ABSTRACT

The goal of this programmed textbook is to increase efficiency in the use of the University of Colorado libraries through the aid of programmed learning techniques as a means of teaching basic library procedures. The chapters are divided into separate frames, each containing information on some aspect of library usage. These include: the public catalog; subject headings; the catalog card; book locating; periodical literature, reference books, and government documents. (AB)

UNIVERSITY OF COLORADO LIBRARIES

A PROGRAMMED TEXTBOOK

REVISED EDITION

BY MARY LOUISE LYDA JOSEPH M. MAPES NANCY MILDRED NILON RUTH CARCL CUSHMAN

8 700 I SERIC

Boulder, Colorado University of Colorado Libraries 1970

The goal of this programmed textbook is to increase efficiency in the use of the University of Colorado Libraries through the aid of programmed learning techniques. One hour spent learning basic library procedures now may save many hours of wasted labor later when research papers are due.

The chapters in this book are divided into separate frames, each containing information on some aspect of library usage. These frames are followed by a reinforcement in which at least one active response is required from the reader. The correct answer is given in the right hand margin of the page. The extension of the back cover of this book is to be used as a shield covering the correct answers.

INSTRUCTIONS

- Before beginning work on each page be sure that the shield covers the answers in the right hand margin unless otherwise instructed.
- 2. Read carefully the information contained in each frame.
- 3. Write your responses in the blanks provided.
- 4. Check your answers by lifting the shield to show the correct answer.
- 5. If your answer in incorrect, re-read the frame and correct your answer.

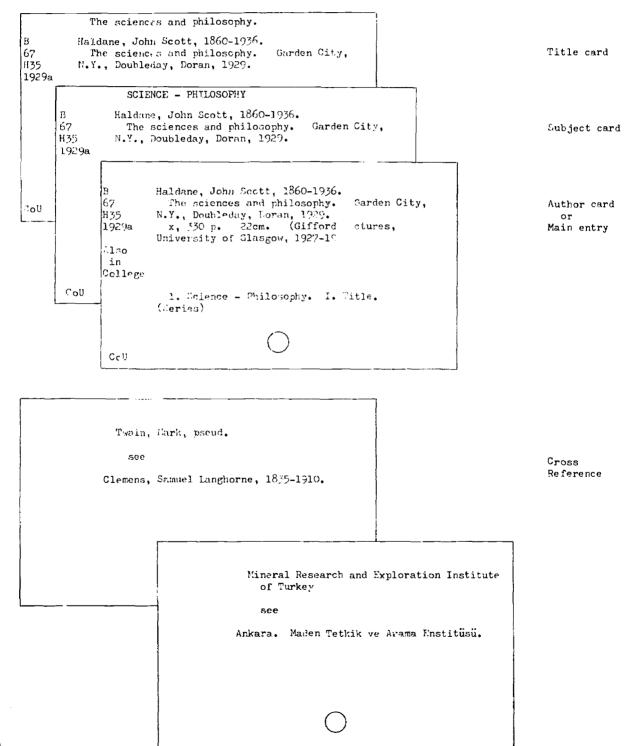

I.	
THE PUBLIC CATALOG	
1	
1.	
The Public Catalog Room, located on the north end of the main floor, houses the card catalog which serves as the index to the library's book collection. This card catalog contains card entries for over 1,400,000 books and microforms, but does not index periodicals, government publications or phonodiscs and other audio-visuals.	
The card catalog is the to the contents of the library.	.nd ex
	_1
2.	
The card catalog is arranged alphabetically in two sections: l. authortitle, and 2. subject. These catalogs indicate holdings in Norlin Librar and in the branch libraries elsewhere on campus. Each branch library, whether in Norlin or elsewhere on campus, also has a card catalog, or index, to its own collection.	у
This divided catalog (author-title and subject) facilitates research in	
the library and is located in the Room.	Public Catalog
	•
3.	
There are three basic approaches to locating materials listed in the card catalog: by author, by title, or by subject. Panel 1, page 2, shows examples of three types of cards that may appear in the catalog for an item in the library's collection. Though the catalog is divided into two physical sections, author-title and subject, there are still	
three approaches to finding materials:	author, title
	subject
4.	
Of the three approaches to locating material in the public catalog, the most convenient way to find a specific book is to look up the author's name if it is known. This approach is possibly the best since the author card gives the most complete information about the book through notes printed on the card. All editions of a book in the library are listed under the author's name, but the editions may not be listed under title or subject. Author cards are frequently the only cards which give location notes.	
A very effective way of locating a specific book in the card catalog is	
the approach.	author

I. THE PUBLIC CATALOG cont.

5.	
Author cards not only indicate all editions of books in the lib-ary, but also are frequently the only cards which indicate the location of additional copies in branch libraries or books shelved in reference collections. Author cards are important because they indicate all	
of books in the library and indicate the	edition
of additional copies.	location
6.	
An author may write under more than one name. Cross reference cards will lead to the variant names or pseudonyms used by an author, thus linking together the works written by that author. The examples on the lower half of Panel 1, page 2, illustrate cross references.	
The type of directive found throughout the card catalog to refer from one form of an entry not used to the form that is used is called a	
•	cross referenc

7	
•	

The author of a book is not necessarily a person. The author is whoever
is responsible for the intellectual content of the book and may be a
group or a corporate body such as a government, a society, or an insti-
tution. The personal or corporate author is sometimes referred to as the
main entry, that is, the most complete record of the book in the card
catalog. Corporate main entries may include committees, departments,
bureaus or other subdivisions of the organization.
•
A personal author entry or a corporate entry may be called a

8.	
If the author's name, or its spelling is not known, it is relatively easy to use the title approach in finding a book. Generally, title cards are made for books of fiction and nonfiction for which the title is distinctive, for example Kon Tiki and The Psychology of Adjustment.	
The title approach also mids in locating books for which authorship is not ascertainable. In this case, the title card is regarded as the main entry.	
The World Almanac and The Three Little Pigs illustrate the kinds of	
materials that must be approached in the card catalog by	title
9.	
If a book cannot be found by title or author, the subject approach should be used. The subject approach makes it possible to find, filed together, cards for books on a particular topic.	
It is possible to ascertain whether or not the library has materia! on	
a topic for research by using the approach.	subject

It is often impossible to guess exactly what word or phrase to look under in the subject catalog because a subject heading could be research in the subject catalog because a subject heading could be research in several different ways. The Library of Congress Subject Heading the authority for the subject headings used in the University of Colorado Libraries. Copies of this book are located in the Public Catalog Roce and in the branch libraries. In order to establish uniformity in wording of subject headings in the card catalog, the University of Colorado Libraries use the standardized list of subject headings published by the of congress of the subject heading which is not used to the one that is used. Panel 2, page 7, is a sample page from the Library of Congress Subject Headings. Look at the subject heading "Technological unemployment," on Panel 2, page 7. Since this phrase is not used in the subject catalog, it is printed in regular type with directions to see	II.	
It is often impossible to guess exactly what word or phrase to look under in the subject catalog because a subject heading could be phrased in several different ways. Technical libraries. (Z675.T3)

II. SUBJECT HEADINGS cont.

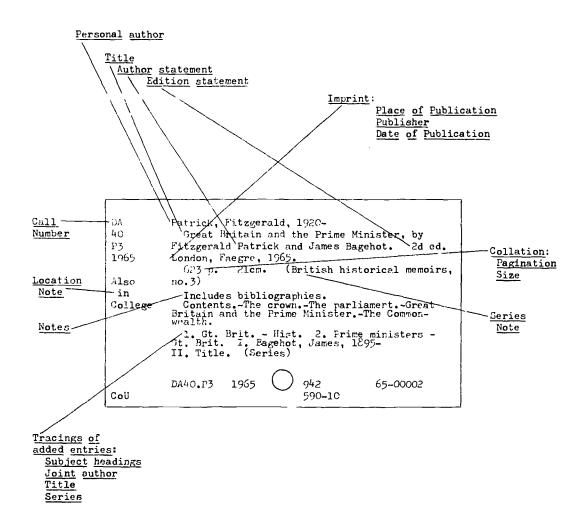

5.	
There are many standard subdivisions for forms or types of material which are used with various subject headings. Some of the form subdivisions are: _ Bibliography, _ Collections, _ Dictionaries, _ History, _ Indexes, _ Yearbooks. (For a list of form subdivisions consult the preface of Library of Congress Subject Headings).	
These form are especially useful for finding reference books such as bibliographies or dictionaries in a subject field (for example: Technology - Bibliography).	subdivision
6.	
webster's New International Dictionary, for example, is listed in the catalog under 'English language - Dictionaries."	
The Cambridge History of English Literature is listed under "English literature - History and criticism."	
To find a bibliography of the writings by and about Thoreau, look in the subject catalog under: (Check the correct answer)	
1. Thoreau, Henry David, 1817-1862 - Bibliography	
2. Bibliography of Henry David Thoreau, 1817-1862	#1 i
3. Bibliography - Thoreau, 1817-1862	correc
7.	
Subject headings in The Library of Congress Subject Headings are often followed by see also, abbreviated sa, references. See also means that there will be related material under the other subject headings listed.	
These references are extremely useful because they serve as guides to finding information which might otherwise be missed.	See als
The first sa reference under "Technology" is	Buildin
8.	
Since see also references are not used in the card catalog itself, it	
18 essential to use The	Librar Congres

III. THE CATALOG CARD PANEL 3

Note: Information below the "tracings" on this fictitious card is used by the library staff.

III. THE CA ALOG CARD cont.	
3,	
In addition to listing the author, personal or corporate, a catalog card also contains an author statement following the title when two or more persons have contributed to the book's intellectual content - joins author, editor, translator, - etc.	
On the sample card on Panel 3, page 10, the joint author is	•-
<u></u> -	Jame Bageho
4.	
Following the author statement, an edition statement may often be found. The edition statement is useful for locating a specific text, revision, or translation.	
On the sample catalog card on Panel 3, page 10, the edition statement	
is	2d ed
5.	
The imprint (i.e., place of publication, the name of the publisher, and the date of publication) completes the information in this first paragraph. The imprint is important as a means of identification and sometimes may indicate the reputability of the publication: a. The place of publication, particularly if it is not a large publishing center, may suggest a possible local point of view of the author. b. The publisher's name may be an indication of the quality of the subject matter of the book. c. The date suggests the timeliness of the material presented. On Panel 3, page 10, the sample catalog card gives publication infor-	
mation. This is called the	imprin
6.	
The collation paragraph describes the book physically in terms of the number of pages or volumes, illustrative material, and size. If the book is a part of a planned sequence of works, a series note will always close the collation paragraph.	
In the collation paragraph of the catalog card shown on Panel 3, page	
10 the information describes the best abusinesselly including the	

number

14

of pages or volumes.

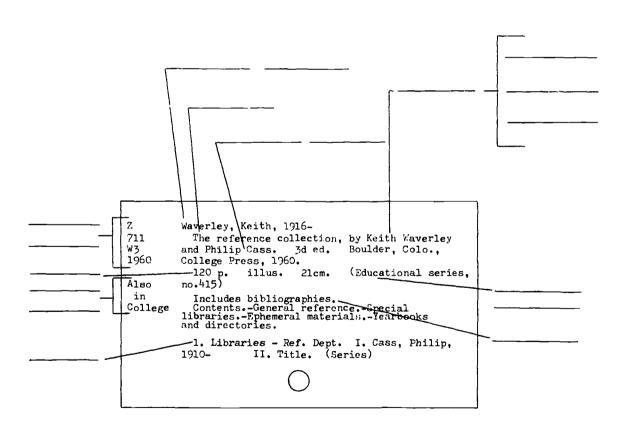

III. THE CATALOG CARD cont.	
7.	
Notes on the catalog card may further describe the book. This description may consist of printing or publishing history, bibliographic notes, and may even indicate subject or title content. These notes are especially important in finding additional material on a subject (bibliographies) and in locating particular titles within collected works (contents notes).	
Two useful descriptive notes found on catalog cards are	
and notes.	bibliographic cont e nts
The numbered items on the bottom of the card are called tracings. These indicate that there are additional entries for the book under	
each of the headings listed. The subject-heading tracings (those with Arabic numbers) may be used to find other books in the Library on the same subject. The subject headings for the book described in the tracings on the	
catalog card on Panel 3, page 10, are, and	Gt. Brit Hist. Prime Miristers - Gt. Brit.
These subject headings will also lead to	additional, more related, other
material on these topics.	
9.	, ,
The call number on the upper left hand corner of the catalog card	!
locates the book in the collection. This number must be used in its entirety since it appears in the same form on the spine, or on the front cover of the book.	ļ
The location device, printed on the upper left hand corner of the catalog card and repeated exactly on the spine or on the front cover	
of the book, is the	call number

III. THE CATALOG CARD cont.

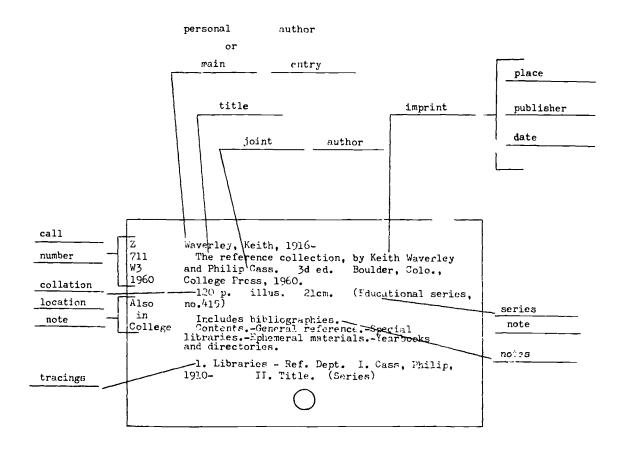

10.

On the catalog card on this page, label the lines with the appropriate terms identifying the items on a catalog card. Turn to the reverse of this page to check your answers.

16

IV.
LOCATING BOOKS
1.
In order to locate a book, the most important information on the catalog card is the call number. The number is printed in the upper left hand corner of the card and consists of two or more lines.
Check Panel 4, page 15; the call number on the first card is:
2.
The first part of the call number serves as the subject classification and brings together books on the same subject. For example, see the following analysis of the Library of Congress classification number, DA530:
D - the letter that indicates Universal and Old World History

DAS30 - history of Great Britain, general works on the 19th

The first unit in the call number indicates the

As is shown in Panel 4, libraries frequently type this subject classification unit in two lines for ease of reading. In this library, both one and two line forms of the subject classification unit will be found in

century.

the card catalog.

classification.

IV. LOCATING BOOKS cont.

3 ,	
The next unit of the call number serves as a "code" composed of numerals and letters which bring together books by the same author. Occasionally there is a fourth line which gives a date or an edition number separating that particular edition of the title from other editions of the same title in the library.	
The call number for each book in the library is unique to that particular book and is composed of letters and numerals which convey certain infor-	
mation about the book, such as: classification	subjec
and a "code" for the name of the	autho
In the University of Colorado Libraries books are classified according to two different classification schemes: either the Library of Congress System or the Dewey Decimal System. Because the Library of Congress	
scheme is better suited to the needs of a university research library, the change from the Dewey Decimal System to the system used by the Library of Congress began in 1958.	
Therefore, the newer books in the library are classified in the	I dhann a
system whereas most	Library o Congres
books received before 1958 will be classified in the	Dewe Decima
system.	

J.	
The Library of Congress Classification System is based on the alphabet whereas the Dewey Decimal System is based on the ten decimal numbers,	
sero through nine. a. The call number of a book classified according to the Library of Congress System always begins with a letter of the alphabet, for example, PS3511 A6B15	
b. The call number of a book classified according to the Dewey Decimal System always begins with a numeral, for example, 809.2 M433	
Because both systems use a mixture of letters and numerals, it is only the first unit which indicates the major subject classification in each system.	
See Panel 4, page 15. On card 1, the subject classification line is	
. This call number begins with a letter of the alphabet;	DA530
therefore, it is obvious that the book is classified according to the	I throw of
system.	Library of Congress
6.	
On card 2, Panel 4, page 15, the subject classification line is	
. (900 - history; 940 - European history; 942 - English	942.07
history.) This is an example of the first unit in a call number in	
thesystem.	Dewey Decimal
	_
7.	
It is always necessary to copy the entire call number, not just the first unit, in order to find the book on the shelves. Most of the	
books and bound periodicals in the library ara shelved according to the call number which is lettered on the spine or on the front cover of the book. Titles in related subject areas are thus shelved together either in the tiers (levels of the book stacks) or in the branch libraries.	
For example, QA, the Library of Congress classification for mathematics, and 510, its Dewey equivalent, are shelved in the Math-Physics Library together with physics books and periodicals.	
The, which is a locating device for finding	call number
a specific book, is printed in the upper left-hand corner of the catalog	
card and is lettered on the or on the cover	spine front
of the book.

V.

PERIODICAL LITERATURE

1.	
Just as the card catalog is an index to the book collection, printed periodical indexes list the contents of magazines by author and subject and sometimes by title. These indexes give complete citations (title, volume, page, and date) to the periodicals in which the articles will be found. Subject fields usually have special indexing tools to the periodical literature in the field, i.e., Education Index, Engineering Index, Chemical Abstracts, and others.	
The Readers Guide to Periodical Literature, however, is the most fre-	
quently used and the most general to periodicals.	index
Periodical indexes may be used either to find a list of articles about	
a particular or by a particular	sub ject author
	aucho:
2.	
In Norlin Library one set of the Readers' Guide is shelved in the Reference Department, and another set is shelved in the College Library. This index began publication in 1900, and cumulative volumes keep it up to date to within a few weeks of the present.	
Valuable time can be saved in searching for periodical articles if one	
of the printed periodical is used. The most general	indexes
index is called the	Readers Guide
and is found in	to <u>Periodical</u> <u>Literature</u>
the College Library or in the Department.	Reference
	1
3.	
Although the Readers' Guide indexes more than 100 periodicals, many scholarly journals will be indexed only in specialized reference tools.	
If a periodical is not indexed in the Readers' Guide to Periodical	
Literature, ask a librarian where that periodical is (Education Index, Art Index, etc.) and consult that book.	ind exe d

V. PERIOCICAL LITERATURE cont.	
4.	
Articles which have been read previously in s periodical for which the title or date has been forgotten can be located again by using the subject approach in the Readers' Guide to Periodical Literature, or a similar index.	
The reference Lource which can be used to supply this bibliographical	
information is a	periodical index
5.	
The arrangement of the Readers Guide to Periodical Literature is typical of other periodical indexes. Articles are entered alphabetically in the Readers Guide under the surname of the author and under as many subject	
entries as are mecessary. The following are samples of author and subject entries from the Readers' Guide.	
(1)	
MCNALLY, Tom GAME laws Conflict on the Chesapeake Conflict on the Chesapeake	
Field & S 60:56+ Je '55 T. McNally, 11. Field & S 60:56+ Je '55	
In the illustration above, no. 1 is the entry; no.	author
2, theentry.	sub ject
6.	
In the author entry in frame 5, the author's name is given first as a	
heading on a line by itself in boldface type; under the author is the title of the article, the name of the magazine (abbreviated) and some	
figures (60:56+ Je 155). The figure before the colon is the number of	
the volume; the figures following the colon indicate the pages of the	
article; and the final figure is the of the publication.	year; date
7.	
The subject entry for the article listed in frame 5 ("Conflict on the	
Chesapeake") cites the heading first, on a line by	subject
itself. The entry is similar to theentry except	author
that the author's name follows the title.	

V. PERIODICAL LITERATURE cont.	
8.	
It is important to copy the complete citation for the desired article; otherwise, a aecond search may be necessary to find the information for bibliographies or footnotes.	
In order to prepare a bibliography or footnote a reference, it is nec-	
essary to copy the complete	citation or entry
9.	
A list of abbreviations as well as a list of the periodicals indexed is printed in the front of the Readers' Guide to Periodical Literature.	
Most reference books contain a list ofused	abbreviations
within the text, such as il., diag., bibliog., to indicate that the	
article is accompanied by,	illustrations
	diagrams bibliographies
	•
10.	
Panel 7, page 25, is a page from the <u>Readers' Guide to Periodical Literature</u> . To find general articles on air pollution, look under "air pollution" on Panel 7. The first article cited would be found in	
(title of the periodical), volume	Science Digest
no, page no for the date	67, 39 Jan. 1970

V. PERIODICAL LITERATURE cont.

11.

The same type of indexing arrangement is used in specialized indexes or abstracting services for various subject fields. If the articles indexed in the Readers' Guide are too general or too elementary, one of the specialized indexes (some of which are listed below) may index articles which are more scholarly or more detailed. The reference librarians can suggest other possible sources.

ART INDEX

BIOLOGICAL ABSTRACTS

BUSINESS PERIODICALS INDEX

CHEMICAL ABSTRACTS

EDUCATION INDEX

MUSIC INDEX

PHYSICS ABSTRACTS

PSYCHOLOGICAL ABSTRACTS

PUBLIC AFFAIRS INFORMATION SERVICE (PAIS)

SOCIAL SCIENCES AND HUMANITIES INDEX

If the articles listed in the Readers' Guide on cancer research are too general or too elementary, which two of the special indexes listed above would be likely to lead to more advanced or technical information:

Chemical
Abstracts
Biological
Abstracts
PAIS

12.

After a list or bibliography of appropriate periodical articles has been compiled, the next step is to locate these periodicals in the library. It is important to remember that back issues, which are bound, and current issues, unbound, are usually in different locations. Bound periodicals are shelved in the same area with books on related subjects in an attempt to keep materials on the same together. In fact, bound volumes of periodicals are treated exactly like

subject

call number

other books and are shelved in sequence.

14.

The call number, locations, and holdings for a periodical title are usually NOT found in the card catalog. Instead, there is a printed book catalog called the Catalog of Serials which gives this information for approximately 30,000 periodical (or serial) titles including some government documents and newspapers. Copies of the Catalog of Serials are located in the Public Catalog Room and at all service desks throughout the library system.

Periodicals	are	locat ed	through	use	of	the

REFERENCE BOOKS	
1.	
Two major approaches to finding information in the library have been presented so far.	
To find appropriate books look in the and	card catalog
then check the against the location chart in the lobby to find where the book is shelved. To find information in	call number
periodicals, look in one of the printed periodical such as Reacers' Guide to Periodical Literature in order to compile a list of the appropriate articles. Then look up the title of the periodi-	insexes
cal in the to find its location in Norlin or in one of the branch libraries.	Catalog of Serials
2.	
The third major approach to finding information in the library is through reference books which present data in the various disciplines arranged for convenient use. These books will either give the information directly, as in dictionaries and encyclopedias, or tell where it may be found, as in indexes and bibliographies.	
A third major approach to finding information is throughbooks.	reference
3 DICTIONARIES	
Dictionaries are, per aps, the most basic of all reference books as they deal with words and their meanings. In addition to defining terms and citing correct spellings, dictionaries also give pronunciations, etymology (historical derivation of the word), grammatical usage, syllabication, and synonyms. Standard dictionaries, both unabridged and abridged, are located in each of the branch libraries, and there are circulating copies located by call number in the stacks.	
Dictionaries can be used to find the definition of terms and also to	spelling
find information regarding,	pronunciation etymology usage

VI.

VI. REFERENCE BOOKS cont.

4. - DICTIONARIES

Dictionaries may range from a one-volume desk dictionary to the twelve-volume set of the Oxford English Dictionary which frequently devotes many pages to the complete history of a word with quotations showing how the meaning has changed over the centuries. Dictionaries may also range from general, comprehensive volumes such as Webster's New International Dictionary to specific subject dictionaries covering the terminology in a single field. A few examples of the numerous specialized subject dictionaries are given below:	
Columbia Dictionary of Modern European Literature Condensed Chemical Dictionary Current Abbreviations Dictionary of American History Dictionary of Architecture Dictionary of Economics and Business Dictionary of Philosophy and Psychology Dictionary of Slang and Unconventional English Harvard Dictionary of Music Oxford Classical Dictionary	
From the examples of specialized subject dictionaries given above, choose the appropriate title for finding:	
A. a definition of psychosis:	Dictionary of Philosophy and Psychology
B. a brief description of French symbolism as a literary movement:	Columbia Dic- tionary of Mod- ern European
C. the meaning of "rat fink" or "cool cat":	Literature Dictionary of Slang and Unconventional
L	English

VI. REFERENCE BOOKS cont.

5. - ENCYCLOPEDIAS

Encyclopedias, either general or related to a specific field, present background information on a subject. They are generally arranged alphabetically and contain articles ranging from a few paragraphs to several pages, usually accompanied by bibliographies leading to more comprehensive studies. All of the branch libraries have at least one set of a general encyclopedia as well as the subject encyclopedias appropriate to their fields. Examples of a general encyclopedia and several specialized subject encyclopedias are given below:

<u>En</u>
<u>of</u>
<u>E</u> nc

Encyclopedia
of Philosophy

Encyclopaedia Britannica

- 32 -

VI. REFERENCE BOOKS cont.

6. - YEARBOOKS

Yearbooks contain vast amounts of useful information in concise form and are among the best sources to use in order to find current factual information such as statistics or surveys of the present state of governments, history, economics, etc. Yearbooks may be general and comprehensive in coverage, or the may relate to one specific subject or one specific country. Some examples of yearbooks are:
Americana Annual (and other encyclopedia yearbooks sup lamenting the "parent" encyclopedia)
Commodity Yearbook Economic Almanac
Statesman's Yearbook Statistical Abstract of the United States United Nations Yearbook World Almanac and Book of Facts
Reference books which anawer questions on current trends and events
are called From the examples above choose the appropriate title for finding the number of aliens deported from the
U.S. in 1967:

7. - SPECIALIZED INDEXES

Specialized indexes aid in locating specific plays, poems, speeches, essays, quotations, etc., which have been published in anthologies, magezines, or collections. The items are usually listed under subject, author, and title when applicable, and a citation is given to the source in which this particular item is found. There are also specialized indexes leading to criticism of poetry, short stories and novels. Some of the most useful of these specialized indexes are listed below:

Essay and General Literature Index
Familiar Quotations
Index to Illustrations
Index to Poetry
Play Index
Poetry Explication
Short Story Index
Speech Index
Twentieth-Century Short Story Explication

To find information in composite works, use a specialized

VI. REFERENCE BOOKS cont.

8. - BIOGRAPHICAL SOURCES

Biographical sources are usually shelved in the Reference Department; however, those which are limited to a specific profession are ahelved in the appropriate branch library. It is also important to remember that biographies may be found by checking in the subject catalog under the name of the person.

Biographical articles are often included in encyclopedias and mometimes in dictionaries and yearbooks. However, these sources are limited, and the information is, of necessity, brief and must often be supplemented by some of the reference books specifically designed to give biographical information. These works may be universal in scope, or they may be limited by geography, time period cowered, or profession as in samples listed below.

American Men of Science
Current Biography Yearbook
Dictionary of American Biography
Twentieth Century Authors
Who's Who in America

From the examples listed above choose the appropriate title for finding a biography of:

1.	George Bernard Shaw	ļ
2.	George Washington	
3.	U Thant	

Twentieth Century Authors
Dictionary of
American Biography
Current
Biography
Yearbook

VI. REFERENCE BOOKS cont.

9. - BIBLIOGRAPHIES

Bibliographies (lists of books, articles, and other materials) are used sither to verify information about a particular book or to choose a book for a particular purpose. Like the previous reference books described, bibliographies may be general or very specific in their coverage. Bibliographies fall into five major categoriea: 1) lists of works on a particular subject, 2) lists of works by a particular author, 3) lists of works published in a particular country or language, 4) lists of works located in a particular library, and 5) lists of bibliographies, often called "bibliographies of bibliographies." Examples of each are given below:

Cambridge Bibliography of English Literature
Allen, Francis H. A Bibliography of Henry David Thoreau

Cambridge Bibliography of English Literature

GOVERNMENT DOCUMENT PUBLICATIONS

1.	
Government publications will greatly enrich any studies or term papers. Most people do not realize what a wealth of varied material is published by the U.S. Federal Government as well as by city, state, and foreign governments, and by international agencies such as the United Nations. These pamphlets and books cover such diverse subjects as astronautics and space, sports, camping, biological, physical and social sciences, homemaking, agriculture, education and many more, as well as the usual government reports such as those issued by Congress, the Suprame Court, or the Office of the President. In fact, the various government: comprise the largest and most versatile publishers in the world.	
Valuable publications are issued by many agencies of the federa! govern-	city, state,
ment as well as by, and	foreign
2.	
Material published by any official government agency, from local	,
ordinances to the yearbook of the United Nations are collectively called "government documents" and are handled in a different manner	
from the rest of the library collections. In Norlin Library this	
collection is located in the Government Documents Library (see Directory) and is treated as a separate library with its own system of	
classification, its own catalogs, and its own printed indexes. These publications are not listed in the public catalog.	
Any publication of any government agency is called a	Government
. Because these publications are not listed in the	Document
Public Catalog, it is necessary to consult the indexes in the	Government
in order to find them.	Documents Library
3,	
Because the Government Documents Library is a depository for all U.S. government documents issued for public use, it is practical because of	
the sheer bulk of these materials to use the classification system of	
the Superintendent of Documents in Washington D.C. This system arranges	
documents by the issuing agency, then by series, and then chronologically.	
According to the Superintendent of Documents classification system, all	

issuing

government documents are grouped together by the _____agency.

- 1. Biography Index
- 2. Oxford English Dictionary
- 3. <u>Cambridge Bibliography of</u>
 <u>English Literature</u>
- 4. U.S. Library of Congress

 Catalog of Books
- 5. Bibliographic Index
- 6. Essay and General Literature
 Index
- 7. Short Story Index
- 8. World Almanac & Book of Facts
- 9. <u>Dictionary of American</u>
 Biography
- 10. Current Biography

VII. GOVERNMENT DOCUMENTS cont.

4.

In order to group the documents according to issuing agency, a special call number is assigned each document. A government document call number utilizes colons and superior figures along with letters and numerals, thus distinguishing it from a Library of Congress or a Dewey call number. A government documents call number may look like this: GS2.8/7:791a				
From the numbers listed below check the call number for a governdocument:	nent			
LA256 C12W3 c.5				
LC2.87: 891 ² c.3				
370.05 \$53a c.2				

EC2.87 891

5.

As noted in Frame 2, government documents generally are not listed in the public catalog. Instead they are listed in printed indexes which, like other government publications, are kept in the Government Documents Library. These printed indexes classify documents under the name of the issuing agency.

Usually, these indexes list the documents under subject as well as under the name of the _______; some indexes also give the document scall number under which the publication is shelved in the _______ Library.

issuing agency

Government Documents

VII. GOVERNMENT DOCUMENTS cont.

_ 	
Two of the most useful government documents indexes are listed below:	
U.S. Superintendent of Documents. Catalog of the Public Documents March 4, 1893-1940. This is the standard index for the time period covered (1893-1940) and lists government documents under issuing agency, subject, and sometimes title.	
U.S. Superintendent of Documents. Monthly Catalog of United States Government Publications, 1895-date. This is the most comprehensive index of current government publications listing documents under sub- ject and title as well as under issuing Sency. Annual volumes are used to supplement the Documents Catalog noted above.	
Similar indexes are available for periods before 1893. Subject indexes as well as indexes to city, state, national, foreign and international publications are also available. All of these indexes and bibliographies are shelved in the Government Documents reference collection.	
In order to find a listing of government documents on a specific subject, or by a government agency, consult one of the printed	
such as the Monthly Catalog of the United States	indexe
Government Publications published by the	Superintenden
of	Document
7.	
REVIEW: Documents on a great variety of subjects are published by	state national
government agencies including city,,	br foreig
or international agencies. All of these publications are found in the	Governmen
Library. These documents	Document
are listed under the name of the agency in the printed	issuin
catalogs. Some of the catalogs list the documents call number which	
lcoks like this; (check correct number)	
PS507 813.51 L5 A1.38:951 ² H274f	A38:951
