ABSTRACT

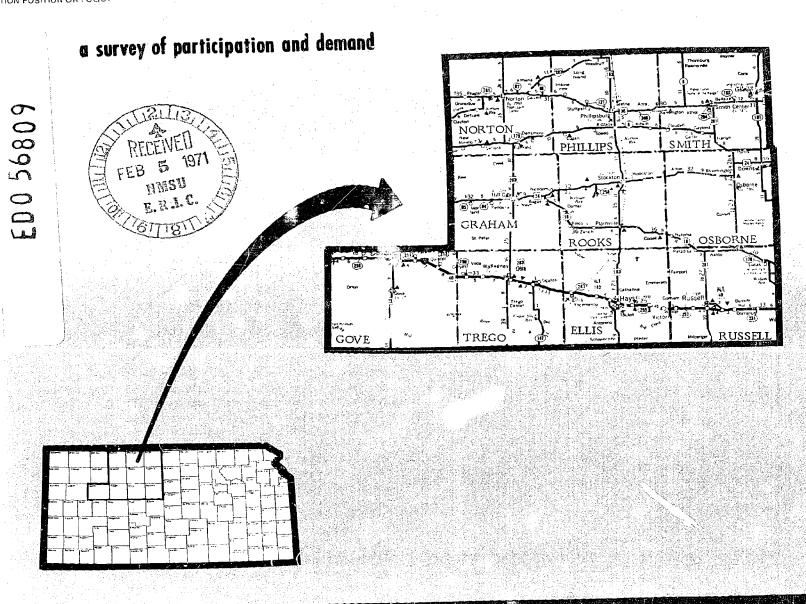

The purpose of the survey reported in this document was to gather information on participation and demand for outdoor recreation and tourism in Kansas to serve as a guide for public or private groups and persons interested in providing outdoor recreation and tourist facilities and services. Nonresident travelers in the western half of Kansas were interviewed from August to October, 1966, by highway patrolmen, other state personnel, members of local chambers of commerce and women's clubs, and others. State residents from Norton, Phillips, Smith, Graham, Rooks, Osborne, Gove, Trego, Ellis, and Russell counties were surveyed during the fall of 1966 by randomly selecting Kansas communities, stratifying those selected, and randomly sampling each stratum. Findings are presented, for in-state and nonresident users separately, on past activities over a 12-month period and anticipated activities over the next 12 months. Related documents are RC 005 732 and RC 005 734. (BO)

OUTDOOR RECREATION AND TOURISM IN KANSAS A Study of Participation and Demand

PATRICK E. SMYTHE Extension Economist, Resource Development Kansas State University

Ac nowledgments

Appreciation is expressed to Kansas State University faculty members George Halazon, Extension Specialist, Wildlife Management, and Dr. Don Trumbo, Psychologist, who assisted in the development of the questionnaire for this survey and to Gary Vacin, Extension Economist, for help in editing and planning. A great deal of assistance was provided by County Extension agents and the following organizations in interviewing and collecting the surveys throughout the state: State and local Chambers of Commerce; State Highway Patrol; Kansas Department of Economic Development; State Highway Commission; State Park and Resources Authority; and State Forestry, Fish and Game Commission.

Many interested persons in communities in Kansas helped with the survey. Claudia Simmons and Linda Spielman, office secretaries, and Jo Ann Lang and Marilyn Moore, university students, deserve special recognition for compiling and typing.

Introduction

Outdoor recreation and tourism is big business in Kansas. Many communities have opportunities to develop recreation or tourism. People like to go places and do things. Many persons travel to visit historical sites or unusual places, but often they like rest and relaxation or simply a drive in the country. Wherever they go they often need facilities and services.

Lying in the exact center of the nation and with its outstanding highways following or closely paralleling routes of the famous early day trails, Kansas is in an attractive position to serve the motorist. There are many opportunities for the visitor to participate in outdoor recreation facilities and services in this state.

The situation offers challenge and potential for developing both public and

private recreation areas to meet the needs of Kansans as well as the millions who visit the state each year.

Purpose

The purpose of the survey was to gather information on participation in and demand for outdoor recreation and tourism in Kansas to serve as a guide for public or private groups and persons interested in providing outdoor recreation and tourist facilities and services.

Procedure

The survey consisted of two phases. In phase one, out-of-state travelers were interviewed during August, September and October of 1966 by the highway patrolmen; State Forestry, Fish and Game personnel; members of local chambers of commerce; women's clubs; and others.

In phase two, communities were selected by random sampling. The communities were stratified according to population and a random sample was drawn from each strata. Streets were randomly selected within voting precincts and an equal number of families in each voting precinct was interviewed by residents of each community during the fall of 1966. Extension resource development specialists from Kansas State University met with interviewers in each community to explain how to administer the questionnaire. The data for the resident section of this publication was taken from interviews with residents of the following counties: Gove, Trego, Ellis, Russell, Osborne, Rooks, Graham, Norton, Phillips, and Smith. This publication is one in a series. Other publications cover all regions of the state.

The data for the non-resident section was taken from interviews with respondents from out of state who were traveling in the western half of Kansas (west of a tier of counties bounded by Jewell County on the north and Harper County on the south).

The following groups assisted with the interviewing in the phase: local chambers of commerce, junior chambers of commerce, Jaycee Jaynes, Business and Professional Women, and others. Many individuals also heiped collect data. The data collected was processed through the Computing Center at Kansas State University. The program was developed by personnel at the Computing Center to compile questionnaires from the entire state. Compilations were made by individual regions.

GENERAL INFORMATION

An attempt was made to determine how the respondents selected the recreation facilities or sites they visited. Seventy—three percent indicated personal recommendation, ten percent indicated road signs, seven percent convenience, three percent each personal knowledge, advertisement or some other method, and one percent indicated that they live in the area.

Seventy-two percent of the interviews were taken at the respondents' residence, nine percent at the office, school or church, seven percent at a state lake, five percent at a roadside park, four percent at a restaurant, and three percent at a state park.

Of those families that had one child at home, fifty-seven percent had a child five years old or less, twenty-three percent from 11 to 15 years, thirteen percent from 16 to 20 years, and seven percent from 6 to 10 years of age.

Of those families that had more than one child at home, thirty-three percent had children five years old or less, twenty-seven percent from 11 to 15 years, twenty-seven percent from 16 to 20 years, and thirteen percent from 6 to 10 years of age. Thirty-five percent of the respondents were in professional or managerial occupations, seventeen percent clerical or sales, ten percent agriculture, skilled craftsman or retired, nine percent semi-skilled, seven percent housewives and one percent college students or unskilled.

Forty-nine percent indicated they had from 8 to 12 years of education, thirteen percent one to eight years,

twelve percent had some college, twelve percent were college graduates, nine percent had advanced education, and five percent had attended trade school.

PARTICIPATION IN KANSAS OUTDOOP RECREATION

Region 2 inc udes the following counties: Gove, 15270, Ellis, Russell, Osborne, Rooks, Stanam, Norton, Phillips, and Smith.

Visiting historical sites and interesting places was the most popular recreation activity in which respondents

6

participated during the 12 months prior to the interviews. Sixty-seven percent said they had participated in this activity in Kansas during the period. Fifty-seven percent had gone fishing, forty-five percent swimming and hunting, thirty-seven percent picnicking, thirty-four percent boating or canoeing, thirty-two percent camping, twenty-eight percent had attended special events, twenty-two percent had played golf, twenty-one percent water skiing, nineteen percent hiking, seventeen percent had participated in other outdoor recreation activities and four percent had gone horseback riding.

FUTURE PARTICIPATION IN KANSAS OUTDOOR RECREATION

Respondents were asked if they would spend more time participating in outdoor recreation activities in Kansas during the next 12 months if good facilities were available. Fifty percent said they would do more fishing, forty percent

picnicking, thirty percent hunting, twenty-seven percent camping, twenty-six percent swimming, twenty-five percent visiting historical sites or interesting places, twenty percent boating or canoeing, eighteen percent water skiing, eighteen percent hiking, ten percent horseback riding, and ten percent other outdoor recreation activities.

FISHING

Four percent of the respondents who went fishing in Kansas during the 12 months prior to the interviews paid a fee to fish in a private area. Thirty-four percent purchased a park permit. Of these, ninety percent purchased a state permit and ten percent purchased both state and federal permits. Respondents went fishing an average of 11 times in Kansas during the period. They spent an average of one day and were accompanied by an average of 2.6 family members on their most recent fishing trip. Nineteen percent went fishing out of the state an average of four times during the period. Thirty-four percent of the fishermen who were out more than one day stayed in a tent, twentynine percent a campground, seventeen percent a trailer campground, eight percent in a cabin and four percent each in a motel, private home and station wagon.

Thirty-eight percent described the fishing as poor at the last place where they had fished in Kansas. Thirty-two percent said the fishing was fair, twenty-four percent good and six percent excellent.

June was the most popular month for fishing in Kansas, followed by August, July, May, April, September and October.

Forty-five percent of the participants had gone fishing at a lake or pond, forty-one percent at a reservoir, eleven percent a stream, two percent a river and one percent a creek.

FUTURE PARTICIPATION IN FISHING

Of those respondents who said they would do more fishing in Kansas if there were good facilities, fifty-three percent said they prefer to fish in a reservoir, thirty-six percent a lake or pond and eleven percent a stream.

Twenty-nine percent said they would fish for catfish, twenty-six percent bass, nineteen percent walleye, fourteen percent crappie, eleven percent trout, and one percent northern pike.

Of those respondents who had fished in Kansas during the 12 months prior to the interviews, forty-six percent said they would go 50 to 100 percent more, forty-two percent said they would go less than 50 percent more and twelve percent said they would go more than 100 percent during the next 12 months if there were good facilities. Of those who had not fished in Kansas during the 12 months prior to the interviews, sixty-two percent said they would go 6 to 12 times, nineteen percent said they would go more than 12 times and nineteen percent said they would go only once if there were good facilities.

Respondents who said they are interested in a combination of fishing and picnicking were asked how much they would pay and how far they would drive to use an attractive lake within easy driving distance

of their home that had good clean picnic facilities and good fishing. Forty-one percent said that they would be willing to pay \$1 per family per day, twenty percent indicated they would not pay, fifteen percent said they would pay \$2 per family per day, fifteen percent said \$3, six percent \$5 per family per day and three percent \$4 to use these facilities. Forty-one percent said they would pay \$10 per family per season, eighteen percent \$40, fifteen percent \$20, two percent \$100 and two percent \$200 per family per season. Twenty-two percent said they would not pay to use these fac-ilities.

Forty-six percent indicated that they would be willing to drive 25 miles, thirty-six percent 50 miles, nine percent 5 miles, eight percent would not drive and one percent said they would drive 100 miles to use these facilities.

Thirty-one percent said they would pay \$1, six percent \$2, and six percent \$2.50 per person per day to use such an area for fishing only. Fifteen percent said they would not pay to use such an area for fishing only.

Fifty-eight percent said they would drive 25 miles, nineteen percent 50 miles, eleven percent 5 miles, six percent 100 miles and six percent indicated they would not be willing to drive to use such an area for fishing only.

BOATING AND CANOEING

Forty-five percent of the respondents in Region 2 who had gone boating or canoeing during the 12 months prior to the interviews said they own a boat, and fortytwo percent said they own a boat motor. Thirty-nine percent of these were 31 to 40 horsepower, twenty-one percent were 1 to 10 horsepower, fourteen percent were 21 to 30 horsepower, eleven percent were 41 to 50 horsepower, seven percent were 51 to 60 horsepower, and four percent each were 61 to 70 and 71 to 80 horsepower. Respondents spent an average of two days and were accompanied by an average of three members of their family on their most recent boating or canoeing trip in Kansas.

Only nine percent of those who boated in Kansas during the 12 months prior to the interviews rented a boat or canoe. This may be partly attributed to the fact that only smaller motorboats are available and can be rented at the marinas at the larger reservoirs. Only eight percent of the boaters paid a fee to boat or canoe in a private area. Participants went boating an average of nine times in Kansas and

 \mathfrak{I}

twice out of the state during the 12 months prior to the interviews.

Twenty-seven percent of the participants said they had gone water skiing the last time they went boating in Kansas. Twentyfour percent had gone fishing, twenty percent cruising, fourteen percent skiing and cruising, and four percent fishing and skiing.

Forty-five percent rated the water and facilities good, thirty percent excellent, fifteen percent fair, and ten percent poor. Respondents suggested the following improvements: more docking areas, more boat ramps, and raising the water level.

July was the most popular month for boating and canoeing followed by August, June, May and September.

WATER SKIING

Twenty-one percent of the respondents had gone water skiing in Kansas during the 12 months prior to the interviews. Eighty-eight percent had gone skiing at a dam or reservoir and seven percent at a lake. Participants spent an average of 10 hours and were accompanied by an average of two family members on their most recent outing. Forty-nine percent had purchased a park permit. Ninety-seven percent paid a fee to ski in a private area.

Participants went water skiing an average of eight times in Kansas during the 12 month period. Seven percent went skiing out of the state an average of once during the period. Webster Reservoir was the most popular area where participants had skied during the period followed by Cedar Bluff, Wilson, Norton, Kirwin, and Kanopolis Reservoirs. Thirty-nine percent rated the facilities good, twenty-nine percent excellent, seventeen percent fair and fifteen percent poor.

CAMPING

Thirty-two percent of the respondents had gone camping in Kansas during the 12 months prior to the interviews. Eightytwo percent of the participants had camped at government areas and eighteen percent at private areas. Campers spent an average of one and one-third days and were accompanied by an average of four members of the family on their most recent camping trip in Kansas. Thirty-seven percent purchased park permits. Of those purchasing a park permit, eighty percent purchased state permits. Six percent of the campers paid a fee to camp in a private area. Fifty-two percent said they prefer to) in groups rather than by themselves.

Participants had gone camping in Kansas an average of four times during the 12 months. Thirty-one percent had made an average of 1.4 camping trips outside Kansas during the period. Seventy-two percent of the participants had camped near a reservoir, twenty-three percent near a lake or pond and five percent near a stream the last time they went camping in the state.

Thirty-six percent of the participants stayed in tents, twenty-four percent in trailers, eleven percent in a station wagon tent and a pickup, seven percent in a camper, six percent in a tent trailer and five percent in a sleeping bag. Fifty percent said the facilities were good, twenty-six percent fair, twenty-two percent excellent and two percent poor.

July was the most popular month for camping, followed by June, August, September, May and October.

FUTURE PARTICIPATION IN CAMPING

Reservoirs were the type of water respondents said they would prefer to camp near, followed by lakes, ponds and streams. Facilities the campers would want to use include: restrooms, picnic tables, water supply, cooking facilities, showers, electricity, hot water, sewage disposal, dryer and washer. Types of equipment the

camper would like to use include: tents, trailers, station wagon tents, pickup campers, tent trailers, and pickups. Fiftysix percent of those who camped in Kansas during the 12 months prior to the interviews indicated they would increase their camping activity by 50 to 100 percent more during the next 12 months if good facilities were available. Twenty-eight percent said they would increase their camping less than 50 percent more and sixteen percent said they would increase their camping more than 100 percent.

PICNICKING

Thirty-seven percent of those interviewed had gone picnicking in Kansas during the 12 months prior to the interviews. They were accompanied by an average of four members of the family on their most recent picnic. Twenty-eight percent purchased park permits. Participants had gone picnicking in Kansas an average of six times during the period. Thirty-two percent went picnicking out of Kansas an average of three times during the period. Part of this large number can be attributed to the people picnicking along roadsides when traveling on their summer vacation. Fifty-seven percent picnicked near a lake or pond, twenty-two percent a

stream, and twenty-one percent a reservoir. July was the most popular month for picnicking, followed by August, June, May, September, and March.

Facilities were rated good by fortyfive percent, excellent by thirty-one percent, fair by eighteen percent and poor by six percent of the respondents.

FUTURE PARTICIPATION IN PICNICKING

Reservoirs, lakes and ponds were the types of water most respondents preferred to picnic near. Picnic tables, water supply and restrooms were the facilities most in demand. Forty-eight percent of the respondents who had picnicked in Kansas during the 12 months prior to the interviews said they would go 50 to 100 percent more in the next 12 months if good facilities were available. Forty percent said they would go less than 50 percent more and twelve percent indicated they would go more than 100 percent. Fifty-five percent of those who had not picnicked in Kansas during the 12 months prior to the interviews said they would go once in the next 12 months if good facilities were available, thirty-six percent said they would go 6 to 12 times and nine percent indicated they would go more than 12 times.

Of those who were interested in a combination of picnicking and fishing, forty-nine percent said they would drive 25 miles to use an attractive private lake that had good clean picnic facilities and good fishing at a reasonable rate. Thirty-six percent said they would drive 50 miles, thirteen percent 5 miles and two percent said they would drive 100 miles. Forty-eight percent said they would pay \$1 per family per day to use such facilities within easy driving distance of their home. Twenty-eight percent would pay \$3, twelve percent would not pay, ten percent would pay \$2 and two percent \$5 per family per day.

Thirty-eight percent said they would pay \$10 per family per season to use these facilities. Twenty-three percent said they would not pay, twenty-one percent said they would pay \$20, fifteen percent \$40 and three percent \$100 per family per season.

SWIMM: 13

Forty-five percent of those interviewed had gone swimming in Kansas during the 12 months prior to the interviews. Government areas were more popular than private areas. Respondents were accompanied by an average of 3.6 members of the family on their most recent swimming outing. Sixty-four percent swam in supervised areas, sixty-eight percent of the areas had shower facilities, thirty-one percent locker facilities, and fifty-two percent beach facilities. Participants went swimming in Kansas an average of 20 times during the 12 months. Twentyeight percent went swimming in neighboring states an average of four times during the period.

More respondents went swimming in natural bodies of water than pools. Facilities were rated good by fifty-five percent, excellent by seventeen percent, fair by fourteen percent and poor by fourteen percent of the participants. June, July and August were the most popular months for swimming in Kansas.

HUNTING

Forty-five percent of the respondents had gone hunting in Kansas during the 12 months prior to the interviews. Seven percent had hunted on government areas and ninety-two percent on private areas. Participants spent an average of 13 hours and

were accompanied by an average of one member of their family on their most recent hunting trip in Kansas. Seventy percent said the game supply was satisfactory and ninety percent said that hunting conditions were suitable. Participants went hunting in Kansas an average of 11 times during the 12 months. Eight percent made an average of nine out-of-state hunting trips during the period.

Pheasant was the most popular game for the hunters, followed by quail, ducks, rabbit, prairie chicken, goose, varmint, dove, deer and coyote.

Seventy-eight percent of the hunters used dogs and thirteen percent used game cleaning and freezing services on their most recent hunting trip in Kansas. Facilities and services were rated good by fifty-three percent, fair by twenty-eight percent, excellent by thirteen percent and poor by six percent of the hunters.

November was the most popular month for hunting, followed by January, September, August and October.

FUTURE PARTICIPATION IN HUNTING

Most respondents who would spend more time hunting in Kansas if good facilities were available said they prefer a private area to a government area.

Fifty percent of those who had not been hunting in Kansas during the 12 months prior to the interviews said they would go hunting once during the next 12 months if good facilities were available. Thirty-three percent said they would go 6 to 12 times and seventeen percent said they would go more than 12 times. Of those who were interested in duck hunting, twenty-eight percent said they would drive 50 miles to use a private area with good duck hunting, adequate blinds and facilities and reasonable rates.

Twenty-four percent said they would drive 30 miles, sixteen percent 20 miles, sixteen percent 70 miles and eight percent 10 miles. Eight percent said they would not drive to use these facilities. Twenty-six percent said they would pay \$2 per person per day to use such facilities within easy driving distance of their home. Twenty-six percent said they would pay \$1, twenty-two percent said they would not pay, nineteen percent would pay \$5 and seven percent \$3 per person per day to use these facilities.

Pheasant was the most popular type of game the respondents would want to hunt followed by quail, duck, goose, turkey, deer, rabbit and squirrel.

Forty-five percent of those who had been hunting in the state during the 12 months prior to the interviews said they would go hunting less than 50 percent more during the next 12 months if good facilities were available. Forty-three percent said they would go 50 to 100 percent more and twelve percent indicated more than 100 percent.

Of those who were interested in goose hunting, thirty-eight percent said they would pay \$2 per person per day to use a private area with good goose hunting and adequate blinds and facilities within easy driving distance of their home. Thirty-three percent said they would pay \$4, fourteen percent said they would not pay, ten percent would pay \$6 and five percent \$8 per person per day to use these facilities.

Twenty-four percent said they would drive '00 miles to use such an area that charged reasonable rates for goose hunting. Twenty-four percent said they would drive 60 miles, nineteen percent 40 miles, nineteen percent 20 miles, five percent 80 miles and five percent 5 miles. Four percent would not drive to use these facilities.

Out-of-State Information

This section of the publication contains information taken from interviews with respondents from out-of-state who were traveling in the western half of Kansas as shown in the following map.

Out of State -- General Information

Forty percent of the respondents were in professional or managerial occupations, twenty-three percent were skilled craftsmen, ten percent in clerical or sales, and seven percent in agriculture.

In response to the question "How many years of formal education do you have?" thirty-three percent answered 8 to 12 years, nineteen percent were college graduates, seventeen percent said some college, and fifteen percent indicated advanced education.

Respondents who indicated they have one child at home were asked the age of the child. Fifty-five percent answered 16 to 20 years, twenty-seven percent 5 years or younger, and eighteen percent answered 11 to 15 years.

Respondents who had more than one child at home were asked the ages of their children. Thirty-eight percent answered 5 years or younger, twenty-one percent 11 to 15 years and twenty percent 16 to 20 years. Forty-four percent of the respondents

said they selected the facilities or sites they visited by road signs, twenty-seven percent by personal recommendation, thirteen percent by advertisement, five percent convenience and five percent camp guides.

Twenty-three percent of the interviews were taken at a roadside park, sixteen percent at a restaurant, fourteen percent at a motel and thirty-three percent at other places.

Interviewers were asked to suggest interesting places or historical sites in their communities which they felt had tourist potential. Bavarian Haus Restaurant, Boot Hill and buffalo herd at Tribune were listed most often.

The following were listed once: helium plant, Beaver Creek, Santa Fe Trail, Wagon Bed Springs, Lone Tree location, Pawnee Rock, Garfield Memorial, Dodge City, Wilson County State Lake, Garden of Eden in Lucas, Cedar Bluff Reservoir, Elgin Hotel-Marion.

The highways traveled by the greatest number of non-residents were I-70, U.S. 54, U.S. 50, the Kansas Turnpike, U.S. 40, U.S. 24, U.S. 56, and I-35.

The travel and tourist facilities in Kansas were rated good by forty-eight percent, excellent by forty-two percent, fair by eight percent and poor by two percent of the non-residents. Improvements in facilities suggested most frequently were: wider roads, more roadside parks and more camping areas. Better marking for tourist attractions was the improvement in tourist activities suggested most frequently.

Missouri (42) than any other state. Other states listed most frequently were: Illinois (24), California (18), Idaho (14), Iowa (11), Georgia (10), Colorado (9), Michigan (9), Ohio (8), New York (8).

Thirty-two respondents said their destination was Colorado, twenty-three California, nineteen Kansas, eleven Missouri, nine Oklahoma and seven Wyoming.

Of those respondents who said they planned to spend the night in Kansas, fifty-nine percent said they would stay in a motel, twenty-eight percent at a roadside park, six percent with relatives, four percent with friends, two percent at a hotel, and one percent at a reservoir area.

Respondents' impressions of Kansas and Kansans were generally favorable.

Participation in Kansas Outdoor Recreation

int lesting places in Kansas was the most popular activity among the out-of start travelers in western Kansas. Fifty-three percent had participated in this activity during the 12 months prior to the interviews. Twenty-eight percent had gone picaicking, twenty-five percent camping and aleven percent swimming.

Dodge City and Fort Larned were the most popular individual sites respondents had visited during the period, followed by Pawnee Rock and State Monument, Eisenhower Museum, Boot Hill, the First Capital of Kansas at Fort Riley, Old Abilene, Greensburg Well and the Garden City Zoo and Museum.

Out-of-state travelers attended the following special events in Kansas: county fairs, pancake race, national baseball tournament, National Campers and Hikers Association meeting, America the Outdoor Theatre, family reunion and the Salina Annual Picnic.

Future Participation in Fishing

The respondents were asked why they hadn't gone fishing in Kansas more often. The reasons most frequently given were: not enough time, live out of state, too far away, not enough fishing areas, and good fishing in Missouri.

In response to the question, "What type of water would you want if you increased your fishing in Kansas?" Thirty-nine percent answered lake or pond, twenty-six percent stream, lake or pond, and eighteen percent reservoir. Bass, catfish and trout were the kind of fish the respondents would prefer to fish for.

Camping

Picnic tables, restrooms and water supply were the facilities used by most respondents on their most recent camping trip in Kansas. Better restrooms, more camping areas and better water supply were the most frequent suggestions for improving the facilities.

Tents were the most popular camping equipment used by respondents, followed by tent trailer and pickup. Camping facilities and services were rated good by 50 percent, fair by 26 percent and excellent by 24 percent of the respondents.

Forty-seven percent of the respondents indicated they prefer to camp in groups rather than individually. Sixteen percent had paid a fee to camp in a private area. Twenty-four percent had purchased a park permit and sixty-nine percent had camped at a government area.

August was the month when most of the respondents did most of their camping in Kansas.

Future Participation in Camping

Respondents who said they would spend more time camping in Kansas if there were good facilities were asked where they thought they would camp. Lakes and reservoirs was the most frequent answer, followed by roadside parks, and Ford County State Lake. Not enough time and too far away were given most often as reasons why respondents hadn't done more camping in Kansas.

Shower facilities, water and lighting facilities and more restrooms were suggested most often as improvements for camping facilities in Kansas.

Most of the respondents who would do more camping in Kansas said they prefer government areas to private areas. Restrooms, water supply and picnic tables are the facilities most of the respondents would want. Tents and tent trailers are the camping equipment most would use.

Picnicking

Roadside parks were the most popular picnicking sites listed by non-residents, followed by Russell City Park, Ford County State Lake, Meade, Dodge City, Tuttle Creek Reservoir and Norton Reservoir.

Picnic tables, water supply and restrooms were the facilities used by the
greatest number of respondents. Picnicking
facilities were rated excellent by fifty
percent, good by twenty-six percent, fair
by twenty-two percent and poor by two
percent of the respondents.

August was the most popular month for picnicking, followed by July, September and October.
