Identifiers- Ohio

A study was made to assess the needs and opportunities of members of the American Association of University Women (AAUW) to continue their education in Ohio. Questionnaires were returned by 2,569 AAUW members from Ohio branches giving data on personal and socioeconomic background, educational motivation, preferred kinds of programs and fields of study and felt needs for guidance and counseling. There was also a tabulation of information from Ohio colleges and universities as to women faculty members (217), women administrators and trustees (much fewer), degrees granted to women in 1964, graduate and undergraduate enrollment data, and institutional policy. The typical AAUW respondent was in the 30-60 age range, with a family income of \$5-10,000, employment in education, a husband in one of the professions, a desire for part-time or evening graduate study, and no felt need for guidance or counseling. Most institutions accepted part-time students, 22 offered higher adult education, some had financial aid for part-time students, and eight had special programs for women. Also, beginning in academic year 1966-67, the state wide College Faculty Program will offer financial aid to mature women wishing to prepare for college or university teaching. (ly)

CONTINUING EDUCATION FOR WOMEN  
A Study Project of the  
OHIO DIVISION  
AMERICAN ASSOCIATION OF UNIVERSITY WOMEN

Compiled by  
Mrs. Charles E. Ewalt  
Implementation Chairman  
Expectations for Education

## PREFACE

The choice of Continuing Education for Women as an Ohio Division priority study was made by the Division Board in January 1964 following the return of a questionnaire from 41 Branches indicating interest in such a study. Responsibility for the development of the project was delegated to the Division Implementation Chairman for Expectations for Education.

The purpose of the study has been to determine what course of action the Ohio Division should follow in implementing programs of Continuing Education for Women in the state. This initial phase of the project has collected data concerning the needs and opportunities for AAUW members to continue their educations in Ohio.

Goals have included: studying personal characteristics of AAUW members; determining the needs and interests members have; discovering the uses being made of present educational opportunities; encouraging Branches to study local facilities and needs; compiling data on current advanced degree and adult education programs which are available; and locating both educational institutions and individual members who are interested in participation in the College Faculty Program sponsored by the Association.

Assistance in the preparation of this report has come from many sources. Area Representatives for Education in the participating Branches duplicated the individual questionnaires and compiled statistics from them. Mr. Michael Evans rendered immeasurable service in the tedious work of checking data.

Special appreciation should be expressed to the Presidents of the institutions of higher education in Ohio and to their representatives who provided the information about existing educational opportunities. Dr. Elizabeth Stanton prepared the section on Home Study. Mrs. Raymond Guthrie, President of the Ohio Division, and Dr. Eleanor F. Dolan, Staff Associate for Education of the Association, supplied the material explaining the College Faculty Program. Particularly helpful suggestions were given by Mrs. Paul F. Ward, a member of the Continuing Education of Women Committee of the Alumnae Council of the Ohio State University.

April, 1965

Della C. Ewalt

## TABLE OF CONTENTS

### SUMMARY OF FINDINGS

### SAMPLE QUESTIONNAIRES USED IN THE STUDY

### TABULATION OF INFORMATION FROM INDIVIDUAL QUESTIONNAIRES

Branch Participation in Survey Project	1

Women Serving as Trustees	2
Administrative Positions Held by Women	3
Degrees Granted to Women in 1964	4
Enrollment of Women Undergraduates 1963-1964	5
Enrollment of Women in Graduate Programs	6
Institutions Who Have	
Enrollment Open to Part Time Students	7
Financial Aid Available to Part Time Students	7
Adult Education Programs	8
Special Courses for Women	8

### HOME STUDY

### THE COLLEGE FACULTY PROGRAM

## SUMMARY OF FINDINGS

### Participation

Of the 69 Branches of the Ohio Division of AAUW in 1964, 58 Branches participated in this study project. This was an 84.1% of participation.

Gallipolis Branch reported the highest percentage of response within a Branch. Twenty of 24 members participated in the individual questionnaire poll for a Branch response of 83%. Toledo Branch returned the most questionnaires - 228.

Individual questionnaires were completed by 2,569 members of AAUW from Branches representing 7,704 members. The percentage of response from members in participating Branches was 33%.

### Social Characteristics of Members

Sixty-eight percent of the members responding were married; 22% were single; 7.2% were widowed and only 2% were divorced.

More than two thirds (68%) of the members are between the ages of 30 and 60. The percentage of members between the ages of 20 and 30 is 14.7%; between 30 and 40, 22.5%; between 40-50, 21.5%; between 50-60, 24.0%; between 60-70, 13.0%; and over 70, 4.3%. One will note that the single largest age group is that between 50 and 60 where nearly one fourth (24.0%) of the membership is represented.

About half (49.0%) of the members live in families where the annual income averages between \$5,000 and \$10,000. Thirty-eight percent have annual incomes between \$10,000 and \$20,000. Only 6.7% have annual incomes below \$5,000 and 6.1% have incomes above \$20,000.

Nearly one third (30.1%) of the members are married to men engaged in the professions of medicine, law, and similar work. Professional education fields are the life work of husbands of another 22%, and the husbands of 20.3% of the members are managers, officials or related occupations.

Eighty-four percent of the members are married to men who are college graduates.

More than three fourths (78.0%) of the women are employed in professional education occupations. Some 74.5% of the members who are employed work full time; 1,197 members are employed either full or part time. Some 94.3% of those responding indicate that they have been employed at sometime since college graduation.

Bachelors' degrees are held by 2,019 members, 569 hold masters' degrees, and 36 hold doctoral degrees.

#### Desires of Members for Additional Training

About half of the responding members (752) indicate that they desire additional training at the present time, and about half (842) indicate no interest at present.

Most (1,090) members indicate an interest in further study at sometime in the future. Only 248 showed no interest or anticipated no interest in further education.

Cultural advancement was the purpose expressed by 42% of the members for their continuing education. Another 31% desire education for professional or technical purposes. Upgrading a present position was listed as a purpose by 17% of the members; 10% wanted to change their original preparation.

Only 4% of the women expressed interest in full time study, while 30% preferred part time study. On campus study was preferred by 15% and extension study was preferred by 14%. Daytime classes were preferred by 11% and evening classes by 25%. Interest in correspondence courses was shown by 59 women.

Courses for credit were the choice by almost two-to-one over courses not for credit; 729 women indicated a preference for credit courses, and only 390 did not wish credit for study. Of those who were interested in credit courses, 816 wanted graduate courses and only 144 wanted undergraduate courses.

Art courses, literature courses, social studies courses, and language courses were the most frequently mentioned types of course preferred.

Most women (981) did not feel they needed guidance or counseling for their further studies, although 391 women indicated an interest in this type of assistance.

### Current Employment of Women at Institutions of Higher Learning in Ohio

At the 43 institutions of higher learning that participated in this study, 1,391 women are employed as members of the faculties. This represents that some 20.9% of the faculty members at these institutions are women. At these same institutions, only 233 women are employed in administrative positions.

Only 96 of 1,061 or 9.1% of the trustees of the participating institutions are women.

### Enrollment and Degrees Awarded to Women in Ohio

In 1964, baccalaureate degrees were awarded to 8,659 women, masters' degrees to 1,321 women, and doctoral and professional degrees to 91.

For the 1963-1964 school year, 39.8% of the undergraduates enrolled were women. It is interesting to notice that 25.8% of those enrolled in masters' programs were women, and that the percentage is further reduced to 19.1% of the enrollment for doctoral programs.

### Current Programs for Part Time Students

Most institutions indicated that their enrollment is open to part time students. Some schools offer financial assistance to part time students either as scholarships, loans, or employment opportunities.

Twenty-two institutions offer adult education programs, and eight institutions offer special courses for women. (For complete list of these institutions, see pp. 7-8 of the second section.)

Home study courses also provide college credit for the woman who is limited by transportation or by family responsibilities.

### The College Faculty Program

Mrs. Kenneth Evans is acting as temporary chairman for the Ohio Division's participation in this program. Those who are interested in this program should read pp. 10 and 11 in the second section.

INSTITUTIONS OFFERING SPECIAL COURSES FOR WOMEN

University of Akron  
Bluffton College  
University of Cincinnati  
John Carroll University  
Ohio Northern University  
The Ohio State University  
The University of Toledo  
Wittenberg University

## HOME STUDY

The enthusiasm and eagerness of many today to continue their education after they have formally completed the high school years, and even some of the college years, have given rise to new methods and techniques to reach desired goals. Not the least of these is the Correspondence or Home-Study possibility.

Ohio University is the only institution of higher education in the state which is recognized by the National University Extension Association to offer courses for credit at the college level. Currently about 150 courses in almost all of the academic disciplines are available to qualified students. While these may be taken for the sheer enjoyment of the learning, they do carry university credit which is transfereable to most educational institutions around the nation.

For the Ohio resident the current fee is \$15.00 per semester hour. The time granted for the work on the course is twelve months, although it is possible to complete a three semester hour course within a ten week period, if necessary.

Correspondence study is not only a great boon to the student unable for personal, professional, family, or other reasons to take courses in residence on a campus, but it is a wonderful form of self-discipline in studying on one's own.

Details concerning courses available and procedures of enrolling may be secured by writing to The Extension Division, Ohio University, Athens, Ohio 45701.

## THE COLLEGE FACULTY PROGRAM

Last September the AAUW Educational Foundation invited the Ohio Division Board of the American Association of University Women to participate in the College Faculty Program sponsored by the Association. Our state-wide study of continuing education for women and the "Continuing Education" pamphlet produced by the Ohio State University Alumnae provided a background for this invitation.

The purpose of the program is to provide an opportunity through tuition and grants-in-aid assistance for graduate education for mature women who wish to prepare themselves for professional careers in colleges and universities, including two-year community colleges. Present and anticipated faculty shortages underscore the opportunities which the program will open to interested women. The first awards will be available for use in the 1966-67 academic year.

At the October Board meeting, the Ohio Division Board voted to accept this challenging opportunity. Immediately leadership was found in the co-chairmen, Dean Christine Conaway, The Ohio State University, and Dr. Marie Pfeiffer, Columbus Branch member. The Columbus Branch Committee and the Division Board are working closely together to get the project launched as soon as possible in the Central Ohio area. Mrs. Kenneth Evans, Division Program Development Chairman, is acting temporarily as Division College Faculty Program Chairman.

Inter-Branch committees located near other graduate centers are being set up. All branches are to select local chairmen for this program to serve for the biennium as contact personnel. Letters to these chairmen from the Division and Association will keep the branches informed as to necessary procedures and developments. This program is of concern and interest to every college woman graduate and therefore requires the attention and support of every branch.

Of immediate importance to launching the program are the necessary funds. Branches are to send names of foundations, industries, and individuals who might underwrite the plan to the acting Division Chairman, Mrs. Evans. AAUW Foundation personnel will make the final contacts with would-be donors seeking funds for the program but Ohio members may join in the visit. This is necessary because the Educational Foundation's tax-exempt status permits it to receive gifts. The Foundation takes the responsibility for accounting for the funds and provides the day-to-day administration which the Program requires.

We have received expressions of individual interest in the program from all parts of the state. Because of preliminary work done, the Division was glad to welcome the first effort from the Columbus Branch, particularly as it relates to the Ohio State University. They hope to have their first award winners for the fall of 1966. The program to be successful must be built well and therefore slowly. The keen interest received by our state-wide survey should make progress in all areas of the state easily possible. As they become interested, branches should discuss their plans with Mrs. Kenneth Evans, 1478 Cardiff Road, Columbus Ohio 43221.

The Division continues to welcome suggestions for possible resources to underwrite this program. If a donor wishes, he may designate that the gift is to be used only for a woman in his vicinity. For individual donors it is important to know that recent U.S. Treasury rulings indicate that the Educational Foundation is one of the "30 per cent" organizations.

The Ohio Division hopes that women long away from active participation in academic life will be encouraged to resume their interrupted graduate studies. By so doing they will be satisfying personal desires, continuing intellectual growth, and fulfilling their responsibility to society.
