ABSTRACT

This report provides information on the students who have enrolled in the Educational Opportunity Fund (EOF) program at 40 institutions of higher education in New Jersey for the academic years 1968-69 and 1969-70. The purpose of the EOF is to provide scholarship assistance to educationally and economically disadvantaged youth who might otherwise be unable to attend institutions of higher education. This report describes the family background of the students in terms of family size, earning power, and occupation; the EOF family's need for special help; the number of students assisted by EOF and their ethnic backgrounds; the performance of EOF students; the involvement of these students in college life; and the EOF Program. Tables with data on the distribution of the EOF students in institutions, by county and region; and by sex and ethnic origin, average financial aid package; credit hours taken; attrition rate, and sample of courses taken are presented in Appendix A. Appendix B lists the colleges participating in the Fund; and The Educational Opportunity Act of 1968 is reproduced in Appendix C. (AF)

The Educational Opportunity Act of 1968

State of New Jersey
DEPARTMENT OF HIGHER EDUCATION
225 WEST STATE STREET
P. O. BOX 1293
TRENTON, NEW JERSEY 08625

May 1, 1970

Mr. Edward Booher, Chairman
Board of Higher Education
225 West State Street
Trenton, New Jersey 08625

Dear Mr. Booher:

I am pleased to transmit the first annual report of the Educational Opportunity Fund for the academic years 1968-1969 and 1969-1970. This document provides information about all students who have enrolled in the program at forty institutions of higher education in New Jersey.

The Report indicates that major program objectives as established by the Legislature have been attained to a significant degree. The Board of Directors of the Fund feel confident that the programs at participating institutions will continue to progress and provide needy students from New Jersey with the opportunity to reap the educational, personal and social benefits derived from higher education.

Respectfully yours,

A handwritten signature in dark ink that reads "Ralph A. Dungan".

Ralph A. Dungan, Chairman
Educational Opportunity Fund
Chancellor of Higher Education

A handwritten signature in dark ink that reads "Juanita High".

Juanita High
Executive Director
Educational Opportunity Fund

Introduction

In July of 1968, the New Jersey Legislature created the Educational Opportunity Fund to provide scholarship assistance to educationally and economically disadvantaged young people who might otherwise be unable to attend institutions of higher education. Direct student assistance is provided under Article III of the Act and supportive services such as tutorial programs, remedial courses, and additional counseling, are provided under Article IV. Two million dollars was appropriated for operating expenses during the first year of the Fund. This figure was increased to four million during the second year. In his 1970 budget message Governor William T. Cahill reaffirmed the State's commitment to the program.

At its inception more than thirty colleges in the State participated in the Fund. This number increased to forty institutions during the second year.

A Profile of the Typical E.O.F. Student

The average E.O.F. student has been a New Jersey resident for 14 years. In one instance in five, he is an independent student who is married, separated, or divorced, and on the average has 1.5 dependent children. Most often, he is himself a dependent person. One out of six is a welfare recipient or receives funds from the Bureau of Children's Services. Approximately five percent of all

E.O.F. students are veterans.

In the first semester of 1968, 46 percent of the registrants were males and 54 percent were females. In 1969-1970 male registrants rose to 49 percent. This figure is an interesting one. It means that, considering the lower proportion nationally of women to men in college, young women among the disadvantaged are significantly more apt to apply for E.O.F. assistance than men.

Criteria commonly used to indicate a disadvantaged population are: total family size and number of dependents relative to (1) gross annual income, (2) educational background of father, (3) educational background of mother, (4) level of highest grade achievement by sex of parent, (5) employment of father, (6) employment of mother, and (7) membership in a minority group. This last, while not a prerequisite for aid under the program, has some correlation with disadvantagement.¹

The typical E.O.F. student is a member of a family consisting of over five persons, between three and four of whom are dependent children. This family size is somewhat larger than the national average. Approximately one-third of E.O.F. families have annual incomes less than \$3,000; four fifths have annual incomes less than \$6,000; and nine tenths have annual incomes less than \$7,500. Based on average

¹ For example, as cited by the Department of Commerce, Bureau of the Census, Current Population Reports, Series P-23 No. 26, median income level for Negro families in the Northeast was \$5,764 in 1967, while for white families median income was \$8,746 (a differential of almost \$3,000 or 52 percent).

household size, these figures are consistent with the limits set by the Office of Economic Opportunity for poverty-level determinations.²

Earning-levels reflect at least two things: (1) education and (2) job category. Of E.O.F. households approximately three-fifths of both the fathers and mothers have less than a high school education. For the population as a whole, only two-fifths of all persons between age 35 and 55 have less than a high school education.³ As for employment categories, 54 percent of male heads of households and 58 percent of female heads of households work in low status jobs, such as semi-skilled persons, workmen, laborers, farm workers, domestic workers, or are housewives. The combination of restricted income, education level, and job status clearly denote a disadvantaged population.

The E.O.F. Family's Need for Special Help

Impact of the above factors on the E.O.F. student is not difficult to assess. In an unpublished report to the Department of Higher Education on the 1970 Census and Educational Planning Conference, some pertinent demographics of college enrollments (and their influences) were cited:

The proportion of persons who go to college continues to depend very heavily on the situation of families with persons of college age.... the education of the father was a major factor in the

² Office of Economic Opportunity, Guidelines: Upward Bound 1969-1970 Handbook 6118-1.

³ Department of Commerce, Bureau of the Census; U.S. Census of Population: 1969, Vol. 18, No. 18.

college enrollment of children. Eighty-two percent of high school seniors whose fathers had a college education were enrolled in college.⁴

The lower the family income, the less likely is the family to have a college student in the household. In the national averages, only 20 percent of those with a family income of less than \$3,000 were likely to have a member in college. For families with an income of \$15,000, 87 percent have a member in college.

One sign of the Fund's success is that one-third of those whom it aids are from families that earn less than \$3,000 a year.

Number of Students Assisted by E.O.F.

Due to the program's success in its first year 1968-1969, the enrollment of new students increased sizeably in 1969-1970. An additional five institutions joined the program and those colleges already participating have extended their programs.

* Including 176 of Rutgers' U.U.D. students.

⁴ Conference on the 1970 Census and Educational Planning, Nov. 7-8, 1969, Hartford, Conn., sponsored by the New England Board of Higher Education. Report to the New Jersey Department of Higher Education (Xerox)

The total appropriation for Fiscal 1970 for student grants was \$3,400,000 from which 4,104 students were assisted, an average of \$825 per person.

The ethnic breakdown is approximately four-fifths black and Puerto Rican and one-fifth white. While the minority group percentage may seem high, it simply mirrors societal conditions which affect the disadvantaged. Four-fifths of E.O.F. families have an annual income of less than \$6,000. More minority group individuals reside in the areas where the social and economic conditions are such that higher education has not been a viable option; E.O.F. is beginning to reverse this trend.

Reviewing the Fund's first two years of operation, it must be noted that, although some progress has been made in providing higher education opportunities, much has yet to be accomplished. A wider base of assistance designed to enable even more disadvantaged persons to obtain higher education is still a top priority item.

Performance of E.O.F. Students

The Educational Opportunity Fund is now in its fourth semester of operation. The young people enrolled in the program, despite their educational and economic handicaps, are progressing at a level almost equal to their regularly admitted counterparts.

For the academic year 1968-69, the average E.O.F. student earned slightly below a "C" average; the regularly admitted student earned slightly above "C" average.

The data for the first semester of the 1969-1970 academic year, although incomplete, exhibit the same trend indicated last year, namely that E.O.F. students are performing almost as well as other students. The grade point average of the typical E.O.F. freshman was about one-third of a grade point below his regularly admitted counterpart (comparable to the situation for the first semester, 1968-1969). Available data also indicates that E.O.F. sophomores improved their academic performance over that of last year, as demonstrated by a higher grade point average: for the first semester, 1969-1970, the typical E.O.F. sophomore raised his grade point average by almost one-fifth of a grade point, and began closing the gap on his regularly admitted counterpart.

About nine percent of all E.O.F. students won academic honors during academic year 1968-1969. Approximately five percent of all E.O.F. students earned academic honors during the first semester, 1969-1970.

E.O.F. students are taking regular college courses supported by remedial and tutorial services, generally in the communication and mathematical skills. Many E.O.F. students pursue a reduced full-time load because of the handicaps with which they come to college. The normal full-time load at most colleges ranges between 15 and 17 credit hours per semester. The average initial-year E.O.F. student in 1968-69 carried between 12 and 14 credit hours. In most instances the difference between the full-time load and the reduced load is accounted for by remedial courses. As the E.O.F. students progress through the program,

their remediation courses decrease and total credit load approaches the load of regularly admitted students.

The holding power of E.O.F. programs -- a meaningful assessment of success -- is evidenced by an attrition rate in 1968-1969 equal to or less than that of the regular freshman class.

Preliminary information for first semester 1969-1970 indicates that the attrition rate for initial year E.O.F. students is below the attrition of regularly admitted students; the attrition for renewal students is comparable to regularly admitted non-E.O.F. students.

Involvement of E.O.F. Students in College Life

Academic criteria are not the only means of measuring the success that E.O.F. students are achieving. Their integration into the social patterns of the institution is equally important. About one in six of all E.O.F. students participate in and assume leadership roles in extra- and co-curricular activities. Among these have been a class president, a president of an interracial fraternity, the lead actor in a Shakespearean tragedy, student government officers and representatives, education committee members, a number of outstanding athletes, cheerleaders, dormitory counselors, school newspaper and literary magazine staff, and many others.

A Description of E.O.F. Programs

Although the programs vary at each participating institution,

some basic similarities exist. Each encompasses one or more of the following characteristics: tutorial and/or remedial programs; extra counseling; specially selected cultural activities; involvement of minority groups in the social life of the college; an advisory board; a grievance procedure; a mechanism for insuring student-administration-faculty communication; relevant curricular offerings, including ethnic-group cultures and/or histories, as well as course work directed to urban problems and their solutions. While the above constitute essential elements of a quality program, other intangible factors, such as sensitivity, attitudes, and commitment of all personnel, ultimately shape and guarantee the success of the program.

To some extent the first year's E.O.F. programs were experimental. Students presented to their various institutions highly diversified backgrounds and differences in entry level. Each institution, acting as an independent agent, admitted students to the program who in its opinion were "high risk", yet evidenced strong motivation and high potential for success. To meet the differences encountered in students, institutions established or expanded tutorial and remedial (developmental) programs. The common goal of participating E.O.F. institutions is to provide the student with every opportunity to benefit from the college experience.

Program Development

The first two years of the Fund's operation provide a basis for some assessments and recommendations for future programs.

-- It is imperative that courses in areas such as black studies and other minority group studies become quality areas within the regular college offerings.

-- Counseling should constitute a major component in the total E.O.F. effort. To reach this objective, the college staff must be active, personal, sensitive, and pragmatic. A student must be guided toward realistic objectives and meaningful curricula. The objective of counseling is to help the student develop and eventually select options geared to his interests and abilities. Although everyone may not want to be a lawyer or doctor, some evidently should be encouraged to pursue these or other professional careers. The E.O.F. courses and counseling package must be integrated into the overall curriculum and total personnel services. This amalgamation precludes the arbitrary discontinuation of vital programs and avoids stigmatizing students enrolled in these programs.

-- Special programs must allow for movement from remedial courses to regular college work in a reasonable period of time; this policy requires remediation to be carefully structured so as to dovetail readily with related non-remedial courses. Some pretesting to assess remedial needs and post-remediation measurement to determine readiness for regular course enrollment must be part of the total E.O.F. counseling program. In addition to remedial course offerings, tutoring must be available to students on a personal and individual basis. Thus

a relatively small student-faculty ratio is essential.

The aim of funded E.O.F. programs must be the aim of all higher education -- to prepare individuals for contributing to, participating in, and enjoying fully the benefits of society.

Program Impact

One vital measurement of the success of the Fund is an assessment of the impact the program has had on its recipients. No statistical data can measure human gratitude, but the following unsolicited testimonials attest to the worth of the program: the woman who wrote that as result of her award she could 'break out of the welfare cycle;' or the woman who wrote that her daughter's award would make possible the completion of a college semester; or the man who wrote about the funds which made college possible; or the woman who wrote that she is "grateful...for the opportunity you have given me to further educate myself, and in so doing, be able to gain employment at a salary adequate to support myself and my two children... for making me a college student, an honor which I never dreamed possible for me."

E.O.F. as an Investment

In terms of increased earnings resulting from a college education, the State of New Jersey has made a sound economic investment in E.O.F. students because in tax dollars alone, the State will realize a 100 percent return on its investment within four or five years.

But in more human terms our society's investment in these young men and woman has an incalculable return for all of us.

The average E.O.F. student is not getting a free ride. In spite of his limited economic resources, the average E.O.F. student is nearly able to match his E.O.F. grant from loans, parental contribution, and his own summer and academic year employment.

* * *

In summary, the New Jersey Legislature has made a significant beginning in addressing one of the State's critical problems. New Jersey's institutions of higher education have made substantial commitments to resolving the problems of educationally and economically disadvantaged young people. And despite their social, educational, and economic handicaps, the E.O.F. students have made a commendable record. Thus, the Legislature, the institutions, and the E.O.F. students have combined their resources in a meaningful investment in New Jersey's future.

NON-E.O.F. STUDENTS: 1968-1969

1st Semester	15.5
2nd Semester	15.0

MEAN NUMBER OF REMEDIAL, NON-CREDIT HOURS TAKEN BY FULL-TIME,
FRESHMAN E.O.F. STUDENTS. 1968-1969

1st Semester	2.7
2nd Semester	2.0

PROGRESSION OF CREDIT HOURS FOR E. O. F. STUDENTS - FIRST SEMESTER 1969-1970

During the first semester, 1969-1970, the typical E. O. F. freshman took 12.1 semester hours of regular credit coursework and 2.3 semester hours of non-credit, remedial work.

In terms of semester hours, the typical E. O. F. student who entered the program in the fall of 1968, is making the following progress:

	<u>Semester hours in credit courses</u>	<u>Semester hours in remedial, non-credit courses</u>	<u>Total semester hours</u>
1st Semester 1968-1969	12.7	2.7	15.4
2nd Semester 1968-1969	13.2	2.0	15.2
1st Semester 1969-1970	13.9	1.1	15.0

The typical regularly admitted student carries a load between 15 and 16 semester hours. On the average, as the E.O.F. students are progressing through the program, they are taking more semester hours in regular credit courses and fewer semester hours in non-credit, remedial courses.

ASSEMBLY, No. 767

STATE OF NEW JERSEY

INTRODUCED MAY 20, 1968

By Assemblymen KEAN, KALTENBACHER, DENNIS, WILSON,
FIORE, CAPUTO, VANDER PLAAT, RICHARDSON, OWENS,
WILENTZ and PFALTZ

Referred to Committee on Education

AN ACT concerning higher education, creating the New Jersey Educational Opportunity Fund in the Department of Higher Education, supplementing subtitle 12 of Title 18A of the New Jersey Statutes, and providing an appropriation.

1 BE IT ENACTED *by the Senate and General Assembly of the State*
2 *of New Jersey:*

ARTICLE I

1 1. This act shall be known as, and may be cited as, the "New
2 Jersey Educational Opportunity Act of 1968."

1 2. This act shall be liberally construed to effectuate the purposes
2 and intent thereof.

1 3. As used in this act, unless the context clearly indicates other-
2 wise, the following terms shall have the following meanings:

3 (a) The term "board" shall mean the Board of Directors of the
4 New Jersey Educational Opportunity Fund created by section 4
5 of this act.

6 (b) The term "chancellor" shall mean the Chancellor of Higher
7 Education.

8 (c) The term "department" shall mean the Department of
9 Higher Education.

10 (d) The term "fund" shall mean the New Jersey Educational
11 Opportunity Fund created by section 4 of this act.

612

12 (e) The term "higher education" shall mean that education
13 which is provided by any or all of the public institutions of higher
14 education as herein defined or any or all equivalent private insti-
15 tutions.

16 (f) The term "public institutions of higher education" shall
17 mean and include Rutgers, The State University, Newark College
18 of Engineering, the New Jersey College of Medicine and Dentistry,
19 the 6 State colleges, the College of Aeronautical and Air-space
20 Science established in Atlantic county pursuant to chapter 285 of
21 the laws of 1964, the county colleges, the public junior colleges, the
22 industrial schools, and any other public universities, colleges,
23 county colleges or junior colleges now or hereafter established or
24 authorized by law.

ARTICLE II

1 4. (a) There is hereby created and established in the department
2 an educational opportunity fund which shall be known as the "New
3 Jersey Educational Opportunity Fund." The fund shall identify,
4 recruit and provide financial assistance to needy students who are
5 residents of this State in order that they may be able to attend
6 institutions of higher education.

7 (b) The business and operations of the fund shall be adminis-
8 tered by the chancellor and the board of directors created pursuant
9 to section 5 of this act.

10 (c) The chancellor shall serve as the chief executive officer of
11 the fund and shall organize the work of the fund in such manner
12 as he deems necessary to carry out the provisions of this act. The
13 chancellor may employ such persons, contract for such services,
14 make such expenditures and adopt such rules and regulations as
15 may be necessary or appropriate to carry out the provisions of this
16 act.

1 5. (a) The board of directors of the fund shall consist of the
2 chancellor, who shall serve as chairman, and 8 citizens of this State
3 appointed by the State Board of Higher Education with the ap-
4 proval of the Governor. Citizen members of the board shall be

5 selected without regard to political affiliation and, as far as may
6 be practicable, on the basis of their knowledge of, or interest in,
7 the problems of needy students and higher education.

8 (b) Each citizen member of the board shall serve for a term of
9 4 years and until his successor shall have been appointed and quali-
10 fied; provided, that in the case of the first appointments to the
11 board, 2 members shall be appointed for terms expiring June 30,
12 1969; 2 members shall be appointed for terms expiring June 30,
13 1970; 2 members shall be appointed for terms expiring June 30,
14 1971; and 2 members shall be appointed for terms expiring June
15 30, 1972. Any vacancy in the membership of the board shall be
16 filled in the same manner as the original appointment for the re-
17 mainder of the unexpired term.

18 (c) The board shall develop and maintain a State-wide system
19 for the identification of potential college students from needy fam-
20 ilies; devise methods for recruiting such students; advise the chan-
21 cellor on the organization, co-ordination and support, in co-opera-
22 tion with public and private institutions of higher education of the
23 State, of programs of remedial education for such students; and
24 provide financial assistance as required by such students.

25 (d) Members of the board shall serve without compensation but
26 shall be entitled to be reimbursed for all reasonable and necessary
27 expenses incurred in the discharge of their duties.

1 6. The board shall:

2 (a) Administer all funds appropriated by the Legislature for the
3 purpose of carrying out the provisions of this act.

4 (b) Be an agency of communication with departments and
5 agencies of the United States on the availability of grants or loans
6 to this State for purposes related or similar to those set forth in
7 this act.

8 (c) Develop, establish and publicize criteria for the determina-
9 tion of eligibility for financial assistance from the fund based on
10 need and potential for success in college.

11 (d) Established procedures for determining the amount of each

12 award according to the total financial need of each student.

13 (c) Through the chancellor, be responsible and report periodi-
14 cally in writing to the Board of Higher Education on the perform-
15 ance of its duties in accordance with the provisions of this act.

16 (f) Adopt by-laws, and make, enforce, alter and repeal rules for
17 its own operation and for carrying out the provisions of this act.

18 (g) Receive and disburse such contributions to the fund as may
19 be forthcoming from private and public sources.

ARTICLE III

1 7. (a) The board is hereby authorized to award "opportunity
2 grants" from the fund to needy students for undergraduate study
3 leading to a baccalaureate degree, associate degree, or other ap-
4 proved certificate **and for graduate and professional study lead-*
5 *ing to approved master's and doctor's degrees** at institutions
6 of higher education, public and private, located in New Jersey;
7 provided, that the board shall allow not more than 10% of the
8 needy students to be awarded opportunity grants in any year
8A to use their opportunity grants at institutions of higher education
8B located outside this State; *and, provided further, that no more than*
8C *10% of the funds appropriated and available for the purposes of*
8D *this act shall be awarded to students for use in graduate study*.*

9 (b) Opportunity grants may be awarded annually, upon proper
10 application to the fund, to any needy student who qualifies under
11 the standards to be developed and promulgated by the board and
12 who is or will be attending an institution of collegiate grade located
13 in New Jersey and approved for this purpose by the Board of
14 Higher Education, except that in cases where the student will be
15 or is attending an institution in another State, the accreditation
16 procedures of that State shall be accepted, subject to the approval
17 of the board.

1 8. (a) No opportunity grant shall be awarded to any applicant
2 therefor unless such applicant shall have demonstrated to the
3 satisfaction of the board that he or she:

4 (1) Is and has been a resident of the State for at least 12 months
5 prior to receiving the grant;

6 (2) Will be or is attending a full-time or other program leading
7 to a degree, or other organized program of study approved by the
8 institution which he or she is or will be attending;

9 (3) Has demonstrated financial need for such grant, as deter-
10 mined by standards and procedures to be established by the board,
11 in accordance with the provisions of this and the preceding article;
12 and

13 (4) Has complied with all rules and regulations adopted pur-
14 suant to this act by the board for the award, regulation and ad-
15 ministration of opportunity grants.

16 (b) In addition to the requirements of subsection (a) of this
17 section, the board is hereby authorized to require the satisfaction
18 of such other requirements as it may deem necessary to carry out
19 the provisions of this act.

1 9. In awarding opportunity grants pursuant to this act, the board
2 shall take into account the financial resources available to the
3 applicant to meet the cost of his higher education and the tuition,
4 fees and living expenses at the institution of higher education
5 which the applicant is attending or to which he has been admitted.
6 Opportunity grants awarded pursuant to this act shall be paid to
7 recipients by the State Treasurer in accordance with rules and
8 regulations adopted by the board.

1 10. No person shall be eligible for educational opportunity assist-
2 ance pursuant to this act for more than 6 years, or for such other
3 period of time as may be determined by the board to be necessary
4 for the completion of an organized course of study. Each opportu-
5 nity grant awarded pursuant to this act shall remain in effect only
6 so long as the recipient thereof achieves academic progress to the
7 satisfaction of the board and demonstrates continued eligibility
8 pursuant to the provisions of this act.

1 11. Opportunity grants shall be awarded by the board without
2 regard to race, creed or religion and in such number and amount as
3 may be within the limits of funds appropriated or otherwise made
4 available therefor.

ARTICLE IV

1 12. The chancellor shall develop, establish and maintain pro-
2 grams of remedial and supplementary education for the students
3 who will receive educational opportunity assistance under this act.
4 Such programs may be administered directly by the Department
5 of Higher Education or may be co-operative ventures undertaken
6 with any or all of the public and private institutions of higher
7 education in the State.

1 13. The chancellor shall:

2 (a) Administer all funds appropriated by the Legislature to
3 fulfill the purposes of this article.

4 (b) Be an agency of communication with any department or
5 agency of the United States on public funds available to the State
6 for purposes related to those set forth in this act.

7 (c) Enter into joint-funding arrangements with public and pri-
8 vate institutions of higher education for purposes related to this
9 act.

ARTICLE V

1 14. (a) There is hereby appropriated to the Department of
2 Higher Education for the New Jersey College Opportunity Fund,
3 the sum of ***\$1,600,000.00*** to carry out the provi-
4 sions of Articles II and III of this act including the administration
5 thereof, for the period ending June 30, 1969.

6 (b) There is hereby appropriated to the Department of Higher
7 Education the sum of \$400,000.00 to carry out the provisions of
8 Article IV of this act for the period ending June 30, 1969.

1 15. This act shall take effect immediately.
