ABSTRACT

This report presents the results of the Fall 1969 statewide survey of the post-high school plans of Florida high school seniors. The students were asked to fill out the instrument: Plans Beyond High School, which requested information of college bound students on the type of institution they planned to attend, whether they planned to go to an in-state or out-of-state institution and their main reason for attending college. Students not planning to attend college were asked their main reason for not doing so, their plans after high school, and whether they planned to attend college later. Those undecided about college were asked their main reason for being undecided. College bound students were also asked to mark the institution they planned to attend. In addition to presenting all the statistical results, this report discusses post-secondary enrollment trends in the state, and analyzes the results in terms of total population, race, sex, 1968 results, intended plans versus actual courses of action, and the non-college bound students and the undecided ones. The final section of the report compares performance on the Florida Twelfth Grade Test of students planning to attend an in-state institution with students planning to attend an out-of-state institution. Acknowledgments

This publication presents the results of the fall, 1969 statewide survey of the post-high school plans of Florida high school seniors. The series of annual surveys, utilizing an instrument titled, Plans Beyond High School, was inaugurated in 1968.

As in the initial survey, we are indebted to Dr. William Hunt, Director of Institutional Analysis, Florida Atlantic University, and his staff for processing the tabulation of the survey data, and for making the required statistical analyses.

We are grateful to Tom Stafford for his work in preparing the manuscript and to Trudie Kirkland for typing the manuscript in final form. To Don Vodicka who designed the cover, John Coefield who supervised the reproduction of the booklet, and Dave McOuat, who coordinated the many aspects of producing this publication, we are equally grateful.

Once again we acknowledge the time and effort given the teachers and other school personnel who administered the survey as a part of the Florida State-wide Twelfth Grade Battery. To the students themselves, who provided us with the information asked for by the survey questionnaire, we express a full measure of appreciation.

PLANS BEYOND HIGH SCHOOL

A Report of a Statewide Survey of Florida High School Seniors - Fall, 1969

1. Introduction

In the fall of 1968 an eight-item survey entitled, "Plans Beyond High School" (Figure 1) became a part of the Florida Twelfth Grade Test battery (FTGT). The survey was designed to determine the post-high school plans of Florida high school seniors and the reasons for those plans. This booklet is a summary of the results of the fall, 1969 administration of the survey and a comparison of these results with those from the fall of 1968.

The FTGT battery is given to seniors in Florida high schools (public and private) during the fall of each year and is composed of a test of academic ability and achievement tests in English, social studies, natural sciences and mathematics. A reading index, based on performance on verbal sections of the battery is also provided. The test results are utilized for a variety of purposes by the following groups of people:

1. High school seniors and parents - in making plans beyond high school
2. High school administrators and teachers - in evaluating curriculum
3. Guidance counselors - in assisting students to evaluate their strengths and weaknesses and to formulate their post-high school plans

PLANS BEYOND HIGH SCHOOL
A State-Wide Survey of Florida High School Seniors

PURPOSE: You are being asked to give information about your plans beyond high school to aid educators meet the needs of higher education in Florida. Please respond accurately and honestly to the questions.

DIRECTIONS: Fill in the blanks below. When the blanks have been filled in, then record your social security number at the right, placing the first figure in the box under the arrow-head, and the remaining eight figures in the remaining eight spaces of the column of boxes. Then blacken the corresponding dotted blanks.

NAME (PRINT) LAST FIRST MIDDLE
SCHOOL (PRINT) NAME
CITY (PRINT) NAME
DATES TODAY MO. DAY YEAR BIRTH MO. DAY YEAR

SOCIAL SECURITY NUMBER
LINE I II III IV V VI VII VIII IX

MALE FEMALE RACE: Fill in 1, 2 or 3 WHITE BLACK OTHER
Blocken 1 or 2

DIRECTIONS (Cont'd) Please read before proceeding.

To complete the questionnaire answer only two parts as stated below.
If you plan to attend college full-time or part-time: Parts A and B;
If you are not planning to attend college: Parts A and C;
If you are undecided about attending college: Parts A and D.

PART A. All Students Answer Question 1

1. Upon graduation from high school do you plan to attend a junior college, a 4-year college, or university? Do NOT include colleges of cosmetology, business, or trade schools. Students with these plans should mark "no" here, and go to Part C. Mark only ONE response.

PART B. All College-bound Students Answer Questions 2, 3, and 4

2. As a college-bound student, what type of an institution do you plan to attend? Mark only ONE response.
3. Answer either 3(a) or 3(b) below.
4. What is your main reason for attending college (either full- or part-time)? Mark only ONE reason.

PART C. Students Not Planning to Attend College Answer Questions 5, 6, and 7

5. What is your MAIN reason for not planning to attend college? Mark only One reason.
6. Since you do not expect to attend college upon graduation from high school, what are your plans? Mark only ONE answer.
7. Do you plan to attend college later? Mark only ONE answer.

PART D. Students Undecided About College Answer Question 8

8. What is the MAIN reason for your present indecision? Mark only ONE reason.

COLLEGE AND UNIVERSITY CODES

Directions for entering institutional code on answer sheet. Select the institution you plan to attend. Find its code number, and enter these numbers in the boxes. Then blacken the dotted blanks corresponding to the code numbers. See example below.

AFTER COMPLETING THE ANSWER SHEET, DETACH IT FROM THE CODES FOR COLLEGES AND UNIVERSITIES BY TEARING ALONG THE PERFORATED LINE. MAKE SURE YOU DO NOT TEAR THE ANSWER SHEET. YOU MAY KEEP THE CODE SHEET FOR FUTURE REFERENCE.

4. College admission officers - in selecting a well-qualified student body
5. State Department of Education - in identifying recipients of the Board of Regents Scholarships
6. Educational researchers - in studying achievement in high school and its relationship to success in college.

The following objectives of the survey are similar to but not identical with the objectives of the FTGT battery:

1. To document annually the post-high school plans of Florida high school seniors
2. To establish a basis for viewing differences in the plans of high school seniors and the courses of action taken after the seniors graduate
3. To obtain data useful to guidance counselors in advising high school seniors during the time that post-high school plans are being shaped
4. To provide information that will contribute to the development of post-secondary educational and training programs that are keyed to the aspirations and needs of Florida's young people
5. To furnish colleges and universities with information to assess admission procedures and financial aid policies.

2. Post-Secondary Enrollment Trends

Results of the 1969 survey documented the intended plans of high school graduates in the class of June, 1970. Prior to presenting the survey results, general trends in post-high school enrollment are reviewed as a means for providing a background against which the survey data may be viewed.

Like many of its sister states, Florida rapidly expanded its post-high school educational programs in the 1950's and 1960's. In 1950, there were three state universities in Florida with an enrollment of approximately 20,000 students. Today there are seven state universities with a combined enrollment of nearly 68,000 students. In 1972, two additional state universities, now in the formative stage, will open, at which time the systemwide enrollment in the state universities will exceed 90,000 students.

In 1950, Florida had five public two-year colleges, attended by less than 5,000 students. Twenty years later, there are 27 public two-year colleges, with a combined enrollment of 100,000 students taking college-level courses. Expansion in higher education, however, has not been confined to the public sector. New private colleges and universities have been established in Florida during this span of 20 years, and older institutions expanded. Although the increase in the attendance of students in private institutions of higher learning in Florida has not kept abreast of the increase in the public institutions, the enrollment growth in the private sector is none the less impressive. The approximate enrollment of 40,000 students in private colleges and universities in Florida in 1969 was more than double the enrollment twenty years ago.

Vocational and technical enrollment in Florida beyond high school increased four-fold during the late 1960's, reaching a total of 84,000 in 1969. Even so, the number of high school graduates entering vocational-technical study immediately upon graduation, as a per cent of the total graduating class, exhibited only a slight shift upward in recent years. There is every indication that vocational-technical enrollment is swelled by the entry into its ranks of students out-of-high school for a year or more.

In 1962, the then Division of Research, Department of Education, Tallahassee, Florida, inaugurated a series of annual reports documenting the number of high school graduates entering post-high school education of one type or another.¹ The present-day Bureau of Research accomplishes this follow-up research by compiling appropriate data from accreditation reports completed by high school principals. In Chart 1 are shown the general enrollment trends in post-high school education in Florida based on data provided by these reports.

Now that Florida, using its tax money, supplemented by federal funds, has greatly expanded its offerings in post-high school education, educators and laymen alike who view the enrollment trends based on follow-up studies may justifiably ask: Are enough of Florida's high school graduates entering post-high school educational programs? Should enrollment in a designated sector (such as vocational-technical training) be stimulated? Should there be a statewide attempt to identify the high school graduates who are not planning on enrolling in post-high school education and training? If so, should the high school endeavor to get the students who are terminating their education with high school graduation to change their high school plans, and to enter an educational program beyond high school? These and related questions have enormous significance for the optimum development of the human resources of a state's young people.

3. Discussion of Results

Population: In the fall of 1969, 82,600 students in 400 Florida high schools completed the FTGT battery, and of these students 94.2 per cent or

¹Florida High School Graduates, Research Reports 26, 38, 45, 53, 63, 72 and 81, Bureau of Research, Department of Education, Tallahassee.

CHART 1

HIGH SCHOOL GRADUATES IMMEDIATELY
ENTERING POST-HIGH SCHOOL EDUCATIONAL PROGRAMS
AS PER-CENTS OF TOTAL NUMBER OF GRADUATING SENIORS
FLORIDA 1964-1968

SOURCE: RESEARCH REPORTS 38, 45, 53, & 72 DEPT. OF EDUCATION, TALLAHASSEE, FLORIDA

77,850 responded to the questionnaire, Plans Beyond High School. The survey instrument requested the students to indicate their sex and race. A description of the population on the basis of these variables is made.

Race: In the earlier survey, the terms used to indicate race were: white, Negro and other race. In the 1969 administration of the survey, the term Negro was changed to black, a change that was accompanied by a substantial decrease in the proportion of students who did not respond to this item. As shown in the figures below, the percentage of students who did not respond to this item decreased from 7.9 per cent in 1968 to 4.2 per cent in 1969. The decrease in the proportion of non-respondents raised the per cent of white respondents from 77.5 per cent in 1968 to 80.8 per cent in 1969, but the per cent of black and "other" respondents remained virtually the same as in 1968.

<u>Race</u>	<u>1968</u>	<u>1969</u>
White	77.5	80.8
Black	14.4	14.7
Other race	.2	.3
Blank, invalid	7.9	4.2
	<u>100.0</u>	<u>100.0</u>

Although the above results do not support the assumption that blank and invalid responses are proportionately distributed among the three races, the assumption still merits consideration. If such an assumption is accepted, the population can be considered as approximately 84.4 per cent white, 15.3 per cent black and .3 per cent other race.

Sex: The figures below indicate the male-female ratio for students responding to the questionnaire in 1968 and 1969. There is very little change in the per cents of respondents, when grouped according to race and sex, from 1968 to 1969. Although both the white and black races had higher proportions of females than males, there was a greater difference in the

<u>Race</u>	<u>M</u>	<u>F</u>	<u>1968</u>		<u>Total</u> <u>%</u>	<u>M</u>	<u>F</u>	<u>1969</u>	
			<u>Blank</u> <u>Invalid</u>	<u>Total</u> <u>%</u>				<u>Blank</u> <u>Invalid</u>	<u>Total</u> <u>%</u>
White	48.3	50.9	.8	100.0	48.8	50.1	1.1	100.0	
Black	46.5	50.8	2.6	99.9	46.0	51.8	2.2	100.0	
Other	51.4	44.6	4.0	100.0	51.7	42.2	6.1	100.0	
Total	44.7	47.3	8.0	100.0	46.7	48.5	4.8	100.0	

male-female per cents for black students than for white students. Assuming that the male-female birth ratios are equal for black and whites, it appears that, for the black students, proportionately more females than males reach the senior year in high school. Conversely, the result for other races (American Indian, Chinese, etc.) reveals that the male seniors outnumber the female seniors.

Comparison of 1968 and 1969 Results: The completion of the second administration of the survey instrument permits an initial attempt to establish trends in post-high school plans of Florida high school seniors. The comparison of general categories of post-high school plans by race, is shown below. For the population as a whole, the difference in post-high school plans reported by the students from one year to the next was slight. The proportion of white students planning to attend college decreased from 68.3 per cent in 1968 to 67.7 per cent in 1969. For the black students the proportion increased one per cent from 59.1 per cent to 60.1 per cent. In 1969, 66.4 per cent of the total population reported plans to attend college on a full- or part-time basis; in 1968, the comparative figure was 66.6. Such differences were so small that it can be said that there were no significant changes in the general post-high school plans of Florida high school seniors between the years 1968 and 1969.

<u>Post-High School Plans</u>	<u>1968</u>			<u>1969</u>		
	<u>White</u>	<u>Black</u>	<u>Total</u>	<u>White</u>	<u>Black</u>	<u>Total</u>
Full-time College	57.3	45.8	55.0	55.9	45.3	54.0
Part-time College	11.0	13.3	11.6	11.8	14.8	12.4
No College	17.7	18.5	18.0	17.5	17.8	17.7
Undecided	14.0	22.5	15.4	14.7	22.1	15.9
	<u>100.0</u>	<u>100.1</u>	<u>100.0</u>	<u>99.9</u>	<u>100.0</u>	<u>100.0</u>

When a comparison of the results over the two-year span was made on the basis of sex and race, the differences remained small. In 1969, the per cent of white males planning on full- or part-time college totaled 73.4. In 1968, the comparable figure was 74.0 per cent. In 1969, for white females, the per cent headed for college was 62.4, and for black females was 62.0. In 1968, the per cent for white females was 63.1 and for black females was 60.4. In both years, for white students, a substantially higher per cent of males than females reported plans for college, but for black students, more females cited an intention to enter college. Also in both years, a larger per cent of black males than black females reported themselves to be uncertain about their college plans. This difference did not exist among white students in either 1968 or 1969.

1969 Survey Results

<u>Post-High School Plans</u>	<u>M</u>	<u>White</u>		<u>M</u>	<u>Black</u>	
		<u>F</u>	<u>Total</u>		<u>F</u>	<u>Total</u>
Full-time College	60.8	51.3	55.9	43.4	47.5	45.3
Part-time College	12.6	11.1	11.8	15.2	14.5	14.8
No College	11.9	23.0	17.5	15.8	19.7	17.8
Undecided	14.7	14.6	14.7	25.6	18.3	22.1
	<u>100.0</u>	<u>100.0</u>	<u>99.9</u>	<u>100.0</u>	<u>100.0</u>	<u>100.0</u>

The types of institutions that the students in the 1969 survey indicated that they planned to enter are shown by the figures immediately following. When the respondents were grouped by race and by sex, the results revealed that the public two-year colleges have less of an appeal for black students, male and female, than for white students, male and female. The 1968 data

indicated the same finding; that public colleges are more favored by white students than by black students.

1969 Survey Results

Type of In-State Institutions to be Entered	White		Black		Total	
	<u>M</u>	<u>F</u>	<u>M</u>	<u>F</u>	<u>M</u>	<u>F</u>
<u>In-State</u>						
Public Universities	26.2	23.6	28.5	24.0	26.4	23.6
Private 4-Year	6.2	6.6	9.5	11.3	6.6	7.3
Public Jr. College	46.6	48.3	32.8	36.9	44.9	46.6
Private Jr. College	.7	1.2	.7	1.0	.7	1.1
<u>Out-of-State</u>						
Institutions of All Types	18.4	18.3	23.7	22.9	19.2	19.1
No Response, Invalid	1.8	2.0	5.0	4.0	2.2	2.4
	<u>99.9</u>	<u>100.0</u>	<u>100.2</u>	<u>100.1</u>	<u>100.0</u>	<u>100.1</u>

A further comparison between the two years was made to review the proportion of college-bound students planning to enter a particular type of institution. Comparisons between the two years for the total population, when the respondents were grouped by race, indicate that very small changes occurred in the per cents planning to enter state universities in Florida, public junior colleges, etc. With one exception, none of the comparisons reflected a change of more than one per cent. The exception was an increase from 24.6 per cent in 1968 to 26.0 per cent in 1969 in the proportion of black students who planned to attend a state university in Florida.

Type of Institution to be Entered	1968			1969		
	<u>White</u>	<u>Black</u>	<u>Total</u>	<u>White</u>	<u>Black</u>	<u>Total</u>
State University	24.5	24.6	24.2	25.0	26.0	25.0
Private 4-Year	6.3	11.3	7.0	6.4	10.4	6.9
Public J.C.	46.8	34.7	45.6	47.4	35.0	45.8
Private J.C.	1.3	1.0	1.3	.9	.9	.9
Out-of-State	19.1	23.5	19.5	18.4	23.2	19.1
No Response, Invalid	<u>2.0</u>	<u>4.9</u>	<u>2.5</u>	<u>2.0</u>	<u>4.5</u>	<u>2.4</u>
	100.0	100.0	100.1	100.1	100.0	100.1

The data cited above show that 19.1 per cent of the 1969 respondents cited an intention to attend a college or university out-of-state. The per cent is almost identical to the 19.5 per cent of 1968 respondents reporting out-of-state plans. The types of out-of-state institutions

selected by the 1969 respondents grouped according to sex and race are shown below. As will be noted, the out-of-state public four-year institutions were preferred by black students, while the white students were attracted by both the public and private four-year institutions. The 1968 results were very similar to the 1969 results to this item.

1969 Survey Results

<u>Type of Out-of-State Institutions to be Entered</u>						
<u>Out-of-State</u>						
Jr. College	6.3	9.5	4.9	5.8	6.2	8.8
Private 4-Year	36.2	44.1	14.8	19.4	33.0	39.3
Public 4-Year	44.6	39.3	68.6	62.6	48.0	43.9
Military Academy	8.3	.0	2.5	.5	7.5	.1
Foreign Institution	1.4	2.0	.6	.6	1.3	1.7
Other Institution	2.0	4.1	4.0	6.8	2.3	4.6
No Response, Invalid	1.3	1.1	4.7	4.4	1.8	1.7
	<u>100.1</u>	<u>100.1</u>	<u>100.1</u>	<u>100.1</u>	<u>100.1</u>	<u>100.1</u>

Intended Plans versus Actual Courses of Action: Students who responded to the fall, 1969 survey did not enter college until the fall of 1970. At the time this report was written, no follow-up data reflecting the courses of action taken by the fall, 1969 respondents were available. A comparison can be made, however, between the intended plans of the fall, 1968 respondents and follow-up information for this class of graduates compiled by the Bureau of Research, Department of Education.¹

A significant proportion of Florida high school seniors who graduated in June of 1969 and who reported earlier that they planned to attend college failed to implement their intended plans. According to the 1968 survey (the students surveyed in the fall of 1968 were the June, 1969 graduates) over 66 per cent of the students reported definite plans to attend college, 18.0 per cent said "no", and 15.4 per cent were undecided. Actual follow-up data revealed that 57.4 per cent of the respondents entered college. Although

¹Florida High School Graduates, Bureau of Research, Department of Education, Tallahassee, Report 81.

only 18 per cent of the respondents said they were not going to attend college immediately upon high school graduation, actually, 42.6 per cent interrupted their education upon graduation from high school.

The contrast between the number of students who said they were not going to college (18 per cent of the June, 1969 graduates) and the number who actually did not attend (42.6 per cent) requires a close look. The 42 per cent figure can be accounted for if the students who reported that they were not college-bound, those who reported themselves to be undecided, and those who said they were going to college but who failed to carry out these plans (9 per cent) are totaled. Apparently, all or nearly all of the "no" students and the undecided did not attend. Also, about one student out of every ten of the students reporting themselves as college-bound subsequently did not enroll in college.

The data below show the differences in the per cents of students planning to enter the various types of institutions. As the data reveal, there was no shrinkage in the number of students stating an intention to enter a public junior college and who at a later date actually followed such a course of action.

<u>Type of Institution</u>	<u>Seniors - Fall 1968</u> <u>Plans</u>	<u>Graduates - Spring 1969</u> <u>Actual</u>
State University System	16.4	11.9
Private 4-Year	4.7	3.6
Public J.C.	30.9	31.1
Private J.C.	.9	.7
Out-of-State	13.2	10.1
No College	18.3	42.6
Undecided	15.7	
	<u>100.0</u>	<u>100.0</u>

Non-College Bound Respondents: In this section the responses of students who said that they were not going to college or were uncertain about entering college will be reviewed.

When non-college bound students were asked to give their main reasons for not planning to enter college, a larger per cent of black students than white gave "lack of money" as the chief reason for not planning for college. Lack of encouragement from home did not seem to be a deterring factor with either race. A substantial number of students of both races, male and female alike, chose to mark "other reason" instead of one of the specific reasons contained in the questionnaire item. The responses of the students in the 1969 survey to the item, which were generally similar to the responses of students in 1968, were as follows:

1969 Survey Results

	<u>White</u>		<u>Black</u>		<u>Total</u>

In contrast to the patterns of college plans, the non-college plans of Florida high school seniors reflected substantial changes from 1968 to 1969. The figures below indicate the proportion of non-college bound students who were planning specified types of non-college activities. These figures reveal that the proportion of the total population planning to work full-time after high school increased from 22.5 per cent in 1968 to 28.8 per cent in 1969. If the students actually implement these plans, an increase of approximately 5,000 job seekers will be added to the employment market in the fall of 1970.

It is known that some high school graduates defer their entry into college for several years instead of entering "immediately after graduation." On one of the survey items, students who were not planning to enter college immediately were asked whether or not they planned to attend college later. The responses of students in 1969 to this item were similar to 1968 responses. A larger proportion of black students than white students and a larger proportion of white males than white females plan to attend college later.

Other, no response	31.7	24.8	31.5	25.4	32.0	25.0
	<u>100.1</u>	<u>100.0</u>	<u>100.0</u>	<u>100.2</u>	<u>100.2</u>	<u>100.0</u>

responses summarized on the preceding page show that large percentages of "still uncertain" and "other reason" responses indicate that a majority of these students were either not able to specify a particular reason for their indecision or did not find the appropriate reason cited in the survey questionnaire. The major difference between white and black students occurred with the "uncertain about finances" response. A substantially higher proportion of black students cited finances as the primary basis for their uncertainty about attending college at a later date.

4. Student Going Out-of-State and Remaining in Florida for Higher Education

The final section of this report compares the test performance of students planning to attend an in-state college or university with that of students planning to attend an out-of-state institution.

In recent years, Florida educators and laymen have noted that a substantial number of academically superior students annually leave the state to attend out-of-state colleges. Among the reasons which have been proposed to account for such a migration are: attractive scholarships offered to academically talented students by out-of-state institutions, the prestige associated with many of the selected out-of-state institutions, and the strong academic reputation associated with selected out-of-state institutions and with programs of study within these institutions.

The survey data provide a basis upon which the academic ability of Florida students planning to attend an out-of-state college can be compared to those planning to remain in state. The data used for this comparison were scores on the Florida Twelfth Grade Test (FTGT) and statements of college plans provided by the survey questionnaire. Test data and survey plans, recorded on separate tapes, were matched on the basis of social security numbers. Inasmuch as some students did not record their social

security number accurately on both the tests and the survey, the number of students in the analysis was reduced to approximately 40,000 or approximately 73.9 per cent of the total number of students who reported plans for college.

The figures in Table 1 show the quintile levels of the FTGT scores of students planning to attend in-state and out-of-state institutions. The percentage columns in the table indicate the proportion of college-bound students in each quintile who plan to attend in-state institutions and the proportion who plan to attend out-of-state institutions. For example, on the aptitude battery of the FTGT, 5,796 students who reported plans to go to college (4,939 in-state and 857 out-of-state) were in the lowest quintile for that battery. These frequencies, expressed in percentage terms, were 85.2 and 14.8 respectively.

TABLE 1: Frequencies of Students Intending to go In-State and Out-of-State, Grouped According to Quintiles: Aptitude Test

Quintile	In-State		Out-of-State		Total
	f	%	f	%	
1-20	4,939	85.2	857	14.8	5,796
21-40	5,260	85.2	911	14.8	6,171
41-60	6,414	84.7	1,156	15.3	7,570
61-80	7,760	82.8	1,617	17.2	9,377
81-100	8,237	73.5	2,967	26.5	11,204
	<u>32,610</u>		<u>7,508</u>		<u>40,118</u>

TABLE 2: Frequencies of Students Intending to go In-State and Out-of-State, Grouped According to Quintiles: English

Quintile	In-State		Out-of-State		Total
	f	%	f	%	
1-20	5,305	85.3	914	14.7	6,219
21-40	5,619	85.1	981	14.9	6,600
41-60	6,922	84.9	1,231	15.1	8,153
61-80	6,855	82.0	1,502	18.0	8,357
81-100	7,901	73.3	2,880	26.7	10,781
	<u>32,602</u>		<u>7,508</u>		<u>40,110</u>

The figures in Tables 1 through 6 indicate that students with higher academic ability and higher classroom achievement levels (as measured by the FTGT) are more likely to plan on college attendance than students with lower test performance. There are, however, substantial numbers of students in all quintiles who plan to attend college. The figures also indicate that attending an out-of-state institution does have an appeal for students of higher academic potential. For example, as one moves from the lowest to the highest quintile, the proportion of students planning to attend out-of-state institutions increases, with the greatest increase taking place in the highest quintile.

TABLE 3: Frequencies of Students Intending to go In-State and Out-of-State, Grouped According to Quintiles: Social Studies

Quintile	In-State		Out-of-State		Total
	f	%	f	%

	<u>32,519</u>		<u>7,491</u>		<u>40,010</u>

TABLE 6: Frequencies of Students Intending to go In-State and Out-of-State, Grouped According to Quintiles: Reading Index

Quintile	In-State		Out-of-State		Total
	f	%	f	%	
1-20	4,904	85.1	861	14.9	5,765
21-40	5,537	86.0	899	14.0	6,436
41-60	6,284	85.0	1,108	15.0	7,392
61-80	8,344	83.4	1,656	16.6	10,000
81-100	7,462	71.5	2,980	28.5	10,432
	<u>32,531</u>		<u>7,494</u>		<u>40,025</u>

Even though the proportion of students who planned to attend an out-of-state institution is higher in the top quintile (81-100) than in the lower quintiles, it appears that Florida institutions are attractive for a substantial majority of students at all levels of ability. In the top quintile for all the sub-batteries at least 71.5 per cent of the students plan to remain in Florida for their higher education (Tables 1 through 6).

The figures below show the plans of students who scored between the 95th and 99th percentiles on each of the sub-batteries. Of the students in this highest level of ability who planned to attend college, approximately two-thirds planned to remain in Florida for their higher education and one-third planned to go out-of-state.

TABLE 7: Frequencies of Students Intending to go In-State and Out-of-State: 95-99 Percentile

Test	In-State		Out-of-State		Total
	f	%	f	%	f
Aptitude Test	2,109	63.2	1,229	36.8	3,338
English	2,197	67.2	1,075	32.8	3,272
Social Studies	2,136	66.7	1,068	32.3	3,204
Natural Science	2,324	68.4	1,072	31.6	3,396
Math	2,189	64.5	1,203	35.5	3,392
Reading Index	1,921	62.9	1,134	37.1	3,055

In conclusion, it must be remembered that the above in-state, out-of-state patterns were based on statements of plans and will undoubtedly be modified by the actual admissions process and other factors. The degree to which students with different academic ability implement their stated plans will be documented in projected follow-up studies.

In preceding sections of the report, selected findings based on the survey data have been discussed. The narrative portion of this report, however, was not intended to cover the full-range of the survey data; such coverage would have necessitated a much longer report.

In the statistical summary section, which follows immediately, statewide analyses of the data, by race, by sex, and by intended plans (in-state or out-of-state) are presented. Access to these statewide compilations gives the reader an opportunity to establish additional findings, make his own inferences, and draw his own conclusions, thereby extending the range of the findings and conclusions set forth in the narrative part of the report.

The following pages containing the statistical data were reproduced using computer printouts as the master copies. Although this procedure saved time and money, it did not produce, at least in this instance, the clear-cut copy that we had hoped to obtain. The pages generally are legible, but unfortunately so only within a wide instead of a narrow tolerance band of defined legibility.

6. Summary and Conclusions

In the fall of 1969 approximately two-thirds of the seniors in Florida public and private high schools indicated that they planned to attend (either full-time or part-time) a college or university upon graduation from high school. Approximately 16 per cent of the students reported that they were still undecided about college and another 1.6 per cent reported plans to attend college at a later date. This pattern of post-high school plans was essentially the same as those reported by Florida students in the fall of 1968.

More white students (67.7 per cent) than black students (60.1 per cent) reported plans to attend college on a full-time or part-time basis and more black students (22.1 per cent) than white students (14.7 per cent) reported that they were undecided. State universities in Florida were equally attractive to white and black students but the public junior colleges were more attractive to white students than for black students. These findings were generally similar to the 1969 survey results.

The most significant difference between the 1968 and 1969 data related to the post-high school plans of the students who said they were not going to college. The per cent of students in 1969 who reported an intention to enter work full-time exceeded 28 per cent, an increase of about seven per cent over the previous year.

Although the actual courses of action to be followed by the students who participated in the 1969 survey (and who graduated from high school in June, 1970) were unknown at the time this report was written, a review of the intended plans of the graduates of June, 1969, together with follow-up data for the same class of students, showed that student expectations do not precisely coincide with post-high school implementation of plans. For

example, approximately 10 per cent of the students who classified themselves in 1968 as college-bound did not enter college in the fall of 1969.

There is a pressing educational and social need to study the variance between high school expectations and subsequent courses of action. This research might possibly be conducted along the following lines of inquiry:

1. The characteristics (sex, race, and academic ability) of high school seniors in Florida whose aspirations for a higher education are not being realized
2. A determination whether students who have no plans for college study are spread uniformly through the ranks of seniors when the students are grouped according to sex, race, and academic ability, or bunched within a specific classification
3. Identification of the factors associated with the action of high school students in classifying themselves as college-bound during their senior year but abandoning their plans for a college education upon graduation from high school.

An initial study along the lines described above is being undertaken in the Office of the Board of Regents. It is hoped that this needed area of research will also attract high school guidance counselors, institutional research officers in the colleges and universities, and research personnel in the Department of Education.

The survey data provided a basis for determining more precisely the tendency of some students with high academic ability to leave Florida for their college work. By no means, however, is Florida losing all of its students of high academic promise. Of the students in the highest quintile

on the Florida Statewide Twelfth Grade Tests who reported themselves to be college-bound, approximately 73 per cent planned to enter a college or university in Florida, in contrast to 27 per cent who planned to leave Florida for their college study. Students of lesser academic potential are inclined to report that they will select a Florida institution. Approximately 85 per cent of the students in the first four quintiles who classified themselves as future college students named an institution in Florida as the college or university of their choice.
