ABSTRACT

The current status of three federally supported construction programs of facilities for the mentally handicapped is reviewed. The programs discussed are designed to provide assistance in the areas of: continuing research into causes and means of prevention of mental retardation, interdisciplinary training of professional personnel, and establishment of community facilities. Research centers operating under the program (P.L. 88-164) are described including location, area of study and funding statistics. University-affiliated facilities for the mentally handicapped set up to provide clinical training of professional personnel are examined. A brief description of each facility reviews the types of facilities and programs which have been supported with the funds and the current status of their construction. Community facilities approved for federal assistance under the construction program are listed by state and pertinent data such as type of facility, services available, retarded served, and estimated costs, are supplied in chart form. (CD)

DISCRIMINATION PROHIBITED--Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the programs of financial assistance for the handicapped, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

FOREWORD

Federal support for categorical construction programs is a relatively new principle. In fact, prior to 1963, no Federal legislation existed to support construction of facilities designed specifically for the mentally retarded.

Since the enactment in 1963 of the Mental Retardation Facilities and Mental Health Centers Construction Act (P.L. 88-164), three different but interrelated construction programs for the retarded have been initiated: Research Centers, University-Affiliated Facilities and Community Facilities. As of January 1971, a total of 12 Research Centers, 20 University-Affiliated Facilities, and 362 Community Facilities had been approved and funded. On October 30, 1970, President Nixon signed into law the Developmental Disabilities Services and Facilities Construction Act (P.L. 91-517). This new law extends the construction authority for mental retardation university-affiliated facilities and community facilities for the mentally retarded.

The three construction programs discussed in this booklet are designed to provide assistance in vital areas of concern: conducting research into the causes and means of prevention of mental retardation; inter-disciplinary training of professional personnel for research and service careers in both present and newly emerging programs; and establishment of a network of facilities where the retarded can obtain services in their own communities. This publication reviews the current status of these three construction programs for the mentally retarded.

Acknowledgement is given to Dr. Michael Begab, National Institute of Child Health and Human Development and Mr. Vivian Hylton and Mr. Ronald Almack, Division of Mental Retardation, Rehabilitation Services Administration, for their contributions to this publication. A special word of thanks is appropriate for Mrs. Betty Schmidt, a member of the Secretary's Committee on Mental Retardation staff, for her diligent work in manuscript preparation.

(Mrs.) Patricia Reilly Hitt
Assistant Secretary for
Community and Field Services

February, 1971

INTRODUCTION

The Report of the President's Panel on Mental Retardation in 1962 resulted in a breakthrough of real significance for mental retardation programs. This Report was a culmination of the efforts of a group of distinguished Americans who studied the problem of mental retardation and reported on their findings. The Report outlined a number of areas for action, and provided a blueprint for planning and implementive programs of comprehensive services to the retarded. The Report in large measure was responsible for subsequent enactment of a number of Federal laws affecting the retarded, including authority for new construction programs.

Subsequent to issuance of the Report, a special message on mental retardation and mental health was sent to Congress in 1963. The message outlined areas of concern and suggested possible approaches. Three areas given special attention were research and prevention, manpower and community based services. In the same year Congress enacted the first Federal categorical construction programs for the mentally retarded: "The Mental Retardation Facilities and Mental Health Centers Construction Act of 1963" (P.L. 88-164).

The Developmental Disabilities Services and Facilities Construction Act of 1970 (P.L. 91-517) amended the Mental Retardation Facilities and Mental Health Centers Construction Act of 1963, to provide the states with broad responsibility for planning and implementing the comprehensive program services and to aid the states in the construction of community facilities for the mentally retarded with a combined formula and project grant program covering both construction of facilities and the provision of services to persons with developmental disabilities. The scope is broadened to include not only the mentally retarded, but also persons suffering from other serious developmental disabilities originating in childhood, including cerebral palsy and other neurological handicapping conditions. In the Act of 1963 (Title I, Part A, P.L. 88-164), project grants were authorized for the construction of public or non-profit centers for research that would develop new knowledge for preventing and combating mental retardation. The new act (P.L. 91-517) does not continue the authorization for construction of these research centers.

Title I, Part B, of the Act of 1963, authorized project grants to assist in the construction of public or nonprofit clinical facilities for the mentally retarded, associated with a college or university, which would: (1) provide, as nearly as practicable, a full range of inpatient and outpatient services; (2) aid in demonstrating provision of specialized services for diagnosis, treatment, training, or care; and (3) aid in the clinical training of physicians and other specialized personnel needed for research, diagnosis, treatment, training, or care. The new legislation (Title II, P.L. 91-517) extends the present authority to construct university-affiliated facilities for the mentally retarded through June 30, 1973, and authorizes a new project grant program to cover the costs

of administering and operating demonstration facilities and interdisciplinary training programs in such facilities.

Title I, Part C, of the Act of 1963 authorized Federal grants to states to assist in the construction of specially designed public and nonprofit community facilities to provide diagnosis, treatment, education, training, care, and sheltered workshops for the retarded. Title I of P.L. 91-517 replaces this authority to aid in the construction of community facilities by authorizing formula grants to states for planning, administration, services, and construction of facilities for the developmentally disabled. In other words, the previous authority to construct community mental retardation facilities is replaced by a broad new federal-state grant-in-aid program to assist the states in developing and implementing a comprehensive plan for meeting the needs of persons with developmental disabilities. States may use these funds to construct facilities, provide services, support state and local planning, provide administrative and technical assistance, train specialized personnel, and develop and demonstrate new service techniques.

Further information about the Developmental Disabilities Services and Facilities Construction Act (Public Law 91-517) is in the Programs for the Handicapped Number 70-5, available from the Secretary's Committee on Mental Retardation, U. S. Department of Health, Education, and Welfare, Washington, D. C. 20201.

MENTAL RETARDATION RESEARCH CENTERS

Research and research training in mental retardation and related aspects of human development present unique demands in terms of facilities and resources. Recognition of these needs led, in 1963, to legislation authorizing construction grants for facilities in which biological, medical, social, and behavioral research relating to human development could be conducted to assist in finding the causes and means of prevention of mental retardation, and for finding means of ameliorating its effects.

Acceptance of applications for construction grant awards under the Act authorizing the Mental Retardation Research Centers closed on July 1, 1967. During the authorized four years of the Mental Retardation Research Center Construction Grant Award Program, a total of twelve centers were awarded to outstanding scientific institutions. During its construction phase this program was jointly administered by the Division of Research Facilities and Resources and The National Institute of Child Health and Human Development (NICHD). Continuing responsibility for the research program in the centers is carried on by NICHD.

The facilities constructed through the Mental Retardation Research Center Program will provide research facilities in particular environments where a cohesive program of research and research training can be accomplished. Most of the centers are large complex facilities in settings where a broad spectrum of research on mental retardation can best be carried out. A small number of specialized centers which have a concentrated scientific focus on a particular aspect of mental retardation are also supported by the program.

UNIVERSITY OF WASHINGTON, SEATTLE, WASHINGTON

The Child Development and Mental Retardation Center at the University of Washington encompasses both a research center and a university-affiliated facility (see page 53). The Center has been designed to bring together the many scientific and professional disciplines concerned with the understanding and management of mental retardation and other handicapping conditions in children.

The Center consists of four units. In the Medical Research Unit, there are major research programs in developmental biology, perinatal biology and neurological sciences. In developmental biology, research is in progress in the areas of genetics, embryology, developmental biochemistry and immunology, teratology and dysmorphology. In general, this research is directed toward understanding and control of factors responsible for developmental abnormalities. The general objective of the perinatal biology program is greater understanding of the factors operating in utero and during the process of birth to produce abnormalities in the neonate. This program includes investigators from the Departments of Anesthesiology, Obstetrics and Gynecology, Pediatrics, Pharmacology, Radiology and Surgery. In the neurological sciences program, research is conducted on central nervous system development, convulsive disorders, neuropathology - particularly in prematurity - and on the visual system.

The Behavioral Research Unit also encompasses three major programs. The psychology program has been concerned with research on learning and perceptual development, attention and memory processes in retardates. The speech and audiology group has been engaged in research on the early stages of language development, imitative responses, the role of modality and habituation on responses to sensory stimulation and the effects of drugs on EEG audiometry. The psychiatric program has involved basic studies of social behavior in primates, studies of mother-child interaction and studies of the effects of early stimulation on infant development.

The Experimental Education Unit is engaged in research related to the development and evaluation of educational materials and classroom procedures for use with handicapped children. Special emphasis has been placed on the development of reading, arithmetic and vocational training materials and on methods for development of social behavior.

The Clinical Training Unit conducts clinical research directed toward improved methods of diagnosis and treatment.

UNIVERSITY OF WASHINGTON, SEATTLE, WASHINGTON (Contd.)

Child Development and Mental Retardation Center
University of Washington, Seattle, Washington

CHILDREN'S HOSPITAL, CINCINNATI, OHIO

The Mental Retardation Research Center of Cincinnati (Institute for Developmental Research) is a part of the Children's Hospital Research Foundation and the Department of Pediatrics of the University of Cincinnati, College of Medicine. This research center is focusing, at the present time, on biomedical research.

Areas of study include congenital malformations with special emphasis on developmental defects of the central nervous system. Genetic as well as environmental causes are under investigation and mechanisms leading to congenital anomalies are being studied. Many animal models are available for study of the effects of environmental hazards upon the development of embryos and fetuses. A number of investigations deal with tests and methods for measurement of metabolites which are involved in brain chemistry or errors of metabolism. Electroanalytical methods for studying brain chemistry have been developed and are being applied to investigations of the physiology of the normal and the damaged brain. A Tissue Culture Laboratory is available for chromosome analysis, biochemical studies and electronmicroscopic investigations of tissues from children with mental retardation. An enzyme laboratory dealing with various lysosomal diseases is closely associated with the tissue culture facilities. Head injury, a frequent cause of mental retardation of postnatal and perinatal origin, is analyzed by studies of cerebral blood flow and its relation to intracranial pressure, glucose metabolism and oxygen utilization by the acutely injured brain. Although there are no residential facilities for children in this center, the

Children's Hospital, Cincinnati,
Institute for Developmental Research

CHILDREN'S HOSPITAL, CINCINNATI, OHIO (Contd.)

Institute for Developmental Research is clinically influenced by its setting in the Department of Pediatrics of Cincinnati and the Children's Hospital Medical Center, and by its association with the University Affiliated Clinical Program and Facility for the Mentally Retarded, a Clinical Research Center and a Convalescent Hospital.

WALTER E. FERNALD STATE SCHOOL, WALTHAM, MASSACHUSETTS

This Center is located on the grounds of an institution for the retarded and will place heavy emphasis on the retarded person as the object of study. Interchange with investigators in other fields will be encouraged and research will focus on prevention and amelioration. Among the disciplines included in this research program are neurology, psychiatry, pediatrics, epidemiology, experimental psychology, cytogenetics and education. An unusual feature of this project is the close cooperation between the Fernald School, Massachusetts General Hospital, and the Harvard Medical School.

Total cost of project:	\$1,790,000
Federal share:	827,000
Date of award:	5/65
Estimated completion date:	1969

GEORGE PEABODY COLLEGE, NASHVILLE, TENNESSEE

This private college of education has a long and productive history of research and training in the field of mental retardation and related aspects of human development with a special emphasis on the behavioral sciences and education. The College rests within a large university center (also including Vanderbilt University, Meharry Medical College, Fisk University, and Scarritt College) which provides the rich variety of university resources required for a major research center.

The John F. Kennedy Center for Research on Education and Human Development at Peabody College makes possible a program of interdisciplinary research and training including strong cooperative research programs with Vanderbilt University Medical Center, Meharry Medical College, Fisk University and the Metropolitan Nashville Public Schools.

The research and training program at the Kennedy Center is directed at basic and applied research in the behavioral sciences aspects of the problem of mental retardation and developmental disability. Programs of research, evaluation and demonstration are currently ongoing with mentally retarded children, children with severe behavior disorders, culturally disadvantaged and environmentally deprived children, physically handicapped and sensory handicapped children and special studies of communication, cognitive development, early educational intervention programs and psychobiology studies. The research program is closely linked to the training activities of the Divisions of Human Development and Education.

The Center acquired two new facilities which were dedicated in March, 1968, and now house the research and training activities of 72 doctoral level research faculty from a variety of disciplines and institutions of higher education in the Nashville area.

Total cost of project:	\$3,543,547
Federal share:	2,492,900
Date of award:	5/65
Completion date:	11/67

George Peabody College for Teachers
Nashville, Tennessee

UNIVERSITY OF CALIFORNIA, LOS ANGELES, CALIFORNIA

The UCLA Mental Retardation Center houses a Mental Retardation Research Center and a University Affiliated Facility under joint administration. It is the only such facility in the country within a university department of psychiatry. Housed above the Neuropsychiatric Institute, the Center also includes extensive clinical research in the Community Liaison and Evaluation of Programs section, the Inpatient Service, the NPI School and the Outpatient Service. A high degree of researcher-clinician interaction is encouraged and is further aided by a pre- and post-doctoral training program designed to utilize the Center's interdisciplinary setting to its maximum advantage.

The laboratory research program now includes scientists from such diverse fields as Developmental Neurobiochemistry, Developmental Neurobiology, Neurophysiology and Socio-Behavioral Studies who work with clinicians to gain new knowledge about mental retardation. Some of the research investigations include studies on: PKU and other metabolic disorders, effects of certain hormones on the functional maturation of brain cells, protein synthesis in the neonatal brain, the effects of nutrition on brain development, the electrophysiological bases of learning and motor activity, attention in man and animal, anthropological and etiological aspects of mental retardation, and the adaptive behavior concept.

The Center enjoys close research collaboration with Pacific State Hospital in Pomona, California. The two facilities share personnel, support, research interests, and data on problems of both mentally retarded children and those with other kinds of impaired competence. Cooperative projects include studies on: epidemiology, program evaluation, adaptive behavior, chromosomes and genetics, data processing, electrophysiology and neurobiology. A newly developed information storage and system will enhance the Center's research, administrative and clinical capabilities.

Total cost of project:	\$3,295,483
Federal share:	1,710,000
Date of award:	1/66
Completion date:	7/69

CHILDREN'S HOSPITAL MEDICAL CENTER, BOSTON, MASSACHUSETTS

This Center is closely affiliated with the Harvard Medical School and proposes an interdisciplinary research program directed toward the understanding, prevention and amelioration of the handicapped and the mentally retarded. There are research programs in the interrelated biomedical areas of: (1) Neuroscience, (2) Genetics and systemic metabolism, and (3) Behavioral Science. Within each field, there are research projects at the clinical level supported by more basic projects of investigation. In addition, there are a number of specific instances of collaboration among investigators of different program areas.

Activities of the Neuroscience program involve investigation of the problems of cerebral fluids and solute transport, as well as studies of human hydrocephalus, electroneurophysiologic studies using computer averaged evoked potentials in humans supported by single unit microelectrode studies in animals. There are biochemical studies of brain enzymology and transmitter function, and a number of interdisciplinary projects centering about brain damaging conditions of the perinatal period.

The principal effort of the Genetics program consists of a continuing study of the assignment of genes to human chromosome and studies of the nature of regulatory events in mammalian cells, utilizing the techniques of cytogenetics, tissue culture, hybridization, etc. The metabolic laboratories concentrate on clinical problems relating to inborn defects of amino acid, lipid and mucopolysaccharide metabolism.

The primary emphasis of the behavioral science program is on human studies of neonatal rhythmic motor function and dysfunction as a possible predictor of brain damage and intellectual disorder, recognition of the important issue of early detection as a first step in management of the retardate. An additional focus of interest directs attention to minor degrees of intellectual dysfunction with regard to juvenile delinquent behavior, and inves-

Children's Hospital Medical Center,
Boston, Massachusetts

CHILDREN'S HOSPITAL MEDICAL CENTER, BOSTON, MASSACHUSETTS (Contd.)

tigation of male-female differences in cognitive style and reaction to brain dysfunction. The behavioral science program also includes studies of animal performance correlated with brain catecholamines in the experimental laboratory.

The Mental Retardation and Human Development Program represents the largest single commitment of resources in the institution's history to research in a single field.

Total cost of project:	\$4,140,337
Federal share:	2,470,000
Date of award:	1/66
Completion date:	11/70

UNIVERSITY OF KANSAS, LAWRENCE, KANSAS

The University of Kansas has a unique plan for the location of three research and research training units - at the University of Kansas Medical Center, the main campus of the University at Lawrence, and the Parsons State Hospital and Training Center, an institution for the retarded.

The long-range multidisciplinary research program is broadly conceived and focuses on biomedical and behavioral research relevant to mental retardation. Each of the three settings emphasizes specific areas of research. Studies at the Medical Center include reproductive physiology, biochemistry, neurophysiology and fetal and neonatal pathophysiology as well as studies on learning, language, and social behavior. At the Lawrence campus, research features pre-school studies of behavior, and the processes of socialization, communication, and learning. The program at Parsons stresses research in training of children with deficits in language, socialization and adaptive behavior, in academic attainment and vocational skills.

The design of the research center is based upon several basic issues. The first is that mental retardation is a dynamic, developmental disorder and lends itself to intervention of a preventative, ameliorative and/or educational nature starting in infancy and extending throughout the life cycle of the individual. The second is that the problem is both biological and behavioral and calls for a number of research approaches that combine personnel from the several relevant fields. The third is that the problem is broad and complex and calls for a sustained, coordinated effort by investigators who study the retardate in both controlled and naturalistic environments. The fourth is that there are a large number of professionals and non-professionals who need the products of research centers and who require that the products are given to them in a form which they can understand and use. The fifth is that, since the number of researchers and settings undertaking significant research with the retarded are relatively few in number, the center should undertake to train additional research specialists to plan and execute research in other settings. Research at the Kansas Center thus approaches the

University of Kansas Medical Center

UNIVERSITY OF KANSAS, LAWRENCE, KANSAS (Contd.)

problem of mental retardation from conception to the optimum development of adult skills. The rationale is thus to touch on the whole continuum -- to design, develop, demonstrate and disseminate data stemming from research in the several thematic areas noted.

Estimated completion date:	1971

University of Kansas, Lawrence, Kansas

Parsons State Hospital and Training Center, Kansas

UNIVERSITY OF COLORADO, DENVER, COLORADO

B. F. Stolinsky Research Laboratories

The center in Colorado is the smallest of the functioning research groups created under P.L. 88-164. It is also unique in that it operates as a division of the Department of Pediatrics rather than as an autonomous academic unit. This arrangement has had two consequences: in the first place, it has encouraged links with other departments in the school, notably with Biochemistry and the divisions of neurology and endocrinology in Medicine; in the second, it has led to a series of programs which, whilst deploying fundamental technology, are all very directly concerned with problems of development in children and especially with preventing mental retardation.

The program is largely biomedical in focus, with groups working in trace metal nutrition, inborn errors of metabolism, the gene defect in diabetes and the biochemical growth of the mammalian brain. The mass spectroscopy laboratory is primarily concerned with extending our diagnostic capacity in metabolic disease. The only embryology laboratory in the Medical Center is in the Stolinsky Laboratories. A cytogenetics unit utilizes automated technics with the capacity for relatively extensive surveys and more detailed morphological karyotype analyses.

There is a program in developmental pediatrics and a substantial PKU clinic. The objectives of this group are very practical - namely, to develop increasingly effective technics which can be applied by non-professional personnel, to screen for developmental retardation in pre-school children. It is appropriate that there is a strong educational research program in the associated care center orientated to this age group.

Total cost of project:	\$440,000
Federal share:	330,000
Date of award:	12/22/66
Completion date:	7/1/68

B. F. Stolinsky Research Laboratories, University of Colorado, Denver

UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, NORTH CAROLINA

This National Mental Retardation Research Center has two major units: the Biological Sciences Research Center and the Frank Porter Graham Child Development Center.

The Biological Sciences Research Center addresses itself to the problems of development and maturation of the central nervous system and to the manifold causes of biological mental retardation. Its research programs include reproductive physiology, experimental embryology, developmental neurochemistry, neurophysiology, and neuroendocrinology. Applied laboratory research on the application of analytical, chemical techniques to the detection of metabolic disorders of genetic origin is also in progress.

Included in the Biological Sciences Research Center is a clinical diagnostic and training program (Division for Disorders of Development and Learning) which sees some 150 patients each year. A pilot day nursery program for these patients has been established.

The Division of Child Psychiatry operates a research inpatient unit for emotionally disturbed children. Research in this unit centers around behavior modification and the use of parents as co-therapists.

Investigators at the Frank Porter Graham Child Development Research Center are engaged in a series of programs focusing on the study and stimulation of developmental processes of the young child, particularly the child from

University of North Carolina, Chapel Hill, North Carolina

UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, NORTH CAROLINA (Contd.)

limited resource environments. Current investigations involve a variety of disciplines in studies which include the investigation of environmental stimulation on the development of the child, the design of curriculum material to stimulate thinking processes, and the study of the transmission of infectious diseases in young children. A population of 40 children currently are seen daily in day care and preschool settings that provide the base for such studies.

Additional planning is being carried out to execute similar multidisciplinary work, long range research programs in the stimulation of young infants, the establishment of a program and materials development and evaluation unit for early childhood program, the study of the development of cognitive styles and sets in preschool children and the impact of individualization of instruction on primary school age children.

Total cost of project:	\$3,423,241

Date of award:	11/66
Estimated completion date:	
B.S.R.C.:	11/70
F.P.G. Center:	4/71

UNIVERSITY OF CHICAGO, CHICAGO, ILLINOIS

The Joseph P. Kennedy, Jr., Mental Retardation Research Center is located in the Silvain and Arma Wyler Children's Hospital at the University of Chicago. The Center has been designed to place in a University medical school a balanced program to provide care, training and research in an integrated fashion. It is particularly hoped that all of the activities of the Center will be correlated with other programs within the medical school so that maximum advantage might accrue from the setting in a major medical school, medical center, and research center. A part of the research center is contiguous with the Chicago Lying-In Hospital which provides a resource for studies of prematurity and obstetrical conditions leading to retarded development. The Mental Development Clinic also serves as a source of patient material for research activities of the various basic science groups. This greatly facilitates our goal of achieving a close correlation of basic science and clinical medicine.

The components of the program are: Basic science research in biochemistry, genetics, cell differentiation, neuroendocrinology, neurochemistry, virology, and the operation of the Mental Development Clinic. The goal of these programs with respect to the practical and social significance of mental retardation may be outlined as follows: 1) bring to the care and prevention of mental retardation as rapidly as possible the fruits of medical and biological research, 2) develop basic knowledge in the area of growth and development so that a more basic understanding can be brought to bear on the fundamental problems of mental retardation, 3) where possible, to more directly apply techniques of biochemistry and cell biology to elucidation of the etiology and treatment of mental retardation, 4) afford model care for a limited population of mentally retarded children, 5) provide training in the care of patients with mental retardation at different levels, 6) assure exposure of a maximum number of medical students and pediatricians to the problems of mental development, 7) train a limited number of physicians as specialists in the care of the retarded, 8) provide for the interchange of information and interests between personnel working directly with patients and basic scientists in order to bring a maximum of intellectual effort on the problems of mental development.

Joseph P. Kennedy, Jr.
Mental Retardation Center

Amount of award: \$59,300
Date of award: 9/66
Completion date: 12/67

UNIVERSITY OF WISCONSIN, MADISON, WISCONSIN

The University of Wisconsin has under construction a combined research and university-affiliated center containing laboratories and facilities for biomedical and behavioral research, experimental classrooms and sheltered work area. The center is committed to the philosophy of interdisciplinary research, where needed and feasible.

The Biomedical Unit has three differentiated but coordinated programs. Neurophysiology is investigating the problems of cerebral localization in sensory and motor systems, the interrelations of different systems and the contribution of each level of the brain to neural functions and behavior. In neuroendocrinology, emphasis is directed toward the role of the central nervous system in the regulation of hormonal factors in reproduction. The effects of inborn errors of metabolism on intellectual functioning are well established and an ongoing part of the research program.

The Behavioral Unit is composed of sections concerned with infant development and the behavioral, social, communication and treatment processes. Studies will focus on early detection of mild retardation and the acquisition of adaptive capabilities; cognitive and personality development; learning, reinforcement, attention and environmental influences; speech reception and reproduction, language acquisition; social processes and organizations; counseling, education and rehabilitation processes.

Total cost of project:	\$3,219,474
Federal share:	2,263,000
Date of award:	1/67
Estimated completion date:	9/72

Mental Retardation Center, University of Wisconsin, Madison, Wisconsin

YESHIVA UNIVERSITY, BRONX, NEW YORK

The Rose F. Kennedy Center is an integral, interdepartmental unit of the Albert Einstein College of Medicine of Yeshiva University. It occupies a newly constructed 10 story research building in which are conducted multi-disciplinary research, research-training and clinical research services with a broad approach to mental retardation and other aspects of development disability. Patient facilities include an inpatient clinical research unit, a genetic counselling clinic, a Children's Evaluation and Rehabilitation Clinic, and an outpatient clinic for follow up of patients being studied by investigators in the Center.

The staff of senior investigators from the faculty of the College of Medicine and from other professional schools of Yeshiva University has been drawn from the behavioral sciences, the biomedical sciences and the biosocial sciences.

Important research highlights include:

- Work of a pioneering nature in the study of interneuronal communication mechanisms in developing cell systems and of abnormal processes that interfere with the establishment or formation of direct cell to cell communication.

- Development of testing procedures for the early identification of deafness through behavioral and neuropsychologic techniques.

- Accumulation of data on the behavioral development of children from birth to two years which show specific patterns resulting from social, familial and physical characteristics of the environment.

- Establishment of a learning center which is concerned with studying processes underlying educational failures and developing preventive, corrective and remedial procedures for helping children to learn.

- Evaluation of current rehabilitation techniques for handicapped and retarded children.

- Studies of biochemical genetics and chromosome aberrations.

- Epidemiologic studies of the effect of malnutrition on intellectual and physical development.

- Development of a program of pediatric dentistry for handicapped children.

- And finally, transmitting its expertise and findings through consultations, clinical services and training programs to schools, health departments, state psychiatric hospital and schools, and other facilities for children and adults in the New York area.

YESHIVA UNIVERSITY, BRONX, NEW YORK (Contd.)

- The Children's Evaluation and Rehabilitation Clinic, through its service, teaching and training activities, has pursued programs which are essentially those of a University Affiliated Facility for training for service to families of children with developmental disabilities.

UNIVERSITY-AFFILIATED FACILITIES CONSTRUCTION PROGRAM
FOR THE MENTALLY RETARDED

The program of Federal assistance for the construction of university-affiliated facilities for the mentally retarded was authorized under P.L. 88-164, "The Mental Retardation Act of 1963," and extended until 1973 under the Developmental Disabilities Services and Facilities Construction Act of 1970 (P.L. 91-517). This program includes provision of grants for the construction of university-affiliated facilities with programs for the developmentally disabled. Twenty university-affiliated facilities have been approved for funding under the authority of P.L. 88-164. Nineteen of these received funds from Title I, Part B of that Act and one from Title I, Part A.

The primary purpose of the University-Affiliated Facilities Construction program is to provide facilities for the clinical training of professional and technical personnel essential for diagnostic services and the care, education, training, and rehabilitation of the mentally retarded individual and his family. Each facility is encouraged to conduct a comprehensive interdisciplinary training program integrating and coordinating the full range of professional and technical personnel concerned with mental retardation so that each discipline may be fully familiar with its own contributions and those of related disciplines to the total effort in the field of mental retardation. A full range of individual and group services and demonstration of new techniques and concepts in services for the mentally retarded are considered important elements in university-affiliated facility programs, and research incidental or related to activities conducted within the facility is authorized.

This construction program is administered by the Division of Mental Retardation, Rehabilitation Services Administration, Social and Rehabilitation Service, U. S. Department of Health, Education, and Welfare. The following descriptions review the types of facilities and programs which have been supported with these funds and the current status of their construction. Total costs indicated as "UAF" costs refer to a portion of a building or complex of buildings to which Federal participation is limited.

UNIVERSITY OF ALABAMA MEDICAL CENTER AT
BIRMINGHAM AND TUSCALOOSA, ALABAMA

The University of Alabama program is based at two locations, one in Birmingham and the other at Tuscaloosa.

The Medical School at Birmingham presently maintains a variety of services for the mentally retarded which serve as a base for training and will be expanded to increase diagnostic and evaluation capacity coupled with an intensive program of treatment and professional training in various disciplines.

University of Alabama Medical Center, Birmingham, Alabama

The Tuscaloosa facility presently provides specialized graduate training in a variety of disciplines including clinical psychology, experimental psychology, social work, special education, and communication disorders. Interdisciplinary clinical, research and educational programs were developed as a part of the Center program.

The Partlow State Hospital, located adjacent to the Tuscaloosa campus, with an inpatient population of 2,000, will utilize to maximum advantage the behavioral sciences faculty at the main University. Interdisciplinary training utilizing joint appointments in the University and the facility and the dual relationship with the University and Partlow School, will result in the application of knowledge of recent advances in research, training and service for the mentally retarded.

Training programs are coordinated through an advisory council consisting of the Deans of Medicine, Dentistry, Arts and Sciences, Education and the Graduate School. An interdisciplinary advisory committee consisting of the

UNIVERSITY OF ALABAMA MEDICAL CENTER AT
BIRMINGHAM AND TUSCALOOSA, ALABAMA (Contd.)

Chairman of the subgroups in the various schools and colleges of the University supervises training. The council, the committee and the Directors of the Tuscaloosa and Birmingham facilities are under the administrative direction of the Vice President of the University for Medical Affairs.

Total UAF cost:	\$2,907,326
Federal share:	2,180,494
Date of award:	11/65
Completion date:

Birmingham:	1/69

UNIVERSITY OF CALIFORNIA, NEUROPSYCHIATRIC INSTITUTE,
LOS ANGELES, CALIFORNIA

The Mental Retardation University-Affiliated Facility of the University of California Neuropsychiatric Institute is housed in a new four-story addition to the existing UCLA Medical School Complex.

The Mental Retardation Unit provides three 20-bed wards, one for young severely retarded children, one for ambulatory retarded children, and one for older children with varying degrees of retardation. The fourth floor houses the school facilities.

All children coming to the UCLA Medical Center, both inpatients and outpatients, are screened in the general pediatric clinic, and mentally retarded patients are referred to the Neuropsychiatric Institute for extensive diagnostic studies and evaluation. The outpatient department functions as a part of the total program at the present time. The major effort in mental retardation has been based at the Pacific State Hospital at Pomona, and the center will provide a facility to bring widely distributed services and training sites together.

University of California, Neuropsychiatric Institute
Los Angeles, California

UNIVERSITY OF CALIFORNIA, NEUROPSYCHIATRIC INSTITUTE,
LOS ANGELES, CALIFORNIA

The inpatient and outpatient evaluation and treatment program is utilized to support the interdisciplinary training effort that is being undertaken. Students in fields such as psychiatry, pediatrics, other branches of medicine, psychology, social work, special education and nursing are receiving training. All students have an opportunity for close interaction with extensive research programs carried out in the Center for Research in Mental Retardation and Related Aspects of Human Development funded under Title I, Part A, P.L. 88-164. (See Page 7).

The State Department of Mental Hygiene will provide basic research and training support for the center. The Schools of Education and Social Work of UCLA are associated with the Pacific State Hospital in coordinated research efforts. The interdisciplinary training program is broadly based within the center and is allied with the interdisciplinary research training program supported by the State and the U.S. Public Health Service.

Total UAF cost:	\$4,232,196
Federal share:	2,638,355
Date of award:	7/65
Completion date:	12/68

JOHN F. KENNEDY CHILD DEVELOPMENT CENTER AND B. F. STOLONSKY RESEARCH
LABORATORIES, UNIVERSITY OF COLORADO, DENVER, COLORADO

The Center is adjacent to an existing day care center located on the main campus of the Medical School. It is a three story building providing space for pediatricians, nurses, clinical psychologists, social workers, nurses, nutritionists, dentists, audiologists and speech therapy personnel in training. A special feature of the Center is a large indoor play area and school room where children may be observed.

Students from the Schools of Social Work and Psychology of the Denver University will be assigned to the Center. Students from the Departments of Physical Medicine and Special Education of Colorado State University will also be provided with training opportunities in an interdisciplinary teaching environment.

The importance of the Center in the overall State effort is exemplified by the Center's designation as a Regional Center in Mental Retardation. Training programs are coordinated through the Director of the Center who has a Medical School appointment. Interdisciplinary research and clinical efforts in the Stolinsky Laboratories associated with the Center are being conducted to discover the causes, prevention and treatment of developmental deviations and their attendant emotional disorders.

Total UAF cost:	\$535,675
Federal share:	369,000
Date of award:	1/66
Completion date:	7/68

John F. Kennedy Child Development Center
and B. F. Stolinsky Research Laboratories
University of Colorado, Denver, Colorado

GEORGETOWN UNIVERSITY, WASHINGTON, D. C.

The University-Affiliated Center, which is an integral part of the Medical School complex, will be directed toward meeting the needs of the training effort related to: (a) more complete diagnostic evaluations, (b) longitudinal management and rehabilitation of the mentally retarded, (c) training of medical students, physicians and nurses. The social behavioral components in training involve other local universities, e.g., psychology students come from Catholic University, special education students from George Washington University, and social work students from Howard University under a consortium agreement to assure interdisciplinary training in which training content is determined by the affiliated universities. A small preschool nursery is staffed by the St. Johns Developmental School, a community facility. The District of Columbia, Virginia, and Maryland Departments of Vocational Rehabilitation will provide patient prevocation evaluations and will be closely allied with the Center.

Emphasis in the intramural phase of the program will be on early diagnosis and comprehensive programming for the preschool child. Diagnostic classrooms will be an essential resource for the program, with a special interest in individuals having both auditory and visual handicaps. Training in inpatient care will be provided in a 29-bed unit.

The Center will offer training in the fields of social work, special education, sociology, theology, and law, in addition to the biomedical professions, in an interdisciplinary approach to the problems of mental retardation. An extramural program directed at existing community resources of high quality will allow training programs and services to be integrated into the comprehensive needs of the mentally retarded in the metropolitan Washington area.

Total UAF cost:	\$2,000,000
Federal share:	1,500,000
Date of award:	2/65
Completion date:	2/70

Georgetown University, Washington, D. C.

UNIVERSITY OF MIAMI, MIAMI, FLORIDA

The Mailman Child Development Center will be located on the campus of the School of Medicine of the University of Miami, within the immediate vicinity of the Jackson Memorial Hospital and the National Children's Cardiac Hospital, which are teaching hospitals for the Medical School.

The Center provides an opportunity to make training in mental retardation a part of the learning experience of all medical, nursing, psychology, social work, special education, speech and law students. Students from the University of Miami, Florida State University, Barry College and the University of Florida will participate in the training programs. The programs will be devoted to seeking the causes and means of prevention as well as the methods of ameliorating psycho-social and medical effects of mental retardation and other handicapping conditions.

Training programs are under the supervision of a Director appointed by the President of the Main University. The Director serves as chairman of the interdisciplinary training committee whose members are selected by the Dean of the appropriate schools or colleges in the University.

Patients are admitted by referral from community and social agencies as well as private physicians. They will range in age from infancy to the older adults, and all levels of retardation will be seen and evaluated. The bulk will come from Dade and Broward Counties; however, there will be no geographical restrictions on admission.

Total cost:	\$4,072,575
Federal share:	3,054,432
Date of award:	11/66
Estimated completion date:	12/70

University of Miami, Miami, Florida

GEORGIA RETARDATION CENTER, GEORGIA DEPARTMENT OF PUBLIC HEALTH,
ATLANTA AND ATHENS, GEORGIA

A facility located in Atlanta and a satellite facility to be built in Athens on the University of Georgia campus will comprise the Center.

Atlanta

The University Affiliated Center for the mentally retarded will be a part of a large state residential Mental Retardation Center in Atlanta. This comprehensive residential facility will serve approximately 1,000 resident retardates, and provide day care services for an additional 500 retardates. The following colleges and universities will be affiliated in the training programs of the Atlanta facility in the disciplines as indicated: 1. Atlanta University - special education and social work; 2. Interdenominational Theological Center - religious therapy; 3. University of Georgia - speech and hearing, recreation for the handicapped, special education, child development, guidance and counseling, vocational rehabilitation, psychology, and sociology; and 4. Emory University - pediatrics, psychiatry, physical medicine, physical therapy, occupational therapy, special education, nursing, psychology, sociology, religious therapy, and speech and hearing. All of the affiliated training programs will be at the graduate level, and the facilities will be made available insofar as practicable for undergraduate instruction.

Training programs are conducted through an Advisory Board for Training chaired by the Assistant to the Superintendent for the Georgia Retardation Center, members representing each university or college affiliated with the Center.

Georgia Retardation Center, Dekalb, Georgia

Athens

The Athens Facility at the University of Georgia will accommodate forty short term residents and forty retardates in the day care program. The facility will serve as a laboratory to teach diagnostic and therapeutic measures for speech pathologists in language, speech, and hearing problems of the mentally retarded. The University of Georgia, Department of Psychology presently conducts a psychological clinic as part of the program, training of clinical psychologists.

INDIANA UNIVERSITY MEDICAL CENTER,
INDIANAPOLIS AND BLOOMINGTON, INDIANA

This Center for Mental Retardation consists of two facilities, one at the Indiana University Medical Center, Indianapolis, and the other at the Indiana University Campus in Bloomington, Indiana.

Primary training responsibility for student trainees will be under the direction of the appropriate departments. The program will be administered by two working committees and a steering committee under the direction of the Vice President for Research and Advanced Study at Indiana University. These working committees are the Professional Advisory Committee, Riley Child Development Center, and the Professional Advisory Committee.

Riley Hospital Child Development Facility, Indianapolis

This Facility will become a part of the Riley Hospital for Children, which is the only hospital in the state devoted entirely to the care of children. It has served as a referral Center for all difficult cases of pediatric diagnosis and treatment, and over 50% of the children are referred from throughout the state to the hospital. At least 40% of the children seen in the outpatient clinic are diagnosed as mentally retarded. Family interactions that are critical to mentally retarded youngsters have long been explored.

The physical plan of the Facility takes into account the latest trends in patient care, particularly ambulatory services. The consultative diagnostic and treatment clinic serves as a comprehensive consultation service to physicians within the state and also serves as a major educational activity at the Medical School. Pediatric residents are assigned to the Facility for three-month periods, and senior medical students are assigned to the clinic as part of a six-week pediatric training program. Students from the School of Nursing and the allied health professions, i.e., social work, psychology, audiology, occupational therapy, and speech therapy, attend sessions within the Facility.

As each patient is diagnosed and evaluated, an effort is made to develop continuity care and the designation made of specialty clinics which will be beneficial to the retardate after his return to the referring physician or his home.

Indiana University Developmental Training Facility, Bloomington

This Facility is located adjacent to the laboratory school.

The Bloomington Facility will house 48 children in eight "home units" arranged as "row houses." Each unit will be autonomous in that it will have the normal features found in a home and an attached apartment for cottage parents who will provide a home atmosphere and individuality for each unit.

INDIANA UNIVERSITY MEDICAL CENTER (CONTD.)

Coordination of training programs between the Riley Hospital Child Development Facility and the Indiana University Developmental Training Facility will be established. The Bloomington Facility will profit from consultation and guidance received from the Indianapolis Facility in the areas of pediatrics, neurology, psychiatry, nursing, and social work. Likewise, the Indiana University at Bloomington will provide consultation to the Riley Facility in the behavioral sciences, speech and hearing, special education, counseling and recreation.

Total UAF cost:	\$4,277,635

Indiana University Developmental Training Facility
Bloomington, Indiana

UNIVERSITY OF KANSAS AND PARSONS STATE HOSPITAL: LAWRENCE, KANSAS
CITY, AND PARSONS, KANSAS

The University-Affiliated Facility to be constructed in Kansas will consist of three buildings - one to be located at the University of Kansas at Lawrence,, one at the Kansas University Medical Center at Kansas City, and one at the Parsons State Hospital. These Facilities will be adjacent or additive to the three buildings comprising the Kansas Center for Research in Mental Retardation and Human Development currently under construction. The multiple locations of the Kansas combined Center facilities make possible the utilization of varied research and clinical training resources. The three locations allow for the exploitation of resources of: (1) the academic community with its faculty and student population; (2) a modern medical center located in the heart of a metropolitan area; (3) a progressive residential construction project. Construction funds for the Kansas Center for Research in Mental Retardation came from Title I, Part A, P.L. 88-164. The combined Center in Mental Retardation will be coordinated by and administratively responsible to the Bureau of Child Research of the University of Kansas. Since 1957, the Parsons State Hospital, the Kansas University Medical Center, and the Bureau of Child Research have been engaged in behavioral and biological research and interdisciplinary training on a cooperative basis. The new construction will make possible the expansion and long-term projection of these activities.

The Medical Center serves the State of Kansas and adjoining areas as a major referral center for individuals with all types of behavioral and diagnostic problems. The University-Affiliated Facility will provide service and training programs on each campus to improve comprehensive evaluation for patients. In addition both patients and their families will have access to a comprehensive longitudinal care program centrally directed.

Training programs are conducted in an interdisciplinary environment in pediatrics, special education, psychiatry, nursing, speech and hearing, psychology, dietetics and nutrition, and social service.

The Lawrence Facility will draw upon all of the resources of the University and will include a large number of trainees which will serve as a primary resource for recruitment and for pre-professional training. The staff of the Lawrence Facility will share responsibilities at the other two settings in the training of disciplines mentioned above, and an emphasis on developmental factors will be stressed in the following areas: parent counselling, behavioral training, the importance of community and environment, social and educational skills, and learning processes.

Parsons State Hospital and Training School

The Facility at the Parsons State Hospital and Training School will consist of a medical evaluation treatment section, a behavioral and evaluation section, and a section for audio-visual production. The plan for training clinical specialists at both Parsons and Kansas City will enable the training coordinators to draw upon resources of both the Research Center and the University-Affiliated Facility.

UNIVERSITY OF KANSAS (Contd.)

An administrative and coordinated structure has been organized in such a way that the levels of training responsibility are specified. A training director at each Facility will be responsible to the Center Director stationed on the Lawrence Campus. The training staff will stress the importance of interdisciplinary training and the need for proper utilization of inter-campus resources.

Total UAF cost:	\$3,860,000
Federal share:	2,729,400
Date of award:	4/69
Estimated completion date:	7/72

University of Kansas University-Affiliated Facility

THE JOHN F. KENNEDY INSTITUTE (CHILDREN'S REHABILITATION INSTITUTE)
BALTIMORE, MARYLAND

The Children's Rehabilitation Institute is affiliated with the Johns Hopkins University Medical School, and faculty recognition and status has been given to the Institute staff. The Institute is placing major emphasis on the following three program areas of greatest concern: (a) recruitment of high-caliber students and personnel from all disciplines to the field of mental retardation, (b) providing broader training and concepts for all Johns Hopkins medical, nursing and professional personnel who come in contact with the retarded and (c) helping to foster interdisciplinary understanding of the problem of mental retardation in the medical school, university, and the community.

The program within the Facility stresses the importance of the habilitation of the mentally and physically handicapped child. Special emphasis is placed on the treatment of both the child and family by flexible use of inpatient and outpatient services with the primary aim of returning the patient to the community as a functioning member of society. The Institute makes full use of the multidisciplinary clinic approach by providing a full range of diagnostic, evaluation and therapeutic services. Such services help develop a better understanding of the problem and make possible better long-term management of the child by the family.

The John F. Kennedy Institute
(Children's Rehabilitation Institute) Baltimore, Maryland

An experimental school with a flexible curriculum and program for students ranging in age from five through twenty-one years is included in the institute. The school program includes prevocational training, sheltered

THE JOHN F. KENNEDY INSTITUTE, BALTIMORE, MARYLAND (Contd.)

workshop and work study programs. Residential patient care as well as training for parents is being provided in two residential units where parents are encouraged to live for a few days in order to obtain instruction as to the special needs and best methods of handling their particular child.

Total WAF cost:	\$3,813,256
Federal share:	2,360,250
Date of award:	2/65
Completion date:	11/67

CHILDREN'S HOSPITAL MEDICAL CENTER, BOSTON, MASSACHUSETTS

The Children's Hospital Center is the principal pediatric teaching hospital of Harvard University and a good source for securing referrals of patients who are mentally retarded. The Center serves as a teaching facility in social service, psychology, physical therapy, audiology, and special education for trainees assigned from Simmons College, Northeastern University, Wheelock College and Boston University. In 1929 the Children's Hospital Center created the first inpatient unit in the country where retarded children could be studied and evaluated by a team composed of pediatricians, neurologists, psychologists, and social workers with consultation available in other appropriate specialties including orthopedic surgery, psychiatry, and neurosurgery. The School of Nursing already provides teaching in the care of the mentally retarded. The Simmons College School of Physiotherapy is based at the Children's Hospital with special training being provided for the retarded child with orthopedic handicaps. Teaching in the field of communication disorders is provided. The University-Affiliated Facility is located in the Children's Hospital Medical Center complex.

Children's Hospital Medical Center
Boston, Massachusetts

CHILDREN'S HOSPITAL MEDICAL CENTER, BOSTON, MASSACHUSETTS (Contd.)

Patients of the University-Affiliated Facility will be referred by various clinics and divisions of the hospital and by physicians and community agencies. The Children's Hospital Center serves most of the New England region and is a community hospital for a significant portion of the pediatric population in the Boston area. Where additional consultation in neurology, psychiatry, neurosurgery, otolaryngology, and orthopedic surgery is required, these services will be provided. The University-Affiliated Facility provides a nursery school for intensive observation or for diagnosis and evaluative purposes. After multiple studies have been concluded, evaluation of the patient and needs of family will be discussed and determined and a definitive program will be established.

The University Affiliated Facility maintains close liaison with several schools specializing in the training of nursery school teachers and programs of special training of teachers in the field of mental retardation. A modest program in vocational counseling, under the auspices of the Society for Crippled Children, has been in effect for the past several years.

The Facility is principally staffed by the departments of medicine, psychiatry, communication disorders, neurology and the divisions of psychology and speech and hearing of the Hospital Center. Affiliated training programs with other universities are supervised through the director of the Center with the appropriate heads of departments.

Total UAF cost:	\$1,649,000
Federal share:	863,250
Date of award:	7/65
Completion date:	12/67

EUNICE KENNEDY SHRIVER CENTER, WALTHAM, MASSACHUSETTS

The Walter E. Fernald State School for the Mentally Retarded, which is affiliated with the Massachusetts General Hospital and through it, with Harvard University, is the site of both a University-Affiliated Facility and a Center for Research on Mental Retardation. The Center for Research received a separate award of funds under Part A of P.L. 88-164. These two new units make up the Eunice Kennedy Shriver Center. The Center has two main purposes: (1) To establish research and professional training programs in all the disciplines concerned with the care of the retarded; and (2) To utilize the talents and accomplishments of the research and professional training staff to develop outstanding service programs for both the outpatient and the residential units.

Research programs are conducted in biochemistry, dentistry, epidemiology, genetics, neurology, neuropathology, pediatrics, psychology, psychiatry and special education. There are professional training programs in these same disciplines and also neuroradiology, nursing, nutrition, occupational therapy, ophthalmology, physical therapy, social service, speech pathology and audiology. In addition to the affiliations with Harvard University, joint training and research programs have been established with Boston College, Boston University, Brandeis University, Emerson College, the Massachusetts Institute of Technology, Simmons College and Tufts University.

Service programs are being carried out in close cooperation with the recently developed statewide plan. Emphasis has been on the development of community resources, particularly those which offer alternative patterns of care to residential placement for the mildly and moderately retarded, and the provision of a therapeutic residential environment which will encourage the emotional, social and intellectual development of the profoundly and severely retarded.

Total UAF cost:	\$2,680,000
Federal share:	724,725
Date of award:	4/65
Completion dates:	
University-Affiliated Center:	11/69
Research Center:	7/70

Eunice Kennedy Shriver Center, Waltham, Massachusetts

NEW YORK MEDICAL COLLEGE, NEW YORK, NEW YORK

The University-Affiliated Facility is an integral part of the New York Medical College complex. The Medical College has operated a retardation center since 1950 and has an ongoing inter-disciplinary approach to training, service, and research in the field. The University-Affiliated Facility will allow an additional 500 persons to be accepted for evaluation and service annually. A 20-bed inpatient wing will provide intensive diagnostic, treatment, and training resources, and opportunity for observation of family-patient interaction.

New York Medical College will improve the clinical competence of its training programs by utilizing the Facility to provide a focal point for the diagnosis, care, treatment and rehabilitation of the retarded. With the additional facilities, it is expected that the Facility will accept 500 additional patients annually for evaluation and service. An inpatient wing of the proposed Facility will provide 28 beds for intensive diagnosis, treatment, services and training. Children from infancy through adolescence will be admitted; however, the Facility will serve patients at all levels of retardation--profound, severe, moderate, mild and border line.

The Administrative Director of the Facility is appointed by the Dean of the Medical School. The Director is responsible for the coordination of training from the affiliated universities: Columbia University, Fordham University, New York University.

Training programs will be conducted in pediatrics, psychology, neurology, psychiatry, social work, speech, nutrition, nursing, vocational rehabilitation, special education, physical and occupational therapy, dance, music and art therapy. The Training Program in mental retardation will include all levels of retardation. A variety of individuals, from profoundly to mildly retarded, with associated handicaps, will be represented in the clinical population. Provision is made for re-evaluation, longitudinal studies and management.

Total cost:	\$6,230,861
Federal share:	3,000,000
Date of award:	12/65
Estimated completion date:	8/71

New York Medical College, New York

UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, NORTH CAROLINA

The Division for Disorders of Development and Learning (D.D.D.L.) is a part of the Child Development Institute's Biological Sciences Research Center (B.S.R.C.). This center is located in the University of North Carolina School of Medicine complex, which includes the following Schools: Medicine, Nursing, Public Health, Dentistry and Pharmacy. As a division of the B.S.R.C., the D.D.D.L. is an integral part of the Medical School program.

The primary function of the D.D.D.L. is the training of professional and specialized personnel in the diagnosis, treatment and management of retarded children. Other major responsibilities include working with practicing physicians and state-supported clinics throughout the state, and problem patients from these sources will be accepted and returned to the community after a comprehensive work-up. The D.D.D.L. will be responsible to the program director of the B.S.R.C. It will consist of two related units: (1) the outpatient facility for intensive evaluation, and (2) a day care facility for retarded children. The outpatient facility will be staffed by a multidisciplinary team to evaluate deviations from normal development and the establishment of treatment programs for the retardates and their families. Longitudinal follow-up will be a part of the program. The day care center will be utilized as part of the treatment program and will likewise involve a wide variety of necessary disciplines.

Approximately 150 new retarded patients will be seen and evaluated annually, and a follow-up system will be instituted to cover a minimum period of five years and return visits will eventually increase from 1,000 to 1,200 annually.

University of North Carolina, Chapel Hill, North Carolina

UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, NORTH CAROLINA (Contd.)

Twenty children will be enrolled in the day care unit. The day care facility will serve as a diagnostic facility for prolonged observation of children suspected of mental retardation.

Total cost:	\$667,748
Federal share (UAF):	500,811
Date of award:	9/66
Estimated completion date:	11/70

OHIO STATE UNIVERSITY, COLUMBUS, OHIO

This University-Affiliated Facility will provide programs in twenty-six areas concerned with prevention and problem solving in mental retardation. The Facility will also contain programs to train child care aides, home instructors, developmental and remedial physical educators, and will conduct a wide range of tutorial seminars and training sessions for currently active professional and non-degree candidates.

Coordination with the State mental retardation plan for Ohio insures that the program will meet the realistic needs of the community and the region. The training and planning has been interwoven with the community needs and is based upon interdisciplinary evaluations, management, and long-term planning. Training programs will be coordinated through a training committee which represents the appropriate schools and colleges, all of which are on the same campus.

The various colleges within the University have been quick to grasp the opportunities which the Facility training program provides: extension of the breadth of current training programs and introduction of significant areas of research for more effective prevention and limitation of the impact of mental retardation on the child.

Referral of children and their families, or young adults will be made by health, educational, or social agencies as represented by the family physician, the public health nurse, the school principal, a special class teacher, the county welfare agency or a professional person with a voluntary health agency. The children to be seen will range from the mildly to the profoundly retarded. The age range is expected to be 0-21 years, however, older persons may be considered for assessment.

From the ambulatory or outpatient evaluations area, arrangements can be made to admit a patient to one of the 22 inpatient beds further studies. Other indications for admission will be the occurrence of acute illness, children who are being cared for but cannot be managed at home, and social crisis of short duration in the family.

Ohio State University, Columbus, Ohio

OHIO STATE UNIVERSITY, COLUMBUS, OHIO (Contd.)

Complementing the inpatient and outpatient services as an integral part of the Facility operation is a Family Evaluation Unit made up of six motel-like facilities which will enable the family of the retardate to stay for the short time necessary for evaluation. There will also be an adolescent unit made up of 28 beds (14 for boys, 14 for girls), concerned primarily with preparing previously institutionalized retardates in their teens and late teens for return to the community.

Total cost:	\$4,950,000
Federal share:	3,600,000
Date of award:	1/69
Estimated completion date:	12/71

UNIVERSITY OF OREGON, PORTLAND AND EUGENE, OREGON

The Center will consist of two Facilities, one in Portland on the Medical School campus and one in Eugene on the University of Oregon campus. Both units will become the components of an ongoing professional training and demonstration program. The proposed inter-campus Center plan is predicated on the successful experience in a similar program in speech pathology and on 18 months experience with an ongoing pilot project in mental retardation being carried on at both campuses.

The Crippled Children's Division of the Medical School will implement the policy of the University-Affiliated Facility and the Oregon School of Education at Eugene will plan and execute the curriculum and course work for joint training of special education personnel in mental retardation and handicapping conditions.

The School of Social Work at Portland State College and the State Department of Special Education will participate in the training program to meet the training needs of the State. A physician with specialized training in the field of pediatrics will be assigned by the Medical School to the Eugene facility to be responsible for the medical and biological aspects of the teaching program on the University campus.

University of Oregon, Portland, Oregon

The Center will make it possible to coordinate and expand the present clinical services provided for the mentally retarded. The Center will have as its objectives: the further development of ongoing training programs; the expansion of the Mental Retardation Laboratory Clinic; the development and enrichment of curriculum development; the provision of an adequate number of specialized personnel needed within the communities of the State for the mentally retarded; the introduction of the interdisciplinary team

UNIVERSITY OF OREGON, PORTLAND AND EUGENE, OREGON (Contd.)

concept for exemplary patient care; the training of graduate and post-graduate students in the biomedical and behavioral sciences; development of short-term courses and institutes for practitioners in medicine, dentistry, and allied health personnel to enhance the opportunity for individual trainees to benefit in a multidisciplinary setting.

Total cost:	\$4,953,476

Portland:	5/70
Eugene:	11/69

UNIVERSITY OF TENNESSEE, MEMPHIS, TENNESSEE

The University-Affiliated Facility, known as the University of Tennessee Child Development Center, is part of the University of Tennessee Medical Center, and, like its parent organization, serves the Midsouth area. The Child Development Center provides direct services to the mentally retarded, functions as an information and referral agency, and also serves as a clinical training facility for students enrolled in several Midsouth universities and colleges. A large percentage of the patient population is in the lowest socio-economic group which constitutes the high-risk segment of the mentally retarded population within the state. The staff of the Center has been active in the Memphis area in developing special education classes in public schools for the educable and the trainable, the development of a day care program for the severely retarded, the development of a preschool program for the mildly and the moderately retarded, the development of sheltered workshops, and the development of special classes for children with visual-perceptual motor handicaps.

Training is offered in several medical specialties, dentistry, nursing, speech pathology and audiology, psychology, nutrition, social work, special education, rehabilitation counselling, occupational therapy, and physical therapy. Training efforts are directed at both graduate and undergraduate levels. In addition to inpatient and outpatient service programs and special education classes, a day care program and a preschool program are planned.

University of Tennessee, Memphis, Tennessee

UNIVERSITY OF TENNESSEE, MEMPHIS, TENNESSEE (Contd.)

The Center will provide improved services and education in the special education classes and teachers from Memphis State University in the training program will receive a practicum experience by observation of the retarded child from the diagnostic and evaluative process through the classroom experience. The Inpatient facilities will permit more intensive studies of patients and increase the training and research potential. Closed circuit television and one-way viewing windows in observation rooms will be utilized to observe the interdisciplinary approach in combating retardation.

Total cost:	\$4,536,330
Federal share:	3,199,710
Date of award:	3/66
Completion date:	11/70

UTAH STATE UNIVERSITY, LOGAN, UTAH

This University-Affiliated Facility will be located on the Logan campus adjacent to the north wing of the Edith Bowen Laboratories School. The Departments of Special Education, Psychology, Social Work, Audiology-Speech Pathology, Family Life and Child Development, Elementary Education and the Department of Health, Recreation and Physical Education will cooperate in using the facility for the training of professional personnel in the field of mental retardation.

Students from the Department of Special Education, Utah State University, and Idaho State University, will receive specialized training in educational diagnosis of retarded children that will be extended to master degree candidates in remedial reading and in mental retardation. Students in psychiatry at the College of Medicine at the University of Utah will participate in short-term internships established in cooperation with the Director of Child Psychiatric Services at the College of Medicine. Students in nursing training at Weber State College will participate in short-term internships for training in medical training required by retarded persons who receive comprehensive diagnosis and evaluation.

The administration of the Facility will be under the direction of the Dean of the College of Education who will be assisted by the Head of the Department of Special Education. An advisory board will be established whose functions will consist of the development of long-term program plans for future expansion of the Facility; clarification of problems involving interagency communication; review of training proposals; and consultation in hiring of personnel.

Total cost:	\$911,406
Federal share:	682,054
Date of award:	2/68
Estimated completion date:	12/71

Utah State University, Logan, Utah

UNIVERSITY OF WISCONSIN, MADISON, WISCONSIN

The University of Wisconsin Center in Mental Retardation and the Related Aspects of Human Development will provide a unique opportunity for training professional personnel in a multi-disciplinary approach to inpatient research and clinical services in the area of mental retardation. The Center is composed of a University-Affiliated Facility and a Research Facility funded under Title I, Part A of P.L. 88-164.

The Director of the Center is responsible to the Vice President of the University. The Center Director has the responsibility for coordination of the many activities being carried on in the Center. He is responsible for coordination of: the Biomedical Services Research Unit; the School Rehabilitation Unit; the High Risk Population Laboratory; and the Central Wisconsin Colony Unit. He is also responsible for developing and monitoring the Center training programs.

The programs to be conducted within the University-Affiliated Facility are structured so they will provide appropriate training in the research aspects of mental retardation as well as the training of professional personnel in the various disciplines considered necessary to provide a full range of services for the diagnosis and treatment, education, training, or care of the mentally retarded.

The Diagnostic and Treatment Outpatient Unit of the Facility will provide a full range of disciplines required in the comprehensive diagnosis of the mentally retarded, and it will serve as a major training resource for students in all fields represented and will provide a unique opportunity for interdisciplinary training.

University of Wisconsin, Madison, Wisconsin

UNIVERSITY OF WISCONSIN, MADISON, WISCONSIN (Contd.)

The Central Wisconsin Colony Inpatient Unit of the Facility will be an integral resource because of its unique relationship with the University in providing training opportunities for faculty and students of the University of Wisconsin. (The units located at the Central Wisconsin Colony do not receive any federal construction support).

The School Rehabilitation Unit of the Facility will have as its major objectives: the development and demonstration of new and improved techniques of education and rehabilitation; and the training of teachers and vocational rehabilitation personnel.

Total cost:	\$6,992,731
Federal share UAF:	2,616,783
Federal share Research:	2,263,000
Date of award:	1/69
Estimated completion date:	9/72

UNIVERSITY OF CINCINNATI AND CHILDREN'S HOSPITAL MEDICAL CENTER
CINCINNATI, OHIO

The University-Affiliated Facility in Cincinnati has as its major purpose the training of professional personnel in disciplines providing services to individuals with mental retardation and related developmental disabilities through University supervised and coordinated interdisciplinary programs. Students and trainees representing 18 disciplines and specialties from the University of Cincinnati and several local colleges are presently receiving training from faculty and consultants of 45 academic departments or specialties. An Advisory Council, chaired by a Vice Provost and with members designated by Deans of participating colleges, informs the University Administration about the Facility, and coordinates and keeps in balance the interdepartmental program.

The professional training program will be conducted in a setting designed to offer, in conjunction with the rest of the Children's Hospital and Medical Center and community agencies, the necessary continuum of comprehensive care through a complete gamut of interdisciplinary services for infants, children, and adolescents with developmental disabilities. The faculty and students will study, demonstrate, and evaluate optimal techniques for casefinding, diagnosis, treatment, counseling, education, and training, as well as alternative methods for delivery of services to the developmentally disabled from all socioeconomic levels. Clinical and applied research (including prevention) and research in behavioral sciences will complement and supplement the basic biological research programs of Children's Hospital Medical Center's Institute for Developmental Research and Clinical Research Center.

University of Cincinnati, Cincinnati, Ohio

UNIVERSITY OF CINCINNATI AND CHILDREN'S HOSPITAL MEDICAL CENTER,
CINCINNATI, OHIO (Contd.)

The University Affiliated Facility will occupy 45.75 percent of the Convalescent and Services Pavilion, a new four-level structure of 75,000 net square feet, located in the northeast area of the University of Cincinnati "campus," one block from the College of Medicine, and across the street but connected to Children's Hospital. Functioning as a unified, non-fragmented evaluation and treatment complex for children with chronic handicapping disorders, the Pavilion will contain a number of community programs, presently geographically separated, including: Hamilton County Diagnostic Clinic for the Mentally Retarded; Children's Neuromuscular Diagnostic Clinic including the Myelomeningocele and Learning Disabilities Programs; Adolescent Clinic; Cerebral Palsy Center Children's Program; Children's Dental Care Foundation; and the Convalescent Hospital for Children including the Programs for Juvenile Arthritis, Muscular Dystrophy, and Asthma and Allergy. The Pavilion, together with the remodeled and expanded Children's Hospital, Research Foundation, and Institute for Developmental Research, constitute the Children's Hospital Medical Center.

Total cost - Pavilion:	\$4,658,193
UAF :	2,121,975
Federal share:	1,591,481
Date of award:	12/70
Estimated completion date:	1973

UNIVERSITY OF WASHINGTON, SEATTLE, WASHINGTON

The University-Affiliated Facility at the University of Washington is a component of the Child Development and Mental Retardation Center. Clinical training and behavioral research units are housed in one building; an experimental education unit occupies a second building; and a third provides thirteen apartment units for short-term residence.

The Clinical Training Unit has a full- and part-time staff of 70 professionals, representing ten disciplines. Eleven hundred patients from throughout the state made over 9,000 visits to the unit during the past year. In addition, a field team maintained liaison and provided in-service training and consultation to 12 regional clinics and various communities. Over 800 students received training in the diagnosis and management of handicapping conditions such as mental retardation, learning disabilities and others. Included in this number were medical students, pediatric residents and post-doctoral fellows, speech and hearing trainees and fellows, nutrition trainees and fellows, psychology graduate students and interns, psychiatry residents and fellows, nursing undergraduates, pre- and post-masters' nursing students and graduate social work students.

The Experimental Education Unit provides 13 classrooms for children ranging in age from 2-21 years. During the past year, 172 children from 17 different school districts were enrolled. Most of these were children so severely handicapped by mental retardation, emotional or behavior problems or by learning disabilities, that they were unable to participate in regular or special educational programs in their own school districts. The school program places emphasis on behavior modification principles and utilizes a detailed individual analysis of learning and behavior problems, continuous measurement of pupil performance and modification of materials and incentives to meet the needs of the individual child. In addition to the children

University of Washington, Seattle, Washington

UNIVERSITY OF WASHINGTON, SEATTLE, WASHINGTON (Contd.)

admitted to the campus school, 150 children were enrolled in off-campus units under the direction of the staff. Over 800 university students received training in the unit and 6,300 visitors were registered. An extensive program of research is conducted, directed toward the development of improved educational materials and instructional methods.

The Behavioral Research Unit, together with the staff of the Clinical Training Unit, is engaged in a broad program of research related to the environmental, psychological and psychiatric factors involved in deviant development.

A residential facility provides short-term housing for families of children brought in for evaluation. It is also utilized for research on family inter-action, for the training of professional students in home-management problems, and for the training of parents.

COMMUNITY FACILITIES FOR THE MENTALLY RETARDED

The Community Facilities Construction Program was authorized under Title I, Part C of the "Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963" (P.L. 88-164) and provided Federal grants to states to assist in the construction of specially designed public or other nonprofit facilities for the diagnosis, treatment, education, training, or personal care of the mentally retarded, including sheltered workshops which are part of facilities providing comprehensive services. The Developmental Disabilities Services and Facilities Construction Act of 1970 (Title I, Public Law 91-517), replaces the authority of Part C, Title I, Public Law 88-164. Title I of the Act of 1970 authorizes formula grants to states for planning, administration, and construction of facilities for the developmentally disabled. Further summarized information about Public Law 91-517 is in the Introduction on pages v and vi.

A list of definitions describing both the facilities and the services is included on pages 91-92. The program is administered at the state level by an officially designated state agency. Participation in the program requires the development of a state plan for the construction of community facilities for the mentally retarded based on an inventory of needed additional services and facilities. Construction projects are approved in accordance with the provisions of the state plan. Designated state agencies and allocations for construction of community facilities for the mentally retarded are shown on pages 92-95.

As of December 31, 1970, 362 projects had been approved for Federal assistance. The projects are classified by function; additional data is included in tabular form on pages 60-90. Of the 362 projects, 108 have been completed, 95 are under construction, and 170 are in the initial approval stage. The total estimated cost is approximately \$208.4 million and the estimated Federal share is \$74.6 million. Upon completion the projects will provide services to more than 114,000 retardates of which 57,000 have not previously received services, and 57,000 will be provided improved and more extensive services.

This construction program is administered by the Division of Mental Retardation, Rehabilitation Services Administration, Social and Rehabilitation Service, U. S. Department of Health, Education, and Welfare.

DEFINITIONS

I. Facilities:

- A. D&E Clinic (Diagnostic and Evaluation Clinic): A facility providing diagnostic and evaluation services only.
- B. Day Facility: A facility operating for care and treatment of the mentally retarded on less than 24 hour-a-day basis, providing diagnosis (and evaluation), treatment, education, training, personal care or sheltered workshop services.
- C. Residential Facility: A facility operating for care and treatment of the mentally retarded on a 24 hour-a-day basis providing diagnosis (and evaluation), treatment, education, training, personal care, or sheltered workshop services.

II. Services:

- A. Diagnosis and Evaluation: Coordinated medical, psychological, social service, educational, speech pathology, audiology, nursing, occupational therapy, physical therapy, nutrition, vocational and other related services carried out under the supervision of qualified personnel to assess the individual's abilities and disabilities, and family and community resources. Based on this assessment a plan to meet the needs of the individual and his family is developed and methods of implementation recommended. Periodic reassessment of the individual where needed is an essential aspect of this Service.
- B. Treatment: Appropriate medical, dental, physical therapy, occupational therapy, hearing therapy, psychotherapy, social service and related services carried out under the direction of qualified personnel to bring about improvement in effective physical, psychological or social functioning of the mentally retarded individual.
- C. Education: Services based on a structured curriculum of instruction carried out under supervision of teachers qualified in special education to meet the needs of the retarded in preschool, primary, intermediate, prevocational, vocational and other appropriate areas.
- D. Training: Services carried out under the supervision of qualified personnel which provide for training of the retarded individual in motor skills, activities of daily living, vocational training, personality development, socialization, recreation and other related components.
- E. Personal (Custodial) Care: Services providing for the dietary, shelter, clothing, medical care, nursing and other daily personal needs of the retarded to insure proper personal care during the time the individual is utilizing the various other services offered by the facility.

- F. Sheltered Workshop: Services carried out under the supervision of qualified personnel involving a program of paid work involving work evaluation, work adjustment training, occupational skill training, supervised transitional employment, placement and other related component services.
