EDUCATION OF INDIAN CHILDREN IN 1967

Indian children attend public, Federal, private, and mission schools. In fiscal year 1967 there were 138,501 Indian students, ages 6 to 18 years, inclusive, enrolled in these schools in the United States. Compared to 141,694 students last year, enrollment decreased 2.3 percent.

Education of Indian children residing in the States of California, Idaho, Michigan, Minnesota, Nebraska, Oregon (except the Warm Springs Agency), Texas, Washington, and Wisconsin is the responsibility of the state concerned.

In 1967 more than half (56.1 percent) of all Indian children of school age (6-18) attended public schools. Of those enrolled in school, 60.0 percent attended public schools, 33.6 percent attended Federal schools, and 6.4 percent attended mission and other schools. Comparable percentages in 1966 were 61.3, 32.6 and 6.1.

For more than three centuries Indian education in the United States was largely under the direction of missionaries. As early as 1568 the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1967 the Bureau of Indian Affairs operated 246 schools with an enrollment of 51,234 Indian children, and 19 dormitories for 4,268 children attending public schools.

The primary objective of Federal schools operated for Indian children living on Indian-owned or restricted trust lands is to prepare them for successful living. In Federal schools children develop

basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets program standards required by the States in which they operate, and all secondary schools are accredited so that graduates may enter college on the same basis as public high school graduates. A full 4-year high school course is offered at 22 schools. Five other schools offer high school training at less than the full 4-year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 83,091 (56.1 percent of school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal school buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Cong. (64 Stat. 1100), as amended August 13, 1958, admin-

4

istered by the Department of Health, Education, and Welfare, a new Federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational problems under extraordinary circumstances, including special services and special programs designed to facilitate the education of Indian children.

In fiscal year 1967, the Bureau of Indian Affairs entered into contracts with 14 States and with school districts in 3 other States, in accordance with approved plans which specify conditions under which financial aid is extended. In addition to these, aid was provided through contracts for the education in public schools of 2,326 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation, and in Albuquerque, New Mexico.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 55,502 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics concerning Indian education are published annually by the Bureau of Indian Affairs and are available the fall following the close of the school term which they cover.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal schools. Native children in Alaska are Indian,

Eskimo, and Aleut. The 12 tables below relate to Indian and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 6 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. There is a decrease in population and public school enrollment from 1966, due to the use of actual school enrollment figures reported by a state in lieu of earlier estimated figures. Indian mobility accounts for the children, 6 to 18 years inclusive, who are shown under the caption "Information Not Available."

It should be noted that children under 6 and over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 6 to 18 years old, while tables 2 thru 9 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and cover all students enrolled regardless of their ages.

Table 2 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily attendance for all schools, exclusive of hospital schools, was 88.2 percent in 1967 as compared to 88.7 percent in 1966.

The following changes account for a net decrease of 7 in the number of facilities operated in fiscal year 1967. In the Navajo Area, four day schools and one hospital day school were closed and one boarding school opened. Rough Rock boarding school, also in the Navajo Area, was operated by a tribal group during school year 1966-67, and is therefore not counted as a Bureau operated school. In the Aberdeen Area, one boarding school closed and was operated as a dormitory and one day school closed. In the Albuquerque Area, two day schools were combined into one and one day school was administered by the public school system. One day school reopened in the Juneau Area.

The Concho Demonstration School in the Anadarko Area is operated as a special school for the rehabilitation of students with educational problems. The school staff conducts a remedial program designed to reorient the student to the school he left or to a school more in keeping with his needs and objectives. The school has a capacity of 44 pupils. During 1967, a total of 65 pupils were served for varying periods of time. Average daily attendance at the school was 25.9. By the close of the school year 30 pupils had been transferred to other Federal schools and their enrollment is included in the enrollment of the other schools.

Trailer schools were operated as temporary educational facilities at 6 locations for Navajo children living in isolated parts of the reservation. Of 345 students, 89.6 percent were enrolled in the primary and first two grades in 1967. The operation of these units, often supplemented with quonset huts, has been successful as a temporary measure, but these trailer schools are being replaced by adequate school buildings wherever the population and regular daily attendance warrant permanent facilities.

Tables 3, 4 and 5 list individual schools, instructional units in hospitals, and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily attendance, and grades taught. In table 3 boarding and day schools are combined this year. The Albuquerque Dormitory is operated in conjunction with the Albuquerque Indian School but is shown with peripheral dormitories because these dormitory students attend public schools under conditions identical to other peripheral dormitories.

Table 6 indicates grade level. In 1967 enrollment in the primary and first 4 grades decreased by 44 pupils to 23,389 as compared to the previous year's 23,433. This group represents 45.7 percent of the entire student body. An enrollment of 1,789 ungraded elementary and secondary students account for 3.5 percent of total enrollment.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have acquired some facility in

the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In fiscal year 1967, 2,098 high school students graduated, an increase of 31.9 percent over 1966.

Table 7 indicates the number of high school graduates, number of 8th grade completions, and number of Post High completions.

Table 8 indicates students according to their degree of Indian blood. Full bloods comprise 82.1 percent of the total and only 3.3 percent are less than one-half Indian.

Table 9 shows tribal designation of students in Federal schools. Ninety-seven specific tribes or tribal groups and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1967.

Sixty-one tribes had fewer than 40 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 78 percent of the total enrollment.

In fiscal year 1967, the Bureau of Indian Affairs participated for the first time in the Elementary and Secondary Education Act. 47,813 students were served by the Title I program through a total of 83 projects. Table 10 indicates the distribution of students participating in these projects, by school, agency and state.

Table 11 indicates the completed school construction, both new and replacement, during fiscal year 1967.

Table 12 shows the number of participants in the summer program, by category, for fiscal years 1960 through 1967.

- 1/ In addition dormitory facilities are provided 4,268 children who attend public schools. There is a difference of 1,028 in Federal school enrollment as reported by the school census reports and the school attendance reports. This number is distributed over the various Areas. A reconciliation of the student enrollment for any one Area should be requested from the separate Area Offices.
- 2/ Includes 4,268 children who live in Federal dormitories and attend public schools.
- 3/ Children recorded at their own agencies but who reside off the reservation.
- 4/ Navajos under jurisdiction of United Pueblos and Zuni Agencies included with Navajo of New Mexico.
- 5/ Operating as a separate agency under jurisdiction of Washington Office.
- 6/ Public school enrollments furnished by Oklahoma State Department of Education.
