DESCRIPTORS- *DISTRIBUTIVE EDUCATION, *CURRICULUM EVALUATION, *STUDENT OPINION, *EMPLOYER ATTITUDES, QUESTIONNAIRES, INTERVIEWS, JOB SKILLS, CURRICULUM, UTAH,

AN EVALUATION OF THE COURSE OFFERINGS OR CONTENT OF THE COOPERATIVE DISTRIBUTIVE EDUCATION PROGRAM WAS OBTAINED BY QUESTIONNAIRE FROM 228 UTAH BUSINESSMEN WHO WERE EMPLOYING DISTRIBUTIVE EDUCATION STUDENTS AND FROM 503 DISTRIBUTIVE EDUCATION STUDENTS ENROLLED AT THE TIME OF THE STUDY. BOTH QUESTIONNAIRES WERE ADMINISTERED BY THE LOCAL TEACHER-COORDINATOR. COURSE CONTENT EVALUATED INCLUDED -- (1) ORIENTATION AND JOB PLACEMENT, (2) MERCHANDISE MATHEMATICS, (3) RETAIL SALESMANSHIP, (4) OPERATION AND STRUCTURE OF DISTRIBUTION, (5) MERCHANDISE INFORMATION, (6) DISPLAY, (7) ADVERTISING, AND (8) PERSONALITY IMPROVEMENT. THE UNIT ON PERSONALITY IMPROVEMENT WAS RANKED HIGHEST IN IMPORTANCE BY BOTH BUSINESS AND STUDENT RESPONDENTS. OTHER UNITS RANKED HIGH BY BUSINESSMEN WERE MERCHANDISE MATHEMATICS, RETAIL SALESMANSHIP, MERCHANDISE INFORMATION, AND ORIENTATION AND JOB PLACEMENT. JOB PLACEMENT WAS RANKED HIGH BY THE STUDENTS, BUT THEY RANKED MERCHANDISE MATHEMATICS SOMEWHAT LOWER THAN DID THE BUSINESSMEN. OPERATIONAL STRUCTURE OF DISTPIBUTION WAS RANKED LOWEST BY BOTH BUSINESSMEN AND STUDENTS. (MM)

Summary

The purpose of this study was to obtain from Utah businessmen, who were employing distributive education students and from students currently enrolled in a cooperative distributive education class, their evaluation of the course offerings or content.

The questionnaire was returned by 228 businessmen, the majority of which were the managers of the firms. The majority of the firms employed one or two of the distributive education students. Over half of the firms employed fewer than 10 employees. Approximately one-third of the firms employed between 10 to 50 employees.

The questionnaire was also received from 503 students that were enrolled in a cooperative distributive education class.

The course content that ranked highest in importance by both the respondents from business and the student was the unit on personality improvement. Other units in the course that ranked high by businessmen were: merchandise mathematics, retail salesmanship, merchandise information and orientation and job placement.

Job placement ranked high by the students but merchandise mathematics ranked somewhat lower in importance by the students than the businessmen ranked this item.

The one unit in the distributive education course that was ranked lowest by both businessmen and students was the one dealing with the operational structure of distribution.

Conclusions

Both businessmen, who employed cooperative distributive education students, and students enrolled in a cooperative distributive education class, consider the course content being covered in the class as important

in preparing for a career in distributive education.

Recommendations

It is recommended that in allocating instructional time to the various units in the cooperative distributive education course that more time and emphasis be placed on the unit dealing with personality improvement and less time and emphasis be placed on the unit dealing with the operational structure of distribution.

THE DISTRIBUTIVE EDUCATION CURRICULUM AS EVALUATED BY BUSINESSMEN AND DISTRIBUTIVE EDUCATION STUDENTS OF UTAH

eight Utah high schools had programs and in 1967 this number had grown to 37. The rapid growth of distributive education in Utah may be attributed to many factors ranging from increased financial support by the federal and state governments to a change of attitudes on the part of parents, educators, and high school students towards vocational education. In order to meet the needs of an expanding distributive education program several instructional guides were developed by the state specialist in cooperation with selected teacher coordinators of distributive education.

The purpose of this study was to obtain from those Utah businessmen who had participated in cooperative distributive education during the 1966-67 school year their evaluation of the course offerings available to the distributive education students they had employed. Also to obtain from the distributive education student enrolled in the cooperative distributive education program during the 1966-67 school year an evaluation of the course content that they were just completing.

PROCEDURE

A questionnaire and interview guide for the business establishments and a questionnaire for the distributive education students was developed, tested and revised (see appendix). The instruments were then distributed to the distributive education teacher-coordinators. The student questionnaire was administered to the distributive education students by the distributive education teacher during one of the regular

class periods. The business interview guide and questionnaire was taken to the business establishments by the distributive education teacher-coordinators.

ANALYSIS OF DATA

The analysis of the data includes a brief explanation of the various sections of the questionnaire. Areas that are discussed include the position held by the responding interviewee, the number of firms, by type, responding to the questionnaire, and the number of distributive education students employed by each responding firm. Also included in the analysis of the data is the size of firms responding to the questionnaire based on the number of employees, the number of firms responding that have an organized training program for their employees and the number of firms with training programs that include distributive education students in their training program.

A concluding section to the data interpretation is a comparison of the responses of the 228 businesses and 503 students regarding the value of certain aspects of instruction in distributive education. The areas of instruction in the survey instrument included orientation and job placement, merchandise information, the operational structure of distribution and personality improvement. The response of the students to these instructional areas is broken down into specific sub-sections and appears in the appendix of the report.

Table 1 represents the position held in the business by the respondents to the questionnaire. Of the 228 replies, 75.4 percent were completed by the manager and 11 percent were filled out and returned by the personnel director or department head of the business.

Table 2 indicates the number of firms, by type, responding to the survey. Retail and wholesale firms accounted for 82.2 percent of the respondents while service, manufacturing, financial institutions and other types of business totaled 17.8 percent of the replies.

Table 1. Position held by responding interviewee

Position in Firm	Number	Percent of Total
Manager	172	75.4
Personnel Director	17	7.5
Department Head	8	3.5
Other (indicate title)	31	13.6
Total	228	100.0

Table 2. Number of firms responding, by type

Туре	Number
Retail	188
Wholesale	20
Service	34
Manufacturing	2
Financial institutions	1
Other	8
Total	253*

^{*}Number greater than 228 because several firms listed themselves as both wholesale and retail.

The number of distributive education students employed by each firm is listed in Table 3. One or two students were employed in 74.6 percent of the businesses responding to the survey, 14.9 percent employed three to six distributive education students, 1.8 percent employed seven or more students and 20 firms or 8.7 percent of the total indicated they were not employing distributive education students at the time the survey was conducted.

Table 3. Number of distributive education students employed by each firm

Number of students employed	Number of firms	Percent of total
One to two	170	74.6
Three to four	28	12.3
Five to six	6	2.6
Seven or more	4	1.8
None	20	8.7
Total	228	100.0

Table 4 illustrates the size of firms responding to the survey based on number of employees. Over half of the firms (52.6 percent) had one to ten regular employees, 33.8 percent of the responding firms employed 11 to 50 persons, 5.7 percent had 50 to 100 employees and 7.7 percent of the firms employed an excess of 100 persons.

Table 4. Size of firms responding based on number of employees

Number of employees	Number	Percent of total
One to ten	120	52.6
Eleven to fifty	77	33.8
Fifty-one to one hundred	13	5.7
One hundred to two hundred	13	5.7
More than two hundred	5	2.2
Total	228	100.0

From the 228 respondents to the survey, Table 5 indicates that 107 firms or 46.9 percent have an organized training program for their employees. One-half of the firms stated they did not have any organized training program and 3.1 percent of the respondents checked "no response."

Table 5. Number of firms responding that have an organized training program for their employees

	Number	Percent of total
Yes	107	46.9
No	114	50.0
No response	7	3.1
Total	228	100.0

Table 6 indicates that 88.8 percent of the firms having a training program for their regular employees include distributive education students in their training program. The balance of the firms, 11.2 percent, do not include distributive education students in any organized training program.

Table 6. Firms having a training program for their employees that include distributive education students in their training program

	Number	Percent of total
Yes	95	88.8
No	12	11.2
Total	107	100.0

Tables 7 and 8 include the responses of the businesses and the students regarding certain areas of instruction important to distributive occupations. The subject areas include orientation and job placement, merchandise mathematics, retail salesmanship, display, advertising, merchandise information, the operational structure of distribution and personality improvement; a definition of personality.

The survey instrument requested all respondents to indicate the value of each subject area by checking either (1) highly recommended, (2) recommended, (3) value questionable, or (4) no value.

Table 7 represents the 228 surveys from businessmen. According to

their responses, personality improvement is the area that benefits distributive education students the most. Over 85 percent checked this as a highly recommended subject. Other areas that over half of the businessmen highly recommended included merchandise mathematics, 72.0 percent, retail salesmanship, 70.6 percent, merchandise information, 61.9 percent, and orientation and job placement, 51.8 percent. Display, advertising, and the operational structure of distribution was less important to businessmen with only 44.8, 37.3, and 25.4 percent, respectively, indicating these subjects were highly recommended. These three subjects combined represented "no value" to 20.1 percent of the respondents.

Table 8 indicates the responses of 503 students enrolled in a distributive education program at the time of the survey. It presents a similar picture to that of the businessmen. Personality improvement is the most important subject to the students with 49.8 percent checking it as "highly recommended." Other subjects and percentages that are most important as viewed by the students in distributive education include: orientation and job placement, 45.9 percent, display, 33.6 percent, retail salesmanship, 32.2 percent, and advertising, 28.3 percent. Other subjects that are less important as viewed by the students, but with no distinct dividing line between them include: merchandise mathematics, 25.4 percent, merchandise information, 24.5 percent, and the operational structure of distribution, 21.0 percent. Although these subjects were not as "highly recommended" as the previous ones, they were all "recommended" by at least 45.0 percent of the students. Sixteen and one-half percent of the studentschecked these three subjects combined as of "no value."

)			

A summary including the responses of both businesses and students indicates that personality improvement; a definition of personality is considered the most important subject for preparing distributive education students. Other subjects that rank as important to both groups are retail salesmanship, orientation and job placement and merchandise mathematics. Subjects of less importance to both groups combined include display, advertising, and the operational structure of distribution.

WHAT IS DISTRIBUTIVE EDUCATION?

Distributive Education is a term that identifies a program of instruction in distribution and marketing.

Distributive occupations are those followed by proprietors, managers, or employees engaged primarily in marketing or merchandising goods or services. Such occupations may be found in various business establishments, including retailing, wholesaling, manufacturing, storing, transporting, financing and risk bearing.

Under the cooperative plan, classroom instruction in marketing and distribution is combined with actual on-the-job training to provide an ideal learning situation for the student. The work experience or on-the-job training is the very important part of this program that you the businessman provided for the D. E. student.

THE PURPOSE OF THIS SURVEY

To obtain from you, a distributive education student, an evaluation of the distributive education curriculum presently being taught in Utah secondary and technical schools along with any suggestions you wish to make that may help to improve the curriculum offering, in order that it, along with your contribution of providing on-the-job training, might better meet the needs of:

- 1. The student
- 2. The businessman in the community
- 3. Labor and industry in the area

Criteria for Evaluation of Subject Offerings

(1) <u>Highly Recommended</u> :	Subject area that you think should be covered in the classroom in detail or the area of instruction you feel most important.
(2) Recommended:	Subject area that you would like to see covered exposing the student to the general principles of the subject area.
(3) <u>Value Questionable</u> :	Subject area that may be of some value if time permits but not considered by you as being of any significant importance.
(4) <u>No Value</u> :	Subject area or offering that is of no value and possibly should be delete from the curriculum offering with maybe other course offerings you may suggest in its place.

(1) Highly Recommended (2) Recommended (3) Value Questionable (4) No Value	Please evaluate each subject area, as it relates to your educational needs in importance, by placing an "X" in the appropriate space. QUESTIONNAIRE NUMBER:
I. ORIENTATION AND JOI	B PLACEMENT
(1) (2) (3) (4)	A. <u>Career Opportunities in Distribution</u> : Acceptance of the "Marketing Concept" and Selling as a career.
(1) (2) (3) (4)	B. Getting Started in Distribution: Locating a job, making the application, laws concerning the Individual, Student, and Union Membership.
(1) (2) (3) (4)	C. Holding the Job: The "sales-winning" personality, why salespeople lose jobs, five steps of the salefirst exposure to formal sales training, and tips to the trainee.
II. MERCHANDISE MATHER	MATICS
(1) (2) (3) (4)	A. Cash Register Training: Obtaining change from cashier, sales slip and sales tax, change making, sales returns and daily register report.
(1) (2) (3) (4)	B. <u>Pricing</u> : Split-group pricing, markup, markdown, and coding.
(1) (2) (3) (4)	C. <u>Discounts</u> : Cash, trade, seasonal, quantity cumulative and non-cumulative, and employee discounts.
(1) (2) (3) (4)	D. Employee compensation: Straight salary, commission, employee selling cost and salary deductions.
(1) (2) (3) (4)	E. Profit and Loss: Inventory, stock control, profit and loss, stock turnover, planned purchases, and open-to-buy.
(1) (2) (3) (4)	F. Consumer Credit: Kinds, advantages and disadvantages, and place in the economy.
(1) (2) (3) (4)	G. Arithmetical Processes and Sample Problems: Addition, subtraction, multiplication, division, fractions, decimals, percentage, and mental computations.
III. RETAIL SALESMANS	HIP
(1) (2) (3) (4)	A. Steps of the Sale: The salesperson and the customer.
(1) (2) (3) (4)	B. The Preapproach: Customer knowledge and why customers buy.
(1) (2) (3) (4)	C. The Approach: Types, making a favorable impression, and directing customer attention.

(1)	(2)	(3)	(4)	D.	Customer Analysis: Customer types, classifying of customers, techniques for the care and handling of customers and information that customers can expect from salespeople.
(1)	(2)	(3)	(4)	E.	Showing the Merchandise: Establishing a favorable "climate," creation of interest, creation of desire and summary of showing the merchandise.

The space below is provided for any comment or suggestions you may wish to make concerning the distributive education program and/or this study to evaluate the D.E. curriculum.

WHAT IS DISTRIBUTIVE EDUCATION?

Distributive Education is a term that identifies a program of instruction in distribution and marketing.

Under the cooperative plan, classroom instruction in marketing and distribution is combined with actual on-the-job training to provide an ideal learning situation for the student.

THE PURPOSE OF THIS SURVEY

To obtain from you, a Utah businessman, an evaluation of the distributive education course offering now available to D.E. students in Utah public schools. You are encouraged to offer any suggestions or criticism you may wish to make that may help the school better prepare the student to meet the needs of:

- 1. The student
- 2. The businessman in the community
- 3. Labor and industry in the area

Your cooperation in completing this questionnaire is greatly appreciated. A summary of the findings from this study will be made available to you.
