ABSTRACT

Designed for the teacher of intermediate level educable mentally retarded children, inservice training materials on family and home are outlined. Units (citing objectives, activities, material, and experience charts) deal with such topics as parental occupations, responsibilities at home, sex education, home furnishings, health habits, clothing, safety, transportation, leisure time activities, and the community. General objectives of the program, core areas of concentration, resource materials, and a vocabulary list are also included in the manual. (CD)

FAMILY AND HOME

Intermediate Level

Preliminary Steps

I. Selection of Unit: FAMILY AND HOME

Why are you including this unit in your curriculum?

Slow learners as a group will become home owners, parents, and homemakers regardless of how adequate they are. Many retarded children will come from homes where low standards of homemaking and family living exist. Often these homes will not provide the training necessary for developing effective homemakers. Therefore, equipping the mentally retarded with the skills to function acceptably as a family member, the head of a household, or a parent becomes a major task of the school.

Successful community living has its foundation in successful family living. Consequently, it is essential that the retarded student acquire those skills, attitudes, and habits that will help him to become a contributing, effective member of his family and community.

II. List Sub-Units (related theme)

- | | |
|---------------------------------|---------------------------------|
| 1. parental occupations | 8. safety practices in the home |
| 2. our responsibilities at home | 9. telephone |
| 3. sex education | 10. leisure time activities |
| 4. home furnishings | 11. holidays |
| 5. health habits | 12. transportation |
| 6. good grooming | 13. the community |
| 7. clothing | |

III. General Objectives:

1. To develop an understanding of the family group; their roles and responsibilities.
2. To develop an appreciation of good home life
 - a. The home as the center of family life
 - b. Expression of love within the family.
 - c. Cooperation, courtesy and respect among family members
3. To teach sex education.
4. To become familiar with different kinds of homes, surroundings and furnishings.
 - a. Single dwelling house
 - b. Apartment house
 - c. Mobile home
5. To develop good safety and health habits.
 - a. Proper eating and food preparation habits
 - b. Basic cleanliness rules
 - c. Adequate rest
 - d. Appropriate dress
 - e. Prevention and care of illnesses
 - f. Safety precautions and simple first aid
6. To develop an understanding of the ways families have fun together.
7. To develop an understanding of the relationship between the home and the community.
 - a. Neighbors
 - b. Schools
 - c. Businesses
 - d. Churches
 - e. Social Services
 - f. City Employees

IV. Core Areas:**A. Arithmetic Concepts**

1. Keep records of the time meals are eaten each day
2. Reading the second hand to time how long to keep in a thermometer
3. Read degrees on a thermometer
4. Figure cost of food needed to prepare breakfast at school
5. Find the price of different brands of deodorant, cleaning powder, etc. and compare
6. Figure how many hours of sleep children get
7. Find the cost of various items of clothing
8. Determine the time that prescribed medicines should be taken throughout the day
9. Discuss the cost of various leisure time activities

B. Social Competency

1. Dramatize family situations at mealtime; bedtime, leisure time, doing chores
2. Arrange attractive table settings
3. Assign committees for group projects
4. Field trip

C. Communicative Skills

1. Keep records of foods eaten
2. Make scrapbooks; include a table of contents
3. Learn vocabulary lists
4. Write, read and copy experience charts
5. Label pictures, items, things on bulletin boards
6. Read books and stories pertaining to unit
7. Arrange a House Cleaning Dictionary in alphabetical order
8. Read labels on medicine bottles
9. Conduct "brainstorming" sessions

D. Safety

1. Read labels on cans of household poisons
2. Discuss fire prevention, precautions with medicines and drugs, prevention of falls in the home
3. Practice simple first-aid procedures; use first-aid supplies
4. Use telephone to call the doctor, the fire department

E. Health

1. Study chart of Basic Four food groups
2. Use colored food cut-out
3. Cook breakfast at school
4. Shampoo hair, clean fingernails, brush teeth, wash and iron clothes at school
5. Practice cleaning kitchen, bathroom, livingroom, etc. at school
6. Make bulletin boards about appropriate clothes for different weather conditions

V. Resource Materials:**Experience Charts****Bulletin Boards****Flannel Boards****Story Books****Field Trips****Resource Speakers****Pictures****Old Magazines and Catalogs****Telephone Directories****Art Materials****Free and Inexpensive Materials****First-Aid Supplies****Cleaning Supplies and Equipment****Large Chart Paper****Kitchen Facilities, Dishes, etc.****Pets****Traffic Signs**

VI. Vocabulary:

grandmother	menstruation	plates
grandfather	period	glasses
cousin	sanitary napkins	silverware
aunt	cramps	serving dishes
uncle	apartment	sponge bath
puppets	trailer	shampoo
chores	house	fingernail file
baby-sitter	Basic Four	germs
errands	diet	laundromat
dust	well-balanced	detergent
table	menu	scrub
dishes	servings	rinse
garbage	milk	deodorant
iron	meat	cleaning items
mow	eggs	compounds
rake	vegetables	scour
lawn	fruit	wax
sweep	bread	vacuum cleaner
sharing	cereal	dust mop
love	schedule	dust pan
manners	meals	Endust
angry	cleanliness	Pledge
polite	handle	throw rugs
sperm	tablecloth	weather forecast
develop	napkins	boots

scarf	antiseptic	nurse
gloves	bandage	themselves
jacket	sterile	medicine
coat	gauze	policeman
hat	rabies	fireman
prevention	adhesive tape	safety
polio	hobbies	strangers
tetanus	rubbing alcohol	obey
smallpox	sports	friends
measles	fairs	department
diphtheria	youth organizations	study
expose	neighbor	safe
temperature	community	post office
degrees	invited	postman
fever	sidewalk	letter
thermometer	noisy	mail
prescribe	school	deliver
capsule	learning	equipment
poison	church	questions
electric wiring	together	listen
drugs	social worker	answer

OBJECTIVES

MATERIAL

EXPERIENCE CHART

	ACTIVITIES
To develop an understanding of the individual members of the family and their roles.	<p><u>Read Orally:</u> <u>How Families Live Together</u> as review of immediate members of a family and their roles. Lead into more complicated relationship by pointing up that everyone at the dinner table is related because of the Grandmother and Grandfather. First, point up that all children of the Grandparents are sisters and brothers with relationships of aunts, uncles, cousins, nieces and nephews. Then read: <u>My Family</u>, to reinforce and clarify discussion.</p> <p>Use art materials to make hand puppets representing family members. Let children choose specific family members they wish to represent, being sure all typical relatives are covered.</p> <p><u>Directions for making puppets:</u> Stuff toe of stocking with cotton batting; tie tightly with string. Use yarn or glue on copper Dolly Duzit for hair; mark features with magic markers.</p> <p>Cut body from material, making it large enough to cover the hand and for fingers to fit into the "arms." Cut felt hands and sew onto material.</p> <p>Display "family member" puppets in classroom.</p>
a. Names of relatives other than parents and siblings	<p><u>Book:</u> <u>How Families Live Together</u>, by Malcolm Prevus, Chicago: Benefic Press, 1963. My Family, by Miriam Schlein. New York: Abclaro-Schuman, 1960. Grandfather and I, by Helen Buckley, Lothrop and Lee, 1957.</p> <p><u>For Bulletin Board:</u> Simplified "Family-tree" type poster with magazine cutouts to represent grandmother and grandfather, mother and father, sisters, brothers, aunts, uncles, cousins. Identify one child, i.e., "This is me." for specific reference.</p> <p>Pink cotton socks, cotton batting, string, yarn, copper Dolly Duzits, magic markers, cotton yard goods pink felt, scissors, needles, and thread.</p> <p><u>Introduction next phase of lesson with question:</u> "Do all brothers and sisters have the same mother and father?" Discuss relationships of step-brother and sister, step-father and mother. Bring in difference also between foster child and adopted child.</p> <p><u>Summary:</u> We have family members in our homes and outside our homes. We live with our closest family members, and each one does many things to make our home happy. Next, we shall discuss what some of these things are.</p>

OBJECTIVES

EXPERIENCE CHART

ACTIVITIES

- Varied roles of family members.
 - (1) Parents
 - (2) Children

Review Primary introduction to family duties through free discussion of mother's household and child care duties and father's economic contributions. Suggest that we do not see all the things our parents do. Bring in idea of decisions on behavior standards, study habits, and handling money. Explain what civic duties - community activities include, such as PTA, community government, school board meetings; voluntary organizations.

Because parents are busy people, we may do many things to help at home. Ask children what jobs they do at home. List on board. Suggested chores and others to include:

baby sitter dust
clear off table errands
dry dishes feed animals

Review idea that parents work outside the home at job or civic duties and children go to school, play with friends, go to recreation centers, but the home is where all return and where all family is together. Discuss with children why they want to be at home when they feel ill, lonely, frightened, or upset. Lead to these ideas:
We feel good at home because we are with people we love who love us. The things in our home belong to us and we know where to look for things we want or need. To show our appreciation and help make our homes happy, we have talked about helping with work. What other ways may we show our love in the family and the good feelings

MATERIALS	
<p>Pictures of parents at home, on the job, mother at marketing, volunteer work and meetings.</p> <p>Puppets made by class members.</p>	<p>We made puppets. Today our puppets played family. They were all working at home.</p> <p>There are chores all may do to help mother and father.</p> <p><u>Vocabulary:</u></p> <p>chores baby sitter errands dust table dishes garbage iron now rake lawn sweep</p>

2. To develop appreciation of good home life.
- The home as center of family
 - Expression of love within family
 - Cooperation

Pages 12-50 and pp. 149-157 in You and Others; Leslie W. Irvin and others; Lyons and Carnahan, Chicago, Ill. 1967.
"The Fight-Sauer," pp. 33-39 in Open Roads, U. W. Leavell, M. L. Friebele; American Book Co., New York: 1957.

Home is a good place to be. The people there love us and we love them. To show that we love our home and family we help our parents and brothers and sisters. We share our things. We use good table manners. We do not talk when others are talking. We try to not fuss and get angry with each other.

we have about home?

- A. Helping other family members
- B. Sharing our things
- C. Being kind and polite
- D. Carry out garbage
- E. Iron
- F. Mow lawn and rake yard
- G. Set the table
- H. Take care of own room, toys, and clothes
- I. Sweep

Class divides into groups with puppets made earlier and dramatize family situation to illustrate chores being done around home when all of the family is there. Teacher should encourage good ideas of cooperation and ways of doing chores with examples such as:

Brother says: It is a pretty day. I will mow the yard and rake the grass. Dad,

where is a basket to put the grass in?

Sister: Mother, I'll play games with the baby while I am folding the clean clothes.

3. To teach sex education
- a. Male sperm joins with female seed or egg to form baby.
b. It takes nine months for a baby to develop.
c. Babies need the security of a good home.

Arrange for mating a pet -- rabbit, cat, dog, etc. Explain to pupils that the male plants sperm in the female's body. The sperm joins with the mother's seed. From this seed the babies develop inside the mother's body. Discuss that when people fall in love they get married. Then the man plants sperm in the woman's body. If the sperm joins with the woman's seed, a baby develops. It takes nine months for a baby to be born. Babies are very helpless and need a great deal of care. They need both

(Picture of a baby)
The father puts sperm in the mother's body.
It joins with the mother's seed to make a baby.
The baby takes nine months to develop in the mother's body.
Only married people should have babies.
Babies need a good home.

OBJECTIVES

ACTIVITIES

MATERIALS

EXPERIENCE CHART

parents, a good home and a great deal of love.

Write experience chart. Read orally.

Scatwork: Write the following words on chalkboard. Children are to write sentences using each word: father, mother, baby, develop, months, married, home.

3. To teach sex education
- d. Menstruation
 - (1) is a natural process
 - (2) is a preparation for motherhood
 - (3) personal hygiene

Discuss menstruation with both boys and girls. Explain what it is -- a flow of blood which occurs once a month. All girls experience this when they reach a certain age, usually about 12 years old. This is a natural process, a sort of preparation for motherhood: All women must menstruate before they can have babies.

Write experience chart.

Chart paper
Chalkboard

Chart paper

With the girls explain how to take care of themselves when they menstruate. Teaching aids are available from the Kimberly-Clark Corporation. These include booklets for the girls, a motion picture prepared by Walt Disney, charts, teaching suggestions. Booklets and background information for teachers are also available from Tamrex, Inc. These materials may be modified and used with retarded girls. It is important, however, to keep in mind that with these students you must be very explicit and straightforward. If too evasive, the students will miss the point.

"Teaching Unit on Menstruation," available from Kimberly-Clark Corporation; Educational Department; Neenah, Wisconsin. "Educational Material on Menstruation," Tamrex, Inc., 161 East 42nd Street, New York, N.Y.

Vocabulary:
menstruation, period, sanitary napkins, cramps.

OBJECTIVES

ACTIVITIES

MATERIALS

EXPERIENCE CHART

To become familiar with different kinds of homes, surroundings, and furnishings.	Begin lesson with statement that we have talked of the people in our homes and things we do in our homes. Now we will talk about the different kinds of houses we live in. Have children tell what type of house they live in. Include coverage of: single dwelling house apartment house mobile home.	Pictures of different types of homes.	People live in different kinds of houses. Apartment houses have many families in them. People who move a lot may live in trailers. That way they take their house with them.
	Class art activity: Some members may use watercolors to make street, trees, lampposts on mural paper. Others draw and cut out different types of houses, using construction paper. Pin or staple the houses along the mural paper to be placed on wall. (Leave space to be filled in with later coverage.)	Water colors Colored construction paper Pencils Scissors	Vocabulary: apartment trailer house
		Books: <u>Big City Homes</u> , Catherine Urell, et al., Follett Pub. Co., Chicago Ill.: 1954. <u>Project Boy</u> , by Lois Lensk, J. B. Lippincott Co., Philadelphia, Pa., 1954. <u>Our New Home in the City</u> , by Leo Israel, Holt, Rinehart & Winston, Inc., N.Y., 1963	
5. To develop good health habits.	Introduce lesson by directing attention to bulletin board. Hold a "brain-storming session" - ask pupils to think of as many things as possible that contribute to good health.	Bulletin board caption: "Do you know some good health rules?" Picture of a boy or girl with a questioning expression on his or her face.	Pictures of food from each basic group. We should eat well-balanced meals every day. We should drink milk and have 2 or more servings of meat or eggs every day. We should have 4 or more servings of vegetables and fruit, and 4 or more servings of bread and cereals.

MATERIAL	ACTIVITIES	
The Four Food Groups: A food chart for inter- grades, #GA16, Iowa Dairy Industry Commission, 333 Insurance Exchange Bldg., Des Moines, Iowa.	Write experience chart. Read orally. Seatwork: Have pupils copy experience chart Food Models, #GB12, Iowa Dairy Industry Commission, 333 Insurance Exchange Bldg., Des Moines, Iowa.	(Picture of a family eating) We should eat our meals at about the same time each day. Our bodies work best when we keep on a regular schedule.
Chart paper paper and pencils crayons construction paper	Vocabulary: <u>Basic Four</u> , diet, well-balanced, menu, servings, milk, meat, eggs, vegetables, fruit, bread, cereal.	We are going to keep a record of all the food we eat in a day. Then we'll see if our meals are well-balanced.
Daily record form	Discuss the importance of eating meals at about the same time each day. Have pupils keep a record of all food they eat for one day; indicate time of each meal, any snacks eaten, etc. When completed, discuss if foods from the Basic Four were included in each meal, if too many snacks were eaten, etc. Put records in scrapbook.	
Chart paper Paper and pencils	Seatwork: Copy experience chart to put in scrapbook.	
	Vocabulary: <u>schedule</u> meals	

ACTIVITIES

EXPERIENCE CHART

OBJECTIVES	ACTIVITIES	MATERIAL	
Good health habits - continued	<p>Discuss tasting new, unfamiliar foods and learning to like less favorite foods. Using the food cut outs, dramatize a family situation in which mother serves a new vegetable, a different casserole, etc.</p> <p>Encourage students to try new things when eating lunch at school in the Hot Lunch program.</p> <p>Write experience chart. Read orally.</p> <p>Scatwork:</p> <ol style="list-style-type: none"> 1. Copy experience chart for scrapbook. 2. Look in old magazines to find pictures of food. Select a good menu for each meal; paste onto papers. Label food if possible; put in scrapbook. 	<p>Food models, Iowa Dairy Commission</p> <p>Chart paper.</p> <p>Paper and pencils</p> <p>Old magazines</p> <p>Newsprint</p> <p>Paste</p> <p>Scissors</p>	<p>(Picture of a less familiar food)</p> <p>We should taste new kinds of food. Many times we find we like them.</p> <p>Some foods we should try to learn to like. We probably won't like all foods but we should try to eat as many as possible.</p>
5. Good health habits - continued	<p>Review lessons about good eating habits by re-reading experience charts. Discuss that care should be taken when fixing these foods to be eaten - vegetables and fruits should be thoroughly washed; meat, bread, cereals, etc., should be kept clean and uncontaminated; you should always wash your hands before handling food; dishes and cooking utensils should be clean.</p> <p>Read pp. 90-97 in <u>Come Rain, Come Shine</u>, by C. L. Brownell, Ruth Evans, L. B. Hobson, American Book Co., New York, 1959.</p> <p>Write experience chart.</p> <p>Scatwork: Copy experience chart for scrapbook. Find a picture in a magazine to illustrate.</p> <p><u>Vocabulary:</u> cleanliness, handle</p>	<p>Experience chart about food.</p> <p>Chart paper</p> <p>Paper and pencils</p> <p>Old magazines</p>	<p>(Picture showing someone fixing food)</p> <p><u>Cleanliness With Food</u></p> <p>We should be very careful to keep everything clean when we handle food. Our hands and the dishes and pans should be clean.</p> <p>We should wash fresh fruits and vegetables before we eat them.</p> <p>Meat and other food should be kept clean, too.</p>

ACTIVITIES

EXPERIENCE CHART

MATERIAL

OBJECTIVES

5. Good health habits - continued
- b. Proper food preparation habits
- (2) Table settings
- Point out that serving food attractively helps us enjoy eating.
- Show students proper way to set the table. Let them practice with dishes and food cutouts.
- Write experience chart. Read orally.
- Seatwork: (1) Copy experience chart for scrapbook. (2) Make diagrams of correct table settings; use pictures of plates, glasses, etc., from catalogues; paste onto colored paper. Put in scrapbook. Make a chapter page - chapter 1. Rules about food.
- Vocabulary:
- Tablecloth, napkins, plates, glasses, silverware, serving dishes.

OBJECTIVES
EXPERIENCE CHART

ACTIVITIES	MATERIALS	(Picture of a person washing clothes)
5. Good health habits - continued	Experience charts	Wearing clean clothes helps us stay healthy. We should change underclothes every day and our other clothes when they get dirty. Sometimes we can help by washing underclothes out by hand. We have to scrub hard and then rinse them well.
<ul style="list-style-type: none"> c Wearing clean clothes 	<p>Review cleanliness rules and read experience charts. Discuss next rule - wearing clean clothes. Stress changing under clothes every day; dresses, jeans, shirts when they get dirty. Emphasize health aspect of clean clothes.</p> <p>Discuss how families wash clothes - washing machine at home or go to a laundromat. Emphasize that this is a big job for Mother-children should help as much as they can. Demonstrate how to launder garments by hand, how to hang them up so they'll dry quickly. Have each child practice. Show how to iron simple pieces.</p> <p>Write experience chart. Read orally.</p> <p>Scatwork: Copy experience chart for scrapbook.</p>	<p>Experience charts</p> <p>Sink or basin</p> <p>Detergent</p> <p>Articles of clothing</p> <p>Iron and ironing board</p> <p>Chart paper</p>
<ul style="list-style-type: none"> f Using deodorants 	<p>Explain to students that in order to guard against body odors they need to use a deodorant as well as wear clean clothes and bathe regularly. Display different kinds and show how to use. Discuss cost - stress not wasting deodorant when using it.</p> <p>Write experience chart.</p> <p>Scatwork: (1) Copy experience chart for scrapbook; (2) List the cost of different brands of deodorant. Compare prices, figure out differences in cost.</p>	<p>Different kinds of deodorants --- creams spray-on roll-on, etc.</p> <p>Chart paper</p> <p>(Picture of bottle of deodorant)</p> <p>Deodorants help keep us from smelling bad. Wearing clean clothes and taking baths help, too. There are different kinds of deodorants. You can buy them in the grocery store or drug store.</p> <p>Vocabulary: deodorant</p>

ACTIVITIES

EXPERIENCE CHART

5. Good health habits - continued
- c. Basic cleanliness rules

(1) Personal cleanliness and grooming

Refer to bulletin board about health rules Students formulate rules about keeping themselves clean; write on strips of paper and put up on board. Review experience charts.

5. Good health habits - continued

- c. Basic cleanliness rules

(2) Keeping house clean

Stress that one of the most important health rules in keeping clean; that we need to keep our house clean as well as ourselves. As children are getting older they can help do the work involved in cleaning their house. Emphasize that boys as well as girls should know how to clean and should help at home.

Discuss proper way to clean the kitchen. Go to home ec. room or hot lunch kitchen and demonstrate cleaning the sink, counters, tables, refrigerator, stove, cupboards, floor. Stress importance of keeping kitchen, where food is prepared, very clean. Let children clean kitchen thoroughly.

Write experience chart. Review cleaning procedures carefully.

Seatwork: Duplicate experience chart to put into scrapbook. Look in old magazines for pictures of cleaning supplies and compounds that would be used in the kitchen. Cut out, paste onto paper, and write a sentence telling how it would be used. Vocabulary: cleaning items, cleaning compounds, scrub, sweep, scour, wax.

MATERIALS

Bulletin board Sentence strips Experience charts

1. Take a bath, shower, or sponge bath.
2. Shampoo hair once a week or more.
3. Keep hands and fingernails clean.
4. Brush teeth every day.
5. Wear clean clothes.
6. Use a deodorant.

(Picture of a kitchen)
How To Clean the Kitchen

Put something like spic-n-span in a pail of hot water. With a rag wash off the table, the cupboards, the counters, stove, and refrigerator.

Use some Babo and a rubber scrubber to clean the sink.

Sweep the floor with a broom. Then mop the floor with hot water and spic-n-span.

Every few weeks the floor should be waxed.

Put wax on a clean floor with a rag.

The kitchen should be kept clean because this is where we eat.

17.

OBJECTIVES	ACTIVITIES	MATERIALS	EXPERIENCE CHART
5. Good health habits - continued (2) Keeping house clean - cont.	Discuss proper way to clean the bathroom. Stress importance of keeping it clean so germs won't be there. Go to bathroom in school and demonstrate how to clean; let students practice. Write experience chart. Read orally. Seatwork: Duplicate experience chart to put in scrapbook. Have pupils make a list of all the things they used to clean the bathroom. Make chapter page, Chapter 3 - Cleaning the House	Bathroom in school. Babo, Sani-flush, spic-n-span. Mop, sponge, bowl brush, etc. Chart paper.	(Picture of a bathroom) <u>How to Clean the Bathroom</u> Use some Babo and a sponge or rubber scrubber to clean the sink and bathtub. Wipe the outside of the toilet with spic-n-span in hot water. Put Sani-flush in the toilet bowl and use a bowl brush. Scrub the floor with spic-n-span and hot water. Be sure to clean the bathroom well to kill germs
5. Good health habits - continued (2) Keeping house clean, cont.	Discuss procedures for cleaning livingroom, diningroom, bedroom. Demonstrate and practice in the home cc. room or the classroom. Show how to use a vacuum cleaner and what the different attachments are for. Also, show how to use a dust mop if the pupils do not have vacuum cleaners in their homes. Write experience chart. Read orally. Seatwork: Duplicate chart for scrapbook. Have pupils make a House Cleaning Dictionary: find or draw pictures of all items and products used in cleaning the house. Arrange in alphabetical order and label.	Soft rags Dust mop Dust pan Vacuum cleaner Endust, Pledge Chart paper Ditto Master copy to duplicate experience chart. Newsprint Old magazines crayons scissors, paste	(Picture of a living-room) <u>How To Clean the Living Room, Dining Room and Bedroom</u> . Straighten up the rooms and put everything away. Dust the furniture with a soft rag. You can use Endust or Pledge. Clean the rug and the floor with a vacuum cleaner. If you don't have one, use a dust mop and

ACTIVITIES

EXPERIENCE CHART

MATERIALS

OBJECTIVES

(2) keeping house clean, cont.

Review and re-read experience charts about cleaning house. Let pupils tell about work they're doing at home. On bulletin board, put up strip about house cleaning.

5. To develop good health habits
 d. Appropriate dress
- (1) For different weather conditions

On large flannelboard or bulletin board play a series of pictures showing a cold snowy day, a rainy day, a hot summer day, a windy spring day; also show various items of clothing such as boots, winter coats, head scarf, umbrella, summer shorts, etc. Have pupils decide which clothing is appropriate for each weather picture; attach strong or yarn from the clothing pictures to the weather pictures.

Discuss that wearing the right clothes is an important health rule; not dressing warm enough, not wearing boots, etc., will often cause us to get sick.

Stress also that the pupils are getting old enough to be responsible for choosing the right kinds of clothes to wear in different kinds of weather.

Read book, True Book of Health.

Write experience chart. Read orally. On bulletin board put up health rule. Wear the right kinds of clothes for different kinds of weather.

Scutwork: Duplicate chart for scrapbook. Look in catalogues to find the price of the items of clothing displayed on flannel board. Write name of item and cost.

Experience chart

Bulletin board
 Sentence strip

sweep the dirt into a dust pan.
 Take throw rugs outside and shake them good.

Sentence Strip for Bulletin Board
 Clean the house very good once a week.

Flannel board or bulletin board
 Series of Pictures cut from magazines
 Colored string or yarn

(Picture of a child wearing a winter coat.)
 We should wear different kinds of clothes for different kinds of weather. In the morning we can listen to the weather forecast so we'll know what to wear to school. Our mothers don't have to tell us to wear our boots or heavy coats. We're old enough to know for ourselves.

Bulletin board
 Sentence strip
 Chart paper
 Ditto Master copy to duplicate experience chart
 Clothing catalogues

True Book of Health, by
 Olive V. Haynes, Children's Press, Chicago, Ill.: 1954.

Make chapter 5 page - Rules about Clothes.
Vocabulary: weather forecast, boots, scarf, winter coat, gloves, jacket, rain hat, umbrella, shorts, sunsuit, etc.

5. Good health habits - continued
- e. Prevention of illnesses

On chalkboard sketch a picture of a cartoon character with a bad cold - red, sore nose, watery eyes, etc. Tell children this is Sad Sam who doesn't know what this word means - write the word Prevention on board. See if pupils can sound out word, develop meaning - keeping something from happening.

Discuss how to prevent colds and other sickness. The most important prevention is following good health rules - review bulletin board and read experience charts. Then discuss going to the doctor for shots for polio, tetanus, smallpox, measles, diphtheria and how these help prevent illness.

Read pp. 126-131 in Come Rain, Come Shine. Write experience chart.

Seatwork: Copy experience chart and draw a picture of Sad Sam to illustrate the story.

Vocabulary: prevention, polio, tetanus, smallpox, measles, diphtheria.

5. Good health habits - continued
- e. Care of illnesses

Read experience chart about prevention of illnesses. Discuss that sometimes people get sick even if they do follow good prevention rules.

Dramatize how to care for someone who is sick with a cold or flu. Bring out that the person should stay in bed, not come to school to expose others, how to take a temperature and the danger of a high fever. Discuss going to the doctor

Chalkboard
Colored chalk

Chart paper
Paper and pencils
crayons

Experience Chart
Thermometers

Prevention
The word prevention means keeping something from happening. If we follow good health rules, we can keep from getting sick.

The doctor can give us shots to help us from getting very sick.

Come Rain, Come Shine, by Brownell, et al.

(Picture showing a person who is sick in bed)

If We Get Sick
When we're sick we should stay home in bed and not expose other people.
Our temperature is usually 98 degrees.

when very ill, with a high temperature; following directions carefully for taking aspirin or other unprescribed drugs only when parents say so.

Practice taking temperatures and reading thermometers.

Write experience chart.

Scatwork: Duplicate chart for scrapbook. On chalkboard make examples of labels found on prescription bottles, e.g.,

Take 1 capsule Two teaspoons
every five hours. with every meal.

Children are to copy labels and write down the time each medicine should be taken throughout the day. Make a chapter page - chapter 6 - Rules about prevention and care of sickness.

Vocabulary: expose, temperature, degrees, fever, thermometer, prescribe, capsule.

5. To develop good safety habits in the home

a. Safety precautions the look-out for safety hazards in the home. Hold frequent briefing sessions to

(1) Fire
(2) household poisons
(3) Care with drugs

(4) Prevention of falls in the home

Prevention of fire in the home - not playing with matches or cigarettes, heating system in good condition, electric cords and wiring in good condition, care when cooking, etc. Discuss what to do if the house does catch on fire - calling fire department, discussing escape routes from the house if the main door or stairway were

Telephone
Telephonic directory
Gummed labels to put near telephone

Safety Spy Report #1
We checked our homes for fire safety. Agent 001 found someone playing with matches. This is bad. Agents 002 and 003 checked out the furnaces and electric cords. They need to be in good shape.

The chief told us a plan to use if the house does catch fire.

blocked.

Guard against household poisons - learn to recognize products that are poison or harmful, where these should be stored so children won't get into them, using them properly.

Proper precautions with medicines and drugs - keep in medicine cabinet or shelves high enough so small children can't get in them, throwing away old medicines, not taking someone else's medicine, following directions carefully for aspirin, cold remedies and other preparations.

Prevention of falls in the home -- using a bathmat in the bathtub, care with throw rugs, keeping clutter off stairs, using sturdy step stool for reaching, high cupboards and shelves.

Read pp. 21-25 in Come Rain, Come Shine. Write a series of experience charts.

Seatwork: Assign committees to draw picture records of each Safety Spy agent and his assignment - show each important point and write explanatory sentence for each picture.

Duplicate experience charts for scrapbooks. Make Chapter page - Chapter 7 - Rules about Safety in the Home.

Vocabulary: poison, electric wiring, drugs.

Cans of Sani-Flush, Drano, Clorox, etc.

Bottles of aspirin, cold remedies and other remedies and other non-prescription drugs

Rubber bathmat Step stool

Safety Spy Report #2
Agent 008 found something very dangerous under the kitchen sink. It had poison written on it. Mother uses it all the time and if used right it is a big help.

But if it is swallowed, it can be deadly!! It is a can of Drano.

Safety Spy Report #3
Agent 000 briefed us on the medicine cabinet. He found it was up high so no little spys could get into it.

One negative report is that there was some old medicine left over from a sickness. last spring. It should be thrown away.

Safety Spy Report #4
Several agents found homes where bad falls might happen. They checked off these dangers on their pocket transmitters:

slippery bathtub, toys and stuff all over the floor,

papers and boxes on
the stairs, using
chairs instead of step
stools, dangerous
throw rugs.

3. Good safety habits - continued
- b. Simple first-aid.
- (1) burns
 - (2) cuts and scratches
 - (3) bruises
 - (4) splinters
 - (5) animal bites
 - (6) poisonings

Discuss how to care for minor injuries; list Chart paper

each treatment on experience charts. Let children dramatize and practice caring for each situation.

Minor burns: Discuss Prevention.

Cuts and scratches: Show children how to use sterile gauze squares to help clean the wound if it is very dirty; how to make bandages with gauze squares and rolls and tape.

Read pp. 51-54 in Come Rain, Come Shine. Bruises and black eyes: The ice bag will help reduce the pain and swelling. If pain continues and is severe, go to the doctor.

Splinters: Stress making sure the needle is sterilized.

Animal bites: Stress the seriousness of rabies. Go to the doctor and let him decide what should be done, if the animal should be tested, etc.

Poisonings: Stress the need for prompt action in calling the doctor.

Discuss keeping a First Aid Kit in the home. Show kits which you can buy; demonstrate how to make up one and discuss what should be in them. Stress importance of keeping them handy and well-stocked.

Seatwork: Have children copy each chart. Assemble in a First Aid booklet which they can take home to keep near their First Aid kit.

Vocabulary: antiseptic, bandage, sterile, gauze, adhesive tape, rubbing alcohol.

Burns

1. Run cold water over burn so it won't hurt so much.
2. Put Vaseline or First Aid cream on burn.
3. If burn is bad, go to the doctor right away.

Cuts and Scratches

1. Wash your hands first.
2. Wash around cut with soap and water.
3. Put something like first aid cream or Bectine on the cut.
4. Put on a bandaid or make a bandage with gauze and tape.

Bruises

1. Put some ice cubes in a plastic sack.

2. Wrap sack in a cloth.

3. Put on the bruise.

Splinters

1. Wash your hands and skin around the

Come Rain, Come Shine, by Brownell, et al.

Vaseline
Johnson's first aid cream
Bactine
Band Aids

Sterile gauze squares and rolls
Adhesive tape

Cars of household products

that are poisonous

Ice cubes; cloth
Needle
Rubbing alcohol

First Aid Kits

Suitable box
Items for kit

Paper and pencils

- 23.

- splinter.
2. Sterilize a needle by putting it in alcohol.
 3. Use needle carefully to get out splinter.
 4. Put an antiseptic on it.

Animal Bites

1. Wash the wound right away with lots of soap and water.
2. Put on a bandage.
3. Go right to the doctor.
4. If the animal gets away, call the police.

Poisoning

1. Call the doctor right away.
2. Tell him what the poison is.
3. Do just what he says.
4. Keep the can or bottle that the poison was in.

24

5. To develop good health Review health and safety concepts: read and safety habits experience charts and go through scrapbook. Make a table of contents for books, number pages, assemble.

25

OBJECTIVES

To develop an understanding of the ways families have fun together.

a. In the home

- (1) Watch TV
- (2) Listen to music
- (3) Play games
- (4) Work on hobbies
- (5) Play outdoors
- (6) Visiting friends or relatives
- (7) Taking care of pets

b. In the community

- (1) Sports
- (2) Fairs
- (3) Picnics
- (4) Movies
- (5) Swimming
- (6) Fishing
- (7) Youth organizations

ACTIVITIES

Hold a "brainstorming" session - ask children to think of as many things as possible for the ways families can have fun together.

Write experience chart.

Scavework: Look in magazines for pictures showing the various activities families can enjoy together. Discuss pictures, put on bulletin board under correct heading - At Home or In the Community. Write appropriate sentence to put below each picture.

Title bulletin board, Ways Families Have Fun Together.

Read Jerry books.

Vocabulary: hobbies, sports, fairs, youth organizations

- (1) Family parties and activities
- (2) Taking care of pets
- (3) Family parties and activities
- (4) Sports
- (5) Fairs
- (6) Picnics
- (7) Movies
- (8) Swimming
- (9) Fishing
- (10) Youth organizations

EXPERIENCE CHART

(Picture of a family group)

Fun With Our Families

We can do many things with our family to have fun.

Some things don't cost anything. Other things do cost some money.

Doing things with our family makes us feel happy.

Jerry Goes Fishing, by Florence Battle, Beckley-Cards Co., Chicago, Ill.: 1942.

Jerry Goes Riding, by Florence Battle, Beckley-Cards Co., Chicago, Ill.: 1945.

Jerry Goes to the Circus, by Florence Battle, Beckley-Cards Co., Chicago, Ill.: 1945.

Jerry Goes on a Picnic, by Florence Battle, Beckley-Cards Co., Chicago, Ill.: 1952.

7. To develop an understanding of the relationships between the home and the community
 - a. Neighbors
- Refer to mural made earlier by class that contains homes located on a street. Say that many streets with houses make up a community. Establish concept by referring to specific community in which pupils live. Discuss that many people working together make up the community. The people who live on our street and near our house are neighbors. Discuss how to be a good neighbor.

A good neighbor keeps his yard clean. He does things to help the people who live near him. If someone on his street is sick a good neighbor does not disturb him.

Vocabulary:

neighbor
community
invited
sidewalk
noisy

a Good neighbor.

1. Respect for property; don't play in yards where you are not invited.
2. Don't throw trash or leave toys on sidewalks or in yards.
3. Don't be noisy when neighbors might be sleeping or ill.
4. Run errands for busy or sick neighbors.
5. Keep your own yard and home attractive.

7. To develop an understanding of the relationships between the home and the community.

b. Schools

- (1) To learn that all the community has interest in the school.
- (2) To recognize that special education helps children who have difficulty learning.

We have talked about the important time we spend in our homes. Next to our homes, we spend more time in school. The schools in our community are very important to our home and family. Our mothers and fathers pay taxes to build our schools and pay our teachers. The people in the community choose (by voting) a school board - more neighbors from different streets - to see that the schools are good for boys and girls and that there is enough money to pay the costs. The schools help boys and girls learn the things they need to know to live good lives now and know the things they must do when they grow up and help run a community.

Have students name the people in their school who help run the school and help them learn.

1. Teacher
2. Principal
3. School Nurse
4. Janitor
5. Lunchroom Workers
6. Others they may have services from such as Psychologist or guidance counselor.

Colored Construction Paper

Scissors
Pencils

Our school has a special class for us because we are slow in learning. Our teacher helps us learn how to mind and be happy with everyone.

Vocabulary:

school
learning

Discuss significance of special classes.
Have various class members make for mural:
School building

Figures of students and school personnel
Flag pole and flag
Playground equipment around school

7. Home and Community

c. Churches

- (1) Teaching about right ways to live and about God.
- (2) Different kinds of churches

Our families get help from the schools which make better people by teaching us the right way to live. What is another place in our community where we enjoy being with other people and learn right ways to live? The church is an important help for families. There are many different churches because people want to worship in different ways and believe different things. Name the different churches in your community.

(Keep in mind that not all families represented by class may attend church.) Churches teach about God and help families when they are in trouble by collecting food, clothes, and money. If someone's house burns down, the people of a church might help them get clothes and food to replace those lost.
Add churches to mural.

- We have said that churches help people when they are in trouble. Do you know that there are others in our community whose job it is to help our families when they are in trouble? Discuss:
1. Social Workers
 2. Public Health Nurse
 3. State Employment Office

Note that these services are free and for people who cannot help themselves. Our community is showing that it is a "good neighbor" and helps people get jobs, solve their problems and become well when they

Colored construction paper

d. Social Services

Churches teach us about God and help families in trouble. People like to be together in church.

Vocabulary:

church
together

There are people in our community who help families in trouble. It is their job to help find a job. They give food and medicine to people who cannot buy it. They help people to help themselves.

are ill.
Seatwork: Copy experience chart story.

Vocabulary:
social worker
nurse
themselves
medicine

7. Home and Community
c. Community Employ-
ees who help fam-
ilies

- (1) Policemen
protect our
families, see
that laws are
obeyed and
help us when
we are in
trouble.

Read pp. 160-186 in Wilson reference.
The people we have talked about help
families when problems arise. There are
people in our community who help to keep
problems from happening as well as hand-
ing trouble when it comes. Our police and
firemen help people learn how to keep safe. Police Chief
read Policemen by Ina K. Dillon
Invite police chief to talk to class
about:

1. Traffic safety
2. Child molesters

Worksheet: Instruct students to use words
at top of page to fill in the blanks.
Vocabulary should be completely familiar
before worksheet is given.

touch with
other people. To mail letter, explain what different win-

29

Have class compose sample letter (experience
chart) asking for permission to visit
fire department. Show how letter looks in
proper form, envelope addressed and stamp
affixed. Discuss that we write letters to
people in our own town and far away. The
Post Office and workers help us by deliver-
ing the mail and sending it on trains and
planes.

If possible, take class to Post Office
and explain what different windows are for. Have class discuss what
kinds of things we receive in mail:

Dear Friends,

We would like to
visit you at the
Fire Department. We
are studying how our
firemen help families
and want to see
how you know where a
fire is. We want to
know how we can make
our homes safe from
fire.
