ABSTRACT

This report of PROJECT DESIGN, funded under ESEA Title III, assesses the English language arts of the Fresno City Unified School District, kindergarten through the 12th grade. A linguistic inventory was administered by mail to 75 randomly selected elementary, junior high, and senior high school teachers. A linguistic analysis of student composition was carried out in six schools--three elementary and three high schools, each representing a different socioeconomic and racial grouping of students. Other sources of data included interviews of administrative personnel, principals, and teachers; visits of classroom; and analyses of district documents. Major conclusions stemming from the assessment of the English language arts are that the Fresno school district lacks: (1) an adequate program for the Negro and Mexican-American student, (2) adequate scope and sequence in the English language arts, and (3) educational leadership to prepare its teachers to teach the "New English." PROJECT DESIGN (Inter-Agency Planning for Urban Educational Needs) was organized as a two-year project to develop a comprehensive long-range master plan of education for the Fresno City Unified School District in California.

This project was conceived by school leadership to bring under one umbrella current major problems of the schools, the relationship of the schools to the broader community, the impact of educational change now occurring throughout the nation, and a fresh view of the educational needs, goals and aspirations of our youth and adults. The ultimate purpose of the project is to weld into an integrated plan the best use of available resources to meet the totality of current and projected needs according to their rational priorities.

The United States Office of Education funded the proposal as an exemplary Title III project, recognizing the urgency for developing better planning processes for urban school systems. The first year of this project was organized to assess current and projected educational needs in the urban area served by the Fresno City Schools. Planning procedures will be carried out in the second project year.

A major dimension of the Needs Assessment is an analysis of educational and urban factors by a Task Force of specialists. This report is one of the Task Force Needs Assessment publication series. See the next page for the complete list of project Needs Assessment publications.

INITIAL CHARGE

The task given me was to assess the English Language Arts Program of the Fresno School District, Kindergarten through the 12th grade.

EXPERIMENTAL DESIGN

To assess the English language arts curriculum three research tools were devised and utilized:

1. Interview schedule
2. Linguistic inventory
3. Linguistic analysis of student composition

The interview schedule was used to interview:

1. District personnel (3)
2. District principals (12)
3. District teachers (25)

Schools visited were selected to represent varied socio-economic and racial groups. (See list in methodology detail section.)

The linguistic inventory was administered by mail to seventy-five randomly selected teachers representing elementary, junior high, and senior high school teachers.

The composition study was carried out in six schools--three elementary and three high schools, each representing a different socio-economic and racial grouping of students.

Other sources of data include:

1. Classroom visitation
At least one classroom visitation was made in each of the grade levels K-12
2. Examination of district documents
Elementary course of study
Junior high and high school courses of study
Official publication in the area of creative writing.
Various documents and publications provided by individual schools
3. Examination of documents provided by Project Design

MAJOR CONCLUSIONS

The following are the major conclusions stemming from my assessment of the English language arts:

The Fresno School District is not at the present time providing and adequate program in the English language arts area for the Negro and Mexican-American student.

The Fresno School District is not at the present time providing an adequate scope and sequence in the English language arts, Kindergarten through twelfth grades.

The Fresno School District is not at the present time providing the educational leadership to prepare its teachers to teach the "New English."

The Fresno School District is not at the present time providing adequate assessment of the English language arts program.

HISTORICAL DETAIL

The most important single historical detail is the "New English" with the new texts and the new state framework. These recent developments have and will continue to have profound effects on the English language arts curriculum. They involve a new way of looking at the English language arts curriculum, a new content with new terminology and, finally, a new approach to method.

METHODOLOGY DETAIL

The following schools were visited:

Linguistic Analysis of Student Composition:

Three fifth grade classes were selected to provide
the following representation:

- (1) High percentage of Negro students
- (2) High percentage of Mexican-American students
- (3) High percentage of Caucasian students

Three tenth grade classes were selected to provide the
same representation as above at the secondary level.

A "Story Starter" was provided for use by the teacher in
motivating student writing. Each student completed the composition
in class, that is, within one class period (40 minutes).

Linguistic Inventory:

This inventory was sent to seventy-five teachers utilizing
the following breakdown:

- 54 randomly selected fifth grade teachers
 - 17 randomly selected English teachers, one from each junior
high in the district
 - 7 randomly selected English teachers, one from each senior high
in the district
- (See attached sheet, Appendix A.)

Limitations--One of the severest limitations was that of time.
I was hired very late in May and since school was out the first
week of June there was little time to probe as deeply as one might
wish.

Another limitation was the lack of test data available to the author. The Fresno district is not apparently in the habit of providing comparative test scores between schools. Further there isn't very much test information available in the English Language Arts area.

SUGGESTED SOLUTIONS

The writer feels strongly that the Fresno School District is not providing an adequate educational program in the English language arts for minority students. There is no easy solution or answer but it is suggest that the Berkeley Plan be studied as one way of providing for better educational opportunities for the disadvantaged child.

There is a great deal of evidence (see Coleman Report) to substantiate the fact that disadvantaged youngsters have their intellectual achievement increased (particularly in the English language arts area) when they are in schools with middle class youngsters. Further the research indicates no drop in the achievement of middle class youngsters.

In many ways school districts like Fresno haven't moved much since 1954. Great masses of Negroes and Mexican-Americans are still condemned to racially segregated schools. Possibly the Fresno District should carefully read and study the recent South Holland, Illinois court decision.

Since nine out of fourteen schools affected by the Field Act have minority populations greater than the percentage of minority groups members in the district as a whole, the replacing of these buildings would give the district a dramatic opportunity to improve the education of minority groups in Fresno.

If the Fresno district does not see fit to desegregate the school facilities then it must mount a great and total effort to provide the kind of education in the English language arts that will enable minority group youngsters to achieve at grade level or above in order to take their place in American society.

The Fresno School District needs to greatly expand its in-service program in the English area. The teachers need and deserve help. Further the district should immediately embark on a program to develop a course of study in the English language arts, kindergarten through twelfth grade. The present elementary course of study is so out-of-date that it would be a waste of time to revise it. I believe these two jobs can be carried out at the same time to the advantage of everyone concerned.
