Identifiers- \*California

San Joaquin Delta College (California), planning on an enrollment increase of more than 107 annually, has estimated its minimum facility needs for an enrollment of approximately 7500 students by 1972. The gross cost per square foot is expected to be \$25.00 for general construction and \$38.50 for special construction. For an estimated total of 753,541 square feet, the total cost would come to \$19,681,000, to be raised by bond issue. Site development, equipment, fees, and a reserve fund would bring the total to \$27,850,000. The tax rate to liquidate the bond issue over 25 years would average 11.24 (never rising above 11.94). For two years after passage of the bond issue (1970-72), an average tax rate of 12.24 would have to be levied to lease facilities while the new campus was being built, with an average rate of 11.8 for bond interest and redemption. Beginning with 1972-73, however, when the college moves to the new campus, the tax rate for such facilities would average 11.24, an increase over the 1968-69 rate of only 1.34. This average rate of 11.24 from 1972-73 contrasts with the increasing rate to lease temporary facilities, which will have risen by that year to 13.54. Tax rate tables are appended. (HH)

A PRELIMINARY APPRAISAL OF THE NEEDS FOR AND MEANS OF OBTAINING THE NECESSARY COLLEGE FACILITIES AT A MINIMAL COST TO THE TAXPAYER

EDUZ5586

A REPORT MADE TO THE BOARD OF TRUSTEES
AT THE MEETING OF
OCTOBER 15, 1968

ED025258

Julio L. Bortolazzo, President and Superintendent San Joaquin Delta Junior College District 3301 Kensington Way Stockton, California 95204

TO:

Members of the Board of Trustees

FROM:

Julio L. Bortolazzo, President and Superintendent

A PRELIMINARY APPRAISAL OF THE NEEDS FOR AND MEANS OF OBTAINING THE NECESSARY COLLEGE FACILITIES AT A MINIMAL COST TO THE TAXPAYER

Attached is a preliminary appraisal of the needs for and means of obtaining the necessary college facilities at a minimal cost to the taxpayer.

#### **RECOMMENDATION:**

The complete financial report will be presented to the Board of Trustees at the meeting on November 12, 1968. No action by the Board is recommended at this time.

# A PRELIMINARY APPRAISAL OF THE NEEDS FOR AND MEANS OF OBTAINING THE NECESSARY COLLEGE FACILITIES AT A MINIMAL COST TO THE TAXPAYER.

San Joaquin Delta College enrolled over 5,400 day students this fall, an increase of 14.3% over the corresponding figure for 1967. While this rate of increase may be unusual, an annual rate of increase of only 10% will mean over 7,500 day students in the fall of 1972; 7% will mean the fall of 1973. It is therefore apparent that decisions must be made <u>now</u> relative to physical facilities to to handle these students. Decisions made now, can, if all goes well, be translated into permanent physical facilities by the fall of 1972. Any delay in decision means a corresponding delay in completion of facilities. Four years to plan, advertise, award contracts, construct, inspect, and accept physical facilities of the magnitude being considered here is, in fact, optimistic.

The faculty and staff have estimated, using the junior college space and utilization standards furnished by the State as a guide, that the following are the minimum adequate facilities required for 7,500 students on a new campus:

	Gross Square Feet
Mathematics & Engineering	19,786
Biological & Physical Sciences	51,638
Communications (Incl. Reading & Writing Labs	33,465

	Gros	s Square Feet
Business		29,016
Social Science		19,065
Health Sciences		21, 125
Physical Education		79, 206
Arts & Letters		40,680
Technical, Industrial (Incl. Agriculture)		135, 360
Library (Incl. Branches)		101, 513
Forum		11,664
Tutorial Centers		9,000
Cafeteria and Student Centers		90,425
Administration		11,288
Student Personnel (Incl. Registrar)		10,425
Warehouse & Maintenance		27,504
	Sub-Total:	691, 160
Performing Arts Complex [Auditorium (1,500 seat) Little Theater (425 seat)		
Drama teaching facilities]	,	62,381
	TOTAL:	753, 541

Cost per gross square foot for construction including fixed equipment (lab tables, millwork, etc.) for large jobs going to bid in 1970 are estimated at \$25.00 for general construction and \$38.50 for auditoriums, theaters, etc. The net cost of construction can be estimated as follows:

\$17,279,000	=	\$25.00	x	691, 160
2,402,000	=	\$38.50	x	62,381
\$19,681,000	=	TOTAL		

Based on experience factors, an approximate construction budget can be developed:

Cost of buildings including fixed equipment \$19,681,000 Cost of site development including utilities, storm & sanitary sewers, Physical Education fields, paving and lighting of parking lots, and landscaping. [13.4% of project] 3,932,000 Movable equipment needed in addition to that acquired by lease-purchase [3.6%] 1,000,000 Fees (Architects, inspectors, state office, engineers, etc.) [8%] 2,228,000 Prudent reserve [3.6%] 1,009,000

TOTAL \$27,850,000

Capital reserve on hand \$5,000,000

Estimated outside assistance:

Jr. College Const. Act of 1967 (State) \$2,000,000

Federal Aid \$1,000,000

TOTAL \$8,000,000

Needed to be raised by bond issue:

This figure can be compared to the \$22,794,000 bond issue submitted the electorate in 1966.

Attached to this paper as Enclosure [1] is a schedule based on a bond issue totaling \$19,850,000 repaid over a 25 year period. It will be noted on the first page that the tax rate required in any given year for bond interest and redemption, never exceeds 11.9¢.

State Law (Education Code, Section 25541.5) permits the District to continue to levy a tax for leasing facilities three years after successful passage of a bond issue. It will also be noted that the present (1968-69) tax rate for leasing facilities is 9.9¢. If the bond issue is passed in 1968-69, there will be two years (1970-71, 1971-72) during which the taxpayer will be paying an average rate of 12.2¢ for leasing facilities for the growing college during construction of the new permanent campus plus an average of 11.8¢ for bond interest and redemption. However, beginning in 1972-73, the year the college moves into the new campus, the taxpayer will find himself paying only an average of 1.3¢ more than he is paying in 1968-69 for junior college facilities. Enclosure [2] shows the increase in taxes per month and per year for homes of a variety of values.

The alternative to a successful bond election is to continue to make the best of an increasingly bad situation on the Kensington Way campus. Enclosure [3] indicates that in such an event it will be necessary to increase the tax rate for leasing facilities progressively over the years and that the tax rate by 1972-73 will

have reached 13.5¢ which is 1.9¢ more than the tax rate for facilities in that year had the bond issue passed. Enclosure [4] indicates what this difference means in terms of taxes not levied in 1972-73 per year for homes of a variety of values.

The contrast emphasizes the soundness of issuing bonds to construct a permanent campus. A tax rate of 11.9¢ or less from 1972-73 will pay for a permanent district owned facility while an increasing tax rate beginning at 13.5¢ in 1972-73 will provide only makeshift and crowded facilities in which the district is accumulating no equity.

To Summarize: The provision of adequate facilities on the Pacific Avenue campus by the fall of 1972 indicates a bond issue in the immediate future of \$19,850,000. (This figure contrasts with the \$22,794,000 bond issue submitted in 1966.) The tax rate to liquidate the \$19,850,000 bond issue over 25 years would average 11.2¢ and would never rise above 11.9¢. For two years after passage of the bond issue (1970-71, 1971-72) an average tax rate of 12.2¢ would need to be levied to lease facilities for the college while the new permanent campus was being constructed and an average rate of 11.8¢ for bond interest and redemption. However, beginning with 1972-73, the year the college moves to the new campus, the tax rate

of 11.2¢, an increase over the 1968-69 rate of only 1.3¢. This average rate of 11.2¢ from 1972-73 contrasts with the increasing rate to lease temporary facilities which will have risen by that year to 13.5¢.
