ABSTRACT

Information is given on Johnson-O'Malley funds provided for education of Montana's Indians during 1969-70. After a summary of such Johnson-O'Malley activities as provision of foster homes, special transportation, and home-school liaison, excerpts from Johnson-O'Malley project reports are presented (by reservation). The number of Montana Indian high school graduates and names of Indian students attending institutions of higher education through the aid of Federal funds are given. Programs involving development of school programs relating to drug abuse education, the Teacher Corps and teacher aide training, Follow Through, bilingual education, and career opportunities are also discussed. Tables provide Johnson-O'Malley administrative expenditures, Indian enrollment and attendance figures, and breakdowns of funds (by reservation). In conclusion, the report lists funds allocated through Public Law 874 and the Elementary and Secondary Education Act, as well as Johnson-O'Malley kindergarten, summer workshop, and higher education funds. Related documents are ED 041 651 and ED 041 653. (EL)

Montana's Involvement in the Johnson-O'Malley Program

Current Conditions and Trends

Montana became involved in the Johnson-O'Malley program soon after inception of the Act in 1934.

During the late sixties Montana educators began to examine the Johnson-O'Malley Act to determine if any federal responsibility for Indian education was not being met. By this time the conflict between Public Law 874 and Johnson-O'Malley, regarding Indian education, was largely resolved. When Public Law 874 became applicable to Indians in 1959, the Johnson-O'Malley funds were reduced accordingly for school districts educating Indian children.

The people involved in Indian education then examined Johnson-O'Malley programs as well as techniques and practices utilized in educating Indian youth.

Because educators and others questioned and examined Johnson-O'Malley programs, services and activities have been expanded in recent years to include transportation, boarding homes, home-school coordinators, summer programs, special teachers, and workshops for teachers and aides who work with Indian children.

The current trend in Indian education is toward personalized teaching and individualized instruction emphasizing the heritage and culture of the Indian people.

The State Superintendent of Public Instruction has established priorities and goals for education in Montana that have great importance for all students attending public schools.

School districts applying for Johnson-O'Malley assistance are required to involve Indian people in the planning. In planning projects educators are urged to assess the needs of the Indian students in a realistic manner, considering the basic needs of nutrition and health as well as academic requirements.

After assessing the needs, alternatives are considered, coordinating various methods to meet the needs. Behavioral objectives which can be measured objectively or subjectively are written, and a program to achieve the stated objectives is planned. After the program is implemented, it is monitored to make certain it functions as intended. The program is evaluated periodically and, at the conclusion, in terms of the written objectives.

Essentially, Montana is moving toward making local school systems accountable for the quality of Johnson-O'Malley programs and for what Indian children learn.

Montana's Allocation of Johnson-O'Malley Funds

The Superintendent of Public Instruction contracts annually with the United States Department of Interior, Bureau of Indian Affairs, to provide educational services to Montana Indians. The authority for negotiation comes from the Federal Act of April 16, 1934, C.147, 1, 48 Stat. 596, commonly known as the Johnson-O'Malley Act, as amended June 4, 1936, C.490, 49 Stat. 1458, and Section 79-1602, R.C.M. 1947, and the State Board of Education Minutes, Page 124, Volume 16. The administration of Johnson-O'Malley Act funds is based on operation criteria as outlined in Vol. VI, Part II, Chapter 3, Indian Affairs Manual, and the State Plan.

Conditions of Eligibility

- a. The school must be on or adjacent to an Indian reservation.
- b. The school district must count only those Indian pupils who have at least one-fourth or more degree of Indian blood and who live on non-taxable land within or adjacent to an Indian reservation.
- c. The school district must provide educational opportunities for Indian students on the same basis as for other students.
- d. The school district must levy school taxes at a rate not less than the average for all similar type school districts in the state.

Use of Johnson-O'Malley Funds

Johnson-O'Malley funds are for special compensatory activities which supplement the regular school program and which are designed to meet the special needs of Indian children.

Applications

Applications for funding follow recommended federal planning, programming, and budgeting procedures. Programs are planned on the basis of ensuing two-year periods or longer.

Allocations

Allocations to school districts are made by the Office of the State Superintendent of Public Instruction consistent with the State Plan.

Summary of Johnson-O'Malley
Statewide Activities

Projects in Indian Education Supported in Whole or in Part
by Johnson-O'Malley Funds

Foster Homes

This project was conducted by the Harlem school system in an attempt to provide a high school education to those students desiring to remain near their homes rather than attending an off-reservation boarding school. Those living in foster homes were required to attend tutoring sessions which, though not quickly accepted, enjoyed surprising success. The project as a whole ran much smoother than anticipated. It appears at present that the people from the south end of the reservation will be requesting this kind of service for years to come.

Special Transportation

Several school districts conducted special projects involving transportation. The Harlem project was designed to encourage students from the Hays-Lodge Pole district to attend high school in Harlem rather than to go to off-reservation boarding schools. The project has grown in interest and acceptability, and at this point in time appears to be quite permanent. This project also included a summer guidance activity to help the patrons understand the service the school was trying to provide. The Edgar project provided extra transportation for high school students from Pryor involved in after-school student activities.

The Wolf Point Elementary School has conducted a cold-weather bussing project for the past five years. The project consisted of bussing children from the perimeter of the town to and from school during inclement weather.

Home-School Liaison

This type of project involved the employment of one or more Indian persons, generally women, to visit the homes of parents to bring about a better understanding between home and school. Projects of this nature were conducted by 13 school districts, Hays-Lodge Pole, Browning Elementary, Box Elder Elementary, Arlee Elementary, Wolf Point Elementary, Lame Deer, Lodge Grass, Babb, Rocky Boy, St. Ignatius, Polson, Ronan, and Brockton. Total cost of all projects was \$65,200. The people employed in these projects are very enthusiastic about their work, and even though progress is slow, the results have been most encouraging.

Special Teacher

The Dixon High School has needed a class in home economics instruction for the past several years. During the past school year, a certificated home economics teacher was employed to conduct a class in home economics through the use of Johnson-O'Malley funds.

Indian Education Workshop

An Indian education workshop was held at Northern Montana College, Havre, June 15-26, 1970.

Northern Montana College entered into agreement with the Superintendent of Public Instruction for the State of Montana to conduct a two-week workshop designed to assist school administrators, teachers, instructional aides, and home-school coordinators in preparing and conducting educational programs which will aid Indian school children.

The purpose of the workshop was

1. to provide participants with experiences that will create an awareness of the cultural distinctions indigenous to the American Indian
2. to provide a knowledge base among the participants from which sound philosophy of teaching of Indian youth can evolve
3. to elicit a "philosophy for the teaching of Indian Youth" from the workshop participants
4. to develop a strategy with which participants can communicate a "philosophy of teaching Indian youth" to their respective service regions
5. to provide instructional support personnel (e.g. teacher aides, home-school counselors, classified staff) with added skills to assist them in their unique functions.

Total cost of the workshop was \$30,568. Eighty-four teachers and teacher aides attended.

A few comments by participants may indicate their reactions: "The workshop gave me a greater awareness of the cultural and societal distinctions among the Indians than I ever had before."

"The workshop certainly developed a better philosophy of teaching Indian children for me."

"It has improved my understanding of Indian people in general."

Johnson-O'Malley assisted in funding a home economics workshop in Bozeman, Montana. Teachers of Indian students and teacher aides were instructed about Indian culture and philosophy. Lecturers, small group instruction and total student involvement were the methods used. Johnson-O'Malley involvement was \$580. The instructors evaluated the workshop as very successful.

Summer Programs

During fiscal year 1969 two summer programs were funded under Johnson-O'Malley, proving so successful that eight programs were funded during fiscal year 1970. Harlem's program provided academic and enrichment experiences for Indian children in the elementary school.

The program at Hays-Lodge Pole provided for a series of field trips which offered outdoor educational experiences, and visits to historical sites with special significance for Indians.

Browning High School had two programs. One program provided for professional and para-professional help and a series of trips that were related to Indian culture. The second project provided for outdoor educational experience utilizing a juvenile law enforcement officer and involving students who had exhibited delinquent behavior.

Box Elder provided both academic and enrichment experiences in its summer program.

The Ronan Summer project provided an outdoor educational experience in which students hiked into a wilderness camp with instructors. This program was both recreational and instructional.

Heart Butte's program provided enrichment experiences through airplane rides, train rides, and overnight trips. This project was funded by a combination of ESEA Title I, local activity proceeds, and Johnson-O'Malley.

Wolf Point, Poplar and Lame Deer provided recreational, instructional and enrichment programs designed to upgrade the skill of students who were having problems in certain elementary and secondary subjects.

Curriculum Consultant

During this fiscal year, the State Superintendent of Public Instruction again employed Mrs. Ella Ortner as a field curriculum consultant in the Indian education function. Mrs. Ortner's many years of experience range from elementary school through college teaching, curriculum specialist and state-level supervision. During her assignment, Mrs. Ortner lives on the Fort Belknap Indian Reservation. She also is gathering and rewriting material suitable for instructing Indian children.

Program Aid Requests

Proposals for program aid in such areas as library enrichment, music instruments, foster homes, equipment for vocational programs, study centers, home-school social workers, summer programs for students (both enrichment and academic), special transportation, instructional aides, curriculum materials development, and elementary school guidance.

Excerpts and Summaries From Johnson-O'Malley Project Reports

by Reservation and by School
Blackfeet Indian Reservation
Browning

Johnson-O'Malley Kindergarten

Kindergarten programs began at Starr School in March, at Browning in April. Both programs are providing Indian children with an opportunity badly needed. The 13 children at Starr School have a readiness program that will enable most to complete grade one their first year of school. The 24 children in Browning are Indian children who were unable to begin the regular kindergarten program in September 1969 for several reasons--family, moving, et cetera. These programs are reaching 37 children who would not have had an opportunity to get ready for grade one. Two teachers, two teacher aides and one part-time custodian are employed in the two programs. Parents say they are pleased with the efforts made for their children. The school social worker and kindergarten teachers interviewed approximately 90 parents to enroll children. CAP and VISTA also helped get the program started. Starr School parents worked together to get a classroom ready so their children could have this opportunity.

Social Worker

A full time school social worker has been employed under this year's program. Her most effective work has been contacting parents of first graders with attendance problems; visiting parents in rural areas to discuss the school programs; helping parents get medical assistance for their children; and providing teachers with needed information. She attends community meetings concerned with problems of school children. Both staff and members of the community say her work is helping children and their parents understand the needs for and demands of getting an education.

Bus Service

The Johnson-O'Malley bus service served Indian children from Starr Community and the Blackfeet Boarding Dormitory. With the service, children from these areas were able to participate in the extra - curricular activities previously denied them.

The parents and children asked that the service be continued as their children became more interested in continuing school.

Crow Indian Reservation

Hardin

In the 1969-70 school year the Gesel Development Program was initiated in the Crow Agency Elementary School. This program was considered necessary because the majority of the students were of Indian extraction and, because of their bilingual background, needed one more year of preparation before entering the regular school system.

Twenty-two children participated with one full-time teacher, one aide, and one consultant from the Head Start Program. All parents participated at least once in some part of the program. Most parents, both those involved as well as not involved, agreed that the program was very worthwhile after they had gained an understanding of the program. The students made definite improvements in motor skills, physical, emotional and linguistic developments.

For part of the school year our school district ran late buses for Johnson-O'Malley students living in the St. Xavier and Crow Agency areas. This involved two buses, one to each area, leaving the school grounds at 5:45 in the afternoon. The buses were furnished for students engaged in extracurricular activities. The program was very satisfactory because many of the students would otherwise have had to hitchhike home and parents of these students could not afford to furnish transportation, limiting participation in many school sponsored activities.

Edgar

Transportation

Edgar High School transported the Pryor area students involved in athletic practices (football, basketball, track), cheerleading, and, best of all, after-school tutoring in academic subjects and typing. The program had excellent acceptance and value.

Teacher Aid Fund

This program has aided our elementary school and other English classes. It is definitely an important, valuable feature for our Indian students--too bad we didn't have it years ago.

Athletic Fund

After installing the whirlpool, we have given innumerable treatments for therapy after broken hands, wrists, feet and legs, sprains and charlie horses. This way the students who live so far from a doctor or clinic have been able to receive treatment. It will be even more valuable during football and early basketball seasons.

Flathead Indian Reservation

Dixon

Home Economics

The Home Economics Program in its first full year of operation could only be called successful because of its accomplishments and because of the students involved. Not only did our instructor, Mrs. Delany, have an approved course of study for high school, but also gave a semester of home economics to our 7th and 8th grade girls. The 7th and 8th grades were instructed in personal hygiene, proper dress, health habits and manners. We feel that this was a real contribution to the young girls of this age. The excellent results of the sewing classes were visible to all. Many of the girls made their own prom dresses and our small community was very much impressed. A well received style show climaxed the year. A total of about 30 girls came under the program during the year.

Art

Our Art Project was tremendous from both student and community standpoint. Betty Savage, a commercial artist, was selected to teach the class. Our beginning class of 12 students was selected from those having the greatest talent in the Arlee and Dixon schools, regardless of school grade or age. Another factor in our selection was that, as far as possible, we selected those who could use their art training as at least a supplement to making a livelihood. The selection was justified in that two of our young ladies will be employed part time in art carving during the summer. One picture has been sold, another entered in a national contest, all with only five months training. Interest for continuing the course is extremely high.

Reading

The reading classes started under Title I funds are continuing this summer with good attendance.

Without any direct proof, it is becoming evident that through our home economics, reading, art and planned programs in Indian language, lapidary, etc., we have demonstrated that our small school is interested and doing something for our Indian youth.

Charlo - St. Ignatius

Kindergarten

Kindergarten began on February 2, 1970, and is still in progress. About 40 pupils are enrolled in the program, from Charlo and St. Ignatius. Facilities are being rented in St. Ignatius, since space is not available in the schools. The program appears to be very effective in preparing these five-year-olds for school life. Several field trips have been taken -- to fire depots, the airport, the creamery and train rides -- which we hope will be beneficial. Three half-day instructors have been employed.

Home-School Visitor

One home-school visitor has been used in the district to contact certain families in the hope of providing inspiration to those families regarding better school cooperation. The project has worked quite well in this area.

Hot Springs

Our Johnson-O'Malley program was used to implement our ESEA Title I program. This was a tutoring program that, I believe, was very beneficial to those participants who wanted to learn and needed a great deal of individual attention.

Arlee

Kindergarten

Kindergarten was our major project. This has been an outstanding program. The children have made outstanding progress and will be quite advanced compared to previous first graders. The community believes this is an outstanding program.

Social Worker

We have a social worker, but her work was not well accepted in the community and she now serves mostly as a teacher aide. As a teacher assistant, she helped set up our kindergarten program.

Art

Five of our students participated in the Art Program at Dixon. These students felt this program was quite successful; however, transporting them to Dixon twice a week became burdensome.

Ronan

Home-School Counselor

This was one of the most successful projects and employed only one person. This program did more for more students and the school than we had imagined.

Kindergarten

In the kindergarten, 66 students were enrolled; one teacher and one teacher aide were employed. This was evaluated as a very good program. A driver was employed to transport students unable to attend by other means.

Cultural Orientation

This is to be conducted during the summer with 40 students preregistered at this time. It will be conducted as a Montana historical trip.

Summer Outdoor Educational Experience

This is to be conducted during the summer. Twenty students will participate and three to five counselors will be employed.

All projects were planned through cooperation with the Indian Advisory Committee.

Fort Belknap Indian Reservation

Harlem

Housing and Bussing Program

This Johnson-O'Malley project is a combination housing and bussing program for Indian children located in the Hays-Lodge Pole area who wish to attend the Harlem Public Schools.

All concerned feel that the program has been very successful.

During fiscal year 1970 two summer programs were funded under Johnson-O'Malley. The summer programs were so successful that eight programs were funded during fiscal year 1970. Harlem's program provided for both academic and enrichment experiences for Indian children in the elementary school. The program of Hays-Lodge Pole provided for a series of field trips which offered outdoor educational experiences and visits to historical sites with special significance for Indians.

Foster Homes

This project was conducted by the Harlem school system to provide a high school education to those students desiring to remain near their homes rather than attend an off-reservation boarding school. Those living in foster homes were required to attend tutoring sessions which, though not quickly accepted, enjoyed surprising success. The project ran much smoother than anticipated. It appears at present that the people from the south end of the reservation will be requesting this kind of service for years to come.

Special Transportation

Several school districts conducted special projects involving transportation. The Harlem project was designed to encourage students from the Hays-Lodge Pole district to attend high school in Harlem rather than to go to off-reservation boarding schools. The project has grown in interest and acceptability, and at this point appears to be quite permanent. This project also included a summer guidance activity to help patrons understand the service the school was trying to provide.

Fort Peck Indian Reservation

Wolf Point

Cold Weather Bus

The bus service was operated from October 15, 1969 to April 15, 1970, and one Indian man was employed as bus driver. Approximately 100 children rode this bus twice daily, before school and after school. This is the fifth year of this service and it is not only well accepted but expected by the Indian families. When the bus service stops in the spring, tardiness and absenteeism increases. We feel certain that the cold weather bus service is well justified.

Home-School Visitors

Three Indian women were employed under this program this year. The main objective is to establish better communications between home and school and to improve attendance by Indian children. Almost every Indian home has been visited, some homes many, many times. The liaison people were effective this year in that instead of just going to homes to find out why students weren't in school, they took homework and tutored children when possible. Sometimes they took children to the clinic and, in many instances, they did tutoring in the hospital. The teachers certainly have become more aware of their Indian students' problems since we have started these visitations. More Indian parents are coming to the schools for conferences. We have much more to do to strengthen communications but we feel that because of these Indian ladies doing home visits, relationships and attendance have definitely improved.

Summer School Activities

We have employed seven people in recreation activities and remedial instruction for eight weeks. Approximately 90 Indian children are participating. At this time it is too early to evaluate the program.

Northern Cheyenne Indian Reservation

Colstrip

Special Transportation

Free transportation by special bus for all Indian students was provided to extracurricular high school functions, such as football games, basketball games, track meets, career days and special field trips. All of the eligible students (23 most of the time) participated in at least one of the extracurricular trips. In most instances, all 23 participated in each and every event.

I feel that this project has been almost 100 percent successful because almost all of the eligible students rode the special bus to almost 100 percent of the extra trips. I would like to see the special bus continue to run to extracurricular events in the future without any financial obligation on the part of the students.

Cheyenne Writing Project

Two men have been employed on the Northern Cheyenne Indian Reservation to begin writing school materials of Cheyenne history and culture. During the past three years, Tom Weist has been involved in researching government records and tribal files. Henry Tallbull, a Cheyenne, has a great deal of knowledge about Cheyenne culture and history.

The two writers have a committee working on the project. Members are John Walks Along, Ted Rising Sun, Dick Littlebear, Anne Harris, and John Woodenlegs, Chairman. The writers also work with one teacher from each school serving Cheyenne students. The schools are Colstrip, St. Labre's, Busby and Lame Deer. Dr. Hap Gilliland from Eastern Montana College is a consultant to the writing project and an ex-officio member of the committee.

John Woodenlegs, committee chairman, reports, "We are really enthusiastic about this writing project. I wish you could realize how good it is to us Cheyennes to know we will have good materials for our children to read and learn about themselves. I think this sort of thing is going to wake us up. School is going to get more interesting and children are going to enjoy reading stories that are about us, our way of life, and the good parts of being Indian. As parents we will get to see these and get more interested in the schools, and what our children are learning."

Rocky Boy's Indian Reservation

Box Elder

Indian Education Project School Liaison Officer

The purpose of this project was to improve school attendance through home visitation using a person of Indian descent. We cannot consider this project too successful this term. The person selected tried to be a truant officer and thereby was not effective in dealing with parents. We plan to continue the program next term but plan to employ a middle-aged Indian woman who knows the Cree language and the ways of older Indian people.

Indian Education Music Project

The purpose of this project was to provide musical instruments for needy Indian students. Because of funds provided by this project, eight Indian students were provided with instruments and made a part of the regular or beginners' band. There is good reason to believe that these students will continue. Because the band was enlarged, the teacher and students had greater satisfaction in their accomplishments.

Indian Education Athletic Project

The purpose of this program was to provide athletic activity for more Indian students. The project made it possible for the Box Elder High School to establish a wrestling program, extend the basketball program to provide for increased basketball participation on the junior high level, and provide for girls' basketball and track. The wrestling program provided for a total of eight Indian students who otherwise would not have been able to participate in any sport during the basketball season. The junior high basketball program provided for a total of thirty junior high students. During the four months of basketball there was a decided improvement in scholarship of Indian students because of eligibility requirements. We term the project a success. Not as much progress was made with participation of the girls in basketball and track; however, interest in girls' sports is certain to increase in the coming years. About 25 Indian girls participated in basketball, track and tumbling programs.

Indian Education Teacher Aides Project

The purpose of this project was to provide assistance for teachers in classrooms with a high percentage of Indian students. This was a successful project. Not only did it provide more time for teaching but made the Indian community more aware of the sincere efforts teachers were making to promote learning in the classrooms. The teacher's aide discovered that the teachers who had been accused of discrimination actually were quite fair in their treatment of students, not only in giving grades but in their consideration of Indian students as human beings.

Indian Education Pre-School and Kindergarten Project

Students who participate in the summer program are better prepared to participate in the reading readiness activities. Perhaps the most valuable experience is the social interaction with other boys and girls their own age. During the summer the preschooler learns to be a part of a group. Students who have not participated in the program have not done as well during the time they have been in first and second grade as those who participated in the summer program.

Rocky Boy Elementary

School Lunch Program

The school lunch program needed money to pay for bills incurred in Fiscal Year 1969. The money was used to feed 200 students per day times 30 cents per meal, minus five cents reimbursement. It also included the payroll for cooks and helpers as well as the food. The money for this program was necessary because our district is required to vote \$300,000 each year to keep operating. The same nutritional level must be maintained at Rocky Boy to complement a well-rounded educational program.

Home School Coordinator

The home school coordinator made visits with parents of children attending the Rocky Boy School. The purpose of this project was to help involve the parents in the educational process of the school. This project cost \$3,838.

Community Services Aide

This service consisted of an Indian from the reservation who helped in the activities of the school. This aide helped organize activities for adults and children after school and on weekends. A program involving sewing, beadwork, art and knitting became very popular with both adults and students.

Summer School

School was extended for the month of June to coincide with the teacher training program and to provide additional experience for our children during the summer.

* To be eligible, the applicant must have inherited at least one-quarter American Indian blood.

Basic Purposes
of
Johnson-O'Malley Programs

The purposes of the Indian Education Program are 1) to assist public school districts with categorical grants-in-aid to meet extraordinary needs which cannot be financed by available revenue, 2) to bring about a better understanding between school and community, 3) to encourage new programs or approaches to learning for meeting the needs of the Indian, 4) to provide in-service training for teachers of Indian children, and 5) to counsel with Indian youth in both public and private schools relative to education and/or training beyond high school.

To assist public school districts with categorical grants-in-aid to meet extraordinary needs which cannot be financed by available revenue, the Johnson-O'Malley Act has provided for foster homes in Harlem. These homes provided Indian students from Hays-Lodge Pole area with an opportunity to receive a high school education near their own homes.

Special transportation is provided through Johnson-O'Malley funds at Harlem, Hays-Lodge Pole, Wolf Point, Browning, Edgar and Colstrip.

The kindergarten program has provided a day school for five-year-old Indian children. Students in this program are provided with a three-to six-hour program, which includes blocks of time for work-play learning experiences, indoor and outside activities, and food including snack and lunch. Several rest periods are also included. These programs were carried on in the following schools: Arlee, Box Elder, Browning, Brockton, Hardin, Hays-Lodge Pole, Lame Deer, Lodge Grass, Rocky Boy, Ronan, St. Ignatius and Charlo. The kindergarten program was funded in these schools for the total of \$200,636.

Without Johnson-O'Malley funds these types of programs would not have been possible.

There is still a great deal to be done to assist public school districts with categorical grants-in-aid but the above examples are a large stride forward.

To bring about a better understanding between school and community, the Johnson-O'Malley Act has provided home-school liaison programs involving the employment of one or more Indian people, generally women, to visit the homes and parents for the sole purpose of bringing about a better understanding between home and school. Thirteen school districts were conducting this type of program. They are Hays-Lodge Pole, Browning, Box Elder, Arlee, Wolf Point, Lame Deer, Lodge Grass, Babb, Rocky Boy, St. Ignatius, Polson, Ronan and Brockton.

The home-school liaison program has been a very successful program but we are unable to fund all the other schools asking for this type of assistance.

To encourage new programs or approaches to learning for meeting the needs of the Indian, the Johnson-O'Malley Act funded a special teacher of home economics at Dixon High School. Summer programs for academic and enrichment experiences were funded at Harlem, Hays-Lodge Pole, Browning and Wolf Point. Lame Deer carried on an Indian culture writing project.

An Indian field curriculum consultant was hired for the Fort Belknap Indian Reservation.

To provide in-service training for teachers of Indian children, two workshops were held. One was held at Northern Montana College in Havre and the second was held at Montana State University in Bozeman. These types of workshops were very popular with teachers, teacher aides and administrators. These workshops will be curtailed for lack of funds in Fiscal Year 1971. Johnson-O'Malley funded these workshops in the amount of \$39,868.52.

To counsel with Indian youth in both public and private schools relative to education and/or training beyond high school, the Supervisor of Indian Education visited every public and private school that had a large Indian enrollment. He also conducted over 210 personal interviews with Indian college students. These interviews were held at the six units of the Montana University System.

The above examples illustrate the extent to which the basic objectives of the Johnson-O'Malley program in Montana are being met.

PROGRAMS INVOLVING INDIAN EDUCATION IN MONTANA

A most important problem with the Johnson-O'Malley Act is that, as presently administered, it excludes from participation Indians who have left the reservation for various reasons. Also, the Act excludes the landless or non-treaty Indians. Bureau of Indian Affairs statistics released in March, 1970 show the Indian population of Montana to be 22,592 on the seven reservations. Figures from the Montana Department of Indian Affairs released in May, 1970 puts the total state Indian population at 37,579. Thus, approximately 15,000 Indians are ineligible for Johnson-O'Malley services.

Indian participation in planning and decision making is lagging in some areas of Montana. If the Johnson-O'Malley Act is truly to serve the needs of Indian students, then Indians must be given an opportunity to decide how the funds should be spent.

The absence of any Johnson-O'Malley committees on the seven Indian reservations in Montana makes it impossible to disseminate information to the Indian people in those areas about the services, programs and opportunities available to Indian students.

The evaluation of the Johnson-O'Malley projects became a problem when the Supervisor of Indian Education was unable to make as many visits as he would have liked. The job was too big for one man.

Johnson-O'Malley funds often arrive too late to assure adequate funding of proposed or on-going projects. This discourages the school administrators from making use of such funds and does not allow time for careful planning when the funds are used.

The valuable kindergarten program has had to operate without funds or has had to delay operation until funds were available. These allocations arrived too late to allow some kindergarten projects to start on time. These delays in funding caused a large surplus of funds which complicates the accountability for such funds. Thus, evaluation and accountability of Johnson-O'Malley projects and funds must be improved if the needs of Indian children are to be met more adequately.

Indian Education Programs Sponsored by the Office of
the State Superintendent of Public Instruction Funded
in Part or Whole From Sources Other Than Johnson-O'Malley

Fee Waiver

The Indian education staff awarded fee waivers to selected American Indian students for attendance at units of the Montana University System. This service is provided under the authority of Section 75-506.1, R.C.M., 1947, as amended. The Indian Education Supervisor processes all applications and recommends applicants for this assistance. In the period covered by this report 96 new fee waivers were granted. Each fee waiver can extend over a four-year period. Under this policy, approximately 150 fee-extensions were given out, for a total of 246 fee waivers. Each student is allowed \$75 per quarter, or \$225 a year.

The Indian Education Supervisor conducted personal interviews with Indian college students each quarter. However, this is beginning to be an impossible task with the present staff size.

Rocky Boy Project

Through a Title III program under the directorship of Bert Corcoran, an American Indian, Rocky Boy Elementary School committed itself to a Child Development Philosophy which involves meeting the total nutritional, medical, dental, social, and academic needs of a student. Some of these needs can be cared for by other agencies in a community, but often a counselor can best coordinate the services.

To be realistic the curriculum must fit the child, not the child fit the curriculum. To adhere to this commitment, Rocky Boy Elementary School has an ungraded school and an individualized instructional approach. The school has developed individualized teaching methods that have been field tested. At present, staff is working in the mathematic, reading, science, and spelling areas.

To implement this type of curriculum, a different educational philosophy and retraining of teachers are necessary. The Rocky Boy program subscribes to the idea that if change is to take place and education is to receive proper emphasis, parents and the community must be kept abreast of new concepts and their basic skills must be upgraded at all times. This in turn will help develop the attitudes and purposes of students. Basic adult education, adult community sessions, and adult recreation are means used to involve adults in the school program. A policy advisory committee has been established to work with the school administration as a liaison between the school and the community.

Psychologists, counselors, social workers and reading consultants are available to provide individual evaluations, group evaluations and consultant services to all the schools in the project area. Requests for all services must come through the schools except in those cases where another agency requests services for a school dropout.

A child may be referred for a reading evaluation only on a complete psychological evaluation. Counseling is provided to the pupil when needed as time permits. Further information, testing and counseling are provided the school and parents as requested. The reading consultants provide in-service training on a group and individual basis at the request of the local school administration.

Follow-Through

The Office of the State Superintendent of Public Instruction supervises a Follow-Through Program for the Indian students at the Lame Deer, Busby, and Ashland Elementary Schools. This program consists of supplementary instruction by teachers and teacher aides in the first three grades, encompassing the total child in the academic and health areas. It provides for individual instruction and assistance for those students who are in need of tutorial and didactic help.

Drug Abuse Education

The state is sponsoring a drug abuse education training program at several Indian schools. These programs are co-sponsored through the Education Professions Development Act, Public Law 90-35.

The goal is to begin the first year of a projected three-year program of training educational personnel in drug abuse education. This program will be transferred to the basic skills operation of the State Superintendent's office.

Teacher Corps

The goal of the Teacher Corps Program at the state level is to maintain liaison activities among local educational agencies, the office of the State Superintendent, Eastern Montana College, and the Bureau of Education Personnel Development of the United States Office of Education as cooperating agencies in a Teacher Corps Program.

A second goal is that of providing technical assistance to the development and conduct of the Teacher Corps Program.

This program is training persons who in two years will become master teachers and team leaders for rural and Indian schools. Corps members are Indian and non-Indian. The program is designed to change the educational program for rural and Indian youths.

Teacher and Teacher Aide Training Programs

Training programs were implemented to reduce critical shortages of teachers in areas of greatest need in Montana by training persons not in educational occupations for positions as teachers and as teacher aides. Some of these teachers and aides are teaching and working in schools serving Indian youth.

Bilingual Education Program

Provisions for bilingual education programs have been made through Title III of the Elementary and Secondary Education Act of 1965, as amended.

The major goal of such programs is to combine efforts of those local educational agencies having high concentrations of students whose primary language is not English in order to establish a state-wide bilingual education program.

The first year program was funded in the amount of \$173,000 by the U. S. Office of Education to serve students on three different Indian reservations in the state - Rocky Boy, Northern Cheyenne and Crow.

A monitoring and dissemination capacity was assumed by the office of the State Superintendent to facilitate the development and sophistication of this project.

Career Opportunities Program

This program provides technical assistance to the development and conduct of training programs for para-professionals in education which lead to a B.S. degree and a professional career at the end of three to five years of training. The approximate total cost of the two projects currently operating in Montana was \$330,000. This includes the cost of training as well as employment for 75 trainees. Technical assistance was further provided for a similar program developed on the Rocky Boy Reservation for 15 trainees.

Examples of Programs That Have Been Highly Successful With Indian Children in Montana

Programs that have been highly successful with Indian children in Montana are those that have been really relevant to their needs. One such project was the foster home project in Harlem. This program allows the Indian child participating in extracurricular programs to live with foster parents during the school week. The Indian parents must take their children home with them on weekends and return them to Harlem by Sunday evening. This allows communication between foster and real parents about the Indian child. This program is very popular with the Indian children.

Special transportation is proving very successful in allowing the Indian child to participate in school programs after regular school hours.

The home-school coordinator is proving to be the most effective program for bringing about understanding between Indian families and the school. Both school officials and parents are satisfied with this program. This home-school liaison program is being requested by many schools for the coming school year.

The kindergarten program long overdue is underway and expanding.

Summer workshops for teachers of Indian children are proving very successful and are being requested by public and private school teachers and teacher aides.

A summer youth program held at Browning met with enthusiastic support from everyone involved. This program focused on boys around the ages of 11 and 12 who had been truant. As part of the enrichment activities offered by the program, the boys went on pack trips to the Bob Marshall Wilderness area and learned proper camping and hiking methods.

Achievements, Accomplishments, and Participation
of
Indians in Education

The effort being put forth by younger Indians to stay in school, graduate and attend college reflects the efforts of the Office of the State Superintendent of Public Instruction, Johnson-O'Malley and other federal programs.

Twenty-eight public school districts have a total of 31 school trustees who are of Indian extraction.

There is a movement among non-treaty, landless, and off-reservation Indians to develop programs for their Indian youth. An Indian Alliance has been organized in Helena. The Helena Indian Alliance is 'first' in the nation and is doing things for landless and off-reservation Indians that are very encouraging. The Alliance is improving the children's education, health and recreation by their programs. The Alliance has caused some changes in the attitudes of educators and Indians in the cities. Helena's Indian Alliance assisted in the development of an Indian Studies Course being offered this year at the Helena Senior High School. Indian students from Helena actually assisted in writing this course.

A new organization, Montana United Scholarship Services, has been formed in Great Falls for the purpose of encouraging and assisting young Indian drop-outs to go back to school. A young Indian girl is the director. The staff consists of three field counselors, each an Indian woman who has personal understanding of the problems Indian youth face and can identify with them. These counselors are assigned to the Crow and Cheyenne reservations with headquarters at Lodge Grass, Fort Belknap and Rocky Boy reservations with headquarters at Harlem, and the Fort Peck area with headquarters at Frazer.

Older adult Indians are implementing programs which will help Indian children as well as other interested people. One program started by an Indian adult is the Cheyenne Cultural Study. It will eventually develop written school materials of Cheyenne history and culture. The people involved are Cheyenne Indians with the help of non-Indian expertise.

In order to promote better understanding of Indian culture, John Woodenlegs, Elizabeth Clark and Dr. Hap Gilliland gave unselfishly of their time and effort to assist in the preparation of a booklet entitled Vostaas White Buffalo's Story by Maxine Ruppel. Illustrated by Indian students at St. Labre Mission, the booklet gives the names and history of the Plains Indian Tribes. The booklet discusses Indian education, ceremonials, war dances, and religion and also contains a section on the future of the Indian people.

The University of Montana, Montana State University and Eastern Montana College are also sponsoring Indian student organizations. These all-Indian organizations are encouraging high school students to graduate and attend college. The students help each other in school and act as consultants on Indian affairs in colleges and at local public schools.

Several books are being written by Indian educators pertaining to life, plants, culture, and history. Norma King has written a book about plants that are used by the Indians of Hays-Lodge Pole area. Minerva Allen has written a book of poems about the Assinaboine and Gros Ventre Indians. Mrs. Allen's book is being used in the Hays-Lodge Pole schools.

Two young Indian boys are busy making Christmas cards about Indians to sell this year. They are elementary students from the Hays-Lodge Pole School.

Blackfeet Indian authors are developing several series of books to be used in grades three through eight. The Grandfather series will depict the early history of the Blackfeet Tribe as told by Grandfather. The Daddy series gives the early modern history of the Blackfeet and the Napi series will depict the Blackfeet legends. The students are having difficulties finding a company that will publish the books.

State Superintendent of Public Instruction Dolores Colburg has appointed an American Indian, Earl J. Barlow, as Indian Education Supervisor. Mr. Barlow comes to the office with experiences as an elementary teacher, high school teacher and superintendent of schools serving Indian children.

Dwight A. Billedeaux, also an American Indian, has been named Assistant Supervisor of Indian Education. He will assist public schools on or adjacent to Indian reservations in upgrading curriculum in an effort to increase the relevancy of educational programs for Indian students.

Students known to have re-enrolled in another school of any type.

In reporting numbers of dropouts show numbers and alphabetical keys by grade for the following categories: (a) withdrawn by parents (b) marriage (c) employment (d) detailed by law agencies (e) illness (f) death (g) expelled (h) other example: If five students are dropouts from the 11th grade from which two left school for marriage and three left for employment, show as follows in Grade 11 block of dropout column: 2b, 3c

COMMENTS:

This form is designed for use by individual schools, and for district or county as well as State consolidated reports. In the first column, elementary ungraded students (El. Ug.) may include pre-kindergarten as well as special students in any category. Secondary ungraded (Sec. Ug.) includes all special students of high school age. Note that each column except at the extreme right is for Johnson-O'Malley assisted Indian students only. The extreme right column is total enrollment of all students, regardless of ethnic group, enrolled in Johnson-O'Malley participating schools.

The summary report is to be included in the annual J.O.M. report due by Oct. 15 each year in the Area and Central Offices of the Bureau of Indian Affairs.

PUBLIC LAW 874 INFORMATION FOR SCHOOL DISTRICTS
WHICH PARTICIPATED IN JOHNSON-O'MALLEY PROGRAMS
FISCAL YEAR 1970

Schools were not required to submit information indicating the amount of Public Law 874 funds received on behalf of Indian students who were eligible under Johnson-O'Malley. A review of fiscal year 1970 P.L. 874 applications indicates a high percentage of pupils claimed would be eligible under Johnson-O'Malley except in the case of Polson where the percent would be approximately 50%
