of the

### NEW YORK STATE HIGHER EDUCATION PHYSICAL FACILITIES INVENTORY

These amended highlights include data from 11 New York State Institutions of higher education not reported in Space Inventory Report 1.

#### Enrollment

There were 639,139 head count and 477,763 full-time equivalent (FTE) students enrolled in the 214 New York State institutions of higher education operating in the fall of 1967.

Private institutions enrolled 242,959 FTE students; public institutions enrolled 234,804 FTE students.

#### Gross Space

All New York State institutions of higher education possessed 126,055,177 square feet of gross space, which is the space on all floors contained within the principal outside walls of all buildings inventoried.

Private institutions possessed 78,590,871 square feet and public institutions possessed 47,464,306 square feet of gross space.

#### Net Assignable Space

Data provided by the facilities inventory indicated that 78,151,956 square feet, or 62.0 percent of the total gross space was assigned to specific occupants in the institutions.

Of the total net assignable space for the State, 33,332,044 square feet, or 42.7 percent was allocated to Instruction, Research, and Library, and 24,243,525 square feet, or 31.0 percent was allocated to residential facilities (Table 10-A).

When residential space is deducted, Instruction and Research, and Library facilities accounted for 61.8 percent of the net assignable space (Table 10-B).

#### Data Calculations

The average estimated value for the State was \$27.21 per gross square foot of space.

The average net/gross space relationship for all institutions was 62.0 percent.

The average gross space per full-time equivalent student was 263.8 square feet.

The average net assignable space per full-time equivalent student was 163.6 square feet.

The average net assignable less residential space per full-time equivalent student was 112.8 square feet.

The average instruction-research-library space per full-time equivalent student was 69.8 square feet.

## Introduction

An inventory of physical facilities for New York State institutions of higher education was begun in the fall of 1967 under a program of comprehensive planning for higher education, sponsored and financed by the Division of College Facilities of the United States Office of Education. Inventories of facilities were received from colleges and universities in the State from the inception of the program to a cut-off date of April 1, 1969. A total of 227 separate inventories was received by the Bureau of Facilities Comprehensive Planning of the Office of Planning in Higher Education by the cut-off date. These inventories represented 17 City University institutions, 47 State University campuses, including community colleges, and 141 private colleges and universities, some with several separable schools (law, medicine, etc.) and campuses, for a total of 163 inventories from private institutions.

The space data taken from these inventories were compiled into master data tables which were published in the summer of 1969 in the New York State Higher Education Space Inventory Report 1. This Report provides (1) institution and campus, and enrollment data, (2) gross, or general building characteristics data, (3) interior, or net assignable space data, and (4) derived data--certain data calculations such as net/gross space ratios, and gross and net assignable space per full-time equivalent student.

The occasion for the compiling of this set of amended master data tables is the receipt of facilities inventories from 11 institutions of higher education within the State whose data were not included in the original master data tables--institutions that had not completed their inventories by the

April, 1969 cut-off date. This group includes seven State University colleges and four private institutions, and represents an appreciable student enrollment and a large bloc of educational facilities. An additional incentive to prepare these amended tables has been the recent receipt of the New York State Bureau of Statistical Services' Comprehensive Report on College and University Enrollments Fall, 1967, a report that shows some deviation from the enrollment data used in Space Inventory Report 1, which were taken from the Bureau of Statistical Services' College and University Enrollment Preliminary Survey, distributed in 1968.

## Enrollment

Table 1 of the Amended Master Data Tables differs in two ways from Table 1 contained in Space Inventory Report 1:

1. Eleven institutions and their enrollments are added to the original table.
2. Enrollment figures for certain groups of colleges both in the public and the private sectors are adjusted to reflect more recent and more accurate data, which were received after the compiling of the original tables.

Seven State University institutions, State University centers at Buffalo and Stony Brook, State University College at Buffalo, and Erie, Genesee, Monroe, and Westchester Community Colleges add 47,966 head count and 37,082 full-time equivalent (FTE) students to previous totals. Four private institutions, Our Lady of Hope College, Saint Vladimir's Orthodox Seminary, Mount Saint Alphonsus Seminary, and the General Theological Seminary add 397 head count and 379 FTE students to previous totals. Space Inventory Report 1 omitted Westchester Community College and Our Lady of Hope College from the list of institutions not included, and listed the College of the Holy Names, which had ceased to operate.

Minor adjustments in enrollment figures appear in a number of the institutional groupings for the reason given in 2 above, the most important change coming with private doctoral institutions. This is due to a duplication in the preliminary enrollment survey in which enrollment figures for a number of State University Statutory Colleges listed under the State University were also included in the enrollment totals of the parent private universities.

AMENDED 1967, SUMMARY ENROLLMENT DATA FOR ALL NEW YORK STATE INSTITUTIONS OF HIGHER EDUCATION, INCLUDING 11 INSTITUTIONS NOT PREVIOUSLY REPORTED

TABLE 1. Institutions and Degree Credit Student Enrollment\*

| Institutional Control and Level of Program | Institutions | Campuses   | Head Count     | Degree Credit Students |                | Full-time Equivalent** |

\*Enrollment data were obtained from a New York State Office of Statistical Services Comprehensive Report on College and University Enrollment, Fall, 1967.

\*\*Full-time equivalent figures represent all full-time plus one-third of all part-time students for each group of institutions.

### Building Characteristics Data

Total gross space possessed by the 11 institutions being added to the inventory data is 10,806,675 square feet. Of this space, 634,661 square feet pertain to private, and 10,172,014 square feet pertain to public institutions. The largest portion, or 8,179,653 square feet of this space was built in the period from 1958 to the present (Table 2); 9,974,679 square feet of space is of steel, masonry, or reinforced concrete construction (Table 3); 9,331,711 square feet of space is owned by the institutions (Table 5); and 10,229,676 square feet of space is in satisfactory condition (Table 4). Of the total space being added to the inventory, 244,766 square feet are scheduled for demolition during the period from 1967 to 1975, and an additional 163,296 square feet are coded "Should be Razed" (Tables 6 and 4). The facilities being added to the inventory have an estimated value of \$258,856,000 (Table 7). Estimated value of the facilities scheduled for demolition is \$4,607,000 (Table 8).

\*Percentages relate the immediate left-hand column figures to the appropriate total at the extreme left, each being calculated individually for all master data tables from Table 2 through Table 10.

\*\*Age of facilities is defined on page 17 of the Facilities Inventory Manual for New York State. (All notes on these amended Master Data tables refer to the August, 1967 edition of the Facilities Inventory Manual.)

**AMENDED 1967 SUMMARY SPACE DATA FOR ALL NEW YORK STATE INSTITUTIONS  
OF HIGHER EDUCATION, INCLUDING 11 INSTITUTIONS NOT PREVIOUSLY REPORTED**

<sup>1</sup>Some facilities which are "Scheduled To Be Demolished" in column 10 are coded "Should Be Razed" in column 13 of the Building Characteristics form.  
<sup>2</sup>Some facilities which are "Scheduled To Be Demolished" in column 10 are not coded "Should Be Razed" in column 13 of the Building Characteristics form.  
<sup>3</sup>Some facilities which are coded "Scheduled To Be Demolished" in column 10 of the Building Characteristics form.

## Assignable Space

A total of 6,061,478 square feet of assignable space has been added to the inventory with the inclusion of the 11 institutions. Of this space, 429,729 square feet pertain to private, and 5,631,758 square feet pertain to public institutions. In both the public and the private sectors, the added space affects very little the overall percentage distributions of space by room type (Table 9-A).

Space allocated to "Instruction and Research" accounts for 2,503,466 square feet, space allocated to "Library" and study facilities accounts for 599,497 square feet, that allocated to "Residential" facilities accounts for 1,600,827 square feet, and the balance of 1,357,697 square feet of assignable space is distributed to the other organizational unit categories of "General Administration," "Auxiliary," and "Other Assignable Space," (Table 10-A). Again, the added facilities change very little the percentage distributions of space by organizational units. When Residential space is deducted from the net assignable space, no important differences appear in percentage distributions with the added space (Tables 9-B and 10-B).

AMENDED 1967 SUMMARY SPACE DATA FOR ALL NEW YORK STATE INSTITUTIONS  
OF HIGHER EDUCATION, INCLUDING 11 INSTITUTIONS NOT PREVIOUSLY REPORTED

\*Organizational units are defined on pages 32 and 33 of the Facilities Inventory Manual.

## Derived Data

Amended Master Data Table 11-A is an expansion of the original Table 11-A in Space Inventory Report 1, which contained a number of sets of calculations based upon the raw data received from the facilities inventory. This new Table 11-A, in three parts, is amended to include the new data inputs from the 11 added institutions, and also expanded to show the distribution of net assignable space per FTE student for both "Room Type" and "Organizational Unit" categories. This expansion should aid in the interpretation of assignable space data by making the reader aware that the same assignable space is categorized in several ways in the facilities inventory.

It is of interest to note that "Average Value per Gross Square Foot," and "Net/Gross Space Ratio" remain about the same notwithstanding the new space that is added, except for a 3.0% decrease in the net/gross ratio for State University schools. When the space per FTE student is considered, however, some significant changes appear. For example, gross and net assignable space for community colleges has increased with the addition of the new data from 80.6 and 54.6 square feet to 97.7 and 66.1 square feet, respectively, per FTE student, and gross and net assignable space for State University Centers has decreased from 390.0 and 261.5 square feet to 338.2 and 191.4 square feet, respectively, per FTE student (Table 11-A).

No comparisons are available for space per FTE student by room type and organizational unit, except internal comparisons between groups of institutions in the public and private sectors. Care must be taken in making such comparisons, however, because of the differences between institutions

grouped together, especially in the private sector, and because of differences in the stages of development of institutions.

Amended Table 11-B indicates that the added and revised data effected only minor changes in gross and net assignable, less residential space, per FTE student. The most significant changes are in gross less gross residential space for community colleges, which increased from 78.8 square feet to 95.9 square feet per FTE student, and net assignable less residential space for State University Centers, which decreased from 155.9 square feet to 126.3 square feet per FTE student. Overall averages for the private, City University, and State University groups are changed very little.

AMENDED 1967 SUMMARY SPACE DATA FOR ALL NEW YORK STATE INSTITUTIONS  
OF HIGHER EDUCATION, INCLUDING 11 INSTITUTIONS NOT PREVIOUSLY REPORTED

\*"Gross Less Residential" is obtained by expanding net assignable residential space by the "Net/Gross Space Ratio" and subtracting the product from the "Total Gross Space".
