## ABSTRACT

THIS ANNUAL REPORT PROVIDES LISTINGS OF TAX-FUND APPROPRIATIONS OF STATE LEGISLATURES FOR OPERATING EXPENSES OF HIGHER EDUCATION IN EACH STATE. THE APPROPRIATIONS ARE FOR THE FISCAL YEAR 1969-70, ALTHOUGH SOME OF THE STATE LISTINGS ALSO INCLUDE APPROPRIATIONS FOR 1970-71. WITHIN EACH STATE, APPROPRIATIONS ARE LISTED FOR EACH 4-YEAR PUBLIC INSTITUTION, VARIOUS BOARDS OR STATE-WIDE COORDINATING AGENCIES, AND OTHER PROGRAMS AND ACTIVITIES IN HIGHER EDUCATION. SOME OF THE STATES INCLUDE LISTINGS FOR EACH 2-YEAR COLLEGE, WHILE OTHERS PROVIDE ONLY AGGREGATE APPROPRIATIONS FOR 2-YEAR INSTITUTIONS. FOR MANY OF THE LARGE 4-YEAR UNIVERSITIES, APPROPRIATIONS ARE LISTED FOR VARIOUS CENTERS, INSTITUTES, AND PROGRAMS WITHIN THE INSTITUTION. A TABLE PROVIDING INFORMATION ON 2-YEAR AND 10-YEAR GAINS IN TOTAL APPROPRIATIONS IN EACH STATE IS ALSO INCLUDED. TEN-YEAR GAINS RANGE FROM 138% TO 743%. THE REPORT NOTES THAT ALTHOUGH THERE ARE SEEMINGLY LARGE INCREASES IN APPROPRIATIONS, SERIOUS FINANCIAL NEEDS OF NUMEROUS STATE UNIVERSITIES ARE NOT BEING MET. STUDENTS ARE INCREASINGLY BEING ASKED TO PAY A LARGER PERCENTION OF THE TOTAL COST OF EDUCATION IN PUBLIC INSTITUTIONS AND, IN ONE STATE, THE PERCENTAGE PAID BY STUDENTS NOW EXCEEDS 50%. INCREASES IN STUDENT CHARGES OVER THE NATION ARE EXCEEDING THE CONSUMER PRICE INDEX WHILE AT THE SAME TIME SALARY INCREASES FOR FACULTY ARE NOT MEETING INFLATIONARY COSTS. (DS)

The Ohio State example underscores the significant gap between the Chambers figures for a state's total appropriation to higher education and the increase at a major state university within that state. This was documented in a special study by Dr. Chambers which showed that state tax support in all 50 states went up about 233 percent during the period 1961-69. However, state appropriations to state universities with large graduate centers increased only 157.5 percent during the same period. A look at the figures reported in this year's Summary will show this gap is widening in most states.

Dr. Chambers points out that large state universities are now in the critical stages of developing advanced graduate instruction and research programs. He notes that this type of instruction and research is "many times more costly than at the undergraduate or fifth year levels. As a result such institutions need redoubled support for these efforts and care must be taken not to penalize or pinch financially those universities strengthening their services at the top."

This squeeze is illustrated by the significant margin between public and private universities in salaries and compensation for faculty. The gap is greatest at the university level where the public university professor trails the private university professor by nearly 15 percent in salary and by almost 11 percent in compensation according to the 1968-69 salary survey of the American Association of University Professors. A full professor at the public university level receives an average of \$17,140 in salary which is \$2,043 less than the amount received by his private university counterpart, who averages \$19,183 a year in salary. Compensation figures indicate that the public university professor averages \$18,729 a year, which is \$3,174 less than the \$21,903 a year that the private university professor receives in compensation, including fringe benefits.

#### Many State Universities Face Serious Financial Crisis

Throughout the nation the seemingly large increases reported by Dr. Chambers are placed in sobering perspective when one looks at the serious financial needs of numerous individual state universities.

For instance, the University of Wisconsin reports it has the most unsatisfactory budget in two decades. The budget provides funds for only about half of the 12,000 additional students expected in the fall of 1969. During the coming year, students will get fewer library books, classes will be larger, there will be fewer faculty per student, there will be greater dependence on teaching assistants, and there will be reductions in counseling and computer services. Faculty salary increases have been limited to five percent. In the State of Wisconsin the appropriation went up two percent; fees went up 36 percent. The legislators' \$2.2 million increase is wiped out by the need for \$1.8 million for classified worker pay hikes and the \$415,000 in increased costs of state and county indigent patients referred to the university hospitals. Thus, funds other than state funds must provide for 4,800 new students, faculty salary increases, start-up costs at two new campuses, and a variety of other increasing financial obligations.

At the University of Colorado the state funds increased by 10.5 percent but it was predicted that the budget would not be sufficient to keep pace with the salary increases and other cost rises as well as expected enrollment increases. The University Medical Center's new Colorado General Hospital, completed five years ago, has never been fully utilized at its full 450-bed capacity, for lack of funds.

At Iowa State University the president stated that the money appropriated for his university for the coming biennium, although seemingly representing a 12 percent increase in operating funds, actually was practically no increase at all. Instead, Iowa State University reported unmet needs of \$18 million for operations and more than \$25 million for construction. Even after an unprecedented 50 percent increase in student fees, the deficit leaves the university functioning with a minimum-level budget that represents a holding action, not permitting new programs or improvement in the quality of existing programs.

## PREFACE

CLOSE LOOK AT CHAMBERS FIGURES REVEALS SERIOUS FINANCIAL  
PROBLEMS AT MANY PUBLIC COLLEGES AND UNIVERSITIES

With the publication of this tenth annual report on state tax appropriations for higher education, the enormous value of Dr. M. M. Chambers' virtually single-handed effort to acquire and disseminate accurate data grows in influence and utility. All interested in the support of public higher education are indebted to Dr. Chambers for his dedicated service.

Dr. Chambers pauses and takes stock in this tenth year, describing it as merely the half-way point in what he sees as a 20-year pattern of growth and development. It may be that Dr. Chambers' sanguine view of higher education and its support will prove to be most discerning and correct. However, this year, as never before, there are increasing signs of and causes for disquiet and apprehension about the future support of public higher education.

State legislators are finding it increasingly difficult to obtain and provide the funds needed by public higher education. Growing demands from welfare, health, highway and urban programs for state tax dollars are seriously affecting the amount of funds available to support higher education. While state tax support continues to rise in actual dollars appropriated, it continues to decline as a percentage of total income at most public institutions.

Students' Share of Cost of Education at All-Time High

Increasingly, students and their parents are being asked to pay a larger proportion of the total cost of education at public institutions. In the current year, for example, tuition and required fees increased 16.5 percent at state and land-grant universities. While institutions sought to avoid major increases in charges to students, the failure of many legislatures to provide requested and needed funds forced numerous increases on the eve of the 1969-70 academic year.

An extreme example is found in South Dakota where students are now paying better than 50 percent of the instructional cost of their education. In many other states the percentage of the instructional cost of higher education borne by the student has edged up from the traditional 20-25 percent to new levels of 30-35 percent. For example, at Purdue University the 1969-70 appropriation will require the students to provide about 32 percent of the cost of their education, where previously they had paid about 24 percent.

Increases in student charges over the nation are exceeding the consumer price index. At the same time, in many states, the salary increases for faculty will not even meet inflationary costs. The funds provided by the State of Indiana per undergraduate student, in terms of real dollars (adjusted for the decline in purchasing power) have not been increased in the past 10 years. In 1959-60 the appropriation for undergraduate students was \$936 and in 1968-69 it had dropped a dollar to \$935.

Appropriations to Major Universities Lag Behind States

In most states, the appropriations increase for all of higher education was greater than the increase for the state or land-grant university, clearly reflecting the demand for state tax funds from other segments of higher education, such as junior colleges, private higher education, and newly established institutions and programs.

At Ohio State University an inadequate appropriation resulted in an increase in student fees. Although the state increased the total appropriation to higher education in Ohio by 50 percent, much of it went to new areas such as new institutions (community colleges and new four-year programs), vocational and technical training, grants to individuals, and other expenditures that do not directly aid the state's established four-year public institutions.

The Ohio State example underscores the significant gap between the Chambers figures for a state's total appropriation to higher education and the increase at a major state university within that state. This was documented in a special study by Dr. Chambers which showed that state tax support in all 50 states went up about 233 percent during the period 1961-69. However, state appropriations to state universities with large graduate centers increased only 157.5 percent during the same period. A look at the figures reported in this year's Summary will show this gap is widening in most states.

Dr. Chambers points out that large state universities are now in the critical stages of developing advanced graduate instruction and research programs. He notes that this type of instruction and research is "many times more costly than at the undergraduate or fifth year levels. As a result such institutions need redoubled support for these efforts and care must be taken not to penalize or pinch financially those universities strengthening their services at the top."

This squeeze is illustrated by the significant margin between public and private universities in salaries and compensation for faculty. The gap is greatest at the university level where the public university professor trails the private university professor by nearly 15 percent in salary and by almost 11 percent in compensation according to the 1968-69 salary survey of the American Association of University Professors. A full professor at the public university level receives an average of \$17,140 in salary which is \$2,043 less than the amount received by his private university counterpart, who averages \$19,183 a year in salary. Compensation figures indicate that the public university professor averages \$18,729 a year, which is \$3,174 less than the \$21,903 a year that the private university professor receives in compensation, including fringe benefits.

#### Many State Universities Face Serious Financial Crisis

Throughout the nation the seemingly large increases reported by Dr. Chambers are placed in sobering perspective when one looks at the serious financial needs of numerous individual state universities.

For instance, the University of Wisconsin reports it has the most unsatisfactory budget in two decades. The budget provides funds for only about half of the 12,000 additional students expected in the fall of 1969. During the coming year, students will get fewer library books, classes will be larger, there will be fewer faculty per student, there will be greater dependence on teaching assistants, and there will be reductions in counseling and computer services. Faculty salary increases have been limited to five percent. In the State of Wisconsin the appropriation went up two percent; fees went up 36 percent. The legislators' \$2.2 million increase is wiped out by the need for \$1.8 million for classified worker pay hikes and the \$415,000 in increased costs of state and county indigent patients referred to the university hospitals. Thus, funds other than state funds must provide for 4,800 new students, faculty salary increases, start-up costs at two new campuses, and a variety of other increasing financial obligations.

At the University of Colorado the state funds increased by 10.5 percent but it was predicted that the budget would not be sufficient to keep pace with the salary increases and other cost rises as well as expected enrollment increases. The University Medical Center's new Colorado General Hospital, completed five years ago, has never been fully utilized at its full 450-bed capacity, for lack of funds.

At Iowa State University the president stated that the money appropriated for his university for the coming biennium, although seemingly representing a 12 percent increase in operating funds, actually was practically no increase at all. Instead, Iowa State University reported unmet needs of \$18 million for operations and more than \$25 million for construction. Even after an unprecedented 50 percent increase in student fees, the deficit leaves the university functioning with a minimum-level budget that represents a holding action, not permitting new programs or improvement in the quality of existing programs.

### Chambers Figures Mask Major Financial Problems

The Chambers figures mask other important financial needs of established public institutions. As noted earlier, where the states have found themselves unable to provide the support required, public institutions have been forced to raise tuitions. These increases in tuition have often required state scholarship programs so that the needy student would not be deprived of the opportunity for education at a public or private institution. State scholarship dollars, going directly to the student for payment of tuition, do not provide new support for the institution but they do boost the total reported by Dr. Chambers in many states.

Also not revealed in the Chambers tabulation of funds available for operation is the increasingly difficult situation with respect to the acquisition and operation of capital plant. Here, the public institutions are caught between the upper and the nether millstones. It is clear that, even with Federal assistance, many states are not providing adequate funds for capital plant. Thus, old, inefficient plants, with excessive operational and maintenance costs, continue to be used out of necessity. The capital programs at many public institutions are falling ever farther behind. A recent survey by the Office of Education indicates that, compared to private institutions, public institutions are in a worse situation with respect to physical facilities than they were ten years ago. Many states have apparently been unable to provide that minimal share required by the Higher Education Facilities Act.

In effect, many public institutions are living off their capital. Capital improvements are delayed, while the money that ought to go into capital improvements is used for operations. It is apparent that a day of reckoning is close at hand. The operating program at many institutions cannot continue to be subsidized out of the deterioration of the capital plant.

### Campus Unrest and State Support

It is also apparent in some states that current upheavals and soul searching in academia are testing the patience, goodwill, and, in some cases, support of state legislators. Generally speaking, state legislatures in 1969 rejected most of the harsh and repressive proposals for dealing with campus unrest and disruptions. However, a small but disturbing number of punitive actions affecting support of public higher education were noted in several states. A reduction in the University of New Mexico's appropriations in response to a "filthy" poem assigned in one English class and significant reductions in the Rutgers University budget by the legislative appropriation committee following the takeover of a building are two clear examples of negative legislative response. In some states, such as California, a total state philosophy with respect to public higher education is apparently being seriously threatened and has already been altered to some extent. Other examples could be cited to reflect the growing public frustration and concern over campus unrest and disruptions.

In summary, one cannot dispute Dr. Chambers' conclusion that state legislatures are, indeed, providing substantial sums of money to higher education. However, there are some very real questions whether they are doing enough. The questions raised here deserve extended and intensive research and analysis. The projected demands on public higher education in the next decade will dwarf the pressures of the late Forties and the decade of the 1950's. Neglect today may have a many-fold cost in the years to come.

### A Note to Users of This Report

Detailed information about the procedures used in compiling this report are found in the appendix. We would like, however, to emphasize the following three points about the material contained in this booklet.

First, this report covers only appropriations of state tax funds for operating expenses of higher educational institutions. The Office of Institutional Research believes that these figures are a more valid measure of state support of higher education than total appropriations made by state legislatures since the latter may include re-appropriated income received by institutions from student fees and other non-tax sources. The report does not include appropriations for buildings and other capital purposes.

Second, users of the data contained in this report should keep in mind that appropriations from state tax sources listed herein include support not only for instructional programs, but also for research, including agricultural and engineering experiment stations, and a great many public services such as general extension, county agricultural and home demonstration agents, adult education programs, hospitals, and other activities assigned by state legislatures to institutions of higher education.

And finally, the data contained in this report are in preliminary form and subject to verification and change. In several of the state tabulations the items may not add up to the indicated total. Minor discrepancies may be attributed to rounding. Where the discrepancies are substantial, the investigator, while reasonably confident of the total, may have encountered difficulty in obtaining from his sources consistent reports of such items as state scholarship programs, expenses of central governing boards, supplementary budget increases or decreases. To check and verify every item would be a costly and time-consuming project which would delay the publication of this report beyond the time when it is most useful. While the tabulations are subject to change, they provide a reasonably accurate picture of state tax funds appropriated for 1969-70.

## INTRODUCTION

### TIME FOR A LONG LOOK AHEAD

The approaching end of one decade and beginning of another provides a stimulus toward pondering the lessons of the past and the prospects of the future; to view big pictures and broad horizons.

This present annual summary is the tenth in a consecutive series. At the moment, neither time nor space permit extensive or detailed analyses of the full ten-year record. Some work of that kind will appear later in the well-known GRAPEVINE, and through other outlets.<sup>1</sup>

The year 1970 is not a summit. It is a mid-point in a twenty-year period of expansion and development of public higher education in the United States. In general, the trends of the decade just past will continue until 1980 with no great deflection. The evidence is everywhere in the statistics of births prior to 1958, of the necessity of at least some education beyond high school for all persons in an age of advancing technology and complexity of social problems, and of economic progress.

This report for fiscal year 1969-70 indicates that the total tax-fund contributions of the fifty states to the operating income of higher education has exceeded \$6.1 billion with a dollar gain of about \$1.1 billion since one year earlier, and about \$1.7 billion over the most recent two years. These dollar gains are larger than in preceding comparable periods; but the percentage of gain, as might well have been expected, shows a slight downward turn--being about 38.5 per cent over the most recent two years, as compared with figures generally above 40 per cent for other comparable periods since 1965.

This is no cause for panic. Insofar as it represents any slowing down at all, it is to my mind scarcely at all a reflection of public anger at student unrest, but much more probably a result of the slight rightward swing in the state and national elections of 1968. With some notable exceptions (which I shall hope to discuss in later analyses), legislatures and governors continue to develop the wise policy of increasing state support for public higher education in long strides.

Most of the states have large revenue potentials presently unused. There is competition from impoverished central cities, highways, welfare, and other state functions; but eventually the federal contribution in all these areas will inevitably increase. The states need not and will not retreat from the vital sphere of public higher education which has thus far evolved largely with their support.

Administration  
Illinois State University  
Normal, Illinois

October 1969

---

1

A preliminary step has been accomplished in a timely manner in an assembly of 300 tabulations and 60 graphs pertaining to the first nine years of the decade, in which the annual or biennial tables for each state for the entire period are juxtaposed. The result is a 45-page, 14 x 17-inch document, A Record of Progress in State Tax Support of Higher Education, published in February 1969 by the Interstate Printers and Publishers, Inc., Danville, Illinois 61832 (\$10.00 postpaid).

APPROPRIATIONS OF STATE TAX FUNDS FOR OPERATING EXPENSES OF HIGHER EDUCATION,  
 IN THOUSANDS OF DOLLARS, FOR SELECTED FISCAL YEARS FROM 1960 THROUGH 1970,  
 WITH DOLLAR GAINS AND PERCENTAGE GAINS OVER MOST RECENT  
 TWO YEARS AND OVER TEN YEARS

\* Unconditional appropriations. Additional conditional appropriations payable only if the condition of the Alabama Special Educational Trust Fund is adequate and with the approval of the governor, aggregated \$2,356,000 for 1969-70 and \$6,537,000 for 1970-71. Payment is problematic, at least for some time. Similar conditional appropriations for the preceding biennium were not paid.

\*\* \$24,294,000 and \$25,192,000.

\*\*\* \$19,161,000 and \$19,892,000.

+ Four former state colleges now officially named regional state universities.

++ Seventeen state junior colleges, including two to be opened in the fall of 1969.

Murray State U	6,214	8,152
Morehead State U	5,540	7,290
Kentucky State Coll	2,170	2,586
U of Louisville **	3,100	3,100
Council on Public H E	435	363
<u>Totals</u>	<u>82,350</u>	<u>95,478</u>

\* The sums include the Medical School and the Agricultural Experiment Station and the Agricultural Extension Service, and approximately 12 "community college" branches of the University in outlying towns throughout the state; and also an appropriation of \$330,000 for the biennium for a "community college (branch of the University of Kentucky) at Madisonville in western Kentucky.

\*\* This university is a state-subsidized municipal institution. House Resolution 91, adopted by the 1968 legislature, authorizes it to become a state institution and requests the Board of Trustees of the University of Louisville and the Board of Trustees of the University of Kentucky to develop a plan of affiliation for the two universities.

LOUISIANA

State tax-fund appropriations for operating expenses of higher education in Louisiana, fiscal year 1969-70, in thousands of dollars.

Institutions (1)	Sums appropriated (2)
Louisiana State U (all units and branches)	\$48,252
Southern University (all campuses)	9,172
U of Southwestern La	8,025
La Polytechnical Institute	6,781
Northeast La State College	5,424
Northwestern State College	5,306
Southeastern State College	4,642
Grambling College	4,637
McNeese State College	3,901
Nicholls State College	3,213
<b>Total *</b>	<b>99,352</b>

\* This total appears to be almost exactly the same as the total for the preceding fiscal year 1968-69. We are told that the legislature appropriated larger sums but authorized the governor to reduce them upon evidence of probable insufficiency of revenue. He exercised this power with the result that there is almost no gain over the immediately preceding year.

MAINE

State tax-fund appropriations for operating expenses of higher education in Maine, biennium 1969-71, by separate fiscal years, in thousands of dollars.

Bd Trustees of Insts H L	380
Technical institutes	4,700
State aid to jr colleges	12,371
<b>Total</b>	<b>95,609</b>

- \* A lump-sum appropriation, not to any institution, but to be allocated to institutions by the Board of Trustees of State Institutions of Higher Learning.
- \*\* Classified as "Research and Development Funds," aggregating \$12,988,000 for the biennium.
- + The Mississippi Research and Development Center is a non-degree-granting institution, with its program intimately related to those of the state universities.

To afford an impression of the identity of the institutions, it is necessary to show both the amounts allocated to the 8 teaching institutions for one fiscal year, and one-half of the amounts appropriated specifically by the legislature to the units and services associated with each institution. This allows subtotals for each of the state universities to emerge, which are presumably roughly comparable with those of similar institutions in other states.

Approximate allocations to 8 teaching institutions in Mississippi by the Board for one fiscal year and one-half the appropriations for biennium 1968-70 to units and services associated with each institution, in thousands of dollars.

Institutions	Sums
U of Mississippi	\$5,132
U Miss Sch of Medicine	2,515
U Miss Teaching Hosp	2,505
U Ctr and Org Research	500
U Miss Sch of Nursing	290
Pharmaceutical research	157
<b>Subtotal, U Miss -</b>	<b>\$11,099</b>

(continued on next page)

(continued from preceding column on preceding page - MISS.)

Mississippi State U	6,095
Coop Ag Exten Service	2,266
Ag Experiment Sta	1,807
Chemical regulatory	211
Forest Products	144
Foundation herds	20
<b>Subtotal, M St U - \$10,501</b>	
U of Southern Mississippi	4,767
U So Miss Sch of Nursing	157
<b>Subtotal, U So M - \$4,924</b>	
Jackson State College	2,287
Miss St Coll for Women	1,837
Delta State College	1,804
Alcorn A & M College	1,626
Miss Valley State Coll	1,498

The total here is not material because not all allocations are included; allocations to independent research institutions are not included.

For the 50-state summary table for fiscal year 1969-70, the entry is one-half the total legislative appropriation for the biennium 1968-70, or \$47,804,000.

- \* The figures include \$9.2 million for the instructional program at Buffalo Health Science Center, and \$2.2 million for all related costs for Stony Brook Health Science Center.
- \*\* The figures include sums to be allocated to the campuses later in the fiscal year.
- \*\*\* Funds for fringe benefits are appropriated to all state agencies in single lump-sum accounts. It is necessary to include this sum in order to keep the New York figures comparable with those of other states as nearly as possible, and also to conduce toward long-term historical comparability, past and future, despite the fact that the introduction of this sum is counter to exact comparability over a few recent years.
- + Municipal university, state-aided.
- ++ This is the first appropriation of tax money as annual general support of private colleges and universities, to be allotted to eligible institutions on the basis of numbers of degrees conferred during the preceding year. Presumably about 60 nonsectarian institutions will be eligible. The state constitution prohibits tax support of denominational institutions, of which there are about 83 in New York.

PENNSYLVANIA

Appropriations of state funds for operating expenses of the "state-owned" institutions of higher education in Pennsylvania, fiscal year 1969-70, in thousands of dollars.

Institutions	Sums appropriated	
	(1)	(2)
Indiana U of Pa		\$ 7,786
West Chester		6,828
California		5,733
Slippery Rock		5,616
Edinboro		5,553
Millersville		5,259

(continued from preceding column - PENN.)

Clarion	\$ 5,062
Bloomsburg	4,306
Shippensburg	4,185
Mansfield	3,953
East Stroudsburg	3,867
Kutztown	3,588
Cheyney	3,386
Lock Haven	2,919
<b>Subtotal *</b>	<b>68,041*</b>

\* This is only a subtotal for 14 "state-owned" institutions. In recent years it constituted only from 20 to 30 per cent of the statewide total of appropriations of state tax funds for operating expenses of higher education.

NOTE: In the absence of complete appropriations for the state of Pennsylvania when this document went to press, the statewide total for fiscal year 1969-70 has been roughly estimated as \$250 million, to complete the 50-state summary tabulation which appears on an early page herein.

Total statewide appropriations for Pennsylvania, including those to the Pennsylvania State University, the two "state-related" private universities (Temple and Pittsburgh), and the several "state-aided" private institutions, will be reported, if possible, in the next annual edition of this document.

RHODE ISLAND

State tax-fund appropriations for operating expenses of higher education in Rhode Island, fiscal year 1969-70, in thousands of dollars.

Institutions	Sums appropriated	
	(1)	(2)
U of Rhode Island		\$17,903
Rhode Island College		6,606
Rhode Island Junior College		2,632
Bd of Trustees of St Colls		129
<b>Subtotal u &amp; c's - \$27,270</b>		
State scholarships *		1,577
Professional nurses		70
Bryant College **		15
War orphans		3
<b>Total</b>		<b>28,935</b>

\* Average of \$750 per year for five per cent of senior class as of October in public and private high schools, to attend any accredited college in the United States.

\*\* For teacher training in business subjects at the named private college.

SOUTH CAROLINA

State tax-fund appropriations for operating expenses of higher education in South Carolina, fiscal year 1969-70, in thousands of dollars.

Institutions (1)	Sums appropriated (2)
U of South Carolina	\$15,129
Regional campuses	1,205

APPENDIX I.

WHAT THE FIGURES ARE INTENDED TO MEAN

The data are supplied by key persons in each state who report them to the small monthly mimeographed newsletter GRAPEVINE. Their cooperation is indispensable. The ground-rules used to achieve an approach to uniformity of reporting are enumerated below. Diversities of practice among the fifty states make it impossible to eliminate all inconsistencies and accomplish absolute comparability among states and among institutions. We emphasize that comparisons are of limited usefulness, but have value if correctly interpreted.

(1) We exclude appropriations for capital outlay.

(Nevertheless, GRAPEVINE appreciates informative statements and documentation regarding appropriations, bond issues, or other devices for providing capital funds. We can make occasional separate stories or exhibits of these, but never commingle or confuse them with appropriations for operating expenses.)

(2) We exclude any sums appropriated which clearly originated from sources other than state taxes, such as student fees or other institutional receipts. (Some states capture these non-tax funds for the state treasury, and appropriate them to the institutions as a part of the total appropriations for operating expenses; but many states do not. Hence, it is necessary to peel off the non-tax institutional receipts in order to report Appropriations of State Tax Funds.)

(3) We include any sums appropriated for the annual operating expenses of the institutions of higher education, even if appropriated to some other agency of the state for ultimate allocation and payment to the institutions. (Some states appropriate, either occasionally or habitually, sums for such items as faculty fringe benefits under conditions such that only the total made available at the time can be known, and the actual allocations to several institutions cannot be known until after the end of the fiscal period. GRAPEVINE wants to report the total made available at the time of appropriation, and generally does not wait for subsequent institutional allocations unless they are obtainable without delay. GRAPEVINE's thrust is the prompt reporting of appropriations; not later reporting of actual expenditures.)

(4) We include any pre-allocated state taxes whose proceeds are dedicated to any institution of higher education, bypassing the process of periodic appropriation by the legislature. (For example, West Virginia has a tax of approximately one cent per bottle on the sale of soft drinks, currently producing about \$4.5 million per year, which automatically goes to the West Virginia University Medical Center without legislative appropriation.)

(5) We would like to include, whenever practicable, separate appropriations for medical centers (including schools of medicine, dentistry, nursing, teaching hospitals, and other appropriate appurtenances of a medical education complex); separate appropriations for agricultural experiment stations and cooperative agricultural extension services; and separate appropriations for branch institutions, regional campuses, and any other off-campus outposts of universities or land-grant institutions. We cannot request this except in instances where it is easily practicable and would not involve delay in reporting.

(6) We include sums derived from state tax funds and appropriated for state scholarships. This is regardless of whether such scholarships are tenable in public or private institutions, or tenable within or without the state.

(7) We include sums appropriated to statewide governing or coordinating boards regardless of whether for the expenses of the board or for ultimate allocation to the institutions.
