ABSTRACT

A CONTINUATION OF THE PRIMARY GUIDE (EC 004 852E), THE CURRICULUM GUIDE FOR JUNIOR HIGH AND HIGH SCHOOL IS INTRODUCED BY A PHILOSOPHY OF SPECIAL EDUCATION AND THE CHARACTERISTICS AND GOALS OF THE EDUCABLE MENTALLY HANDICAPPED. THE CURRICULUM AREAS FOR JUNIOR HIGH INCLUDE THE LANGUAGE ARTS OF LISTENING, SPEAKING, HANDWRITING, SPELLING, AND GRAMMAR, READING, ARITHMETIC, SOCIAL STUDIES, SCIENCE AND HEALTH, AND PREVOCATIONAL TRAINING. THE SAME BASIC COURSES ARE COVERED FOR HIGH SCHOOL LEVEL COURSES WITH THE ADDITION OF VOCATIONAL INFORMATION. THE EXPECTED ACHIEVEMENTS OF BOTH GROUPS ARE OUTLINED, AND THE DOLCH BASIC WORD LIST, SAMPLE LESSON PLANS, GRADUATION REQUIREMENTS, FILM LISTS, AND A BIBLIOGRAPHY ARE APPENDED. (JM)

General Introduction and Purpose

As the special education program in the Charlotte-Mecklenburg Schools expanded, it became increasingly evident that a working curriculum guide was necessary in order to more fully meet the needs of all special education children, and in order to provide sequence in their course of study. This guide represents the thinking, planning and work contributions of the special education teachers of the Charlotte-Mecklenburg School system. We have also studied numerous curriculum guides from other school systems and various special education publications and drawn ideas from these sources.

The purpose of this guide is to assist teachers of special education in programming for the educational needs of the children for whom they are responsible. Suggested activities, techniques, and materials are listed to aid the teacher, but this guide is only a working plan and should not be regarded as a complete course of study. The special education teacher should build units from the content listed in the guide, using teachers' manuals accompanying texts for additional teaching suggestions. She should gear her program to meet the needs of each individual child and provide a variety of experiences to give him general knowledge and specific skills that will enable him to develop to his fullest potential, using his basic, innate assets. The special teacher's program should be flexible enough to fit the curriculum to the child. The needs and levels of any class will vary from year to year. Therefore, teaching methods and materials will need to be evaluated each year.

Although the study areas are listed separately in this guide, they should not be taught in isolation. All academic areas in the course of study for the EMR child should be interrelated, but with the emphasis on the particular skill being taught.

Our ultimate goal for all EMR children is the same from the beginning primary child to the graduating young adult. However, emphasis at the lower level is placed on development of personality, self-sufficiency, socialization in school, in the community and in family life, and on laying a foundation for the acquisition of the basic tool subjects. At the upper level, these aims are continued with increasing emphasis placed on occupational proficiency through pre-occupational study and the learning of specific skills and knowledge necessary to enable the student to become a self-sustaining adult.

Philosophy

We believe the school has the responsibility of designing, maintaining and executing a program which enhances continuous growth, satisfaction and success for all pupils who enter its doors. We believe the exceptional child is far from alien to education and society. He can and will contribute to the well-being of society. The curriculum must be fitted to the needs, interests, and abilities of each child rather than fitting the child to a static or watered-down curriculum. Constant diagnoses, treatments, and evaluations are needed in order to assure continuous growth, satisfaction and success. The special program is an integral part of the total school's program that will not flourish as a separate entity. Likewise, the exceptional child is an integral part of the total student body which must be integrated into the mainstream of school life in order to develop fully.

Characteristics of the educable mentally retarded child

These children are defined as having I.Q.'s ranging approximately from 30 to 75 as determined by individual intelligence tests. This group is the mildest degree of mental retardation and is not easily distinguished from marginal normality. They are retarded to the extent that they are not able to make satisfactory progress in the regular school program. As adults they can be expected to achieve third to sixth grade levels of academic skills.

According to Samuel A. Kirk, a noted authority on the education of exceptional children, "The primary characteristic of mentally retarded children is that they do not learn as readily as others of the same chronological age by methods ordinarily used. Instruction therefore must utilize the best practices in learning as follows:

- (1) Progress is from the known to the unknown, using concrete materials to foster understanding of more abstract facts.
- (2) The child is helped to transfer known abilities from one situation to another, rather than being expected to make generalizations spontaneously.
- (3) The teacher uses many repetitions in a variety of experiences.
- (4) Learning is stimulated through exciting situations.
- (5) Frustrations are avoided by presenting one idea at a time and presenting learning situations by sequential steps.
- (6) Learning is reinforced through using a variety of sense modalities - visual, vocal, auditory, kinesthetic."

Samuel A. Kirk, Educating Exceptional Children, Boston: Houghton Mifflin Co., 1962, p. 121

Physical Characteristics of the educable mentally retarded child

Most authorities agree that the educable mentally retarded are more nearly like children of average and above-average intellect in physical and motor characteristics than in any other traits. Any differences in height, weight, and motor skills have usually been mentioned in connection with the cause of the retardation. For example those whose retardation is organic in origin, such as the brain injured, may be somewhat more handicapped in motor skills; those whose retardation is thought to be of cultural-familial origin may be slightly lighter in weight and shorter in stature, but if socioeconomic levels are controlled, this might not occur.²

Mental Characteristics

The educable mentally retarded have a short attention span and are easily distracted by outside stimuli. Academic handicaps may result in great frustration, feelings of inferiority, undesirable behavior more serious than the intellectual retardation itself. They must be taught with concrete and practical methods with work related to immediate needs and experiences.

Emotional Characteristics

The retarded tend to have low tolerance for frustration and need constant praise and encouragement.

Social Characteristics

They tend to be highly suggestible and are limited in making adequate social judgement by their inability to evaluate. Their social values generally correspond to those of their

immediate environment.

²Lloyd M. Dunn, Educable Mentally Retarded Children, Exceptional Children in the Schools, New York: Holt, Rinehart and Winston, Inc. 1963, p. 68.

BROAD GOALS

Broad Goals for the Educable Mentally Retarded for this curriculum guide are twofold:

1. To educate the educable mentally retarded in the essentials of the basic tool subjects to his fullest capacity.
2. To develop occupational adequacy, social competence, and personal adequacy, so that when he is an adult, he can function as a self-supporting law-abiding citizen. Success on the job is going to depend on getting to the job on time, personal appearance, manners, getting along with other employees and the employers, personal health, ability to handle money wisely, safety on the job, responsibility in following directions and carrying the task to completion and many personal characteristics which must begin at the Primary and Intermediate programs and continue in the junior and senior high programs. Reading, writing, arithmetic, health, and safety, social studies and science are parts of occupational education since a child will require a minimum of these academic skills in order to read signs, simple directions, communicate by means of writing at a simple level, etc.

AREAS OF THE CURRICULUM

Language Arts
Reading
Arithmetic
Social Studies
Science - Health
Pre-Vocational Training
Vocational Training

Language Arts

Listening
Speaking
Handwriting
Spelling
Grammar and Composition

LANGUAGE ARTS

Introduction

The primary purpose of Language Arts for the educable mentally retarded pupil is to help him express his thoughts clearly, to enable him to understand others, and to enable him to acquire knowledge. Included in this area are listening, speaking, writing, spelling and composition -- the skills necessary for communication, and among the tools by which knowledge is acquired and integrated.

The Language Arts program that best meets the needs of the retarded is one that is developed around natural life activities which have real meaning and purpose for the individual. It should serve, not as an end in itself, but as an integral part of the total school curriculum.

LANGUAGE ARTS

Objectives

1. To increase each child's understanding of language.
2. To develop in each child an adequate speaking vocabulary.
3. To help each child express himself clearly in a logical manner.
4. To enable each child to develop his handwriting skills sufficiently to meet his present daily needs and his future needs as an adult.
5. To increase each child's comprehension skills.
6. To enable each child to use listening as a necessary tool for learning.
7. To enable each child to learn to spell adequately enough to meet his daily needs.

CONTENT

Listening

SUGGESTED ACTIVITIES

Listening is the basis of all other language activities. Critical listening skills must be taught through organized and definite methods. They cannot be learned incidentally.

Listen to and identify various sounds, such as horns, bells, birds, wind, etc.

Take a walk on the school grounds and listen for specific sounds.

Listen to music recordings and pay particular attention to sound effects.

Listen to records and identify different well-known instruments such as drums, piano, etc.

Assign radio and TV programs for each child to listen for specific purposes.

Tell or read simple stories to the class. Have them retell the story or answer specific questions, as who, what, when, where, and why.

Listen for similar sounds in words.

Use a tape recorder to tape each pupil's voice so that he may improve diction as well as work on listening skills.

SUGGESTED MATERIALS

Various noisemakers

Selected music recordings

Tape recorder

CONTENT

Listening
(continued)

SUGGESTED ACTIVITIES

Give oral directions for assignments.
Have students repeat directions and then write them on the board.

Have students give directions for travel or instructions whenever possible. Set up situations for students to give directions to other students.

Have students deliver oral messages of increasing complexity.

Have students repeat sequence of events. For example, after an assembly program or an athletic event have different students repeat the sequence of the action.

When students make oral reports in other subjects, assign other students to ask questions or give an oral summary of the report.

After pre-planning, initiate conversations in which the students must follow certain rules, as (1) they cannot interrupt, (2) they must ask a question or make a comment on the same subject to keep the conversation going.

SUGGESTED MATERIALS

CONTENT

Listening
(continued)

Use role-playing to develop accuracy in repeating telephone messages correctly. Stress courtesy and manners at the same time.

Listen to records and discuss content of the records.

Speaking

Discuss importance of speech in communication.

Use picture reading activities. Have pupils study a picture and make a story about it, or describe details of the picture.

Have students report on incidents that occur on the way to school. Allow them to use only a limited amount of detail. Try to tell about the incident giving only main facts.

Practice expressing one idea in a spoken sentence rather than using run-on sentences.

Use a tape recorder to tape pupil's normal speaking voices. Have students evaluate themselves.

SUGGESTED MATERIALS

Records: Clear Speech
Mannerism
Being a Careful
Listener

Selected Pictures

Tape recorder

CONTENT

Speaking
(continued)

SUGGESTED ACTIVITIES

Assign a topic of general interest.
Have each student tell one thing about it in a complete sentence.

Learn short poems. Stress accent, pronunciation, enunciation.

Use role-playing. Plan a TV program, as a quiz show.

Use the telephone to practice taking and giving messages and to request specific information.

Have students describe one summer experience using the tape recorder.

Have students give oral reports on assigned topics.

Have students ask or read riddles. Others have to answer in complete sentences.

Have each student give oral directions to reach their home.

Have students tell a story that they make up as they go along. The teacher might suggest a first sentence and let the student go from there.

SUGGESTED MATERIALS

CONTENT

Speaking
(continued)

SUGGESTED ACTIVITIES

When possible, have students make announcements to their class or to other classes.

Practice giving oral information about self, as name, address, phone number.

Have class develop oral paragraphs jointly. Teacher can reproduce on board or chart paper. Students can then read or tell the story.

Learn the pledge to the flag. Work on meaning of various words, as well as manner of speaking.

Use speaking exercises to put expression in the voice.

Practice saying the same sentence with emphasis on a different word each time.

Discuss and practice use of gestures accompanying speech.

Show film on use of gestures.

Discuss ways to agree or disagree with another person courteously.

SUGGESTED MATERIALS

Film: Speech: Gestures

CONTENT

Speaking
(continued)

SUGGESTED ACTIVITIES

Have students practice making introductions. Use role-playing to give practice in using different rules for introductions - such as introducing a girl to a boy, an older person to a younger person, an older person to an older person, etc.

Practice taking turns during conversations. Discuss courteous ways of getting into conversations.

Have each student prepare a short talk for taping.

Use choral speaking or oral reading to teach enunciation and to develop retention and recall.

Practice saying tongue twisters to develop enunciation skills.

Discuss the importance of posture in speaking.

Demonstrate correct standing and sitting posture for speaking.

SUGGESTED MATERIALS

Film: Speech: Using
Your Voice

CONTENT

Handwriting

SUGGESTED ACTIVITIES

Handwriting skills should be emphasized throughout the day. Do not have a student change to cursive writing until he has mastered manuscript writing. Formal practice will be necessary to improve handwriting skills.

Use film to introduce formal handwriting instruction.

Have able students make reports on early writing (picture writing). From this beginning, guide students in realization of necessity of writing.

Use daily practice in formation of cursive letters.

Display penmanship wall strips.

Practice filling out application forms.

Have students practice copying notes and letters.

Use films and filmstrips to demonstrate proper handwriting techniques.

Work on spacing between letters.

SUGGESTED MATERIALS

Film: Writing Through the Ages

Imaginary Line Handwriting Series - Book 2 (Steck-Vaughn)

Beginning Cursive Book (Steck-Vaughn)

Imaginary Line Writing Pads (Steck-Vaughn)

Penmanship wall strips

CONTENT

Handwriting
(continued)

SUGGESTED ACTIVITIES

- Discuss need for legible writing.
- Have students practice a pen instead of a pencil.
- Use lined writing paper to teach proper sizing of letters.
- Practice cursive writing of words from spelling lists.
- Explain the headings that you wish students to use on their papers, the right and left hand margins, etc.
- Observe students ability to follow directions and incorrect patterns of letter formation they might use. Work individually with students to improve specific weaknesses.
- Make a check list for students to follow in writing a paragraph. Include margins, centering the topic, indenting the first line of the paragraph, correct letter formation, etc. Have students evaluate their own papers after they finish.

SUGGESTED MATERIALS

CONTENT

Spelling

SUGGESTED ACTIVITIES

Students should be able to read and pronounce words before they can be expected to spell them. Spelling words should be functional and should arise from current work. Later, use word lists. The number of spelling words given a child should be related to his individual ability. Students on higher reading levels will have more spelling words in their lists. Avoid learning to spell by rules.

Use film to introduce formal instruction in spelling skills.

Emphasize structure and meaning of spelling words by having students look for beginning sounds, blends, and endings.

Teach spelling of words of one syllable by sight. For words of more than one syllable teach spelling by dividing the word into syllables and learn the spelling of the word in units.

Have daily drills on spelling lists.

Develop exercises pertaining to dictionary skills for the students to work on daily.

SUGGESTED MATERIALS

Film: Who Makes Words

Dictionaries

Word Lists.

CONTENT

Spelling
(continued)

SUGGESTED ACTIVITIES

Write spelling words on flashcards.
Have students drill each other.

Have spelling bees within the various spelling groups to stimulate interest. Be sure to include many familiar words to the student as well as some new words, so that each student will experience some success.

Practice writing and spelling personal names, days of the week, months of the year, vocational words.

Use tape recorder to dictate spelling words. Students can then practice individually.

Have students use spelling words in sentences.

Have students practice writing spelling words in alphabetical order.

Have students use spelling words to write simple poems and stories.

Have each student make a spelling booklet for individual study, using teacher's help only when needed. Place vocabulary from other areas in these books, as arithmetic vocabulary. Stress keeping these booklets neat.

SUGGESTED MATERIALS

CONTENT

V. Grammar and Composition

Grammar usage and instruction should be functional. The EMR child will not learn by a list of rules.

1. Capitalization

SUGGESTED ACTIVITIES

Use Teachers Manuals accompanying texts for detailed teaching suggestions of skills.

The junior high EMR student should learn the following skills:

Capitalization:

1. First word of a sentence
2. Names, initials, titles
3. I
4. Proper names, streets, cities, etc.
5. Important words of a title

Have pupils learn rules of capitalization as they are needed. Introduce only one rule at a time.

Use repeated drills until rule is learned.

Use board illustrations before asking child to write.

Have written practice work.

SUGGESTED MATERIALS

I Want to Read and Write
(Steck-Vaughn)

I Went to Learn English
(Steck-Vaughn)

Working With Words
(Steck-Vaughn)

Working With Word Patterns
(Steck_Vaughn)

Talking and Writing
Our Language - Grade 3
Language - Book 4
(Steck-Vaughn)

Learning Our Language -
Books 1-2 (Steck-Vaughn)

English Lessons for Adults
(Steck-Vaughn)

Steps to Learning
(Steck-Vaughn)

English That We Need
(Frank E. Richard, Pub.)

Building Language Power
Series Models
(Charles E. Merrill)

Keys to Good Language
Books 3 and 4
Phonics ABC

CONTENT

2. Punctuation

SUGGESTED ACTIVITIES

The following punctuation skills should be taught:

1. Period at end of sentence
2. Question mark
3. Use of comma in dates
4. Use of comma in addresses
5. Use of comma in salutation and closing of letter
6. Use of comma in series of words

Use films and filmstrips where applicable.

Use board demonstrations.

Seatwork drills.

Ditto materials.

Have pupils write questions and then answer them.

Have each pupil write his date of birth, using commas.

Make address booklets, stressing the use of commas in addresses.

SUGGESTED MATERIALS

Film: Why Punctuate

Continental Press
duplicating materials

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

3. Apostrophe

Teach use of the apostrophe in contractions. Use contractions that the child uses daily. Practice using them in sentences.

Teach use of the apostrophe to show possession.

4. Writing sentences

Use oral and written drills to show the difference in a group of words and a complete sentence.

Films and filmstrips.

Film: Making Sense with Sentences

Have students write complete sentences about pictures.

Write answers in complete sentences to questions the teacher has put on tape recorder.

5. Writing a simple paragraph

Have pupils write three sentences about one idea.

Have students rewrite paragraphs leaving out a sentence that does not belong.

Scramble the sentences in a paragraph. Have the students write the paragraph in the correct order putting the main idea first.

Have students read paragraphs in other texts to see how all sentences in a paragraph are related.

CONTENT

Writing a paragraph
(continued)

SUGGESTED ACTIVITIES

Have students write articles for the school newspaper.

Show students a picture or let them find interesting pictures in magazines and have them write a story about the picture. They can show the picture as they read the story aloud.

Have students rewrite a story they already know.

6. Letter writing

Teach friendly letter writing in relation to writing a paragraph.

Teach the parts of a letter. Give practice in writing the parts correctly.

Discuss letter form and purpose of writing letters.

Have students practice addressing envelopes.

Give suggestions for writing letters and have students write practice letters.

Throughout the year, have students write letters to anyone who is absent for several days.

SUGGESTED MATERIALS

Write Your Own Letters
(Noble and Noble)

CONTENT

Letter writing
(continued)

SUGGESTED ACTIVITIES

Have students correct errors in letters pre-written by a teacher..

Have students practice writing thank-you notes. Encourage them to do this when they receive gifts or have something nice done for them.

Have students write thank you notes to any resource people who speak to the class or to the managers of any places they visit on field trips.

7. Verbs

Teach verb usage rather than principal parts of verbs.

Teach agreement of verb with subject.

Help students develop comprehension of verbs by having them act out many action verbs.

Use written exercises to check comprehension of verbs.

Draw or find pictures that depict actions. Write verbs on flashcards. Shuffle the pictures and flashcards and have students match them.

SUGGESTED MATERIALS

READING

-25-

READING

Introduction

The basic skills of reading are the same for the educable retarded child as for the average child. The program for the retarded child progresses at a slower pace with a much longer readiness period. Instruction at each reading level should be prolonged. Educable mentally retarded children need to read many books on the same level from several series. Reading books for the junior high educable mentally retarded child should be carefully selected. They should have mature illustrations and appropriate content for the child studying them. The teaching of some basic reading skills will be continued from the intermediate level. The teacher should review past learned skills for all reading groups. Teachers' manuals accompanying textbooks should be used for detailed teaching suggestions on skills.

Children with special problems need a more individualized reading program. The educable child can learn to read and maintain his reading ability according to his learning capacity. Since each child learns differently, a careful evaluation will determine the best teaching method for him. The reading program should be structured to meet the specific needs of each child. Reading instruction within a class should include several reading groups. While the materials will vary with each group, some of the skills for all levels can be correlated. All

reading groups should include library books on their particular level, signs and labels, teacher-made duplicating materials, filmstrips, records, films, newspapers, telephone directories, magazines, dictionaries, and tape recorders.

A reading program for any child should be realistic. On a junior high educable mentally retarded level, functional reading should be emphasized. A wide range of skills and many types of functional reading should be used. It is imperative that basic skills be taught these children. Most children are not able to devise a method of working out new words for themselves. They must be taught a technique and methods for using the technique. The reading methods and materials that the teacher selects should be evaluated with each new class as the needs and abilities of the class will vary from year to year.

As the mentally retarded child reaches adolescence his reading interests will vary even though his reading ability continues to be limited. On the junior high level basic skills should continue to be emphasized, but reading content at this level should include much information on social and vocational activities. Reading with a goal should be a part of every activity; however, a specific time should be set aside each day for every student to read.

READING

Objectives

1. To instill a desire to read about and be aware of the world and life around the educable mentally retarded child.
2. To build a receptive attitude toward reading.
3. To be increasingly aware of the role of reading in our daily activities.
4. To enable the child to obtain necessary and useful information.
5. To promote continuous progress in reading in order to supply his present needs and his needs in adult life.
6. To foster the habit of reading for pleasure as an enjoyable leisure time activity.
7. To attain maximum reading proficiency and to use it in all curriculum areas.
8. To increase vocabulary skills.
9. To develop listening skills.

CONTENT

Auditory perception
and discrimination

READING

SUGGESTED ACTIVITIES

Listen for likenesses and differences among familiar sounds.

Sound high and low notes on a musical instrument and have children identify them.

Hum or play on the piano the first lines of familiar songs and have children identify the songs.

Have students identify various environmental sounds.

Have students identify classmates' voices and tell the direction they came from.

Have students repeat words, phrases, and sentences after the teacher.

Use a mirror so child can see placement of tongue, teeth, and lips while making a sound.

Teach the sounds of the consonants that are easiest to separate when sounding a word.

Have students listen and identify initial, medial, and final consonant sound:

SUGGESTED MATERIALS

Charts of pictures with same initial, medial, and final sounds.

Picture dictionary

Reading games: Consonant Lotto, Vowel Lotto

Flashcards

SRA Listening Lab

Readers Digest Skilltexts

Steps to Learning - Book 2
(Steck-Vaughn Co.)

Tape Recorder

CONTENT

Auditory perception
and discrimination
(continued)

SUGGESTED ACTIVITIES

Make a scrapbook of sounds with the same initial, medial, and final consonant sounds. Compile a picture dictionary by placing the sounds and illustrations in alphabetical order.

Have students identify words within a spoken sentence that have like beginnings or endings.

Have students listen for long and short vowel sounds. Use words in reading vocabulary that begins with consonants child has already learned.

After presentation of each new sound, have child find the sound in words he already knows. Encourage students to use the new sound to attack new words in reading lessons.

After learning consonant and vowel sounds, give students a short story to read and have them pick out specific sounds.

Have students fill in missing words in sentences.

Duplicate exercises in which children must match rhyming words.

Have students complete simple rhymes that are written on the board or on ditto paper.

SUGGESTED MATERIALS

CONTENT

Auditory perception
and discrimination
(continued)

Use choral speaking and reading to develop auditory perception.

Use listening activities such as reading a simple story to the class to acquire specific information.

Use tape recorder to give directions for worksheets. Children can work individually or in groups.

Use tape recorder to tape a paragraph or short story. After listening to the tape, students then fill out worksheets.

Visual perception
and discrimination

Work on configuration by having students note the difference in appearance of words.
Ex. dog - doll

Duplicate exercises in which students must complete missing parts of letters, words, and pictures.

Develop exercises in which students must complete missing parts of letters, words, and pictures.

Develop exercises in which students must match letters and words that are alike.

Write two columns of words, using the same words in each column but in a different order. Have students match the like words in each column.

SUGGESTED MATERIALS

Basic vocabulary lists
(Dolich)

List of safety words

List of danger words
Commercial materials
(Continental Press)

CONTENT

Phonetic analysis

SUGGESTED ACTIVITIES

The following phonetic skills should be taught in a sequential manner, emphasizing only one skill at a time. Teacher developed materials may be used to teach these skills. Use Teachers Manuals accompanying textbooks for detailed suggestions on teaching phonetic analysis.

Single consonants
Irregular single consonants
Consonant blends
Consonant digraphs
Variant sounds (hard and soft c, g)
Silent consonants
Long and short vowels
Y as a vowel
Diphthongs (vowel blends)
Vowels controlled by r, w, l
Irregular vowels

Have students find pictures to match blends learned. Make a list of blends studied to use for later spelling studies.

Have students underline initial consonant sounds in their reading material.

Dictate words containing initial blends (words that they would not ordinarily be able to spell). Have them write (or work orally) the initial blend that they hear in each word.

SUGGESTED MATERIALS

Continental Press
duplicating materials

Phonics Skillbuilders

Text workbooks

Phonetic word drill cards

Dolch word games:
Consonant Lotto
Vowel Lotto

Phono Wheels

CONTENT

Structural
analysis

SUGGESTED ACTIVITIES

The following structural skills should be taught, utilizing a variety of methods and materials as class demonstrations, pupils giving oral examples, finding examples in selected reading materials and sight vocabulary materials

Endings
Plurals
Compound words
Root words
Prefixes
Suffixes
Possessives
Contractions
Comparatives
Syllabication
Accent
Inflection
Variations of words

SUGGESTED MATERIALS

Text workbooks
Dictionary
Sight vocabulary list
Chart stories
Selected reading materials

CONTENT

Oral reading

SUGGESTED ACTIVITIES

Oral reading should follow presentation of material, vocabulary development, guided reading of story and independent study by pupil. All of this cannot be covered in a single lesson.

Give special guidance in interpreting punctuation, (stopping at periods, pausing at commas and raising the voice for questions). Place some emphasis on continuing the thought from one sentence to the next.

Give each student an opportunity to read aloud individually to the teacher. Observe the pupil's phrasing ability, pronunciation, inappropriate reading "voice", ability to attack a new word, observe endings on root words, word meanings, etc.

Have students dramatize stories after they have been read to demonstrate their understanding of the story.

Have students make up riddles about story characters.

Have pupils read aloud as a group or individually. Ask certain pupils to tell what was read.

SUGGESTED MATERIALS

Basal texts

Work texts

Children's Newspapers
Weekly Reader
Know Your World

School Newspaper

CONTENT

Oral reading
(continued)

SUGGESTED ACTIVITIES

Have students do choral reading to develop proper phrasing.

After oral reading, have a student tell the story in his own words.

Have the class write simple summaries of the story read.

Let students pick out a story that interests them and prepare it for oral reading to the class. Let them also prepare questions, with the teacher's help, to ask the class after the reading is finished.

Silent reading

When making an assignment for silent reading ask leading questions to determine the main idea. Have pupils read silently to find the answers.

After silent reading, ask oral questions first, then hand out written questions, using different questions for different children.

Have pupils read silently to locate specific information, as who, what, when, where, and why.

SUGGESTED MATERIALS

Short selections to read silently.

Weekly Reader

Reading Skill Builders

Library books

How to Read Better - Book 1

How to Read Better - Book 2

(Steck-Vaughn)

(These worktexts can be used only with better readers as they are on 4th & 5th grade reading levels.)

CONTENT

Silent reading
(continued)

SUGGESTED ACTIVITIES

After pupils read silently have them give oral or written reports of materials read.

Have students read a story silently and then tell the story in sequential order.

Have students prepare drawings to illustrate stories they have read. This can be an individual or a group project.

Let a better reader go to the library and read a short story there. After returning to the class, the pupil will tell the story to the class.

Let each child choose a Readers Digest Skiltext (on his reading level) to work on for a specified period of time (perhaps a week). Do follow-up activities after each lesson. Have each student make a list of unfamiliar words and see how they are used in the story.

If there are non-readers in the class, secure enough easy reading books for each student. Record the story and allow the students to listen and read simultaneously. If convenient, allow students who read well to record the story for the non-readers. The non-readers could also dramatize the story.

SUGGESTED MATERIALS

Film: "Reading With a Purpose"

CONTENT

Silent reading
(continued)

Developing
comprehension

SUGGESTED ACTIVITIES

Before beginning a new lesson, review words and activities from previous lesson. Make a spelling list for later use from new words in reading lesson.

Read a story to class and ask oral questions.

Have students make up titles for stories read to them or stories they have read.

Read a story to class, omitting the ending of the story. Have students foretell the ending or write a different ending.

Have students tell what they think might have happened after the story ended by adding another paragraph to the story.

Use worktext exercises to check comprehension of material read.

SUGGESTED MATERIALS

Checkered Flag Series
(Field Ed. Publications)

Bowmar Reading Incentive
Program
(Stanley Bomar Co.
4 Broadway Street
Valhalla, N. Y. 10595)

Bank Street Readers
(McMillan)

CONTENT

Developing library skills

SUGGESTED ACTIVITIES

Learn the physical arrangement of the library.

The following library skills should be taught:

Use of card catalogue

Use of encyclopedias

Use of the atlas

(All students on a junior high level will not be able to master all library skills. However, library lessons should be planned so that each student can make use of the library and experience a feeling of success in so doing.)

Take students to a public library. Have them notice similarity of public library to school library. Help them to realize that all libraries are set up the same way and once they learn a library skill, they will be able to use it anywhere.

Show films as an introduction to library skills. Show the same films again or use additional films to stimulate interest.

SUGGESTED MATERIALS

Films: Library Organization
Writing a Book

CONTENT

Dictionary skills

SUGGESTED ACTIVITIES

Teach alphabetical order to the third letter.

Give students much practice in locating words in a dictionary. When you assign a word ask the student if the word can be found in the first, middle, or last part of the dictionary. Teach them to find the general section first and then locate the specific word.

Introduce diacritical markings and teach students to use these as an aid to pronunciation.

Give oral drills in correct pronunciations of words.

Have students use a word in several different sentences to show that a word may have more than one meaning.

Aid the students in selecting the correct meaning for the usage they make of a word.

Discuss and give practice in using Guide Words on each page.

Show students how the accent mark is an aid to pronunciation.

Make simple dictionary booklets. Have students find pictures to match words.

SUGGESTED MATERIALS

Dictionaries

CONTENT

Functional reading

1. Reading maps

Draw simple maps on the board. Start with a map of the schoolroom and then progress to maps of school and local community. Have students point out and help fill in streets and landmarks on these maps.

Continue working on directions (E, W, S, N, NE, NW, etc.) while doing map work.

Plan a field trip in the community (ex. Nature Museum). Draw a map of route to take. Draw a map of building before and after the trip.

2. Written assignments and directions

Write simple assignments on the board. Teach pupils to read them independently. Gradually increase the complexity of the directions.

List activities for the day on the board. Have students copy the list and then cross off each item as it is completed.

Write out messages for pupils to read and give to another person orally.

SUGGESTED MATERIALS

Teacher drawn maps

Local maps obtained from Service Stations, Chamber of Commerce, etc.

CONTENT

Functional reading
(continued)

3. Current events

4. Job related reading

5. Protective reading

6. Content reading

SUGGESTED ACTIVITIES

Allow pupils to put notices they find interesting on the bulletin board.

Frequently post brief notices of general interest on the bulletin board.

Provide reading material related to jobs or job training for students to use in guided study periods and in free reading time.

Have pupils make scrapbook of common signs used for safety and protection.

Have pupils drill each other with flashcards.

Make up stories using protective words. Leave blanks for the words and have students fill in the blanks.

Use role-playing. Associate the actions with protective words and signs.

Read textbooks (as Health, Science, Social Studies, etc.). Use exercises in worktexts to check comprehension. Write questions on the board for students to answer after reading textbook materials.

SUGGESTED MATERIALS

Bulletin boards

Children's Newspapers

Daily newspapers

Cartoons

Teacher and pupil made charts

Flashcards

Lists of safety and protection words

Textbooks - Health, Science, Social Studies, etc.

CONTENT

Functional reading
(continued)

7. Newspapers and
Magazines

SUGGESTED ACTIVITIES

Discuss layout of newspaper. Tell major sections of paper and information that can be found in each section.

Use teacher made worksheets to check comprehension of skills.

Use workbook Newspaper Reading for exercises on this type of reading.

Take a field trip to newspaper office. Have discussion and reports after the trip.

Compare children's newspapers - Weekly Reader and Know Your World - with daily newspapers.

Display a classroom copy of daily newspaper as well as children's newspapers for students to read in free time.

Display various magazines in the room and allow time for students to look at or read them.

Help students realize benefits as well as pleasure that can be derived from newspapers and magazines.

SUGGESTED MATERIALS

Weekly Reader

Daily newspapers

Know Your World

Newspaper Reading
(Gary D. Lawson

9488 Sara Street
Elk Grove, California
\$1.60 per copy)

Magazines

CONTENT

Developing an awareness of relationships

SUGGESTED ACTIVITIES

Teach the following skills:

Synonyms - Antonyms

Homonyms

Definitions

Family relationships

Cause and Effect

Drawing conclusions

Fact-Fancy

Figures of Speech

Emotional Reactions

Devise games to heighten interest in learning skills. One example is a variation of the spelling bee. Divide the class into two teams. The teacher says a word. A person on one team must give a synonym for the word. A person on the other team must give an antonym. Allow students to use dictionaries as this will give practice in the use of the dictionary as well as practice in developing other skills.

Have students try to use two words with opposite meanings in the same sentence.

SUGGESTED MATERIALS

Readers Digest
Skilltexts

CONTENT

Reading for
pleasure

SUGGESTED ACTIVITIES

Build classroom library of high
interest - low vocabulary books
for free reading.

Plan classroom space (reading table,
book shelf) where pupil can go to
read.

Provide magazines, newspapers. Allow
pupil to read anything that interests
him (such as cartoons, jokes, poems).

Suggest ideas for reading as recipes,
self-care articles, etc.

SUGGESTED MATERIALS

High interest - low
vocabulary books

Teen Age Tales

Selected comic books
Magazines

ARITHMETIC

ARITHMETIC

Introduction

Basic number concepts taught in elementary grades need to be re-emphasized and continued on the junior high level in a concrete and practical manner.

Educable mentally retardates will show much variation in ability and background. A curriculum must contain meaningful and practical work in which each child can succeed. Teaching methods must be geared to the individual abilities of the pupils. Content emphasis will vary with different pupils, but all arithmetic work should be interrelated to the students' everyday life experiences and to his future needs insofar as possible. Correlation with other subjects will enable the student to apply arithmetic in solving his everyday problems.

Even though emphasis is placed on practical and functional arithmetic for the EMR pupil, the teacher still must provide much drill work in the fundamental concepts of arithmetic. These drills should be of short duration and should be used frequently.

Educable mentally retarded students must be shown that arithmetic is useful and necessary in his life. He must know why he needs to learn arithmetic. Rote mastery of skills will be of little benefit to the EMR child.

ARITHMETIC

Objectives

1. To recognize that mathematics is a part of our daily activities.
2. To be able to count, read, and write numbers as needed in everyday living.
3. To be able to apply basic number skills to everyday problems.
4. To be able to use measurements as needed in daily living.
5. To be able to tell time and to use concepts of time as needed in daily experiences.
6. To recognize money by sight and by value.
7. To develop a useful and meaningful arithmetic vocabulary.
8. To introduce simple banking and services banks perform.
9. To introduce the fundamentals of budgeting and the benefits derived from budgeting.

CONTENT

I. Basic Skills

A. Addition

1. Mastery of addition facts into groups of ten until the pupil has mastered these combinations.
Teach the reverse combinations at the same time. After the pupil is able to recognize a group by sight, gradually increase the sum of the groups.
2. Addition with carrying
3. Addition with zeros
4. Simple column addition
5. Checking addition
6. Addition of dollars and cents

Use oral drills with basic combinations.

Use chalkboard drills

Use flashcards to increase mastery of addition.

Teach the child to see amounts in terms of tens and one. Use counting sticks or tickets arranged in groups of tens. Gradually work from using concrete objects toward abstract reasoning.

Use films and filmstrips for illustrations and reinforcement.

Use number line to teach addition and subtraction.

When teaching addition of dollars and cents, use only two coins at first. Practice putting two groups of coins together by separating the groups into two piles of like coins. Gradually increase complexity of this skill.

SUGGESTED MATERIALS

Concrete objects

Flashcards

The New Working With Numbers - Book 2 (Steck-Vaughn)

Working With Numbers - Book 3 - (Steck-Vaughn)

Working With Numbers - Book 4 (Steck-Vaughn)

Counting sticks or tickets

CONTENT

7. Appropriate vocabulary and symbols

add, plus, put together, more, sum, total, all-together, etc.

B. Subtraction

1. Mastery of subtraction facts.

2. Subtraction with borrowing

3. Subtraction with zero

4. Subtraction with dollars and cents

5. Checking subtraction.

6. Vocabulary more than less than, minus, larger, smaller, take away, subtract, etc.

SUGGESTED ACTIVITIES

Teach appropriate vocabulary and symbols for each skill as the skill is being taught.

Make flashcards and charts of the vocabulary and symbols to be used for matching exercises.

Begin with a small number of objects. Take away part of the group. Use oral practice before asking the child to write the answer.

Use flashcards to increase mastery of subtraction.

Use bundles of sticks to teach borrowing. Take away part of the group. Show that one group of 10 sticks must be broken up into ones in order to subtract.

Use films and filmstrips for illustration and reinforcement.

Use dimes and pennies at first when teaching subtraction with dollars and cents. Show that one dime has to be changed into pennies before subtracting.

Use flashcards and charts to teach sight recognition of subtraction vocabulary.

SUGGESTED MATERIALS

Flashcards

Teacher made charts

CONTENT

C. Multiplication and Division

Teach these two skills as inverse relationships. More emphasis should be placed on multiplication than division since this is a process that the child will use more as an adult. Use practical, meaningful experiences to teach these skills. For example, plan to bring some candy to class. Ask how many pieces you should bring if each child is to get two pieces.

After the teacher has brought candy, ask how many pieces each child will get.

Teach all division by the long division method. This is easier to understand and does away with the necessity of teaching one process by two methods.

D. Fractions, decimals, and percent- tages

Explain why we use fractions.

Explain denominator and numerator.

Use many varied experiences to teach concepts of whole, half, fourth, third, etc.

Have students fit together fractional parts to make a whole.

SUGGESTED MATERIALS

Films: Meaning of Long
Division-Multiplicat-
ion for Beginners

Films: Adding Fractions
Meaning of Fractions
Multiplying Fractions
Parts of Things
What are Fractions
Meaning of Percen-
tage
Per Cent in Every-
day Life

CONTENT

D. Fractions
(continued)

SUGGESTED ACTIVITIES

Provide games using fractional parts for the students.

Bring articles to class to be divided into parts (apples, candy bars, etc.)

Move from oral work to written work on addition and subtraction of simple fractions.

Explain and give practice work on finding lowest common denominator.

Work on reduction of fractions.

Work on decimals and percentages in the junior high arithmetic program. Stress only the skills that the pupil at this level needs in his everyday living.

Explain the use of decimals in dollars and cents.

Explain the meaning of digits to the right and left of decimal point.

Develop knowledge and skills necessary to compute sales tax on various items.

Use films to introduce and strengthen knowledge of skills pertaining to decimals and percentage.

SUGGESTED MATERIALS

Games that contain fractional parts

Articles to be divided into parts

Written exercises (ditto sheets)

Worktexts

Continental Press duplicating materials

Working With Numbers
(Stock)

Films: What are Decimals
Decimals are Easy
Meaning of Percentage

CONTENT

Fractions
(continued)

- II. Reading and Writing Numbers
- A. Identifying and writing numbers
 - B. Counting by 1's, 2's, 10's to 100
 - C. Ordinal numbers to tenth place
 - D. Symbols of fundamental operations
 - E. Writing numbers in columns from dictation

SUGGESTED ACTIVITIES

Explain the relationship of percentages to fractions and decimals. For example, 50% is the same as $\frac{1}{2}$ or .5.

Practice reading and writing numbers at every opportunity, as phone number, house number, room number.

Make address book of class members listing each child's address and phone number.

Fill out simple application forms - date, date of birth, house number, phone number, etc.

Fill out order blanks from catalogues using page number, item number, etc.

Count books in room by 1's, 2's, etc.

Count off classmates by 2's, 5's.

Look at textbooks and find copyright dates.

Use maps - look up mileage from town to town.

Read and write auto license numbers.

Study price lists. Practice reading orally.

Use ordinal numbers as needed.
Use calendar work daily.

SUGGESTED MATERIALS

Telephone Directory

Textbooks

Calendars

Mail order catalogues

Maps

Films: How Do You Count

Let's Count

Understanding Num-

bers: Big Numbers

Donald in Math

CONTENT

III. Time Concepts

A. Meaning of o'clock, clock, hour

B. Time as related to important daily activities

C. Telling time by the hour, half-hour, quarter-hour

D. Meaning of afternoon, morning, mid-evening, mid-night, noon

E. Meaning of A.M. and P.M.

SUGGESTED ACTIVITIES

Discuss history of time.

Find pictures of early methods of telling time such as sun dial, etc. and make scrapbook showing evolution of time pieces.

Teach A.M. and P.M. by adding these to any references made to time. Ex. It is 11 A.M. - time to go to lunch.

Use oral drills pertaining to time.

Have daily written drills using commercial or teacher made materials.

Use ditto sheets of clock faces showing certain times and have students fix individual clocks to show correct time.

Use ditto sheets of blank clock faces and have students mark times on the faces dictated by the teacher or written on the board.

Have pupils practice telling time by hour, half hour, quarter hour.

Have pupils make clocks using Roman and Arabic numerals.

Have pupils make out daily time schedule for school and home.

SUGGESTED MATERIALS

Large classroom clock

Individual cardboard clocks

Continental Press duplicating materials

CONTENT

IV. Calendar

A. Practice in locating the day of the week and date of the month

B. Holidays

C. Birthdate

D. Weather Record

SUGGESTED ACTIVITIES

Use calendar daily, letting pupils mark day of the month.

Have pupils make calendars to tape to their notebooks

Have oral and written drills on days of the week and months of the year.

Recognize pupil's birthdays, special holidays, etc.

Learn the number of days in each month.

Have each pupil compute his age in years, months, weeks, and days.

Prepare exercises on daily weather and seasonal activities. Tie this in to calendar work.

V. Money

A. Identifying and writing money with ¢ and \$ signs

B. Sight recognition of dollars and cents up to \$10.00

Use real money if possible until child has a fair understanding of money. Then switch to play money if it is more practical.

Set up a classroom store using various boxes or items teacher and students have brought.

SUGGESTED MATERIALS

Large calendar

Small pupil-made calendars

Duplicating materials

Films: The Calendar - Our Record of Time
The Calendar - Days, Weeks, Months

Continental Press materials

Money Makes Sense

Using Dollars and Sense

Games: Monopoly

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

V. Money
(continued)

Use oral and written drills to learn to identify money.

C. Use of news-
paper for
practice using
money

Give each child a specified amount of money. Let him use newspaper advertisements to select an outfit, listing each article he bought and the price for it. The child then adds prices of articles to find total cost. If the total cost goes over the amount of money he has, he must exchange some articles for cheaper ones.

Newspapers

Let children pretend they are getting married and have saved \$500 to buy furniture and appliances. He may shop in the advertisements for sales or in the "want ads" for used things. The student will quickly see the difference between necessities and luxury items.

Use Thursday edition of The Charlotte Observer for food ads. Have children make a shopping list and add cost of groceries. Be sure to add sales tax to total cost.

D. Making change up
to \$5.00

Practice making change. For practice, give each child mimeographed copies of price lists. Have them count the change that would be returned if the customer gave them \$1.00, \$2.00, \$5.00.

Films: Money and Its Uses
Making Change for a
Dollar

CONTENT

V. Money
(continued)

E. Value of penny,
nickel, dime,
quarter, half-
dollar

F. Practical
knowledge
of money

SUGGESTED ACTIVITIES

Learn values and symbols of money by using oral discussions and written exercises.

Have students list items they think can be bought for penny, nickel, dime, quarter, and half-dollar. Then look for these items in newspaper advertisements to find actual cost.

Give students much practice in computing sales tax on various items. Have students make a chart for sales tax similar to ones found on cash registers.

Discuss quantity buying. Compare prices of single items with items bought in quantity.

Discuss cost of credit buying. Help students understand that they pay back more than the cost of the article they bought.

For practical experience, give each student mimeographed copies of lunch menus and prices. Tell each student they have a certain amount of money to spend for lunch. Let them order a meal within the budget of what they have to spend.

CONTENT

Money
(continued)

VI. Banking
(simple)

SUGGESTED ACTIVITIES

If possible, take students to a public cafeteria (as the S & W) and let them eat a meal there paying for their own lunch.

Discuss services of banks

Checking accounts
Savings accounts
Loans
Travel Checks
Bonds

The banks in Charlotte will give you much material - blank checks, etc.
Invite a person from a bank to come in and talk to the class.

Take a field trip to a bank.

Take a field trip to the Federal Reserve Bank.

Compare interest on bank loans with interest on loans from loan companies.

Use films and filmstrips to strengthen learnings.

VII. Budgeting

Discuss sources of family income and expenses of the family. From this discussion help students see need for budgeting in most families
Have students make sample budgets for given amounts of income.

SUGGESTED MATERIALS

Films: How Banks Serve
Pay to the Order of
Using Bank Credit

Filmstrips:

Managing Your Money Series
Earning Your Money
Paying Your Bills
Spending Your Money
Borrowing Money
Making Money Work for You
Buying Insurance

CONTENT

VIII. Measurements

- A. Simple linear measurements
- B. Liquid measurements
- C. Dry measurements
- D. Weight

SUGGESTED ACTIVITIES

Teach measures that are within the experience of the child.

Give oral and written tests for knowledge of common measurements.

Measure heights and weights of students at various times during the year. Compare the heights and weights to see gains or losses.

Measure furniture in the room and measure size of the room.

List and learn meanings of measuring tools:

- thermometer
- ruler
- clock
- calendar
- jars
- scales
- spoons
- cartons

Discuss how we use measurements in daily living.

Discuss and weigh different foods. Compare weights of various sizes of articles from the grocery store. For instance, find the weight of small, large and economy sizes of detergents.

Plan to make something simple as place mats or cookies, etc. Stress accurate measurements of parts.

SUGGESTED MATERIALS

Various measuring instruments - rulers
yardsticks
tape measure
scales
measuring cups
measuring spoons

Charts of measurements

Films: Measurement

- Let's Measure: Ounces
Pounds, and Tons
- Let's measure: Pints
Quarts, and Gallons
- Let's Measure: Inches
Feet, and Yards
- Weights and Measures

SUGGESTED ACTIVITIES

CONTENT

VIII. Measurements (continued)

Estimate measurements and then measure items to compare the estimate with actual measurement.

Discuss sizes of clothing, shoes, etc. Explain that this is a type of measurements.

Do simple scale drawing of classroom.

Estimate the distances from classroom to the gymnasium, the office, the library, and the counselor's office. If possible measure these distances and compare with the estimates.

IX. Problems

A. Informal problems
Plan problem solving in relation to daily experiences of pupils.

B. One-step problems limited to addition and subtraction
Use problems in connection with teaching of each fundamental operation.
Develop story problems pertaining to daily activities of students rather than relying on problems in work texts.

C. Fundamental concepts of problem solving implied in such words as total, in all, altogether, how much more, difference, sharing, etc.
These are not always meaningful to the student.
Dictate number problems and have students write the numbers as the problem is read.

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

- IX. Problems
(continued)
- Have students work simple problems.
Check for weaknesses in problem solving and provide individual activities.
Have students tell the teacher of difficulties that they are aware of within themselves.
- X. Social Uses
- A. Cafeteria
- Make up problems pertaining to daily school activities of children. Use natural situations whenever possible.
- B. School store
- Develop and work on money problems as related to lunchroom and the purchase of school supplies.
- C. Library - fines and damages.
- D. Books and supply fees
- Distribute list of cost of food in lunchroom and a list of school supplies which can be purchased at the store with their cost. Have students plan before they go to the cafeteria or to the school store what they will buy and how much it will cost.
- E. Address - phone numbers
- F. Finding page numbers
- Have students figure the fees they owe for books at the beginning of the year. If any students plan to pay their fees on a weekly or monthly basis let them keep a record taped to their notebook and do the necessary arithmetic each time they make a payment.
- G. Heights and weights
- H. Sales tax
- I. Budgeting as it applies to personal purchases.
- J. Recognizing bargains

SOCIAL STUDIES

SOCIAL STUDIES

Introduction

One of the major goals in the education of the mentally retarded is the development of adequate social maturity. Mentally retarded children are isolated in the regular grades, largely because of unacceptable social behavior and not always because of poor learning ability.

Formal instruction of basic social concepts is important, since we can expect limited incidental learning from these children. Due to the limited socio-economic background of many of the EMR's, basic social concepts need to be taught in the classroom.

The aim of Social Studies teaching is two-fold:

1. The development of social consciousness.
2. A knowledge of our culture.

Social consciousness includes a modification of personal behavior to conform to acceptable group standards; the ability to share responsibility and rewards as a member of a group; the impulse to assume and discharge fully all obligations to the situation in which one finds oneself - head or member of a family group - worker - citizen - etc.; and the desire to improve one's lot in life, in keeping with ethical standards.

A knowledge of our culture includes information about the community in which we live, its resources and health services, education, recreation, acceptable social activities, religious life, and employment opportunities. It also includes a broader knowledge of our city, our government, service agencies, and a picture of the many patterns of life today. The emphasis in the area of our culture is on the present and the future; the history of our city, county, state, and country is presented as one means of interpreting more fully the situation in which we find ourselves today.

Social Studies instruction is both direct and indirect. The indirect presentation is made through the daily living in the classroom. The direct presentation is offered through study of the various aspects of our life today with a conscious emphasis upon responsibility, relationships, and cooperation. Although social studies concepts are interspersed throughout the curriculum, a specified period of time should be allowed each day for formal instruction in this subject.

The outcomes of a Social Studies program for the mentally retarded should be the students' understanding of the place of the student in a family, the family's place in the community, and the personal qualities necessary for this place. The student should be made aware of the kind of facilities and services of his community and how all of this relates to the satisfaction of his needs for daily living.

SOCIAL STUDIES

Objectives

1. To develop an understanding of oneself and one's role in the family.
2. To develop an understanding of family living as a basis for community living.
3. To develop an increasing ability to get along with others.
4. To develop growth in adjusting to new situations.
5. To develop an appreciation of community services.
6. To develop an appreciation of and a desire to be good citizens.
7. To understand that each person has a contribution to make to society.
8. To know how the school, the family, and the neighborhood relate to the whole city.
9. To develop a basis for understanding of local government.
10. To learn some important facts about North Carolina.

CONTENT

Orientation

SUGGESTED ACTIVITIES

Take a tour of the school plant paying particular attention to location of rooms students will need.

Have a camera to make pictures of the school tour. Make a booklet about the school using the pictures and stories written by the students.

Make a list of the school staff. Work on capitals and abbreviations. Have students make drawings of staff members and display these in the room.

Invite various school personnel to class to give general description of their job (principal, assistant principal, counselor, secretary, janitor).

Have pupils interview various staff members and report to the class.

Formulate classroom rules. Discuss why rules should be observed.

List and discuss school rules and regulations.

Practice changing classes.

Have students fill in a diagram showing where various rooms are. Include room number, as well as teacher's name and subjects.

SUGGESTED MATERIALS

Large map of school

Individual maps of school

School handbook

CONTENT

Orientalion
(continued)

SUGGESTED ACTIVITIES

Discuss curriculum plans for the year with students.

Practice fire drills separately before an actual fire drill.

Discuss extracurricular activities of the school and encourage students to participate.

Learn how to use lockers and when to use them.

Discuss and formulate list of duties pertaining to physical care of classroom.

Let the class help plan a bulletin board that can be put up the first or second week of school. Use ideas about the school and general facts about Charlotte.

Make weekly charts assigning duties on a rotating basis.

Make and display daily time schedule.

Help the students make a school calendar that can be displayed in the room during the year. Put all school dates on it. As the year passes, events can be added. Work on days of the week, months of the year, various holidays, etc. in conjunction with calendar work.

SUGGESTED MATERIALS

List of school rules pertaining to fire drills

CONTENT

Understanding of
Oneself

1. Self-understanding

Discuss why people behave as they do.

Help child to understand that he is
an individual.

Have pupils write stories about them-
selves and read to the class.

Discuss each child's role in school.

Make charts on acceptable behavior in
school.

Role-playing - acceptable and non-
acceptable behavior in different
situations.

Discuss getting along with people
who are different from us (back-
ground, race, religion, etc.)

Have students read stories in
Famous Negro Americans or teacher
can read these stories to the class.

Make bulletin boards and booklets on
dating problems.

Allow ample time for free guided
discussions of dating problems.

SUGGESTED MATERIALS

Films: Act Your Age
The Bully
Belonging to a Group
The Good Loser
Making Friends
The Procrastinator
The Show-Off
Shy Guy
The Griper

Famous Negro Americans
(Steck-Vaughn)

Films: Choosing for
Happiness
A Date for Dinner
Dating Do's and
Don'ts

CONTENT

Understanding of
Oneself
(continued)

SUGGESTED ACTIVITIES

Discuss going steady. List on the board advantages and disadvantages.

Initiate oral evaluations of self and class members. Units of work may arise from these discussions.

2. Personal
Appearance and
Health

Plan and teach units on grooming, cleanliness, care of parts of the body (skin, teeth, hair, etc.), proper diet, sleep habits, basic body functions. Use concrete materials where possible. For example, free toothbrushes and toothpaste may be obtained from various places.

Assemble kits for personal grooming. For example: deodorant, comb, brush, toothbrush, toothpaste, etc.

Have daily inspection of hands, ears, nails, teeth, and skin.

Make weekly inventory charts for grooming.

Invite resource people to speak to class. Ex. school nurse
beautician
barber
clothing salesman

SUGGESTED MATERIALS

Filmstrip: Personal Appearance

Films: The Clothes We Wear
Clothing

The Care We Give Our Clothes
(Steck-Vaughn)

New Fabrics, New Clothes
and You
(Steck-Vaughn)

CONTENT

3. Manners and Courtesy

a. Table manners

SUGGESTED ACTIVITIES

This subject should be taught all year in natural situations rather than planning one unit on it.

Invite cafeteria worker to speak to class on table manners.

Plan a simple party in the room to practice good table manners. Remind students daily of this.

Make diagrams of correct table settings. Have students practice setting table. Do not emphasize use of many utensils that they are not likely to use.

b. Politeness

Use daily reminders to keep students aware of what is expected of them in politeness.

Plan bulletin board displays depicting politeness.

c. How to behave in assembly programs, field trips, sports events, etc.

Make bulletin boards to stress good behavior at public events.

Have class discussions before participating in events. Evaluate behavior afterwards.

Use charts, films, and filmstrips to reinforce learnings on expected behavior at public events.

SUGGESTED MATERIALS

Filmstrip: Table Manners

Filmstrips: School Function
You're in Public
Personal Relationships
You're on a Trip

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Manners and
Courtesy
(continued)

d. Meeting others

Role-playing to practice making introductions. Use every natural situation that arises to let students make introductions.

Make charts of rules for introductions.

Use films and filmstrips.

e. Telephone manners

Use Bell Telephone Kit for role playing. This is a complete unit in itself and can be taught in approximately two weeks.

Bell Telephone Kit

f. Social standards

Units can be developed on the following subjects. Opportunities will arise daily for discussion of these. Use natural situations and create other situations to stress development of these skills.

- a. Getting along with others
- b. Building self-confidence
- c. Teaching responses to criticism and suggestions
- d. Learning to think of others
- e. Sharing hobbies and games
- f. Teaching student to assume responsibilities
- g. Teaching student to complete tasks started

Filmstrips: Growing in
Citizenship Series
A Good Citizen Respects
Property
A Good Citizen Lives
Honestly
A Good Citizen is Well-
Informed
A Good Citizen Obeys
Rules and Laws
A Good Citizen Grows in
Responsibility
A Good Citizen Cooperates
With Others

CONTENT

Social standards
(continued)

SUGGESTED ACTIVITIES

- h. Work on building continuing friendships
- i. Teaching student to control temper
- j. Develop habits of obedience, self-control, cooperation, cheerfulness, punctuality, and reliability.

9. Safety at school, Have general class discussions on home and on the safety in various places.
street

Use films and filmstrips to reinforce safety advice.

Invite resource persons to speak to class (policeman, etc.)

Make class charts and booklets showing safety measures.

Find newspaper pictures showing various types of accidents. Have class discussions on how they might have been avoided.

Observe students throughout the day for safe or unsafe practices. Point out the safe practices you have observed as well as unsafe ones.

SUGGESTED MATERIALS

Films: Fire Prevention in the Home

CONTENT

The Family
a. Relationships
of family mem-
bers

Teach relationships of family members.
Have students draw pictures of their
family or bring photographs to be
displayed.

Discuss makeup of various families.
Stress that families are different.
Ex. Some families have father, mother,
children, Other families might be
made up of mother and children.
Still others might consist of
grandmother and children.

Write stories about family.

b. Appreciation
of roles of
family members.

Discuss various jobs of mothers
and fathers.

Emphasis should be on the fact that
in a happy family every member makes
a contribution.

c. Ways to help
in the home

Collect and mount pictures that
show ways of helping at home.

Practice housekeeping duties
such as dusting, cleaning, etc. in
the room.

d. Playing to-
gether with the
family

Plan bulletin boards showing
families playing together

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Films: The Family
Baby Sitter

- | | |
|---|---|
| e. Sharing in the family | Discuss ways in which students can share with family members. |
| f. Tolerance for unfortunate situations in the home. | Discuss specific problems pupils might have at home.
Read stories to the class that show how teenagers cope with various family problems. |
| g. Teenagers need and struggle for independence | Class discussions on why teenagers feel they must rebel and why parents react as they do.
Show films and filmstrips. |
| 2. Economic learnings of | Discuss jobs of family members and probably incomes from these jobs. |
| a. Understanding of home activities related to providing food, clothing, and shelter. | Use chalkboard to work out example budgets for various incomes.
Have pupils work out budgets that fit their particular income level.
Have pupils make individual records of jobs they can do to help at home. |
| b. Homemaking Skills | Discuss how caring for clothing can save money. |
| 1. How child can help with meals | |
| 2. How child can help with keeping the home clean. | |
| 3. Caring for younger children | |
| 4. Caring for clothing. | |

The Care We Give Our
Clothes (Steck)

CONTENT

3. Religious and Moral Learnings
- a. Teaching student to be honest with himself and others.
 - b. Concepts of right and wrong
 - (1) cheating
 - (2) lying
 - (3) stealing
 - (4) using bad language

SUGGESTED ACTIVITIES

Many opportunities arise each day for spontaneous and incidental teaching of these concepts.

Initiate class discussions. Encourage all students to participate.

Use films and filmstrips

Read stories to the class that stress concepts you are teaching.

Discuss different churches students attend, taking care not to interject personal feelings or attitudes. Have students bring in church bulletins from churches they have attended.

4. Use of Leisure Time
- a. Appreciation and enjoyment of games, poems, stories, songs, rhythms, music, and dancing.

Display reading material pertaining to leisure time activities.

Allow class time for teaching some leisure time activities.
Ex. dancing
 Listening to records.

Teach students to play outdoor games as Red Rover, Red Light, etc.

SUGGESTED MATERIALS

Teen Age Tales

Films: Cheating

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

CONTENT

Use of Leisure Time (continued)	Have students report on leisure time activities of weekend.
b. Use of recreational facilities such as the library, park, TV, churches, etc.	Discuss time and money spent on various leisure time activities. Discuss ways students might earn money to spend for leisure time activities.
	Encourage participation in community activities, as library, park, Y.M.C.A., Y.W.C.A., Scouts, etc.
	Discuss church activities available to students.
	Display newspaper clippings explaining and announcing leisure time activities in the community.
	Locate movie theaters on a city map. Use newspaper to see what movies are playing. Discuss appropriate movies for this age student.
	Discuss things students can do for fun with friends, as bowling, picnics, parties, movies, roller skating, ice skating, etc.

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

c. Hobbies and interests

Display pictures of various hobbies or interesting activities for this age student.

Pictures

Encourage students to begin hobbies.

Exhibit collections or hobbies of pupils.

d. Proper behavior and dress for various leisure time activities

Make charts showing proper dress for various occasions.

Let students look through catalogues and cut out outfits suitable for various occasions.

Catalogues

Have class discussions on proper behavior in various activities.

Use role-playing for proper behavior in certain situations. Let students act out bad behavior, then discuss it and let them work out more acceptable behavior for the situation.

Instruct students to observe good and bad behavior of strangers during leisure activities and then report on their observations in class.

CONTENT

Community

1. Knowledge of places in the community, such as stores, streets, churches.

2. How to help in the neighborhood

3. How to have a friendly neighborhood

4. How to have a pretty neighborhood

SUGGESTED ACTIVITIES

Draw maps of the community.

Make a model of the community using milk cartons, etc.

Take a walk around the school community pointing out various places of interest.

Use films and filmstrips.

Have class discussions on ways to help in the neighborhood. For example, if an elderly person lives in the neighborhood, the student could run errands for her or help clean the yard, etc.

Emphasize that in order to have a friendly neighborhood, the student will often have to take the initiative. Encourage students to speak to everyone in the neighborhood. Have them report to class on interesting experiences that might arise from this.

Make scrapbook of pictures of attractive homes. Discuss why these homes are attractive and the work and pleasure involved in keeping them attractive.

SUGGESTED MATERIALS

Foundations of Citizenship
Book 1 (Frank E. Richards)
(For 9th Grade)

The Human Value Series
Values to Learn
(Steck-Vaughn)
(For 8th Grade)

Values to Share
(Steck-Vaughn)
(For 9th Grade)

Communities and Social
Needs (Laidlaw)
(For 7th Grade)

Target Series: Mafex
I Live In Many Places
The Old Shoe Mystery

Films: Our Community
Problems of Housing

CONTENT

Community
(continued)

5. Community facilities for enrichment
6. Community resources

The City
1. Dependence of family, neighborhood, and city on other people for food, shelter, and clothing.

SUGGESTED ACTIVITIES

Discuss specific ways in which each student can make his own home and yard more attractive and at the same time improve the appearance of the neighborhood.

Take a field trip to places in the community, such as park and libraries.

Help students learn how and when to use community resources, as:

- a. emergencies - telephone, fire police, doctors
- b. communications - letters, postal service, telegrams, telephone, newspaper

Use class discussions, films, and filmstrips to show dependence on others for basic necessities.

Make posters showing evolution of a house - lumber is grown by one person, has to be processed by another, bought by another, house built by another, etc.

Trace route of food from farmer to city homes.

Trace evolution of a cotton garment from cotton plant to retail store.

Compare ways we live with ways pioneers lived when they were totally dependent upon themselves for basic necessities.

SUGGESTED MATERIALS

Film: Communications and the Community

Films: The Changing City
Growth of Cities
Living City

CONTENT

The City

(continued)

2. Realization that the world extends beyond the immediate environment of the child - that many of the things in daily use come from distant places.

3. Knowledge of different workers in the neighborhood and city and proper thoughtfulness for people in these areas

4. Ability to use local transportation system

SUGGESTED ACTIVITIES

Examine objects in the room and list the different places they came from. Ex. books, clock, furniture, etc.

List as many community workers as students can think of. Discuss how different workers serve us and qualifications different workers must have in order to serve us.

Take field trips to as many places as possible to cement learnings on various workers.

Display books on community workers and allow time for students to look at and read them.

Invite various workers to class, as policeman, fireman, bus driver, phone company representative, etc.

Take a bus ride. Many students will already have the ability to ride alone and transfer on busses.

Discuss proper behavior and conduct on busses. Emphasize that many times proper conduct is necessary for safety reasons.

SUGGESTED MATERIALS

They Work and Serve
(Steck-Vaughn)

CONTENT

The City
(continued)

5. City agencies

SUGGESTED ACTIVITIES

Read and discuss newspaper stories on how agencies help people in need.

Discuss and list services of various agencies.

List agencies where families might go to receive help. Ex. Health Department
Welfare Department
Clinics

Collect literature on various agencies and make a scrapbook or file of them.

Government

1. The school

Use any available literature on school government. For example, the Student Council Guidelines.

Encourage participation in Student Council activities.

Allow time for class representative to report on Student Council meetings.

Have class discussions on need for school government and emphasize democratic concepts of this government.

Discuss the Board of Education - what it is - services it performs - who is on the board - how they are chosen - and how they help us. Bring in newspaper clippings on various board actions.

CONTENT

Government
(continued)
2. City and county
government

SUGGESTED ACTIVITIES

Discuss who makes the rules for our city. Help students see that through voting, everyone can have a voice in the rules that are made.

Make a chart showing structure of local government. Discuss how various officials get their jobs.

Discuss different types of local government. Emphasize type of government used in Charlotte.

Invite local government official to visit class.

Take a field trip to the courthouse.

Use newspapers to read about current news of local government.

Visit voting places if possible.

Discuss various federal programs that would pertain to students as:
Urban Renewal, Model Cities, Neighborhood Youth Corps.

Use TV program - "Keys to Our City."
Pre-plan this carefully.

SUGGESTED MATERIALS

CONTENT

Government
(continued)

SUGGESTED ACTIVITIES

Learn names of local government officials.

Have students find out where their parents vote.

Discuss taxes and relation this has to government. For example, government officials decide how much taxes we have to pay. Taxes go to pay salaries of some officials.

List things taxes pay for and help students make a personal application of this knowledge.

Discuss where and when taxes are paid.

Visit tax office if possible or have a representative from this office speak to class.

SUGGESTED MATERIALS

CONTENT

History, Geography
and Current Events

SUGGESTED ACTIVITIES

Teach North Carolina history, relating this to Charlotte as often as possible.

Use library, films and filmstrips, supplementary books and any source available for information on N. C.

The major points of emphasis in N. C. history for the EMR child are:

1. The beginning of N. C. - early inhabitants
2. Trees, flowers, wild life, resources
3. People of N. C.
4. Communication and transportation
5. Indians in N. C.
6. Three sections of N. C. (Piedmont, coastal, mountains)
7. Products, industries
8. State government and officials
9. Major cities of N. C.

Some activities re use in teaching N. C. history are:

Map reading - learn to recognize sections of N. C. - mountains, rivers, coast, etc.

Map making - outline maps of N. C. - show mountains, major rivers, etc.

Write about a summer vacation in N. C.

SUGGESTED MATERIALS

N. C. History II - Workbook
Paul Leftovich
(Harlow Pub. Co.)

N. C. Revised - Lifter
(Harcourt, Brace & World)

Films:

Old North State (Sou. Bell
Tel. Co.)

Land of Beginnings
Mirror of the Past
Southeastern States
Road to Carolina

CONTENT

History, Geography,
and Current Events
(continued)

SUGGESTED ACTIVITIES

Write letters to different cities in N. C.
to obtain information on those cities.

Research and report on Indian tribes in N. C.

Role playing - story of Lost Colony

Use plaster of paris to make an outline
relief map of N. C. Students can use
tempera paint, twigs, cotton balls, etc.
to represent different features.

SUGGESTED MATERIALS

SCIENCE - HEALTH

-89-

SCIENCE - HEALTH

Introduction

The general aim of a science curriculum is to help the educable mentally retarded child understand his environment and to enable him to adjust to it by relating himself to his environment in his daily living.

Experiences in science must be realistic to the child if he is to understand science concepts and apply them to his own life. A science curriculum for the educable mentally retarded child should be carefully limited, as many science concepts will have little or no meaning for him and be of little practical value to him.

SCIENCE - HEALTH

Objectives

1. To provide the educable mentally retarded child with some knowledge of the common facts about the world in which he lives.
2. To give the educable mentally retarded child some worthwhile experiences that will help him cope with his environment.
3. To prepare the student to care for his adolescent body.
4. To prepare the student to care for his physical and mental needs.
5. To learn about the things in our environment that contribute to health, welfare, and comfort, as well as things that are harmful.
6. To develop an understanding of why cleanliness is important.
7. To develop an understanding of why we must keep our surroundings clean.
8. To know the value of safety.

CONTENT

- I. Living things
 - A. Plants
 - 1. Kinds of plants and how they grow
 - a. Flowers
 - b. Fruits and vegetables

SUGGESTED ACTIVITIES

- Collect pictures of different kinds of flowers and vegetables.
- Bring real flowers and vegetables to class to study.
- Bring seeds, bulbs, and cuttings to class to show different ways plants begin. Plant these at school.
- Make drawings of plants to show different stages of growth.
- Take a field trip to a local nursery.
- Disect seeds and bulbs to see inner structure.
- Find pictures of various places plants will grow. Ex. sand, good soil, rocks
- Discuss how some plants make their own food.
- Make a chart showing how seeds are dispersed (water floaters, some blow through the air, etc., and some are carried on animals)
- Use films and filmstrips to stimulate interest in science activities.

SUGGESTED MATERIALS

- Science for a Changing World Book 2 (Benefic Press)
(Use in grade 7)
- Science for a Changing World Book 3 (Benefic Press)
(Use in grade 8)
- Science for a Changing World Book 4 (Benefic Press)
(Use in grade 9)
- Flower and seed catalogues
- Real flowers, seeds, bulbs, and cuttings
- Films: Life of a Plant
Life of Plants
Plant Growth
Plants Make Food
- Supplementary books
Exploring and Understanding Series
Amphibians and Reptiles
Our Changing Earth
Rockets and Satellites
Solar System
(Benefic Press)

CONTENT

- c. Trees and Shrubs

Take a walk around school yard. Try to identify all the trees and shrubs. Use a reference book to help identify them.

Discuss kinds of trees and shrubs. Have students draw pictures to illustrate.

Discuss and list uses of trees and shrubs.

Read stories about trees.

Plan and teach a unit on conservation of forests.

Make a chart showing benefits we gain from a tree.

- Ex. shade
- fruit
- lumber
- paper products
- leaves for mulching
- beauty

Find pictures of trees from other areas. Ex. palm trees, redwood trees

B. Animals

- 1. Kinds of animals
 - a. Wild animals
 - b. Domestic animals

Have students make a list on the way to school of all the living things they see. Include plants as well as animals.

SUGGESTED MATERIALS

- Films: Trees and Their Importance
- Trees: How We Identify Them
- Trees for Tomorrow

CONTENT

B. Animals
(continued)

- Have children find pictures of different kinds of animals. Plan a bulletin board to show these.
- Discuss different places animals are found. Ex. desert, mountains, etc.
- Discuss taming of wild animals.
- Read animal stories to the class.
- Have students tell about different animals they have seen.
- Discuss animal homes. Have students draw different kinds of animal homes.
- Plan a field trip to the Nature Museum.
- Write reports on different animals.
- Discuss usefulness of birds. Be sure to include beauty as one use.
- Discuss harmfulness of birds.
- Make charts showing birds that are useful and birds that are harmful.
- Discuss migration of birds.
- Have students draw pictures of birds to make a bulletin board display.

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

- Films: Animals At Work in Nature
Adaptations of Plants and Animals
Baby Animals
Plants and Animals
Beach and Sea Animals
Birds are Interesting
Birds of the Dooryard
How Animals Eat
How Animals Move
How Animals Defend Themselves
Insect Enemies and Their Control
Insect: Life Cycle
Insects

C. Birds

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

CONTENT

- B. Animals
(continued)
- c. Insects
 - Discuss insects that are helpful and insects that are harmful.
 - Make charts showing helpful and harmful insects.
 - Have students bring in real examples of helpful insects. Do not allow them to bring insects that are harmful to people even if they bring them in containers.
- 2. Uses of animals
 - a. Food
 - Discuss different uses man makes of animals.
 - b. Clothing
 - Find pictures to show different uses of animals.
 - c. Beauty
 - Use films and filmstrips to stimulate interest as well as strengthen learnings.
- 3. Animals as pets
 - a. Taking care of pets
 - Make a poster showing things that must be done to care for a pet.
 - Read stories about pets.
 - b. How to treat pets

CONTENT

- B. Animals
(continued)
c. training of
pets

SUGGESTED ACTIVITIES

- Show films and filmstrips about pets.
Have students bring pictures of their
pets.
Write paragraphs on pets.
Discuss and discourage cruelty to
animals.
Discuss Leash Law in Charlotte. Let
students tell how this law has per-
sonally affected them.

C. People

1. Parts of the
body
Use proper names for parts of the
body. Explain to the students that
it is better to teach young children
the proper names for parts of the
body rather than "pet" names for them.
Discuss major parts of the body.
2. Systems of the
body and their
functions
Use charts to teach parts and systems
of the body.
Use films and filmstrips.

SUGGESTED MATERIALS

Films: Ears and Hearing
Your Ears
Skeleton
Your Posture
Your Teeth

CONTENT

C. People
(continued)

SUGGESTED ACTIVITIES

Invite school nurse to speak to class.

Use pictures, stories, and discussions to teach functions of body systems.

Have students draw diagrams of parts and systems of the body.

Display charts and pictures that show growth and change in the body.

Invite resource people to explain changes in the body.

Keep charts on individual growth and changes in each student.

Collect and display pamphlets from insurance companies, cosmetic companies, etc.

Plan and teach units on cleanliness, grooming, care of teeth, eyes, hair, etc.

Find magazine pictures of health and grooming aids.

Make individual check lists for hygiene.

Discuss proper care and cleanliness of the body.

SUGGESTED MATERIALS

Health for Happiness
(Steck-Vaughn)

4. Personal
hygiene

Films: Care of the Feet
Care of Hair and Nail
Care of the Skin
Cleanliness and
Health
Cleanliness Brings
Health

CONTENT

C. People
(continued)

SUGGESTED ACTIVITIES

Discuss use of deodorants. Help students understand that boys as well as girls need to use them daily. Explain the difference between deodorants and anti-perspirants.

Develop concept of good health habits to have at school. This can be broadened to include many necessary areas: cleanliness in lunchroom table manners
proper foods to eat
showers in physical education
body cleanliness

5. Mental health

- a. Interest in opposite sex
- b. Conflicts of emotions
- c. Accepting responsibilities

Discuss what mental health is.

Discuss relation of physical health to mental health.

List and discuss basic emotional needs - love, fear, respect.

Use films and filmstrips.

Discuss mental changes that take place when a child reaches adolescence - for example, interest in the opposite sex, a desire to be more independent which sometimes causes conflicts with parents, etc.

Help students understand that with age and maturity comes increased responsibilities.

CONTENT

C. People
(continued)

6. Foods

SUGGESTED ACTIVITIES

Discuss need for certain foods to maintain good health.

Have each student keep a list of foods they eat in one day. Evaluate these lists with the class.

Discuss food habits. Emphasize that any habit can be changed.

Discuss and make chart showing Basic Food Groups.

Have students plan some balanced meals using the Chart of Basic Foods.

Discuss caloric content of foods. Have able students count the calories in a given meal.

Discuss importance of good disposition at mealtime as an aid to digestion. Have students write paragraphs on this.

Discuss and dramatize health hazards and the passing of germs at the table. Set up a corner of the room as a restaurant. Have all the children take part in the role-playing. Watch for coughing, using dishes that others have used, etc.

Plan for a field trip to a local restaurant as a culminating activity for a unit on foods.

SUGGESTED MATERIALS

Films: Digestion of Foods
Eat for Health

We Are What We Eat
(Steck-Vaughn)

CONTENT

c. People
(continued)

7. Diseases

- a. Prevention
- b. Control
- c. First Aid

SUGGESTED ACTIVITIES

- Discuss some diseases of the body.
- Discuss communicable diseases. Have students list diseases they have had.
- Write letters to the Health Department for information on prevention and control of diseases.
- Invite resource people to speak to class.
- Teach preventive measures to take against certain diseases and accidents.
- Discuss simple medications that are used often as aspirin, cough syrup, salves, etc. Point out precautions that must be taken with these as well as with all drugs.
- Point out dangers of taking another person's prescription drugs.
- Discuss what to do when student becomes ill at school.
- Make charts on basic first aid.
- Demonstrate basic first aid procedures.
- Make a list of first aid supplies students should have in their homes.

SUGGESTED MATERIALS

- Films: Body Defense Against Disease
Common Cold
Defense Against Invasion
Health in Our Community
Tobacco and the Human Body

CONTENT

- C. People (continued)
- d. Harmful use of drugs, alcohol, tobacco

SUGGESTED ACTIVITIES

Use discussions, films, filmstrips, charts, and other visual aids to emphasize dangers of using drugs, alcohol, and tobacco.

Have students find newspaper articles that pertain to the use of harmful drugs.

Find magazine articles and display in the room on the use of harmful drugs.

II. Weather and Seasons

- A. Different kinds of weather
- B. Seasonal Weather
 - 1. Characteristics of seasons
 - 2. Effect of seasons on people

Discuss different kinds of weather as related to seasons.

Discuss the effect of seasons on people - clothing, outdoor activities, jobs, etc.

Keep a daily weather chart.

Display a large weather map of the U. S.

Use films and filmstrips.

Have students draw pictures to show different seasons.

SUGGESTED MATERIALS

Films: Alcohol and the Human Body
Drug Addiction
Smoking and You
Tobacco and the Human Body

Films: Weather
Our Weather

CONTENT

C. Formation of
Clouds

- Find pictures of different kinds of clouds.
- Observe the sky and note kinds of clouds on various days.
- Discuss causes of different kinds of clouds.
- Learn about height and size of clouds.
- Discuss formation of clouds.
- Have pupils draw different kinds of clouds.
- Do simple experiments to form clouds.

D. Cause of Rain
and its im-
portance to us

- Discuss cause of rain.
- Discuss importance of rain to people, plants and animals.
- Write paragraphs on how rain helps us.
- Make a simple rain gauge.
- Keep a record of rainfall in Charlotte.

E. Destructive
Weather

- List types of destructive weather - hail, tornado, cyclone, hurricane, etc.
- Discuss differences in types of destructive weather and causes of each.
- Find magazine and newspaper pictures showing weather destruction.
- Discuss protective measures to take during destructive weather.

SUGGESTED MATERIALS

Film: What Makes Rain

Films: Thunder and
Lightning

CONTENT

F. Understanding
Weather Re-
ports

- Study weather maps.
- Listen to TV weather reports.
- Collect weather forecasts and reports from the newspaper.
- Compare weather forecasts with next day's weather report.
- Look up weather in Almanac.
- Discuss usefulness of weather forecasts and reports.
- Tell how weather reports or forecasts influence people.
- Find or draw pictures of various weather instruments.
- Make simple weather instruments.
- Discuss use of various weather instruments.
- Take a field trip to weather station.
- Write reports on use of various weather instruments.
- Practice reading weather thermometer.
- Make thermometers.

G. Weather
Instruments

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

CONTENT

H. Effects of
Weather on
Customs and
Cultures of
People

Discuss effects of weather on clothing.
Discuss effects of weather on activities.
Discuss effects of weather on work and
income.

Use films and filmstrips on weather.

Discuss climate in North Carolina and
effect this has on clothing, industry,
vacationing, etc.

III. Earth and the
Universe

A. Current
Events

1. Space
Explora-
tion

Collect newspaper and magazine clippings.
of space exploration and travel.

Watch TV programs related to space
exploration.

B. The Earth

1. Composition of
earth
2. Land and water
surface

Discuss composition of the earth.

Go to library and make reports on
earth's composition.

Make a globe to show land and water
surface.

3. Movement of
earth

Discuss rotation of the earth - day and
night.

4. Relation of
earth to moon

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Films: Trip to the Moon
Trip to the Planets

Films: What Makes Night and
Day

Understanding Our
Earth: Rock and
Minerals

Understanding our
Earth: Soil

This is the Moon
The Restless Sea

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Demonstrate earth's rotation using a globe.

Discuss revolution of earth around sun.

Find pictures of various stages of the moon.

Use films and filmstrips.

Collect pictures of various features of the earth's surface.

Discuss tides - causes - effect of moon on tides.

C. Relation of
Earth to
other planets
and to entire
universe

Make charts of the earth and other planets.

Visit Planetarium at Nature Museum.

Collect pictures of the sun and planets.

Write imaginary stories of life on other planets.

Plan and teach units on earth, sun, moon, stars, and planets.

Display a mobile of the solar system.

Display and read books about the universe.

Have class construct a mural showing the sky at night.

Films: Sun and How it
Affects Us
Sun's Family
Energy From the Sun

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

IV. Energy and
Machines

Display pictures or objects showing sources of energy.

A. Sources of

Energy

Discuss sources of energy and uses of various types of energy.

1. sun

2. heat

3. water

4. electricity

5. magnets

6. sound

Films and filmstrips on sources and uses of energy.

B. Simple Machines

Have students bring in magazine or newspaper pictures showing machines in action. Write captions under each picture telling what the machine does.

1. lever

2. pulley

3. inclined plane

Make simple machines and demonstrate use.

List everyday things in which simple machines are used.

Ex. See-saw - lever

Well - pulley

Ramp - inclined plane

Have students bring toys to class that demonstrate the principles of simple machines.

C. Relation of

Energy to

Machines

Discuss relation of energy to machines.

PRE-VOCATIONAL TRAINING

PRE-VOCATIONAL STUDIES

Introduction

Pre-vocational study in the junior high school should be related to all academic areas and should be emphasized throughout the junior high program. In the last year of junior high a separate period should be allowed for concentrated study of job areas, job requirements and personal qualifications for getting and holding a job.

In order to develop good work habits opportunities should be given in the last year of junior high school for practical experiences. These work experiences should be carefully supervised and evaluated. They can take the form of office assistants, library assistants, cafeteria helpers, janitors assistants, counselor's assistants, shop and home economics assistants. These work periods should be rotated so that each student will have experience in more than one type of job and also to give each student a chance to work.

PRE-VOCATIONAL STUDIES

Objectives

1. To provide opportunities for explorations of various types of work.
2. To emphasize the value and dignity of all types of work.
3. To develop an awareness of skills, knowledge, and attitudes necessary for job success.¹
4. To develop the academic competencies necessary for working.
5. To enable the student to be aware of the protective rights of workers.

¹Exploring the World of Work - Grades 6-9, A Report of the Committee on Occupational Exploration in the Public Schools of North Carolina, April, 1969.

CONTENT

Why We Need to
Work

SUGGESTED ACTIVITIES

Discuss importance of learning to provide for oneself. Try to help each student understand why he must be prepared to hold a job. Stress the following reasons:

- a. To provide basic needs
- b. To provide luxuries
- c. To obtain security and status in the community.
- d. To provide wider selection of leisure time activities.

Discuss how students can be better citizens by learning to manage incomes wisely.

Ask students to list the source of their present income. This might be from allowances, part time jobs, gifts, asking parents for money.

Have students list the things they supply from their own income.

Show students how they can benefit from planning how their money will be spent rather than spending it all at once and then doing without something or having to ask for more money.

Encourage students to think of one item they would like to have and encourage them to begin saving their money for this particular item.

Why We Need
To Work
(continued)

Job Survey

Discuss with students the fact that planning how to spend income as a teenager helps prepare them for wiser planning of spending their income as an adult.

Make a list of possible jobs for EMR students and general duties of each job. Stress the academic proficiency that is needed for various jobs.

Discuss and list part time jobs students might find before they are old enough to work.

Ex. Baby-sitting
Paper route
Mowing lawns, etc.

Discuss responsibilities involved in part time jobs students might hold and help them understand that these jobs help to develop important characteristics they will need for later jobs.

Have each student make a list of kinds of work he would like to do.

Locate on city maps different businesses where students might later be employed.

Have each student select one job and find out all he can about this particular business. Give class reports on this.

CONTENT

Job Survey (continued)

Discuss necessary preparation and qualifications for jobs. Emphasize the fact that staying in school increases job potential.

Have students give oral and written reports on any types of jobs they have held.

Invite resource people to speak to class on qualifications, wages, etc. for different jobs.

How To Find Jobs

Discuss various ways in which people find jobs.

- a. Employment Agency (private and public)
- b. Newspaper Ads
- c. Hear about jobs from friends
- d. Hear about jobs from family members
- e. Signs in store windows, etc.
- f. Schools - Guidance Departments

Have students find and cut out job ads in the newspaper. Discuss these as to suitability, hours, salary, qualifications, etc.

Paste the job ads in a booklet. Use these ads for writing paragraphs, letters, and various other activities.

Plan bulletin board display on "How to Find A Job".

Expected Achievements

Junior High

Minimum academic skills necessary to accomplish life work:

Chronological Age 12-13-14

- a. Reading proficiency at 3rd grade level and/or a recognition of two-thirds of the Dolch Word List, and/or a fair proficiency in reading the local newspaper.
- b. Competence: advanced measurement including fractions up to eighths.
- c. Understanding of self as it related to home, family, school, immediate community and city and state.

SENIOR HIGH CURRICULUM

LANGUAGE ARTS

LISTENING

SPEAKING

HANDWRITING

SPELLING

GRAMMAR

LANGUAGE

INTRODUCTION

The high school student who is limited in academic ability needs a language program that is practical. The most basic skills in writing, listening, language usage, and spelling should be taught with their value to the individuals being stressed. In turn, the instructional activities should relate to occupations and daily living. The language program should develop self-confidence and provide job competency.

LANGUAGE ARTS

Objectives

1. To enable students to know the importance of communicating, both written and orally, intelligently with others.
2. To help students enlarge their vocabulary so that they are able to communicate more effectively.
3. To teach students to use correct grammar in order to attain social and vocational acceptability.
4. To teach students to be able to write letters correctly - both business and personal letters for effective communication.
5. To enable students to use newspapers effectively for job opportunities, household management, current events and to read for pleasure.

CONTENT

How To Find
Jobs
(continued)

SUGGESTED ACTIVITIES

Make field trips to various industries where EMR students might later be employed.

Have students make oral and written reports on types of jobs they saw on the field trips.

Invite a person from an employment agency to speak to the class.

Make a field trip to an employment agency.

Preparing for
a Job

Responsibilities

List and stress responsibilities students must learn to accept in preparing for jobs.

- a. Promptness - why it is important on the job.
- b. Following directions - why they need to learn this
- c. Completing assigned tasks - why this is important in a job
- d. Working industriously - why this is important on the job.

Encourage and require the above traits in the everyday school activities of the students. Explain to them that these characteristics are as important in a job as learning the actual job.

SUGGESTED MATERIALS

CONTENT

Preparing for
Job (continued)

Maturity

Fitness

SUGGESTED ACTIVITIES

Stress the following concepts to build social and emotional maturity for jobs:

- a. Working with others and becoming part of a group.
- b. Meeting new situations successfully.
- c. Completing work
- d. Accepting criticism

Discuss mental and physical fitness for jobs.

Discuss the importance of proper sleeping and eating habits to avoid fatigue on a job.

Discuss the importance of maintaining a good mental attitude toward work and people with whom one works.

Help students to recognize and accept their limitations, but not to use them as an excuse for poor work habits.

Academic skills

Discuss academic skills students will need to have in order to hold a job - arithmetic, reading, social and manipulative skills.

Use role-playing to stress the need for acquiring academic skills for certain jobs. Ex. Working a cash register in a discount house - the student would need to be able to read numbers and to make change. Another example might be working as a stock clerk in a department store - the student would need to be able to read.

SUGGESTED MATERIALS

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Preparing for
Job (continued)

Academic Skills

Discuss jobs that require a license, such as beautician, barber, etc. and what the student can do at school toward qualifying for the license.

Applying for a
Job

Discuss the kinds of information usually required on application forms - name, age, address, date of birth, place of birth, parents names, previous employment, schooling, etc.

Discuss arranging and preparing for personal interviews.

Have students fill out many sample application forms. Stress penmanship and spelling. Have students fill out forms using manuscript writing since most applications specify "please print". Discuss job interviews. Use role playing to apply for jobs.

Divide the students into pairs and have them interview each other. Have them look for interesting and unusual information that they can obtain. Have them introduce their partner in front of the class. Observe their ability to speak in front of the class.

Discuss working permits.

CONTENT

Applying for
a Job
(continued)

SUGGESTED ACTIVITIES

Make charts of Do's and Don't's in applying for a job.

Write practice letters applying for a job.

Write practice letters requesting interviews.

Plan bulletin board displays showing facts to remember in applying for a job - proper dress, proper behavior, etc.

Discuss proper dress for job interviews.

Discuss hours and wages and how they are related.

Discuss withholding taxes.

Holding a Job

Discuss and stress qualities students need to develop in order to hold a job.

- a. friendliness
- b. politeness
- c. cooperation
- d. persistence
- e. cleanliness
- f. willingness to learn
- g. promptness, etc.

Discuss the importance of learning to adjust to working with others.

Discuss ways in which students might improve their ability on the job.

SUGGESTED MATERIALS

CONTENT

Protective Rights
of Workers

SUGGESTED ACTIVITIES

Discuss what students need to know about the protective rights of workers and why they need to know this.

Discuss Social Security. Make a list of social security benefits on the board. If any students do not have a social security card have them apply for one. Have students memorize social security numbers.

Discuss labor unions - their purpose, how they help workers, how one becomes a member.

Have students make reports on the history of labor unions.

Discuss Workmen's Compensation Laws

Discuss types of insurance available through jobs.

SUGGESTED MATERIALS

CONTENT

Listening

SUGGESTED ACTIVITIES

Use listening activities whenever the opportunity arises. For instance, listening skills can be taught in relation with any subject area. However, some formal teaching must be done to instill these skills in the student.

Develop listening skills through use of the tape recorder by taping students voice and then having students listen for mistakes he might have made in diction, grammar, etc.

Listen to stories told by the teacher. Have students retell the story or answer specific question after completion of the story.

Teacher gives oral information filled with unnecessary details. Have the students repeat the information supplying on the vital information.

Use role playing. Example: job interview. After this, have student report to class all the important details of the interview.

Develop accuracy in relaying telephone messages correctly.

Listen to assigned radio programs and report on these to class. By using radio, instead of TV the student cannot rely on visual clues.

SUGGESTED MATERIALS

Tape Recorder

CONTENT

Listening
(continued)

SUGGESTED ACTIVITIES

Use games and stories to increase listening skills.

Play records.

Use tape recorder to tape student's own voice in order to hear his own diction.

Follow directions drills.

Discuss reasons for listening for accuracy.

Relate the importance of good speaking ability as it applies to success on the job.

Discuss ways of overcoming "stage fright" when talking before a group.

Have students practice saying tongue-twisters. Have them listen to TV, Radio commercials for example, twisters: Burger King. Have them increase the speed with which to improve enunciation skill.

Practice giving directions. Use stories, pictures, and current events to stimulate class discussion.

Use role-playing in job situations, such as job interviews, asking for a raise and leaving your job.

In all oral exercises, stress the correct use of pronouns and verbs, pronunciation, and enunciation. Use tape recorders for self-appraisal.

SUGGESTED MATERIALS

Scope Magazine

Tape Recorder

CONTENT

Handwriting

Drill on formation of all small and capital letters of the alphabet.

Provide daily practice in cursive writing in relation to:

Days of the week and months of the year

Names

Phone numbers and addresses

Basic spelling words

Use occupational and vocational materials for realistic use, such as checks, job applications blanks and other forms.

Write social and business letters. Stress legibility.

Keep handwriting notebook. Compare several times during the school year for improvement. Have students evaluate their own books.

Practice use of the ink pen.

Drill on everyday words that students should know, days of the week, month.

Use occupational and vocational vocabulary.

Have a group of students in the same occupational work make a dictionary of terms they use in that trade.

Stress the proper use of the dictionary and the amount of information that might be found there. Give daily practice in using the dictionary.

Drill on breaking words down into syllables.

Have students drill on use of words in oral and written sentences.

SUGGESTED MATERIALS

The Letters You Write,
Follett

Vocational English, Jochen &
Shapiro, Globe Book Co.
New York. Book I & II

Keys to Good Language, Culp
Elizabeth, The Economy Co.
Atlanta, Ga.

CONTENT

SUGGESTED ACTIVITIES

Students should have some elementary knowledge of world building prefixes and suffixes.

Have spelling bee of everyday words and occupational words to add interest.

Discuss the dictionary and its many uses. Teach sections of the dictionary. Give students lists of words and let them tell which section each word can be found.

Use dictionary games.

Using the
Dictionary

Dictionary

Grammar

Punctuation

Drill students on the many uses of punctuation marks. Have them read a paragraph first with no punctuation and then with proper punctuation to see importance of punctuation to understanding.

Have students use newspaper, magazines and books to find different types of punctuation.

Newspaper

Guidebook to Better English, Haag, Linda.
The Economy Co., Atlanta
The series consist of four levels and is programmed

Agreement of
Subject and Predicate

Use blackboard drill and overhead projector to supplement exercise material.

Word Study
antonyms
homonyms
synonyms

Make homonym lists for pupils to define and use in sentences.

Use newspaper to cut out words for which students may list homonyms.

SUGGESTED MATERIALS

CONTENT

Functional
vocabulary

Kinds of Sentences
declarative
interrogative
exclamatory

Nouns

SUGGESTED ACTIVITIES

Use phrases, terms, words to illustrate the meaning that would apply to vocational situations.

Present pictures from magazines to illustrate people, objects that are used in daily life.

Stress that effective sentences expresses a thought clearly and a faulty sentence makes it difficult to understand what thought is being expressed.

Write and discuss sentences.

Teacher may give students groups of words that are not sentences, and have them make a sentence of each of the groups of words.

Make list of common and of common and proper nouns.

Locate proper nouns in the newspaper.

Make a list of common and proper nouns all written in small letters. Have students pick out and capitalize the proper nouns.

Before assigning written work, go over it orally and then have students work independently.

SUGGESTED MATERIALS

Follett

SUGGESTED MATERIALSSUGGESTED ACTIVITIESCONTENT

Capitalization

Use local newspaper, magazines, etc. and have students copy all the names of people they can find. Then have them rewrite the names using the initials for the first name. Ex: John Smith, J. Smith.

Discuss use of capitalization for sacred names. Ex. Bible, God, etc.

Use oral and written materials.

Discuss the do's and don't's in letter writing.

Display copies of correct and incorrect letters.

Discuss the need for certain obligations with a letter.

Use the overhead projector to correct students letters.

Stress the five parts of a friendly letter. This may be outlined on the blackboard.

Use the overhead projector to point out good and bad business letters.

Stress the six parts of a business letter.

Use the Yellow pages of telephone book to write business letters.

Write business letters to order from a catalogue, to apply for a job, and to extend credit.

:

Letter Writing
A. The Friendly
Letter

Add to Activities
Make students make booklets showing friendly letter, thank you note, invitation, acceptance letter and regrets.

B. Business letters

READING

-129-

SECONDARY READING

Reading instruction for the academically limited secondary student will need especially to be planned for each individual. Many students who have lacked motivation before now see a real need to be able to read as they prepare themselves for a job. For these students basic skills will need to be stressed and reading materials of low vocabulary and high interest must be sought. Content should be on daily life activities which pertain to the student and which provide a vocabulary needed for protection. Students who read on a higher level should be encouraged to read newspapers for comprehension and to use the library for reading materials for pleasure and vocational materials.

The teacher should guide the selection of all materials. In schools where no separate time block for reading is allotted, this should be an important part of the English course.

READING

Objectives

1. To attain maximum reading proficiency and to use it in all curriculum areas.
2. To acquire adequate reading skills to maintain self-sufficiency in adulthood.
3. To develop positive attitudes toward reading as a pleasurable leisure time activity.
4. To develop an appreciation of reading as a necessity in a complex society.

CONTENT

Preparing for
Adult Reading

1. Newspaper

Use newspaper to locate advertisements of food specials. Many activities, such as math can be based on these ads. Have students make up grocery lists with prices by comparing ads from various stores. Ex. Winn-Dixie-Hamburger 39¢ lb., A & P Hamburger 37¢ lb.

Use newspapers to locate want ads of various types:

1. jobs
2. used furniture
3. used cars
4. baby-sitting services

Use newspaper to teach pleasure reading such as sports, comics, and woman's page. Have students each read a different comic strip and then act it out or tell it to the class in story form.

Make a list of TV shows. Have students read the newspaper and fill in the channel and time periods.

Use newspaper to locate recipes. Have students compile recipes in a booklet. If practical, let them try some of the recipes in school.

SUGGESTED MATERIALS

Daily Newspapers

From Words to Stories
Noble.

Scope, Scholastic Book Service, Englewood Cliffs, N. J.

S.R.A. Reading Laboratories
Chicago, Ill, Science
Research Associates.

CONTENT

2. Telephone Directories

Look up names, addresses and phone numbers of class members.

SUGGESTED ACTIVITIES

Study yellow pages to locate specific information on certain types of companies.

3. Voting ballots

Obtain sample voting ballots. Stress reading content rather than personal likes of candidates.

Hold mock election.

Make ballots using class members names.

Correlate ballot reading with current newspaper reading by finding information on various candidates.

4. Reading various forms

Application blanks. This should be worked on all year. Some types of forms to be used are:

1. job
2. credit
3. Social Security
4. Applying for utility service

Pupils should be taught to read the questions contained in various forms as well as be able to relate information such as: name, address, parent's name, place of birth, mother's maiden name.

Have pupils make and fill out personal data sheets.

SUGGESTED MATERIALS

Bell Telephone Teaching Kit

Local Telephone Directories

Sample voting ballots

Getting Started

Communication I, II, III
Follet Co., Chicago, Ill.
Many different kinds of applications forms.

Pacemaker Story Books,

Reading Skill Builders
Readers Digest
Pleasantville, N. Y.

CONTENT

Reading for
Current Information

SUGGESTED ACTIVITIES

Set aside one bulletin board to be used all year as display space for current news. This will be changed daily by pupils and teacher. Language and reading activities can be developed by the teacher pertaining to the current news.

Display many types of reading material in the room, as news magazines and newspapers. Allow time during the day for students to have free reading time.

Developing Sight
Vocabulary of Voc-
ational Terms

Prepare drills using pictures, flashcards, and charts that pertain to vocational subject matter.

1. Match words with picture of different vocations.
2. Prepare charts showing different vocations and accompanying terms (auto mechanic, plumber, etc.)
3. Pupils drill each other with flashcards.

Reading for
Comprehension

Develop oral and written exercises to teach the following skills:

1. Main idea
2. Locating specific information
3. Finding details
4. Making inferences
5. Predicting outcomes
6. Making judgements

SUGGESTED MATERIALS

Newspapers
News Magazines
Junior Scholastic,
Englewood Cliffs, N. J.

Text Workbooks

CONTENT

Library Skills

SUGGESTED ACTIVITIES

Teach the following skills:
use of card catalogue
use of encyclopedias
use of the atlas

Compare school library with public library. Take students to a public library.

Use films to reinforce library skills.

Compare different encyclopedias found in school library. For example: some encyclopedias are more difficult to read than other. Assist students in choosing appropriate encyclopedias when doing reference work.

Dictionary Skills

Teach the following skills through the use of oral and written exercises:

Use of diacritical markings
Sections of the dictionary
Accent mark
Syllabication
Multiple meanings
Guide Words
Pronunciation key

SUGGESTED MATERIALS

Film: Library Organization

Dictionary

CONTENT

Reading for
Pleasure

SUGGESTED ACTIVITIES

Set aside a section of the room to be used for displaying books to be read for pleasure. Include many levels of books so that each student will be able to use this section.

Encourage students to tell class a little about books they have read from this section so the other students will want to read the same book.

SUGGESTED MATERIALS

MATH

-137-

MATH

Mathematics instruction for the academically limited student must be very practical. Grouping by ability rather than grade seems especially beneficial in mathematics. When grouping is by grade, individual instruction is important and allowing students to work together can be very effective.

Because mathematics will be important in attaining self-sufficiency, the use of money, tax forms, pay scales, and installment buying provide motivation for the learning of new skills as well as over-learning of the most basic skills.

SENIOR HIGH MATHEMATICS

Major Objectives in Teaching Mathematics:

1. To guide students in discovering the meaning, order, and logic of our number and numeral systems.
2. To build a clear understanding of the operations of addition, subtraction, multiplication, and division.
3. To develop problem solving ability, and the understanding needed to use that ability in practical situations.
4. To develop skills for effective and economical mental and written computation.
5. To offer computational skills that will increase the number and variety of jobs for which they are qualified.
6. To stress skills and applications needed in everyday life to enable students to manage their personal finances.
7. To encourage growth of desirable attitudes and work habits in mathematics.

CONTENT

Our system of
number notation

SUGGESTED ACTIVITIES

Review our number notation using 0, 1, 2,
3, 4, 5, 6, 7, 8, 9.

Use or make a 100 chart to show use of the
ten symbols in our notation.

Practice reading and writing large numbers.

Read telephone numbers, speedometer, scales,
and social security numbers.

Practice filling out mail order catalogues.
Compute postage and taxes.

Ask students to bring to class examples of
large numbers from magazines and newspaper.

Use newspaper to illustrate rounding of
numbers. Ex. There were 10,000 students
at a ball game. This number was estimated
from the number of tickets sold.

Explain how approximate estimates of large
crowds are made: Ex. 50,000 people lined
the sidewalks for the Carousel Parade. How
was this estimate made?

Roman Numerals

Point out that Roman Numerals have many
everyday uses, as in chapters in books,
dates on public buildings, dates on copy-
rights, motion pictures.

Make outline with numerals.

SUGGESTED MATERIALS

Growth In Arithmetic, Clark
Smith, and Hach. Harcourt,
Brace and World, Inc.

Working With Numbers, Book
I & II, The Steck Co.

Useful Arithmetic, Vol. II &
III, Wool, John D., Frank
Richards, Co., Phoenix, N.Y.

CONTENT

Roman numerals
(continued)

Basic computation
1. Addition

2. Subtraction

3. Multipli-
cation and
division

SUGGESTED ACTIVITIES

Draw pictures of clocks with certain times with Roman numerals.

Continue teaching these skills from the junior high level. Have students plan a simple party.

Compute cost of party.

Prepare monthly budget for average family.

Use symbols for written computation.

Flash cards may be used for rapid response.

Compute Federal and State taxes.

Use teacher's manuals accompanying text for detailed teaching suggestion on these skills.

Compute local and state sales taxes.

Make up problems involving costs of various articles, how much you pay for goods and change you receive.

Explain how two numbers in the multiplier involves the addition of partial products; and it is necessary to use both numbers in the multiplier.

SUGGESTED MATERIALS

Basic Modern Mathematics,
Palo Alto, Calif.: Addison-
Wesley School Div.

Figure It Out, Books I & II
Chicago, Ill., Forlett
Pub. Co.

Money Makes Sense, Fearon
Pub., San Francisco,
Calif.

Arithmetic Drills and
Tests, Hayes

CONTE

Measurement

SUGGESTED ACTIVITIES

Teach the following measurements:

1. Standard units of measure
2. Liquid
3. Linear
4. Time
5. Time belts
6. Temperature

Measure Room

Let students measure each other.

Keep temperature of weather for one week.

Have students make charts of different measurements.

Compute times TV programs come on in different parts of the country.

Use airline schedules. (time zones)

Use milk cartons, measuring spoons, ruler, yardstick in day to day situations.

Students should know how daylight saving time came about.

Discuss the four time zones in USA - Eastern, Central, Mountain, and Pacific.

Be sure students know reason for different times at different places.

Use globe.

SUGGESTED MATERIALS

Measuring spoons and cup

Thermometer

Rulers

Newspaper

CONTENT

Money

1. Recognition of coins and bills

SUGGESTED ACTIVITIES

To be able to recognize all coins and bills. Use real money. Let students handle money in various drills set up by the teacher.

Set up school store in using real money and making change.

Play games teaching recognition and values of various coins.

Use film and filmstrips on money from Federal Reserve Bank.

Visit the Federal Reserve Bank as field trip.

Have resource people from local banks come in to talk about how our money system works.

2. How to count money

Instruct students how to count by one's, five's, and tens. Use various combinations by letting students count to each other.

Play games that will involve handling and counting money.

3. Learning to write the value of money

Use blackboard to illustrate the decimal point in dollars and cents.

Fill out sales slips.

Use newspaper - grocery ads to fill out sales slips and make change.

SUGGESTED MATERIALS

Using Dollar & Sense,
Fearon Pub., San Francisco,
Calif.

Mathematics in Living,
Pruett Press, Inc. Boulder,
Colorado.

Getting Ready for Pay Day,
Frank E. Richards Co.
Phoenix, N. Y.

Money
(continued)

Understanding of
earning money

Budgeting

Banks

SUGGESTED ACTIVITIES

How we use the decimal and how to separate dollars from cents.

Correct number position for adding and subtracting money.

Explain pay roll deductions, take home pay, hourly, weekly pay, and piece work.

Field trip to local bank.

Local speaker from Savings and Loan

Understanding legal obligations

Discuss reasons for budgeting. Help students realize that people with middle and low incomes have to maintain some type of budget in order to meet their obligations.

Work up realistic budget for food and family.

Able to solve the following financial problems: lost of home or car to fire, lay-off from job, and fired from job.

Discuss and list banking services - checking accounts, saving accounts, loans, mortgages, traveler's checks, certified check, saving bonds.

Understand the vocabulary and comprehension of banking services.

SUGGESTED MATERIALS

Check books, deposit slips, etc.

Newspaper

CONTENT

Banks
(continued)

SUGGESTED ACTIVITIES

Have bank personnel visit class and explain their services.

Show films and film strips on banks.

Discuss how to open an account, deposit money.

Use sample check books, deposit forms, withdrawal forms in practice drills.

Have drills using check stubs.

Discuss how to balance check book with bank statement. Have students practice keeping stubs. Banks in Charlotte will provide blank checks or they can be duplicated.

Discussion on how charge accounts play such a big part in our buying today. Discuss dangers of over buying with credit buying. How are charge accounts useful?

Have students use newspaper to cut out the works credit, budget terms, etc.

What is interest? Use example of $1\frac{1}{2}\%$ per month on a loan per year is actually 18%.

SUGGESTED MATERIALS

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Borrowing money

Discuss why one should borrow money and reasons for not borrowing.

Discuss following terms and meanings: collateral, references, credit rating, mortgages, interest rate legal obligations, and "loan shark".

Installment buying

Discuss pros and cons of credit buying and use of credit cards in the American society. Work up actual work sheet on hidden costs.

Have speaker from credit department of a local store explain various credit plans.

Discuss credit ratings and legal aspects.

Insurance

Types of insurance

Why insurance rates vary.

Discuss dangers of being under insured or over-insured.

Figure how much insurance would cost an average family.

Bring insurance men in as speakers.

CONTENT

Fractions

SUGGESTED ACTIVITIES

Review vocabulary used with common fractions - numerator, denominator, proper fraction, improper fraction, and mixed numbers.

Illustrate equivalent fractions by diagrams (number line).

Have students shade parts of pies.

Expressing fractions in lowest terms.

Finding common denominator.

Instill in students the habit of looking to see if they have used the largest factor.

Draw on board separate lines to show $\frac{1}{2}$ and $\frac{1}{3}$, sixths and thirds, and tenths and fifths.

Use games using fractional parts.

Bring in recipes using fractions.

Adding and subtracting fractions.

Adding and subtracting mixed numbers.

SUGGESTED MATERIALS

Figure It Out, Book II,
Follett.

Wages and Budgets,
Pruett Co.

Checking Accounts
Frank Richards

CONTENT

Decimals

SUGGESTED ACTIVITIES

Make decimal-fraction chart.

Practice putting decimal fractions in words.

Stress placing the decimal point correctly.

Discuss and illustrate the zero as a placeholder in decimal fractions as well as in whole numbers.

Changing common fractions to decimal fractions.

Adding decimal fractions.

Subtracting decimal fractions.

Multiplying and dividing decimal fractions.

Give exercises using fractions, per cents, and decimals. Have students fill in blanks - 50% = $\frac{\quad}{\quad}$ = $\frac{1}{\quad}$

$$25\% = \frac{\quad}{\quad} = \frac{1}{\quad}$$

SUGGESTED MATERIALS

CONTENT

Per cents

SUGGESTED ACTIVITIES

List on blackboard how per cents play such a big part in our everyday economic life.

Prepare bulletin board on how per cents are used in the newspaper. Have students read per cents from bulletin board.

Make chart showing fraction, decimal and per cent equivalents such as $\frac{1}{2} = .50 = 50\%$, $\frac{1}{4} = .25 = 25\%$.

Changing % to fractions.

Finding per cents

Using per cents larger than 100%

Finding per cent of a number.

Finding what per cent one number is of another.

Use prepared materials for drill work.

Problem solving

Problem solving is used in all math areas. However, additional practice will be necessary. Use problems that pertain to the daily activities of the student rather than textbook problems.

SUGGESTED MATERIALS

Guidebook to Mathematics Educational Guidelines Co.
Atlanta

Newspaper and films

SOCIAL STUDIES

SOCIAL STUDIES

Social Studies for the student who is academically limited should be concerned primarily with his ability to get along with others at home, in school in the community, and on the job. He should be provided with and understanding of local, state, and national laws and services as they affect him. He should be aware of the rights and responsibilities of a citizen and voter. In addition he should be offered an opportunity to learn as much as he is capable of understanding about the world, especially in the light of current events.

OBJECTIVES - SOCIAL STUDIES

1. To help the pupil grow in his knowledge and understanding of democratic citizenship.
2. To develop respect for authority and the need for self discipline.
3. To help students grow in tolerance, beliefs and understanding of customs in their community and throughout the world.
4. To develop an appreciation for our American heritage and our economic system.
5. To develop social studies, habits, and proper attitudes.
6. To develop skills, standards necessary for effective group participation.

CONTENT

Understanding
of Self

SUGGESTED ACTIVITIES

Discuss the importance of personal appearance in school, job and in public.

Show films and film strips on good grooming and cleanliness.

Discuss the use of deodorants in our modern day society. Have students make bulletin board of all grooming aids and deodorants.

Show movies and film strips on care of teeth and hair.

Write companies or have students write for free teaching materials.

Clothing and
Personal Appearance

Show filmstrips how clothing should be protected and cared for.

Discuss how clothing makes a person.

Have class practice sewing on buttons and patching small tears.

Use newspaper to compare different prices of clothing. Cheap vs. expensive.

Discuss how dry cleaning and laundering helps appearance wise.

Friendships

SUGGESTED ACTIVITIES

- Class discussion on what makes a good friend.
 - List on board how to keep and lose friendships.
 - Discuss how we find and meet friends.
 - Write a short paper about your best friend.
 - Discuss the proper forms of introduction
- Courtesy and good manners
- Discussion of how good manners and courtesy play such a big part in everyday life.
 - Class project - make list of do's and don'ts concerning:
 - Group manners, personal manners.
 - Table and dating manners.

SUGGESTED MATERIALS

Films:

- Acts of Courtesy, ROA
- Modern Talking Pictures
- Control Your Emotions
- Modern Talking Pictures
- The Voice With a Smile
- Wins. Southern Bell
- Telephone Co.

Films:

- Acts of Courtesy, Roa's Films
- Are You Popular
- A Date for Dinner, Imberly-Clark Corp.
- Char.-Meck. Audio-Visual Dept.

CONTENT

The family

SUGGESTED ACTIVITIES

Discussion on importance of what a family is. What makes up a family unit.

Show films and filmstrips of family life.

Discuss the many changes in family life from Daniel Boone to modern times.

Use bulletin board to show activities of the family at home and work.

Discuss why cooperation and responsibilities of each member of the family is important.

Discuss the sources of income and meeting the needs of the family.

Family Finances

Have students prepare budget of family of four, take home pay of \$500.00. List at least 20 items in monthly budget.

Discuss the rising cost of food and clothing.

Discussion of the different kinds of insurance - Life, hospitalization, car home insurance.

Have insurance man visit class and explain the main points of different kinds of insurance.

SUGGESTED MATERIALS

The Family You Belong To
Turner, Richard H., N. Y.
Univ. Press, N. Y.

Film: Your Family
Char-Meck. Film Catalog

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Understanding
the Community

Definition of a community.

Discussion on:

Who are citizens?
What are the responsibilities
of a good citizen?

Discuss functions of a community to
its citizens:

1. a. School
- b. Church

2. Recreation

- a. playgrounds
- b. swimming pools
- c. theaters
- d. youth centers

Take field trip to Nature Museum

Make vocabulary study of key words:
recreation, responsibilities, citizen-
ship, etc.

Draw and locate main city park and
pools.

City map

Invite resource people from various
community agencies to speak to the
class.

Emergencies

Discuss what to do in various emergencies:
Hospitals
Doctors
Nurses
Veterinarians
Police Department
Fire Department

CONT. IT

SUGGESTED ACTIVITIES

Visit to Police Department

Students should understand the many problems facing the Police of today. Have police explain their responsibilities and duties to the citizens of the community.

Visit Fire Department. Observe: how equipment is used and how to turn in fire alarm.

Know the correct way to use the telephone in a police and fire emergency.

Discuss why voting is so important to our nation.

Students understand who may vote, age, and registration requirements.

How to operate new voting machines and marking correct ballot.

Understanding issues presented by the candidates.

Using common sense and judgment in voting.

Obtain sample ballots when elections are to be.

Make scrapbook of candidates. Presenting both sides.

SUGGESTED MATERIALS

Film and filmstrips

Voting

CONTENT

Understanding
Yourself and Family

SUGGESTED ACTIVITIES

Discussions of family as an institution, its functions, etc.

Discuss role of the teenager in the family.

Dating

Discussion of dating etiquette, standards of behavior, and purpose of dating.

Choosing a
Marriage Partner

Explanation of components of love and adjustment to others.

Discussion of quarreling, in-laws, managing the family income and family security.

Discussions of the adjustments required by parenthood, infant care and discipline and guidance in child development.

Have students relate baby-sitting experiences they have had.

SUGGESTED MATERIALS

Personal Adjustment, Marriage, and Family Living, Landis & Landis

Marriage and the Family Landis and Landis

Better Living, Gary D. W. Lawson

CONTENT

SUGGESTED ACTIVITIES

Have students read orally the amounts of money from grocery page in newspaper.

Use prepared materials as drills in writing various amounts of money correctly.

Class discussions on importance of budgeting money - thrift, time.

Have students make note book on the following terms and make sentence with each. Take home pay (gross pay) net salary, deductions, taxes, Social Security, etc.

Make up hypothetical budget for an average family.

Class discussion:

Why taxes are needed

List on blackboard the benefits from taxes, schools, fire department, police, etc.

SUGGESTED MATERIALS

Baughman, U. E., Chief of Treasury Dept., Know Your Money, United States Secret Service, Washington

Ramphlets:

For Young Moderns and Your Shopping Dollar, Money Management Institut of Household Finance Corp. Chicago, Ill.

Your Family Budget, Coronet Films.

The Meaning of Money, Filmstrip House.

CONTENT

American History

SUGGESTED ACTIVITIES

Stress reasons for explorations and discoveries.

Read stories about great discoveries and travels of the past.

Describe customs and mores of the early settlers.

Study early maps of area.

Visit old homes of Colonial area

Compare the many problems facing the new nation with problems facing the nation today. Have the problems of today stopped for our nations?

Use the library for written reports on leaders of our new nation.

Have students make a map showing how our country grew. Include rivers, forts, mountains and cities.

Visit James K. Polk Museum

Explain how sectional differences caused many problems for a growing nation.

Discuss the Free State vs. the Slave State

Compare the crops that were grown in the South with that of the North.

SUGGESTED MATERIALS

You and Your World,
Bolinger, Willeta,
Fearon Pub. Inc. San
Francisco, Calif.

My Country, Smith & Lutz,
Steck Co., Austin, Tex.

New Land, New Lives,
Gilstrap & Patrick, Steck
Co., Austin, Texas

CONTENT

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

Use blackboard to compare advantages and disadvantages of the North & South.

Discuss early history and development of:

Telegraph

Telephone

Radio - early stations, KAKA, WBT

Television

Conduct tours of local Radio and TV Stations.

Stress how TV and Radio have changed our lives due to quick news coverage of the world. Ex. TV coverage of landing on the moon.

Development of vocabulary in Communications:

FCC

Clear Channel

Short Wave

Closed Circuit

Day letter & night letter

Station-to-station vs. person-to-person

Ham operators

Weather satellites

Bell Telephone Kit

Films and filmstrips from Bell Telephone Co.

Telephone Directory

Use phones through Bell Telephone Co. to demonstrate correct telephone courtesy and how to dial.

SCIENCE AND HEALTH

-162-

SCIENCE AND HEALTH

Science in the Senior high school continues to expand at ever increasing pace for the EMR student and skills and methods must be perfected for their benefits. Teaching should revolve around personal interests as well as current events in science. Instruction should include personal development and self-care leading to home repairs, gardening, drug habits, conservation, etc. and further to an understanding of the importance of space-age development. Experiments, projects, should be used as much as possible and student participation encouraged. Science must be related to the rest of life and its contributions must be made meaningful.

SCIENCE AND HEALTH

Objectives

1. To understand more about the nature of the world.
2. To understand and share latest findings and discoveries.
3. To find answers pertaining to the students everyday experiences with physical and biological surroundings.
4. To practice good health and safety routines.
5. To develop an awareness of social maturity in home, school and on the job.

CONTENT

The Earth and Surroundings

SUGGESTED ACTIVITIES

List on blackboard the characteristics of the earth in relation to:

age
size
composition
movement and gravity

Discuss the earth and its neighbors:
stars.

moon
sun
planets

Make scrapbook dealing with many articles from newspaper about space, traveling and exploring the moon.

Show NASA films from Cape Kennedy.

Take field trip to Nature museum and planetarium at UNC-CH.

Construct model of the earth to show major mountains, land and water areas.

Discuss gravitation in regards to the earth, moon and tides.

Explain and discuss the four seasons:

summer
fall Draw pictures depicting
winter the four seasons
spring

SUGGESTED MATERIALS

This Earth of Ours, Steck-Vaughn Co., Austin, Tex.

Building A Strong Body
Allen E. Breed, Hollister,
California

Science Near You, Ginn
and Company

Everybody's Weather, J. B. Lippencott.

Wonderworld of Science
Books I, II, III,
Scribner's Sons

Films:

Science in Everyday Life
Filmstrip House

Animals and Their Foods
Coronet Films.

CONTENT

Weather and
affects

SUGGESTED ACTIVITIES

Discussion on how weather affects our
daily lives in relation to:
temperature where we live
dress recreation, skiing, boating
food
safety (ice, tornado) farmers
work airports and planes,
business war, Battle of the
Bulge, Viet Nam (monsoons)

Visit local weather bureau at airport.

Use newspaper to read and understand
weather reporting

Keep daily temperatures for one week at
certain hours.

Arrange in order the ten highest
temperatures and ten lowest temperatures
of cities in the USA from weather page
of newspaper.

Read and write various weather terms, such
as: fog, frost, hurricane, humidity, etc.
in sentences.

Have students to bring pictures and articles
about floods, storms, tornados for class
notebook.

Discuss safety measures to take in N. C.
in relation to tornados, hurricanes.

Newspaper

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

Understand and discuss various weather instruments; such as: rain gauge, barometer, etc. Science classes usually have many of these instruments to borrow.

Find and report to class the warmest and coldest day on record in Charlotte.

Have students use library to write reports on the Johnstown flood, Krakatoa, killing smogs in London and Penn.

Use films and film strips related to identification of various plants, trees, vegetables, shrubs, etc.

Collect pictures of the many uses of trees, such as, lumber for houses, paper for books, furniture, recreation areas (parks)

Discuss what plants and vegetables grow best in our community.

Have local farm agent visit class to discuss plants, trees, shrubs.

Visit Bowaters paper plant.

Write to various food and paper companies about their products.

CONTENT

Weather and
Affects
(continued)

Plants

CONTENT

Plants
(continued)

SUGGESTED ACTIVITIES

Display an apple, head of cabbage, carrot, nut kernel or other vegetable food exhibited will help start a discussion of how and from where the plant produced it.

Grow potted plant in the classroom.

Write off for seed catalogues.

Take field trip to local nurseries in the community.

Use Garden Clubs Speaker's Bureau to secure people to speak about gardens, conservation.

Animals and Their
Environments

Discuss how living things may or may not adapt themselves to changes in their environments.

Use and observe aquarium in the classroom to study the characteristics of aquatic plants and animals.

Have vet to visit class and discuss farm animals, pets and how we may care for them.

List on blackboard the various kinds of animals that man may use for food. Such as: poultry, cattle, fish, etc.

SUGGESTED MATERIALS

Seed catalogues

CONTENT

Energy &
Machines

SUGGESTED ACTIVITIES

Discuss:

How machines have helped man through the ages.

Collect pictures of various machines that help man.

Have shop and physic teacher explain simple machines, gears, pulleys, and levers.

Take field trip to the numerous types of machine shops in the community.

Construct simple levers and pulleys in the classroom.

Draw and label the six simple machines.

Use simple examples to illustrate energy; such as: heat energy to cook food and for warmth, opening drink bottles - may use a machine to help him open it. In using the machine, he will put energy into it and get work from it.

SUGGESTED MATERIALS

Pictures of machines

CONTENT

Sound Energy

SUGGESTED ACTIVITIES

Discuss:

All sounds are produced by vibrating objects.
Sound travels in the form of waves and needs a medium in which to travel.
Sound can travel through all materials.
Sounds differ in pitch, frequency and quality.
Sound energy can be controlled by sound-proofing methods.

Use guitar to demonstrate high and low pitch.

Have students read about echoes and sound-proofing.

Read and make sentences with the following words:

Supersonic	frequency
vacuum	sonic barrier
vibrate	crest
wave length	echo

Have students list what materials carry sound best.

SUGGESTED MATERIALS

CONTENT :

Magnets and
Electricity

SUGGESTED MATERIALS

SUGGESTED ACTIVITIES

Discuss the action of magnetic energy, static, and current electricity.

Have students collect as many toys as they can that operate on the basis of magnetism. Show how magnets operate in the toys.

Prepare bulletin board showing how current electricity is used in everyday life.

By using a magnet, list as many things made of iron or steel in your home as you can.

Find out whether the force of a magnet will pass through different kinds of materials.

Discuss the difference between alternation electric current (AC) and direct current (DC).

Tour Cowan's Ford generation plant of Duke Power.

Bring in service people of Duke Power Co. to show films of their system, explain how the electric light meter works and is read.

Use library to look up reports on Thomas Edison, Ben Franklin, Dr. William Gilbert.

Discuss safety in all electric devices.

CONTENT

Understanding the parts of the human body

SUGGESTED ACTIVITIES

Use filmstrips and films to identify the main parts of the human body.

Have discussion on functions of the body in relation to everyday living.

Draw and label major parts of the body.

Use resource people - school nurse, Health Department, regular science and health teachers.

Have unit plan of the major systems of the body.

List on blackboard the need for proper rest in relation to school and job.

Grooming and personal appearance

Discuss the importance of good appearance at all times.

Show visual materials on care of hands, face, and hair.

Have discussion and display of deodorants.

Care of the teeth

Discuss why we should brush our teeth.

Have school nurse use model to demonstrate proper method of brushing teeth.

SUGGESTED MATERIALS

Various duplicator books

Films and filmstrips

Free materials from companies and Health Department

CONTENT

Care of the teeth
(continued)

SUGGESTED ACTIVITIES

Use filmstrips and films on the proper care of the teeth.

Discuss and explain various mouth washes, tooth pastes, dental floss, etc.

Take field trip to Central Piedmont Community College Dental classes. Students also may receive free cleaning and check up from student dental nurses.

The importance of good posture

Use class demonstrations on good and bad posture. Demonstrate the correct way to walk, sit and stand.

Discussion of effect of good posture to the rest of the body.

SUGGESTED MATERIALS

Building a Strong Body
Allan E. Breck
Hollister, California

We Are What We Eat
Steck-Vaughn Co.
Austin, Texas

Exploring Health
Steck-Vaughn Co.

CONTENT

Diseases, Prevention
and control

SUGGESTED ACTIVITIES

Show film on communicable disease. Discuss laws and good practices concerning vaccination, immunization, disinfection and quarantine.

List community agencies who help in fighting contagious illnesses.

Discuss good and bad types of bacteria.

Display pictures and posters concerning precautions against common diseases.

Write about health procedures to insure the prevention of spreading diseases.

Read about and discuss local laws concerning garbage and rubbish disposal.

Discuss the costs of medical attention, medicines, and hospitals.

Take field trip to doctor's office, hospital, and local Health Department.

Learn how to read, find, dial telephone numbers of doctors, hospitals, Poison Control Center and local ambulance service.

Have school nurse explain how to get health card.

SUGGESTED MATERIALS

Many free charts from local, State and Federal agencies

Bell Telephone Kit

CONTENT

First Aid

SUGGESTED ACTIVITIES

Have a discussion on the importance of preventing accidents, and the value of first aid.

Discuss the basic principles of first aid and knowledge of them.

Have local Red Cross personnel put on demonstrations of proper first aid practices.

Write and spell common words in relation to nursing and first aid booklets.

Discuss with students accidents that have happened at home, school and highways.

Draw chart of the body in relation to pressure points.

Keep notebook of newspaper articles dealing with accidents and disasters.

Read figures in newspaper dealing with loss of life and property.

Discuss insurance in time of a disaster and reasons to save for emergencies.

SUGGESTED MATERIALS

Newspapers

Magazines

CONTENT

Basic foods and
needs for a balanced
diet

SUGGESTED ACTIVITIES

Draw chart dealing with the seven basic foods.

Use newspaper and magazines to show pictures
of healthy teen-agers.

Show films and filmstrips depicting good
eating habits.

Plan and keep record of three meals a day
for a week.

Use newspaper to make and compute grocery
store lists.

Discuss:

How to control weight

Proper weight in relation to height

Dangers of over dieting

How good foods affect skin, teeth and body.

Use calorie chart to compute amount of
calories on a given day.

Make chart showing what foods build good
teeth, bones, etc.

Discuss good eating manners in home, school
and public places.

Take field trips to dairy, bakery and public
dining places.

SUGGESTED MATERIALS

Newspaper

Local Health Department

Free booklets from various
insurance companies

CONTENT

Safety

In the Home

SUGGESTED ACTIVITIES

Discussion:

How is second to the auto in the number of deaths every year in the USA.

Why and how of home accidents

How to prevent home accidents

Cost involved when one is hurt and out of work

Make chart to illustrate fire and accident hazards.

Write to insurance companies for booklets on home safety.

In School

Have students read and discuss fire drill and proper exits for their room.

Stress safety in halls, cafeteria, playground, school bus.

Make posters on fire prevention.

Show films and filmstrips.

SUGGESTED MATERIALS

Insurance Companies

Films and filmstrips

CONTENT

Smoking and Drugs

SUGGESTED ACTIVITIES

Discuss:

- New findings in smoking and increase in drug traffic.
- Harmful effects of smoking and drugs.
- How and why people get hooked on drugs.
- Pros and cons against smoking.

Show films.

Invite resource people from Health Department, Police, Federal Agencies, and TB Association.

Keep notebook on smoking, drinking and drugs as class project.

Discuss smoking rules, areas, policies of your school.

Getting ready for Driver's Education Classes

Show films dealing with proper mental, emotional and physical factors of safe driving.

Collect articles and pictures from newspaper about automobile accidents.

Have resource people visit class to explain license requirements, problems in driving in the city, where and when most accidents occur.

Discuss the importance of having driving license when applying for job.

Study rules and signs, take tests.

Enroll students in driver education class who can benefit from program.

SUGGESTED MATERIALS

Films and filmstrips

Booklets from insurance companies, Health Department and other agencies

Newspaper

School TV programs

Booklets from State Highway Department

I Want a Driver's License
Tripp, M. Fern
Dinuba, California

Vocations

-179-

Vocations

For most academically limited students, the high school program marks the end of formal training. Therefore, it is important that this part of the program be as comprehensive as possible. All efforts should be made to use the school's vocational program as fully as possible. Close co-ordination between the special education staff and the vocational staff can greatly enrich the offerings.

Vocations

Objectives

1. To teach students the procedures involved in getting a job.
2. To help students develop attitudes and social skills that will enable them to get along with other people.
3. To strengthen basic academic skills needed in various fields of work.
4. To teach responsibility, in all of its aspects, on the job.
5. To encourage a realization and appreciation of the rewards of being a good worker.
6. To introduce students to a variety of fields in the world of work.
7. To help students in their choice of a specific job for which they are qualified or can be trained.

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Securing a Job

Make a survey of jobs available in the community.

Grocery stores

Discount Houses

Bakeries

Cotton Mills

Restaurants and Cafeterias

Construction work

Garbage collectors

File clerk

Ushers

Janitor work

Maid

Nurseries - Child and plant

Meat packing plants

Unskilled labor, etc.

Job booklets from various companies

Films

Eyegate Visual Aids Co.

Newspaper

Review pre-vocational work from junior high.

Have students make lists of jobs they can do or be trained to do.

Let each student work up unit on several jobs he can do explaining kind of work involved, wages, hours, etc.

Take field trips to Lance, National Carbon, bakery and other factories. Have personnel managers talk to them about job benefits, unions, etc.

Have State Employment personnel visit class and explain personnel tests and where the most frequent jobs are.

CONTENT

Securing a job
(continued)

SUGGESTED ACTIVITIES

Use vocation films on as many jobs as possible.
Show filmstrips about jobs from Eyegate Company.
Collect want ads from newspaper on as many types of jobs students can do. Discuss pros and cons of each.
Write companies about benefits, wages, etc.
Invite D.E. and ICT teachers to talk about jobs in your community.

Qualifications to
secure a job

Discuss and emphasize desirable work habits and proper attitudes.

Discuss: What makes a good, successful worker
Punctuality, honesty, dependability,
courtesy, etc.

Have students make a list of twenty-five ways to be fired from a job.

Stress that more people are fired because they cannot get along with each other than any other cause.

Invite Personnel Managers to talk to class about what they would like to see in a worker.

Show movies on controlling your emotions, courtesy, honesty, etc.

CONTENT

SUGGESTED ACTIVITIES

SUGGESTED MATERIALS

Qualifications to
secure a job (continued)

Discuss usual company policies on being sick,
vacations, overtime, retirement.

Newspaper

List advantages and disadvantages on changing
jobs, and job hopping.

Films and filmstrips

Bell Telephone Kit

How to Find a Job

Discuss sources in finding a job, such as:

- a. Classified ads in newspaper
- b. State of N. C. Employment Office
- c. Private employment agencies
- d. Help wanted signs in stores
- e. Job openings from friends
- f. Vocational Rehabilitation Counselor
- g. School counselor

Use classified ad section of newspaper as
class project in making bulletin board.

Have students list do's and don't's during
job interview. There are many good films
and filmstrips on job interviews.

Use telephone to practice job interviews
over the phone.

Have job interview contest in room. Bring in
D.E. teacher or local personnel manager to
judge.

CONTENT

How to find a job
(continued)

SUGGESTED ACTIVITIES

Practice in:

- a. Filling in application blanks.
- b. Correct spelling on application blank.
- c. Neat handwriting.
- d. Understanding terms on application blank.

Discuss the advantages and disadvantages of joining a union.

Write and understand sentences such as:
strike, close shop, scab, yellow dog contract.

Getting to Work on
Time

Be able to budget time in the morning in relation to:

- a. dressing and bathing
- b. eating breakfast
- c. type of transportation - own, riding with others, bus.
- d. discuss how to allow for more time in bad weather, rain, snow, etc.
- e. procedure to follow if you have car trouble or flat tire - call parent, etc.
- f. understand directions, location of finding store of plant
- g. practice "dry run" before reporting to work for first time. Time to get to work, location, etc.
- h. stress the importance of getting to class on time, the penalties for chronic tardiness and class cutting.

Discuss what to do if one is lost.

SUGGESTED MATERIALS

CONTENT

Getting to work on
time (continued)

Importance of good
grooming, dress,
manners and social
behavior

SUGGESTED ACTIVITIES

Practice using and understanding city map.
Trace route on map to new job. Use films
and other visual aids.

Show films in relation to good grooming, dress
and courtesy.

Discuss why regular habits of cleanliness, dress
and social are so important on the job as well
as school and home.

Be able to take criticism from persons in
authority.

Discussion of addressing people in the plant,
store, school or home correctly.

How courtesy, grooming and manners pays off
in all situations of work and life.

SUGGESTED MATERIALS

City map of Charlotte-
Mecklenburg County

Visual Aids

Films

Booklets from
Insurance Companies

CONTENT

Social Security and
Other Legal Documents
Birth Certificate
Draft Registration

SUGGESTED ACTIVITIES

- Discussion:
- a. how and why Social Security came about.
 - b. know the four main uses of Social Security; such as, retirement, burial expenses, mental or physical disability and medicare.
 - c. why you must have a Social Security card when reporting for a job and how much they take out each month.
 - d. what to do when you have misplaced or lost your card.
 - e. location of Social Security office and how to get there.

Invite Social Security personnel to visit class to show films, help students fill out Social Security cards who do not have them.

Use numerous free Social Security booklets explaining Social Security. They have several excellent booklets for slow learners.

Explain the importance of having a birth certificate, such as applying for job, driver's license, and what to do if you lose or do not have one.

Discuss why and where one must register for draft.

Half a day school-
work schedule

Invite Vocational Rehabilitation Counselor to talk to class about their services and location of Vocational Rehabilitation Office.

SUGGESTED MATERIALS

Films, booklets from local
Social Security office

Health Department booklet
on your birth certificate

Booklets explaining
Vocational Rehabilitation
Services.

EXPECTED ACHIEVEMENTS

Senior high level

Minimum academic skills necessary to accomplish life work:

Chronological Age 15-16-17-18

- a. Reading proficiency at 5th grade level and/or the recognition and understanding of the Dolch Word List and/or the local newspaper.
- b. Competence in fundamental arithmetic skills including simple interest.
- c. Understanding of immediate social, political and economic environment as it affects each individual.

APPENDIX

-190-

DOLCH BASIC SIGHT VOCABULARY

Since these 220 words make up 50% to 75% of all ordinary reading matter they should be recognized by sight by all school children. One-fourth of words known in Grade 1; half of words known middle of Grade 2 and all words by middle of Grade 3.

SIGNS

Suggested list of signs which it is important for a child to know:

Alley closed	Found	Men's Toilet	Slow
Always be careful	Gasoline	Men Wanted	Step forward in the car
Bell out of order	Girl Wanted	Next Window	Street names
Beward	Glass	No Admittance	Street closed
Box Office	Go Slowly	No Left Turn	Stop
Boy Wanted	Handle with care	No Parking	Terms Cash
Bus Station	Hands Off	No Smoking	Ticket Office
Closed for repairs	Have fare ready	No Spitting	Warning
C.O.D.	Help wanted	No Trespassing	Wanted
Count your change	High Voltage	Not responsible for _____	
Danger	Hospital	Office	
Dentist	Hunting not allowed	One way street	Watch your step
Doctor	Inflammable	Open evenings	Wet Paint
Do not crowd	Keep Away	Out	
Do not talk to operator	Keep Moving	Out of order	
Down	Keep Off	Passengers are forbidden	
Drive Slowly	Keep Out	Pay as you enter	
Dynamite	Thin Ice	Please	
Elevator	This Way Out	Poison	
Employees Only	This Side Up	Post no bills	
Employment Agency Office	Use other door	Private	
Enter at front	Up	Public Telephone	
Emergency Exit	Keep to the right	Post Office	
Entrance	Laborers wanted	Pull	
Exit	Ladies only	Push	
Explosive	Ladies Toilet	R.R.	
Fare	Library	Railroad Crossing	
Fire Escapè	Listen	Rest Room	
Fire Extinguisher	Live Wires	Ring and walk in	
For Sale	Look out for _____	Safety First	
For Rent	Lost	School	

Sample Lesson Plans

A Five Day Unit and Lesson Plans for the EMR Student

Ruth L. Gaddy
Irwin Avenue Junior High

Introduction

This unit of study was chosen not only because of the high interest and experience value but also for other values that the BMR child will derive from it at present and in future life. This unit of work is an outgrowth of an observed need while eating lunch in the school cafeteria with a class of BMR children whose eating habits and table manners were far from the desired.

The BMR child like the so-called normal child needs to have an understanding of what is expected of him in his societal relations (1) to give him the needed confidence to extend himself in social situations, (2) to orient him to social situations in which he is sure to find himself at some point in his life, with a minimum degree of self consciousness, depending on the child's abilities to socialize.

Many times the growing adolescent will talk among themselves of where they went and how embarrassed they were because they were not sure of the correct procedure. This is particularly true when the teenager goes out to dine or if there is company in the home. The BMR child is said to have very poor habits and information in this area of societal relations. Although materials offered in this area must be modified to facilitate his understanding of it, it is an area of extreme value and benefit to him. From experience most BMR children and adolescents want to be a part of and are desirous of participating in the normal pursuits of the adolescent. He tends, however, to shy away from the social group activities most especially those requiring the social graces out of fear of either being embarrassed or ostracized.

When taught anything of interest in societal relations he proves to be an interested and curious student to learn.

It is hoped that this unit on Table Etiquette will provide him with some information and training that will help ease some of the problems he will face in his societal relations as he makes his transformation from lower school to higher school and later in life.

Purpose and Aims

A. General Aims:

1. To teach the BMR adolescent some general improvements in table manners at home and in public.
2. Helping him acquire some general knowledge of what is expected of us in both inter- and intra-cultural relations that will give him some degree of comfort when dining at home and in public.

B. Specific Aims

1. Learning the expected patterns of good etiquette that can be carried over to other social situations.
2. Learning how to eat properly.
3. Learning the proper use of table equipment.
4. Learning to use good table manners when guests are present, as a guest, at school, and with family members.
5. Learning how to use public eating facilities as the school cafeteria, restaurants, diners, and so forth.

- ### C. Primer purpose is to create a lesson situation that will provide for not only growth in the area of manners but social maturity and responsibility, and good citizenship as well.

Motiv. Aional Activity:

Put on Chalkboard. 1. Place a picture depicting poor table manners on the bulletin board. Watch for reactions.

- Read each question to students
2. Give the children questions on the blackboard - five questions rating their table manners. Tell them to number a sheet of paper from 1 to 5. Instruct them to answer each question yes or no.
- a. Would you rate yourself as good on table manners?
 - b. Do you sometimes feel uneasy eating before guests or in a public place because you are not sure of what to do?
 - c. Do you hesitate in accepting an invitation from friends to go to a cafe, a party, or some public eating place because you feel that you will become embarrassed?
 - d. Have your parents or teachers ever scolded you for bad manners or bad behavior at the table?
 - e. Do you wish to become socially acceptable at the table as well as in other social situations?
 - f. Do you know how to use a menu?
 - g. Do you know how much to tip a waiter or waitress?
 - h. Do you sometimes get nervous about your dress for a dinner or party date?

Subject: Table Etiquette

Subject Areas Involved: Social Studies, Language Arts, (Societal Relations) Science (Health and Safety), Arithmetic (buying from menus, etc.).

Grade Levels: Seventh, Eighth, and Ninth

Etiology: Educable Mentally Retarded (13 through 16+ years of age).

Time Limit: One week.

Periods: Language Arts - Social Studies block - 3 forty-five minute periods per day, five days.
Arithmetic and science - 1 forty-five minute period each, five days.

Monday: Aims and General introduction of weeks course of study.

Period 1, 2, and 3

General Aims:

1. Teach some general improvements of table manners at home and in public.
2. Teach some general knowledge of what is expected of us at home, in public eating establishments, in the school cafeteria, at parties, with friends and others.
3. Teach the importance of learning correct table manners and its influence on social acceptance now and later in life.

Language Arts and
Social Studies Block

Science

Discuss importance of eating a balanced meal for good health.

1. Ordering nutritionally balanced meal in school cafeteria.
2. Eating foods that are good for good health.
3. Let children make charts of a balanced meal ordered in a cafeteria, restaurant, or as provided for at home.
4. Give list of cafeteria lunches and let each child order food for himself. Discuss the meal ordered by each child.

Arithmetic

Give each child mimeographed copies of lunch menus and prices. Give each child a certain amount of money to spend. Let them order a meal within budget of what they have to spend.

Tuesday

Language Arts -
Social Studies

Motivational Activity: "Let's look into some of the reasons why we should (oral expression) try to improve our table manners. (Give each child a mimeographed copy of the following)."

1. Because we are growing up. Growing up includes learning how to meet new social obligations with approaches that are different from those you used as a younger child.
2. As you grow older you will be mixing more and more with new people in new places.

You will be thrown more and more into social situations that require eating. For instance, as you move from a lower school to a higher school, your school methods of getting your lunch will be less supervised and you will be expected to behave more as an adult. You will be expected to pass through a cafeteria line and select your own food which will require a better knowledge and practice of good conduct and respect for the rights of others. More and more you will attend school social functions where food is served as after game parties, going to soda and snack shops with your classmates and friends.

3. Later you will become a part of the work-a-day world. You will take your lunch in other public facilities as the company lunch room or diners with your co-workers and the general public. Stronger adult behavior will be expected of you.
4. Everyone wants to be liked and accepted whether they will admit it or not. How well you are liked depends on the good qualities others see in your behavior. Your outer behavior is the only thing that tells others what your attitudes or inner thoughts are. Bad manners at the table, sloppy eating habits will not indicate to others that you have a genuine respect for others, and people will generally not want you at the table with them.
5. Growing up also includes learning proper respect for out family members as well as others, or in public places. Good manners learned and practiced at home are easily carried over to other places and situations. The evening meal is a good place to practice because this is the one time of day when all of the family can gather for a leisurely pleasant meal. Meal time should be relaxing and pleasant. This is not the place for grumbling, arguments, unpleasant conversation, performing gymnastics with eating equipment, or performing like an orchestra with eating utensils. We should practice at home to free ourselves from self-consciousness and fear of going the wrong thing in public. We can also encourage others in our family to practice the correct way of eating and behaving.

Period 1 : Arts
Form study groups. Give each child or each group copies of "Growing Every Day" with a glossary in back.

Write study words on the blackboard. Have the students look up the meaning of the following words:

etiquette	manners	guest	poise	impolite
menu	restaurant	cafeteria	invitation	

Period 2 : Arts
Language Arts
Use words that we have looked up in telling sentences. Let your sentences be on the do's and don't's of table etiquette.

Science
Discuss practicing safety while eating. Points to discuss:

1. over-eating
2. waving eating instruments can be dangerous for yourself and others at the table with you.
3. Have role playing in table safety. Discuss and evaluate each act.

Arithmetic
Discuss going to a restaurant. Use lesson #20 in the Turner Livingston Reading Series "Chinese Dinner". Give menu with prices of Chinese foods. Let the children order a dinner for one, two, three or four people. Give total of each dinner.

Give supplementary problems in dollars and cents.

Wednesday
Period 1, 2, and 3 : Social Studies
1. Discuss Joey's dinner invitation to Donna in Chinese Dinner. Read the story.
2. Discuss different kinds of eating establishments and the different kinds of menus as "Dinty Moore's Place", Sterns Kosher Restaurant, English Grill, etc.

Periods 2 and 3
Language Arts

Do the exercise at the end of the story that has multiple choice and true-false questions about cafes and restaurants. At the end of the questions match the different kinds of international foods with the respective restaurant.

Period 4
Science

Discuss why we should eat.
Discuss what we should eat.
Discuss when we eat (as planning three nourishing meals per day).
Selection of food at various times of day and according to weather and work conditions.
Discussion of good disposition at mealtime as an aid to digestion.
Importance of meals.
As supplementary seat work let each child write a short paper on "The importance of a good disposition being an aid to digestion." Include both good and bad aspects.

Periods 2 and 3
Seatwork

Questions:

1. How did they respond when something was passed to them?
2. How did they seat themselves.
3. How did the boys seat themselves in the presence of ladies?
4. How did they eat, swallow, and attend to coughing spells at the table?
5. How did they act when an accident occurred at the table?
6. How did they enter the restaurant?
7. How did they act towards the waitress?
8. How did they go about selecting their food?
9. What did they do on a Dutch-treat date?
10. What did the girls do when they had to repair their makeup?

Science

Discuss and dramatize health hazards and the passing of germs at the table. Set up a corner of the room as a restaurant. Have all the children take a part in the role playing. Watch for coughing, using glasses, plates, forks, foods that others have used, etc.

Arithmetic

Use the Turner Livingston "The Money You Spend." Read, discuss and do exercises on Lesson #36. Pizza Palace.

Can you figure: a. two spaghetti dinners.

b. the tip he left.

c. tax on dinners.

How much Dick would have had to pay if he had ordered a la carte

a. two spaghetti dinners

b. two tossed salads

c. two coffees

d. the tax on the dinners

e. the tip he left

Do other exercises on figuring dinner prices.

Thursday

Period 1, 2, and 3

Language Arts and

Social Studies

Show film "Dining Tips for Teens" - viewing time 30 minutes. Film in color. The film includes tips for teenage dining at home and in public. There are both the right and wrong ways for dining.

Have student watch for tips that have been discussed in previous lessons.

Be able to answer questions.

Arithmetic

Give problems on the board on selection of

1. lunch in the cafeteria

2. lunch on the job

3. on a date after a ball game

4. Dutch treat

Put on board. Have children volunteer to work problems from the board.

Friday

Plan for carrying out what we have learned through this unit in our daily eating habits during lunch period. Plan for a field trip to a local restaurant.

Some of the ways to enforce learning during lunch period is to eat together as a family group with the class president sitting at the head of the table.

As a group we can remind each other of both right and wrong practices.

Make a chart with good eating habits or manners for the cafeteria.

Language Arts Evaluation

Write up plans for field trip to local restaurant.

Plan and make a master bulletin with pictures for the school cafeteria.

Summarization:

This unit of work has proved most successful in the following ways:

1. It was interesting to the students because it was an experience unit growing out of real life situations of the growing adolescent.
2. It helped the students to realize their changing social status in the community and their expected obligations.
3. It provided for student participation in a group situation by planning for a field trip to a local restaurant where their own committee has to intercede for arrangements.
4. It provided some criteria for evaluating and reminding us of our conduct in the school cafeteria throughout the school year.
5. It was a good media for the EMR child to integrate what was taught with practice.
6. It provided the opportunity for the possible development of other social studies units on food's, occupations in foods as food handlers commercially, jobs as waiters, bakers, caterers, etc.

It provided for other social studies units in societal relations as achieving good mental and emotional health, dating, etc. Its correlation with language arts, science and arithmetic was helpful particularly the practice of reading, figuring and understanding menus.

The buying of their lunch could provide for a unit in arithmetic as buying lunch for themselves and others, going Dutch treat, etc.

Most of all its general goal of improving table manners, at least in school, was met.

Aids

Teacher-student made charts on correct posture, etc.

Bulletin boards

Blackboards

Tables, chairs, eating utensils

Textbooks: Growing Up

Growing Everyday

You Are a Teenager

The Money You Spend

The Person You Are

The Community You Live In

Good Manners - Junior Life Adjustment Series

Duplicated materials

Filing Tips for Teenagers

Magazines for pictures of ciners

Pictures of restaurants and cafes

Diagrams

Other miscellaneous materials as course of study proceeds.

Test Used in Evaluation

True-False

1. _____ It is correct to eat with your mouth open.
2. _____ Reach across the table when you want something.
3. _____ If someone spills something on you at the table, hit them. They should not have done it.
4. _____ When you leave the table push your chair back and leave.
5. _____ Comb your hair at the table if you find that it needs rearranging.

Multiple Choice

1. When something has been passed to you you always say
I'm sorry Thank you Good Just grin
2. When entering a booth with girls, the girls go into the booth
first last together
3. When on a date treat you should
pay the whole bill pay for your own expect others to pay your bill
4. When you are eating in the school cafeteria select your food
very slowly, even though others have to wait as you pass through the line
after you have passed through the line.
5. When eating in a public restaurant where waitresses serve you
Get fresh with the waitress demand immediate service wait your turn and be polite to the
waitress

Getting Acquainted

**West Charlotte Senior High School
Mrs. Naomi L. Brown, Teacher**

Getting Acquainted

Objectives:

The main objective of this unit is to help the student, especially the new student, become acquainted with his new surroundings.

Specific Aims:

To help students to become acquainted with each other.
To enable students to travel from one part of the campus to another without getting lost.
To help students learn the names of each instructor and the subjects they teach.
To familiarize the students with their schedules and length of each period.

Procedure:

The teacher will introduce herself to the class and discuss her hobbies, vacation, and some of the things she plans to do with the class this year. After the tone has been set by the teacher, each student will be asked to introduce himself to his classmates. The students will be asked to bring their class schedules with them in order for them to find out exactly where their classes will be located.

The teacher will pass out a mimeographed sheet with the school plant drawn on it. She will also have a mimeographed list of the names of all the instructors and the subjects they teach to pass out to the students.

Meeting New Classmates

Time: 8:30

September 2, 1969

Objectives:

- To acquaint students with their new teacher.
- To help students become acquainted with each other.

Suggested Activities.

1. The teacher should write her name on the board and then pronounce it to the students. She should tell them about her hobbies and some of the things she did over the summer.
2. After the teacher has made her introduction, she could ask the students to introduce themselves to each other.
3. Pass a pencil and paper around so that each student may sign his name and address on it. Tell the students that they will receive a printed list of the names of all their classmates.
4. Remind the students to bring their class schedules with them on Tuesday.

Materials Needed:

- Blackboard, pencil and paper.

Learning About Our Campus

Time: 8:30

September 3, 1969

Objectives:

To help students locate the buildings where their classes will be held.

To help students find such buildings as the auditorium, library, cafeteria.

Suggested Activities:

1. Pass out the printed list of names compiled from those collected on Monday. Introduce any new students who have arrived since the first meeting.
2. Check class schedules to see if each student has one.
3. After the schedules have been checked, pass out the mimeographed sheets with map showing the location of each building.
4. Have students study the map explaining that this is the way the campus would look if they were in a helicopter looking down. Explain to them the fact that all buildings are referred to by numbers instead of names.
5. Have them look at their schedules and notice that each class has three numbers beside it such as 201. This class would be located in the 200 Building.
6. Take class on tour of the campus.

Materials Needed:

Class schedules, mimeographed copies of school plant.

Knowing Our Teachers

Time: 8:30

September 4, 1969

Objectives:

To acquaint the students with the teachers on the faculty and the subjects they teach.

Suggested Activities:

1. Have mimeographed list of all teachers and the subjects they teach. If possible, include the building numbers of the classrooms.
2. Point out to the students that some of the names will be quite easy to learn because they are similar to some of the ones that they have themselves.
3. Look at the list and pick out names at random. Call on students and ask questions like these, "Mrs. Blue teaches Biology 1. Her room number is 401. In which building is she located?" "Where would room 714 be?"

Materials Needed:

Mimeographed list of teachers

Suggested Word List:

Counselor	Principal
Secretary	Treasurer
Nurse	Social Worker

Being On Time

Time: 8:30

September 5, 1969

Objectives:

To teach students the importance of getting to class and other places on time.
To familiarize the students with the length of time between class periods.

Suggested Activities:

1. Place the schedules for each period on the board. Have students find how many minutes there are from the first period to the second period. How many minutes for the class break?
2. How many minutes are there in one hour, how many hours in one day, how many hours are there in a school day?
3. Place a toy clock on the board. Show the relationship between nine-forty-five and fifteen minutes of ten, etc.
4. Stress the importance of getting to class on time, the penalties for chronic tardiness and class cutting.
5. Stress the fact that most employers do not like tardiness. Show how time lost for tardiness is money out of a paycheck.

Materials Needed:

Wall clock, toy clock, piece of string and chalk for making circle if clock has to be drawn on the board.

Suggested Word List:

minute	second	hour	day	midnight	noon
tardy	punishment	penalty	clock	employer	paycheck

Reviewing Our Week

Time: 8:30

September 6, 1965

Objectives:

To see how well the students have done in familiarizing themselves with each other, the campus, the faculty.

To see if the students understand the importance of getting to class on time.

Suggested Activities:

1. Write the names of the person that sits behind you, beside you, in front of you. What is the name of the person two seats in front of you?
2. How are the buildings on this campus identified? In what building is room 612, etc.?
3. Name two of our counselors. What is the name of the counselor for the 10th grade? What is the name of the assistant principal? What is the name of the office secretary?
4. Write down the name of your homeroom teacher. What is the number of your homeroom. In which building would it be located?
5. If a stranger came to the campus and asked the way to the science building from this classroom, how would you direct him?

CHARLOTTE-MECKLENBURG SCHOOLS
Charlotte, North Carolina

GRADUATION REQUIREMENTS
SPECIAL EDUCATION

To receive a diploma in Special Education from a local high school, a student must complete the following requirements:

Special Education
Local Requirements (16 units - Grades 10-12)
Starting with 10th grade Special Education Class 1969

<u>Subject</u>	<u>Units</u>
English - Functional	3
Social Studies - Community	2
Mathematics - Practical	2
Science - Everyday	1
Physical Education	1
Work Experience	2
Electives	5
Typing
