ABSTRACT

Presented is the annual report of Federal aid to State and local educational programs for handicapped children during the 1968-69 school year. Program activities of Title VI-A of the Elementary and Secondary Education Act, and Public Law 89-313, an amendment to Title I of ESEA, are reviewed jointly. Included is statistical information related to children served and needing to be served; program expenditures, objectives, and achievements; employment and training of personnel; and Title VI-A and Public Law 89-313 in review (the law, and results). ## Foreword

The Bureau of Education for the Handicapped is pleased to present this annual report of Federal aid to State and local educational programs for handicapped children provided during the 1968-69 school year under Title VI-A of the Elementary and Secondary Education Act and Public Law 89-313, an amendment to Title I of ESEA.

Information in this publication is based on end-of-year statistical and evaluation reports for fiscal year 1969 submitted by the 50 States, the District of Columbia, Puerto Rico, Guam, Trust Territory of the Pacific Islands, and the Virgin Islands.

This document is the second annual report in which Public Law 89-313 and Title VI-A, ESEA, program activities have been reviewed jointly. The similar-

ity in Federal legislation pertaining to these programs and the principal thrust which they share in common — provision of educational services to handicapped children — make a combined report more meaningful and one which reflects the increased cooperative project planning and implementation within States between directors of these programs.

It is our hope that this publication will be helpful in informing teachers, administrators, parents, counselors, therapists, and other interested persons as to the purpose of Public Law 89-313 and Title VI-A, ESEA, and will stimulate their participation in the improvement of services made available to handicapped children throughout the Nation.

Edwin W. Martin, Jr.  
*Associate Commissioner  
Bureau of Education for the  
Handicapped*

## An Overview

This Nation has long been aware of its millions of handicapped children. For many years it has been aware of their special educational, social, and emotional needs. But awareness alone does not meet needs. Needs must be met by action!

During the past decade, State and local concern for educational requirements of handicapped children has been evidenced by increased commitments in terms of staff, facilities, and equipment. New techniques in pupil identification and diagnosis have been developed. Creativity and innovation in program design, implementation, and evaluation has been widespread. Dedication to quality service has been more pronounced. But despite all that has been done by local, State, and Federal programs, much more remains yet to be done. A great discrepancy still persists between existing needs of handicapped children and fulfillment of these needs.

Generally in the past, State and local financial and personnel resources have been exhausted long before desired objectives in special education programs have been reached. The injection of Federal monies into these programs has had a constructive catalytic impact. These funds have often made the difference between success or failure of educational activities and, consequently, have contributed to the preventing of regression as well as the furthering of progress of handicapped children.

Two of the most significant Federal programs providing financial assistance to States in improving programs for handicapped children are:

—Public Law 89-313, amendment to Title I of the Elementary and Secondary Education Act of 1965, which provides funds to strengthen State operated or supported programs for handicapped children; and

— Title VI-A of the same act which authorizes funds to States to assist in the extension and enrichment of services provided handicapped children in local public and private schools.

Over \$51.8 million was made available in fiscal year 1969 through these Federal programs to provide educational services to handicapped children. In addition, more than \$2.5 million was expended under Title VI-A for State administration and leadership activities. When combined with State and local funds, these Federal resources helped provide specialized educational services to over 228,000 handicapped children scattered from Guam to Maine—71,000 more handicapped children than those who benefited from such services during the previous year. This increase of 46 percent in the number of handicapped children served included children in Puerto Rico and Guam, who were participating for the first time under Public Law 89-313 as a direct result of a legislative change enacted by Congress.

Special educational programs in over 2,000 schools, local educational agencies, and State agencies were implemented, enriched, and expanded with the assistance of these Federal authorizations. More than 16,000 staff members were employed in these schools to provide such services as pupil assessment, classroom instruction, speech therapy, consultative services, health and physical therapy, parent consultation services, specially designed curriculum, and instructional media. More than 41,000 staff members, many of whose salaries were paid from non-Federal funds, received inservice training to improve their educational skills.

However, despite the promising increase in the number of handicapped children participating in these programs, State educational agencies estimated that more than 3.7 million (62 percent) of the Nation's 6 million handicapped children received no appropriate educational services designed to meet their special requirements.

Only part of the challenge to the Nation to meet the educational needs of all handicapped children has been met. The United States is now just on the frontier of making an all-out effort to achieve its goal of helping all handicapped children to develop into contributing members of society. From this frontier, however, a rewarding future can be envisioned—a future awaiting only a greater and more dedicated commitment.

## Definitions Of Handicapped Children

Categories of handicapped children established by Congress as being eligible to receive educational services under Public Law 89-313 and Title VI-A of the Elementary and Secondary Education Act, include: "Mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education."

The following descriptions of these handicapping conditions have been developed to provide general information to the public. They are not official Federal definitions and do not necessarily represent the opinions of professional organizations for the handicapped. It is the responsibility of each State educational agency to establish definitions of handicapping conditions to be applied within its State.

**Mentally Retarded**—Persons characterized by a level of mental development impaired to the extent that the individual is unable to benefit from the standard school program and requires special services. Includes such subcategories as slow learners, educable mentally retarded, and trainable mentally retarded.

**Hard of Hearing**—Persons in whom the sense of hearing, although defective, is functional with or without a hearing aid. The hearing loss is generally of such a nature and severity as to require one or more special educational services.

**Deaf**—Persons in whom the sense of hearing is nonfunctional for the ordinary purposes of life (inability to hear connected language with or without the use of amplification). This general group is made up of the congenitally deaf and the adventitiously deaf.

**Speech Impaired**—Persons experiencing pronounced organic or functional speech disorders which cause interference in oral communication. Includes persons exhibiting language disorders resulting from such specific handicaps as stuttering, cleft palate, speech, or voice problems.

**Visually Handicapped**—Persons who have such severe visual loss as to require special educational services. Includes such subcategories as blind, legally blind, partially sighted, and visually impaired.

**Crippled**—Persons with orthopedic impairments which might restrict normal opportunity for education or self-support. Generally considered to include individuals having congenital impairments (e.g., clubfoot or absence of some body member), impairments caused by some disease (poliomyelitis, bone tuberculosis, encephalitis) neurological involvements which may result in conditions such as cerebral palsy, and impairments caused by accident (fractures or burns that cause contractures, etc.).

**Seriously Emotionally Disturbed**—Persons having psychiatric disturbance without clearly defined physical cause or structural damage to the brain which limits the ability of the individual to govern his own behavior. These are of such a nature and severity as to require one or more special services, particularly with reference to their education.

**Other Health Impaired**—Persons having health handicaps, not covered in other categories, which are of such a nature and severity as to require one or more special services, particularly with reference to their education. These could include asthma; rheumatic fever; less than usual amount of strength, energy, endurance; conditions resulting from chronic illness, or environmental causes; epilepsy; diabetes; or cardiac disease.

**Learning Disabled**—(Under Public Law 39-313 and Title VI-A the category "other health impaired" includes children who are learning disabled. However, since some State educational agencies have established a separate category for these children, the following definition is given for general information.)—Persons with learning dysfunctions which prevent them from learning or functioning in a regular educational program. These individuals exhibit a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language. These may be manifested in disorders of listening, thinking, talking, reading, writing, spelling, or arithmetic. They include conditions which have been referred to as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, developmental aphasia, etc. They do not include learning problems which are due primarily to visual, hearing, or motor handicaps, to mental retardation, emotional disturbances, or to environmental disadvantage.

## Handicapped Children Served

During fiscal year 1969, Public Law 89-313 and Title VI-A, ESEA funds, supplementing State and local funds, helped provide improved diagnostic services, new techniques of teaching, specialized curriculum and equipment, and better qualified professionals and paraprofessionals to serve over 228,000 handicapped children.

Handicapped Children Participating In  
Projects Funded Under Public Law 89-313  
and Title VI-A, ESEA, Fiscal Year 1969

Total Children Served: 228,730

# Handicapped Children Needing To Be Served

# Handicapped Children Needing To Be Served Fiscal Year 1969

Personnel Employed and Yet Needed  
To Provide Special Educational Services

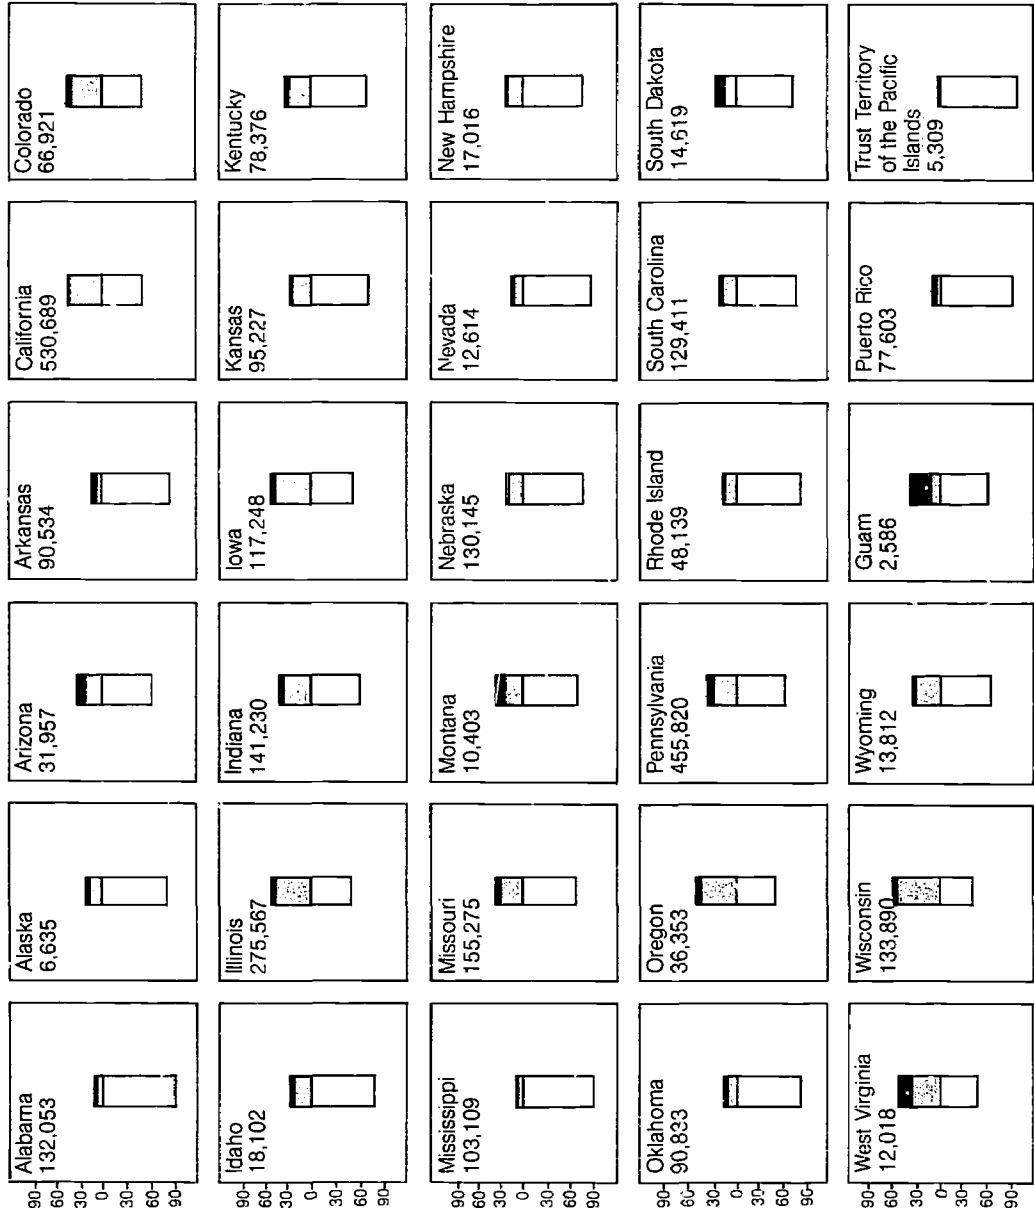

Over 62% of the Nation's handicapped children received no appropriate special educational services in school year 1968-69.

**Handicapped Children Receiving and Not Receiving Special Education Services By State — Ages 5 Through 20 Years Fiscal Year 1969**

- Handicapped Children Served Under Public Law 89-313 and Title V-A Funds
- ▒ Handicapped Children Served with State and Local Funds
- Handicapped Children Not Receiving Services

Note: In October 1969 there were 64,011,000 individuals, ages 5 through 20, living in the United States.

## Program Expenditures

There are very few restrictions upon the utilization of funds provided under these Federal grant programs. Therefore, State and local educational agencies are able to provide a wide variety of programs and services to meet the special educational needs of the handicapped children they serve.

Over \$51.8 million was expended in fiscal year 1969 to initiate and expand educational programs and related services under Public Law 89-313 and Title VI-A. In addition, over \$2.5 million was expended under Title VI-A for State administration and leadership activities.

Instructional services—project administration, individual and group instruction, and equipment—equalled 86 percent of all project expenditures under Public Law 89-313 and Title VI-A.

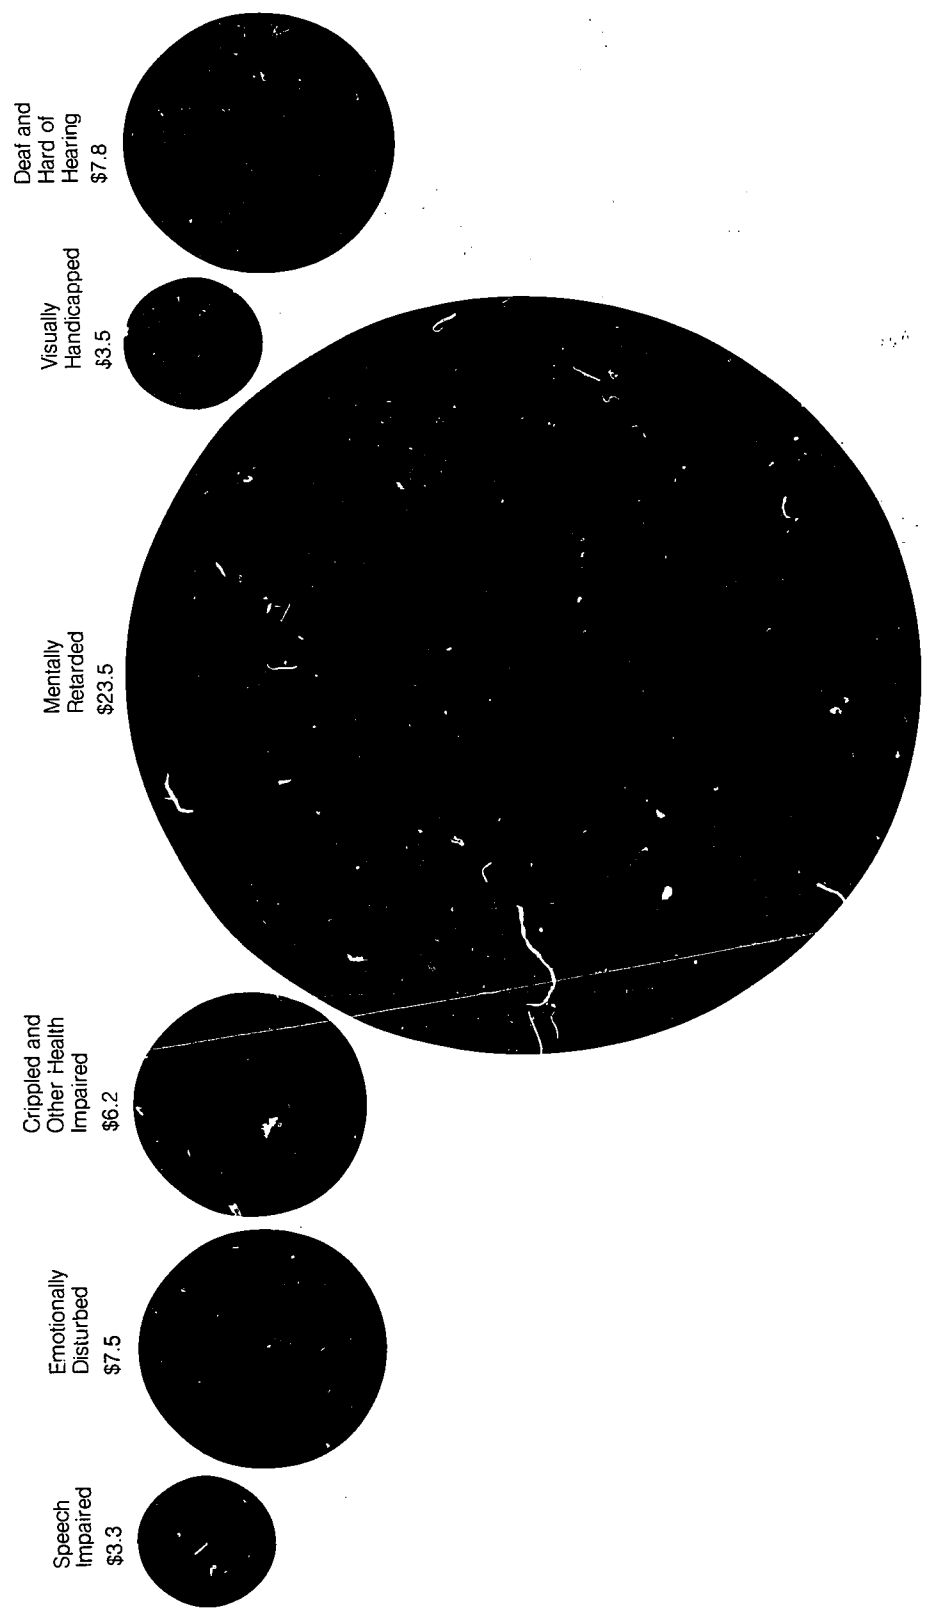

The average per pupil expenditure during fiscal year 1969 for Public Law 89-313 and Title VI-A projects was \$226.60. This represented an increase of \$15.63 per child over fiscal year 1968 project expenditures, which indicates a trend under these programs for concentration of funds to achieve a greater educational impact.

Note: Statistics do not include \$2,561,727 expended under Title VI-A, ESEA for State administration and leadership activities during fiscal year 1969.

**Project Expenditures By Types of Handicapped Children Served Under Public Law 89-313 and Title VI-A, ESEA, Fiscal Year 1969**

**Total Project Expenditures: \$51.8 Millions of Dollars**

**Project Expenditures By Types of Services  
Under Public Law 89-313 and Title VI-A,  
ESEA, Fiscal Year 1969**

Note: Statistics do not include \$2,561,727 expended under Title VI-A, ESEA for State Administration and leadership activities during fiscal year 1969.

**Total Project Expenditures: \$ 51.2  
Millions of Dollars**

\*Includes Health Services in the field of physical and mental health which are not direct instruction, Food Services, Community Services, Student-Body Activities, Organization and Maintenance of Plant, and Fixed Charges as related to program operation in providing direct and other related services to the handicapped children served.

# Program Objectives

## Types and Frequency of Objectives Included In Projects Funded Under Public Law 89-313 and Title VI-A, ESEA, Fiscal Year 1969

Based on an analysis of 966 projects included in the Aid to States Information System - 1969. These projects represented approximately half of the Public Law 89-313 and Title VI-A projects conducted and project funds expended in fiscal year 1969.

Major Objective	No. of Projects
Arithmetic	17
Arts and Crafts	45
Language Arts	64
Music	35
Physical Education	92
Science	10
Vocational Education	99
Cultural Enrichment	55
Daily Living Skills	195
Readiness Skills	110
<b>Total</b>	<b>722</b>

Major Objective	No. of Projects
Curriculum Development	158
Equipment and Materials	16
Instructional Materials Center	104
Screening and Identification	169
Personnel Inservice Training	134
Speech Therapy	185
Health Services	16
Diagnosis and Evaluation	90
Parent Services	185
<b>Total</b>	<b>914</b>

## Program Achievements

"Through special education classes, handicapped children have been taken out of the back rooms of family dwellings and given educational opportunities geared to their capabilities and potential."

*Virgin Islands Department of Education*

"With these funds, we have been able to prove the effectiveness of programs for emotionally disturbed, mentally retarded, etc. We have been able to establish the importance of providing education to an almost forgotten school-age population."

*Missouri Department of Education*

**OUR**

"The outstanding new project of the past year was the inservice college class via telephone from the University of Arizona. This class enabled all of the project teaching staff to participate in graduate study under the direction of outstanding figures in the field of special education."

*Redfield State Hospital and School  
South Dakota*

"Our project involved the use of community volunteers to provide a personal relationship for 31 emotionally handicapped and 14 educable mentally retarded students. More than half of the group exhibited a more positive behavior, a marked improvement in attitude towards school, and a gain in academic progress."  
*Maine Department of Education*

"Behavior modification techniques learned by teachers in the summer project are being successfully used during the school year. The use of videotape enabled the teachers to see themselves teach."  
*Virginia State Board of Education*

"Special education for the emotionally disturbed child received greater recognition by local school districts during fiscal year 1969 than in any previous year of Federal funding. Forty-three projects providing services to emotionally disturbed children were funded this year."  
*New York State Education Department*

"Our cooperative effort in conducting training sessions for hearing technicians has had a great impact in bringing the importance of early identification and education to the attention of local school districts. We feel that for the first time in our State, we are doing some preventive education."  
*Illinois Office of the Superintendent of Public Instruction*

"The major impact of the preschool program for visually impaired children has been to alert the community and State to the problems of this type of child. Many agencies are now referring children to the program and learning that special techniques are needed to help these youngsters."  
*Nebraska State Department of Education*

"Parent reaction to staff has been one of new-found hope and a sense of deep appreciation for the services being made available to their children."  
*Colorado Department of Education*

"By use of objective measurements of physical fitness, it was found that the program significantly improved the motor skill ability of the 281 children involved."  
*New Mexico State Board of Education*

"The outstanding project from an innovative point of view continues to be the playground for the physically and perceptually handicapped where a study is being conducted to evaluate various new teaching techniques for orthopedically and perceptually handicapped children."  
*Florida Department of Education*

"These centers, covering 17 percent of the State's school districts, attempted to increase learning efficiency of handicapped children by providing more effective and appropriate instructional materials and techniques."  
*Ohio State Department of Education*

"Federal project monies have provided an outlet for creative ideas in organizing resources and programming instruction for multihandicapped children. These programs are providing the prototypes for future regional centers for these children, and the expansion of supplemental centers for existing special day classes."  
*California State Department of Education*

"The new portable classroom, housing the music project, has aided considerably in the program. More students can take part in the larger classroom."  
*Pinecrest State School, Louisiana*

"Our pilot, innovative projects stimulated local agencies to become aware of and involved in what can be done for children with special learning disabilities."  
*North Dakota Department of Public Instruction*

"Children with different limitations participated for the first time together in sports and games with normal children. We considered this to be outstanding in the sense that it contributed to the social and emotional growth of the children."  
*Puerto Rico Department of Education*

"The major thrust of our project has been the development of prevocational skills in habitatable children and the improvement of daily living skills of each resident participating in the program."  
*Partlow State School and Hospital  
Alabama*

"Title VI-A funds were combined with State funds to focus on model and demonstration efforts which will enrich and improve the basic services required by State law."  
*Connecticut State Department of  
Education*

"As a result of this program, our boys and girls participated in the National Special Olympics held in Washington, D.C. last June. Ten of our children received national awards. Project funds made possible the personnel and equipment needed to train the children."  
*West Virginia School for the Deaf*

"Through the use of Federal funds to provide educational services to handicapped children, non-Federal financial support from State and local sources has been appreciably increased."  
*Mississippi State Department of  
Education*

"This class was the first public school class for the emotionally disturbed in Arkansas. It has proved to be successful. The children have shown academic progress and through a special program of therapy, several of these children have been enrolled in regular classrooms and have functioned in a normal manner."  
*Arkansas State Department of  
Education*

"The impact of Federal Funds for special education is obvious in that the State legislature appropriated \$200,000.00 this past year to establish new classes. This funding has made it possible for local districts to start 40 new classes for the handicapped."  
*Oklahoma State Department of  
Education*

"In the past several years, 12 students who have received services under Public Law 89-313 have been discharged from the institution and are coping successfully with community living."  
*Wyoming State Training School*

## Employment And Training Of Personnel

With Title VI-A State administrative funds, State departments of education employed 206 full-time personnel to administer State programs and to strengthen State leadership in the education of handicapped children.

During fiscal year 1969 over 41,000 staff members in special education programs received inservice training through Public Law 89-313 and Title VI-A funds. Their training was directed toward an increased understanding of the educational needs of handicapped children and the new methods and materials found in meeting these needs.

To help alleviate the extreme shortage of special education personnel, many Public Law 89-313 and Title VI-A projects included provisions for the employment and inservice training of teacher aides and other paraprofessionals. These staff members provided extra assistance and attention, prescribed by classroom teachers and other specialized personnel, to thousands of handicapped children in accordance with their individual needs.

## Staff Employed In Projects Funded Under Public Law 89-313 and Title VI-A, ESEA, Fiscal Year 1969

Public Law 89-313  
Title VI-A  
Combined

**Total staff: 16,635**

\*Includes administrators, supervisors, counselors, consultants, librarians, media specialists, psychologists, speech therapists, paraprofessionals, clerical and other nonprofessional staff.

"The inservice funding created a new attitude among county superintendents concerning activities for the handicapped; generated regional cooperation with counties entering into cooperative agreements to expand activities and services; produced intensified teacher interest in new techniques, methods, and materials; and developed an overall awareness of needs for specialized, intensive inservice training."

*Pennsylvania Department of Public Instruction*

"The workshop has not provided teachers with all the answers, but it has given them faith and hope that finally something can be done for the child who cannot experience success in the regular classroom. The insight gained more than justified the giving up of the necessary Saturdays."

*Vermont Association for Crippled Children*

## Title VI-A In Review

### The Law —

Elementary and Secondary  
Education Act  
Title VI (P.L. 89-10, as amended)  
Part A — Assistance to States for  
Education of Handicapped Children

the proper and efficient administration of the State plan (including State leadership activities and consultative services), and for planning on the State and Local level... To the extent consistent with the number and location of handicapped children in the State who are enrolled in private elementary and secondary schools, provision will be made for participation of such children in programs assisted or carried out under this part... Funds... shall not be made available to any school for handicapped children eligible for assistance under section 103(a) of Title I.

Sec. 601. The Commissioner is authorized to make grants pursuant to the provisions of this part for the purpose of assisting the States in the initiation, expansion, and improvement of programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) for the education of handicapped children... at the preschool, elementary and secondary school levels... Sec. 603... no State shall be allotted less than \$100,000 per annum... Sec. 604... funds paid to the State will be expended, either directly or through local agencies... and... up to 5 percentum of the amount allotted to the State for any fiscal year of \$75,000 (\$25,000 in the case of the outlying areas), whichever is greater, may be expended for

**Handicapped Children Participating In  
Projects Funded Under Title VI-A, ESEA  
Fiscal Year 1969**

4,943 or 4 percent of the handicapped children participating in Title VI-A projects during fiscal year 1969 came from nonpublic or private schools. Schools represented totaled 1,145.

Almost 46,000 mentally retarded children received educational services in Title VI-A projects during fiscal year 1969. Over 8,500 of the handicapped children participating in Title VI-A projects were reported by State educational agencies as being hearing impaired

**Total Children Served: 115,035**

**Handicapped Children Participating In  
Projects By Geographical Areas  
Title VI-A, ESEA, Fiscal Year 1969**

**Handicapped Children Participating In  
Projects By School Term,  
Title VI-A, ESEA, Fiscal Year 1969**

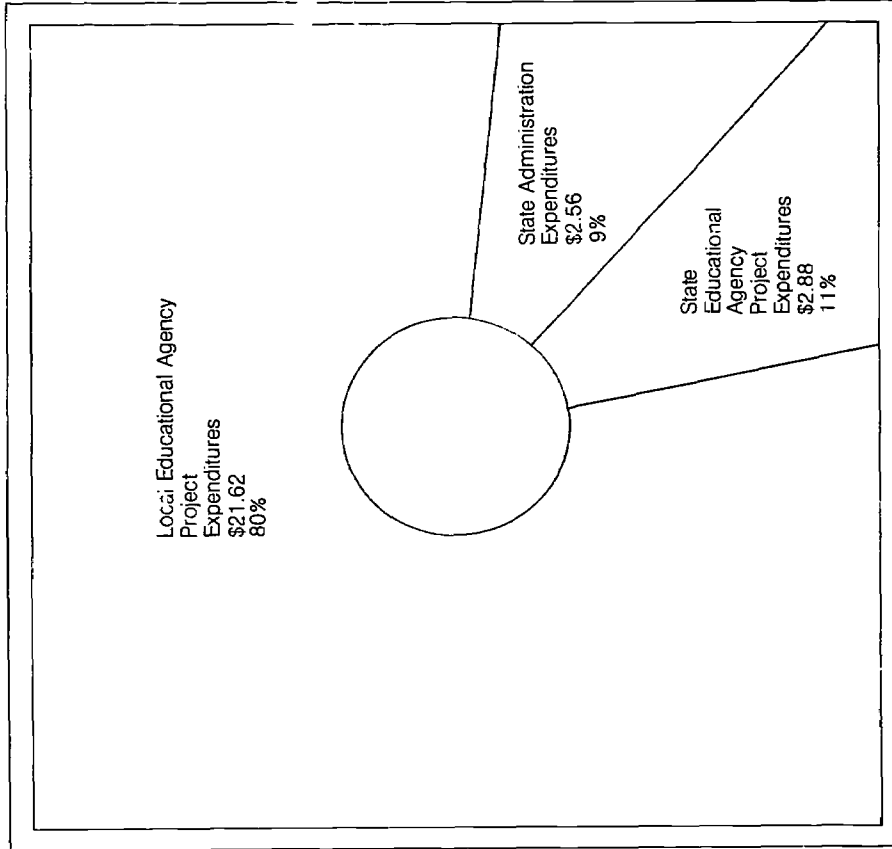

**Total Expenditures For Projects  
and State Administration  
Title VI-A, ESEA, Fiscal Year 1969**

"Title VI-A has had the greatest impact upon the State's special education program of any Federal or State action in the past 10 years."  
*Minnesota State Department of Education*

"Title VI-A testing, screening, and evaluative activities have shown the real need for programs for the emotionally disturbed child as well as for the child with learning disabilities."  
*Montana Office of the Superintendent of Public Instruction*

"With the assistance of ESEA Title VI-A funds, it is anticipated that within the next two years each local educational agency in the State will be provided educational services which will meet the individual needs of every handicapped boy and girl in our State."  
*Indiana State Department of Public Instruction*

"Title VI-A projects have resulted in a continuous coordination of various community services that serve the handicapped. They have established improved communication and unity of purpose."  
*Texas Education Agency*

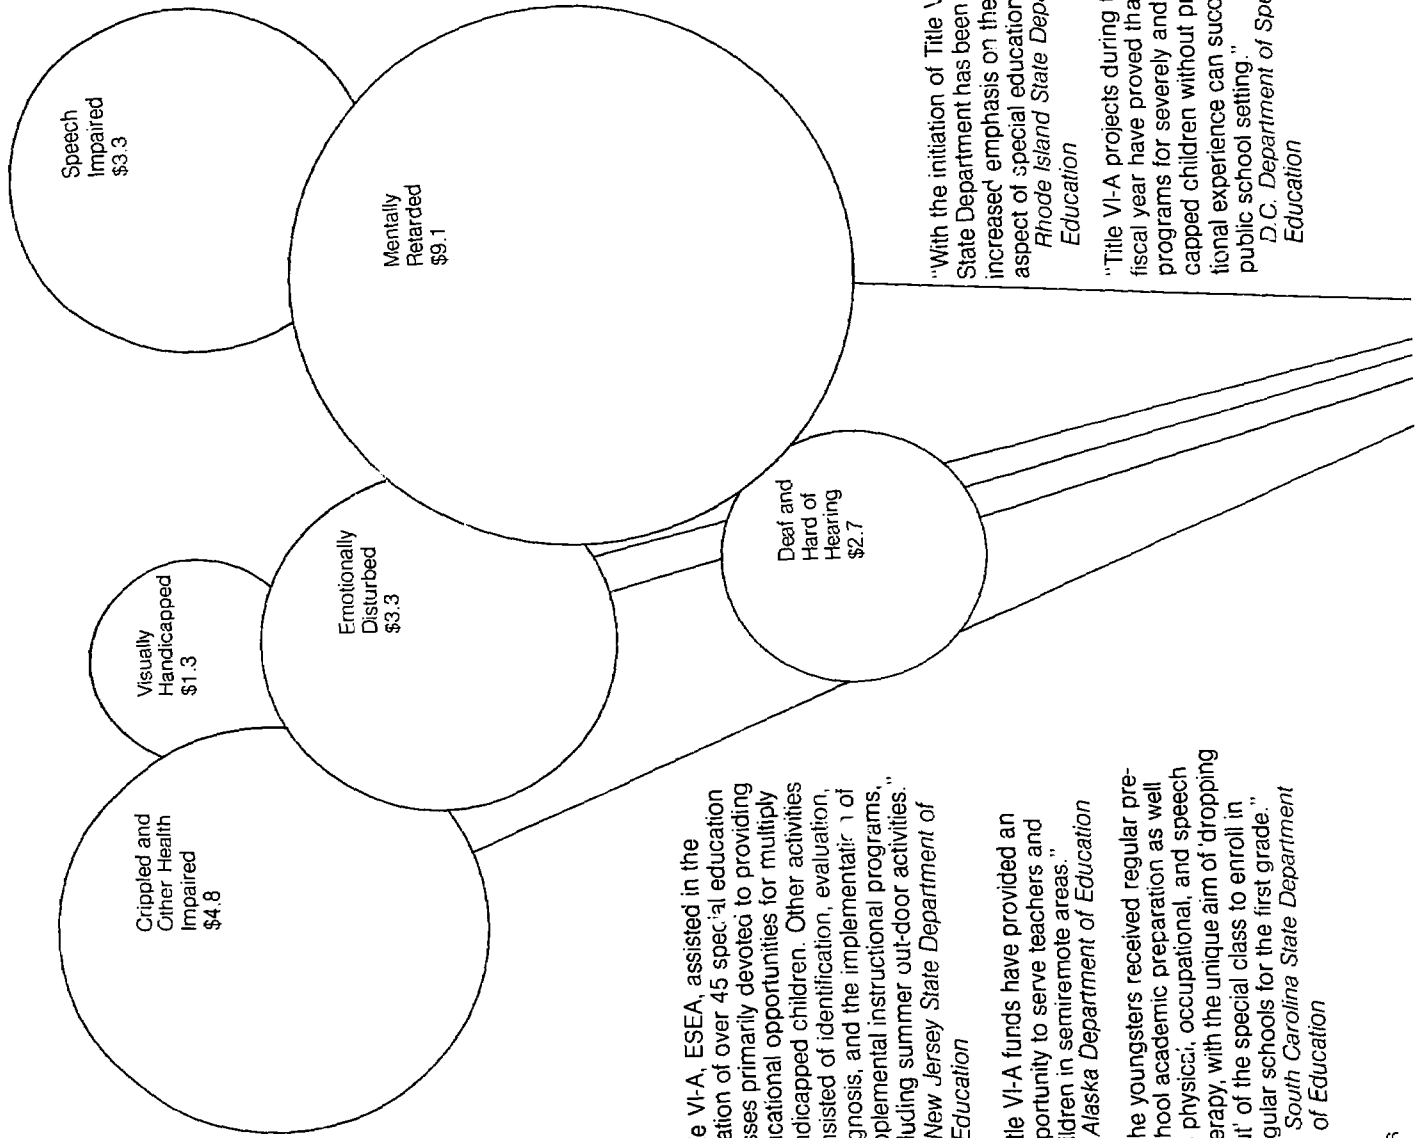

**Total Expenditures: \$27.06  
Millions of Dollars**

**Project Expenditures By Type of Handicapped Children Served, Title VI-A, ESEA, Fiscal Year 1969**

**Total Project Expenditures: \$24.5  
Millions of Dollars**

"With the initiation of Title VI-A, the State Department has been able to place increased emphasis on the qualitative aspect of special education."  
*Rhode Island State Department of Education*

"Title VI-A projects during the 1968-69 fiscal year have proved that full-time programs for severely and multihandicapped children without prior educational experience can succeed within a public school setting."  
*D.C. Department of Special Education*

"Title VI-A, ESEA, assisted in the initiation of over 45 special education classes primarily devoted to providing educational opportunities for multiply handicapped children. Other activities consisted of identification, evaluation, diagnosis, and the implementation of supplemental instructional programs, including summer out-door activities."  
*New Jersey State Department of Education*

"Title VI-A funds have provided an opportunity to serve teachers and children in semiremote areas."  
*Alaska Department of Education*

"The youngsters received regular pre-school academic preparation as well as physical, occupational, and speech therapy, with the unique aim of 'dropping out' of the special class to enroll in regular schools for the first grade."  
*South Carolina State Department of Education*

"One of the key points of impact of the Title VI-A program was the influence it had on State legislation for the handicapped."  
*New Hampshire State Board of Education*

"The major impact of Title VI-A during the 1969 fiscal year was the provision of instructional programs during the summer for 2,302 handicapped children and youth, of whom 1,114 had not been enrolled previously in special education programs."  
*Kentucky Department of Education*

**Project Expenditures By Types of Services  
Title VI-A, ESEA, Fiscal Year 1969**

**Total Project Expenditures: \$24.5\*  
Millions of Dollars**

\* Does not include \$2,561,727 expended under Title VI-A, ESEA for State administration and leadership activities during fiscal year 1969.

\*\* Includes Health Services in the field of physical and mental health which are not direct instruction, Food Services, Community Services, Student-Body Activities, Operation and Maintenance of Plant, and Fixed Charges as related to program operation in providing direct and other related services to the handicapped children served.

From cradle to brain to beauty

## Public Law 89-313 In Review

**The Law —** Elementary and Secondary Education Act  
Public Law 89-313  
Amendment To Title I.

Section 103 (a)

(5) In the case of a State agency which is directly responsible for providing free public education for handicapped children (including mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by

reason thereof require special education), the maximum grant which that agency shall be eligible to receive under this part for any fiscal year shall be an amount equal to the Federal percentage of the average per pupil expenditure in that State or, if greater, in the United States multiplied by the number of such children in average daily attendance, as determined by the Commissioner, at schools for handicapped children operated or supported by that State agency, in the most recent fiscal year for which satisfactory data are available. Such State agency shall use payments under this part only for programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) which are designed to meet the special educational needs of such children.

**The Results --**

Of the 113,685 handicapped children participating in Public Law 89-313 projects, 26,167 or 23 percent of the children included were in nonpublic schools.

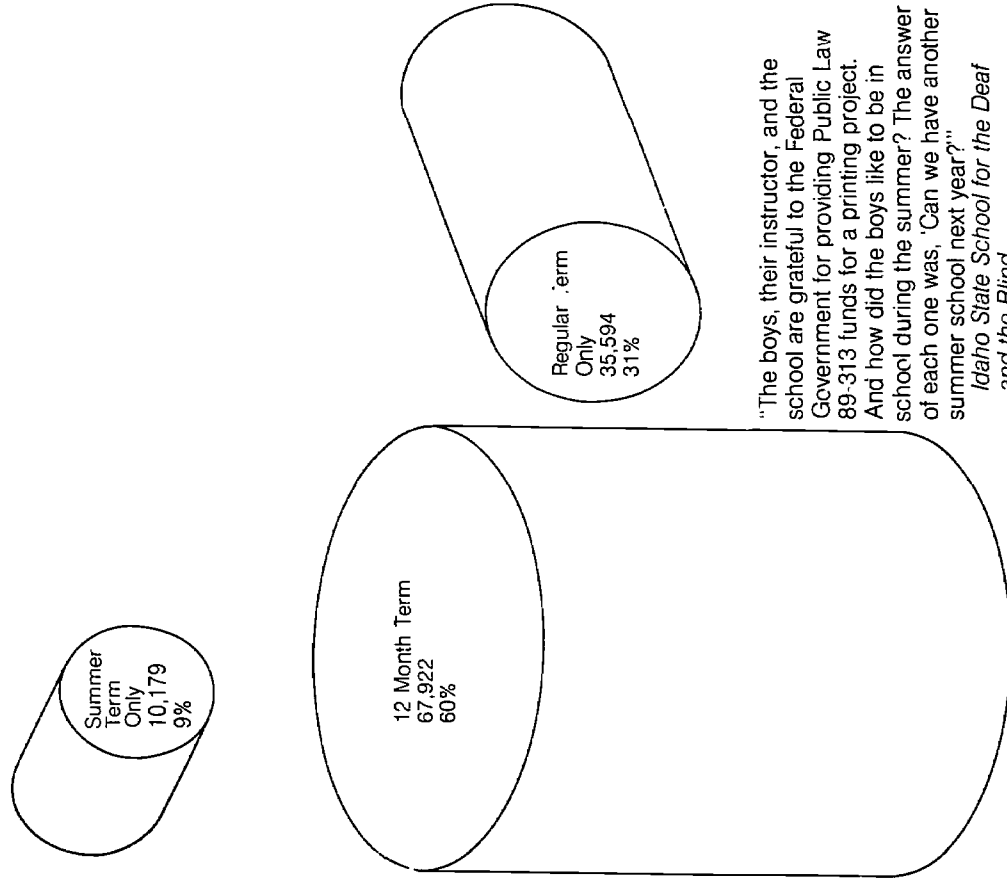

Almost 10,000 more handicapped children benefited under Public Law 89-313 in fiscal year 1969, over the number of children served in fiscal year 1968.

**Handicapped Children Participating In Projects Funded Under Public Law 89-313, ESEA, Fiscal Year 1969**

**Handicapped Children Participating In  
Projects By School Term  
Public Law 89-313, ESEA,  
Fiscal Year 1969**

**Total Children Served: 113,695**

"The impact of Public Law 89-313 funds can perhaps be seen best in subjective ways: the more alert expressions on the faces of children, the increased enthusiasm for school, the relation a child shows while describing happenings on a recent field trip to staff and other residents."

*Clover Bottom Hospital and School  
Tennessee*

"Fifteen of the 20 children in the Public Law 89-313 program improved to the extent that they were recommended to attend public school in a trainable class for the following year."

*Nevada Department of Education*

"A video porta-pak was used to tape the children's field trips. The tapes were later played to stimulate original language as well as to relate the written or oral language to the actual experiences. In addition, the porta-pak was utilized to film teachers in teaching situations so that they could evaluate their own effectiveness."

*Medical Center, Children's  
Rehabilitation Unit, Kansas*

"The boys, their instructor, and the school are grateful to the Federal Government for providing Public Law 89-313 funds for a printing project. And how did the boys like to be in school during the summer? The answer of each one was, 'Can we have another summer school next year?'"

*Idaho State School for the Deaf  
and the Blind*

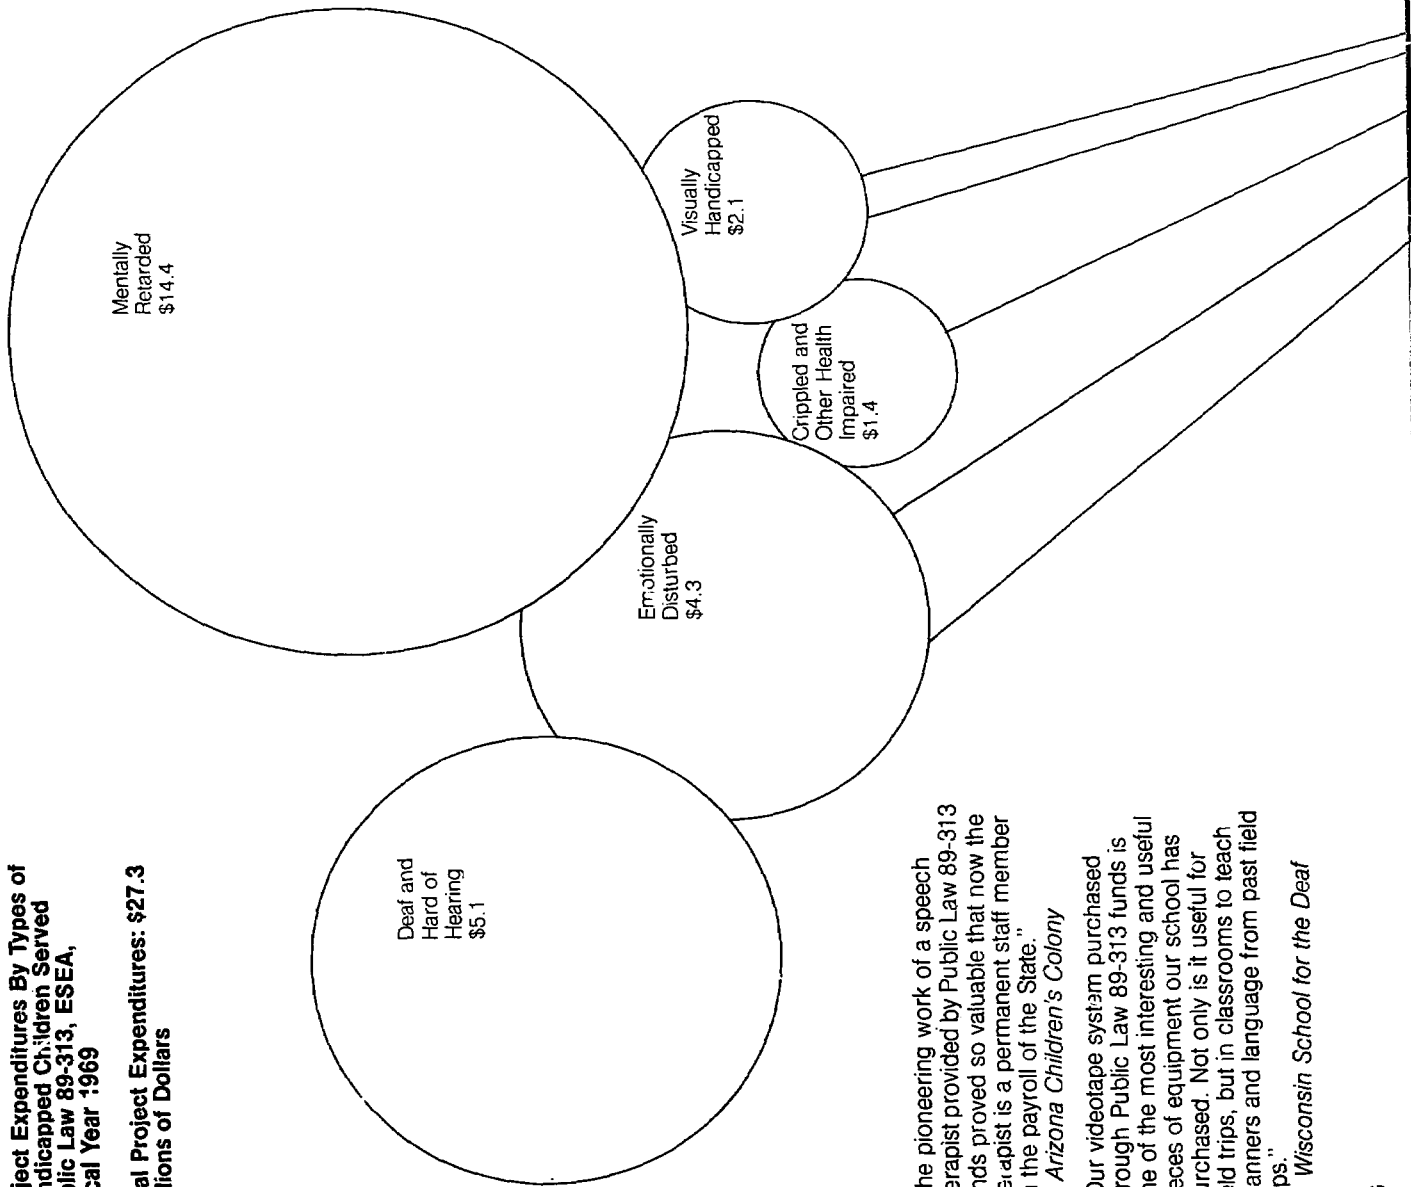

**Allocations To State Agencies Participating  
Under Public Law 89-313, ESEA  
Fiscal Year 1969**

**Millions of Dollars**

**Project Expenditures By Types of Handicapped Children Served Public Law 89-313, ESEA, Fiscal Year 1969**

**Total Project Expenditures: \$27.3  
Millions of Dollars**

"The comments by parents were significant in evaluating the summer program. He was at his best and our whole family life was better"; "Better coordination"; "Better vocabulary"; "Much happier"; "Plays better with others"; "Has playmates"; "Helps more around the house."

*Indiana Department of Mental Health*

"The uniforms gave a feeling of unity to the Academy chorus and enhanced the self-image of every member. In addition, a band instructor was employed to teach students on a group and individual basis. Without the employment of this instructor, the Academy band would not have existed during the 1968-69 school term."

*Georgia Academy for the Blind.*

"The pioneering work of a speech therapist provided by Public Law 89-313 funds proved so valuable that now the therapist is a permanent staff member on the payroll of the State."

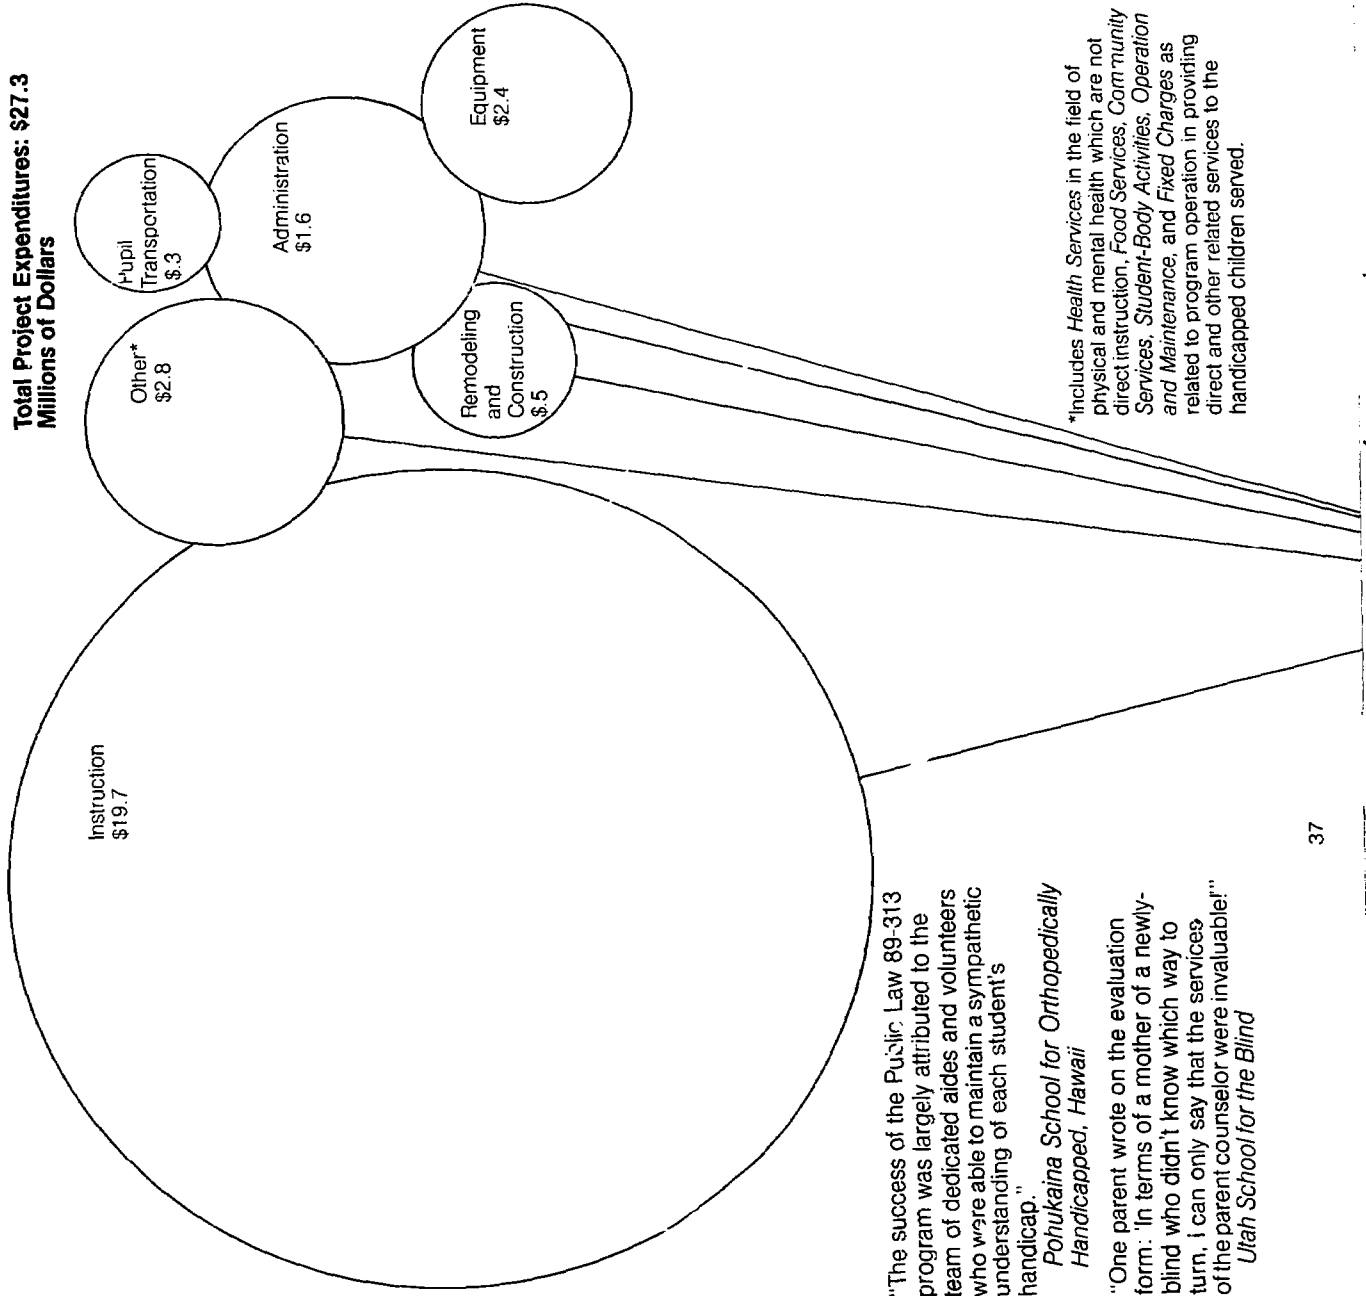

*Arizona Children's Colony*

"Our videotape system purchased through Public Law 89-313 funds is one of the most interesting and useful pieces of equipment our school has purchased. Not only is it useful for field trips, but in classrooms to teach manners and language from past field trips."

*Wisconsin School for the Deaf*

**Project Expenditures By Type of Services  
Public Law 89-313, ESEA, Fiscal Year 1969**

**Total Project Expenditures: \$27.3  
Millions of Dollars**

"The success of the Public Law 89-313 program was largely attributed to the team of dedicated aides and volunteers who were able to maintain a sympathetic understanding of each student's handicap."

*Pohukaina School for Orthopedically Handicapped, Hawaii*

"One parent wrote on the evaluation form: 'In terms of a mother of a newly-blind who didn't know which way to turn, I can only say that the services of the parent counselor were invaluable!'"

*Utah School for the Blind*

\*Includes Health Services in the field of physical and mental health which are not direct instruction, Food Services, Community Services, Student-Body Activities, Operation and Maintenance, and Fixed Charges as related to program operation in providing direct and other related services to the handicapped children served.

"The well-qualified orientation and mobility specialist, paid from project funds, has done an exemplary job of setting up and carrying out the program; in establishing a very good relationship with all other staff members, and in keeping a high level of interest evident among students and staff."

*Illinois Braille and Sight Saving School*

"The special education teachers funded by Public Law 89-313 proved to be of greater value than all the material objects available to the students of Colorado State Hospital."

*Colorado State Hospital*
