Descriptors-EDUCATION, EMPLOYERS, *PERSONNEL DATA, SALARIES, *SCIENTIFIC PERSONNEL, *SCIENTISTS
Identifiers-National Science Foundation, Office of Economic and Manpower Studies

Information concerning 243,000 scientists is reported in the 1966 National Register of Scientific and Technical Personnel. Data are presented on education, specialization, type of employer, salary, age, sex, and other factors selected to meet the needs of most users of data on scientific personnel. Discussed are characteristics of scientists and median annual salary figures. (BC)

FOREWORD

THIS REPORT is based on the 243,000 individual scientists in the 1966 National Register of Scientific and Technical Personnel. It is a reference document showing data on education, specialization by work activity and field, type of employer, salary, age, sex, and other factors, selected to meet the needs of most users of data on scientific personnel. Selection of the data has been guided by numerous inquiries and requests for various types of information. The nature of these requests has also provided evidence that the data frequently serve as the bases for important policy decisions in all sectors of the American scientific and technological enterprise.

National Register data have been collected for the past 12 years and will form part of a longitudinal file covering such subjects as geographic mobility, mobility among types of employers, and career patterns in terms of training and employment. Such studies should provide valuable insight into the dynamics of this population.

The National Science Foundation gratefully acknowledges the cooperation of the Nation's scientists who responded to the National Register as well as the cooperation of the participating scientific societies. Responsibility for the National Register of Scientific and Technical Personnel is under the general supervision of Thomas J. Mills, Head, Sponsored Surveys and Studies Section, in the Office of Economic and Manpower Studies, H. E. Riley, Head.

CHARLES E. FALK
Planning Director
National Science Foundation

DECEMBER 1967

ACKNOWLEDGMENTS

Milton Levine, Study Director, National Register of Scientific and Technical Personnel, planned and prepared this report with the assistance of Suzanne M. Duval. George Dan Clark, Manager of the National Register Records Center, was responsible for the data-processing activities carried out at North Carolina State University in Raleigh. The 1966 National Register was coordinated by J. James Brown. The following organizations cooperated with the National Register in 1966: American Anthropological Association, American Chemical Society, American Economic Association, American Geological Institute, American Institute of Biological Sciences, American Institute of Physics, American Mathematical Society, American Meteorological Society, American Psychological Association, American Sociological Association, Center for Applied Linguistics, Federation of American Societies for Experimental Biology, and, through these organizations, other specialized societies.

CONTENTS

The National Register of Scientific and Technical Personnel, **a requirement of the National Science Foundation Act of 1950, collects data at 2-year intervals to provide statistical information on the supply, utilization, and characteristics of the Nation's scientists. The 1966 registration is the sixth in this series.**

SUMMARY

Almost a quarter million scientists, of whom 8 percent were women, reported to the National Register in 1966. Three-fifths of these registrants were in the physical sciences, one-fourth in the life sciences, and the remainder in the social sciences. The total number of registrants was 242,800 in 1966, compared with 223,900 in 1964.

Highest Degree

In 1966, doctorates were reported as the highest degree by 37 percent of the registrants, master's degrees by 27 percent, and bachelor's degrees by 30 percent.

Type of Employer

Industry employed 34 percent of the scientists in the National Register in 1966, down from 38 percent in 1964. The proportion of scientists employed in educational institutions increased slightly, from 35 percent to 36 percent; and those in the Federal Government remained at 10 percent both years.

Universities and Colleges

Of the 79,500 scientists employed in universities and colleges, 62 percent held the doctorate, 23 percent held the master's degree, and 10 percent held the bachelor's degree. Almost three-fourths of these scientists were in teaching as either a primary or secondary work activity.

Primary Work Activity

One-third of the 1966 registrants were primarily engaged in research and development, 18 percent reported teaching as their primary work, and 20 percent of the scientists were in management or administration.

Years of Professional Experience

One-half of the scientists reported less than 12 years of professional experience; 20 percent of the registrants had less than 5 years.

Age

The median age of registrants in 1966 was 38 years; one-fifth of the scientists were in their twenties.

Geographic Location

Eight States included more than one-half of the total registrants. California and New York each had well over 26,000 registrants. Six other States each had more than 10,000 registrants—Pennsylvania, Illinois, New Jersey, Texas, Ohio, and Massachusetts. There was a slight decrease (from 12 percent to 11 percent) in the proportion of registrants in California from 1964 to 1966. Michigan reported a slight increase, from 3 percent to 4 percent during this 2-year period. The other States remained at about the same proportion of the total.

Salaries

The median salary of full-time employed civilian scientists rose 9 percent from $11,000 in 1964 to $12,000 in 1966. Median salaries higher than $12,000 were reported in the fields of economics ($13,100), statistics ($12,800), and physics ($12,500); also for employment in industry ($13,000), nonprofit organizations ($13,000), and Federal Government ($12,100). The median salary of college teachers was $12,800 on a calendar year basis and $9,900 on an academic year basis. For both 1964 and 1966, median salaries higher than the national average were reported by scientists in Delaware, District of Columbia, New Jersey, Maryland, New Mexico, California, and New York.

Federal Support

The Federal Government provided funds for at least some of the work of 104,900 scientists, or 43 percent of the total registrants, including 30,600 Federal employees, civilian or military. Defense and health programs provided funds for the largest number of scientists in both 1964 and 1966.

Students

Twelve percent (30,500) of the registrants reported that they were either full-time or part-time students. About 6 percent of the full-time students were holders of doctoral degrees; one-half held the master's degree, and 43 percent were bachelor's holders in graduate training programs.

Foreign Language and Area Knowledge

More than 80 percent of the registrants reported knowledge of a foreign language, and 40 percent reported knowledge of a foreign area gained by residence, research, or travel.

INTRODUCTION

THIS PUBLICATION, based on the 1966 National Register of Scientific and Technical Personnel, reports data on the supply, utilization, and characteristics of the Nation's scientific manpower resources. The 1966 registration is the sixth of a series conducted by the National Science Foundation to collect and make available timely information on qualified personnel in science fields. Earlier studies were conducted for 1954, 1956–58, 1960, 1962, and 1964.

The Foundation sponsors the National Register as authorized and directed in the National Science Foundation Act of 1950 to ". . . maintain a register of scientific and technical personnel and in other ways provide a central clearing house for information covering all scientific and technical personnel . . . ." In carrying out this legislative mandate, the National Register provides statistical information on these personnel and is the mechanism by which, under special conditions, individuals with special competence can be identified and located as required.

From the outset, the National Science Foundation has maintained the National Register by contract with the scientific societies rather than as a program operated solely by the Federal Government. Within this framework, the Foundation develops uniform standards and procedures, and reports findings across discipline lines.

The National Register questionnaire differs considerably from the more complex, special-purpose questionnaires used from time to time by other organizations to obtain information in depth concerning selected portions of the scientific and technical population. In contrast, this questionnaire obtains minimum information at 2-year intervals on the individual's educational background, current employment, specializations in science or technology, and selected personal characteristics (see appendix C).

The items in the questionnaire are reviewed periodically in order to assure that data collection is confined to the minimum essentials and thus to minimize the respondent burden. As a result, the American Chemical Society reports that respondents now average less than 15 minutes to complete the National Register questionnaire. A list of scientific specializations, which accompanies the questionnaire, is reviewed biennially by representatives of the cooperating societies to assure that core specialties of a discipline as well as the interdisciplinary and related areas are represented.

The societies compile the mailing lists from many sources, mail the questionnaires, and review the returns for "full professional standing" as scientists according to explicit criteria (see appendix B). Since these criteria differ in requirements for education and experience, the varying standards should be kept in mind when comparing numbers of scientists in different fields.

Coverage of the National Register

National Register mailing lists are compiled by the cooperating societies from their membership lists; regional, local, and other special affiliated membership lists; lists of nonmembers attending professional meetings; publication subscription lists; and alumni organization lists. In some cases the nonmembers account for sizable proportions of the mailing lists. For example, the American Chemical Society, with a membership of 94,000, mailed out 140,000 questionnaires; the American Institute of Biological Sciences and the Federation of American Societies for Experimental Biology, with combined memberships of 16,000, mailed out 92,000 questionnaires. Experience indicates that about 15 percent of the registrants are not members of any professional society.

By using National Register information provided by the Foundation, the scientific societies remove duplicate names from the mailing lists that they maintain. The effort has been highly successful in assuring that one questionnaire is sent to each individual. A few duplicate names occur among individuals who hold membership in several scientific societies, but all are asked to complete only one questionnaire. The use of social security numbers helps to differentiate individuals with identical names. To simplify collection procedures and reduce the burden on individual scientists, an updating procedure will be undertaken for the 1968 registration instead of requesting completion of the entire questionnaire.

In 1966, mailing lists of all participating societies included 482,000 names of members and others associated with one of the natural or social science fields. The elimination of duplicates reduced this list to approximately 453,000 individuals. Of them, 302,000 returned questionnaires, and 151,000 were nonrespondents. Those providing incomplete information or not meeting the criteria for inclusion totaled 59,000; thus, the data on the remaining 243,000 persons are included in this report. In proportionate terms, 67 percent of the individuals on the lists compiled by the cooperating societies returned questionnaires, and 20 percent of the returned questionnaires were incomplete or showed less than full professional qualifications.

To determine the characteristics of the nonrespondents, a stratified sample based on geographic location and field of science was developed, and nonrespondents to the 1964 National Register are now being asked to provide selected information. The results of this study should provide the means by which the characteristics of the respondents and nonrespondents can be considered representative of all individuals included on the National Register mailing lists.

Scope of the National Register Data

The 1966 National Register includes chemists, earth scientists, meteorologists, physicists, astronomers, mathematicians, agricultural scientists, biologists, psychologists, statisticians, economists, sociologists, anthropologists, and linguists; in the 1968 registration, political scientists will be added.

Respondents reported their areas of scientific competence based on both education and work experience, professional identification, major subject of highest degree, and current field of employment. The principal basis for tabulating National Register data in this report was the first item, field of greatest scientific competence, as reported by the respond-

ent. This procedure was used since (*a*) the major subject of an individual's academic training alone may not take into account the influence of his work experience, (*b*) an employee's job title may not be sufficiently indicative because of variations in definitions and methods of classifying jobs, and (*c*) identification with a profession may rest on one of the foregoing factors and, at best, tends to represent the individual's personal view at a particular time.

The specialties list included approximately 1,200 specific specialties that were grouped into some 120 subfields and, in turn, grouped into 13 major scientific and technical fields (appendix D). Since the data are presented at both field and subfield levels, various combinations can be chosen to make up other major fields. Thus, the characteristics of persons in biochemistry can be studied independently or as a component in the field of either biology or chemistry. Responses to the 1966 National Register show that some individuals trained in one scientific field reported specialties in other fields and employment in still others.

Comparisons With Other Data

The National Register count of scientists differs from other published estimates (e.g., Bureau of the Census and Bureau of Labor Statistics) principally because of differences in fields included, reporting methodology, definitions, and time references. These three systems for collecting manpower information are designed to meet different needs and their counts are not based on identical populations. A greater amount of detailed information on scientists is available from the National Register, as compared with either Census or BLS data.

In 1966, BLS estimated that there were 399,000 natural scientists in the United States. This estimate was based on a sample survey of employing establishments, which were asked to report the number of employees working as natural scientists, according to BLS occupational definitions. It is recognized that employers' classification practices in adhering to these definitions are far from uniform, and they tend to produce statistical totals that conform to a payroll classification system rather more closely than to a scientific qualifications system. Estimates based on employer reporting usually define scientists as those whose jobs require at least a science baccalaureate degree or "equivalent training" and who are engaged in a scientific activity. Sometimes such counts are further limited to those engaged in research and development. An element of duplication exists to the extent that scientists are engaged in more than one job.

The 1960 Census of Population reported that there were 275,000 natural and social scientists, based on a study of a 25-percent sample of the population. Replies were classified according to the Census occupational classification. Comparison of Census data with information from other data sources is complicated by the infrequency of the survey. Census estimates the total scientific population at decennial intervals; more frequent sample surveys of households provide insufficient occupational detail to compare with other counts of scientists.

In 1966, the National Register included 243,000 natural and social scientists who met the criteria for "full professional standing." The individual respondent provided his personal, educational, and professional information, in addition to designating his scientific field.

Uses of National Register Information

The National Register, as a major source of data for studies underlying the development of national science policy, has provided information to both the Congress and the executive department agencies. The Senate Committee on Labor and Public Welfare, the House Select Committee on Government Research, and the House Committee on Government Operations were provided National Register data on impact of Federal R&D policies on scientific and technical manpower, the training and utilization of the manpower resources of the Nation, Federal support of research and development, and the impact of Federal funds on science teaching and research.

Some other examples include the use of National Register data by the Office of Science and Technology to appraise the effect of Federal funds on universities and colleges, by the National Institutes of Health to estimate the supply of scientists in life and health-related fields, by the Federal Council for Science and Technology to appraise the adequacy of supply of oceanographers in relation to Government programs in oceanography, and by the Civil Service Commission to compare Federal Government salary levels for scientists and engineers with those in other sectors of the economy.

Other users of National Register data include the Organisation for Economic Co-operation and Development, State governments, private companies, and universities to assist them in the study of characteristics of their scientific manpower.

Future use of National Register information will capitalize on the fact that registrations now provide information on the scientific specializations, work activities, levels of education, and other characteristics of scientists over a 12-year period. In the six successive registrations from 1954 to 1966, the numbers rose from 127,000 to 243,000. Longitudinal analyses, tracing the careers of individual scientists recorded in these successive registrations, should shed further light on the geographic mobility of scientists, the regional location of manpower with advanced degrees, and work history patterns.

Organization of the Report

This report provides National Register data in three parts: a broad perspective in part I; more specific, although selective, tabulations in part II; and detailed tabulations in appendix A. Administrators and science managers may be particularly interested in the presentations in part I and the summary of major characteristics in part II. Investigators seeking detailed information should look to the data in the appendix tables.

The Subject Matter Guide (pages 7–12) shows where to locate specific kinds of information on the numbers and salaries of scientists.

Appendix B shows the criteria for inclusion in the National Register as determined by the scientific societies. The questionnaire and specialties list used in 1966 are reproduced in appendix C. The subfields included in each scientific and technical field are presented in appendix D. A language family list is provided in appendix E, and a list of foreign areas is in appendix F.

SUBJECT MATTER GUIDE

PART I. GRAPHIC HIGHLIGHTS

NOTES

- Percent details shown in these charts may not add to totals because of rounding.
- Numerical basis for percentages was the total 242,763 scientists in the National Register of Scientific and Technical Personnel, 1966.

PART II. MAJOR CHARACTERISTICS

NOTES AND DEFINITIONS

- **Percent details may not add to totals shown, because of rounding.**
- **"Not employed" includes retired persons, housewives, students, etc. Of the 14,783 total not employed, 2,428 held doctorates, 5,747 held master's degrees, and 6,183 held bachelor's degrees. Of the 20,164 women, 3,013 were not employed.**
- **"Educational institutions" include universities, colleges, medical schools, and secondary school systems.**
- **"Other government" employers consist of State, local, regional, and international agencies.**
- **Educational levels reported are highest earned degree, if any; e.g., Ph.D., professional medical, master's, bachelor's, and "less than bachelor's" degree.**

SALARIES OF FULL-TIME EMPLOYED WOMEN SCIENTISTS

The highest median annual salaries of women scientists were in the fields of statistics ($10,500) and economics ($10,300).

SOURCE: National Register of Scientific and Technical Personnel, 1966.

APPENDICES

APPENDIX A

NOTES AND DEFINITIONS

• The classifications by fields of science reported in these tables are based on the individual scientist's report of his area of greatest competence in one of the 13 fields: Chemistry, earth sciences, meteorology, physics, mathematics, agricultural sciences, biological sciences, psychology, statistics, economics, sociology, anthropology, and linguistics.

• Several tables include data on some 120 separate subfields of science in subdivisions of the 13 fields of science (see appendix D). Subfields are the most detailed levels included in this report. These subfields may be combined to constitute various fields of science.

• Data on teachers in universities and colleges include the scientists who reported teaching as either their most important or second most important work activity.

• Educational levels reported are highest earned degree, if any; e.g., Ph.D., professional medical, master's, bachelor's, and "less than bachelor's degree."

• Employment characteristics are type of employer (industry, educational institutions, Federal Government, etc.), work activity (research, teaching, management, etc.), years of professional experience in 5-year intervals, and employment status (full-time, part-time, etc.).

• Among employment characteristics, "educational institutions" include universities, colleges, medical schools, and secondary school systems. "Other government" employers consist of State, local, regional, and international agencies. And "not employed" includes retired persons, housewives, students, etc.

• Foreign language tables include the number of scientists reporting knowledge in 1 or more of 10 language families and 99 individual languages and their proficiencies in lecturing, conversing, or translating.

• The foreign area table provides the number of scientists reporting knowledge of 1 or more of 100 foreign areas gained by residence, research, or travel.

Appendix Table A-52. Median annual salaries of full-time employed civilian scientists, by subfield, 1966

SUBFIELD	MEDIAN SALARY
ALL SUBFIELDS	12,000
ANALYTICAL CHEMISTRY	10,200
INORGANIC CHEMISTRY	12,000
ORGANIC CHEMISTRY	12,900
RELATED CHEMICAL SPECIALTIES	12,100
AGRICULTURAL AND FOOD CHEMISTRY	12,000
BIOCHEMISTRY	12,000
PHYSICAL CHEMISTRY	13,100
CHEMISTRY, OTHER	11,100
GEOCHEMISTRY	11,500
GEODESY	12,500
GEOLOGY	11,400
PALEONTOLOGY	10,300
SOLID EARTH GEOPHYSICS	12,000
GEOGRAPHY	9,800
HYDROLOGY	11,700
OCEANOGRAPHY	11,200
ATMOSPHERIC, LITHOSPHERIC, AND HYDROSPHERIC SPECIALTIES, OTHER	12,000
ATMOSPHERIC DYNAMICS, CHEMISTRY, AND PHYSICS	13,800
CLIMATOLOGY	11,800
SYNOPTIC METEOROLOGY	11,000
AREA SPECIALIZATIONS	11,700
METEOROLOGICAL INSTRUMENTATION	13,000
METEOROLOGY, OTHER	11,700
ACOUSTICS	13,000
ATOMIC AND MOLECULAR PHYSICS	12,500
ELECTROMAGNETISM	13,600
ELEMENTARY PARTICLES	11,200
MECHANICS	12,300
MOLECULAR PHYSICS	13,200
OPTICS	13,300
PHYSICS OF FLUIDS	14,200
SOLID STATE PHYSICS	13,800
THERMAL PHYSICS	12,000
OTHER PHYSICS SPECIALTIES	10,000
ASTRONOMY	12,000
ELECTRONICS	13,300
PHYSICS, OTHER	10,200
ALGEBRA	8,900
ANALYSIS AND FUNCTIONAL ANALYSIS	9,700
GEOMETRY	9,000
LOGIC	9,600
MATHEMATICS OF RESOURCE USE	15,000
NUMBER THEORY	9,300
NUMERICAL METHODS AND COMPUTATIONS	12,500
TOPOLOGY	10,000
PROBABILITY	12,500
MATHEMATICS, OTHER	8,900
AGRONOMY	11,900
ANIMAL HUSBANDRY	12,000
FISH AND WILDLIFE	9,000
FORESTRY	9,600
RANGE MANAGEMENT	9,900
HORTICULTURE	11,600
SOIL SPECIALTIES	11,700
ANATOMY	12,500
BOTANY	10,200
ECOLOGY	9,900
ENTOMOLOGY	11,300
GENETICS	11,500
IMMUNOLOGY	13,000
MICROBIOLOGY	11,500
NUTRITION	13,000
PATHOLOGY	17,800
PHARMACOLOGY	14,200
PHYSIOLOGY	13,500
PLANT PATHOLOGY	11,700
VIROLOGY	13,700
ZOOLOGY	9,800
OTHER BIO-MEDICAL SPECIALTIES	16,500
BIOPHYSICS	13,000
BIOLOGY, OTHER	10,400
CLINICAL PSYCHOLOGY	11,400
CONSELING AND GUIDANCE	11,000
DEVELOPMENTAL PSYCHOLOGY	11,000
EDUCATIONAL PSYCHOLOGY	11,500

APPENDIX B

Criteria for Inclusion in the National Register

The cooperating societies identify individuals with "full professional standing" for inclusion in the National Register, whether or not they are members of a professional society. Qualifications for "full professional standing" as a scientist were established in 1966 by the cooperating societies according to the following criteria:

Chemist (American Chemical Society)—A bachelor's degree and current employment in an area of chemistry; or 10 years of professional experience in an area of chemistry.

Earth scientist (American Geological Institute)—A bachelor's degree in an area of earth science; or uses the professional identification of geologist, geophysicist, geographer, geological engineer, petroleum engineer, or mining engineer and is employed in the field of earth science with at least 1 year of professional experience.

Meteorologist (American Meteorological Society)—A degree in meteorology, climatology, or related area; or completion of a professional course in meteorology at an institution of recognized standing and employment in meteorological or climatological work at a professional level for at least 2 years.

Physicist or astronomer (American Institute of Physics)—A bachelor's degree plus 2 years of additional training or professional experience; or the equivalent in professional experience.

Mathematician or statistician (American Mathematical Society)—A bachelor's degree in mathematics or statistics plus 4 years of professional experience; or a master's degree plus 2 years of professional experience; or a Ph.D. in mathematics or statistics; or the equivalent in professional experience.

Biologist (American Institute of Biological Sciences)—A Ph.D in an area of biology; or a master's degree in an area of biology plus a year of professional experience; or a bachelor's degree in an area of biology plus 2 years of professional experience; or the equivalent in professional experience.

Bio-medical scientist (Federation of American Societies for Experimental Biology)—A Ph.D. in an area of human biology and engaged in research; or a professional medical degree and engaged in research; or the equivalent in professional experience.

Psychologist (American Psychological Association)—A Ph.D. based in part upon a psychological dissertation and conferred by a graduate school of recognized standing; or a master's degree in psychology from a recognized graduate school and 1 year of professional experience; or the completion of 2 years of graduate work in psychology at a recognized graduate school and either employed in psychology or engaged in graduate study; or the equivalent in professional experience.

Economist (American Economic Association)—A graduate degree in economics; or a bachelor's degree in economics with 2 years of professional experience; or the equivalent in professional experience.

Sociologist (American Sociological Association)—A Ph.D or equivalent professional training in sociology or closely related

field; or substantial professional achievement in the field of sociology; or the equivalent in professional experience.

Anthropologist (American Anthropological Association)—A Ph.D. in anthropology; or the equivalent in professional experience.

Linguist (Center for Applied Linguistics)—An undergraduate major in linguistics with evidence of continued activity in the field; or graduate training in linguistics; or employment in the field of linguistics; or the equivalent in professional experience.

Each society considers both the type and length of work experience, as well as nonformal training, when full professional standing is to be based on an equivalent in professional experience. These varying standards should be kept in mind when comparing the numbers of individuals in the different scientific fields.

APPENDIX C

1966 Questionnaire and Specialties List

NATIONAL REGISTER
OF SCIENTIFIC AND TECHNICAL PERSONNEL

IN THE FIELD OF **CHEMISTRY** CONDUCTED BY THE

AMERICAN CHEMICAL SOCIETY

1155 SIXTEENTH STREET, N.W., WASHINGTON, D. C. 20036

AND THE NATIONAL SCIENCE FOUNDATION

And in other fields of science by the American Anthropological Association, American Economic Association, American Geological Institute, American Institute of Biological Sciences, American Institute of Physics, American Mathematical Society, American Meteorological Society, American Psychological Association, American Sociological Association, Federation of American Societies for Experimental Biology, and the Center for Applied Linguistics.

PLEASE PRINT ANSWERS IN DARK INK OR TYPE

PLEASE DO NOT WRITE IN THIS COLUMN

FORWARDED

REVISED

IF YOUR NAME OR ADDRESS AT LEFT IS INCORRECT, PLEASE ENTER CORRECT INFORMATION BELOW.
PLEASE GIVE FULL NAME

.....

.....

.....

.....

PLEASE BE SURE YOUR POSTAL ZIP CODE IS INDICATED.

NOTE: If you have received and completed a National Register questionnaire from one of the other organizations listed above since March 1, 1966, please write the name of the organization here .....; also, please complete item 1, and on the back of the questionnaire, give your social security number, date and signature, and return in the enclosed envelope.

VITA:

1. DATE OF BIRTH Month	Day	Year	2. STATE OR FOREIGN COUNTRY OF BIRTH	3. STATE OR FOREIGN COUNTRY OF SECONDARY SCHOOL GRADUATION	4. SEX
					☐ 1 - MALE ☐ 2 - FEMALE

5. CITIZENSHIP (check one)

☐ 6 - USA

☐ 7 - NON-USA (specify country) .....

☐ 8 - USA APPLIED FOR (specify present citizenship) .....

☐ 9 - NON-USA, permanent USA resident (specify citizenship) .....

EDUCATION:

6. COLLEGE, UNIVERSITY, OR OTHER INSTITUTION (include city and state)	EARNED DEGREE, IF ANY	YEAR OF DEGREE	MAJOR	MINOR

PROFESSIONAL IDENTIFICATION:

7. I regard myself professionally as a (an): (check only one)

☐ X1 - Agricultural and Food Chemist
☐ X2 - Biochemist
☐ 01 - Inorganic Chemist
☐ X6 - Physical Chemist
☐ 00 - Analytical Chemist
☐ 03 - Chemical Engineer
☐ 02 - Organic Chemist
☐ - Other (specify) .....

SCIENTIFIC COMPETENCE:

8. From the accompanying specialties list, select and enter on the lines below in decreasing order the four specialties in which you consider you have your greatest scientific competence, based on your total educational and work experience. Enter only scientific specializations. (Current specializations not considered scientific should be reported in item 12.)

Greatest: ..... Number ..... Specialty Title

Second: ..... Number ..... Specialty Title

Third: ..... Number ..... Specialty Title

Fourth: ..... Number ..... Specialty Title

CURRENT PROFESSIONAL EMPLOYMENT:

9. Check your current employment status.

☐ 1 - Employed full-time
☐ 2 - Employed part-time
☐ 3 - Unemployed and seeking employment
☐ 4 - Not employed and not seeking employment
☐ 5 - Retired

If you are a student, check your status.

☐ 6 - Student, full-time
☐ 7 - Student, part-time

10. Please give name of present principal employer, actual place of employment, and title of present position. (If not employed currently, omit items 10 through 15. Begin again with item 16.)

..... Name of present principal employer

..... Actual place of employment (city and state)

..... Title of present position

11. Check the box of the category which is most appropriate for your present principal employer (check only one).

☐ 1 - PRIVATE INDUSTRY OR BUSINESS
☐ A - SELF-EMPLOYED
☐ 2 - COLLEGE OR UNIVERSITY, OTHER THAN MEDICAL SCHOOL (specify department or other organizational unit) .....
☐ B - SECONDARY SCHOOL OR SCHOOL SYSTEM
☐ K - MEDICAL SCHOOL
☐ 3 - FEDERAL GOVERNMENT—CIVILIAN EMPLOYEE
☐ C - USPHS—COMMISSIONED CORPS
☐ L - MILITARY SERVICE—ACTIVE DUTY
☐ 4 - STATE GOVERNMENT
☐ D - COUNTY GOVERNMENT
☐ M - MUNICIPAL GOVERNMENT
☐ U - OTHER GOVERNMENT AGENCY (specify) .....
☐ 5 - NONPROFIT HOSPITAL OR CLINIC
☐ E - NONPROFIT ORGANIZATION, OTHER THAN HOSPITAL, CLINIC, OR EDUCATIONAL INSTITUTION
☐ 9 - OTHER (specify) .....

CURRENT PROFESSIONAL EMPLOYMENT CONTINUED

PLEASE DO NOT WRITE IN THIS COLUMN

12. Indicate on the lines below the specialization most closely related to your PRESENT employment. For scientific specializations enter both the number and specialty title from the accompanying specialties list; or write in your specialty if it is not in a scientific field.

Number ..... Specialty Title 59 60 61 62

13. Number your first and second most important kind of activity, in terms of working time devoted, by entering "1" and "2" on the appropriate lines below. 63 64 65

- 0 - MANAGEMENT OR ADMINISTRATION OF RESEARCH AND DEVELOPMENT
- A - MANAGEMENT OR ADMINISTRATION OF OTHER THAN RESEARCH AND DEVELOPMENT
- J - BASIC RESEARCH
- B - APPLIED RESEARCH
- 3 - TEACHING (state academic rank) .....
- C - REPORT OR OTHER TECHNICAL WRITING, EDITING
- 4 - DEVELOPMENT
- 6 - PRODUCTION, OPERATIONS, MAINTENANCE, EXPLOITATION, PROCESSING, ECONOMICS, EVALUATION
- 8 - CONSULTING (specify) .....
- F - QUALITY CONTROL, INSPECTION, TESTING, TECHNICAL SERVICES
- W - SALES, MARKETING, PURCHASING, ESTIMATING
- 9 - OTHER (specify) .....

14. Is ANY of your work being supported or sponsored by U. S. Government funds? ☐ Yes ☐ No ☐ Don't know
If yes, is your work related to any of the following programs:

☐ 1 - Agriculture ☐ 4 - Education ☐ 7 - Natural resources ☐ 0 - Other program (specify)
☐ 2 - Atomic energy ☐ 5 - Health ☐ 8 - Public works
☐ 3 - Defense ☐ 6 - International ☐ 9 - Space

NOTE: Salary and income information is regarded as confidential and will be used for statistical purposes only. It will NOT be released in any way that will allow it to be identified with you.

66

15. BASIC ANNUAL SALARY (JAN. 1966): Please give the basic annual salary associated with your principal professional employment as of Jan. 1966.

$ .....

If academically employed, check whether salary is for ☐ 9-10 mos. or ☐ 11-12 mos. 67 68 69

(Basic Annual Salary is your annual salary before deductions for income tax, social security, retirement, etc., but does not include bonuses, overtime, summer teaching, or other payment for professional work. Do not include rental or subsistence allowances.)

16. ESTIMATED GROSS ANNUAL PROFESSIONAL INCOME (Jan. 1 to Dec. 31, 1966): Please give your estimated gross professional income from all professional activities for the year which will end December 31, 1966.

$ 70 71 72

(Gross Annual Professional Income is ALL payment received for professional activities including basic salary before deductions, plus bonuses, royalties, fees, honoraria, rental and subsistence allowances, etc.)

17. How many years of professional work experience, including teaching, have you had? ☐ 73 74

LANGUAGE AND AREA KNOWLEDGES:

18. FOREIGN LANGUAGE: List the languages (other than English) in which you have knowledge and indicate with a check mark (√) your proficiency.
If you have no foreign language competence, check here. ☐

NAME OF LANGUAGE(S)	PROFICIENCY								
	CAN PREPARE AND DELIVER LECTURES		CAN Cconverse		HAVE FACILITY TO TRANSLATE TECHNICAL JOURNALS		CAN READ TECHNICAL ARTICLES FOR OWN USE		SOME KNOWLEDGE, BUT CAN'T USE AS A MEDIUM OF COMMUNICATION
	FLUENTLY 1	SUPERFICIALLY 2	FLUENTLY 3	PASSABLY 4	INTO ENGLISH 5	FROM ENGLISH 6	EASILY 7	WITH DIFFICULTY 8	9

75 76 77

19. AREA KNOWLEDGE: List the foreign countries of which you have a knowledge gained by residence, research, or travel.

COUNTRY	TOTAL YEARS RESIDENCE	YEAR LAST VISITED	NATURE OF YOUR KNOWLEDGE

78 79 80

5a 59

20. SOCIETY MEMBERSHIP: Circle the number in front of all societies of which you are a member. For write-ins include only national professional societies and use identifying words in full:

60 61

- 621. AMERICAN CHEMICAL SOCIETY
- 622. AMERICAN INSTITUTE OF CHEMISTS
- 623. AMERICAN INSTITUTE OF CHEMICAL ENGINEERS
- 624. AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
- 648. OTHERS (specify)
- 649. NONE

74 75

21. Please give a mailing or forwarding address through which you can always be reached if different from address on reverse side.

76 77 78 79

C/O ..... Number ..... Street ..... City ..... State ..... Zip Code

DATE PREPARED:

SIGNATURE: (Please Sign Full Name)

SOCIAL SECURITY NO. | | | |

22. If you wish to add to the above information concerning your professional employment(s) or qualifications, please comment below or on an attached sheet, referring to item numbers where appropriate.

SPECIALTIES LIST

FOR USE WITH

NATIONAL REGISTER OF SCIENTIFIC AND TECHNICAL PERSONNEL

This specialties list includes a number of natural and social science specializations within related subfields for use with the 1966 National Register of Scientific and Technical Personnel. The subfields have been grouped under major field headings; i.e., biology, chemistry, physics, etc. In view of the interdisciplinary nature of many science areas, several subfields are presented at the end of this list under the heading Interdisciplinary Specialties. The items listed under the headings Other Specialties and Engineering, while not designed to give detailed specialty coverage, are included to allow for classification in other areas. *To identify the specialties or subfields which may be considered for inclusion into a particular field of science, it will be necessary to scan this entire list.*

Chemistry

Analytical Chemistry

0001—Absorption spectroscopy
0002—Biochemical analysis
0003—Chemical microscopy
0004—Chromatographic analysis
0005—Distillation analysis
0006—Electrochemical analysis
0007—Electron microscopy
0008—Emission spectroscopy
0010—Extraction analysis
0011—Fluorimetry, phosphorimetry, and Raman spectroscopy
0012—Gas analysis
0013—Gravimetry
0014—Magnetic resonance spectroscopy
0015—Mass spectroscopy
0016—Microchemical analysis
0017—Nucleonics and radiochemistry
0018—Qualitative analysis
0019—Titrimetry
0020—X-ray and electron diffraction
0009—Other (specify)

Inorganic Chemistry

0101—Atomic structure
0102—Boron and silicon compounds; asbestos, clay, glass, etc.
0103—Carbon, germanium, lead, tin; includes graphite, etc.
0104—Coordination compounds
0105—"Electron deficient" compounds; boron hydrides, metal alkyls, etc.
0106—Electropositive elements and their compounds (alkalies and alkaline earths, building products, etc.)
0107—Equilibrium and thermodynamic relationships in inorganic systems
0108—Hydrogen and the hydrides; high energy fuels
0110—Inner transition elements
0111—Inorganic materials useful as solid state electronic devices; semiconductors, etc.
0112—Mechanism of inorganic reactions; reaction kinetics
0113—Nomenclature and symbolism
0114—Nonmetals; halogen, oxygen, and nitrogen families, high energy oxidizers
0115—Nuclear chemistry
0116—Solutions and solvent theory; nonbacteriological aspects of water chemistry
0117—Structure of inorganic compounds; crystallography, spectroscopy, etc.
0118—Synthesis of inorganic materials
0119—Theoretical inorganic chemistry; ligand field theory, molecular orbital theory, ionic models, theory of metals, etc.
0120—Transition elements
0109—Other (specify)

Organic Chemistry

0201—Adhesives
0202—Agricultural chemicals
0203—Aliphatic chemistry
0204—Alkaloids
0205—Amino acids
0206—Antibiotics
0207—Aromatic hydrocarbons and derivatives
0208—Carbohydrates
0210—Coal
0211—Dyestuffs
0212—Elastomers and related products
0213—Emulsions
0214—Explosives and rocket fuels
0215—Fluorine compounds
0216—Free radicals
0217—Heterocycles
0218—Hydrogenation
0219—Isotopes, use of
0220—Oils, fats, waxes
0221—Organometallics
0222—Organophosphorus compounds
0223—Petroleum, petrochemicals, etc.
0224—Pharmaceuticals
0225—Phosphorus compounds
0226—Photo products
0227—Plastics and synthetic resins
0228—Protective coatings
0229—Reaction mechanisms
0230—Silicon compounds
0231—Soaps, detergents, surfactants
0232—Stereochemistry
0233—Steroids
0234—Structure of organic molecules
0235—Sulfur compounds
0236—Terpenes and other alicyclics
0237—Textiles and related products
0238—Wood, paper, cellulose
0209—Other (specify)

Related Chemical Specialties

0301—Adsorption and absorption
0302—Chemical separation
0303—Corrosion and preservation
0304—Electrochemical operations
0305—Chemical economics
0306—Fuels and combustion
0307—Fluid flow
0308—Heat transfer
0310—Mass transfer
0311—Materials handling
0312—Measurement and control
0313—Mechanical separation
0314—Mixing
0315—Nuclear processes
0316—Operational analysis
0317—Pilot plant
0318—Plant and process design
0319—Quality control and standards
0309—Other (specify)

0909—Chemistry, other (specify)

Physics

Acoustics

1001—Applied acoustics, instruments and apparatus
1002—Architectural acoustics
1003—Ear and hearing
1004—Electroacoustics
1005—Infrasonics
1006—Mechanical vibrations and shock
1007—Musical instruments and music
1008—Noise
1010—Speech communications
1011—Theory of waves and vibrations
1012—Ultrasonics
1013—Underwater sound
1009—Other (specify)

Atomic and Molecular Physics

1101—Atomic, ionic and molecular beams
1102—Atomic masses and abundance
1103—Atomic structure and spectra
1104—Chemical bonds and structure
1105—Electron paramagnetic resonance
1106—Impact and scattering phenomena
1107—Mass spectroscopy
1108—Molecular structure and spectra
1110—Nuclear magnetic resonance
1109—Other (specify)

Electromagnetism

1201—Antenna theory
1202—Electrical measurements and instruments
1203—Electromagnetic waves
1204—Electromagnetic wave propagation
1205—Electron dynamics
1206—Electron microscopy, ion optics
1207—Gas discharge
1208—Magnetism
1210—Masers and such devices
1211—Microwaves
1212—Physical electronics
1213—Quantum electronics
1214—X-ray interactions
1215—X-ray phenomena
1216—X-ray technology
1209—Other (specify)

Elementary Particles

1301—Cosmic rays
1302—High energy accelerators
1303—High energy phenomena
1304—Particle detectors
1305—Phenomenological computer analysis
1309—Other (specify)

Mechanics

1401—Analytical mechanics
1402—Ballistics and flight dynamics
1403—Elasticity
1404—Friction
1405—High pressure physics
1406—Impact phenomena
1407—Instruments and measurements
1409—Other (specify)

Nuclear Physics

1501—Accelerators, detectors
1502—Neutrons
1503—Nuclear properties
1504—Nuclear reactions and scattering
1506—Nuclear spectroscopy
1507—Radiation effects
1508—Radioactive materials, isotopes
1510—Reactors
1511—Shielding
1509—Other (specify)

BUDGET BUREAU NO. 87-0001
APPROVAL EXPIRES FEBRUARY 28, 1967

Optics

1601—Atmospheric and space optics
1602—Color, colorimetry
1603—Fiber optics
1604—Geometrical optics
1605—Information theory, communications, image evaluation
1606—Infrared phenomena
1607—Interferometry
1608—Lasers
1610—Lenses
1611—Optical instruments, techniques and devices
1612—Optical materials
1613—Photography, illumination
1614—Physical optics
1615—Physiological optics
1616—Properties of thin films
1617—Radiometry, photometry
1618—Spectroscopy
1609—Other (specify)

Physics of Fluids

1701—Aerodynamics
1702—Aerosols
1703—Boundary layer effects
1704—Cavities and jets
1705—Compressible fluid dynamics
1706—Explosion phenomena
1707—High temperature flow
1708—Incompressible fluid dynamics
1710—Magneto fluid dynamics
1711—Plasma physics
1712—Rarefied gas flow
1713—Rheology (incl. plastic flow)
1714—Shock wave phenomena
1715—Structure and properties of fluids
1716—Superfluidity
1717—Transport phenomena, diffusion
1718—Turbulence
1719—Viscosity
1709—Other (specify)

Solid State Physics

1801—Ceramics
1802—Cooperative phenomena
1803—Crystallography
1804—Dielectrics (incl. fluids)
1805—Dislocations and plasticity
1806—Dynamics of crystal lattices
1807—Electrical properties of surfaces and junctions
1808—Electron emission
1810—Ferromagnetism
1811—High polymers and glasses
1812—Internal friction
1813—Lattice effects and diffusion
1814—Luminescence
1815—Optical properties
1816—Para- and diamagnetism phenomena
1817—Photoconductivity and related phenomena
1818—Photoelectric phenomena
1819—Piezo and ferro-electricity
1820—Quantum mechanics of solids
1821—Radiation damage
1822—Resonance phenomena
1823—Semiconductors
1824—Superconductivity
1825—Surface structure and kinetics
1826—Thermal conduction in solid state
1827—Thin films
1809—Other (specify)

Thermal Physics

1R01—Calorimetry
1R02—Heat transmission
1R03—High temperature physics
1R04—Low temperature physics
1R05—Temperature and its measurement
1R06—Thermal properties
1R07—Thermodynamics
1R08—Thermodynamic relations, equations of state
1R10—Thermodynamic tables
1R09—Other (specify)

Other Physics Specialties

1X01—Constants, standards, units, metrology, conversion factors
1X02—Energy conversion problems
1X03—Field theory
1X04—High vacuum techniques
1X05—Magnetohydrodynamics
1X06—Many body theory
1X07—Mathematical physics
1X08—Mossbauer effect
1X10—Physical metallurgy
1X11—Physical properties of materials
1X12—Quantum mechanics
1X13—Radiation and health physics
1X14—Relativity and gravitation
1X15—Statistical mechanics and kinetic theory

1909—**Physics, other (specify)**

Astronomy

X001—Astrometry
X002—Astrophysics
X003—Celestial mechanics
X004—Comets, meteors, interplanetary medium
X005—Cosmology and cosmogony
X006—Design of astronomical instruments
X007—Galaxies
X008—Navigation, geodetic astronomy
X010—Origin of cosmic rays
X011—Photometry of astronomical sources
X012—Physics of the interstellar medium
X013—Planets, satellites
X014—Radio astronomy
X015—Space astronomy
X016—Spectroscopy of astronomical sources
X017—Star systems and statistical astronomy
X018—Stellar energy generation, nucleogenesis, stellar evolution
X019—The sun
X020—Variable stars
X009—Other (specify)

Atmospheric, Lithospheric, and Hydrospheric Specialties

Atmospheric Dynamics, Chemistry, and Physics

2001—Aeronomy
2002—Atmospheric chemistry
2003—Atmospheric electricity
2004—Atmospheric optics and acoustics
2005—Atmospheric thermodynamics
2006—Aurora, airglow
2007—Cloud and precipitation physics
2008—Cosmic rays
2010—Dynamics of atmospheric motion
2011—Interplanetary medium
2012—Planetary atmospheres
2013—Planetary sciences
2014—Radiation
2015—Satellites and deep space probes
2016—Solar-terrestrial relationships
2017—Turbulence and diffusion
2009—Other (specify)

Climatology

2101—Applied climatology
2102—Bioclimatology
2103—Microclimatology
2104—Physical climatology
2105—Statistical climatology
2106—Synoptic climatology
2109—Other (specify)

Synoptic Meteorology

2201—Mesometeorology
2202—Micrometeorology
2203—Numerical analysis and prediction
2204—Observations
2205—Radar meteorology
2206—Weather analysis and forecasting
2209—Other (specify)

Area Specializations

2301—Agricultural meteorology
2302—Air pollution
2303—Aviation meteorology
2304—Engineering meteorology
2305—Hydrometeorology
2306—Marine meteorology
2307—Polar meteorology
2308—Radio meteorology
2310—Tropical meteorology
2311—Satellite meteorology
2309—Other (specify)

Meteorological Instrumentation

2401—Aircraft reconnaissance systems
2402—Automatic data sensing systems
2403—Balloon sounding systems
2404—Radar and radiometric sounding systems
2405—Rocket sounding systems
2406—Sensor design
2407—Weather communication systems
2409—Other (specify)
2909—Meteorology, other (specify)

Geochemistry

3001—Cosmochemistry
3002—General inorganic geochemistry
3003—Isotopes and geochronology
3004—Mineral synthesis and stability relations of minerals
3005—Organic geochemistry
3009—Other (specify)

Geodesy

3101—Geodetic instrumentation
3102—Geodetic surveying
3103—Gravity
3104—Geodetic astronomy; navigation
3109—Other (specify)

Geology

3201—Geology of petroleum deposits
3202—Field geology
3203—Geology of mineral deposits
3204—Stratigraphy
3205—Engineering geology
3206—Structural geology
3207—Petrology
3208—Sedimentology
3210—Mineralogy and crystallography
3211—Geomorphology
3212—Glacial geology
3213—Photogeology
3214—Coal geology
3215—Environmental geology
3216—Geohydrology
3217—Marine geology
3218—Astrogeology
3209—Other (specify)

Paleontology

3301—Micropaleontology
3302—Paleobotany
3303—Paleontology, invertebrate
3304—Paleontology, vertebrate
3305—Palynology
3309—Other (specify)

Solid-Earth Geophysics

3401—Exploration seismology
3402—Exploration geophysics, non-seismic
3403—Geomagnetism and electricity
3404—Geophysical instrumentation
3405—Seismic waves, induced
3406—Seismic waves, natural
3407—Tectonophysics; physical properties of natural materials
3408—Vulcanology (including heat flow)
3409—Other (specify)

Geography

3501—Biogeography
3502—Cultural geography
3503—Economic geography
3504—Geography of resources
3505—Historical geography
3506—Land use
3507—Location theory
3508—Military geography
3510—Physical geography
3511—Political geography
3512—Regional geography (specify region)
3513—Urban geography
3509—Other (specify)

Hydrology

3601—Erosion and sedimentation
3602—Evaporation and transpiration
3603—Glaciology

3604—Ground waters
3605—Precipitation
3606—Quality of water
3607—Snow, ice and permafrost
3608—Soil moisture
3610—Surface waters
3609—Other (specify)

Oceanography

3701—Biological oceanography
3702—Chemical oceanography
3703—Descriptive oceanography
3704—Hydrography
3705—Ocean-bottom processes
3706—Physical oceanography
3707—Plankton
3708—Sea-air interactions
3710—Shore and near shore processes
3711—Underwater sound
3709—Other (specify)

3909—**Earth science specialties, other (specify)**

Mathematics

Algebra

4001—Boolean algebra
4002—Combinatorial analysis
4003—Differential algebra
4004—Fields, rings, algebras
4005—Groups, generalizations
4006—Homological algebra
4007—Lattices
4008—Linear algebra and matrix theory
4010—Order, total and partial
4011—Polynomials
4012—Representation theory
4009—Other (specify)

Analysis and Functional Analysis

4101—Banach spaces and algebras
4102—Calculus of variations
4103—Convexity, inequalities
4104—Difference equations, functional equations
4105—Functions of real variables
4106—Functions of a complex variable
4107—Functions of several complex variables
4108—Hilbert spaces
4110—Integral equations
4111—Integral transforms
4112—Interpolation, approximation
4113—Lie groups and algebras
4114—Measure, integration, area
4115—Operational calculus
4116—Ordinary differential equations
4117—Partial differential equations
4118—Potential theory, subharmonic functions
4119—Series, summability
4120—Set theory
4121—Special functions
4122—Trigonometric series and integrals
4109—Other (specify)

Geometry

4201—Affine geometry
4202—Algebraic geometry
4203—Complex manifolds
4204—Convex domains, extremum problems
4205—Differential geometry, tensor analysis
4206—Euclidean geometry
4207—Finite geometries
4208—Foundations
4210—Integral geometry
4211—Projective, non-Euclidean geometries
4212—Riemannian geometry
4209—Other (specify)

Logic

4301—Applications of logic
4302—Formal and symbolic logic
4303—Foundations of mathematics
4304—Intuitionism
4305—Recursive functions
4309—Other (specify)

Mathematics of Resource Use

4401—Activity analysis
4402—Actuarial mathematics
4403—Biometrics, biostatistics
4404—Control systems
4405—Cryptography
4406—Dynamic programming
4407—Econometrics
4408—Game theory
4410—Information and communication theory
4411—Logistics, military
4412—Operations research, general
4413—Weapons systems evaluation
4414—Theory of the firm
4415—Linear programming
4416—Non-linear programming
4417—Network flow
4418—Queuing
4419—Scheduling
4420—Distribution and transportation
4421—Inventory
4422—Replacement and renewal
4423—System reliability
4424—Adaptive systems
4425—Management gaming
4409—Other (specify)

Number Theory

4501—Algebraic number theory
4502—Analytic number theory
4503—Diophantine problems
4504—Elementary number theory
4505—Geometry of numbers
4509—Other (specify)

Numerical Methods and Computation

4601—Algorithm construction
4602—Analogue systems, coding and programming
4603—Difference and functional equations
4604—Digital computers, operating systems, programming (program preparation, monitoring, debugging)
4605—Digital computers, simulation and gaming
4606—Digital computers, design and translation of artificial languages
4607—Digital computers, machine translation of natural languages
4608—Digital computers, information retrieval
4610—Digital computers, control systems
4611—Digital computers, heuristic programming
4612—Digital computers, design
4613—Eigenvalues
4614—Error analysis
4615—General methods, iteration
4616—Interpolation, approximation, curvefitting
4617—Integral and integro-differential equations
4618—Linear equations, matrices
4619—Nomography, tables
4620—Numerical differentiation, quadrature
4621—Ordinary differential equations
4622—Partial differential equations
4609—Other (specify)

Topology

4701—Abstract spaces
4702—Applications to analysis
4703—Fibre bundles and spaces
4704—Graphs
4705—Homology, cohomology
4706—Homotopy
4707—Manifolds, Kaehler spaces
4708—Mappings
4710—Point-set topology
4711—Topological dynamics
4712—Topological groups
4709—Other (specify)

Probability

4801—Analytic probability theory
4802—Applications of probability
4803—Foundations of probability
4804—Limit theorems
4805—Stochastic processes, general
4806—Markov processes
4807—Theory of generating functions
4808—Time series
4809—Other (specify)

4909—**Mathematics, other (specify)**

Biology

Anatomy

5001—Comparative
5002—Embryology; developmental
5003—Endocrines
5004—Gross
5005—Histological
5006—Neuroanatomy
5007—Pathological
5008—Sense organs
5010—Surgical
5011—Topographic, systemic
5012—Veterinary
5009—Other (specify)

Botany

5101—Algology
5102—Bryology
5103—Cytology
5104—Dendrology
5105—Limnology
5106—Mycology
5107—Nutrition and growth
5108—Phycology
5110—Plant anatomy and morphology
5111—Plant physiology
5112—Taxonomy
5109—Other (specify)

Ecology

5201—Animal ecology
5202—Biological control
5203—Habit influences
5204—Paleoecology
5205—Palynology
5206—Physiological ecology
5207—Plant ecology
5208—Population dynamics
5209—Other (specify)

Entomology

5301—Agricultural
5302—Acarology
5303—Control, chemical
5304—Control, other
5305—Ecological and behavioral
5306—Forest
5307—Insect pests
5308—Insect physiology, morphology, development
5310—Medical
5311—Taxonomy
5309—Other (specify)

Genetics

5401—Animal
5402—Cytogenetics
5403—Human
5404—Microorganisms
5405—Plant
5406—Population studies
5409—Other (specify)

Immunology

5501—Allergies
5502—Antibody formation
5503—Antigens; antibodies
5504—Antigen-antibody reaction
5505—Blood groups
5506—Cell culture
5507—Complement
5508—Hypersensitivity
5510—Immunochemistry
5511—Infection, resistance
5512—Tissue antibodies, auto-antibodies
5513—Transplantation
5514—Vaccines
5509—Other (specify)

Microbiology

5601—Antibiotics
5602—Bacteriology
5603—Bacteriophage
5604—Biologicals
5605—Cell culture
5606—Clinical and diagnostic
5607—Cytology; morphology
5608—Food products
5610—Metabolism
5611—Microbial processes, syntheses
5612—Mycology
5613—Parasitology
5614—Protozoology
5615—Taxonomy
5609—Other (specify)

Nutrition
5701—Amino acids, peptides, proteins
5702—Animal
5703—Atherosclerosis
5704—Cell; tissue culture
5705—Clinical
5706—Digestion
5707—Energy metabolism
5708—Enzymes; coenzymes
5710—Food and feed additives
5711—Food technology
5712—Lipids
5713—Minerals; trace elements
5714—Nutritional diseases
5715—Nutrients; nutrient values
5716—Requirements; deficiencies
5717—Vitamins
5709—Other (specify)

Pathology
5801—Atherosclerosis
5802—Bacteriotoxins
5803—Cardiovascular
5804—Cell; tissue culture
5805—Clinical
5806—Hematology
5807—Immunopathology
5808—Malformations
5810—Oncology; carcinogenesis
5811—Radiation
5812—Veterinary
5809—Other (specify)

Pharmacology
5R01—Autonomic
5R02—Biochemical
5R03—Cardiovascular
5R04—Cellular
5R05—Chemotherapy
5R06—Clinical
5R07—Drug metabolism
5R08—Endocrines
5R10—Neuropharmacology
5R11—Pharmacodynamics
5R12—Psychopharmacology
5R13—Renal
5R14—Toxicology
5R09—Other (specify)

Physiology
5X01—Altitude, environment, stress, space, exercise
5X02—Anesthesiology
5X03—Cardiovascular
5X04—Cell; tissue culture
5X05—Central nervous system
5X06—Electrolyte, water balance
5X07—Endocrines
5X08—Gastrointestinal
5X10—Hematology
5X11—Lipids
5X12—Metabolism
5X13—Muscle
5X14—Neurophysiology
5X15—Radiation
5X16—Renal
5X17—Reproduction
5X18—Respiration
5X19—Temperature regulation
5X20—Transport
5X09—Other (specify)

Plant Pathology
6001—Bacterial
6002—Crop diseases
6003—Disease control, chemical
6004—Disease control, other
6005—Extension pathology
6006—Fungal
6007—Host resistance
6008—Nematodal
6010—Non-infectious diseases
6011—Viral
6009—Other (specify)

Virology
6101—Arbor viruses
6102—DNA virus replication
6103—Enteric viruses
6104—Interferon, interference
6105—Latency
6106—Neurotropic viruses
6107—Pox viruses
6108—Respiratory viruses
6110—RNA virus replication
6111—Tumor viruses
6112—Vaccines
6109—Other (specify)

Zoology
6201—Cytology
6202—Development and growth
6203—Herpetology
6204—Ichthyology
6205—Invertebrate
6206—Limnology
6207—Mammalogy
6208—Ornithology
6210—Parasitology
6211—Protozoology
6212—Taxonomy
6213—Vertebrate
6209—Other (specify)

Agronomy
6301—Crop breeding, hybridization
6302—Crop management
6303—Field crops
6304—Pasture and forage crops
6305—Seed analysis
6306—Turf and ornamental crops
6307—Weed control
6309—Other (specify)

Animal Husbandry
6401—Large animal
6402—Poultry
6403—Small animal
6409—Other (specify)

Fish and Wildlife
6501—Fishery Management
6502—Game Management
6503—Habitat influences
6504—Population dynamics
6509—Other (specify)

Forestry
6601—Forestry management, silviculture
6602—Park and recreational management
6603—Products
6604—Protection
6605—Watershed management
6609—Other (specify)

Range Management
6701—Conservation management
6702—Range science
6709—Other (specify)

Horticulture
6801—Breeding, hybridization
6802—Floriculture
6803—Fruits
6804—Vegetables
6809—Other (specify)

Other Bio-Medical Specialties
6901—Animal behavior
6902—Bioanalysis
6903—Bioinstrumentation
6904—Cardiology
6905—Dentistry
6906—Epidemiology
6907—Exobiology
6908—Gastroenterology
6910—Industrial hygiene and occupational health
6911—Infectious diseases
6912—Internal medicine
6913—Pediatrics
6914—Preventive medicine
6915—Psychiatry
6916—Public health
6917—Radiation biology
6918—Surgery
6919—Veterinary medicine
6909—Other (specify)

5909—**Biology, other (specify)**

Psychology

Clinical Psychology
7001—Behavior problems
7002—Community mental health
7003—Crime and delinquency
7004—Experimental psychopathology
7005—Group therapy
7006—Individual diagnosis
7007—Mental deficiency
7008—Objective tests
7010—Projective techniques
7011—Psychotherapy
7012—Speech pathology
7009—Other (specify)

Counseling and Guidance
7101—Educational counseling
7102—Nondirective therapy
7103—Personal adjustment
7104—Rehabilitation
7105—Vocational counseling
7109—Other (specify)

Developmental Psychology
7201—Childhood and adolescence
7202—Infancy
7203—Maturity and old age
7204—Nursery and pre-school
7209—Other (specify)

Educational Psychology
7301—Educational measurement
7302—Programmed learning
7303—School adjustment
7304—School learning
7305—Special education
7306—Student personnel
7307—Teacher personnel
7309—Other (specify)

7401—**Engineering Psychology**

General Psychology
7501—History and biography
7502—Theory and systems
7509—Other (specify)

Industrial and Personnel Psychology
7601—Employee and executive training and development
7602—Employee morale and attitudes
7603—Job analysis and position classification
7604—Labor-management relations
7605—Market research, advertising
7606—Organizational behavior
7607—Performance evaluation, criterion development
7608—Recruiting, selection, placement
7610—Safety research and training
7611—Salary and pay plans
7609—Other (specify)

Personality
7701—Development
7702—Measurement
7703—Personality and body
7704—Personality and learning
7705—Personality and perception
7706—Personality theory
7707—Structure and dynamics
7709—Other (specify)

7801—**School Psychology**

7909—**Psychology, other (specify)**

Sociology

Socio-Cultural Theory
8001—General theory
8002—Symbolic interactionism
8003—History of social thought
8009—Other (specify)

Methodology
8201—Computer techniques
8202—Experimental sociology
8203—Field data collection
8204—Measurement and index construction
8205—Model building
8206—Mathematical sociology
8207—Social survey design and methods
8208—Statistical analysis
8209—Other (specify)

Demography and Population
8301—Migration
8302—Labor force
8303—Population characteristics
8304—Population trends
8305—Vital statistics
8309—Other (specify)

Rural-Urban Sociology

8401—Community studies
8402—Human ecology
8403—Rural sociology
8404—Urban sociology
8409—Other (specify)

Social Change and Development

8501—Invention and innovation
8502—Social control
8503—Social process
8504—Social mobility
8505—Socio-economic development
8506—Socio-political change
8509—Other (specify)

Social Organization, Structure, and Institutions

8601—Bureaucracy
8602—Cultural—the Arts
8603—Educational
8604—Family
8605—Industrial
8606—Intergroup, including race and ethnic
8607—Legal
8608—Medical
8610—Occupational
8611—Political
8612—Religious
8613—Scientific
8614—Stratification
8609—Other (specify)

Social Problems, Social Disorganization

8701—Criminology
8702—Deviance
8703—Poverty and dependence
8704—Social conflict and accommodation
8709—Other (specify)

8909—Sociology, other (specify)

Anthropology

Please use four-digit codes in reporting specific specialties. A number of specialties appropriate to more than one area, have only two digits. Indicate your appropriate areas and specialties as in the following examples: If your area is ethnology (OX—) and your specialization is museology (__95), use OX95; if your area is archeology (OR__) and your specialization is museology (__95), use OR95; if your area is physical anthropology (07__) and your specialization is osteology, which is not included in the list, use other (specify) (__99), and write in 0799—osteology.

0R—Archeology
0X—Ethnology
04—History of anthropology
05—Methodology
06—Anthropological linguistics
07—Physical anthropology
08—Social/Cultural anthropology

Specialties

__90—Anthropological folklore
__91—Cultural ecology
__92—Economic anthropology
__93—Ethnomusicology
__94—Human paleontology
__95—Museology
__96—Primatology
__97—Psychological anthropology
__99—Other (specify)

RR09—Anthropology, other (specify)

Linguistic Specialties

Applications to Language Teaching

R001—Language aptitude and proficiency testing
R002—Language laboratories
R003—Linguistics in language-textbook construction
R004—Linguistics in second-language pedagogy
R005—Linguistics in the teaching of native-language skills
R006—Linguistics in the training of language teachers
R007—Use of contrastive structural comparisons
R009—Other (specify)

Descriptive Linguistics

R101—Contrastive analysis
R102—Dialectology
R103—Field methods
R104—Lexicography
R105—Morphology
R106—Phonology
R107—Structural analysis
R108—Structure of specific languages
R110—Study of writing systems
R111—Syntax
R109—Other (specify)

General Linguistics

R201—Children's language
R202—Language contact
R203—Mathematical models in linguistics
R204—Statistical studies of language
R205—Study of meaning
R206—Theory of grammar
R207—Typology and language universals
R209—Other (specify)

Historical and Comparative Linguistics

R301—Comparison within a particular group of languages
R302—Etymology
R303—History of specific languages
R304—Reconstruction, subgrouping, and processes of language change
R309—Other (specify)

Language in Relation to Other Fields

R401—History of linguistics
R402—Interrelationships of language and other cultural phenomena
R403—Linguistics and literature
R404—Physiology of speech and hearing
R405—Psycholinguistics
R406—Sociology of language
R409—Other (specify)

Language Policies

R501—Language standardization
R502—Problems of linguistic minorities
R503—Translation of technical terminology
R504—Use of vernacular in education
R509—Other (specify)

Literacy and Writing Systems

R601—Devising of writing systems
R602—Materials for new literates
R603—Teaching of literacy
R609—Other (specify)

Mechanized Applications

R701—Automated linguistic analysis
R702—Linguistic problems of machine translation
R709—Other (specify)

Phonetics

R801—Acoustic phonetics
R802—Articulatory and instrumental phonetics
R809—Other (specify)

R909—Linguistics, other (specify)

Economics

General Economic Theory

9001—General equilibrium (including general welfare economics)
9002—Economic fluctuations
9003—Economic forecasting
9005—Methodology
9006—Microeconomic theory
9009—Other (specify)

Economic History; History of Thought

9101—Economic history
9102—History of thought
9109—Other (specify)

Economic Systems; Development and Planning

9201—Economic systems
9202—Economic planning
9203—National economic development
9209—Other (specify)

Economic Statistics

9301—Econometrics
9302—Input-output and programming methods
9303—Social accounting
9304—Statistical methods
9309—Other (specify)

Monetary and Fiscal Theory and Institutions

9401—Central government finance; fiscal policy
9402—Commercial banking and other short-term credit
9403—Consumer finance and mortgage credit
9404—Monetary theory and policy
9405—State and local finance
9409—Other (specify)

International Economics

9501—Foreign exchange, international finance
9502—Imperialism; colonialism
9503—Trade; commercial policy
9509—Other (specify)

Business Finance and Administration; Marketing and Accounting

9601—Accounting
9602—Advertising and sales
9603—Business administration
9604—Business finance
9605—Business organization
9606—Insurance (private)
9607—Investment and security markets
9608—Managerial economics and industrial management
9610—Marketing
9609—Other (specify)

Industrial Organizations; Government and Business; Industry Studies

9701—Industrial organization and market structure; business, price, and related policies
9702—Policies concerning competition and monopoly; government ownership and operation; wartime operations and control
9703—Public utilities; transportation, and service industries
9704—Studies of manufacturing, construction, and service industries
9709—Other (specify)

Land Economics

9801—Forestry or fishery economics
9802—Economic geography
9803—Natural resources
9809—Other (specify)

Agricultural Economics

9R01—Production economics
9R02—Farm management
9R03—Agricultural finance and marketing
9R04—Processing of agricultural products
9R09—Other (specify)

Labor Economics

9X01—Labor markets
9X02—Public policy; role of government
9X03—Trade unions; collective bargaining; labor management relations
9X04—Wages, hours, condition of employment

9X05—Manpower planni·
9X09—Other (specify)

Population; Welfare Programs; Standards of Living

9901—Consumer economics; level and standards of living
9902—Population; migration
9903—Public housing
9904—Welfare programs and social security
9999—Other (specify)
9909—Economics, other (specify)

Interdisciplinary Specialties

Agricultural and Food Chemistry

X101—Alcoholic beverages
X102—Anim·l and vegetable fats, oils
X103—Anin.. feeds
X104—Bakery and confectionery products
X105—Cereals, carbohydrates
X106—Fertilizer processing
X107—Flavors
X108—Food and feed additives
X110—Fruits, vegetables, juices
X111—Meat, fish, dairy, and poultry products
X112—Microorganisms; bacteria, yeasts, algae, mold
X113—Nonalcoholic beverages
X114—Pesticides; insecticides, herbicides, fungicides
X115—Plant growth regulators
X109—Other (specify)

Biochemistry

X201—Amino acids, peptides, proteins
X202—Antimetabolites
X203—Biochemical mechanisms
X204—Carbohydrates
X205—Clinical chemistry
X206—Cyto-histochemistry
X207—Endocrines
X208—Enzymes, coenzymes
X210—Fermentation
X211—Intermediary metabolism, biosynthesis
X212—Lipids (phospho-, glyco-, fats, oils)
X213—Medicinal chemistry
X214—Microbial processes, syntheses
X215—Microbiological chemistry
X216—Nucleic acids (purines, pyrimidines)
X217—Oncology, carcinogenesis
X218—Photosyntheses
X219—Physical biochemistry
X220—Steroids
X221—Technology, methodology
X222—Vitamins
X209—Other (specify)

Biophysics

X301—Bioacoustics
X302—Bioelectricity
X303—Bio-optics
X304—Biosystems, control communications
X305—Biothermics and bioenergetics
X306—Biotransport, membrane physics
X307—Cellular
X308—Crystallography
X310—Methodology
X311—Molecular
X309—Other (specify)

Electronics

X401—Electron ballistics
X402—Electron tubes
X403—Electronic device circuitry
X404—Electronics instrumentation
X405—Emission
X406—Gas devices
X407—Gaseous electronics
X408—Semiconductor devices
X410—Solid state electronics
X409—Other (specify)

Experimental, Comparative and Physiological Psychology

X501—Animal behavior
X502—Animal learning
X503—Apparatus design and evaluation
X504—Audition
X505—Autonomic functions
X506—CNS functions
X507—Communications research, information theory
X508—Electroencephalography
X510—Feeling and emotion
X511—Human learning
X512—Motivation
X513—Motor skills
X514—Perception
X515—Psychophysics
X516—Sensory processes
X517—Symbolic processes, problem solving
X518—Vision
X509—Other (specify)

Physical Chemistry

X601—Catalysis and surface chemistry
X602—Chemical kinetics
X603—Colloid chemistry
X604—Crystal structure
X605—Determination of physical constants
X606—Electrochemistry
X607—Flames and explosives
X608—Fused salt
X610—Gaseous state
X611—High pressure chemistry
X612—High temperature chemistry
X613—Ion exchange and applications
X614—Liquid state and solutions; electrolytes and nonelectrolytes
X615—Low temperature studies
X616—Molecular dynamics
X617—Molecular energy levels and geometry
X618—Nuclear chemistry
X619—Photochemistry and energy transfer
X620—Polymer chemistry
X621—Quantum and valence theory
X622—Radiation chemistry
X623—Solid state chemistry
X624—Thermodynamics, thermochemistry, homogeneous chemical and phase equilibria
X609—Other (specify)

Psychometrics

X701—Experimental design
X702—Factor analysis
X703—High-speed computers
X704—Mathematical models
X705—Test construction, validation
X706—Test theory, scale analysis
X709—Other (specify)

Soil Specialties

X801—Fertility, management
X802—Soil microbiology
X803—Soil chemistry
X804—Soil conservation
X805—Soil genesis, classification and mapping
X806—Soil mechanics and engineering
X807—Soil mineralogy
X808—Soil physics
X809—Other (specify)

Social Psychology

XR01—Attitudes
XR02—Collective behavior and social movements
XR03—Cultural deprivation
XR04—Culture and personality
XR05—Group interaction
XR06—Leadership
XR07—Public opinion
XR08—Reference groups
XR10—Role behavior
XR11—Social perception
XR12—Symbolic communication
XR09—Other (specify)

Statistics

2801—Analytical statistics
2802—Decision theory, sequential analysis
2803—Design and analysis of experiments
2804—Estimation and testing, parametric
2805—Multivariate analysis
2806—Non-parametric methods
2807—Quality control
2808—Sampling techniques
2810—Survey methods; including forms design, data collection and data processing
2811—Theory of statistical inference
2812—Time series analysis
2809—Other (specify)

Other Specialties

XX01—Abstracting
XX02—Cartography
XX03—Code development
XX04—Compiling and editing
XX05—Education
XX06—Fine and applied arts
XX07—History
XX08—History of science, social science, and mathe··ics
XX··—Home ·cor ···cs
XX11—Indexing
XX12—Information retrieval
XX13—Information system design
XX14—Journalism
XX15—Law, jurisprudence
XX16—Library and archival science
XX17—Literature of science, social science, and mathematics
XX18—Methodology of second language teaching
XX19—Music
XX20—Nomenclature
XX21—Patent law
XX22—Philosophy
XX23—Photogrammetry
XX24—Political science
XX25—Project appraisal and control
XX26—Public administration
XX27—Speech
XX28—Tariffs
XX29—Teaching of science, social science, and mathematics
XX30—Translation
XX09—Other (specify)

Engineering

X901—AERONAUTICAL AND ASTRONAUTICAL ENGINEERING
X902—AGRICULTURAL ENGINEERING
X903—ARCHITECTURAL ENGINEERING
X904—CERAMIC ENGINEERING
X905—CHEMICAL ENGINEERING
X906—CIVIL ENGINEERING
X907—CONSTRUCTION ENGINEERING
X908—ELECTRICAL ENGINEERING
X910—ELECTRONIC ENGINEERING
X911—ENGINEERING MECHANICS
X912—ENGINEERING GENERAL
X913—ENGINEERING PHYSICS
X914—ENGINEERING SCIENCE
X915—GEOLOGICAL ENGINEERING
X916—GEOPHYSICAL ENGINEERING
X917—INDUSTRIAL ENGINEERING
X918—MATERIALS ENGINEERING
X919—MECHANICAL ENGINEERING
X920—METALLURGICAL/PHYSICAL METALLURGY ENGINEERING
X921—MINERAL ENGINEERING
X922—MINING/MINING GEOLOGY ENGINEERING
X923—NAVAL ARCHITECTURAL/MARINE ENGINEERING
X924—NUCLEAR ENGINEERING
X925—PETROLEUM/PETROLEUM REFINING ENGINEERING
X926—SANITARY ENGINEERING
X927—TEXTILE ENGINEERING
X928—TRANSPORTATION ENGINEERING
X929—WELDING ENGINEERING
X909—ENGINEERING, OTHER (specify)

APPENDIX D

Subfields Included in Each Scientific and Technical Field

Chemistry

Analytical chemistry
Inorganic chemistry
Organic chemistry
Related chemical specialties
Agricultural and food chemistry
Biochemistry
Physical chemistry
Chemistry, other

Earth sciences

Geochemistry
Geodesy
Geology
Paleontology
Solid-earth geophysics
Geography
Hydrology
Oceanography
Atmospheric, lithospheric, and hydrospheric specialties, other

Meteorology

Atmospheric dynamics, chemistry, and physics
Climatology
Synoptic meteorology
Area specializations
Meteorological instrumentation
Meteorology, other

Physics

Acoustics
Atomic and molecular physics
Electromagnetism
Elementary particles
Mechanics
Nuclear physics
Optics
Physics of fluids
Solid state physics
Thermal physics
Other physics specialties
Astronomy
Electronics
Physics, other

Mathematics

Algebra
Analysis and functional analysis
Geometry
Logic
Mathematics of resource use
Number theory
Numerical methods and computations
Topology
Probability
Mathematics, other

Agricultural sciences

Agronomy
Animal husbandry
Fish and wildlife
Forestry
Range management
Horticulture
Soil specialties

Biological sciences

Anatomy
Botany
Ecology
Entomology
Genetics
Immunology
Microbiology
Nutrition
Pathology
Pharmacology
Physiology
Plant Pathology
Virology
Zoology
Other bio-medical specialties
Biophysics
Biology, other

Psychology

Clinical psychology
Counseling and guidance
Developmental psychology
Educational psychology
Engineering psychology
General psychology
Industrial and personnel psychology
Personality
School psychology
Experimental, comparative, and physiological psychology
Psychometrics
Social psychology
Psychology, other

Statistics

Statistics

Economics

General economic theory
Economic history; history of thought
Economic systems; development and planning

Economics—Continued

Economic statistics

Monetary and fiscal theory and institutions

International economics

Business finance and administration; marketing and accounting

Industrial organizations; government and business; industry studies

Land economics

Agricultural economics

Labor economics

Population; welfare programs; standards of living

Economics, other

Sociology

Socio-cultural theory
Methodology
Demography and population
Rural-urban sociology
Social change and development
Social organization, structure, and institutions
Social problems, social disorganization
Sociology, other

Anthropology

Archeology
Ethnology
History of anthropology
Methodology
Anthropological linguistics
Physical anthropology
Social/cultural anthropology
Anthropology, other

Linguistics

Application to language teaching
Descriptive linguistics
General linguistics
Historical and comparative linguistics
Language in relation to other fields
Language policies
Literacy and writing systems
Mechanized applications
Phonetics
Linguistics, other

Other

Other specialties
Engineering

APPENDIX E

Language Family List Used by the National Register in 1966

Indo-European

Indic

Hindi-Urdu
Bengali
Gujerati
Singhalese
Marathi
Oriya
Panjabi
Indic, other

Iranian

Persian
Pashtu
Kurdish
Iranian, other

Balto-Slavic

Baltic
(Lithuanian and Lettish)
Russian
Polish
Czech and Slovak
Serbo-Croatian
Bulgarian
Ukrainian
Slavic, other

Romance
