LISTING  
OF  
FOOD SERVICE EQUIPMENT

NATIONAL SANITATION FOUNDATION  
TESTING LABORATORY

JANUARY 1, 1968  
ANN ARBOR, MICHIGAN

Annual authorization to display the nSf Seal on equipment is granted only when, following laboratory and plant evaluation, the equipment is found to be in compliance with the adopted NSF Standards, Basic or Special Criteria.

Plant and laboratory evaluations are conducted annually, thereby providing assurance that Listed equipment complies on a continuing basis with the NSF Standards and Criteria. Equipment evaluations are conducted jointly with official health agency personnel whenever possible in order to achieve a better understanding and relationship between industry, public health and the Foundation.

Equipment bearing the nSf Seal should conform in all respects to the established Standards or Criteria.

Official health agencies are encouraged to periodically assure themselves that equipment, in their locale, does meet these requirements.

The nSf Seal and Listing Program has been developed and maintained to assist the professional public health worker and industry in achieving a common goal—that of affording the public, the safeguards necessary for the protection of their health.

HISTORY AND PURPOSE  
OF THE  
NATIONAL SANITATION FOUNDATION

In 1944, a small group of industrial and public health leaders were discussing mutual problems involving sanitation. They realized that more solutions to modern sanitation problems affecting industry and the public health could be developed through mutual understanding and cooperative action than through ordinances, inspections and law enforcement alone.

It occurred to them that great strides could result from the creation of an independent but authoritative liaison organization which would be a clearing house through which business and industry and health authorities could work together for the solution of their common problems and for the common good.

They foresaw that, through such an organization, they could jointly seek new facts in sanitary science to bring it up to date with technological advances of industry and with modern problems of the health officer in the field.

They could sponsor educational programs and sanitation services which would win everyone's cooperation in a nationwide program designed to promote superior sanitation in modern products and services, and in the daily lives of the people.

Thus was born the National Sanitation Foundation.

The Foundation is a non-profit, non-commercial organization seeking solutions to all problems involving the environment. It is dedicated to the prevention of illness, the promotion of health, and the enrichment of the quality of American living through improvement of the environment.

Distinguished representatives of the public health profession, of business and industry, and of the public serve on its Board of Trustees, Council of Public Health Consultants, Industrial Advisory Board and various committees.

The National Sanitation Foundation fulfills the important purpose of arranging for a common meeting ground where industry and public health may discuss and solve common problems. In 1948 the first National Sanitation Foundation clinic was held at the Headquarters of the Foundation in Ann Arbor for the purpose of charting the course which the Foundation would follow. Five specific recommendations, outlined herein, came out of the 1948 clinic on which the National Sanitation Foundation has attempted to develop its program.

1. BASIC RESEARCH: The need for an enlarged research program in the field of sanitation was recognized by the clinic as pressing. Some of the research programs in which the National Sanitation Foundation has engaged, with the support of industry and public health, since 1948 include dishwashing studies, research on the cleanability of surfaces, automatic clothes washer studies, plastic pipe for potable water uses, accelerated material and finish testing and evaluation, and many others.
2. STANDARDS: The need for uniform equipment standards was pointed out by both industry and public health groups. Eleven National Sanitation Foundation sanitation Standards and two Criteria have been developed relating to food equipment, and products complying with the provisions of these Standards are Listed herein.
3. TESTING LABORATORY: The need for an independent testing laboratory where sanitation methods, materials and equipment may be evaluated objectively has been expressed many times by industry and public health. The 1948 clinic emphasized that such a laboratory where tests may be made and, when merited, approval given will serve as a valuable contribution to the improvement of sanitation throughout the country. The National Sanitation Foundation Testing Laboratory was established in 1952 and is available to serve industry and public health sanitation interests.

4. SEAL OF IDENTIFICATION: A Seal or some means of identifying items of equipment or devices meeting high standards of sanitary significance was specified, by the clinic to be an urgent need. Following the establishment of the National Sanitation Foundation Testing Laboratory, an official NSF Seal was adopted and may be authorized for use by industry, on equipment found to conform with National Sanitation Foundation Standards. The manufacturers listed in this publication have been authorized by the Board of Directors of the National Sanitation Foundation Testing Laboratory to use the National Sanitation Foundation Testing Laboratory Seal on equipment complying with published Standards.
5. EDUCATION: Only through an adequate program of Education is it possible to distribute the results or products of research to public health, business and the public. The development of effective means of education calls for research and wide spread tests of methods and materials. A continuing program in the development of materials has been and is one of the main efforts of the Foundation.

In these five important areas the National Sanitation Foundation will strive to continue serving industry and public health in making a better environment for all people.

#### WHAT IS THE NATIONAL SANITATION FOUNDATION?

It is a non-commercial, non-profit making organization seeking solutions to all problems involving the environment. It is dedicated to the prevention of illness and the improvement of quality of living through a better environment. It sponsors or conducts objective research to find improved sanitation methods and to determine facts. These studies are clearing up uncertainties regarding what is detrimental to health. They are providing an authoritative basis for the establishment

of minimum sanitation standards for equipment, products, and devices that are generally acceptable to health authorities. It maintains regular contacts with health workers throughout the nation to learn their needs for studies, and to keep them informed of the Foundation's findings.

#### WHAT IS THE NATIONAL SANITATION FOUNDATION TESTING LABORATORY?

The National Sanitation Foundation Testing Laboratory is a separate non-profit corporation established to carry on research in the field of sanitation and is wholly owned by the National Sanitation Foundation. It also conducts regular inspections and periodic testing of products of manufacturing plants authorized by its Board of Trustees to use the NSF Seal. This is for the purpose of determining that the devices or products to which the NSF Seal has been attached meet either the applicable National Sanitation Foundation Standard or the standard set by the special testing of any product or device to which the application of the Seal has been approved following such testing. The Testing Laboratory is authorized to make charges for services rendered. Such charges are designed to cover operating costs.

#### HOW MAY A MANUFACTURER APPLY FOR THE USE OF THE NATIONAL SANITATION FOUNDATION TESTING LABORATORY SEAL AND FOR LISTING?

1. A manufacturer, who is convinced that equipment being constructed by his company is covered by one of the published National Sanitation Foundation Standards, and that such equipment is being, or can be, fabricated in conformity with the applicable Standard, may write to the Executive Director of the National Sanitation Foundation Testing Laboratory Headquarters, 2355 West Stadium Blvd., Ann Arbor, Michigan, making application for inspection of his fabrication facilities and equipment in various stages of construction.

2. The cost of the testing and examination of equipment and fabrication facilities will be in accordance with the Policy Statement Governing the Use of nSf Seals of the National Sanitation Foundation Testing Laboratory. Such charges are nominal and are designed to cover the cost of operation and "listing" Services.
3. If the results of the testing and examination of equipment and fabrication facilities are favorable, and the construction of equipment can be expected to conform to the National Sanitation Foundation Standards, a report will be submitted to the Board of Directors of the National Sanitation Foundation Testing Laboratory. This Board will be requested to act authorizing the use of the nSf Seal by the "listed" manufacturer under the usual terms.
4. The terms under which the right to use the nSf Seal is awarded require at least annual inspection of the manufacturing plant and annual re-inspection of equipment for compliance with the published Standards at nominal stipulated cost. Continued use of the nSf Seal depends upon continued maintenance of conformity with the applicable Standard.

HOW MAY A MANUFACTURER SUBMIT A DEVICE OR PRODUCT FOR TESTING?

1. A manufacturer who is convinced that he has a device or product of special value in the protection of health and general improvement of sanitation and who wants supporting evidence or desires "Listing" should write to the Executive Director of the National Sanitation Foundation Testing Laboratory, Headquarters, 2355 West Stadium Boulevard, Ann Arbor, Michigan, giving full details about his device or products and its applications. This should be accompanied by such evidence as he may have as to its specific value. He may request an estimate on the cost of testing the product with a view to securing the right to use the nSf Seal.

2. If the Executive Director of the National Sanitation Foundation Testing Laboratory is convinced that the device or product has practical applications in the sanitation field and may prove to have merit, he will prepare a plan or protocol for testing and submit it to the National Sanitation Foundation Joint Committee on Food Equipment Standards or to a special committee if the device or product is in some special field.
3. When such committee has approved this protocol as submitted or as amended, the National Sanitation Foundation Testing Laboratory will prepare an estimate of the cost of testing and enter into a contract for such testing if the manufacturer desires.
4. Payment for the testing is required before the work is started.
5. Following completion of the testing, a written report will be prepared and submitted to the appropriate committee for comment and review. Further testing may be necessary.
6. In the event that the committee determines that the results of the tests do not show that the device or product can be depended upon to accomplish its intended purpose, the report will be submitted to the manufacturer and given no further publicity. In entering into a contract for testing, the manufacturer should fully understand that favorable results can neither be anticipated nor guaranteed and that his expenditure for testing may serve him no useful purpose.

7. If the results of the testing are considered to be favorable by the committee, the report will in turn be submitted to the Council of Public Health Consultants. If they consider the results of the testing to be satisfactory, this will be reported to the Board of Directors of the National Sanitation Foundation Testing Laboratory. This Board will be requested to act authorizing the use of the NSF Seal on such device or product under the usual terms.
8. The terms under which the right to use the NSF Seal is awarded require at least annual inspection of the manufacturing plant and annual re-inspection of the device or product all at nominal stipulated cost. Continued use of the NSF Seal depends upon continued maintenance of the standard set for such device or product as a result of the testing.

### LISTING POLICY

This list is subject to changes as new models supplant presently listed equipment and as new models are tested and Listed for use of the National Sanitation Foundation Testing Laboratory "Seal".

Information as to items of equipment withdrawn from Listing or as to manufacturers whose right to use the nSf Seal may have been revoked, may be secured by writing to the Headquarters of the National Sanitation Foundation Testing Laboratory.

The nSf Seal on equipment is not intended to indicate approval of the final installation or use application of the equipment. Installation and/or use application of nSf Listed equipment should conform with local and state regulations.

A revised Listing is published each year.

PART II  
EQUIPMENT LISTED AS MEETING NATIONAL SANITATION FOUNDATION  
STANDARD NO. 1

SODA FOUNTAIN AND LUNCHEONETTE EQUIPMENT

A & W ROOT BEER COMPANY  
922 BROADWAY  
SANTA MONICA, CALIFORNIA 90404

Equipment Stands  
With Open Shelves - Fryer recess  
Models A-48-23 through A-120-30  
Models B-48-23 through B-120-30 w/fryer  
recess & drawers in base

A & W Speedline Dispenser  
95 SC Dispenser  
9 Pre Cooler

Equipment Stands  
Models C-48-23 through C-120-30 = with  
open shelves  
Models D-48-23 through D-120-30 = with  
drawers

Speedline Carbonator

3-Compartment Sink with Integral Drainboard  
Model 64

(Numbers indicate lengths & widths. The  
letter "UD" after the model numbers indi-  
cate that unit comes with updraft system.)

4-Compartment Sink with Integral Drainboard  
Model 66

ALLMETAL FOOD EQUIPMENT CORP.  
1050 BRISTOL ROAD  
MOUNTAINSIDE, NEW JERSEY 07092

Sandwich Units; Remote & Self-contained  
Models 373-23 through 376-30 w/toaster  
space & bread drawers  
(Kingston type) Lengths 3'0" through  
6'0"; Widths 23" through 30".

Wall Pastry Case  
3' through 6'

Models 342-23 through 346-30 completely  
refrigerated (Florham type) Lengths  
2'0" through 6'0"; Widths 23" through 30".

Exhaust Units  
Wall Mounted  
WM-42 through  
WM-120

Floor Model  
FM-48-23 through  
FM-120-23

(The letter "S" following the model number  
indicates that the unit is Self-contained.)

Down-Draft  
DD-48 through DD-120

Compressor Enclosures  
Models CD, CS, CC = Lengths 18' through  
24"; Widths 23" through 30"

Refrigerated Equipment Stands; Self-Contained  
& Remote Base Only  
Models E-58-23 through E-94-30

Lowerator Stands  
Models LS-12-23 through LS-60-30  
Lengths 12" through 60";  
Widths 23" through 30"

(The letters "UD" following the model number  
indicates the units come equipped with an  
Updraft exhaust superstructure. The letter  
"S" following the model number indicates the  
unit is Self-contained.)

Steam Tables  
Models S-36-23 through S-72-30  
Lengths 36" through 72";  
Widths 23" through 30"  
Letters following the model  
number indicate:  
EW - Electric Wet Bath  
GW - Gas Wet Bath  
GD - Gas Dry Heat  
ED - Electric Dry Heat

Salad Dessert Cases  
With Water Station; Remote & Self-contained  
Models 1235-23 through 2236-30

(The letter "S" after the model number indi-  
cates the unit is self-contained.)

No Water Station  
Remote & Self-contained  
Models 1214-23 through 2216-30

Bread & Roll Cabinets - s/s top  
Models 612-ST-23 through 672-ST-30  
The letters "MT" in place  
of "ST" indicate the unit  
comes with maple top in  
place of s/s top.

(The letter "S" after the model number indi-  
cates the unit is Self-contained. Numbers  
indicate type of superstructure, length-  
depth.)

Pie Storage Cabinets  
Models PS-14-23 through PS-28-30  
Numbers indicate length & width

Refrigerated Short Order Bases; Remote &  
Self-contained  
Models L-48-23, L-48-26 1/2, L-48-30;  
L-72-23, L-72-26 1/2,  
L-72-30 with water station  
Models M-48-23, M-48-26 1/2, M-48-30;  
M-72-23, M-72-26 1/2,  
M-72-30 without water station

Refrigerated Wall Bases; Remote & Self-  
contained  
Hi-Boy Models 564-18 through 5610-30  
Lo-Boy Models 454-23 through 4510-30

Only basic model numbers are Listed. Modifications of basic Listed units indicated by  
prefixed or suffixed letters or numbers are considered to be included in this Listing.

Utility Stands

Models 824-23 through 896-30 = open base  
 824-DR-23 through 896-DR-30 =  
 with drawers in lower base  
 824-SW-23 through 896-SW-30 =  
 swinging doors  
 824-SL-23 through 896-SL-30 =  
 sliding doors in base

Coffee Urn Stands

Models 724-23 through 772-30 = open base  
 724-DR through 772-DR-30 = with  
 drawers in base  
 724-SL through 772-SL-30 = with  
 sliding doors in base  
 724-SW through 772-SW-30 =  
 swinging doors in base

Soda Fountain - Creamers

Models FC-60-26 1/2  
 FC-72-26 1/2  
 FC-66-30  
 FC-78-30

(The letter "S" following the model number indicates the unit is self-contained.)

Soda Fountain - Bobtails

Models FB-36-26 1/2  
 FB-36-30  
 FB-66-30

Ice Cream Cabinets

Models IC-18-26 1/2 through IC-78-26 1/2  
 IC-18-30 through IC-78-30

Soda Fountain - Bobtail - Creamers

Models FBC-54-26 1/2  
 FBC-54-30

Soda Fountain Bobtail - Sinks (without drainboards)

Models FBS-72-16 1/2  
 FBS-72-30  
 SI-36-26 1/2  
 SI-36-30

(The letter "S" following the model number indicates the unit is self contained.)

(The letter "CO" in front of any model number indicates the unit has laminated (color) plastic in front.)

Water Stations

Models WI-12-23 through WI-36-30  
 WS-12-23S through WS-36-30S

BARDEAU, LTD.  
 158 NORFINCH DRIVE  
 DOWNSVIEW P. O.  
 TORONTO, ONTARIO, CANADA

Custom built equipment including the following catalog items:

Drink Dispenser Systems

Fountain Sinks

All machines listed leg mounted or on pedestal base.

① Make-up water for wash tank is provided from final rinse supply. Sizing of water heaters should be based on this additional demand. (Not to exceed 2GPM).

② Asterisks in model numbers of UC machines represent 4 digits which denote length of overall unit in feet.

③ Engineering data pertaining to rackless conveyor machines (Models UC\*\*C Series 5' center section through UC\*\*CW Series 8' center section) also applies to certain variations of these models for which National Sanitation Foundation Listing is authorized. Such variations are limited to the providing of soiled dish (loading) or clean dish (unloading) sections of non-standard length. The pump section(s), final rinse section, conveyor width and maximum conveyor speed must remain unchanged.

① Make-up water for wash tank is provided from final rinse source of supply. Sizing of water heaters should be based on this additional demand. (Not to exceed 2GPM).

② The conveyor tables used in connection with this model are not fabricated by the dishwashing manufacturer and should not be considered in compliance with Standard No. 2, unless such authorization has been extended to the manufacturer of the dish tables.

③ Engineering data pertaining to rackless conveyor machines (Models FT200 RS Series through FT300 Series) also applies to certain variations of these models for which National Sanitation Foundation Listing is authorized. Such variations are limited to the providing of soiled dish (loading) or clean (unloading) sections of non-standard length. The pump section(s), final rinse section conveyor width, and maximum conveyor speed must remain unchanged.

④ All "FR" models incorporate the complete "FastTrack" including dish tables, scrapping system, disposal system and complete conveyerization for racks. All components meet the requirements of applicable NSF Standards or Criteria.

⑤ These machines have been tested and listed at both 7.4 ft per minute and 10 ft. per minute.

① Make-up water for wash tank is provided from final rinse source of supply. Sizing of water heaters should be based on this additional demand. (Not to exceed 2GPM).

② The conveyor tables used in connection with this model are not fabricated by the dishwashing manufacturer and should not be considered in compliance with Standard No. 2, unless such authorization has been extended to the manufacturer of the dish tables.

③ Engineering data pertaining to rackless conveyor machines (Models FT-16 through FT 300 Series) also applies to certain variations of these models for which National Sanitation Foundation listing is authorized. Such variations are limited to the providing of soiled dish (loading) or clean dish (unloading) sections of non-standard length. The pump section(s), final rinse section, conveyor width, and maximum conveyor speed must remain unchanged.

① Suffix letters shown with standard conveyor model numbers means: L = Left Feed, R = Right Feed, E = Electric, G = Gas  
S = Steam.

② Data pertaining to pre-wash applies only when machine is equipped with Model 3A pre-wash unit.

③ Suffix "B" designates a 6.5 KW integral booster heater.

① Suffix letters on standard model numbers indicate the following:  
 STPC Models with "HS" Suffix have built-in fresh water scrappers.  
 STPC Models with "PS" Suffix have built-in power scrappers.  
 STPC Models with "D" Suffix have built-in forced air dryers.

C - Corner Models A - Automatic F - Automatic Fill V - Vented Hood

② Make-up water for wash tank is provided from final rinse source of supply. Sizing of water heaters should be based upon this additional demand. (Not to exceed 2GPM).

③ Engineering data pertaining to rackless conveyor machines (Models STPC 10 through STPCW-26D) also applies to certain variations of these models for which National Sanitation Foundation Listing is authorized. Such variations are limited to the providing of soiled dish (loading) or clean dish (unloading) sections of non-standard length. The pump section(s), final rinse section, conveyor width and maximum conveyor speed must remain unchanged.

prefixed or suffixed letters or numbers are considered to be included in this listing.

Remote reach-in and prefabricated walk-in refrigerators and storage freezers are NSF  
listed ONLY when the BTU ratings of the compressor and cooling unit used, are in con-  
formance with the recommendations of the manufacturer of the refrigerators or freezers.  
The minimum recommended BTU ratings for the compressor and cooling unit are required  
to be indicated on a permanent label, or plate, attached to each remote reach-in or  
prefabricated walk-in refrigerator and storage freezer by the manufacturer thereof.

Prefixes (Letters approved in any arrangement to precede model number):

A - (Sta-Kold) Aluminum Interior and Exterior Ends  
B - Bakery Model (with pan slides)  
BT- Bakers Table  
C - Challenger Model  
D - Display Case  
DT- Dual-Temperature Model  
E - Electric Defrost  
F - Freezer  
I - Roll-In Model  
M - Mobile Model  
P - Porcelain Model  
R - Refrigerator  
RD- Refrigerator, Dough Retarder or Salad Refrigerator  
RF- Refrigerator/Freezer (Dual-Temperature)  
S - (Vimco) Stainless Steel Interior and Exterior  
U - Sandwich Unit  
V - V-Line Model  
W - (Sno-Queen) White Baked Enamel Exterior, Aluminum Interior  
WC- Wall Case

Suffixes (Letters approved in any arrangement to follow model number):

A - Special Shelves, Racks or Trays  
C - Capillary Refrigeration System  
GD- Glass Insert (Hinged Door)  
N - Mechanical Alteration not affecting Electrical or Refrigeration Systems or Sizes  
PS- Plastic Coated Pan Racks  
PT- Pass-Thru Model  
R - Remote Model  
S - Self-Contained Model  
SPS - Stainless Steel Pan Slides

Only basic model numbers are listed. Modifications of basic listed units indicated by prefixed or suffixed letters or numbers are considered to be included in this listing.

Remote reach-in and prefabricated walk-in refrigerators and storage freezers are NSF listed ONLY when the BTU ratings of the compressor and cooling unit used, are in conformance with the recommendations of the manufacturer of the refrigerators or freezers. The minimum recommended BTU ratings for the compressor and cooling unit are required to be indicated on a permanent label, or plate, attached to each remote reach-in or prefabricated walk-in refrigerator and storage freezer by the manufacturer thereof.

EQUIPMENT LISTED AS MEETING NATIONAL SANITATION FOUNDATION

BASIC CRITERIA C-1  
VENDING MACHINES FOR FOODS AND/OR BEVERAGES

The vending machines listed have been evaluated for use in connection with the dispensing of one or more of the following classes of food and/or beverages.

- Class 1. Hot bulk food or beverage
- Class 2. Cold bulk food or beverage
- Class 3. Hot packaged food or beverage
- Class 4. Cold packaged food or beverage
- Class 5. Hot readily perishable bulk food or beverage
- Class 6. Cold readily perishable bulk food or beverage
- Class 7. Hot readily perishable packaged food or beverage
- Class 8. Cold readily perishable packaged food or beverage
- Class 9. Bulk food or beverage
- Class 10. Packaged food or beverage
- UN Unclassified (for classification of components which have multiple application)
