ABSTRACT

This report presents 11 statistical tables classifying data collected in 1958 on foreign language offerings and enrollments in the high schools of the United States of America, grades 9-12. Comparisons with a similar study conducted in 1°54 are made by percent and state rank. This survey treats: (1) total foreign language enrollments, (2) enrollment drop after second year, (3) high school offerings in foreign languages, and (4) enrollment in Latin, French, German, Italian, Russian, and Spanish 1-4. A summary table is included. (PL)

## FOREIGN LANGUAGE OFFERINGS AND ENROLLMENTS IN PUBLIC SECONDARY SCHOOLS, FALL 1958

Ьy

Wesley Childers

The research reported herein was performed pursuant to a contract with the United States Office of Education, Department of Health, Education, and Welfare.

#### Preface

The accompanying report, Foreign Language Offerings and Enrollments in Public Secondary Schools, Fall 1958, is the first of a series of investigations on the current status of foreign languages in elementary and secondary schools and in institutions of higher learning in the United States. This survey is a part of the Statistical Research Project of the Modern Language Association of America under a contract from the United States Office of Education, authorized under the National Defense Education Act. Subsequent reports will present data for 1959 on foreign languages in the elementary schools, in public and independent secondary schools, and in colleges and universities.

A statistical report such as the present one represents the collaboration of many individuals in the several states, who sent published state reports or who tabulated the data for us. We are grateful to state language consultants, statisticians, directors and supervisors of secondary education, and teachers in high schools and universities. Especially we thank the persons listed below, whose addresses are those of the State Department of Education in the capital of their respective states, unless otherwise noted.

ALABAMA: Miss Joanna Breedlove; ALASKA: Herbert E. Bruce; ARIZONA: Chauncey B. Coor; ARKANSAS: Miss Wilma Jimerson; CALIFORNIA: Everett V. O'Rourke; COLORADO: Lowell Elisha; CONNECTICUT: Arthur Selvi (Central Connecticut State College, New Britain); DELAWARE: Max S. Kirch (University of Delaware, Newark); DISTRICT OF COLUMBIA: Mrs. Marjorie P. Bowen (Fillmore School, Washington 7); FLORIDA: O.E. Pérez; GEORGIA: M. Gordon Brown, Paul Wills; HAWAII: Erwin Gordon; IDAHO: Miss Jane J. Scott: ILLINOIS: Robert de Vette, Frank Naccarato (Morton Jr. College, Cicero); INDIANA: George Smith; IOWA: Arthur C. Anderson; KANSAS: David J. Burns; KENTUCKY: D.E. Elswick; LOUISIANA: Mrs. Lavinia McNeely; MAINE: Mrs. Nita Barbour; MARYLAND: Mrs. Genevieve S. Blew, Otto K. Schmied (Baltimore City Schools); MASSACHUSETTS: James R. Powers; MICHIGAN: Larry D. Waggoner (Research Asst., Michigan State University, East Lansing); MINNESOTA: Miss Grace Dougherty; MISSISSIPPI: Reginald C. Reindorp; MISSOURI: Miss Anne Henderson; MONTANA: Lester W. McKim; NEBRASKA: Hal Carney (University of Nebraska, Lincoln); NEVADA: R.A. McGuire; NEW HAMPSHIRE: James C. Faulkner, C. Paul Quimby; NEW JERSEY: Joseph LoBue (Central High School, Trenton); NEW MEXICO: Joseph Michel, Tom D. Riddle; NEW YORK: Paul Glaude, Martin Ruther, Theodore Huebener (Board of Education, N.Y.C.), Joseph Justman (Board of Education, N.Y.C.); NORTH CARO-LINA: Nile F. Hunt; NORTH DAKOTA: Richard Klein, Miss Nancy Stewart (Central High School, Fargo); OHIO: Glenn A. Rich; OKLAHOMA: R.O. Sumter; OREGON: Paul M. Arriola; PENNSYLVANIA: Paul L. Glatzert; RHODE ISLAND: Clarence E. Sturtevant; SOUTH CAROLINA: F.M. Kirk; SOUTH DAKOTA: F.R. Wanek; TENNESSEE: Marvin Holdt (Vanderbilt University, Nashville); TEXAS: Anthony R. Ferris (Texas Education Agency, Austin); UTAH: J. Dale Miller; VERMONT: Louis DesChenes; VIRGINIA: Shelton T. Belsches; WASHINGTON: Roger E. Elder, Miss Lurline Simpson (University of Washington, Seattle); WEST VIRGINIA: George A. Fenley, Jr.; WISCONSIN: Ernest E. Stowell; WYOMING: William L. Wells.

It is with deep gratitude that we acknowledge the help which was received from these additional persons: (1) colleagues at the Modern Language Association's Research Center-- especially Donald Walsh, who gave many valuable suggestions concerning the analysis of the statistics and who gave careful editing to the final manuscript; (2) Margaret Alcorn Childers, who gave expert help on

the statistical analysis of each table in the report; (3) language specialists in the United States Office of Education; (4) Justin Lewis, Head, Higher Education Statistics, Educational Statistics Branch, United States Office of Education, for his expert aid in the construction of the questionnaire used for this study.

August 8, 1960

#### Introduction

The ten statistical tables and the summary Table 11 which are at the end of this report present the 1958 data on foreign language offerings and enrollments in the high schools of the United States, grades 9-12. This is the first Modern Language Association report from fifty states and the District of Columbia on foreign language offerings and enrollments in the secondary schools of the United States. The research reported herein was performed pursuant to a contract with the United States Office of Education, authorized under the National Defense Education Act. This report follows two other national surveys of recent years. In 1948-49 the United States Office of Education surveyed foreign language offerings and enrollments in the forty-eight states and the District of Columbia. In 1954-55 the MLA conducted a survey of the same, and its report made use of the 1948 U.S. Office of Education report for purposes of comparing per cents and ranks. Likewise, this 1958 report compares per cents and ranks with those of 1954, wherever possible. Per cents in the 1958 tables are rounded off to the nearest tenth, except in Tables 7, 8, and 9, where extremely small fractional per cents remain unchanged. All enrollment figures are the actual ones received, except for the estimated foreign language enrollments for California, Illinois, and Washington, which are explained below.

Estimated enrollments for California were derived from the 1956 and 1959 enrollments. The 1958 enrollments for French, German, Italian Latin, and Spanish were estimated by taking two-thirds of the actual increase of 1959 over 1956 and by adding these figures to those of 1956. Since only 1959 data were reported for Chinese, Hebrew, and Russian, and since these languages had been offered in 1958 as shown by Course II in each case, other estimates were made. The 1959 data were used for Chinese and Hebrew, since the enrollments were small and the continuity into Course II was good; Russian enrollments were reduced by approximately one-fourth.

Estimated enrollments for Illinois were based on the returns which came from schools comprising seventy-two per cent of the total high school population (9-12) of the state. It was assumed that the same per cents would hold in the other schools, and enrollment figures were estimated accordingly.

Estimated enrollments for Washington were made by doubling the foreign language data that came from secondary schools representing fifty per cent of the total high school population.

Special language entries for six types of data must be explained. Unspecified or unclassified: If neither language nor language level was assigned, these language totals were excluded. If the language course level I-IV was given, the unspecified figures were included in the totals for foreign languages. Combination courses III and IV were recorded with eighty per cent of the enrollments in Course III and twenty per cent in the Course IV, the proportions for regularly listed courses III and IV. Conversation courses, when no level was given, were assigned to Course I. State totals for a given language, unclassified as to course level, were put in a column marked "Unclassified" and recorded in the totals for the specific language. "Other" enrollments given for a specific language, but unspecified as to course level, were assigned to Course I. "General Language" enrollments were excluded.

The four states which sent these data were Colorado (788), Michigan (571), New York (128), and Pennsylvania (4423).

Course levels I-IV in this report are used in the commonly accepted sense. Irrespective of junior or senior high school, Course I is the first full year of formal language study in the secondary school, granting a unit of credit; Course II is the second or intermediate course; Course III and Course IV are the third and fourth full-year language courses.

The following abbreviations have been used in the tables of this report: FL, Foreign Language; MFL, Modern Foreign Language; HSP, High School Population.

### FOREIGN LANGUAGE OFFERINGS AND ENROLLMENTS IN PUBLIC SECONDARY SCHOOLS, FALL 1958

Foreign language enrollments in high school language courses I through IV in the United States reached almost two million in the fall of 1958, and comprised 24.3 per cent of the total high school population in grades 9-12, according to reports sent to the Modern Language Association from each of the fifty states and the District of Columbia. This new enrollment statistic represents a gain of 3.2 per cent since 1954, date of the last survey of high school enrollments, also made by the MIA. Since it is possible for some students to study more than one language and therefore be counted more than once, the actual number of language students is somewhat smaller than the enrollment figures.

Forty-one states and the District of Columbia show a per cent increase in total foreign language enrollments since 1954.2 Two states (Arkansas and West Virginia) remain the same; five (Kentucky, Louisiana, Mississippi, Nevada, and Rhode Island) show slight losses. Two states (Alaska and Hawaii) are included for the first time in this report.

In modern foreign languages, forty-three states and the District of Columbia show a per cent gain in 1958. Five states (Arkansas, Louisiana, Mississippi, Nevada, and Rhode Island) show a loss. Two states (Alaska and Hawaii) were not included in 1954. There were 1,300,882 students enrolled in modern foreign language classes in 1958, totaling 16.5 per cent of the high school population (9-12). The gain since 1954 is 2.3 per cent.

The 1958 per cent for each of the six principal foreign languages taught in high schools is as follows:

	Per cent of H.S. Population 9-12	Per cent of FL Enrollments	Per cent of MFL Enrollments
Spanish Latin French German Italian Russian Others	8.8 7.8 6.1 1.2 ·3 .05 .07	36.0 32.2 25.0 5.1 1.2 .2	53.2  36.9 7.5 1.7 .3

Early returns have come in for 1959 foreign language enrollments from twenty states and reveal increases for all but one state, with sharp rises in six. Several of these states show as much per cent gain in the one year,

PMIA, IXX, No. 4, Part 2, September 1955. This published report was based on returns from forty of the forty-eight states and the District of Columbia.

For the eight states missing from the 1954 report (Georgia, Illinois, Iowa, Kentucky, Louisiana, Michigan, Missouri, and Texas), per cents for 1948 were used.

1958 to 1959, as they did in the four-year interval 1954-58. The full 1959 report will be highly significant, because it will show the influence of the first full year of the National Defense Education Act's support of modern foreign languages.

Foreign language enrollments in grades 7 and 8 (irrespective of the schools' organizational patterns such as 7-8, 7-9, 7-12) were collected and tabulated. Twenty-one states and the District of Columbia reported foreign language enrollments in grade 7; twenty-four and the District of Columbia reported such enrollments for grade 8. French, German, Hebrew, Italian, Latin, Russian, and Spanish were taught to a total of 107,115 pupils. A summary of the enrollment data follows, combining the separate totals for grades 7 and 8.

Language Taught	Number of States 3	Combined Enrollments, 7 and 8
French	20	44,825
German	11	3,178
Hebrew	1	881
Italian	3	2 <b>,</b> 973
Latin	14	14,558
Russian	2	82
Spanish	19	3 <b>7,5</b> 09
Other	1	3,109
Total:		107,115

The states reported their foreign language offerings in grades 7 and 8 as follows: Alaska (Spanish); Arizona (Spanish); Colorado (French, German, Latin, Spanish); Kansas (French, German, Spanish); Louisiana (French, Latin, Spanish); Maine (French, Latin); Maryland (French); Massachusetts (French, Italian, Latin, Spanish); Michigan (French, German, Latin, Spanish); Minnesota (German, Spanish); Montana (French, German, Spanish); Nebraska (French, German, Spanish); New Jersey (French, German, Latin, Spanish); New Mexico (French, Spanish); New York (French, German, Hebrew, Italian, Latin, Spanish); Oregon (French, German, Spanish); Rhode Island (French, Italian, Latin, Spanish); South Dakota (Latin, Russian); Utah (French, Spanish); Vermont (French); Virginia (French, Latin); Washington (French, German, Latin, Spanish); District of Columbia (French, Latin, Spanish).

Table 1 presents statistics on 1958 enrollments in modern foreign languages, with per cents, gains or losses, and ranks compared with those of 1954. The totals in the enrollments in modern foreign languages (courses I-IV) include the six languages listed in Tables 5-10, plus "Other" and "Unclassified" enrollments, not shown in separate tables. 4 This table reveals that one-sixth of the students enrolled in high schools in 1958 were studying one or more modern foreign languages. New York, with 36.5% of its high school students enrolled in modern foreign languages, ranked first among the states. Other states with at least one-fourth of their high school students in modern foreign language courses were New Jersey (32.7%), Rhode Island (32.3%), Massachusetts (30.3%), California (29.2%), New Mexico (27.1%), Arizona (25.1%), and Connecticut (25.0%). Less than six per cent of the high school students were enrolled in modern foreign language classes in eight states: Kentucky (5.4%), Iowa (5.2%), West Virginia (5.2%), South Dakota (4.9%), Alabama (3.8%), North Dakota (3.6%), Arkansas (2.7%), and Mississippi (2.0%). Greatest increases since 1954 in percentages of students studying modern foreign languages were shown by the following states: Delaware (from 16.0% to 22.5%), Oregon (from 6.1% to 12.5%), New York (from 30.2% to 36.5%), Kansas (from 2.3% to 8.5%), Washington (from 11.5% to 17.1%), California (from 24.0% to 29.2%), Idaho (from 6.6% to 11.7%), New Mexico (from 22.0% to 27.1%), and Vermont (from 14.7% to 19.7%).

Table 2 presents a summary of the total foreign language enrollments, with per cents, gains or losses, and ranks compared with those of 1954, wherever possible. This table shows that nearly one-fourth of all the students enrolled in senior high schools in 1958 were studying an ancient or a modern foreign language. Eleven states had more than one-third of their high school students enrolled in foreign language classes in 1958: Massachusetts (46.4%), New York (45.3%), Rhode Island (44.4%), New Jersey (43.7%), Connecticut (40.3%), New Hampshire (39.4%), Delaware (38.0%), Vermont (37.3%), Maine (34.5%), California (34.3%), and New Mexico (33.8%). States having less than ten per cent of their students enrolled in foreign languages were Oklahoma (9.6%), Utah (9.4%), South Dakota (9.3%), North Dakota (8.3%), Alabama (7.2%), Arkansas (4.9%), and Mississippi (3.2%). Greatest increases over 1954 took place in Kansas (from 4.4% to 15.1%), Vermont (from 28.3%) to 37.3%), Delaware (from 29.1%) to 38.0%), Oregon (from 10.3% to 19.1%), and Idaho (from 11.0% to 19.7%).

<sup>&</sup>lt;sup>5</sup> Total foreign language enrollments include all modern languages, Latin, and Ancient Greek. Three states reported enrollments in Ancient Greek: Indiana (Greek I, 113); Massachusetts (Greek I, 42; II, 46; III, 13); Rhode Island (Greek I, 13).

<sup>4 &</sup>quot;Other" languages (total 5909). ARIZONA: Portuguese, 25. CALIFORNIA: Chinese I, 16; II, 5; Hebrew I, 79; II, 52; III, 23; total 175. CONNECTICUT: Hebrew I, 16; Polish I, 23; Swedish I, 23; total 62. HAWAII: Hawaiian I, 96. ILLINOIS: Polish, 244; Swedish, 108; total 352. MASSACHUSETTS: Hebrew I and II, 15; III and IV, 19; Modern Greek I, 24; II, 7; Polish I, 69; II, 19; Portuguese I, 301; II, 103; total 557. MINNESOTA: Norwegian, 105; Swedish, 97; total 202. NEW JERSEY: Hebrew I, 44; II. 25; III, 16; total 85. NEW YORK: Modern Greek I, 3; Hebrew I, 2247; II, 1288; III, 305; IV, 38; Norwegian I, 25; II, 20; total 3926. OHIO: Hebrew I, 55; II, 33; total 88. PENNSYLVANIA: Polish, 144. RHODE ISLAND: Portuguese I, 83; II, 47; total 130. TEXAS: Szech, 7. WASHINGTON: Norwegian, 60.

Table 3 shows the drop in enrollments between courses II and III in foreign languages. Forty-four states and the District of Columbia reported enrollment figures for the separate course levels; six reported only total enrollments. Seven (Alaska, Haraii, Idaho, Montana, North Dakota, South Carolina, and South Dakota) reported no enrollments above Course II. The total enrollment in Course III of modern foreign languages was 20.1 per cent of the enrollment in Course II. The enrollment in Latin III was 10.6 per cent of the enrollment in Latin III. Enrollment figures for all foreign languages show Course III enrollments to be 16.8 per cent of enrollments in Course II. This is nearly twice the corresponding percentage of 1954. In a period of expanding enrollments, comparisons of enrollments in Course II and Course III in any one year do not reflect accurately the percentages of students who continue into the third year of foreign language study. It will be possible to determine these percentages when the 1959 enrollment figures are available.

Table 4, on foreign language offerings, based on returns from thirty-eight states and the District of Columbia, shows that the percentage of United States high schools that offer instruction in one or more foreign languages has risen from 54.0 in 1954 to 61.6 in 1958. The corresponding percentages for modern foreign languages are 43.6 and 50.4. Five states (Delaware, Nevada, New Hampshire, Rhode Island, Washington) and the District of Columbia offer at least one foreign language in every high school. Other states that reported at least seventy-five per cent of their schools offering foreign languages were Arizona, Hawaii, Indiana, Maine, Maryland, Massachusetts, Michigan, New Jersey, New Mexico, New York, North Carolina, Ohio, Vermont, and Virginia. Three of the states (Delaware, Nevada, Rhode Island) and the District of Columbia offer instruction in one or more modern foreign languages in every high school; at least seventy-five per cent of the high schools do so in 13 other states: zona, Hawaii, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Vermont, Virginia, and Washington. Greatest changes since 1954 have taken place in Idaho (from 35.1% to 71.9%), District of Columbia (from 70.6% to 100%), Nevada (from 77.8% to 100%), and Washington (from 78.2% to 100%).

Enrollments in Latin (Table 5) were 7.8 per cent of the total U.S. pupil enrollments in grades 9-12, an increase of .9 per cent since 1954. The per cents varied from 17.6 in Vermont to 1.2 in Utah. Latin was taught in all fifty states and in the District of Columbia. It enrolled ten per cent or more of the State's total high school population (9-12) in twelve states: Vermont (17.6%), Massachusetts (16.0%), Delaware (15.5%), Connecticut (15.3%), New Hampshire (15.2%), Pennsylvania (13.8%), Maine (13.5%), Rhode Island (12.1%), Ohio (12.0%), New Jersey (11.0%), Virginia (10.1%), and Wyoming (10.0%).

French enrollments (<u>Table 6</u>) varied in 1958 from 21.7 per cent of the high school population in Massachusetts to .8 per cent in Mississippi. They comprised 6.1 per cent of the total U.S. high school population (9-12), compared with 5.6 per cent in 1954. Ten per cent or more of the high school students were enrolled in French in eleven Eastern states and in the District of Columbia: Massachusetts (21.7%), New Hampshire (21.1%), Maine (19.7%), Rhode Island (18.4%), Vermont (18.0%), New York (15.3%), Connecticut (13.4%), Maryland (12.4%), North Carolina (12.1%), New Jersey (11.4%), Delaware (10.6%), and the District of Columbia (10.3%). Enrollments were less than five per cent of the high school population in thirty-three states. In the following twenty-four

See additional comments on Latin in the discussion of Table 11.

states enrollments were less than three per cent: Alabama (1.8%), Arizona (1.8%), Arkansas (1.1%), Florida (1.8%), Idaho (2.2%), Indiana (2.3%), Iowa (1.5%), Kansas (2.1%), Kentucky (2.1%), Minnesota (2.0%), Mississippi (.8%), Missouri (2.3%), Montana (2.9%), Nebraska (1.8%), New Mexico (1.8%), North Dakota (1.2%), Oklahoma (1.3%), South Dakota (.9%), Tennessee (2.0%), Texas (1.2%), Utah (2.8%), West Virginia (2.8%), Wisconsin (2.3%), and Wyoming (2.1%).

German enrollments (<u>Table 7</u>) were 1.2 per cent of the total U.S high school population (9-12), up from .8 per cent in 1954. The highest enrollments were in New Jersey (3.7%) and in Washington (3.3%). In 1958 German was offered in at least one high school in all states except Alabama, Hawaii, and Louisiana. In six states enrollments were reported only for the first year course, and in several states the great differences between enrollments for the first and second years indicate that German has been added to the curriculum recently in many high schools.

Italian enrollments (<u>Table 8</u>) are greatest in five Eastern states: Rhode Island (4.4%), New York (1.8%), New Jersey (1.7%), Connecticut (1.5%), and Massachusetts (.9%). Eight additional states reported enrollments in Italian of less than half of one per cent: California, Colorado, Illinois, Michigan, Missouri, Nevada, Pennsylvania, and Wisconsin. Thirty-seven states and the District of Columbia reported no enrollments in Italian.

Russian (Table 9) was given a separate table because twenty-five states and the District of Columbia reported some high school enrollments. Enrollment per cents in 1958 ranged from .3 per cent to .005 per cent, based chiefly on students in Course I. Oregon, with .3 per cent, had the highest enrollment. Subsequent reports are expected to show substantial increases of Russian in the high schools.

Spanish enrollments (<u>Table 10</u>) for the U.S. were 8.8 per cent of the high school population in 1958, ore and one-half per cent higher than in 1954. The highest per cent was 24.1 in New Mexico; the lowest, 1.2 in Maine and in Mississippi. Eleven states had Spanish enrollments of ten per cent or more: New Mexico (24.1%), Arizona (22.6%), California (21.4%), Nevada (17.5%), New York (16.0%), New Jersey (15.8%), Texas (13.8%), Colorado (13.3%), Florida (11.1%), Illinois (10.1%), and Delaware (10.0%). Enrollments were less than five per cent of the high school population in twenty-two states. In the following twelve states enrollments were less than three per cent: Alabama (2.0%), Arkansas (1.6%), Kentucky (2.6%), Louisiana (2.9%), Maine (1.2%), Mississippi (1.2%), New Hampshire (2.8%), North Dakota (1.5%), South Carolina (2.4%), South Dakota (2.8%), Vermont (1.7%), and West Virginia (2.4%).

Table 11 lists the states where each of the five principal foreign languages had an enrollment of at least one-half per cent of the state's high school population, grades 9-12. The actual per cents included range from a high of 24.1 to a low of .5 per cent. In four states enrollments in Latin 7 were at least one-half per cent higher than in all modern foreign languages: Indiana (9.8% and 7.9%), Iowa (6.1% and 5.2%), North Dakota (4.7% and 3.6%), West Virginia (5.8% and 5.2%). In seven states Latin and a'l modern foreign languages were within one-half per cent of each other: 7 Alabama (3.4% and

Latin per cents come first in the parentheses.

3.8%), Arkansas (2.2% and 2.7%), Kentucky (5.6% and 5.4%), Mississippi (2.1%) and (2.0%), Ohio (12.0% and 11.7%), South Dakota (4.5% and 4.9%), Fennessee (7.1% and 7.2%). In sixteen states and the District of Columbia modern foreign language enrollments were at least twice the enrollment in Latin: (15.0% and 4.7%), Arizona (25.1% and 4.8%), California (29.2% and 5.1%), District of Columbia (22.2% and 9.5%), Louisians (7.3% and 3.2%), Maryland (20.3% and 9.3%), Minnesota (7.4% and 3.7%), Misscuri (7.1% and 3.1%), Nevada (23.5% and 5.5%), New Jersey (32.7% and 11.0%), New Mexico (27.1% and 6.8%), New York (36.5% and 8.8%), North Carolina (15.7% and 6.0%), Rhode Island (32.3% and 12.1%), Texas (15.3% and 5.0%), Utah (8.2% and 1.2%), and Washington (17.1% and 7.0%). In three states modern foreign language enrollments were at least five times the enrollment in Latin: 8 Arizona (25.1% and 4.8%), California (29.2% and 5.1%), and Utah (8.2% and 1.2%). In each of the three highest languages (Spanish, French, and Latin) the enrollment was at least one per cent of the total high school population (9-12) in all fifty states and in the District of Columbia. 9 German enrollment was one per cent or above in nineteen states and in the District of Columbia. Italian was one per cent or above in four states. Spanish enrollments were heaviest in the Southwest, West, and in three Middle Atlantic states. French enrollments were greatest in New England and along the Atlantic seaboard. German enrollments, low in comparison with those of Spanish and French, were highest in the states across the northern part of the United States. Italian enrollments were heaviest along the Atlantic coast. Russian showed a good beginning, with enrollments in twenty-five states and the District of Columbia. Its total high school enrollment was less than that of Hebrew, which was offered in only five states.

In the category of "Other" languages, nine additional modern foreign languages (with a total enrollment of 5909 students) were being studied in high schools, according to reports from thirteen states. These languages were Chinese (21) in California; Czech (7) in Texas; Modern Greek (34) in Massachusetts and New York; Hawaiian (96) in Hawaii; Hebrew (4255) in California, Connecticut, Massachusetts, New Jersey, and New York; Morwegian (210) in Minnesota, New York, and Washington; Polish (499) in Connecticut, Illinois, Massachusetts, and Pennsylvania; Portuguese (559) in Arizona, Massachusetts, and Rhode Island; Swedish (228) in Connecticut, Illinois, and Minnesota.

Six to nine different modern foreign languages were offered in five states. Massachusetts offered nine: French, German, Greek, Hebrew, Italian, Polish, Portuguese, Russian, and Spanish. Connecticut schools had eight: French, German, Hebrew, Italian, Polish, Russian, Spanish, and Swedish. New York reported eight: French, German, Greek, Hebrew, Italian, Norwegian, Russian, and Spanish. California offered seven: Chinese, French, German, Hebrew, Italian, Russian, and Spanish. There were six in Rhode Island: French, German, Italian, Portuguese, Russian, and Spanish.

<sup>9</sup> Except for French in Mississippi (.8) and in South Dakota (.9).

8

Modern foreign language per cents come first in the parentheses.
