Abstract

Investigations to determine compliance with the child labor provisions of the Fair Labor Standards Act identified violations in three major categories: (1) minors under 16 years old working in occupations for which a 16- or 18-year minimum age has been established, working in excess of the hours permitted children of that age, or working at times not permitted, (2) minors 16 and 17 years old working in non-agricultural occupations declared hazardous by the Secretary of Labor, for which an 18-year minimum age is established, and (3) minors under 16 working in agricultural occupations during hours schools are in session in the district where they live while employed, and working in agricultural occupations declared hazardous by the Secretary of Labor, for which a 16-year minimum age applies at any time. Data are presented in tabular form for fiscal years 1967 and 1968. (Author/CH)

A GLIMPSE AT YOUTH WHO WORK

Results of Child Labor Investigations

When and Why

This pamphlet describes the findings of the Wage and Hour and Public Contracts Divisions in investigations to determine compliance with the child labor provisions of the Fair Labor Standards Act. The period covered starts July 1, 1966, and ends June 30, 1968. During this time, legislative developments as well as certain changes in the child labor regulations had an impact on the child labor program.

The 1966 amendments, which extended coverage of the act, included types of industries where youth are often employed such as restaurants, hotels, laundries, and hospitals. These same amendments provided the Secretary of Labor with the authority to declare occupations in agricultural employment hazardous for minors under 16 years of age. In addition, under the authority provided him, the Secretary of Labor amended certain of the child labor regulations. The purpose was to expand the employment opportunities for youth.

Covered young workers, unless otherwise exempt, are also subject to the minimum wage and overtime provisions of the FLSA.

Those That Were Found

Violations of the child labor provisions of the Fair Labor Standards Act fall into three major categories:

- minors under 16 years old working in occupations for which a 16- or 18-year minimum age has been established, working in excess of the hours permitted children of that age, or working at times not permitted;
- minors 16 and 17 years old working in nonagricultural occupations declared hazardous by the Secretary of Labor, for which an 18-year minimum age is established;
- minors under 16 working in agricultural occupations during hours schools are in session in the district where they live while employed, and working in agricultural occupations declared hazardous by the Secretary of Labor, for which a 16-year minimum age applies at any time.

This report does not reflect the impact of the Hazardous Occupations Order in Agriculture since it became effective in January 1968. Minors under 14 years old, unless otherwise exempt, may not be employed under the FLSA.

In the approximately 60,000 investigations made to determine compliance with all the provisions of the FLSA and the Walsh-Healey Public Contracts Act (PCA) during FY 1967, 18,536 minors were found illegally employed. This

number represents violations of the child labor provisions of the FLSA primarily, although some children were found illegally employed under the minimum age provisions of the PCA, and some were illegally employed under both Acts. (See table A.)

Of those illegally employed, 4,201 were under 16 years old found working on farms during the hours schools were in session. (See table B.)

In FY 1968, approximately 77,000 investigations were made to determine compliance with all the provisions of the FLSA and the PCA. A total of 14,117 minors were found illegally employed. Of this total, 1,555 were found illegally employed in agriculture. (See table I and table II.)

Agricultural findings showed the greatest decrease in FY 1968. There were 2,646 fewer minors found illegally employed than in 1967. Poor cotton crops and increased mechanization were the basic reasons for this trend. In nonagricultural employment, the greatest decrease in 1968 was found in nonagricultural hazardous occupations—2,573 fewer minors 16 and 17 were found illegally employed. The changes made in Hazardous Occupations Orders Nos. 2, 4, and 7, which became effective in April 1967 and November 1967, had some impact.

TOTAL NUMBER OF MINORS FOUND ILLEGALLY EMPLOYED IN FISCAL YEAR 1967 AND 1968

	Number of minors found illegally employed	
	FY 1967	FY 1968
All regions.....	18,536	14,117
Nonagricultural employment:		
Minors under 16.....	5,289	6,059
Minors 16 and 17 in hazardous occupations.....	8,948	6,375
Agricultural employment.....	4,201	1,555
Walsh-Healey Public Contracts Act (only).....	98	128

Children Under 16—in Business and Industry

The 1966 amendments were in effect for 5 months of FY 1967 so that the full impact on the child labor program affecting children under 16 was not evident until 1968. The table below shows the numbers of minors found illegally employed in the newly covered establishments in each fiscal year.

Industries	FY 1967	FY 1968
Hotels, motels, lodging places.....	64	153
Laundries, drycleaners.....	35	238
Amusement, recreation services.....	11	201
Medical services including hospitals.....	8	132
Restaurants.....	120	1,004

Not only were some of these children employed in occupations prohibited for youth of their ages, but also in excess of the daily and weekly hours of work

and before 7 a.m. or after 7 p.m. (9 p.m. June 1 through Labor Day), and many were under 14 years of age.

Examples of actual situations where these youngsters were found employed give flavor to the statistical data and are current evidence of the fact that the very young are still exploited in the market places.

In a restaurant with 10 branches, a total of 55 minors ranging in age from 13 to 15 were employed as dishwashers, porters, busboys and waiters. They worked 9 hours daily, 54 hours weekly during vacation; 5 hours daily on schooldays and 9 hours Saturday for a 39-hour week during school weeks. All of them worked after 7 p.m.; then the nightwork limit for minors under 16.

A 14-year-old nurse's aide worked up to 12½ hours a day in one nursing home while, in another, five 14- and 15-year-old boys and girls worked to 11 p.m. or later.

Six busboys, aged 13, 14, and 15, regularly worked the night shift from 3:15 p.m. to 11:55 p.m. in a restaurant for as much as 57½ hours a week and 12½ hours a day. On occasion, a 13- and a 14-year-old worked the 5 p.m. to 1 a.m. shift.

A 15-year-old girl worked the 10 p.m. to 7 a.m. shift as an assembler in a dry-cleaners. Two boys, aged 13 and 14, helped on the delivery truck of another laundry-drycleaning firm. This occupation is included in Hazardous Occupations Order No. 2. An 18-year minimum age is established for such employment. There are certain exemptions for 16- and 17-year-old minors, but this type of work is prohibited for minors 14 and 15 years of age at any time. Three 15-year-old girls were operating mangles in another laundry. This occupation requires a 16-year minimum age.

The newly covered industries were not alone in the illegal employment of young children. Retail stores frequently employ them. In FY 1967, for example, there were 1,256 minors under 16 illegally employed; while in FY 1968, there were 1,606. One store employed a 12-year-old stock clerk who worked 12 hours a day and, in another, a 14-year-old stockboy worked 57 hours a week during the summer and 44½ hours a week during a school week. Minors ranging in age from 9 to 15 years were found operating or cleaning a variety of meat grinding machines and driving delivery trucks, occupations declared hazardous for minors under 18 years of age.

In a lumber company manufacturing pallets, boxes, and crates, four boys, aged 9, 11, 13, and 14, were employed to do cleanup work in the mill; the 14-year-old operated a powersaw contrary to Hazardous Occupations Order No. 5.

The child labor standards provided in the Fair Labor Standards Act and State child labor laws do not prohibit the employment of 14- and 15-year-olds but are an attempt to safeguard children, who are too young to speak for themselves, from being employed in occupations detrimental to their health and well-being and which interfere with their opportunities to obtain an education.

Harvesting the Crops

This was an unusual year for the child labor agricultural program in that the effective date for the Hazardous Occupations Order in Agriculture occurred in January 1968 and a 4-H Club amendment in June 1968. This amendment permits minors 14 and 15 who have satisfactorily completed 4-H safety training programs to operate tractors and farm machines otherwise requiring a 16-year minimum age.

A basic 16-year minimum age applies to employment in agriculture during the hours schools are in session and, unless otherwise exempt, in those occupations declared hazardous by the Secretary of Labor at any time. There is no minimum age for employment in nonhazardous farm jobs outside school hours. The child labor standards in agriculture do not apply to minors employed by their parents on the home farm.

There were 1,555 minors under 16 found employed during school hours in FY 1968 compared to 4,201 in FY 1967. (See tables B and II.) A total of 1,539 farms were investigated and 496 found employing minors illegally in FY 1968 as compared to 2,281 farms investigated and 1,182 found employing minors illegally in FY 1967.

Cotton harvesting over the years has accounted for the greatest number of illegally employed children. This year, however, the cotton crop was the poorest since records have been kept. In the Southwest, hurricane "Beulah" ruined much of the crop and, throughout the cotton belt, more and more mechanical cultivation and harvesting is being done. Coffee, cucumbers, tomatoes, potatoes, strawberries, and truck garden vegetables were the crops in FY 1968 in which most of the minors were found illegally employed. In four States* where cotton is the principal crop, the combined effect of the factors mentioned above is evident. In FY 1967, 924, 429, 372, and 269 minors were found illegally employed as compared to 47, 6, 107, and 47 in those same States in FY 1968. (See tables F and VI.)

While there was an overall decrease in findings, there were a few areas where findings increased. In two cases, it was due in large part to late ripening of fruits and vegetables because of poor weather; in one, a cool summer; in the other, uncertain weather which delayed harvesting. In the latter situation, this caused migrant workers to leave the area, resulting in the use of 188 minors, as opposed to 85 last year, who were used to harvest cucumbers and potatoes. In another location, a dearth of adult workers for a hand-harvest crop and the seeming disinterest of school officials and parents combined to produce an increasing illegal use of youngsters in the field from 26 in FY 1967 to 111 in FY 1968.

There is ample evidence also that the investigative work done in previous years, public information activities, cooperation of the schools and many farm organizations, and litigation had an impact in reducing, on a nationwide basis, the illegal use of children in harvesting crops.

*Georgia, South Carolina, Mississippi, Texas.

While it is often believed that farm employment is beneficial, like any other industry, it is beneficial only insofar as young workers are protected from the most serious hazards. Based on national findings, farmwork is classified as the third most dangerous occupation. While, under the present Hazardous Occupations Order in Agriculture, minors under 16 are prohibited from operating potato harvesters, they may legally ride on them. In FY 1968, a 16-year-old girl lost her arm when she was pulled into the conveying mechanism of a harvester while working on her grandfather's farm. Two 6-year-old boys badly injured their hands in a harvester, possibly permanently. A 13-year-old lost his arm just below the shoulder in a potato harvester, and a 15-year-old boy seriously damaged his hand and arm.

Tractor accidents often involve fatalities. Of 67 tractor accidents reported to a State Bureau of Labor, 31 involved fatalities—11 of them to children 16 years old or less. In all, 27 children 16 and under were in tractor accidents in that State during the year.

A 15-year-old Michigan youth bled to death when his arm was torn off by a grain auger which he was helping his father to operate.

An 8-year-old boy suffocated when he was sucked into and buried under 2 feet of grain in a wheat bin while helping his cousins to load wheat.

A look at the educational achievement of children whose lot it is to "follow the crops" is enough evidence to warrant a feeling of relief that perhaps mechanization will spell an end to such exploitation. In FY 1967, of the 4,201 minors under 16 who were illegally employed during school hours, 3,070 were local children and 1,131 were migrants. About 20 percent (861) of the illegally employed were 9 years of age or younger, nearly half (2,086) were 10 to 13, and almost 30 percent (1,254) were 14 and 15. Preschool age children were also working on farms. Their employment, however, is not a violation of the act since there are no "school hours" for them.

Of those children for whom information on last grade completed was obtained, 4,166 (44 percent) were in grades below the normal for their ages. Educational achievement in relation to age becomes lower as children increase in age. Thus, at 14 years, 61 percent were enrolled in grades below the normal for their ages, and at 15 years of age, the percentage was 67. (See tables C and III.) Of the migrants (1,111), 43 of these children had never attended school and 66 percent were in grades below the normal. At 14 years of age, the percentage increased to 84 and, at 15 years, 87 percent were behind in scholastic achievement. (See tables D and IV.) This pattern has been fairly typical over the years in which the Divisions have been administering and enforcing the child labor provisions in agriculture.

Hazardous Jobs in Business and Industry

The number of minors found illegally employed in FY 1968 in one or more nonagricultural occupations covered by the 17 Hazardous Occupations Orders currently in effect totalled 7,719 as compared to 10,547 the previous fiscal year

TABLE I

See footnotes at end of table.

youngsters also worked as helpers on the truck contrary to Hazardous Occupations Order No. 2. This employment was also contrary to the provisions of Child Labor Regulation No. 3.

While many of those employed illegally in hazardous jobs escape without being maimed for life or killed, there are too many not as fortunate. Accidents found in the course of investigations illustrate the need for Hazardous Occupations Orders. A 13-year-old minor was killed when his head was crushed in an elevator he was operating (Hazardous Occupations Order No. 7).

A 14-year-old minor working as a helper on a milk truck had his ankles, feet, and lower legs cut and mangled, with possible permanent injury in one leg, when the milk truck was hit by another vehicle. A 16-year-old boy was killed when crushed in the cab of a dump truck.

Meat-grinding machines take their toll every year—a 17-year-old boy, an outstanding athlete, lost all the fingers on his right hand while operating a meat-grinding machine in his father's store; a 16-year-old had his right arm amputated midway between the wrist and the elbow as a result of catching his hand in an electric meat grinder. A 17-year-old boy had a similar accident in another State.

A 16-year-old minor, who told his prospective employer he was 18, was hired to operate a forklift feeding plastic into a hopper. He worked from midnight to 8 a.m. On Sunday morning, the minor backed the forklift into a press and was crushed. He was working alone and was not discovered by the guard until 5:30 p.m. Sunday. The guard found him about 50 feet from the lift still alive. The five pints of blood administered by the hospital did not save his life (Hazardous Occupations Order No. 7).

A 17-year-old boy was working with his father on the rig for an oil well drilling company. His left leg was torn off, his head severely injured, and he was badly mangled when he fell onto the rotary table of the drill. Four days after the accident, the boy died without regaining consciousness. His father had lied to the employer about the age of the boy, saying he was 18 (Hazardous Occupations Order No. 7).

Thus, some of the citizens of the future have their lives unnecessarily snuffed out before reaching adulthood or are maimed for life. Time and space do not permit reporting those cases where a finger, a thumb pad, a toe, or other part of the body is lost or hurt. Hazardous Occupations Orders are not the only preventive measure, but they do set a standard from which to start protecting young workers.

The Employer's Protection—Employment and Age Certificates

Though the employer is not required to have employment or age certificates on file under Federal law, he may protect himself from unintentional violations by requesting them for each minor under 19 as proof that the minor is the legal age for the job he is doing. A cooperative agreement exists with 45 States, the District of Columbia, and Puerto Rico to accept State employment and age certificates as proof of age under the acts.

There were 1,882,078 State employment and age certificates issued during the past year. This was nearly a 4-percent increase over the previous year (1,816,885).

In four States without certification programs: Idaho, Mississippi, South Carolina, and Texas, the Wage and Hour and Public Contracts Divisions issue Federal Certificates of Age. Almost 27,000 certificates were issued in each fiscal year, with a slight increase (421) in the number issued to 14-15 and 16-17 age groups in FY 1968 and a somewhat higher decrease (590) in those for the 18 and over group. Approximately 65 percent were issued for 16-17-year-olds and 1.5 percent for the 14-15 age group each year.

The number of State and Federal certificates issued is indicative, in part, of increased youth employment and possibly greater awareness among employers of the certification program.

Legal Actions

If efforts to obtain compliance with the child labor requirements of the acts are not successful, legal action is undertaken. In FY 1967, 130 cases containing child labor violations were filed. There were 75 cases closed, with 55 judgments for the Secretary and 20 stipulations for future compliance. During FY 1968, 99 cases were filed on child labor counts; one a criminal action which resulted in a permanent injunction and a fine. There were 111 cases closed: three were voluntary dismissals, 32 were closed on stipulation, and 76 were judgments for the Secretary.

The salutary effect of a case such as that of the mill employing eight minors under 18, four starting at age 15, to drive trucks and operate woodworking machines and circular saws is considerable. This employer, using these youngsters in jobs subject to the 18-year minimum age, admitted receiving a letter in 1964 from Wage-Hour explaining child labor provisions "but didn't bother to read it." A number of other employers will become aware of the child labor provisions by reading about this judgment of the court.

In litigation ensuing from a third investigation, 22 minors under 18 were found employed in occupations in a slaughtering and meat-packing plant on the killing floor, operating and feeding power-driven meat-processing machines, and hand-lifting animal carcasses, as well as operating power-driven paper products machines. This firm had attempted to conceal the correct ages of underaged minors by carrying several on the records under assumed names.

On March 22, 1968, criminal action was filed in the U.S. District Court against a nationwide builder of grain elevators and bins, charging the firm with willful violation of the child labor and recordkeeping provisions of the FLSA.

This construction company had employed illegally a total of 152 minors, 15 under age 16, over a 2-month period on 10 construction sites in one State. One youth, aged 17, had been killed when he fell from a grain elevator while riding a manlift. Two previous investigations established willfulness. A permanent injunction and a \$6,000 fine were levied against the company on four counts:

employment of minors under 16 in construction, violations of Hazardous Occupations Orders Nos. 2 and 7, and failure to keep records.

An injunction was issued against a manufacturer of metal sign brackets who had employed 11 boys, aged 12 through 15, in manufacturing. One, aged 12, regularly did torch welding; others frequently worked with inflammable liquids. Their average pay was about 40¢ an hour. A 13-year-old boy had died as a result of burns suffered in a flash fire in the shop. The FLSA sets a 16-year minimum age for employment in manufacturing occupations.

Though most concerns attempt to obey the laws, legal action is the tool which gives the law the strength which stimulates compliance among the less conscientious.

Educational and Informational Activities

With the 1966 amendments, information responsibilities increased substantially. Extensive revision of existing publications and preparation of new material were made to incorporate the amendments as they affected child labor. Speeches were made throughout the country to innumerable groups. Articles were prepared on request for trade publications; e.g., the poultry and egg business. Also, a special information project was carried out by personal visits to major employers, school and State employment officials, and other persons concerned with youth employment to apprise them of the child labor provisions and availability of Federal certificates on request. Some special procedures to expedite certificate issuance were worked out.

Additional child labor information activities took place in FY 1968 as the result of modifications to two hazardous occupations orders and Child Labor Regulation No. 3, as well as the issuance of the Hazardous Occupations Order in Agriculture and ensuing 4-H exemption.

The Youth Opportunity Campaign elicited many inquiries about child labor standards, making it possible to clarify the oft-repeated misconception that no one under 18 may be legally employed. State educational personnel, particularly distributive education teachers, vocational guidance counsellors, and coordinators of cooperative vocational education programs, were informed by WHPC speakers about the special minimum wage for full-time students and student learners as well as the child labor provisions of the act.

As a public service, each year news media use informational material on child labor related to a specific effort. During the spring and summer, the Divisions' concern is the employment of young people in accordance with child labor standards. The fall program addresses the employer and the school-age worker to encourage the latter's return to school.

Popular materials as well as official publications describing the child labor provisions are available from the WHPC's national, regional, district, and field offices.

14 years.....	679	8	2	9	22	38	64	126	146	148	99	17			415	61
15 years.....	562	2	3	2	10	13	31	77	112	124	91	85	12		374	67

¹ 35 illegally employed minors were omitted for the following reasons: (1) 24 for whom no school information was available; (2) 11 who were in special ungraded classes.

² The figures between heavy lines in the table indicate normal school attainment for that age child. On the basis of the usual standard of measurement, developed by the U.S. Office of Education, 6 to 7 is considered normal attendance in the 1st grade, 7 to 8 for the 2d grade, etc., with attendance of 1 grade each year.

TABLE D
NONLOCAL MINORS FOUND EMPLOYED ON FARMS IN VIOLATION OF THE
CHILD LABOR PROVISIONS OF THE FAIR LABOR STANDARDS ACT, BY AGE
AND SCHOOL GRADE, FISCAL YEAR 1967¹

Age	Present or last grade attended											Below normal grade for age			
	Total all grades ²	Never attended school	1	2	3	4	5	6	7	8	9	10	11	Number	Percent of total in age interval

14 years.....	201	5	1	6	11	16	33	53	44	24	8			169	84
15 years.....	157	2	1	1	8	4	11	33	39	37	16	5		136	87

¹ 20 illegally employed minors were omitted for the following reasons: (1) 13 for whom no school information was available; (2) 7 who were in special ungraded classes.

² The figures between heavy lines in the table indicate normal school attainment for that age child. On the basis of the usual standard of measurement, developed by the U.S. Office of Education, 6 to 7 is considered normal attendance in the 1st grade, 7 to 8 for the 2d grade, etc., with attendance of 1 grade each year.

Note.—Nonlocal minors are those who do not return to their permanent homes each day.

TABLE E
NUMBER OF MINORS FOUND EMPLOYED IN VIOLATION OF HAZARDOUS
OCCUPATIONS ORDERS ISSUED UNDER THE FAIR LABOR STANDARDS ACT,
FISCAL YEAR 1967

Hazardous occupations order violated	Number of minors involved
Total employed in violation of one or more hazardous occupations orders ¹	10,547
Manufacturing or storage occupations involving explosives (order No. 1).....	33
Motor-vehicle driver and helper (order No. 2).....	6,766
Coal mining occupations (order No. 3).....	21
Logging and sawmilling occupations (order No. 4).....	307
Power-driven woodworking machines occupations (order No. 5).....	642
Occupations involving exposure to radioactive substances and to ionizing radiations (order No. 6).....	1
Power-driven hoisting apparatus occupations (order No. 7).....	1,900
Power-driven metal-forming, punching, and shearing machines occupations (order No. 8).....	376
Occupations in mining, other than coal (order No. 9).....	70
Occupations involving slaughtering, meatpacking or processing, or rendering (order No. 10).....	536
Power-driven bakery machines occupations (order No. 11).....	120
Power-driven paper-products machines (order No. 12).....	185
Occupations in the manufacture of brick, tile, and kindred products (order No. 13).....	30
Occupations involving the operation of circular saws, bandsaws, and guillotine shears (order No. 14).....	345
Occupations in wrecking, demolition, and shipbreaking operations (order No. 15).....	93
Occupations in roofing operations (order No. 16).....	215
Occupations in excavation operations (order No. 17).....	113

¹ Represents an unduplicated count of the number of minors employed in violation of one or more hazardous occupations orders.

TABLE F
NUMBER OF MINORS FOUND EMPLOYED ON FARMS IN VIOLATION OF THE CHILD LABOR PROVISIONS OF THE FAIR LABOR STANDARDS ACT, BY CROP, AGE AND RESIDENCE OF MINOR, FISCAL YEAR 1967

Crop	Number of minors illegally employed				
	Total	Under 14 years of age		14-15 years of age	
		Local labor ¹	Nonlocal labor ²	Local labor ¹	Nonlocal labor ²
All crops.....	4,201	2,183	764	887	367
