ABSTRACT

The Office of Economic Opportunity has commissioned a number of research organizations to undertake detailed studies of specific Community Action Agencies (CAAs) in conjunction with evaluation studies of the effectiveness of the programs run by these CAAs. A major difficulty in this type of research is that the variables selected for study and the techniques used to study them by the various research units may differ so widely as to rule out comparative statements about the relationships between the structure of CAAs and program effectiveness. For this reason, the Office of Economic Opportunity commissioned the Bureau of Applied Social Research to develop an inventory of key variables which would describe and differentiate CAAs and which would, presumably, be relevant to the effectiveness of CAA programs. In carrying out this assignment, the Bureau undertook a careful review of the organizational literature, concentrating not only on organizational theory, but also on the literature analyzing the structure of action agencies and the particular problems encountered by newly created organizations. As the project developed it became increasingly clear that standard instruments ought to be developed for collecting information on these variables. As a result the Bureau interpreted as part of its assignment the development of a series of basic interview schedules to be administered to members of the CAA board and staff. Interview guides were also developed for local informants and heads of various local organizations having potential relevance to the operation of the CAA. (JM)

Introduction

A major part of the federally supported "war on poverty" is administered through a new form of organization: the Community Action Agency. This is a largely nationally supported but locally selected organization, in keeping with the "new federalism" of joint federal-local operations. The success of the "war on poverty" depends on many factors in the economic and political structure of the nation, but there is reason to believe that the local CAAs are an important determinant of variations in the success of the anti-poverty program from area to area. In line with this belief, the Office of Economic Opportunity has commissioned a number of research organizations to undertake detailed studies of specific CAAs in conjunction with evaluation studies of the effectiveness of the programs run by these CAAs.

A major difficulty in this type of research, where separate organizations are charged with doing essentially similar studies, is that the variables selected for study and the techniques used to study them by the various research units may differ so widely as to rule out comparative statements about the relationships between the structure of CAAs and program effectiveness. For this reason, the Office of Economic Opportunity commissioned the Bureau of Applied Social Research to develop an inventory of key variables which would describe and differentiate CAAs and which would, presumably, be relevant to the effectiveness of CAA programs.

In carrying out this assignment, the Bureau has undertaken a careful review of the organizational literature, concentrating not only on

organizational theory, but also on the literature analyzing the structure of action agencies and the particular problems encountered by newly created organizations. In addition, the Bureau has consulted both experts on organizational theory and staff members of OEO and several Community Action Agencies.

As the project developed, it became increasingly clear that a mere listing of key variables would not be sufficient to insure comparability and that standard instruments ought to be developed for collecting information on these variables. Such techniques for the quantitative study of organizations have been developed in recent Bureau studies, a notable example being Sieber and Lazarsfeld's recent volume, The Organization of Educational Research.^{*} It has been our experience that to characterize an organization with its multiple structures and complex interlocking relationships, it is necessary to collect a wide variety of information, not only on the characteristics of the organization as a whole (as spelled out in organizational records), but also on its components and on the environment in which the organization is located.

As a result, the Bureau interpreted as part of its assignment the development of a series of basic interview schedules to be administered to members of the CAA board and staff. Thus we have developed interview guides for Central Board members, for the executive director of the CAA, for heads of neighborhood centers, for program heads and for members of the staff. In addition, four other data forms were seen as needed. The first of these is an interview guide to be administered to local informants, people outside the CAA who have sufficient knowledge of the CAA and the

^{*} Sam Sieber and Paul F. Lazarsfeld, The Organization of Educational Research, New York: Bureau of Applied Social Research, 1966.

local community to supply information on the political and economic structure of the area served by the CAA and on the reactions of various groups to the CAA. The second is an interview guide which is to be administered to the heads of the various local organizations which have potential relevance to the operation of the CAA. The third consists of basic information about the area served by the CAA which may be collected from already compiled community records, including the Census. The fourth deals with information about the CAA which the researchers may obtain from organizational records and from casual interviews with knowledgeable informants inside the CAA whatever their job title may be.

These research instruments are not intended to exhaust the methods that might be used to study Community Action Agencies in depth. For example, these tools provide little information on the history of the CAA; and a detailed history might well be considered important to its description and analysis. Undoubtedly, the research organizations will find it desirable to employ other methods, such as participant observation, to supplement their use of questionnaires and interview schedules. Moreover, the researchers may choose to use only parts of these research instruments rather than adopting them in toto. But their very existence should provide the stimulus to more standardized research designs and thus contribute to the generality of the resulting research findings.

A Scheme for the Derivation of Key Variables

In developing a list of key variables for characterizing CAAs, we were guided by two questions. First, which characteristics of organizational structures have been shown by previous research to be related to organizational effectiveness; and second, what are the special characteristics of CAAs

which differentiate them from other types of organizations and which may have some impact on their effectiveness? An answer to the first question was sought in those sections of organizational theory which deal with factors relating to the effectiveness and efficiency of bureaucratic and semi-bureaucratic organizations; an answer to the second was sought in the federal legislation creating the Office of Economic Opportunity and the directives of the OEO issued on the basis of this legislation.

The guidelines for CAAs laid down by the federal government are deliberately broad and flexible, establishing only a minimum set of conditions that every CAA must meet rather than mandating a particular structure. Thus it is meaningful to regard the actual extent of compliance with OEO guidelines as variables differentiating CAAs. Among the many sets of factors that influence the variations that occur within the framework of the OEO guidelines, two are particularly important: the nature of the community in which the CAA is located and the kinds of personnel recruited to fill the positions on the Board and staff of the CAA. The community environment not only sets the problems that the CAA is intended to solve -- the nature and extent of local poverty -- but it also places limitations on the means that can be employed in achieving this goal by surrounding the CAA with organizations and groups that make certain demands of it and give it some degree of support or opposition.

As new organizations take shape, evolve and develop, they are frequently confronted with dilemmas, the decisions about which determine both new directions of development and further organizational dilemmas. The basic goals of the organization must be formalized and receive official approval, staff must be hired, formal structure created, lines of authority and channels of communication established, programs developed and

operationalized, and commitment of personnel secured for the goals and means of the organization. Key decisions in all these areas will affect the shape of the emerging organization and its ensuing effectiveness. Studies in a wide variety of organizations -- industrial, military, labor, public administrative, etc. -- have demonstrated the significant effects on organizational functioning of such factors as goal consensus, clarity of authority relationships, closeness of supervision, decentralization of decision-making, openness of communication channels, etc.

In addition, CAAs face dilemmas unique to their mission and source. Three examples will illustrate the types of strains prevailing in the situation.

The local CAA is expected to represent a broad base of community organizations and interests. Characteristically, representatives of existing agencies, both public and private, have an influential voice on its governing board. Yet at the same time the CAA is supposed to give an active role in policy-making to members of the poverty population, to increase the competence of the poor "to deal effectively with their own problems so that they need no further assistance," and to engage in the kind of innovative programming for the poor that, at least potentially, can lead them to exercise pressure against the existing political and welfare establishments. Reconciling these potentially conflicting aims -- maintaining the support of existing institutions in the community and enabling the poor to take effective action to improve their lot -- poses dilemmas of the first magnitude.

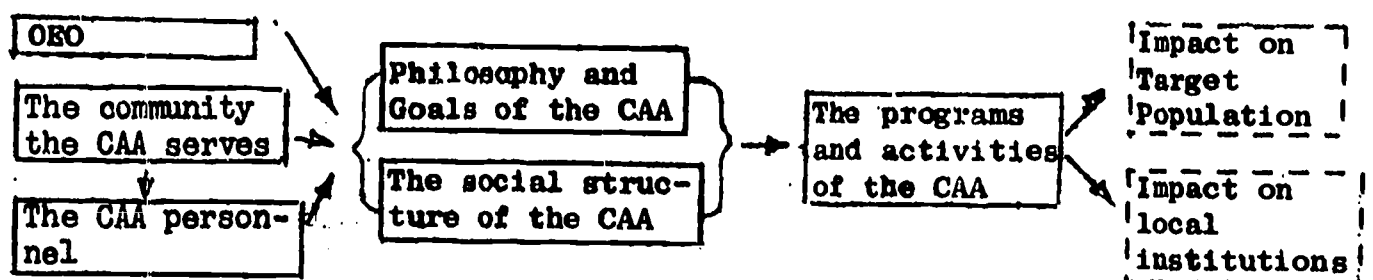

Similarly, the CAA is set up as a local organization, with its own board of directors, and is expected to program its activities to meet the particular needs of its own target groups. On the other hand, funding is determined in regional and federal offices of OEO, which are sometimes seen

as favoring certain approaches and programs. Whether to apply for the kinds of accepted and safe programs that are perceived as supported by OEO or to push program initiative down to local neighborhood levels -- although not necessarily incompatible -- creates another series of dilemmas.

In addition, choices are available in the search for maximally effective program administration and operation between the employment of staff with highest professional qualifications and employment of local people with most thorough understanding of local needs, mores, and opinions. The type of staff employed at various levels, their conceptions of poverty, their degree of militancy, their attitudes towards the institutions of the community, and their attitudes towards the target population will all play a part in how the CAA evolves and functions.

Thus, it becomes meaningful to view the CAA as having three sources of inputs: the OEO, which provides funds, a definition of the basic goals of the CAA, and a set of regulations as to their structure; the local community; and the personnel which staff the CAA and sit on its boards. These various inputs help determine the philosophy and goals of the CAA and its social structure; these, in turn, shape the character of CAA programs and their eventual outputs.

A highly simplified diagram of these inputs and outputs of a CAA looks as follows:

The ultimate outputs of the CAA, its impact on the target population and the institutional structure of the community, are boxed in dotted lines to indicate that this phase of the research on CAAs belongs to the realm of the evaluation of programs. The variables for describing CAAs belong in the solid boxes. We have used this scheme for classifying the variables which at this telling seem to be crucial for characterizing CAAs. However, we have generated only two variables to capture the OEO inputs: the size of the grant and the changes in the size of the grant. Other OEO inputs, such as the directive on maximum feasible representation of the poor, are considered here in terms of variations in extent of CAA compliance.

In developing a list of some fifty-odd variables in terms of this scheme, we have by no means exhausted all the variables that are suggested by the research instruments that have been developed. Rather we have tried to be selective, pinpointing variables which at this stage seem to be strategic.

A final caveat is in order. Neither the list of key variables nor the research instruments that appear here are in their final form. These documents will be closely scrutinized by a team of consultants and revisions will be made on the basis of their comments. Following the meeting with consultants, the Bureau will attempt to test the feasibility of the various research instruments by carrying out selected interviews with CAA personnel in several communities. Only after these next stages will it be possible to develop a final version of the key variables for characterizing CAAs and the research instruments needed for measuring them.

Inventory of Key Variables
for characterizing
Community Action Agencies

I. Community Context

1. Size of population
2. Degree of urbanization
3. Extent of poverty in the area
4. Ethnic distribution of the poor
5. Economic growth-decline of the area
6. Political centralization (number of independent political jurisdictions served by the CAA)
7. Centralization of political leadership in community
8. Political liberalism-conservatism
9. Strength of welfare and philanthropic traditions in the area
10. Extent of racial segregation
11. Political effectiveness of minority groups
12. Extent of community support for the CAA

II. Human and Economic Inputs

1. Board and staff images of the causes of poverty: social versus psychological determinants
2. Board and staff militancy (e.g., attitudes towards protest tactics)
3. Professional orientation of staff (e.g., self-identification as social workers, community organizers, educators, etc.)
4. Receptiveness of staff and board to principle of "maximum feasible participation"

5. Ethnic homogeneity of the staff and board
6. Correspondence between the ethnic composition of the target population and the ethnic composition of the CAA board and staff
7. Extent of employment of the local poor (proportion of staff)
8. Size of current budget
9. Changes in size of budget over time
10. Sources of funds: per cent OEO, per cent other federal departments, etc.

III. Philosophy and Goals of the CAA

1. Dominant goals (e.g., degree of emphasis on community organization)
2. Consensus-dissensus within and between levels of the CAA
 - a. Degree of consensus between board and staff
 - b. Degree of consensus within and between staff levels
 - c. Degree of consensus within board
3. Concordance between dominant goals and program operations: comparison between dominant goals and budget allocation
4. Concordance between dominant goals and desired goals
5. Dominant function of neighborhood centers (stress on referral, service, advocacy, etc.)

IV. Social Structure of the CAA

1. Source of initiative for the formation of the CAA: public versus private
2. Public or private incorporation of the CAA
3. Length of existence of the CAA
4. Size of the CAA staff
5. Perceived permanence of the CAA

6. Representativeness of the board vis a vis the community (number of major interest groups represented on board)
7. Extent of representation of the poor on the board
 - a. Per cent of board representing poor
 - b. Per cent of board drawn from target population
8. Dominant influence on the board
 - a. Group with largest representation
 - b. Group with greatest perceived influence
9. Dominant outside influence on the CAA
10. Unity-disunity of the board
11. Relative power of board versus executive director
12. Decentralization
 - a. Extent of decentralization of policy making functions (e.g., authority of target area boards)
 - b. Extent of decentralization of program development: degree of initiative in program development within the target areas
 - c. Extent of decentralization of delivery of programs and services
13. Degree of bureaucratization
 - a. Degree of hierarchy: number of staff levels of authority
 - b. Clarity of authority structure
 - c. Closeness of supervision of subordinates by CAA staff and board
 - d. Administration costs
 - e. Promptness of decision-making
 - f. Adequacy of internal communications
 - g. Formality of reporting and record keeping mechanisms
 - h. Professionalization of the staff (e.g., per cent of staff members who are professionally trained)

14. Staff mobility: the openness of promotion channels
15. Staff morale and cohesion
16. Organizational continuity
 - a. Staff turnover; professional turnover; sub-professional turnover
 - b. Cuts in program budgets
17. Utilization of indigenous sub-professionals (proportion on staff; proportion promoted; perception of employment of sub-professionals as substitute for participation of poor in policy making)
18. Perceived competence of executive director and other staff personnel
19. Emphasis on research, evaluation, and information gathering and disseminating activities
20. Levels of staff salaries

V. Programs and activities

1. Range of programs
2. Efficiency of program development and implementation (e.g., per cent of program funds not used within fiscal year; length of time between approval of program and its implementation)
3. Innovativeness of programs
4. Reach of programs (number of people served; per cent of target population served; types of persons served)
5. Delegation of programs: number of programs and per cent of program budget delegated to other agencies
6. Target population responsiveness to programs: degree to which program facilities are utilized
7. Coordination of community anti-poverty efforts (CAA initiative and effectiveness in coordination)
8. Emphasis on community organization activities (per cent of program budget allocated to community organization)
9. Transfer of CAA initiated programs to other institutions

other (please describe:) _____

For each of the items below, please fill in the appropriate answer. Information is generally requested for both the total area the CAA serves and for the combined target areas. In Section One the information for the total area for 1950 and 1960 can be found in the 1950 and 1960 censuses. In most cases more recent information is also desirable; and the researcher should supply it in all cases where it is available. The researcher should also indicate the date at which the information was collected. Generally, census data are not available for target areas. Therefore the researcher should try to locate the most recently collected data on the target areas, if any have been collected; and he should supply the date at which the data were collected.

INTERVIEW SCHEDULE FOR EXECUTIVES OF RELEVANT AGENCIES

Note to the interviewer: The first part of the schedule deals with certain basic characteristics of the agency which the director is being asked to supply. Detailed information with regard to the following questions need not be obtained since all we want to find out are the most general characteristics. Thus, for many agencies the answers to some of these questions will be obvious. This would include, for example, the answers of the chief of police and the superintendent of schools to the question, "Would you please give me a one or two sentence summary of what your organization does?" The interviewer should himself provide the answers to all such questions. In addition, certain of the questions can be reworded at the interviewer's discretion to make them more applicable to his respondent.

1. Title of the organization _____

51. Another criticism sometimes heard is that the poverty program is being taken over by voluntary welfare agencies that are not particularly responsive to the needs of the poor. Do you think this kind of criticism is very justified in (Name of area CAA serves), somewhat justified, or not at all justified?

___ Very justified

___ Somewhat justified

___ Not at all justified

52. Still another criticism sometimes heard is that the poverty program in some areas is too much in the hands of the poor who lack the training and experience to plan and administer programs effectively. Do you think this kind of criticism is very justified in (Name of area CAA serves), somewhat justified, or not at all justified?

CRITICAL REVIEW OF MATERIALS
Report of a Meeting of Academic and Action Consultants

For a critical review of the materials in this document, consultants from academic and action settings met at the Bureau on October 18, 1966.

Those attending were:

Michael Brooks, North Carolina Fund
Steve T. Butt, Cumberland Valley Area Economic Opportunity Council
Robert Crain, National Opinion Research Center
James E. Kendrick, Cumberland Valley Area Economic Opportunity Council
William Lawrence, Office of Economic Opportunity
S. M. Miller, Ford Foundation
John J. Musial, Mayor's Committee--Total Action Against Poverty, Detroit
Ralph J. Perrotta, Progress for Providence
Stanley H. Udy, Jr., Yale University

The discussion ranged from consideration of the feasibility of the procedure of standardized interviewing for research on community action agencies, through the applicability of the "key variables" to agency operations, to suggestions for rewording of individual items. Section A of this report describes the major issues raised at the meeting, with some suggestions for adapting and improving the present instruments. Section B lists additional "key variables" that were suggested by the consultants, with notes on possible questions for their measurement. At the end of Section B, we have added further indicators for some of the key variables in the original materials.

SECTION A: GENERAL DISCUSSION

General accord was registered with the view that research on community action agencies should not be--as it was never intended to be--limited to use of the forms and interview schedules in this document. The original intent of this guide, as formulated by OEO, was that it provide a set of "common concerns" to enhance the comparability of the eight research studies of community action agencies funded by OEO. This research will go beyond the bounds of the issues contemplated here, but through inclusion of the common core of information on organizational characteristics, it will have greater value and generalizability.

The consultants stressed the need for broad and historical knowledge of the CAA. Participant-observation should be built into the research design. When the research teams are thoroughly immersed in the background and functioning of the agency, they will be able to adapt the research instruments most intelligently, probe for the key factors, and refuse to be satisfied with superficialities and platitudes.

A major theme of the discussion was the constant change and flux in agencies and programs. The flow chart of inputs and outputs of a CAA on page 6 of the Introduction probably implies too static a picture of the complex realities of the situation. As the following discussion suggests, feedback loops can be incorporated into the diagram to indicate the pressures and continuing inputs from inside and outside the organization.

One strategy for capturing the dynamics of agency functioning is to impose a time dimension on certain questions. For example, questions about agency goals can be asked in terms of priorities at the beginning of

operations, priorities three or six months ago, and again during the current month. Locating questions in specific time periods would give a better indication of the agency's process of adaptation and change.

Further, certain questions cannot be answered in general, but only in specific terms. Support from other agencies in the community is an instance in which the answer varies from time to time, from issue to issue. To cope with this problem, the suggestion was offered that the interviews ask for a specific case--for example, the last major crisis in the organization. Questions on outside support could then be tied to this "critical incident," as could such other questions as whether the Board divided or was in consensus, whether the Board or the executive director was more influential, etc.

The present instruments delve into the range of external influences on the CAA which shape its development and circumscribe its autonomy. Additional suggestions were made to amplify this area of investigation. Among these were: the pre-existing welfare structure in the community, its integration with local elites, its confidence in its own capacity to deal with the problems of the community; the political configuration of the area, sources of support for the mayor, the stability and predictability of local politics, the number of parties or groups that stand a chance of winning political control, the degree of political decentralization.

Another factor of importance in understanding the CAA's development is the "generational age" of the agency. At different periods, OEO was concerned with different priorities, and the CAAs formed during each phase of OEO's development were subjected to the then-current pressures. Mention

was made of the possibility of studying the regional offices of OEO and possibly even the Washington office. Apart from the "generational effects" upon the CAAs formed during each time period, later shifts in OEO directives and their impact upon the agency's structure and activities could also be traced in fuller detail.

One engaging suggestion for focussing upon both the historical and political context of the CAA was that an initial open-ended question ask, "What two or three things does a person have to know about the community and the CAA in order to understand things here?" Such an inquiry might prove valuable in identifying the key events or conditions that have had important continuing effects on the agency and provide leads for further study.

Another suggestion was that the interviews specifically ask what staff members in the agency do, how they spend their time. A "time-budget" question might be asked, with respondents indicating what proportion of their work time--yesterday, last week, last month--they spent on each category of activity.

Further questions could ask who interacts with whom and with what frequency. Detailed information on communications patterns, within the staff, between staff and Board, within the Board, and possibly with outside agency personnel, might give richer and more reliable information on influence, support, and power. The pattern of communication might in itself be a variable of importance.

One of the consultants raised a question about how the responses of the differentially located personnel would be aggregated to give a composite

picture of the agency. His suggestion was that a way be found to identify the persons who play key roles in agency decision-making, whether or not they are in formal positions of authority, and that their responses on attitudes, values, and goals be heavily weighted. The identification of these decision-makers could be handled by a reputational question ("Who has a lot to say about what goes on?" or some similarly worded question in the community power structure tradition), by sociometric techniques (e.g., "Who do you go to when you want a decision about _____?"), or by reports of the resolution of a past critical incident in the agency's history.

The Bureau staff pointed out that it is important not to confuse the two different functions of questions such as those related to values and goals. One function of these questions is to serve as indicators of what may be called the "objective reality" of the CAA's overall goals and values. In this context, it would be ingenuous to take all responses as of equal relevance. The responses of those persons identified as dominant influences within the CAA should be taken as defining the overall goals and values of the organization. Another highly significant function of these questions, however, is to indicate the degree of consensus-dissensus within and between organizational levels (i.e., among operating staff, between operating and supervisory/administrative staff, between administrative staff and the Board, and among Board members). Previous research has shown that the degree of consensus in the value climate is a variable of considerable importance, and in this context it is clear that the responses of all levels of staff are highly relevant. Similarly, it will be valuable to collect

the perspectives of all differentially located personnel on the pressures and obstacles encountered by the CAA. Again it is necessary to distinguish between these perceptions and the "objective reality" of the CAA's position. Obviously, some individuals within the organization are in a better position than others to have an accurate and thorough understanding of environmental constraints, and their responses should be given credence accordingly.

The intensity as well as the content of the staff's beliefs about the causes of poverty is another subject for further inquiry. One of the consultants felt that this would be an indicator of the staff's orientation toward the amelioration of poverty--whether their viewpoint is technical or ideological.

The possibility was raised of constructing an additional interview schedule for members of the target population. Their perspective on the agency would provide a valuable addition to the array of perspectives presently considered. Their views would be particularly significant in investigating the relevance and style of agency activities--the fit between community needs and agency services, the ease of communication with agency personnel, staff dedication and concern. It may be particularly important to find out the degree to which the staff members with whom they come in contact empathize with them, understand their concerns, and give service seen as practical and directly useful.

In summary, it was recognized that in studying a new and rapidly developing form of organization such as a community action agency, adaptations and adjustments will have to be made to fit each local case. Some

of the consultants indicated that, in the case of their own agencies, it would be important to study the responses of individuals or groups for which provision had not here been made--for example, members of the local elites. Others suggested changes in response categories for particular questions, e.g. addition of Canadians to the "foreign-born" in Detroit, additional categories of employed personnel. The research organizations undertaking the comprehensive research studies for OEO will be well qualified to judge the nature and extent of modification in the schedules that are required for their research.

However, if comparability is not to be totally lost and if the advantages of common variables and common measures are to be maintained, agreement should be reached on the basic essentials. The consultants closed the day's discussion with the recommendation that meetings among the research organizations studying CAAs and the Bureau of Applied Social Research would be extremely valuable in maximizing both the relevance and the commonalities of the measures used. It was the opinion of consultants from action agencies that the type of study here proposed would have enormous benefit not only to the eight agencies to be formally studied but to many other agencies as well; they looked forward to wider and more general use of the study instruments in the analysis and development of community action agencies.

SECTION B: ADDITIONAL VARIABLES AND INDICATORS

I. Variables Suggested by the Notion of Organizational "Life Cycle"

At the consultants' meeting, some discussion was given to the fact that CAAs, like many other organizations, go through stages of development and change over time in certain characteristic ways. At the beginning, personnel tend to be highly committed and dedicated; with the passage of time, they lose some of this spirit and develop a more routinized attitude toward their job. Particularly if the organization fails to provide support and reward, some may even become alienated from the organization and its objectives. Perhaps paralleling changes in the attitudes of the personnel are changes in the structure of the CAA itself, a movement toward greater formalization and bureaucratization. Although our key variable list already includes the concept of bureaucratization and measures of it, it was felt that additional dimensions of bureaucracy could be specified.

1. Work Orientation of Personnel: Commitment, Dedication vs. Routinization

A. Dedication, Commitment

Sample indicators that might be added to Staff questionnaires:

- 1.) How many hours did you work for (Name of CAA) yesterday? # _____ day
- 2.) About how many hours do you work for (Name of CAA) each week? # _____ week
- 3.) Did you do any work for (Name of CAA) last weekend? Yes _____
No _____

A. (continued)

- 4.) How often would you say you work on weekends for (Name of CAA)? Very often, fairly often, once in a while, hardly ever?

Very often _____
 Fairly often _____
 Once in a while _____
 Hardly ever _____

- 5.) When you first went to work on this job, did you put in more hours than you do now, fewer hours, or about the same number?

More hours then _____
 Fewer hours then _____
 Same amount _____

- 6.) How about your supervisor? Would you say he puts in more hours, fewer hours, or about the same number of hours now as when you first started working for him?

More hours then _____
 Fewer hours then _____
 Same amount _____

- 7.) And how about the people working under you? On the whole, would you say they put in more hours, fewer hours, or about the same number of hours now as when they first started working for you?

More then _____
 Fewer then _____
 Same _____

- 8.) Compared with how you felt about your job when you first went to work for (Name of CAA), would you say that you are more dedicated to your job now than you were then, less dedicated to your job now, or would you say there hasn't been any change?

More dedicated now _____
 Less dedicated now _____
 No change _____

- 9.) What about the people you work with in (Name of CAA)? Would you say that they are more dedicated now than they were at the beginning, less dedicated to their job now, or hasn't there been any change?

More dedicated now _____
 Less dedicated now _____
 No change _____

B. Alienation from Work

Two indices of alienation appear to be relevant here, alienation from work and alienation from work associates. (Cf. Michael Aiken and Jerald Hage, "Organizational Alienation: A Comparative Analysis" American Sociological Review, 31, August 1966, pp 497-507.) Some of the indicators that seem useful in this context include the following:

Measures of Work Alienation

- 1.) How satisfied are you that you have been given enough authority to do your job well?
- 2.) How satisfied are you with your present job when you compare it with similar positions in (other agencies)?
- 3.) How satisfied are you with the progress you are making towards the goals which you set for yourself in your present position?
- 4.) On the whole, how satisfied are you with your present job when you consider the expectations you had when you took the job?

Measures of Alienation from Work Associates

- 1.) How satisfied are you with your supervisor?
- 2.) How satisfied are you with your fellow workers?

2. Further Dimensions of Bureaucratization

A. Centralization of Authority

1.) Hierarchy of Authority

I'm going to read you some statements that may or may not be appropriate descriptions of your job here. For each one, tell me whether you feel it is definitely true, somewhat true, somewhat false, or definitely false.

	<u>Defi- nitely True</u>	<u>Some- what True</u>	<u>Some what False</u>	<u>Defi- nitely False</u>
a. There can be little action taken here until a supervisor approves a decision?	_____	_____	_____	_____
b. A person who wants to make his own decisions would be quickly discouraged in this job.	_____	_____	_____	_____
c. Even small matters have to be referred to someone higher up for a final answer.	_____	_____	_____	_____
d. Any decision I make has to have my supervisor's approval.	_____	_____	_____	_____

2.) Participation in Decision-Making

	<u>Always</u>	<u>Often</u>	<u>Some- times</u>	<u>Seldom or Never</u>
a. How frequently do you usually participate in the decision to hire new staff?	_____	_____	_____	_____
b. How frequently do you usually participate in decisions on the promotion of any of the staff members?	_____	_____	_____	_____
c. How frequently do you participate in decisions on the adoption of new policies?	_____	_____	_____	_____
d. How frequently do you participate in decisions on the adoption of new programs?	_____	_____	_____	_____

B. Growth in Rules

Apart from these scales which help measure the current degree of bureaucratization, it might prove useful to have respondents compare the degree of freedom and autonomy they have in their job now with what they had when they first assumed their position.

- 1.) Have you found that the amount of freedom that people on your level have in carrying out their jobs has increased, decreased, or remained about the same since you came to work here?

Increased _____
 Decreased _____
 Remained the same _____

- 2.) Has the amount of paper work that you have to do increased, decreased, or remained about the same since you started working here?

Increased _____
 Decreased _____
 Remained the same _____

- 3.) In your experience, are there now more rules that staff members have to follow than when you first came to work here, fewer rules, or hasn't there been any change?

More rules _____
 Fewer rules _____
 No change _____

C. Job Specialization

A further dimension of bureaucratization is the degree of job specialization within the staff. While a detailed knowledge of the structure of the particular CAA is required to understand the extent of job specialization, there are certain areas which are of particular significance in a study of agencies of this type and deserve mention here. The presence or absence of staff within the CAA who specialize in research and evaluation, in staff training, in public relations and public information, and in program development and planning, is not only an index of specialization at the central administrative level, but also a factor of considerable inherent interest. The first three categories of specialization have been dealt with in this instrument; indicators for the fourth category may be included as follows:

After ED q. 49 ADD:

Are there staff members who have specific responsibility for program development and planning?

Yes _____
No _____

If Yes:

A. How many people have program development and planning as their primary function?

B. What are their job titles?

In ED q. 57 ADD a fourth category: "Program Development and Planning"

D. Clarity of Authority Structure

Although indicators for this variable have already been provided, it was suggested at the consultants' meeting that a further indicator -- the degree of agreement between responses to the questions "Whom do you report to directly?" and, at a higher level, "Who reports to you directly?" -- would prove illuminating.

- 1.) ADD to questionnaires for ED, PH and NC:

Excluding clerks and secretaries, what are the names of the people who report directly to you?

- 2.) ADD to S q. 23A:

What are their names?

II. Availability of Federal Funds in the Community

It was suggested that the impact of other federal programs upon the CAA's relations with other agencies be investigated more fully. Questions might be included asking whether other local agencies have been successful in getting funds as a result of these federal programs (e.g., Title I of the Elementary and Secondary Education Act), making it less important for them to cooperate with the CAA. To gain more information on this issue, the questions below could be asked of the Executive Director; similar questions might be devised for Executives of relevant agencies.

- 1.) How successful would you say that the other education and welfare agencies in your community have been in getting funds from federal agencies other than OEO?

Very successful _____
 Fairly successful _____
 Not too successful _____

- 2.) Has the availability of other federal funds made it more difficult for your agency to get cooperation from the other education and welfare agencies in this community?

Yes _____
 No _____

III. Planned vs. Emergency Activity

A discussion of items dealing with organizational goals pointed up a dilemma which CAAs frequently encounter: the disruption in the pursuit of long-range goals because of crises which arise within the organization or in relations with the larger community. Information bearing on these disruptions and the degree to which they hamper long-range programming could be obtained in interviews with the executive director, Board members, and program heads.

- 1.) When you think about the long-range plans for your agency, how satisfied are you with the progress being made in realizing those plans?

Very satisfied _____
 Pretty satisfied _____
 Pretty dissatisfied _____
 Very dissatisfied _____

- 2.) When you think about how the resources of your agency are now being allocated -- that is, what your agency is actually doing -- do you find that this corresponds pretty closely to what the agency should be doing, or do you find discrepancies?

Corresponds closely _____
 Major discrepancies _____

If Major Discrepancies:

Why is that?

- 3.) Some CAAs have found it difficult to concentrate on their long-range plans and programs because of emergencies that arise either within their organization or in their relations

with community groups.

Would you say that these things have been a very serious problem for (Name of CMA), a fairly serious problem, or not much of a problem at all?

Very serious problem _____
 Fairly serious problem _____
 Not much of a problem _____

(IN ADDITION TO THE EXECUTIVE DIRECTOR AND PROGRAM HEADS, THE FOLLOWING MIGHT ALSO BE ASKED OF NEIGHBORHOOD CENTER DIRECTOR AND STAFF)

- 4.) Do you find that you generally have enough time to work on your major activities and objectives, or are you frequently being called away from your job to deal with one organizational emergency or another?

Have enough time _____
 Frequently called away _____

IV. Scope of CAA's Activities

At the consultants' meeting, a number of facets of what might be called the scope of the agency's activities were suggested as important variables to add to the list. The dimensions of this concept include a) the number of institutional areas covered by programs, b) the number of local poor eligible for services, open vs. restricted case loads, and geographical completeness of program coverage, and c) experimentation-demonstration approach vs. massive service approach. Questions on these matters should be asked of the Executive Director.

1. Scope of Institutional Intervention

Information on the number of institutional areas covered by CAA programs can be found in BDF q. 55.

In addition, it would be helpful in characterizing the CAA with a "style" to include questions which ask not only which areas are or are not, in fact, covered by CAA programs, but also which areas (if any) the CAA considers to be inherently "off limits" or otherwise unsuitable for CAA intervention.

A. (NOTE TO INTERVIEWER: REFER TO BDF q. 55. IN THE BLANKS IN THE FIRST COLUMN OF THE CHART BELOW, FILL IN THE NAMES OF ALL INSTITUTIONAL AREAS FOR WHICH NO FUNDS WERE ALLOCATED IN EITHER YEAR.)

(continued on next page)

A. (continued)

Are there some institutional fields you think (Name of CAA) should not get involved in for reasons other than scarcity of funds? First, apart from the question of funding, is _____ a field you think your agency should not get involved in, or is it a field you might consider getting involved in? (FILL IN SECOND OR THIRD COLUMN)

_____ Should not get involved
 _____ Might consider

If Should Not Get Involved:

1.) Why do you say that? Is it because adequate services in this field already exist in the community, because it's too hot a political issue, because it is not a field appropriate for CAA activity, or what? (FILL IN FOURTH, FIFTH, SIXTH, OR SEVENTH COLUMN)

How about _____ ?
 (CONTINUE DOWN THE LIST)

INSTITUTIONAL AREAS	SHOULD NOT GET INVOLVED	MIGHT CON- SIDER	REASON			
			ADEQUATE SERVICE EXISTS	TOO HOT AN ISSUE	NOT APPRO- PRIATE	OTHER (SPECIFY)
_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____
<u>Housing</u>	_____	_____	_____	_____	_____	_____
<u>Urban Renewal and Relocation</u>	_____	_____	_____	_____	_____	_____
<u>Libraries</u>	_____	_____	_____	_____	_____	_____
<u>Rehabilitation of Narcotics Addicts</u>	_____	_____	_____	_____	_____	_____
<u>Programs for Alcoholics</u>	_____	_____	_____	_____	_____	_____
<u>Programs for Released Offenders</u>	_____	_____	_____	_____	_____	_____
<u>The Arts (Theater, etc.)</u>	_____	_____	_____	_____	_____	_____
<u>Family Planning</u>	_____	_____	_____	_____	_____	_____

2. Scope of Coverage of Target Population

A. Of all the geographical areas within (Name of CAA)'s jurisdiction where the poor live, does your agency serve all these areas or have you selected certain of these localities as target areas?

Serves all areas _____
Selected certain localities as target areas _____

If Selected Certain Localities:

1.) Approximately what proportion of the poor in your jurisdiction live in these target areas?

B. Do you believe that there are certain kinds of poor people who are unlikely to benefit from your programs?

Yes _____
No _____

If Yes:

1.) What kinds of people are these?

C. Are there certain kinds of poor people to whom you give low priority because of scarcity of funds or because of difficulties in serving them?

Yes _____
No _____

If Yes:

1.) What kinds of people are these?

(IF YES TO B OR C:)

D. Is a systematic attempt made in any of your programs to screen them out?

Yes _____
No _____

If Yes:

1.) Which programs do make an attempt to screen them out?

3. Experimental vs. Massive Service Orientation

- A. In some CAAs the emphasis seems to be on testing out programs on a small scale to see if they work; in other CAAs the emphasis seems to be on providing services on as massive a scale as possible on the assumption that the solutions are pretty much known. Which seems to be closer to the emphasis of your agency?

Testing out new programs _____
 Applying programs on massive scale _____

V. Relationship of CAA to Mayor's (Chief Executive's) Office

Although the key variables include the formal structure of the CAA, it was pointed out that the informal contacts and relationships of the agency, particularly with the Mayor's Office, are of considerable importance in understanding the operations of certain CAAs. This factor could be probed in the interview with the Executive Director.

- 1.) How often are you in contact with the Mayor (or Chief Executive) or with someone from his office?

Every day _____
 Several times a week _____
 About once a week _____
 Several times a month _____
 About once a month _____
 Less than once a month _____

How close would you describe your contact with the Mayor's office?

Very close _____
 Fairly close _____
 Not too close _____

2.) Is there anybody (else) on your staff who is in close contact with the Mayor's office?

Yes _____
No _____

If Yes:

Who would that be?

3.) When you make a major decision, or when you have a major problem, can you count on the support of the Mayor's office?

Yes, almost always _____
On most matters but not all _____
On only some matters _____
Hardly ever count on his support _____

VI. Innovativeness of Programs

This key variable is currently measured in terms of the number of programs originated locally. It was suggested at the meeting that other factors are important as well. Innovativeness is evidenced by new methods of staff deployment, novel structuring of programs, new techniques of service, etc. Further measures might well be developed to tap these dimensions. One suggestion was that program heads and staff be asked to describe their programs and identify its innovative features. The researchers could code these descriptions in terms of how innovative the programs appeared to be.

Furthermore, in characterizing the agency as more or less innovative, a distinction should be made between the number of innovative programs and the number of dollars spent innovatively.

VII. Further Indicators

In our original materials, we listed a number of key variables for which additional indicators were needed. The following questions are intended to remedy the sparseness of the data available for these indicators. (The letters in parentheses signify the instrument to which each question should be added.)

POLITICAL CENTRALIZATION

1. How many counties does the CAA serve? _____ (CC)
2. How many cities does the CAA serve? _____ (CC)
3. How many incorporated townships does the CAA serve? _____ (CC)
4. How many local school boards have jurisdiction over the public elementary and secondary schools located in the area served by the CAA? _____ (CC)

POLITICAL EFFECTIVENESS OF MINORITY GROUPS

1. What is the highest elective office held by a member of the largest minority group? _____ (CC)

CONCORDANCE BETWEEN GOALS AND PROGRAMS

After ED q. 96B, PH q. 83B, NC q. 97B, S q. 45B, and BM q. 48B, ADD:

- C. Is this in fact a major goal of (Name of CAA)?

Yes _____
No _____

If Yes:

1. Which of (Name of CAA)'s programs are trying to do this?

UTILIZATION OF INDIGENOUS SUB-PROFESSIONALS

After ED q. 38, PH q. 42, NC q. 36, S q. 28, and in EM, ADD:

Do you think that having members of the local poor on the staff of an anti-poverty agency is an effective means of involving the poor in policy-making?

Yes _____
No _____

Do you think that having members of the local poor on the staff is more effective, less effective, or about as effective in involving the poor in policy-making as having representatives of the poor on the governing board?

More effective _____
Less effective _____
About as effective _____

EFFICIENCY OF PROGRAM DEVELOPMENT AND IMPLEMENTATION

1. Roughly how many separate applications for program funds has your agency submitted to OEO? _____ (ED)
2. How many times has OEO asked you to make some changes in your applications before they could be considered for funding? _____ (ED)

REPLACE PH q. 23 by the following three questions.

3. What was the date of official notification that your program had first been funded?

4. And when did the first money come through?

5. When did your program begin operations?

The following two questions can be asked of the Executive Director and adapted for Program Heads.

6. Have any of your agency's programs ever run out of funds before the period for which funds were granted had expired?

Yes _____
No _____

If Yes:

- A. How often has this happened? _____
- B. How did the program(s) happen to run out of funds early?

7. Has it ever happened that your agency has had funds that hadn't been spent at the end of the authorized period?

Yes _____
No _____

If Yes:

- A. In what year was this? _____
- B. What per cent of your total yearly budget did these funds represent?
