DESCRIPTORS      *Educational Objectives; *Inservice Education;
                 *Learning Disabilities; *Staff Improvement; *Systems
                 Approach; *Teacher Education

ABSTRACT
        This document is focused on the various aspects of
establishing a systematic approach to the inservice training
mini-course in learning disabilities for classroom teachers. The
training model is exemplary of a 4-hour, intensive training course
designed and conducted by staff and consultants for the Merrimack
Education Center. Its purpose is to serve as a resource, specifically
for persons involved in establishing inservice training courses in
local school districts and for school agencies, school districts,
intermediate offices, and others responsible for inservice training.
It spells out the objectives of the mini-course and cites an example
of one instructional phase of the course outline as well as the
evaluation design. One of the major objectives of this course is to
demonstrate to teachers a systematic approach in building
instructional programs beginning with the pre-assessment and
instructional activities and continuing through the post-assessment.
The task of designing a complete training course for learning
disabilities is infinite; therefore, this systematic approach is
meant to serve as a model for the building of training programs to
meet locally specified objectives, which have been identified as
pertinent to the instructional process. A selected bibliography of
ERIC documents relating to learning disabilities is included.

RESUME

This document is focused on the various aspects of
establishing a systematic approach to the in-service
training "mini-course" in learning disabilities for
classroom teachers. This training model is exem-
plary of a four-hour, intensive training course de-
signed and conducted by staff and consultants for
the Merrimack Education Center (MEC), Title III-
ESEA. Its purpose is to serve as a resource, spe-
cifically for those persons involved in establishing
in-service training courses in local school districts
and generally for school agencies, school districts,
intermediate offices, and others responsible for
in-service training of teachers. It spells out the
objectives of this particular "mini-course", cites
an example of one instructional phase of the course
outline, and the model for building the course out-
line as well as the evaluation design.
One of the major objectives of this course is to
demonstrate to teachers a systematic approach in
building instructional programs beginning with the
(1) pre-assessment, (2) instructional activities,
and continuing through the (3) post-assessment.
The task of designing a complete training course for
learning disabilities is infinite; therefore, this
"systematic approach" is meant to serve as a model
for the building of training programs to meet lo-
cally specified objectives. This systematic model
enables the trainer to design specific training for
the desired objectives identified locally as being
pertinent to the instructional process.
# TABLE OF CONTENTS

BACKGROUND

The Merrimack Education Center is located in the northeastern
part of Massachusetts, on the New Hampshire border, and
serves 20 communities.

The area served by the Center is described as rural, suburban
and urban. The Merrimack Education Center (MEC) is a collabora-
tive of 20 contiguous communities in Massachusetts comprising
approximately 5,000 teachers and 100,000 students. It was
established in 1968 with Title III funds which provided for
innovative supplementary educational centers. It is one of
the largest cooperative centers in Massachusetts, and is a
pioneer in the development of the "broker" concept in education.

As middleman to the communities it serves, the Center makes
available educational resources beyond the capability of local
districts. It helps identify and define educational needs, such
as planning and programing or special training for teachers of
handicapped students. It searches out resources from the area's
leading educational institutions, government agencies, and
industry. It then matches the two -- needs to resources -- on a
cost-effective basis. It also provides a mechanism whereby local
districts can cluster together to achieve economics of scale in
purchasing services. And, it provides these things without
sacrifice of local autonomy.

4

From an operational point of view, the Center assists client towns in developing innovative projects; in solving problems of curriculum, staffing, pupil and personnel services; in providing in-service professional and paraprofessional training, and in developing cultural and industrial resources. The Center also provides a readily accessible ERIC microfiche library system that gives educators working access to the latest research in education.

Organizationally, MEC is administered by an executive board of 10 superintendents. The town of Chelmsford serves as the local educational agency for the Center project. Operating intentionally lean, the Center staff consists of four full time professionals, several part time professionals, doctoral interns, and a secretarial staff. In addition, the Center brokers in noted educational consultants on a per diem basis for specific programs.

Essentially a grass roots organization, local financial participation in the support of the Center is one of its important features. Each district is able to maintain its own individuality through the customized efforts of MEC. No program is offered that is so rigid as to prevent easy modification in its adoption. The Center tries to fill the theory-into-practice or research application gap with tailor-made designs appropriate to individual districts. The professional standing of the Center is enhanced by its excellent relations with neighboring institutions of higher learning. **Boston** College, and Fitchburg State College grant credit for courses taken at MEC; Boston University and Boston College participate in Administrative Intern programs .       ). The University of Massachusetts, Fitchburg State College and Bridgewater State College participate in the Teacher Intern Program.

## SUMMARY

The future of innovation in education is obscured because of reduced funds and support for creative programs. However, the broker concept developed at MEC in which it operates as an educational broker holds promise for developing new support for fostering programs to advance creative education.

## NEEDS ASSESSMENT

For an in-service program to be effective program planning must begin with significant inquiries. The most important data to be collected will be concerned with the needs which the staff members themselves perceive. The Merrimack Education Center has developed and incorporated an annual needs assessment process, based on formal and informal processes, around which it brokers programs.

The first annual needs assessment study, conducted by MEC in local schools, was administered in the Fall of 1970. Eighty-five percent of the teachers and administrators filled out a questionnaire based on current "buzz words" to identify their critical needs by school building and by town. Data from the updated needs assessment for 1971-72 was used in offering the in-service program in learning disabilities, a mini-course for local teachers. The needs assessment data indicated a great need for information in the area of learning disabilities.

## SCOPE OF THE PROGRAM

An in-service "mini-course" of four sessions was offered to local teachers and administrators in the area of learning disabilities. The purpose of this learning disabilities mini-course was to increase the knowledge of information level in this field of study. Eighty local teachers and administrators participated in the course offering.

The specified objectives of the program were as follows:

1.  To assist teachers in systematically observing and describing significant behaviors in children related to Learning Disabilities.

2. To familiarize teachers with identification of various learning disabilities (definitions, terminology, behavioral characteristics).

3. To assist teachers in considering the conditions under which success is possible for children with problems in learning.

4. To alert teachers to the necessity of providing individualized instruction for students with learning disabilities.

5. To demonstrate to teachers (through the operation of the mini-course) the model for building individualized learning programs.

## PERSONNEL

The planning team for the mini-course consisted of the Acting Director of Special Education, the Specialist in Learning Disabilities (persons identified in local communities) and the Special Education Coordinator of the Staff of the Merrimack Education Center.

The instructional personnel for the mini-course consisted of the Merrimack Education Center Coordinator and a staff member of a local college from the area of learning disabilities.

## PROCEDURES

Four hours (four weekly sessions) of intensive orientation and development of principles for teachers in the elementary grades were offered.

## MODEL FOR BUILDING THE LEARNING PROGRAMS

Each participant filled out a one-page preassessment instrument at the first session of the mini-course.

Objectives for the mini-course were refined in terms of the data from the pre-assessment inventory.

Teachers participated in the four (one-hour) sessions geared towards the understanding of learning disabilities and the specific objectives delineated,

An evaluation procedure consisted of each participating teacher rating the mini-course on an output analysis scale to determine if the objectives established at the outset were attained.

7

PRE-ASSESSMENT

1. Please encircle the appropriate number on a
   scale from (1) to (4); one represents a need
   for further information and four representing
   no need for further information.

OUTLINE OF SESSION ONE

SUGGESTED MINI-COURSE ON LEARNING DISABILITIES

This outline provides for approximately four hours
of in-service.  It includes types of sessions,
materials, activities, and references.  The out-
line is divided into the following three major
topics:

1.  Introduction to terminology, definitions
    heterogeneous nature of the learning dis-
    abilities population.

2.  Assessment of learning disabilities.
    (includes samples of tests used)

3.  Strategies for learning disabilities.
    (two hours)

"An example of part of the course outline is given
on the next page."

## 1. Introduction to definition, terminology, and various types of learning disabilities.

| TOPICS | ACTIVITIES | MATERIALS |
|---|---|---|

10

This questionnaire requires only a few minutes and is exceeding-
ly valuable in planning future seminars. Your recommendations
and suggestions will be taken into consideration in any future
programs offered by the Merrimack Education Center in conjunction
with local communities.

1. Position you now hold_____

2. Years of educational experience:

   a. 0 - 5          c. 11-15     e. 21-25

   b. 6-10           d. 16-20     f. over 25

3. Five objectives at the outset of this program are listed
   here in part three; please use this listing in responding
   to question

   a. assist teachers in observing and describing significant
      behaviors in pupils related to learning disabilities

   b. familiarize teachers with identification of various
      types of learning disabilities for referral to the
      learning disabilities specialist

   c. introduce teachers to observational and assessment
      devices (tests - both standardized and informal)

   d. assist teachers in considering the conditions under
      which success is possible for children with problems
      in learning

   e. alert teachers to the necessity of individualizing in-
      struction applied to children with learning disabilities

4. Rank the five objectives in order of importance to you.

   (1 = Most important;  5 = least important

   ___   ___   ___   ___   ___
    1     2     3     4     5

5. Please encircle a numeral that indicates how well you feel
   this objective was accomplished:

|  | NOT AT ALL | | | | EXTREMELY WELL | |
|---|---|---|---|---|---|---|
|  | 1 | 2 | 3 | 4 | 5 | 6 |
| Objective A | 1 | 2 | 3 | 4 | 5 | 6 |
| Objective B | 1 | 2 | 3 | 4 | 5 | 6 |

11

5. (continued)                         NOT AT ALL              EXTREMELY WELL

       Objective C                      1    2    3    4    5    6

       Objective D                      1    2    3    4    5    6

       Objective E                      1    2    3    4    5    6

6.  In your opinion, to what extent has this work-shop been
    helpful in the areas described below:

    a. Understanding how and
       why children fail to
       learn                           1    2    3    4    5    6

    b. Referring pupils to
       the learning disa-
       bilities specialists            1    2    3    4    5    6

    c. Understanding how
       learning disabilities
       can be "spotted in
       the classroom                   1    2    3    4    5    6

    d. Applying information
       to your teaching
       assignment                      1    2    3    4    5    6

    e. Understanding of
       learning disabili-
       ties as a special
       education field                 1    2    3    4    5    6

    f. Considering the
       special needs of
       children                        1    2    3    4    5    6

7.  To what degree do you now have

    a. reinforcement for
       what you already know
       about learning disa-
       bilities                        1    2    3    4    5    6

    b. new information and/
       or old information
       with new possibilities   1    2    3    4    5    6

8.  What type of information needs do you see presently in
    the field of learning disabilities?  What particular
    topics do you need more information on?_____
    _____

9.  What suggestions would you have for persons planning
    future minicourses?_____
    _____

Mini-Course on Learning Disabilities

Merrimack Education Center

in cooperation with

Wilmington Public Schools

Concept:

Four hours (four weekly sessions) intensive orientation
and development of teaching principles for teachers in
the Elementary grades studying Learning Disabilities.

Objectives:

1.  To assist teachers in systematically observing and
    describing significant behaviors in children related
    to Learning Disabilities.

2.  To familiarize teachers with identification of various
    learning disabilities (definitions, terminology,
    behavioral characteristics).

3.  Assist teachers in considering the conditions under
    which success is possible for children with problems
    in learning.

4.  To alert teachers to the necessity of providing
    individualized instruction for students with
    learning disabilities.

5.  To demonstrate to teachers (through the operation of
    the mini-course) the model for building learning
    programs.

Instructors:

Dr. Anne May  -  Fitchburg State College

Jean Sanders  -  Merrimack Education Center

Location:

Shawsheen School, Wilmington, Massachusetts.
Four consecutive Wednesdays from 2:00 - 3:00.

Procedures:

Each participating teacher will respond to items on a pre-assessment inventory.

Objectives for the mini-course will be refined in terms of the data from the pre-assessment inventory.

Teachers will participate in four (one-hour) sessions geared towards the understanding of learning disabilities and the specific objectives delineated.

A post-assessment instrument is administered to evaluate the mini-course.

Each participating teacher, in addition, will rate the mini-course on an output analysis scale to determine if the objectives established at the outset were attained.

RETRIEVAL TERMS DIRECTORY

for

ERIC Descriptors and Identifiers

Topic:   Learning Disabilities

Listed in this document are the terms
relevant to the indexing of professional
materials in the field of Learning Dis-
abilities.  Entries are descriptors and
identifiers, the "buzz words" in the area
of learning disabilities.

Also included with the "buzz words" is a
very short inventory of needs; what terms
and concepts do you require more information
about for successfully fulfilling your in-
structional role.

For more information regarding the descriptors
and identifiers, consult the Thesaurus of ERIC
Descriptors for scope notes which define the
terms, and clarify the usage or indicate
selected similar terms.

The Merrimack Education Center has the entire
ERIC Library (presently consisting of over 52,000
documents) available for the MEC region.  Your
response to the questionnaire on terminology will
help us respond to your information needs.

Microfiche copies of complete documents are
available through your local school system
from MEC.  The listing of descriptors used in
ERIC will help you locate documents that might
pertain to your interests.
