs for camping equipment with typical motel and restaurant charges for two weeks for a family of four. The total of \$365.35 for camping equipment was contrasted with commercial expenses of \$378.00 for the same people, broken down into motel accommodations and meals for 14 days. Implicit in the sign was the fact that the equipment expenditures would occur only at the outset.

60868
'66 car sales rise sharply.
GOLFDOM
40(9):32, Sept. 1966. Photo.

A summary of highlights reported to members of the American Golf Car Manufacturers Association at their third annual meeting held at Shawneeton-Delaware, Pennsylvania. Such facts as that the shipments of golf cars have increased 19% during the past year and that the dollar value is up 25% are included.

60869 Anderson, J.K.
Make America beautiful,
ARBORIST'S NEWS
31(2):9-14, Feb. 1966.

An article for stimulating action to rebuild and reclaim the natural beauty of our country. Natural beauty in our environment ministers to our spiritual and physical needs. Roadside planting, aesthetic building designs, and open space programs are steps forward. It is urgent that we work for a clean, beautiful and inspiring environment for today and for generations to come.

Attitudes toward nature.
MASS. AUDUBON
50(4):176-181, Summer 1966. Photos.

No abstract.

60871 Roberts, E.A., Jr.
The gifts of Zion. In Roberts, E.A., ed., America Outdoors.
Silver Spring, Md., The National Observer
p.62-69, 1966. Map, photos.

For the working collegian who provides services in the hotel and the casual visitor, the cliffs and canyons of Zion National Park provide a backdrop of quiet natural beauty to the more common, often noisy, recreational pursuits centered at the hotel. The geological formations, plants and animals of the region may be observed on conducted tours. Foot trails bring the visitor closer to the natural wonders of the area. The grandeur and peace of Zion National Park bring to many a reappraisal of values.

60872 Shomon, J. J.
You can sell a nature center.
AUDUBON
68(4):218-219, July-Aug. 1966.

The author is elated over recent conferences with their emphasis on conservation, such as the White House Conference on Natural Beauty, a number of governors' conferences, and a county conference. They focus attention on our domestic aesthetic problems. One of these, especially in highly urbanized areas, is the lack of nature education. The nature center idea seeks to fill the voids on nature education that now exist in cities and crowded suburbs.

60873 Tilden, F.
Seize the moment!
PARKS RECREAT.
1(8):625, 666, Aug. 1966.

The three fundamental aspects of interpretation in scenic and scientific areas are described: What about beauty? Don't try to tell all you know. Seize the moment!

60874 Mongeon, E. J.
50-mile swim goal helping sedentary to keep fit.
SWIM. POOL AGE
40(6):23, June 1966.

Here is a description of the American Red Cross 50-mile Swim-and-Stay-Fit Program. Inaugurated in 1961 as one answer to President Kennedy's emphasis on physical fitness, the program is especially designed for the sedentary person, the youngster, the non-competitive swimmer, and the older person. The 50-mile swim, done in segments of 440 yards at each visit to a participating facility, has a goal to improve the physical fitness of swimmers of all ages.

60875 Musial, S.
How the American male can be fit. The relation of lifetime sports and physical fitness.
PARKS RECREAT.
1(9):695, 767, Sept. 1966. Photo.

Too few American men engage in regular physical exercise, one essential ingredient of good health. The author, who is President Johnson's consultant on physical fitness, believes the best incentive for regular exercise by the American male is interest and involvement in a sport he can enjoy all his life. Every youngster should learn the rules and basic skills of several sports—badminton, bowling, golf, handball, swimming, tennis—before he reaches his teens. These are sports he can enjoy after he is out of school and they will help keep him physically fit.

60876 Sloan, M. R.; Liba, M. R.
Effects of participation in physical education on achievement in selected characteristics.
RES. QUART.
37(3):411-423, Oct. 1966. Refs., tables.

The reason for this study was to find out the effects of physical education participation on achievement in certain characteristics. The characteristics studied were knowledge, posture, recreational proficiency, and some aspects of physical fitness. College women were the subjects for the study. One group participated in the required program for one year; a second group for two years; a third group was not enrolled in physical education; and a fourth group had the option to enroll or not to enroll. The findings of this study are reported in a well-documented and comprehensive manner.

60877 Rillo, T. J.
People and the out-of-doors.
AMER. FOR.
72(3):8, 44-45, Mar. 1966.

The out-of-doors is abundant in an endless variety of opportunities for diversification and can provide the stimulation needed to counter-balance the oppressiveness of urban living, but people must realize the value and importance of open land, the need for space, and the need for legislative support to provide for present and future needs.

60878 Sessoms, H. D.
Measuring outcomes in terms of socialization and the mental health of the individual. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 42-53, 1966.

In the resocialization of the emotionally disturbed, wholesome recreation experiences are a necessity. These can be subdivided as: mastery type recreation experiences, self regard recreation experiences, tension reducing recreation roles, affiliation roles, power relationship recreation roles, identification roles, and socialization recreation roles.

60879 Goldman, D. L.
Conservation and the city.
TRENDS PARKS RECREAT.
3(3):24-26, July 1966. Photos.

The American city has changed faster than our comprehension of it. The conservation of natural values and the protection of beauty need to be related to urban problems. There has been an awakening of interest to provide smaller parks and open spaces within cities. Today, it is imperative to regard life and land as a continuity and to seek solutions from the entire range of human experience and knowledge. Education will play an important part in preservation of natural beauty in the urban scene.

Resource Planning Associates
Recreation as an industry in Appalachia.
Washington, Appalachian Regional Commission
132p. 1966. Ref., tables.

This study concerns the impact on local economies of the complex of activities that compose the "tourist recreation" industry. Recreation alone almost never can provide a base for a viable economy. It can provide significant and valuable supplementary benefits to a local economy based on manufacturing, mining, or agriculture. Such aspects as visitor expenditures, visitor characteristics, employment, income, investment, taxes, the three kinds of impact on local economy, seasonality, vacation homes, promotion, development control, and the recreation industry in general are explored.

60884 Nathan, R.R., Associates, Inc.
Resource Planning Associates.
Recreation as an industry in Appalachia. Field study summary reports.
Washington, Appalachian Regional Commission
71p. 1966. Maps.

The Field Study Summary Reports were prepared for the Appalachian Regional Commission by personnel who visited the areas. The material included in each case reflects their judgments as to the most significant findings. The places

surveyed were Capon Springs, W. Va.; Harpers Ferry, W. Va.; Cherokee, N. C.; Deep Creek Lake, Md.; Gatlinburg, Tenn.; Kentucky Dam Village, Ky.; Park City, Utah; Somerset, Penna.; and Stratford, Ontario. The fact sheet provides data which should assist the reader in understanding the nature of the area under discussion and the nature of the recreation industry and its impacts on local economies. This information makes it possible to evaluate the role of recreation in the economies of the areas studied.

60885 Nathan, R.R., Associates
Potential impact of the Delaware Water Gap National Recreation Area on its surrounding communities.
Washington, Robert R. Nathan Associates, Inc.
232 p. 1966. Illus.

Measurable and non-measurable facets of this recreation area's economic impact are analyzed along with economic conditions in the local area primarily affected. The natural and cultural conditions of the area are examined to provide a context for the analysis. Both opportunities and problems for the surrounding communities will follow the creation of a national recreation area, and plans should be formulated better to guide the inevitable actions. An action program is outlined.

How to ride wave of surfing sales.
SPORT. GOODS DEAL.
134(1):136, 138, Apr. 1966.

This article reviews the economic aspects, the successful as well as the unsuccessful, and the "pros and cons" of good business in the ventures of past surfing sales.

60887 Stewart, W. L.; Lueck, K. L.
Tourism in Utah— A study of tourism and recreation potential in selected Utah counties.
Salt Lake City, Univ. of Utah
268p. 1966. Maps, illus., tables.

Extensive data were collected, screened, and evaluated in terms of its relationship to the potential development of the counties concerned. Six key projects identified as the closest to realization were Canyonlands Resort, Hidden Valley Ranch, Lake Creek Recreation Center, Boulder King Ranches, Inc., Troll Hagen, and Indian Heritage Park. Conclusions enumerated show residents of economically distressed counties their opportunities, based upon tourism and recreation.

60888 Wallace, D.
Canadian cavalcade.
TRAVEL TRADE
74(44):150, 152, Nov. 1, 1966. Sect. 1.

The travel industry of Canada and its provinces prospered in 1966 and is expected to in-

crease its prosperity in 1967 and beyond. This success may be attributed to non-stop air flights from Canada to various countries; the use of aircraft designed for short, medium, long and overseas routes; good roads; good transportation; comfortable and convenient hotels and motels. The World Exhibition opens April 28, 1967 in Montreal.

60889
Factories full blast.
SPORT. GOODS DEAL.
135(2):57-58, Nov. 1966. Photos.

According to a survey by the Sporting Goods Dealer magazine, 80% of boating manufacturers reported increased sales in 1966. Pertinent answers from certain manufacturers to survey questions about marine sales are quoted.

60890
1965 Market analysis of the resort industry.
RESORT MANAGE.
20(2):18-19, Feb. 1966.

The first major statistical survey of the resort industry has been recently completed. General observations, industry size and characteristics, and data on geographical distribution of resorts in the U.S. by areas are provided. This is an exclusive statistical report on resort characteristics and product usage.

60891
Picnicking and camping.
SPORT. GOODS DEAL.
133(6):111-112, Mar. 1966. Illus., photo, tables.

Results of a coast-to-coast survey of the industry give information about sales of picnicking and camping equipment—including monthly buying trends by wholesalers and retailers.

15(3):16-18, May-June 1966. Illus.

The reasons why user fees have become necessary at the Colorado state parks are dis-

cussed. A list of good practices for safety and welfare of all users within recreation areas is given.

60894 Milliman, J.W.
Price policy and land value taxation for urban water supplies.
AMER. J. ECON. SOCIOL.
25(4):379-398, Oct. 1966.

"New urban supply and demand reactions will involve greatly different kinds and levels of technology, treatment and investment. Much of the urban demand for outdoor recreation is water-based in nature; the supply of water-recreation facilities can be developed in conjunction with the provision and operation of water-supply and sewage-disposal structures. Facilities for swimming, boating, fishing have complementary and competitive relationships with sewage disposal and water supply which would seem to justify both a cooperative and a multipurpose urban approach." Municipal reservoirs may open to recreational uses. Construction costs might be defrayed by taxation of adjoining land and imposition of user fees.

New fee schedule for Utah parks.
PARK MAINTEN.
19(8):15, Aug. 1966.

Utah State Park and Recreation Commission adopts user fee system for visitors to State parks, picnic, camping, and boating facilities.

RESEARCH

60900 Avedon, E. M.
The role of research in health-oriented recreation service. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 18-24, 1966.

All of the national health problems have implications for therapeutic recreation service; thus, although it is difficult to pinpoint a research focus, the research concerns are many and varied.

60901 Bishop, D. W.
Some multivariate data analysis techniques and their applications to recreation research. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 177-193, 1966. Tables.

Four multivariate data analysis techniques and their applications in recreation research are discussed. Illustrated by tables.

60902 Buskirk, E. R.
Physical outcomes of recreational programs with particular emphasis on middle-aged males. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 62-79, 1966. Illus., tables.

There needs to be an appraisal of activity levels and energy expenditures in different recreation activities. While it would be impractical to screen for fitness all participants for any activity, more research should be done on the energy demands and other health-related aspects of most recreation activities.

60903 Carter, G. W.
The challenge of research in today's society. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 1-10, 1966.

Recreation research resources should be deployed in two major areas—the problems within the programs that deliver recreation services,

and the policy issues which determine the role of recreation as a contributing force in the improvement of the quality of our national life. More research-based knowledge for practice of the recreation profession and in policy-making is recommended.

60904 Castle, E.N.; Brown, W.G.
The economic value of a recreational resource: a case study of the Oregon salmon-steelhead sport fishery. In Western Agricultural Economics Research Council. Committee on the Economics of Water Resources Development. Water resources and economic development of the West. Pullman, Wash., Wash. State Univ. p. 1-12, 1966. (Report no. 13).

A critical examination is made of studies to estimate empirical demand functions for outdoor recreational resources with particular reference to a study in Oregon on the demand function for sport fishery. A decision-making model is based on the assumption that fishermen would tend to move toward an equilibrium condition characterized by equating the marginal cost of obtaining an additional unit of recreational experience with the marginal utility or satisfaction derived from the experience. The approach used is to utilize transfer costs in an attempt to estimate the demand function for the sport fishery, namely, salmon-steelhead. The empirical estimation of the demand curve is based on angler expenditure taken from mail questionnaires. A Clawson-type demand curve is applied to the data.

The question of the interpretation and significance of empirical demand curves for recreation is discussed. Consideration is given to the problem of consumer surplus vs. marginalism as a measure of total values. The authors believe that the key to interpretation lies in the decision-making environment. Estimated demand function as a body of empirical knowledge may be used in a variety of ways, i. e., a fishery resource which may be used for commercial and/or sport purposes. The quality of recreation experiences is one of the most difficult of empirical relationships pertaining to outdoor recreation.

60905 Clawson, M.
Measuring outcomes in terms of economic implications for society. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 54-61, 1966.

Three major fields of economic research on outdoor recreation are covered—recreation demand analysis; valuation of natural resources when used for outdoor recreation; and the economic impact of recreation.

60906 Goldstein, L.
Research support from Public Health Service. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 230-236, 1966.

A flow chart provides a diagrammatic picture of how the research grants system operates. In order to describe the bases for application review, the author discusses the research problem itself, the research design, the principal investigator, the investigation and its facilities, and the budget. If one seeks research funds, one should have a definite plan and seek support for that particular project or program.

60907 Hopkins, W. S.
Research and user preferences. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Reac p. 81-85, 1966.

One salient point made was that when research has penetrated the motivations and reasons for recreational interests, problems connected with user preferences in activities and facilities will become less complex.

60908 Kraus, R.
Utilization of research in program planning and leadership development. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 135-143, 1966.

With direct reference to program planning and leadership development, the author delineates the role of research. We need to be as critical in the identification of significant research needs as we are ingenious in the development of funded research proposals. Research reports should be more understandable with emphasis on findings and their implications as well as on the methodology.

60909 Lucas, R. C.
Research needs generated by new directions in forest policy. In Society of American Foresters. Proceedings, 1965. Detroit p. 73-75, 1966. Ref.

A discussion of recreation research needs under the four headings of demand; supply; distribution, or incidence of costs and benefits; and

means of adjusting for unequal distribution of costs and benefits. One should see recreation areas as a part of a larger, interrelated geographical system where one part affects another, and should study means for increasing compatibility of different uses.

60910 National Conference on Recreation Research, 1965, University Park, Pa. Recreation research: collected papers. Washington, Amer. Ass. for Health, Phys. Educ., Recreation 243p. 1966. Ref., illus., tables.

The Proceedings of the National Conference on Recreation Research held at Pennsylvania State University discusses the role of research, the effects of recreation, user preference, function of research in administration, the research process, cooperative research, funding, and recommendations for facilitation of research in recreation.

60911 National Conference on Recreation Research, 1965, University Park, Pa. Special Conference Committee. Recommendations for facilitation of research in recreation. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 237-238, 1966.

The recommendations are concerned with four major groupings: college and university recreation faculty, practitioners in the field of recreation service, officers of professional recreation organizations, and officials in appropriate government agencies.

60912 National Recreation and Park Association. Research in recreation 1965. New York 218p. 1966.

Part 2 of an annotated bibliography cites surveys, plans, studies, reports, demonstration projects, and master's degree problems in the field of recreation. The bibliography covers a period of ten years. It excludes publications without a particular research orientation. Arrangement is alphabetical by author without subject or form divisions.

60913 Ogden, D. M., Jr. The role of research in the Federal and State recreation services. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 25-29, 1966.

Systematic inquiry into outdoor recreation as a form of human behavior is recommended. This involves, for example, examining why people

engage in it, what satisfactions they derive from it, what forms of recreation opportunity they wish, how adequately they are served, how much effort they are willing to expend, how much money, and what impact does their behavior have on others and on society.

60914 Ohio. State University, Columbus. Water Resources Center. Water quality and recreation in Ohio. Columbus 308p. 1966. /Symposium on Water Resources Research, 2nd, 1966. Proceedings/

The symposium is presented in four sessions: (1) water quality and recreation. In the first session are discussed: research problems in water quality and recreation; mass leisure, a new social problem; recreation and the economics of regional water; water and water quality in relation to recreation; and quality of the recreation experience. (2) Lake Erie recreation. In the second session are discussed: the physical basis of Lake Erie water quality; the design of a model for guiding investment; and water, the pervasive source. (3) acid mine drainage and recreation potential in southeastern Ohio. In the third session are discussed: acid mine drainage control — the key to recreational development in southeastern Ohio; engineering aspects of acid mine drainage; the role of micro-organisms in information and abatement of acid mine drainage; an economic framework for evaluation of acid mine drainage; economics of water resource planning. (4) tourism and Recreation. In the fourth session are discussed: tourism and economic development.

60915 Reid, L. M. A progressive look at park and recreation research. In American Institute of Park Executives. Speech presented at 67th annual conference, 1965. Milwaukee 9p. 1965.

Lauds the creation of the National Recreation and Park Association as good organizational machinery and discusses ecological, motivational, developmental, and managerial research. Points out the necessity of research as an adjunct to decision-making.

60916 Reid, L. M. Utilizing user preferences in predicting outdoor recreation demand. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation p. 86-93. 1966.

Attendance-counting studies, activity participation studies, user preference and satisfaction studies, and behavioral studies are aids to predicting demand. Good recreation areas require adequate knowledge of resource capabilities, responsiveness to public wants and needs, and adherence to managerial goals.

60917 Sapora, A. V.
Ascertaining interests for recreation program planning. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 94-105, 1966.

Dr. Sapora outlines some approaches to the problem of assessing interests for recreation program planning. In addition to recommending certain research techniques, he maintains that recreators must learn to borrow from the research of various related disciplines and step by step develop their own research.

60918 Sapora, A. V.
Interdisciplinary research. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 195-199, 1966.

The need for interdisciplinary team research is marked by a readiness for this type of approach, a condition that evolves after analysis of the situation.

60919 Schneider, E.; Beezer, R.
Research support by the United States Office of Education. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 220-229, 1966.

Aspects of Federal laws providing sources of funds are discussed. Descriptions of the Bureau of Research of the Office of Education, patterns of support, application procedures, and the project and program proposals are provided.

60920 Smithee, K. J.
Cooperative research—local departments and federal government. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 200-203, 1966.

The current and long-term benefits of a quality cooperative recreation research effort between the local departments and the Federal Government are many. The areas of beneficial cooperative recreation research effort are enumerated and explained.

60921 Staley, E. J.
Function of research in recreation administration. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation Research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 107-114, 1966.

The recreation administrator should be familiar with research procedures. Action research—research that results in recommendations for action or change—is needed in planning and administering recreation services. Ten areas of recreation administration where research could aid and improve recreation administration are listed.

60922 Stoltenberg, C. H.
The research process. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 153-159, 1966.

Essentials of the research process are (1) a framework to help the researchers identify problems worthy of study; (2) problem analysis; and (3) some observations about the study objectives that call for data useful to recreation program planners or supervisors or to other recreation researchers.

60923 Stout, N. J.
The nature of research projects supported by outdoor recreation-oriented agencies—public and private. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 213-219, 1966.

Outdoor recreation research is defined, and outdoor recreation-oriented agencies are characterized. Federal and State government programs are discussed as they relate to research projects. Specific examples of privately supported research are cited and some sources of private financial support are listed. More should be known about users and their demands, how recreation affects people, and ways of making people aware of problems associated with outdoor recreation resource use.

60924 Thacker, E. H.
Utilization of research related to management procedures. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 144-151, 1966.

Applied research is the kind most used by management, but the need for basic research to

justify recreation as a field of service is recognized. We turn to applied research to solve the immediate problems of administration but management also asks, "Why?" and we must look to basic research for the answer.

60925 Tomazinis, A. R.
Utilization of research in urban planning and development of physical resources. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p.115-134. 1966.

The present use of research in urban comprehensive planning is rather limited, but its use is increasing. In the United Kingdom at least 26 major areas of concern for planning research are considered. In the United States, even more areas—especially for planning physical resources in metropolitan regions, are felt to be significant.

60926 U.S. Bureau of Outdoor Recreation; Smithsonian Institution. Science Information Exchange. Outdoor recreation research. A reference catalog.
Washington
86p. 1966.

Current and recently completed outdoor recreation research projects are listed and described briefly. These descriptions are grouped under headings of Resources, User Studies, Economics, and Research Methods. A performing organization index, a principal investigator index, and a subject index are included. This first volume may serve as a stimulus for potential contributors to later editions of the catalog.

60927 U.S. Federal Council for Science and Technology. Committee on Water Resources Research.
A ten-year program of Federal water resources research.
Washington, Govt. Print. Off.
88p. 1966. Illus.

The Committee on Water Resources Research of the Federal Council for Science and Technology outlines a research program for 1967 to 1976 and recommends a doubling of research effort by 1971. It suggests expenditures and priority time schedules consistent with the priorities of the various research areas. Specific recommendations for each of the 98 categories of research and supporting activities are detailed. Recommendations on the major problem areas would increase research in the following categories: (1) methods and criteria for water resources planning; water law; institutional arrangements for facilitating the results of more effective

planning; (2) cost allocations, cost sharing, pricing, and payment; (3) methods of waste treatment; (4) water conservation in industry and municipal use; (5) water conservation in agriculture; (6) possible ecologic impacts of water development; (7) effect of non-water activities on water, especially urbanization; (8) new ideas on water; (9) climatic changes and the significance of fluctuations from flood to draught; (10) extent and character of various water-oriented problems as prelude to research; (11) some specific problem areas; (12) consolidation of federal water research laboratories and communication and coordination between research workers; (13) Federal program of experimental watersheds; and (14) efficiency and cost reduction of large engineering projects.

60928 Van der Smissen, B.
Effects of recreation on individuals and society. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p.32-41, 1966.

The importance of "effect research" as fundamental to understanding the impact of recreation upon individuals and society is stressed. Recreation research must focus upon the development of methods and instruments if it is to move ahead. Other pertinent questions and issues are raised.

60929 Ver Lee, J. M.
Cooperative research—local departments and universities. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p.204-205, 1966.

The values derived from such a partnership are illustrated by examples of cooperative research efforts between city recreation departments and universities.

60930 Ver Lee, J. M.
The role of research in the recreation services in the urban complex. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p.11-17, 1966.

Many opportunities for research exist in urban recreation services. Needing study are problems of program evaluation, patron response, goals and objectives, fiscal policy and process, evaluation of supplies and equipment, communication, personnel, safety, community organization, and the measurement of identifiable values from recreation for the individual, the neighborhood, and the community.

60931 Anderson, D. R.
Computers and waterfowl.
COLO. OUTD.
15(6):11-12, Nov.-Dec. 1966. Illus.

Electronic computers and waterfowl are rarely associated—except in the case of a group of ducks on a portion of the Monte Vista National Wildlife Refuge in south central Colorado. Here a member of the research team reports their methods in carrying out a study of waterfowl and their environment in the San Luis Valley.

60932 Fitzgerald, G. P.
Use of potassium permanganate for control of problem algae.
AMER. WATER WORKS ASS. J.
58(5):609-614, May 1966. Ref.

Data is presented on the comparative toxicity of potassium permanganate and copper sulphate to eight species of problem algae. The degree of difficulty in defining problem algae depends upon the ultimate use of the water, whether a potable water supply, industrial supply, place for fish to live, recreational area, source of water for irrigation, etc. In each instance there are possible problems associated with the uncontrolled growth of algae that are characteristic of the use of the water. Experimental treatment with 1 to 5 ppm of potassium permanganate was sufficient to kill seven of the eight algae species.

60934 Hutt, A.
Fisheries Research Laboratory.
FLA. WILDL.
20(6):20-21, Nov. 1966.

Florida's first Fisheries Research Laboratory is scheduled to open in late November. Its facilities and personnel will take the guesswork out of the types and amounts of pollutants detrimental to the well-being of fish and other aquatic life. Public health officials long ago established water-quality standards for human beings. Yet some water, which people can drink, ski on, and swim in with no threat to their health, cannot support an adequate game fish population. The new Laboratory will determine the natural water-quality requirements for fresh water game fish.

Ecological research in Everglades National Park.
NAT. PARKS MAG.
40(229):14-17, Oct. 1966. Map, illus., photos.

In Everglades National Park myriad birds, fish, reptiles, mammals and plants live,

give birth and die in a delicately balanced hydrologic and biologic system. In recent years water diversions by man above the northern boundary of the park have altered natural surface flow and endangered the lives of animals and plants. In 1964, the Geological Survey, in cooperation with the National Park Service, started an ecological research program to furnish additional facts on water needs and to assess the impact of the changes in water supplies on Everglades life. Three sites, representing a variety of aquatic environments are being intensively studied. The results of the ecological studies will be a prime factor in determining the timing and amount of fresh water released into the park along the north boundary when based on the needs of the biota.

60936 Lapham, V. T.
New methods. Aquatic weed control in Louisiana.
LA. CONSERV.
18(11/12):2, 19-23, Nov.-Dec. 1966.

The efficiency and economy of aquatic weed control to prevent a possible fish kill are discussed. The techniques of drawdown, biologic control, and the use of chemicals are presented. To control aquatic weeds effectively, it is essential to identify the plants that are causing the trouble and to determine where and how they are submersed.

A perspective of the Smithsonian Program in Ecology.
NAT. PARKS MAG.
40(229):10-13, Oct. 1966. Photos.

New programs of research at the Smithsonian Institution include among others a survey of leading university programs in ecology to determine how and where to contribute to the growth of knowledge vital to establishing harmonious adjustments between man and his environment. The International Biological Program focuses strongly on environmental biology "with a view toward broadening the productivity base for human population." Work is underway on a World Network of Nature Reserves for scientific research. Smithsonian operates on the theory that the survival of human societies at high standards of living in quality environments depends on what is accomplished in environmental biology within the next decade.

60939 Swift, E.
Control of nature. A possibility for the future.
FLA. WILDL.
20(7):5, 38, Dec. 1966.

An editorial that discusses problems of water quality; problems of population. Editor claims that the aim of science is to bend the forces of nature to the will of man—bend, not block or break. Men have accomplished much in environmental modification—bending of nature—but not any significant control. Even the modifications have often misfired when changes made for one purpose have induced unwanted or unforeseen consequences.

60940 Swift, E.
Wildlife ecology.
ILL. WILDL.
2(21):7, Nov. 23, 1966.

The real trouble with conservation today, the author argues, is that ecology has not found its proper place in the scheme of things. Too many people and public agencies are drafting their own versions of conservation commandments. They do not always realize that natural resources can only be manipulated within certain limits if the end results are to be beneficial. Beyond these limits, the effects can be destructive. With quotations from the President's Science Advisory Committee to support his views, he pleads for a return to ecological concepts.

60941
Effect of pesticides on fish becomes a State problem.
BADG. SPORTS.
22(11):9, June-July 1966.

According to a Conservation Department survey, indiscriminate use of pesticides has caused depletion of Wisconsin's fish and wildlife populations. The pesticide DDT has been found to have a long chemically active life. It has the ability to be magnified biologically as it passes through the food chain of plants and animals. As it becomes more concentrated in higher forms of life, it likewise becomes more powerful. On Conservation Department recreation areas, another kind of pesticide will be used to control insects and used sparingly.

60942
How to control mosquitoes.
PARK MAINTEN.
19(5):24-26, May 1966.

Modern control measures for mosquitoes by ground and air equipment and some biological testing of new insecticides are treated.

Tougher water clarity standards are urged.
SWIM. POOL AGE
40(6):41-43, June 1966.

The author, president of the Granger Filter Company, deplors a recent trend in the filter industry. Some firms are designing filtration systems to meet the APHA six-inch black disk standard—the minimum allowable water clarity. Filtration systems should not be based on a water quality standard that is merely safe. Higher goals are urged.

60944 California. University. Water Resources Center. San Joaquin Study Group.
Impact of water on land. Proceedings of the Study Group Conference.
Berkeley, Water Resources Center
140p. 1966. Maps, photos. (California. University. Water Resources Center. Report No. 9).

"The report describes activities of the San Joaquin Study Group from its inception in November 1965 up to June 1966. Included are statements and discussions of the scope, organization, objectives, and funding of a proposed interdisciplinary University of California research project concerned with the development of the West Side of the San Joaquin Valley." In 1970 the California Aqueduct will begin delivering millions of acre-feet of water annually to sparsely populated and arid areas. With the arrival of water to the West Side there will be a transformation of the region. The aqueduct could provide reservoirs or bays along its channels for swimming, boating and fishing. Water would be available for large-scale plantings for recreation use along roadways. This report is intended to serve as background for research to follow.

Pool disinfectant test procedures outlined. In
SWIMMING POOL DATA AND REFERENCE
ANNUAL
33:32, 37, 160, 179-182, 1966. Ref.

The U.S. Department of Agriculture adopts first official criteria for pool disinfectant test procedures. A biological test, using *Escherichia coli* and *Streptococcus faecalis* as test organisms, has been designed to determine the germicidal activity of water containing 0.4-1.0 ppm of available chlorine at pH 7.0-7.5. Results presented indicate the usefulness of the method in evaluating commercial disinfectant preparations recommended for use in pool water disinfection. The procedure can be readily adapted to study the effects of chlorine stabilizers, the influence of various algacides applied as adjuncts to water disinfectants on germicidal activity, and determinations as to the acceptability of residual disinfecting activity of swimming pool waters during times when the pool is in use.

60958 Poston, H. W.
Introduction to the Comprehensive Water Quality Program for the Illinois River Basin.
AMER. WATER WORKS ASS. J.
58(4):393, Apr. 1966.

A definition of pollution is enlarged to include anything that changes the physical, chemical, biological or bacterial quality of water in such a manner as to impair any or all of its uses. A comprehensive plan to remove pollution from the water of the Great Lakes-Illinois River Basin Projects should include: 1) present conditions—what the state of the water is now, 2) goals—what quality would be desirable to achieve or maintain, 3) measures required—how to achieve desired goals, 4) cost—how much money would be needed, and 5) time schedules—how much time would be needed for completion of the project.

60959 Poston, H. W.
Conclusion to the Comprehensive Water Quality Program for the Illinois River Basin.
AMER. WATER WORKS ASS. J.
58(4):402, Apr. 1966.

The Sagamon River reservoir and Lake Decatur provide the only source of water for storage in the Illinois River Basin. Now under construction by the Corps of Engineers, the project is designed to regulate river flow and improve water quality. Utility men may help in improving the quality of water in the Illinois Basin by: 1) support of state agencies and civic groups in making the facts on water use and pollution known; 2) support of municipal sewerage departments in getting extensions and expansions; 3) quality problems such as bad-tasting water should be made known. Public opinion is a potent force when people are informed and aroused.

Methods for determination of demand for outdoor recreation.
LAND ECON.
42(3):327-338, Aug. 1966. Ref.

The results of a survey of methods for determining demand for outdoor recreation are considered. Emphasis is placed on the methods which public agencies, economists, and planners can use. The limitations of the ORRRC studies for some categories of need are pointed out and other approaches—such as transportation planning, demand schedules, leisure time measurements, philosophical considerations—are presented. Capacity is considered a key link between demand and supply. Ecological, aesthetic, and economic factors, along with desired participation, provide capacity criteria.

60972 Devine, E. J.
The treatment of incommensurables in cost-benefit analysis.
LAND ECON.
42(3):383-387, Aug. 1966. Tables.

The purpose of the paper is to clarify the applicability and the limitations of cost-benefit analysis, when some of the benefits or costs are not expressible in a common unit of measurement. For illustration, the author presents the problem of a government agency which has a fixed budget and is responsible for making investment decisions with respect to water reclamation and recreation. The benefits from recreation are incommensurable, i. e., they cannot be expressed in dollars. However, these benefits are not intangible, i. e., incapable of any quantitative measurement. They can be measured in user-hours. The possible combinations of budgetary constraints and commensurability of benefits and costs are presented. Nine are discussed.

60973 Ferriss, A. L.
Types of recreation surveys. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research. Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 160-176, 1966.

Recreation studies employ a variety of sampling procedures: area probability samples, quote or purposive samples, sampling from lists, sampling on-site visitors, observing recreation behavior, sampling in tourist surveys, and a combination of sampling methods:

60974 Hammond, R. J.
Convention and limitation in benefit-cost analysis.
NATUR. RESOUR. J.
6(2):195-222, Apr. 1966. Ref.

This essay discusses benefit-cost analysis as an administrative device; contradictory doctrines

of benefit maximization; the debilitating assumption of perfect foresight; the indispensability of policy presuppositions; and the inherent limitations of benefit-cost procedures. He wishes to encourage skeptical tendencies in decision-makers faced with economico-analytical findings and defines applied economics as a matter of informed common sense.

Estimating recreation use on a complex of developed sites.
Asheville, N. C., Southeastern Forest Experiment Station.
8p. 1966. Ref., illus., photos, tables. (U.S. Forest Service research note SE-64).

This paper presents the results of a test using traffic count records at key "indicator" locations to estimate use of several sites. This method reduces over-all sampling costs. Most estimates were within acceptable limits of accuracy. Sufficient details of methodology and analysis are given to enable readers to set up, calibrate and evaluate the method in their own areas.

60976 Johnson, H. A.
Research needs in outdoor recreation.
A Paper Presented in Raleigh, N. C. at
The Annual Southeastern Park and
Recreation Training Institute.
n. p., n. p. 1966.

The nature of outdoor recreation is considered by Hugh A. Johnson, U. S. D. A. Economic Research Service. Recreation is not the outdoors but our reaction to the outdoors. We need to ask the whys of outdoor recreation. Demand for recreation opportunities in the out-of-doors has increased. Insufficient supply is said to be attributable to six situations: 1) inability to accurately identify recreation needs; 2) inability to forecast recreation trends; 3) inability to secure adequate financing—public and private; 4) lack of knowledge of the significance of recreation; 5) inability to articulate the need for recreation; 6) lack of administrative, policy making, managerial, and leadership competencies in recreation. To measure the "real" demand as contrasted to the expressed demand is one of the problems. We need to develop better methods to determine how recreation users measure quality, how they adapt their recreation demands to available resources, the conflicts in recreation uses, the economics of choice, and many other aspects not usually brought out in user surveys or enterprise analysis.

60977 Kalter, R. J.
A model to estimate the economic effects of water-based recreation projects on local political subdivisions.
Madison, University of Wisconsin
207p. 1966. Ref., tables.

The objectives of this study were to provide a method by which the economic effects (sales,

income and employment) of recreation on the economies of local political subdivisions can be determined and to empirically test and show the usefulness of such a model. On the theoretical level, the method that was modified and used is a modification of the input-output model known as from-to analysis. Another important result of the study was to test the adequacy, cost and feasibility of new sources of local data. Major data sources included individual firm sales and income tax records, employment compensation records, a mail and telephone survey, and several subsidiary studies done by State agencies. The model was empirically tested at the county level. Sales, employment and income multipliers were calculated and used to show how the model, in conjunction with subsidiary studies, can be used to analyze public resource investment decisions. Findings showed that although almost 10% of the county's income was derived directly from recreational exports, the direct-indirect income multiplier was only 1.09 for recreation final demand. When the induced effect was added, the income multiplier rose to 1.52. Multiplier values for other factors were of similar magnitude. These values indicate the small secondary effect of money spent on final demand items due to the relatively weak backward linkages of the local economy.

60978 Knetsch, J. L.
Problems of appraised recreation demand. In
Western Agricultural Economics Research Council. Committee on the Economics of Water Resources Development. Water resources and development of the West.
Pullman, Wash., Wash. State Univ.
p. 42-52, 1966. (Report no. 13).

Various arguments on the measurement of economic value of recreational experience are discussed. Economic values are measured basically by what people are willing to give up. The relevant economic measure of recreation values is the willingness to pay on the part of consumers for outdoor recreation services. This set of values is the same as the economic values which are established for other commodities. Value characteristics of the recreation experience are not easily defined. Demand models for individual areas and models for aggregate demand both useful tools for measuring recreational needs, are described in their applications.

60979 Larner, C.
Tell it to the machines!
TRAVEL TRADE
74(44):60, 64, Nov. 1, 1966, Sect. 1.

Automation has been successfully applied to the economy tourist market. It is efficient, speedy, and economical. Its use is expected to become more widespread in the near future.

60981 Seckler, D. W.
On the uses and abuses of economic science in evaluating public outdoor recreation.
LAND ECON.
42(4):485-494, Nov. 1966. Ref., illus.

Some of the theoretical techniques which are used in connection with statistical demand curves to evaluate recreation benefits are reviewed. The determination of these curves is a matter of debate. The author believes that the rate of purchase of any commodity at any time by an individual is ultimately determined by two factors: (1) the marginal utility of that commodity to that individual; and (2) the marginal utility of the income to be sacrificed in exchange for that commodity. Unless one knows the value of at least one of these determinants, nothing can be inferred about utility from observation of transactions.

60982 Shafer, E. L., Jr.
Effects of sampling location, period, and method on camper survey results. Doctoral dissertation
Syracuse, State University College of Forestry
245p. 1966. Illus., tables.

Present-day inadequacies of outdoor recreation research experiments stem from a limited knowledge of population parameters, measurement procedures, and control or stratification of significant external factors. This study determined, first, through the use of personal interviews, the effect of sampling locations and sampling periods on camper recreation-survey results; and, second, the accuracy of self-enumerative survey techniques in relation to personal interview results. Abundant principles, hypotheses, and questions concerning recreation mensuration resulted. Future research designs should stratify sampling frames on the basis of acres of water available, campsite proximity to lakeshore environment, landscape heterogeneity, tourist attraction density, campground accessibility, and summer months. Delayed mail surveys with follow-up for non-respondents are recommended when using the types of questions employed in this study.

60983 Stevens, M. E.
Soil surveys as applied to recreation site planning.
J. FOREST.
64(5):314-316, May 1966. Ref., tables.

This report explains the use of soil surveys in recreation site planning, and lists interpre-

tations that can be made from these surveys. A series of diagrams are used to show a campground layout before and after soil survey data were available. Answers needed from research to assist the manager to plan, design, develop, and maintain recreation areas are suggested.

Proposed methodology for an inventory and classification of land for recreational use.
FOR. CHRON.
42(2):153-159, June 1966.

Proposes a four-stage approach to inventory and classification: (1) preliminary analysis of all lands, (2) preliminary analysis of best areas, (3) detailed site analysis, (4) generalized use classes. Outlines a methodology for each stage.

Demonstration projects and action research. In National Conference on Recreation Research, 1965, University Park, Pa. Recreation research.
Washington, Amer. Ass. for Health, Phys. Educ., Recreation
p. 206-211, 1966.

The need for recording, analyzing and documenting recreation programs is emphasized. The way objectives and results or pilot projects can help in this evaluation process is discussed.

Quality in outdoor recreation.
TRENDS PARKS RECREAT.
3(3):9-12, July 1966. Ref., illus., photos.

Quality in the recreational experience is based on subjective criteria and depends on the satisfaction of needs mostly learned and extremely varied. By using a few categories of needs we may predict what people are likely to want in a given recreation area. In planning the recreation complex needs, recreation opportunities of the surrounding region should be studied. Zoning, managing and interpreting attractions will provide varied benefits in the recreational experience.

Recreational resource values: some empirical estimates. Western Agricultural Economics Research Council. Committee on the Economics of Water Resources Development. Water resources and development of the West. Pullman, Wash. State Univ.
p. 13-31, 1966. (Report no. 13).

An analytical model is tested on pleasure boating and is used for estimating. One recreational value of a water resource site plus on the site expenditures are used as value indicators. These costs are defined as the marginal costs of boating and are the costs determinants of how many trips are taken per season. An individual demand schedule exists for each alternative boating site available. The schedule defines the number of trips to a site at alternative "prices". The price variable is the travel and on-site expenditures while the quantity variable is the number of trips. A boater will take that number of trips to each site sufficient to equate the travel and on-site costs (which are the marginal costs) with the value of the utility he receives as expressed by his individual demand schedule for each representative site. Empirical observations of individual activity are assumed to represent these points of equilibria on the individual's demand schedules. The procedure for deriving the demand estimate is the concentric circle approach of Clawson and Hotelling. Average travel and on-site expenditures plus the related number of trips per boat are derived for distance zones related to a site. These represent the aggregation of individuals within each zone. The valuation of the boating resource in terms of surplus values for the site is derived. Two boating sites are analyzed. Empirical estimates and demand elasticity are theorized. The impact level of demand and the estimate of marginal value are discussed. The surplus model offers concepts useful in recreational resource valuation, provides an estimate of resource value in addition to use cost, and permits a statement of net value which approximates the net contribution

of the resource. The concept provides a means of overcoming a logical inconsistency encountered in deriving marginal resource values where use cost or expenditure pricing is involved.

Parameters of recreational travel in Ontario: A progress report.
OTTAWA, ONT. DEPARTMENT OF HIGHWAYS
37p. 1966. (Dept. of Highways Report No. RB1-11.)

Because of the problems created by recreational travel on the rural highways in Ontario, new analytic tools have had to be developed. Parameters of recreational travel in Ontario have been tentatively established. Of these the exponent of distance in the gravity model is most important.

Capital currents. News of parks from State and Federal agencies. North Dakota.
PARK MAINTEN.
19(6):6, June 1966.

A 25% return of survey questionnaires has been received following the mailing to 6,400 North Dakotans. The survey asked about outdoor recreation requests and will be used as a guide for future State action.

60991
Land-use feedback via satellite.
LANDSC. ARCHITECT.
57(1):31, Oct. 1966.

Describes the potential use of sensitive sensors in orbiting satellites to provide information on traffic patterns, human densities on every beach, boat densities on lakes and rivers, and the number of picnickers in every park in the land.
