IDENTIFIERS Kropp Verner Attitude Scale, *Tennessee

ABSTRACT

An evaluation was made of the Tennessee Adult Basic Education Supervisors' Conference, held at Memphis State University, Memphis, Tennessee in August, 1970. Data were gathered from the 52 local supervisors in attendance by use of a questionnaire designed to obtain demographic data and participant reactions. The Kropp-Verner Attitude Scale was used for measuring the overall effectiveness of the conference. Inferential statistics and hypotheses were deleted from the study; only arithmetic means and frequency tables employing percentages were used. The profile of a Tennessee adult basic education supervisor is that of a male, 35 or older, having a Master's degree, with two or more years teaching experience in adult basic education and two or more years as supervisor, and with more than 10 years of experience in public school work at the secondary level. Responses to the evaluative items in the questionnaire showed that the conference was considered to be very successful; the Kropp-Verner Scale supported this. It is recommended that these conferences be continued at least annually. The same methodology should be employed (joint planning by local supervisors, State Department staff, and university personnel) to ensure that the total needs of the State are met. (For program content, see AC 008 846.) (EB)

PREFACE

The Tennessee Adult Basic Education Supervisors' Conference was a joint effort of Memphis State University, Southern Regional Education Board, Tennessee State Department of Education, and Title I of the Higher Education Act.

In addition to the basic data contained in the body of the study, Appendix D contains various tables relative to the comparison of certain characteristics of the participants and their reactions to the evaluative statements in the questionnaire. No discussion is presented relative to these; they are included only as a matter of interest. The numerical responses to each category in these tables were excluded due to lack of space; all numbers represent percentages.

No information is included in this publication relative to program content as this will be forthcoming in another document.

The writers are indeed grateful to Mr. Bob Tvedt and his associates, Memphis State University Computer Center, for their assistance in handling the data and to Mrs. Linda Balentine, Adult Education Stenographer, Memphis State University, for typing the study.

CHAPTER I

INTRODUCTION

Background

Several years ago, the State Department of Education Directors of Adult Basic Education in the Southeastern Region formulated the concept of a Southern Regional Teacher-Training Program.¹ A proposal was submitted to the U. S. Office of Education, and it was funded to the Southern Regional Education Board. The funded project has several components, one of which is in-service training. Tennessee has, in addition to providing local in-service for adult basic education personnel, been active in providing these same services on a state-wide basis.

As a consequence of methodical planning between the State staff, university personnel, and local supervisors, one of the activities recommended was to convene a Tennessee Adult Basic Education Supervisors' Conference.

A planning committee was appointed, and a decision was made to hold the conference at Memphis State University, August 10-12, 1970. Based on the needs of local supervisors as suggested to the planning committee, the objectives of the conference were for the participants to:

1. Understand the purpose of the adult basic education program from both federal and state levels.

¹At this time, the Southeastern Region included the States of Alabama, Florida, Georgia, Mississippi, South Carolina, and Tennessee. As of July 1, 1970, Kentucky and North Carolina were added.

2. Understand the guidelines and plans, both federal and state, under which local supervisors have to operate.
3. Understand the Southern Regional concept of teacher-training as administered by the Southern Regional Education Board.
4. Understand the concept of teacher-training within the State of Tennessee, both academic and non-academic.
5. Become familiar with the results of the Tennessee State Evaluation in adult basic education conducted recently by Memphis State University.
6. Understand the financial system under which local adult basic education programs must operate.
7. Understand the concept of curriculum development in adult basic education.
8. Understand the "roles" of local supervisors in administering adult basic education programs.

Purpose of the Study

Short-term educational activities are constantly being planned by State and local adult basic education staff in cooperation with university personnel. In order to provide a sound basis for future planning, evaluation of these sessions must become a key component. The purpose of this study was to determine the overall effectiveness of the educational experiences provided at the Tennessee Adult Basic Education Supervisors' Conference held at Memphis State University, August 10-12, 1970.

Methodology

Source of Data

The population used in this study was the local adult basic education supervisors attending the conference. The responsibility for recruitment was assigned to the State Department of Education's Adult

Education Staff--Charles Bates, Luke Easter, Billy Glover, Charles Holt, and Charles Kerr. Sixty-six persons attended the conference, including staff and consultants. However, only fifty-two were local supervisors, and data for this study were collected on this group.

Collection of Data

Two instruments were used to collect the data for this study. The first was a questionnaire designed to obtain demographic data and participant reactions to various facets of the conference.

The second instrument was an evaluation scale developed by Russell Kropp and Coolie Verner.² According to its authors, it appears to be a valid instrument for obtaining overall participant reaction to a short-term workshop or conference. The scale consists of twenty items arranged in rank order of value, with item number one being the best thing that could be checked, item number two, the second best, and so on, with item number twenty, the least favorable response.

The instruments were administered by the writers. The data obtained were then coded, punched on data processing cards, and analyzed using the facilities of the Memphis State University Computer Center.

Statistical Technique

It was not the intent of the writers to make any generalizations to a broader population; therefore, no inferential statistics were used.

²Russell Kropp and Coolie Verner, "An Attitude Scale Technique for Evaluating Meetings," Adult Education, Volume VII, No. 4 (Summer, 1957), pp. 212-215.

Only arithmetical means and the use of frequency tables with percentage responses were employed.

Hypotheses

In the absence of any attempt to generalize to a broader population and the deletion of any statistical technique designed to test significant differences between variables, no hypotheses were formulated.

CHAPTER II

PRESENTATION OF DATA BY ITEM

The purpose of this chapter is to present the results of the responses to the items in the questionnaire and to the Kropp-Verner Scale. It will consist of the following sections:

1. Profile of the participants.
2. Reactions to evaluative items in the questionnaire.
3. Interest in topics covered and effectiveness of speakers.
4. Overall evaluation as measured by the Kropp-Verner Scale.

Profile of Participants

In studying the profile of the participants, it was found that:

1. There were more males than females (71.1 to 28.9 per cent).
2. Most of the participants were 35 years of age or more as opposed to under 35 years of age (89.5 to 10.5 per cent).
3. A majority of the participants possessed master's degrees (57.9 per cent as opposed to 42.1 per cent with less than a master's degree).
4. A majority of the participants had more than two years of actual teaching experience in adult basic education (57.9 per cent). This declined to 31.6 per cent for those with less than one year of experience and 10.5 per cent for those with one to two years of experience.
5. Most of the participants had more than two years of experience as a local supervisor of adult basic education (73.7 per cent). This declined to 15.8 per cent for those with one to two years experience and 10.5 per cent for those with less than one year of experience.
6. Most of the participants possessed more than ten years experience in public school work other than adult basic education (76.3 per

cent). This declined to 18.4 per cent for those with two to ten years and 5.3 per cent for those with less than two years.

7. A majority of the participants possessed this previous experience primarily in secondary education (52.6 per cent). This declined to 39.5 per cent for elementary education and 7.9 per cent for the "Other" category.
8. The place of employment of the participants was as follows: West Tennessee, 21 per cent; Middle Tennessee, 39.5 per cent; and East Tennessee, 39.5 per cent.

Reactions to Evaluative Items in the Questionnaire

This section of the questionnaire was divided into three components--physical facilities, objectives, and program. The format of this portion of the study will reflect these categories. These reactions were weighted numerically, and then arithmetic means were calculated, based on the following scale:

- 5 = Strongly agree
- 4 = Agree
- 3 = Undecided
- 2 = Disagree
- 1 = Strongly disagree

Physical Facilities

Table 1 presents a list of statements relative to physical facilities provided and the mean value each received.

TABLE 1
DEGREE OF AGREEMENT WITH PHYSICAL FACILITIES

Item	Mean Value
1. Adequate space was provided for large group meetings.	4.53
2. Adequate space was provided for small group discussions.	4.55
3. The accommodations for the participants were adequate.	4.61

As indicated by Table 1, the participants reacted favorably to the physical facilities provided for the conference. Out of a maximum rating of 5, all three items had a mean score of 4.53 or better.

Objectives

Table 2 presents a list of the statements relative to the objectives of the conference and the mean value each received.

TABLE 2
DEGREE OF AGREEMENT WITH OBJECTIVES

Item	Mean Value
1. The objectives of the conference were relevant to the needs of the participants.	4.24
2. The objectives of the conference were clearly defined to the participants.	4.29

As indicated by Table 2, the participants reacted favorably to statements relative to the objectives of the conference. Out of a maximum rating of 5, all of the items had a mean score of 4.05 or better, except for one which pertained to lack of time available for adequate accomplishment of objectives.

TABLE 2--Continued

Item	Mean Value
3. The participants had an opportunity to contribute to the development of the content and objectives of the conference.	4.05
4. Adequate time was available for the objectives of the conference to be realized.	3.84

Program

Table 3 presents a list of the statements relative to the program of the conference and the mean value each received.

TABLE 3
DEGREE OF AGREEMENT WITH PROGRAM OPERATIONS

Item	Mean Value
1. The content of the conference was relevant to my needs.	4.21
2. The program of the conference was in line with the stated objectives.	4.39

As indicated by Table 3, the participants reacted favorably to statements relative to program operations. Out of a possible maximum score of 5, all of the items received a mean score of 4.16 or better.

TABLE 3--Continued

Item	Mean Value
3. Adequate lines of communication were established between staff and participants.	4.27
4. The content of the conference was such that it answered questions that concerned me relative to my job.	4.16
5. As a result of the conference, I feel that I will now be better able to perform my job more satisfactorily.	4.18
6. My overall rating of the conference is: ¹	4.37

Interest in Topics Covered and Effectiveness of Speakers

This section of the questionnaire was devoted to ascertaining the interest the participants had in the topics covered at the conference and the effectiveness they attributed to the speakers. The responses to the topics and speakers were numerically weighted and arithmetic means

¹Derivation of the mean score for this item was based on the following scale:

- 5 = Very high
- 4 = High
- 3 = Medium
- 2 = Low
- 1 = Very low

were computed, based on the following scale:

5 = Very high

4 = High

3 = Medium

2 = Low

1 = Very low

Table 4 presents a list of the topics and speakers and the mean value each received.

TABLE 4
RATINGS OF TOPICS COVERED AND SPEAKERS AT CONFERENCE

Topic	Mean Value	Speaker	Mean Value
Administrative Matters	4.47	Kerr	4.37
SREB Program	3.97	Brown	3.95
Tennessee Regional Concept of Teacher-Training	4.24	Kerr	4.16
MSU Adult Education Program	4.13	Dutton...	4.24
TSU Adult Education Program	3.82	Farrell	3.89
UT Adult Education Program	4.21	Peters	4.00
Role of Local Supervisors	4.18	Seaman	4.29
Planning Local In-Service	3.97	Peters	3.84
State Evaluation	4.08	Bellott	4.16
Finance	4.50	Kerr	4.24
Curriculum and Materials	4.47	Fowler	4.53

As indicated by Table 4, the interest expressed by the participants in the topics was favorable. Only three of the topics received mean ratings below 4.00, and these closely approximated that score--two were 3.97 and one was 3.82.

As for the ratings received by the speakers, all received mean scores of 4.00 or better except for three, and the lowest of these was 3.84.

Overall Evaluation as Measured by the Kropp-Verner Scale

The participants were asked to rate the overall effectiveness of the workshop as measured by the Kropp-Verner Attitude Scale. The participants were requested to read the twenty items on the scale and to check only those that best described their reaction toward the workshop. The ratings of the participants were analyzed, and the obtained weighted mean, according to values on the Kropp-Verner Scale, was 3.28. The most positive value possible is 1.13, and the most negative value is 10.89, with a median value of 6.02. A mean rating of 3.28 placed the overall rating of the conference between items 4 and 5 on the scale, which means that there were 15 less favorable items below the mean rating but only 4 more favorable ones above.

CHAPTER III

SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS

Background

The purpose of this study was to ascertain the overall effectiveness of the Tennessee Adult Basic Education Supervisors' Conference. The conference was held at Memphis State University, Memphis, Tennessee, August 10-12, 1970.

Methodology

The data used in this study was obtained from the fifty-two local adult basic education supervisors attending the conference. A questionnaire was developed to obtain the information needed. This was supplemented by the use of the Kropp-Verner Attitude Scale for measuring the overall effectiveness of the workshop. The data were analyzed using the facilities of the Memphis State University Computer Center.

No generalizations to a broader population were planned; therefore, inferential statistics and hypotheses were deleted from the study. Only arithmetic means and frequency tables employing percentages were utilized.

Findings

In general, the profile of a Tennessee adult basic education supervisor is that of a male, 35 years of age or older, possessing a master's degree, possessing two or more years of actual teaching experience

in adult basic education, possessing more than two years of experience as a local supervisor of adult basic education, possessing more than ten years of experience in public school work other than adult basic education, and possessing this previous experience primarily in secondary education.

Relative to a summary of the evaluative items in the questionnaire, it was found that:¹

1. The mean score of items designed to ascertain the degree of satisfaction with physical facilities provided was 4.56.
2. The mean score of items designed to ascertain the degree of satisfaction with objectives of the conference was 4.11.
3. The mean score of items designed to ascertain the degree of satisfaction with program content and operation was 4.26.
4. The mean score of items designed to ascertain the degree of interest in the topics covered was 4.19.
5. The mean score of items designed to ascertain the degree of effectiveness of the speakers at the conference was 4.15.
6. The overall value of the conference as measured by the Kropp-Verner Scale was 3.28.²

Conclusions

Based on the data presented in this study, the writers would

¹The mean scores for these items were obtained using one or the other of the following scales:

5 = Strongly agree
 4 = Agree
 3 = Undecided
 2 = Disagree
 1 = Strongly disagree

5 = Very high
 4 = High
 3 = Medium
 2 = Low
 1 = Very low

²This score was not based on one or the other of the two scales listed under footnote number one. This one was based on a scale devised by Kropp and Verner, whereby the most positive score available is 1.13 and the most negative score possible is 10.89; thus, the lower the score, the better the rating.

conclude that the conference was very successful. The responses to the evaluative items in the questionnaire were heavily skewed to the positive side. If all of the scores for all evaluative items in the questionnaire were combined, the mean score for the conference was 4.21 out of a range of one to five, with five being a perfect positive score.

Supporting this conclusion also was the overall rating as measured by the Kripp-Varner Attitude Scale. This scale has a potential most positive value of 1.13 and most negative value of 10.89, with a median value of 6.02. With this as a base from which to judge, the overall weighted mean of the value of the conference, according to participant ratings, was 3.28 which is well on the positive side of the median.

Another index for supporting this conclusion would be the results of the singular item in the questionnaire asking the participants to rate the overall effectiveness of the conference from very high to very low. The mean score for this item was 4.37.³

A final index supporting this conclusion are the written comments in Appendix A.

Recommendations

All but one of the total number of participants recommended that additional state-wide conferences for local adult basic education . .

³Based on the following scale:
5 = Very high
4 = High
3 = Medium
2 = Low
1 = Very low

supervisors be conducted.⁴ Consequently, it is strongly recommended that this type of activity be continued at least annually. The same methodology should be employed as was the case this time, mainly that of joint planning by local supervisors, State Department staff, and university personnel, to ensure that the total needs of the State are met.

⁴For a list of participant recommended topics for future state-wide conferences, see Appendix C.

APPENDICES

APPENDIX A

STRENGTHS OF CONFERENCE*

1. Everything was well planned and organized (seven responses of this type).
2. Consultants were appropriate.
3. It was very helpful.
4. Problems and questions of supervisors were answered; particularly their roles and how to interpret forms and budgeting problems (four responses of this type).
5. The practicums and interchange that was available.
6. Conveniences and program personnel were cooperative (three responses of this type).
7. It brought us up-to-date on current guidelines, reports, and the latest in materials and methods.
8. Better understanding of the role of SREB.
9. I now have a better understanding of the ABE program in Tennessee and how I can improve the program in my county.
10. Fellowship with colleagues was good.
11. Content was excellent.
12. Keeping content in line with needs.
13. The chance for local supervisors to be able to express themselves and to obtain an understanding of the overall ABE program.
14. Program was well coordinated, consultants well prepared, and the information was pertinent to our needs (four responses of this type).
15. Obtaining specific information from those responsible for administering the program.
16. High interest was created and maintained.

*These were typed directly from the evaluation forms with little or no editorial revisions.

17. Overall, there was excellent participation among those present.
18. Unity and organization of program.
19. It met the objectives in so far as time permitted; social life was good also.
20. Facilities were excellent (four responses of this type).
21. The outlook for teacher-training programs was rewarding.

APPENDIX B

WEAKNESSES OF CONFERENCE*

1. Lack of time (nine responses of this type).
2. More small group discussions (two responses of this type).
3. The sectional meetings could have been mixed at some point to give information from other sections.
4. Some meetings were too long.
5. Too much time for each speaker.
6. None.
7. Materials for conference should have reached participants sooner for pre-conference study and the identification of needs.
8. I feel that we should be remunerated at the rate of \$5 per hour for time spent in the meetings, as well as our other expenses. Too much time spent on irrelative, dialectic matters.
9. Not enough time allocated to curriculum matters.

*These were typed directly from the questionnaires with little or no editorial revisions.

APPENDIX C

POTENTIAL TOPICS FOR FUTURE DISCUSSION

1. Curriculum planning (ten responses of this type).
2. Selection of adequate materials and the development of a materials center (nine responses of this type).
3. Teacher-training programs at the college level.
4. Recruitment (three responses of this type).
5. Future for ABE as now covered under new federal law.
6. Extension of topics presented at this conference, particularly finance, forms, etc.--keep us up-to-date (six responses of this type).
7. Inform the superintendents.
8. Reading.
9. Recruitment of teachers.
10. Selling program to local community.
11. Job description for teacher-supervisors.
12. How to help teachers to better understand students and their reasons for attending class.
13. Teacher-training.
14. The topics should be determined at a later date.
15. In-service training in human relations and problem-solving for teachers.
16. More information from actual teachers or students.

APPENDIX D

TABLE 5.--The association of selected characteristics of adult basic education supervisory personnel and whether they felt that adequate space was provided for large group meetings
