Descriptors-*Consumer Education, *Curriculum Guides, *Home Economics Education, Learning Activities, Program Content, Resource Materials, Secondary Education

Curriculum materials for teacher use in preparing consumer education lessons for students in eighth grade home economics, and Homemaking I, II, III, integrate consumer education principles with the subject matter areas of clothing, food and nutrition, housing, personal and family relations, child care and development, health safety and home nursing. Materials, which were developed by teachers participating in a conference, were tested in the classroom for a year, revised, and prepared for publication. Facets of consumer education to be covered in each subject matter area at each grade level are presented in a scope and sequence chart and objective lists. Concepts, objectives, generalizations, learning experiences, and evaluation techniques and devices are suggested for a Homemaking III or family living course. Concepts include: (1) The Role of the Consumer, (2) Sound Money Philosophy, (3) Security for Home and Family, (4) Consumer Education, (5) Budgeting, and (6) Consumer Education in the Home Economics subject areas mentioned above. References for student and teacher use as well as audiovisual aids are included in the document. (FP)

FOREWORD

Consumer education has always been an important part of the home economics program. The increased number of goods and services on the market today makes instruction in this area even more important. Both adults and youth are interested in how to get the best values for their money.

Teenagers have become a large component of our nation's population and thus, today, have a significant share in the nation's economy. Economists estimate that teenagers, last year, paid fifteen billion dollars for goods and services; therefore, home economics teachers must place increased emphasis on consumer education.

Last year, following a one-day conference on consumer education, several lesson plans on various aspects of consumer education were prepared by the teachers participating in the conference. These plans were combined by Mrs. Mena Woodle into a publication, Becoming Wiser Consumers by Making the Most of Our Dollars, and were made available for teacher use.

This spring, some teachers in Greenville County, with the leadership of Mrs. Icesy Arnold, Miss Annie Mac Coleman, and Miss Edna Page, began revising the materials used last year. Miss Page has worked further to develop this publication, Consumer Education: A Guide for Home Economics Teachers.

We are grateful to all of the people who have had a part in the preparation of this material but especially grateful to Miss Page for preparing and editing the material, and to Miss Kate Salley, the artist who designed the cover. We are also grateful to Mrs. Mena Woodle, Miss Annie Mac Coleman, Mrs. Icesy Arnold and to the teachers in Greenville County: Mrs. Louise Miller, Mrs. Myra Cantrill, Mrs. Batsie Styles, Mrs. Beulah Woods, Mrs. Lillian Jenkins, Miss Volina Wilson, Mrs. Gladys Walker and Mrs. Frances Ridgill.

It is hoped that each teacher will place some emphasis on consumer education in every area of home economics but that they will also include a unit on consumer education in third year home economics and family living.

OBJECTIVES IN CONSUMER EDUCATION*

Our dynamic economy needs well educated consumer-citizens. To achieve enduring "protection," individuals must be trained for personal economic competence and responsible citizenship. This can be accomplished by helping students realize the following objectives:

1. To understand the role of the consumer, the producer, and government in our economy.
2. To develop ability to make rational choices among alternatives.
3. To know the sources of consumer information.
4. To identify and avoid the pitfalls that can substantially reduce real income.
5. To learn the skills needed to solve consumer problems as they arise.
6. To recognize the relationship between economic principles and personal economic competence.
7. To be aware of their dependence on society for consumption, and of their rights and responsibilities.
8. To obtain maximum satisfaction for their money through intelligent use of available resources.

Such objectives put into action will help consumers be knowledgeable and efficient in managing their personal and collective economic affairs.
