ABSTRACT

This report provides statistics on the administration of Titles I and III of Public Laws 81-874 and 81-815. Law 81-874 provides financial assistance for maintenance and operation of schools in Federally affected areas, and Law 81-815 provides financial assistance for school construction in Federally affected areas. Information provided includes receipts and disbursements, grants provided, appropriations, and program trends. One section also describes Federal disaster aid for schools. (JF)

DISCRIMINATION PROHIBITED—Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Public Laws 81-874 and 81-815 Programs, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

LETTER OF TRANSMITTAL

DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE

Office of Education

Washington, D.C. 20202 June 30, 1971

To the CONGRESS OF THE UNITED STATES:

As Commissioner of Education I have the honor to submit herewith the twentieth report concerning the administration of Title 1 of Public Law 81-874 and Public Law 81-815, as amended, including a detailed statement of receipts and disbursements, for the fiscal year which ended on June 30, 1970.

This report was prepared by the Division of School Assistance in Federally Affected Areas and is transmitted in accordance with the requirements of subsection 301(c) of Public Law 81-874 and subsection 12(c) of Public Law 81-815.

Respectfully,

S. P. Marland, Jr.
U.S. Commissioner of Education

I. INTRODUCTION

Major Program Trends

When Public Laws 81-815 and 81-874 were enacted in 1950, the Congress initiated a Federal policy for assisting school districts financially burdened as a result of new or expanded Federal activities. At that time no one knew how long the programs would be needed or on what scale, or what the initial or continuing costs would be. A review of the 20 years of operation shows a steady growth in the aid program authorized by P.L. 81-874; after the first 3 or 4 years, however, there was a leveling out and gradual tapering off for the school construction program authorized by P.L. 81-815.

Public Law 81-874

In the 1st year of operation 1,172 school districts were eligible for maintenance and operation assistance on account of 512,000 federally connected children in average daily attendance, at a total cost of \$29.6 million. These districts had a total average daily attendance of 2.9 million, their total current expenses were more than half a billion dollars, the average per pupil cost was \$176.76, and the average local contribution rate was \$106.82.

In every one of the 20 years since the program was inaugurated there has been an increase in each of these items of program activity, except in the number of applications filed. Slightly smaller numbers since 1963 reflect the many consolidations and reorganizations which have taken place rather than a reduction in districts eligible for assistance. In fiscal year 1970 there were 4,508 eligible school districts with more than 23 million pupils in attendance, of whom 2.6 million were federally connected. Total cost of the program was \$587.2 million and total current operating expenses in these districts were \$15.4 billion. The average cost per pupil was \$726.85 and the average local contribution rate was \$374.42.

This continued substantial program growth is due to the increase in number of school children (both federally connected and nonfederally connected), liberalization of the legislation, continued high Federal expenditures for national security and domestic development, and the ever increasing higher costs of education for both federally connected and nonfederally connected children.

Growth in the impacted areas program reflects national trends to a substantial degree. The average enrollment of federally connected children for the first

17 years has held close to 15 percent of the total enrollment, and the Federal payments approximated 5 percent of the operating costs in the eligible districts. In 1970 these percentages were 11 and 3, respectively.

Public Law 81-815

A large backlog of needed school construction had developed in federally affected areas prior to 1950 because only the most urgently needed school facilities were constructed in these areas during and immediately after World War II. Thus, the 1,128 applications filed and the more than 900 applications approved during the first 2 years of P.L. 81-815 operation (1950-52) were the largest numbers during any 2-year increase period.

The number of applications filed averaged between 700 and 800, and the number approved averaged nearly 500 for each 2-year increase period from 1952 through 1958. During the same interval, program requirements averaged \$81.8 million a year. There was a decrease in requirements after 1958, and for a number of years program costs remained relatively stable, ranging from \$60 million down to \$50 million a year. Eligibility requirements were liberalized in 1966 and program costs are now about \$80 million a year.

Federal-State-Local Relations

Public Laws 81-874 and 81-815 authorize Federal payments directly to the eligible local education agencies. Applications for assistance under both laws are submitted to the U.S. Office of Education through the State education agencies, which certify that the data contained therein are accurate insofar as records in State offices are concerned.

Each Chief State School Officer has designated one or more State representatives for the school assistance program to work with the local education agencies and with the field program officers of the Office of Education in the administration of the program and in the development of applications for aid. Representatives of the Office are available to assist State education agencies, and through them, local education agencies. They advise applicant districts on the maintenance of records with respect to the specific pupil and financial data required to support their claims.

Federal Property

The principal basis on which payments to local education agencies are authorized under the provisions

of Public Law 81-815 and Title I of Public Law 81-874 is the existence in, or within reasonable commuting distance of, a school district of Federal property on which school children reside with their parents or on which their parents are employed. Federal property, as defined by these Acts, is: "Real property . . . owned . . . or . . . leased by the United States . . . not subject to taxation by any State or any political subdivision of a State or by the District of Columbia."

Included in the definition is "any interest in Federal property under an easement, lease, license, permit, or other arrangement, as well as any improvements of any nature (other than pipelines or utility lines) on such property even though such interests or improvements are subject to taxation by a State or political subdivision of a State or by the District of Columbia." For the purpose of P.L. 81-874 only, the term "Federal property" also includes "for one year beyond the end of the fiscal year in which occurred the sale or transfer thereof by the United States, any property considered prior to such sale or transfer to be Federal property for the purposes of this Act."

A local education agency's eligibility under most sections of the Acts, therefore, is based on certain conditions of the real property on which federally connected school children reside or on which their parents are employed. It is necessary to determine whether the real property is owned, wholly or in part, by the Federal Government; whether it is leased by the Federal Government and not subject to taxation; for

what purposes the property is used; and whether Federal property was sold or transferred wholly or in part and the effective date of such sale or transfer.

Under some circumstances, further qualifying determinations are required. When a Federal property and a private property are used jointly (commingled) and the employees' working time is divided between both portions, the percentage of time spent by the employees on each portion must be estimated.

Public Law 90-247, approved January 2, 1968, deleted the requirement that other Federal payments, taxes, or payments in lieu of taxes made with respect to qualifying Federal properties be deducted from entitlement under P.L. 81-874. This provision was effective beginning with fiscal year 1968.

The qualifying Federal properties claimed by applicants for the 1969-70 school year are listed in table A. The Department of Transportation heading includes the Coast Guard, the Federal Aviation Administration, the St. Lawrence Seaway, the Bureau of Public Roads, and The Alaska Railroad. The 6,112 Federal properties forming the basis for applicant claims for assistance include over 200 parcels of Indian-allotted lands in Oklahoma which have been grouped as one property. Of the total properties, 159 were claimed for the first time this year.

The largest number of acres of qualifying Federal properties claimed in fiscal 1970 was in Arizona with more than 36 million acres. Alaska and California were second and third, with more than 35 million and 27

TABLE A.—P.L. 81-874: Number and percent of Federal properties and acreage claimed by applicant districts, by Federal agency having jurisdiction, fiscal year 1970.

Agency	Properties		Acres	
	Number	Percent	Number	Percent
Total	6,112	100.0	287,253,396	100.0
Army	1,042	17.0	15,675,925	5.4
Air Force	505	8.3	4,409,751	1.5

Bureau of Reclamation	250	4.1	1,592,876	0.6
National Park Service	185	3.0	22,871,644	8.0
General Services Administration	753	12.3	9,425	(1)
Other	1,299	21.2	14,068,457	4.9

¹ Less than 0.05 percent.

million acres, respectively. Of the total acreage claimed, more than three-fifths (174,967,727 acres) is controlled by the Forest Service of the Department of Agriculture, and almost one-fifth (50,543,053 acres) by the Bureau of Indian Affairs of the Department of the Interior.

According to the most recent report of the General Services Administration, the Federal Government owns 20,202 different installations throughout the United States. Applicant school districts have claimed 6,112 owned or leased properties as a basis for payments under Public Laws 81-874 and 81-815 during the 1969-70 school year.

Legislative Changes

Numerous amendments have been made to P.L. 81-874 and P.L. 81-815 since their enactment. These changes have been described in some detail in the various annual reports of the U.S. Commissioner of Education for the fiscal years in which the amendments became effective. The most recent legislative changes are described in detail in the appropriate chapters of this text.

Civil Rights Act of 1964

All but seven school districts eligible for Federal assistance under Title I of P.L. 81-874 in the 1969-70

school year were certified as being in compliance with Title VI of the Civil Rights Act of 1964.

Fair Employment Practices

During fiscal year 1970, applicants were required, as a condition for receipt of funds under P.L. 81-815, to give assurance that they would comply with the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity for all school construction projects approved for a grant of funds. This assurance was obtained as a part of the application for assistance.

Suitable Free Public Education

The eight projects constructed on eight military bases in 1963 in order to provide suitable free public education for on-base children were operated by the Federal Government under section 6 of P. L. 81-874 during 1970. These projects, all for elementary school children, were constructed on: Fort McClellan, Fort Rucker, and Maxwell Air Force Base in Alabama; Fort Stewart and Warner Robins Air Force Base in Georgia; England Air Force Base in Louisiana; and Fort Jackson and Myrtle Beach Air Force Bases in South Carolina.

II. PUBLIC LAW 81-874

TITLES I AND III PROVIDING FINANCIAL ASSISTANCE FOR MAINTENANCE AND OPERATION OF SCHOOLS IN FEDERALLY AFFECTED AREAS

Authorizing Legislation

Authorization for the federally affected areas program under P.L. 81-874 is contained in sections 1 through 6 of Title I and sections 301 through 303, Title III of the Act. Section 7 of Title I extends financial assistance to local education agencies affected by a major disaster. Details on section 7 and the program of disaster assistance are treated separately in this report.

Title I authorizes financial assistance for maintenance and operation of schools to local education agencies on which activities of the United States have placed a financial burden. It recognizes the following categories of burden for payment purposes:

1. Reduction in local revenues by reason of acquisition of real property by the United States (section 2).
2. Provision of education to children who reside on Federal property or reside with a parent employed on Federal property. A child of a parent on active duty in the uniformed services is considered as residing with a parent employed on Federal property in the State of the child's residence (section 3).
3. Sudden and substantial increases in school attend-

ance as a direct result of activities of the United States carried on either directly or through a contractor (section 4).

This Title provides also for transfer of operating funds to other Federal agencies when no local education agency is able to furnish free public education for children residing on Federal property (section 6).

Title III authorizes reimbursement of Federal agencies supplying custodial, transportation, or maintenance services for children residing on Federal property (section 302).

An analysis of eligibility requirements and entitlement formulas, by section, follows under Payment Provisions. P.L. 85-620, approved August 12, 1958, made permanent the provisions for payment for children who reside on Federal property with a parent employed on Federal property. Authorization for payment for all other categories of Federal impact has been extended from time to time. The latest extension, to June 30, 1973, was made by P.L. 91-230, approved April 13, 1970.

Administration

The federally affected areas program under P.L. 81-874 is administered by the U.S. Commissioner of Education under authority vested in him by section 301, Title III. This section requires him to make an annual report to the Congress, including a full account of the administration of his functions and a detailed statement of receipts and disbursements. It also prohibits him from:

1. Exercising any direction, supervision, or control over the personnel, curriculum, or program of instruction of any school or school system of any local or State education agency; and
2. Requiring the assignment or transportation of students or teachers to overcome racial imbalance.

Functions of the Commissioner

The statute places on the Commissioner discretionary

powers and mandatory responsibilities. He may make such regulations and perform such functions as he finds necessary to carry out its provisions. He is required, however, to determine the eligibility and the rate of payment for each applicant. He must estimate the entitlement of eligible applicants, and pay from time to time the amount which, in his judgment, is due them. He is responsible for making arrangements to provide free public education for certain children residing on Federal property. If funds appropriated for payments for a fiscal year are insufficient to meet estimated requirements, he is obliged to prorate to claimants under sections 2, 3, and 4 those funds in excess of the amount estimated for purposes of section 6.

The law requires the Commissioner to make judgments as to the degree of financial burden placed on local school districts; the reasonableness of local tax

effort; the acceptability of "generally comparable districts"; and the suitability of free public education. Certain of his judgments may be made only after consultation with the State and local education agencies.¹

Payment Provisions

Sections 2, 3, and 4 concern payments to local education agencies. Sections 6 and 302 pertain to transfer of funds to other Federal agencies.

Payments go direct to the school district. Estimated fiscal and pupil data in the application, Form RSF-1, serve as the basis for an initial part-payment. Final and actual data for the year submitted on Form RSF-3 are the basis for final payment subject to adjustment, if necessary, after a review is made of the applicant's pupil and fiscal records by the Field Program Officer. The percentages of payments on Forms RSF-1 and RSF-3 are dependent on the amount of funds available at the time the payment is made.

Section 2. Reduction in Local Revenue by Reason of Acquisition of Real Property by the United States

A school district may be eligible if (1) the property was acquired by transfer and not by exchange since 1938; (2) the assessed valuation of such property represents 10 percent or more of the assessed valuation of all realty in the district at time or times of transfer; and (3) the acquisition has imposed on the school district a substantial and continuing financial burden.

Maximum entitlement is the product of the applicant's current expense tax rate applied to the estimated assessed valuation of the Federal property (exclusive of improvements since transfer date).

In fiscal 1970, 133 school districts claimed assistance under section 2. The Commissioner determined 132 to be eligible. Net entitlements to local education agencies totaled \$3,673,827.

¹ For purposes of Titles I and III, the term "State" means a State, Puerto Rico, Wake Island, Guam, the District of Columbia, American Samoa, or the Virgin Islands. The term "State education agency" means the officer or agency primarily responsible for the State supervision of public elementary and secondary schools. The term "local education agency" means a board of education or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent, or other school district located within a State. Such term includes any State agency which directly operates and maintains facilities for providing free public education.

Section 3. Education of Children Who Reside on Federal Property or Reside with a Parent Employed on Federal Property

Subsection 3(a) applies to children who reside on Federal property with a parent employed on Federal property situated in whole or in part in the same State as the school district or within reasonable commuting distance of the district.

Subsection 3(b) applies to children who reside on Federal property or reside with a parent employed on Federal property [located as in 3(a)], or had a parent who was on active duty in the uniformed services (as defined in section 102 of the Career Compensation Act of 1949).

A school district may be eligible if the number of section 3 children in average daily attendance (ADA) is 3 percent of the total average daily attendance (ADA) or 400, whichever is the lesser, and at least 10.²

Applicants which do not meet the requirement may be eligible for payment for 2 consecutive years following a year in which they met the requirement and received payment. The Commissioner may waive the 3-percent condition of eligibility when exceptional circumstances exist which would make the application of such conditions inequitable and defeat the purposes of the Act. The Commissioner is not authorized to waive the number requirement of 10 or 400.

Section 3(c) (1) specifies the formula for computing maximum entitlement. It is the product derived by multiplying the sum of 3(a) ADA and half of the 3(b) ADA by the rate of payment (see Local Contribution Rate).

For fiscal year 1970, applications for assistance under subsections 3(a) and 3(b) numbered 4,603. The Commissioner determined 4,476 to be eligible (see table B). Gross entitlements totaled \$553,565,910 for 372,661 subsection 3(a) and 2,211,566 subsection 3(b) pupils in ADA.

Section 3(c) (4) applies to local education agencies where 50 percent or more of the children in ADA reside on tax-exempt Federal property.

A school district may be eligible if it meets the ADA requirement and if it is making reasonable tax effort and availing itself of State and other financial aid but is still

² Average daily attendance is determined in accordance with State law and practice, except that the Commissioner has the authority to specify the method to be used in determining the average daily attendance of federally connected pupils. By definition, the term "average daily attendance" means the aggregate days of attendance in a given reporting period divided by the number of days school was actually in session.

unable to provide a level of education equivalent to that in comparable communities of the State. The law requires, also, that eligibility of the district for State aid and the amount of such aid for the Federal children be determined on a basis no less favorable than for other children in the State.

Maximum entitlement is the product of the accepted ADA multiplied by the per-pupil cost in generally comparable districts, less the amount of State aid which the Commissioner determines to be available for these

children. Of sixteen applicants claiming assistance under section 3(c) (4) for 1970, the Commissioner determined ten to be eligible (table B). Total entitlement amounted to \$300,454 for 2,521 pupils in ADA.

Section 3(e) applies to those situations where the local education agency has made preparations to provide free public education to a number of section 3 pupils, and that number has been substantially reduced because of the decrease in or cessation of Federal activity or by failure of such activity to occur.

TABLE B.—P.L. 81-874, Title I, sections 3 and 4: Number of applicants eligible and ineligible by subsection of the Act, fiscal year 1970

SUBSECTION	Number of applicants		
	Total	Eligible	Ineligible
3(c)(1)	4,603	4,476	127
3(c)(4)	16	10	6
3(d)	10	10	0
3(e)	24	23	1
4(a)	11	8	3
4(b)	1	0	1

Maximum entitlement is the amount which, in the judgment of the Commissioner, the school district would have been entitled to receive had there been no lessening of the Federal activity planned or in progress. Any reduction in current expenditures which the Commissioner determines has been made or reasonably should have been made because of change in Federal activity is considered in determining entitlement. Twenty-four applicants claimed assistance under section 3(e) for fiscal 1970. The Commissioner determined 13 to be eligible for a total of \$204,508 (see table B).

Section 4(a). Sudden and Substantial Increases in the Number of Pupils in ADA as a Direct Result of Activities of the United States Carried on Either Directly or Through a Contractor

A school district may be eligible for 1st-year assistance if the increase in the ADA of countable pupils over the prior year represents at least 5 percent of the non-Federal ADA of that year. "Countable" pupils may include the increase in section 3 ADA over the preceding year if the applicant so elects. Other conditions of eligibility are reasonable tax effort, diligence of the district in availing itself of State and other financial aid, inability to secure sufficient funds to meet additional costs involved, and a showing of substantial and continuing financial burden caused by Federal activities.

Maximum entitlement is the product of the accepted ADA and the per-pupil cost in generally comparable districts less the amount which the Commissioner

determines to be available from State, local, and Federal sources for such purposes, exclusive of payments under this Act and local source funds needed for the education of other children.

Any district which received 1st-year assistance in 1969 was potentially eligible in 1970 for 2d-year assistance. Maximum entitlement is limited to 50 percent of the 4(a) entitlement for the prior year. There were 11 claimants for section 4(a) 1st-year assistance in fiscal year 1970. The Commissioner found eight to be eligible for entitlements totaling \$77,940 for 41 pupils in ADA (see table B).

Section 4(d) is analogous to section 3(e) in the matter of substantial reduction in pertinent activities. There was one section 4(d) applicant in 1970 which was determined to be ineligible.

Section 6. Arrangements for the Education of Certain Children Residing on Federal Property

The Commissioner must make arrangements to provide free public education for children who reside on Federal property when

1. No tax revenue of the State or any political subdivision thereof may be spent for such purposes; or
2. It is the judgment of the Commissioner, after consulting with the appropriate State education agency, that no local education agency is able to provide suitable free public education for such children.

Chart 1.—P.L. 81-874, Title I: Number of applications from local education agencies, fiscal years 1951-1970

He may make these arrangements only with local education agencies or Federal agencies.

To the maximum extent practicable, entitlement is limited to an amount per pupil not to exceed the per-pupil cost in comparable communities in the same State (or the District of Columbia in certain situations).

In fiscal 1970 the Commissioner made section 6 arrangements in 32 instances at a total cost of \$29,993,803 for more than 45,000 pupils in ADA.

P.L. 90-247 made effective as of July 1, 1969, certain penalties required by subsection 6(f) to be imposed on

Chart 2.—P.L. 81-874, Title I: Average local contribution rate and per-pupil costs, fiscal years 1951-1970

school districts which cannot or will not educate children living on Federal property.

Section 302. Transfer of Funds to Federal Agencies for Services Which They Provide

Federal agencies may provide custodial, transportation, or maintenance services for children residing on Federal property and attending a school district which, because of State law or other factors, is unable to reimburse the Federal agency. In such instances the Commissioner may authorize transfer of funds to the Federal agencies to cover the cost of services provided. The maximum amount transferred, limited by the amount approved by the Commissioner, is the actual cost of such services for the year. Thus, the local education agency's entitlement under section 3 is paid in two parts. The first part is in the form of a cash payment to the local education agency itself. The second part is in the form of a payment made on behalf of the local education agency to the Federal agency providing the services.

In fiscal 1970 the Commissioner made three such transfers at Department level for a total amount of \$68,129.

Local Contribution Rate

The local contribution rate is the rate of Federal payment per subsection 3(a) pupil in ADA. Section 3(d) specifies the formula for its computation. In principle, it approximates the current expenditures per pupil from local revenue sources in "generally comparable" school districts in the same State as the applicant. The Commissioner establishes criteria of comparability and offers to State and local education agencies two methods of determining comparable districts: (1) selection of individual districts, and (2) State grouping of like districts. It is the policy of the Commissioner to request initial recommendations of comparable districts from State and local authorities.

The local contribution rate for use within the United States is the current expenditure per pupil made from all local source revenues in the 2d preceding year in "generally comparable school districts. The law has established two minimums, however: The rate may not be less than the greater of (1) one-half the State average per-pupil cost in the 2d preceding year or (2) one-half the national average per-pupil cost in the 50 States and the District of Columbia in the 2d preceding year. Item 2 may not exceed the State per-capita cost for such year.

Section 3(d) contains special provision for an increase in the local contribution rate for an applicant district because of increases in expenditures due to unusual geographic factors which do not affect the comparable districts.

For any local education agency in Puerto Rico, Wake Island, Guam, American Samoa, the Virgin Islands, or in a State in which a substantial portion of the land is in unorganized territory for which the State agency is the local education agency, or in a State in which there is

only one local education agency, the local contribution rate for any fiscal year is determined by the Commissioner in accordance with policies and principles approximating those used for determining the local contribution rate in other States.

For fiscal 1970, the average local contribution rate per State ranged from \$217.32 to \$735.90. On the basis of estimated data available at this time, the average rate paid under section 3(c) (1) for all 3 (a) pupils and one-half the 3(b) pupils was \$374.42.

Receipts and Disbursements

A general summation relating program activity to funds appropriated and expended follows:

Appropriations

By P.L. 91-204, approved March 5, 1970, the Congress appropriated \$505.4 million for payments for the maintenance and operation of schools as authorized by P.L. 81-874.

Subsection 5(c) of P.L. 81-874 provides for proration of payment to all applicants under sections 2, 3, and 4 when appropriations are insufficient to pay the full amount of entitlements of all applicants for a fiscal year. Section 6 is exempt from proration. It has been determined that the \$505.4 million appropriated will fund all claims under sections 2, 3, and 4 of the Act at 84.7 percent. P.L. 91-237, approved on May 1, 1970, authorized the Department to allocate additional funds to school districts which lacked the fiscal capacity to complete the regular school year with available funds. \$2,500,000 was made available for this purpose. Based on criteria in the Act and the Secretary's regulations, additional emergency funds were allocated to ten school districts in nine States.

Net Entitlements

As of June 30, 1970, the Commissioner estimated total entitlements from 1970 applications to be \$593.7 million. Transfers of funds under sections 6 and 302 account for \$30 million of this amount. The remainder represents entitlements estimated for local education agencies which claimed assistance under sections 2, 3, 4, and 7.

There was no reduction in entitlements incident to subsection 5(d) of the Act. This provision requires the Commissioner to reduce the entitlement of all school districts in a State in any fiscal year in the same proportion, if any, that the State reduces for that fiscal year its aggregate per-pupil expenditures in the form of State aid to local education agencies from current operating expenses below the level of such per-pupil expenditures in the 2d year preceding. The Commissioner is authorized to waive or reduce this requirement whenever exceptional circumstances exist which would make its application inequitable and would defeat the purposes of Title I of the Act.

Program Trends

Since the inception of the federally affected areas program under P.L. 81-874 in 1951, net entitlements have shown steady growth from \$29.6 million to \$593.7 million. The federally connected ADA of half a million in the first year multiplied by more than fivefold, reaching 2.6 million in 1970. The average local contribution rate of \$374.42 is more than 3 times the rate of \$106.82 in 1951. This growth is attributable to increases in school population, increases in school expenditures per pupil, broadened interest in the program by State

and local officials, expanded Federal activity, and amendments liberalizing the basic legislation.

For example, P.L. 83-248 broadened the definition of Federal property and extended the 3 (a) category to include children of parents in the uniformed services; P.L. 84-949 again expanded the definition of Federal property and extended the 3(b) category to include children of members of the Armed Forces (now "uniformed services"); P.L. 85-620 changed the definition of "child" to include Indian children; P.L. 85-313

TABLE C.-F.L. 81-874, Titles I and III: Number of eligible claimants, average daily attendance, and estimated net entitlement, by title, section, and basis of eligibility: All sections, fiscal year 1970

1951	1,172	29,611,018	520,370,000	5.69	2,943,940	439,008	50,701	386,754	2,553	14.91	

¹ Includes 3(e) (formerly 3(f) and 3(c) 4 ADA.

standardized the 3-percent eligibility requirement for all school districts; P.L. 89-750 introduced the alternative minimum of 400 for section 3 ADA, broadened further the definition of Federal property, extended coverage to additional federally connected children, and revised the basis for deducting "other Federal payments" from gross entitlements; P.L. 90-247 repealed the deduction provision and P.L. 91-230 extended the 3(b) category to include children residing with a parent who, under certain circumstances, was a refugee at any time during the three prior years and the average daily attendance in a local educational agency attributable to such children amounts to 20 per centum or more of the average daily attendance of all children during the year.

In like manner, amendments have had the effect of substantially increasing the average local contribution rate of payment per pupil under section 3. Chief among these amendments were P.L. 83-248, establishing as the minimum rate of payment one-half the State average per-pupil cost in the 2d preceding year, and P.L. 85-620, which set as a second minimum rate one-half the national average per-pupil cost of the same year.

As shown in table D, the proportion of total

operating expenses in eligible school districts represented by these Federal payments has ranged from 5.69 in 1951 to 3.29 in 1970, for a 20-year average of 4.85 percent. The major portion of total entitlements has repeatedly been paid to section 3 applicants, advancing from 78.9 percent at the start of the program to 93.2 percent in 1970. The percentage in the ratio of federally connected ADA to total ADA in eligible districts dropped from 14.91 in 1951 to 11.13 percent this year for an overall average of 14.18 percent. The average local contribution rate was 51.5 percent of the average per-pupil cost in eligible districts, compared with 60 percent in 1951.

In 1951, 2.9 million pupils were in attendance in eligible school districts. This total approximated one-eighth of the Nation's public school attendance in that year. The 23.2 million pupils in attendance in school districts eligible for payment in 1970 represented about 55 percent of the Nation's public school attendance.

In fiscal 1970 Federal payments helped to support educational services for 4 times as large a segment of public elementary and secondary school ADA as in 1951.

III. PUBLIC LAW 81-815

PROVIDING FINANCIAL ASSISTANCE FOR SCHOOL CONSTRUCTION IN FEDERALLY AFFECTED AREAS

Purpose

Public Law 81-815 authorizes Federal financial assistance for construction by local education agencies of urgently needed minimum school facilities in school districts which have had substantial increases in school membership as a result of new or increased Federal activities. Assistance is also authorized for construction of minimum school facilities by local education agencies for pupils residing on Indian lands, and by the Federal Government on Federal property (such as Army, Navy, and Air Force installations) when no State¹ or local education agency can legally do so.

Payments may be made to local education agencies where there has been or will be an increase in school membership of children residing on Federal property, of children residing on private property with a parent employed on Federal property, or of children whose membership has resulted or will result from activities of the United States, carried on directly or through a contractor. Provisions of the Act are specific regarding the increase in the number of such children in the applicant's schools required to establish eligibility for aid during any 4-year increase period and the amount of Federal assistance authorized. Congress has amended Public Law 81-815 several times since its original enactment. Certain provisions concerning children who reside on Federal property were made permanent by

P.L. 85-620. The provisions of Section 14 formerly pertaining primarily to children residing on Indian reservations were made permanent by P.L. 89-750. P.L. 90-247 made the provisions of subsection 14(a) and (b) applicable exclusively to children residing on Indian lands. Subsection 14(c), which assists financially distressed school districts where Federal lands comprise a substantial part of the area, was added by P.L. 91-230. Other categories of Federal impact have been extended periodically since 1958. The provisions for all categories of children included in the Act were in effect during fiscal year 1970.

P.L. 81-815 authorizes grants to local education agencies under Sections 5 and 9 based on increases in federally connected membership during a four-year increase period, except that grants under Section 9 are authorized only if the increase is expected to be temporary. Subsections 14(a) and 14(b) authorize grants to local education agencies on the basis of children residing on Indian lands and for whom the responsible local education agency is unable to provide minimum school facilities. Subsection 14(c) authorizes grants if a substantial portion of a school district is Federal land and a substantial percentage of its pupils lack minimum school facilities.

Grants Based on Increases in Federally Connected Membership (Sections 5 and 9)

Estimating Increases in Membership

Each application filed by a local education agency under section 5 or section 9 is a claim for Federal assistance for the construction of school facilities based on an increase in federally connected children in the school district in a specific 4-year period. Applicants may file claims in the 3d or 4th year of any increase period and the Commissioner is required to estimate the

increase in the membership of federally connected children as of the end of that increase period. Total membership may be estimated for 2 years beyond the end of the 4-year increase period for determining unhoused children. This permits more effective advance planning for school construction.

Under the Act as currently amended, the increase period and the base year move forward 1 year each July 1. For example, the 1970 fiscal year covered by this report is the 4th year of the 4-year increase period July 1, 1966 to June 30, 1970, and the 3rd year of the 4-year increase period July 1, 1967 to June 30, 1971.

¹ A recent amendment brings American Samoa under provisions of P.L. 81-815 as a State.

Eligibility Requirements (Section 5)

Three categories of federally connected school children may be considered in determining the eligibility of local education agencies for Federal funds under this section of P.L. 81-815. Two of these categories [subsections 5(a) (1) and 5(a) (2)] are based on the relationship of the children to Federal property. Children classified under subsection 5(a) (1) are those who reside on Federal property with a parent who works on Federal property; children classified under subsection 5(a) (2) are those who either reside on Federal property or whose parents work on Federal property, but not both. The Federal property on which a claim is based must be in the same State as the applicant or within reasonable commuting distance of the school district.

To be eligible for a grant of funds under subsection 5(a) (1) and 5(a) (2) categories, a school district must, during a 4-year increase period, have an increase in membership in one or both categories of at least 20 children and equal to at least 6 percent of the district's total average daily membership² in the base year, or 1,500 pupils, whichever figure is the lesser. The base year is the school year preceding the 4-year increase period.

The third category of federally connected children is defined in subsection 5(a) (3) to include those children whose attendance in an applicant district is due to activities of the United States carried on directly or through a contractor. To be eligible for payment under this provision, the school district's estimated membership increase in the 4-year period must be at least 20 in number and at least 10 percent of the total base-year average daily membership, or 2,500 pupils, whichever figure is the lesser. In addition, it must be established that the construction of needed minimum facilities for that number of children would impose an undue financial burden on the taxing and borrowing power of the district.

Number of Children Counted for Payment

School districts are required under subsections 5(a)(1) and 5(a)(2) to absorb an increase of six percent, or 1,500 in number, in nonfederal membership during any four-year increase period. Under subsection 5(a)(3) the requirement is six percent, or 2,500 in number. Should an applicant fail to meet these absorption

² Average daily membership is determined in accordance with State law and practice. By definition the term means the aggregate number of days of membership in the applicant school district divided by the number of days school was actually in session.

requirements, the difference between 106 percent of the nonfederal average daily membership in the base year or the specified number, whichever is the lesser, and the estimated nonfederal membership as of the end of the increase period is deducted from the number of qualifying federally connected children in determining the number of pupils counted for payment.

The number of pupils counted for payment is also limited to the number in excess of the estimated federally connected membership as of the end of an increase period covered by a prior eligible application, or of the number of such pupils previously counted for payment.

Amount of the Federal Payment

The maximum allowable grant under section 5 is determined by multiplying the number of federally connected children to be counted for payment under subsection 5(a) (1) by 95 percent of the average per-pupil cost of constructing minimum school facilities in the applicant's State during the 2d year of the 4-year increase period designated in the application; those to be counted under subsection 5(a) (2) by 50 percent; and those under subsection 5(a) (3) by 45 percent.

The amount is further limited to the actual cost of constructing minimum school facilities in the applicant district for children who would otherwise be without such facilities.

Additional Payments (Section 8)

When certain conditions exist, payments in addition to the maximum payment under section 5 may be authorized under section 8. If a local education agency is unable to provide the necessary minimum school facilities for the increased number of federally connected children by utilizing funds from all local and State sources available to it, and from the maximum Federal grant computed under section 5 of the Act, the Commissioner is authorized to make such additional grant as is necessary to construct such facilities. Also, when a project for which Federal funds have been approved is partly or wholly destroyed by flood, fire, or similar emergency during the construction period and the school district is unable to provide funds to rebuild the project, the Commissioner may make an additional payment. An amount not to exceed 10 percent of the appropriation for any fiscal year may be used for the purposes authorized in section 8. In no case will the amount of funds granted under this section exceed the difference between (1) the actual cost of providing minimum facilities for the federally connected pupils qualifying for payment under the Act, or the average

cost in the State of providing such facilities, whichever is the lesser, and (2) the Federal funds which have been made available to the applicant under section 5 of the Act, plus local and State funds which may be available for the purpose.

Assurances Required

P.L. 81-815 provides that before Federal funds may be allotted to a local education agency for the construction of school facilities, the Commissioner must be assured that the applicant has or will have title to the site or the right to construct the proposed school facilities on the site and to maintain the completed school facilities for not less than 20 years. The applicant must also have legal authority to undertake construction of the project and be able to finance any non-federal share of the cost of the proposed project. Assurances must be given that work on the project will be commenced within a reasonable time and prosecuted to completion with due diligence, and that the rates of pay for those engaged in the project will not be less than the prevailing local wage rates as determined by the Secretary of Labor in accordance with the Davis-Bacon Act. The local education agency must also assure the Commissioner that its school facilities will be available to federally connected children on the same terms; in accordance with State laws, as they are to other children

in the district, and that the applicant will supply the Commissioner with any information which he may reasonably require.

In addition to the assurances required in P.L. 81-815, assurances are required with respect to Title VI and Title VII (Equal Employment Opportunity) of the Civil Rights Act of 1964; consideration of excellence of architecture and design; and accessibility and usability of facilities by handicapped persons.

Providing Facilities for Local Education Agencies with Temporary Federal Impacts (Section 9)

The increase in school membership in an applicant district may be temporary, due to the nature of the Federal activities involved. When this is so, the school district may request the Commissioner to allot to it under section 9 funds which would be equal to the amount necessary for the construction of temporary facilities, but which the district would use to construct permanent school facilities. However, the Commissioner must be assured that adequate school facilities will be provided for the federally connected children whose membership is considered temporary. As an alternative, the school district may request the Commissioner to make needed temporary school facilities available at Federal expense.

Grants to Provide Needed Minimum Facilities for Children Residing on Indian Lands and Others (Section 14)

Subsections 14(a) and 14(b) authorize grants for construction of needed minimum school facilities to school districts which provide free public education to substantial numbers of children who reside on Indian lands but who cannot be counted under section 5 of the Act because they do not represent a substantial increase in the total number of pupils, or to school districts having large Indian reservations within their boundaries, the tax-exempt status of which substantially impairs the district's ability to finance critically needed school construction. Subsection 14(c) was added to Public Law 81-815 by an amendment contained in Public Law 91-230, approved April 13, 1970. Subsection 14(e) authorizes grants to construct minimum school facilities to districts providing free public education for a substantial percentage of children who are inadequately housed by minimum school facilities and where Federal property constitutes a substantial part of the school district

and when such children have not or will not form the bases for payments under other provisions of the Act. Further the immunity of Federal property from taxation must have created a substantial and continuing impairment of the district's ability to finance needed school facilities.

Eligibility Requirements

An applicant school district may be eligible for payment under subsection 14(a) or 14(b) if:

(1) The number of pupils residing on Indian lands represents a "substantial percentage" of the total number of children for whom the local education agency provides free public education. An applicant will be considered as meeting the "substantial percentage" requirement if (a) the estimated number of children who reside on Indian lands as of the close of a 4-year membership period, and who are not otherwise eligible

for payment, is in excess of 15 and, under subsection 14(a) (1), is at least 33-1/3 percent and, under subsection 14(b) (1), at least 10 percent of the total number of children for whom the applicant is providing free public education; OR

(2) the Indian lands in the school district comprise a "substantial part" of the school district. An applicant will be considered as meeting this requirement if the Indian lands in the school district represent, in relation to subsection 14(a) (1) of the Act, at least 33-1/3 percent, and in relation to subsection 14(b) (1) of the Act, at least 10 percent, of the total land area in the school district; OR

(3) the applicant is providing free public education for at least 100 children who reside on Indian lands located outside the applicant school district; AND

(4) the immunity of such Indian lands from taxation by the applicant has created a substantial and continuing impairment of its ability to finance needed school facilities. (This provision may be waived if the applicant is providing free public education for 100 or more children who reside on Indian lands located outside its school district.)

Under subsection 14(a), additional conditions for payment are:

(1) The applicant is making a reasonable tax effort and is exercising diligence in availing itself of State and other financial assistance available for this purpose; AND

(2) the applicant does not have sufficient funds available from all other sources to provide minimum school facilities required for the education of a substantial percentage of children in membership in its schools. This requirement will be deemed to be met when, with full utilization of practicably available financial resources, including unused legal bonding authority of the applicant (but not to exceed 12 percent of the assessed valuation of the applicant school district), the applicant does not have sufficient funds to provide minimum school facilities required for the education of 95 percent or more of the total number of children estimated to be in membership in the applicant's schools as of the end of the 2d year following the end of the membership period for which the application is filed.

The burden and effort requirement is not included in subsection 14(b).

An applicant school district may be eligible under subsection 14(c) if:

(1) The number of children who are inadequately housed by minimum school facilities represents a "substantial percentage" of the total number of children for whom the local education agency provides free public

education. An applicant will be considered as meeting the "substantial percentage" requirement if the number of children inadequately housed is at least 20 in number and 33-1/3 percent of the total number of children for whom the applicant is providing free public education; AND

(2) Federal property in the school district is at least 33-1/3 percent of the total area in the school district;

(3) The immunity of such Federal property to taxation by the applicant has created a substantial and continuing impairment of the school district's ability to finance needed school facilities;

(4) The applicant is making a reasonable tax effort and is exercising due diligence in availing itself of State and other financial assistance available for this purpose; and

(5) The applicant does not have sufficient funds from all other sources to provide minimum school facilities required for education of a substantial percentage of the children in membership in its schools. This requirement will be deemed to be met when, with full utilization of practicably available financial resources, including unused legal bonding authority of the applicant (but not to exceed 12 percent of the assessed valuation of the school district), the applicant does not have sufficient funds to provide minimum school facilities required for the education of 95 percent or more of the total number of children estimated to be in membership as of the end of the second year following the end of the membership period for which the application is filed.

Amount of the Federal Payment

The Federal funds that may be granted to a local education agency under subsection 14(a) are limited to the amount required, in excess of local, State, and/or other Federal funds available, for the construction of needed minimum school facilities for all children who it is estimated will be in membership in the applicant's schools at the end of the 2d year following the end of any 4-year membership period.

Under subsection 14(b), the amount of Federal assistance is limited to that needed, in excess of local, State, and/or other Federal funds available, to provide minimum school facilities for only those children who reside on Indian lands.

Federal funds granted under subsection 14(c) are limited to the amount required, in excess of local, State, and/or other Federal funds available, for constructing minimum school facilities for inadequately housed children who it is estimated will be in membership in the

applicant's schools at the end of the second year following the end of any four-year increase period.

The Commissioner is authorized to make Federal funds available under this section upon such terms and

conditions as he considers to be in the public interest. The method of making payment and of constructing school facilities under this section is the same as that established under sections 5, 8, and 9 of the Act.

Federal Construction of School Facilities on Federal Property (Section 10)

Local education agencies usually provide school facilities for children living on Federal property with such Federal assistance as they may be eligible to receive under section 5 of the Act. However, some State laws preclude the provision of free public education by State or local agencies for children living on some Federal properties. In these cases, the Commissioner is directed by section 10 of the Act to construct or otherwise provide school facilities for the children living on Federal property. The school facilities provided under this authority have been constructed on Federal property. Such facilities usually are requested by representatives of the Federal installations involved and, to the extent practicable, are comparable to the school facilities provided by local education agencies in similar communities in the State.

In 1954 P.L. 81-874 was amended to permit the children of persons employed by the United States in Puerto Rico, Guam, Wake Island, and the Virgin Islands, but not residing on Federal property, to attend the schools constructed on base for school children living on base if the Commissioner determined that off-base

school facilities were not available and such attendance was appropriate under the Act. P.L. 89-77, approved July 21, 1965, authorized the Commissioner, in determining the capacity of the school facilities to be constructed on base in these specified territories, to count children residing off Federal property with a parent employed by the United States, under certain conditions. He may count such children when he determines, after consultation with the appropriate State education agency, that the construction or provision of such facilities is appropriate to carry out the purposes of P.L. 81-815; that no local education agency is able to provide suitable free public education for such children; and that English is not the primary language of instruction in schools in the locality. This amendment applies particularly to Puerto Rico.

The Commissioner is authorized to transfer to the appropriate local education agency without charge all the right, title, and interest of the United States in and to any facilities provided under section 10, or former sections 204 or 310, when he determines it is in the interest of the Federal Government to do so.

Administration

Participation by State Education Agencies

State education agencies participate in a number of ways in administering the school construction program. No application from a local education agency may be approved until the State education agency assures the Commissioner that the project is consistent with overall State plans for the construction of school facilities and is fully coordinated with the State program of education.

The participation of each State is essential in establishing the construction costs to be used in computing grants for eligible applicant school districts. For this purpose, information is obtained annually from each State agency showing the total cost, capacity, total floor area, area per pupil, and cost per square foot of elementary and secondary schools constructed in the State during the 2d year of each 4-year increase period for which the data will be used to determine rates of

payment. On the basis of this information, an average per-pupil cost of construction is computed and submitted to the State agency for concurrence.

The approved 1968 and 1969 average per-pupil costs of construction for each State were used in determining grants under application filed for the increase periods ending June 30, 1970 and June 30, 1971.

Assistance of Other Federal Agencies

Recently construction functions formerly delegated to the Department of Housing and Urban Development were assumed by Department of Health, Education, and Welfare, FECA. These functions include obtaining assurances required by the Act, examining final plans and specifications, and inspecting and reviewing construction progress.

FECA also performs additional functions in constructing temporary school facilities under Section 9 and in

constructing schools on Federal property under Section 10. These include the preparation of cost estimates, arranging for preparation of plans and specifications, and supervision of the construction of each approved project.

Priority and Relative Urgency of Need

When funds available for any fiscal year will not be sufficient to pay in full the maximum allowance to all eligible school districts which have filed applications before the cutoff date, the Act requires that the Commissioner shall establish by regulation a priority listing for the approval of those applications based upon the relative urgency of need. Projects are arranged in order from the highest to the lowest index number. Funds are reserved starting with the highest priority project and continuing down the list as far as available funds will permit. Applications filed after the cutoff date are considered for approval when additional funds are made available and a new cutoff date has been established.

The priority index of each application is the sum of (1) the percentage that the number of federally connected children counted for payment is of the total membership at the close of the 4-year increase period and (2) the percentage that the number of children determined to be "unhoused" in the applicant's schools as of the end of the increase period is of the total membership. However, the priority index may not exceed twice the percentage of the total membership that the number of federally connected children counted for payment represents.

Pursuant to the current provisions of the Act, sections 9, 10, and 16 and subsections 14(a) and 14(b) have priority over all other sections when consideration is being given to funding eligible applications and when the appropriation is insufficient to fund all eligible applications. P.L. 91-230, approved April 13, 1970, amended the Act to establish the present priority position of subsection 14(a) and (b). As a consequence of this amendment, priority indices are now developed for section 10 applications on a basis similar to that described in the preceding paragraph.

"Minimum School Facilities"

The concept of "minimum school facilities" was incorporated into P.L. 81-815 in 1953 by the enactment of P.L. 83-246. The amending law did not define the term. However, the congressional committee reports on the bill give considerable legislative history regarding the intent of Congress in this matter. In general,

minimum school facilities were to be neither inferior nor substandard in the quality of the materials used in their construction and in the amount of space required for instructional purposes. It was not expected that Federal funds would be used to construct single-purpose auditoriums, single-purpose gymnasiums, or other single-use rooms that would be used only a small part of each day, or to provide facilities more elaborate than those which school districts in the same State in recent years have been constructing with their own funds. Minimum school facilities were defined by Federal regulation as "those instructional and auxiliary rooms and initial equipment, exclusive of single-purpose auditoriums, single-purpose gymnasiums, and any built-in spectator space, necessary to operate a program of free public education for the school members of the applicant at normal capacity in accordance with the laws and customs of the State." Federal funds have been approved to construct school facilities of the size and type which school districts had been providing in recent years with their own funds, but which generally excluded single-purpose gymnasiums and auditoriums.

As a result of changing educational needs, purposes and technology, and innovations occurring in elementary and secondary education, it is becoming common practice, particularly in larger school centers, to provide separate gymnasiums and separate auditoriums. During fiscal 1967, the definition of minimum school facilities in the Federal regulations was amended to permit the construction of such separate facilities with P.L. 81-815 funds where the size of pupil enrollment and curriculum requirements justify separate facilities. Further liberalization has resulted from the amendments enacted by P.L. 89-750, requiring applicants to consider excellence of architecture and design of any building constructed with the use of Federal funds by authorizing an amount not to exceed 1 percent of the project grant for incorporation of works of art in building plans, and by requiring that all facilities constructed with the use of Federal funds be made accessible to and usable by handicapped persons.

When P.L. 90-247 was under consideration, the congressional committees included in the reports on the bill a statement giving the legislative history of the "minimum school facilities" concept, and recommending the establishment of a more up-to-date concept of minimum school facilities than was included when the law was enacted in 1950 and amended in 1953. The report expressed the view that while the concept has served a useful purpose in the law and should be retained to prevent unnecessary or unwise expenditure of Federal

funds, it needs to be modernized to fit the current trends in educational programs, techniques, and purposes; and that, with new devices for instruction becoming more widely used, minimum school facilities should include, in addition to regular classrooms, special rooms for speech therapy, remedial reading, music appreciation, language laboratories, electronic data processing, and other facilities and equipment necessary for and useful in conducting special programs or activities for educationally deprived children. The report suggested further that the criterion to be used in approving features in buildings or other specialized facilities should be the need of them in the school program operated by the applicant school district; that it is within the concept of minimum facilities to use Federal funds, particularly under subsections 14(a) and 14(b) in appropriate situations for construction of consolidated school facilities when small districts are merged, or to replace small isolated, inadequate buildings with modern facilities, even though the district may have enough classroom space to house all of the children. Also, considerable leeway may be exercised in determining what constitutes minimum school facilities in specific situations in consultation with the State education agency.

"Unhoused Children"

Children who are "unhoused" or "without minimum school facilities" are defined by regulation as those in membership in the schools of a district over and above normal capacity of available and usable minimum school facilities. As indicated earlier, the law requires that the amount of Federal funds approved for payment be limited to the cost of constructing minimum school facilities for a number not to exceed the number of "unhoused" children. The Act as amended by P.L. 89-750 now authorizes the number of unhoused children for whom minimum school facilities are needed to be determined by estimating total membership as of the end of the 2d year following the 4-year period for which the application is filed.

A school district may have sufficient classroom space to accommodate the children in membership in its schools, but not have the minimum school facilities needed to conduct an adequate school program. In such cases, Federal funds under the Act may be approved as indicated above for the construction of the needed minimum facilities, such as library, administrative space, kitchen and cafeteria, or other noncapacity facilities.

Appropriations

A total of \$1,389,642,000 has been appropriated by the Congress for constructing school facilities under P.L. 81-815 since its enactment in September 1960. This

does not include a balance of \$96,000 transferred to the Office of Education from the Atomic Energy Commission pursuant to section 209(d) of P.L. 81-815.

Summary of Assistance Provided Under P.L. 81-815

P.L. 81-815 appropriations for the past 4 fiscal years have been insufficient to meet program requirements. The accomplishments during fiscal year 1969 were significantly greater than in fiscal years 1967 and 1968 because fiscal year 1967 and 1968 funds previously withheld were made available for obligation in fiscal year 1969.

Funds appropriated in fiscal year 1967, made available for obligation in fiscal year 1967, were diminished in fiscal year 1968 pursuant to P.L. 90-218, approved December 18, 1967, which directed that Federal obligations and expenditures in controllable programs for fiscal year 1968 be substantially reduced. Fiscal year 1967 funds not actually obligated by the end of fiscal year 1967 became subject to the expenditure reduction act, and were reserved or "frozen" from expenditure

during fiscal year 1968. The Revenue and Expenditure Control Act of 1968 (P.L. 90-364) had a similar effect on available funds and expenditures in fiscal year 1969. Both 1967 and 1968 appropriated funds carried over, unobligated, into fiscal year 1969. Funds released for obligation and obligated in fiscal year 1969, therefore, were greater than those appropriated in fiscal year 1969 because of the release of those funds previously held in reserve. That portion of unobligated balance carried forward from fiscal year 1969 to fiscal year 1970 for eligible school district applications filed in fiscal year 1967 and major disaster assistance applications constituted the major portion of fiscal year 1970 obligations. In accordance with the President's 75 percent reduction in direct construction obligations plan, established September 4, 1969 permitted only two construction

TABLE E.—P.L. 81-815: Total number of projects filed and number on which funds were reserved, classrooms provided, and pupils housed, by year, and cumulative as of the end of each fiscal year, all section of the Act: Fiscal years 1951-70.

Fiscal year	Projects				Classrooms provided		Pupils housed

1951	1,155	--	307	--	3,522	--	102,464	--

contracts to be let in fiscal year 1970. Thus, at the conclusion of fiscal year 1970, approximately \$24 million remained available for obligation in fiscal year 1971. The actual appropriations for P.L. 81-815 for fiscal years 1968, 1969 and 1970 were reduced significantly. The net result of P.L. 90-218, P.L. 90-364 and the President's Construction Reduction Plan was to cause an overall reduction in available funds for applications under all sections of P.L. 81-815 filed in fiscal years 1967, 1968, 1969, and 1970.

It was estimated that \$87 million would be required to fund all eligible school construction applications filed in fiscal year 1967 and \$80 million for each fiscal year 1968 and 1969. The fiscal year 1967 appropriation was \$52.9 million, the fiscal year 1968 appropriation was \$22.9 million, and the fiscal year 1969 appropriation was \$14.7 million a total of \$90.5 million. The 1968 appropriation contained a statement that the \$22.9 million be available first for unfunded applications filed prior to June 30, 1967.

The first cutoff date for receipt of P.L. 81-815 applications in fiscal year 1967 was February 20, 1967. When the entire \$52.9 million was made available for obligation in fiscal year 1967, it was concluded that the \$52.9 million would fund all Federal construction

applications, since under the terms of the Act, Federal construction applications under sections 9 and 10 and major disaster assistance under Section 16 must be funded first; and that the remainder would fund all eligible applications under the other sections (sections 5, 8, and 14) of the Act filed for the February 20, 1967, cutoff date by public school districts with priorities of eight and above. Funds were therefore reserved on 101 applications of eligible school districts filed prior to February 20, 1967, which had a priority of eight and above.

Under the financial plan developed pursuant to the legislative directive in P.L. 90-218, the obligation for construction assistance during fiscal year 1968 was limited to \$24.1 million, but more than this amount had already been reserved for eligible school districts on applications filed for the February 20, 1967, cutoff date and for Federal construction applications. It became necessary to rescind all funds reserved in excess of the \$24.1 million and to advise 64 school districts that funding of their projects had been deferred and that it was not known when additional funds would be made available. Of the \$24.1 million ceiling, it was determined that \$11.8 million was for direct Federal construction under sections 9 and 10 of the Act. The remaining \$12.3

million was available to fund eligible applications of local education agencies under sections 5, 8, and 14 of the Act. No further funds were made available during fiscal year 1968. The fiscal year 1969 appropriation was \$14.7 million. This amount was sufficient to meet only the requirements for Federal construction under sections 9 and 10 and major disaster assistance under section 16. The remainder of 1967 and 1968 appropriated funds, together with the fiscal year 1969 appropriation of \$14.7 million, became available for obligation under the program in fiscal year 1969.

After the 1969 needs for section 10 were met, the remaining available funds were reserved on local school district applications under sections 5, 8, and 14 of the Act which were filed prior to June 30, 1967. As of the close of fiscal year 1969, there were still remaining unfunded approximately 46 local school district applications which were filed in fiscal year 1967, as well as all eligible applications filed under these sections for the cutoff dates of June 24, 1968, and June 25, 1969.

A further limiting factor was the interpretation of the definition of the term "obligation" as applied to Federal construction projects under sections 9 and 10 of the Act. The Office of Education considers a grant to a local education agency to be an "obligation" upon issuance of a notice of the tentative reservation of funds.

For Federal construction projects, funds are "committed" or "reserved" when cost estimates are approved. Such funds are not considered to be an "obligation," however, until architectural services, construction, and equipment procurement contracts are executed. There may be an appreciable lapse of time between the time of approval of cost estimates and "commitment" or "reservation" of funds, due to the need to coordinate planning with officials of the school, the Federal installation, and the responsible State education agency.

The actual period of planning, constructing, and equipping the school plant facilities may range from 1 to 4 years, depending upon the size and complexity of the particular project. Since the "obligation" of the funds is considered to occur only when contracts are executed, sizable balances which are "committed" for approved construction projects under section 10 (Federal construction) are "technically unobligated."

As a consequence, during each fiscal year "committed" or "reserved" funds for Federal construction projects may be reported as "unobligated" balances, depending upon the timing of approval of the cost estimates and commitment of funds, and the subsequent execution of contracts.

At the beginning of fiscal year 1970, there was a reported balance of \$20.9 million of "technically unobligated" funds. This sum was "committed" to ongoing section 10 projects approved in prior fiscal years, which projects were in various states of construction ranging from negotiating for architectural services for development of plans and specifications to acquiring equipment for a project nearing completion. Under the interpretation of the term "obligation" with respect to section 10 projects, the funds "committed" for these projects were technically considered an "unobligated balance." This technically "unobligated balance" was set off against the section 10 obligation ceiling of \$11.8 million established for fiscal year 1968. This action left \$2.674 million actually available for new projects during the 1968 fiscal year. Thus, only a limited number of new projects could be initiated under section 10 during fiscal year 1968. As a consequence, in fiscal year 1969, \$22.0 million was allotted to section 10. During fiscal year 1969, \$21.9 million of the allotted amount was committed and \$6.7 million was actually obligated.

Early in fiscal year 1970, (September 4) the President announced a 75 percent reduction in direct federal construction. As the reduction plan was applicable to the Department as a whole, permission was granted the Office of Education to award only two contracts for construction of section 10 school facilities. Repairs to existing Federal school facilities, development of plans for Federal schools, and grants to local education agencies for construction were exempt from the reduction plan. Approximately \$4.9 million was committed or obligated for approved direct construction and \$8.4 million for assistance to local education agencies who had filed eligible applications prior to June 30, 1967 and for major disaster assistance applications under Section 16. No funds were available to fund any eligible applications filed by school districts in fiscal years 1968, 1969, nor 1970 under sections 5, 8, and 14 of the Act. In addition, as of the close of fiscal year 1970, section 10 applications amounting to \$22 million remain unfunded.

Fiscal Year 1970

Construction of School Facilities by Local Education Agencies

A total of 97 local education agencies filed applications during fiscal year 1970 for assistance under sections 5, 8, 9, and 14 of the Act. Of the applications

filed during fiscal year 1970, 18 were for assistance under section 14. Twenty applications were filed by local education agencies which had not heretofore applied for Federal assistance.

During the fiscal year, 107 applications were processed. The eligible districts had a combined increase of 25,551 federally connected children. Represented in this increase were 4,550 children residing on Federal property with parents employed on Federal property; 19,462 children whose parents either lived on or worked on Federal property, but not both; and 187 children whose parents were brought into the applicant district as a result of activities of the United States carried on directly or through a contractor and 1,352 children residing on Indian lands.

Construction of School Facilities by the Federal Government on Federal Property

Eleven applications under section 10 of the Act were submitted by Federal agencies in fiscal 1970 for construction of school facilities at 5 Federal installations. A total of \$1.4 million in Federal funds was initially committed during the fiscal year for 11 new projects. It is estimated that these will provide 37 classrooms, which at normal capacity will house 1,948 children, and related minimum school facilities for children residing on Federal property for whom State and local education agencies are unable to provide education. Of these, 1 is for a new facility, 1 for an addition to existing facilities, and 9 for other facilities.

Under the 1965 amendment to section 10, which authorized, under certain circumstances, the construction on base of school facilities of sufficient capacity to house children of U.S. employees living off the Federal property, additional classrooms are being provided at three locations in Puerto Rico to house an estimated 2,100 children.

Transfer to Local Education Agencies of School Facilities Constructed on Federal Property under Section 10 (or Former Sections 204 and 310)

During fiscal year 1970, six requests were submitted by local education agencies for transfer to the school district of title to federally owned school facilities constructed under section 10, or former sections 204 and 310, of the Act. A total of 29 such requests have been received since the authorizing legislation was enacted in November 1966. The number transferred to date totals 10. A number of the pending transfers are

dependent upon the Division being able to repair, rehabilitate, and/or provide additional minimum school facilities. These projects have been deferred as a result of obligation and expenditure ceilings imposed in recent years.

Fiscal years 1951 through 1970

During the 20-year period of operation covered by this report, 11,827 school construction project applications have been filed by local education agencies in 50 States and four outlying areas, and by Federal officials on behalf of various Federal installations. Federal funds totaling \$1,358,737,815 have been reserved for 6,037 projects, of which 5,577 were filed by local education agencies and 460 by Federal agencies. Of this amount, \$1,174,279,642 has been granted to local school districts, and \$184,458,173 has been authorized by the Commissioner to build school facilities on Federal property.

A total of 1,858,115 federally connected pupils in all categories has been counted for payment on the applications filed by local education agencies and processed to date. Of these, 302,955 (16.3 percent) were children residing on Federal property with parents employed on Federal property; 1,291,405 (69.5 percent) were children either residing on Federal property, but not both; and 263,755 (14.2 percent) were children whose parents were brought into the applicant districts as a result of activities of the United States carried on directly or through a contractor.

The school facilities constructed or approved for construction by local education agencies under sections 5, 8, 9, and 14 of the Act are estimated to provide 70,751 classrooms and related facilities to house approximately 2,071,392 pupils. As of June 30, 1970, 244 of the projects were still under construction, and 658 were still in various stages of preconstruction planning or awaiting final approval. The facilities to be constructed include 2,315 new school facilities, 3,513 additions to existing facilities, and 564 other or related nonclassroom facilities. It is estimated that the local education agencies have added \$796 million in local and State funds for the acquisition of sites and the construction of the projects provided under P.L. 81-815.

Of the 460 projects for which funds have been authorized for Federal construction of school facilities on Federal property, 407 were completed and 53 were either under construction or being planned for construction as of June 30, 1970. When all of the projects for which funds have been authorized are completed, they will provide an estimated 4,370 classrooms and related facilities to house approximately 129,743 pupils.

TABLE F.—P.L. 81-815: Total number of projects filed, number on which funds were reserved, and fund reservations, classrooms provided and pupils housed, by section of the Act: Fiscal years 1951—70

Section and fiscal year	Projects filed (1)	Projects reserved		Classrooms provided (4)	Pupils housed (5)
		Number (2)	Amount (3)

¹ Includes 28 projects for which funds were reserved under sections 5 and 14 to provide 226 classrooms to house 6,042 children.

² Includes projects under P.L. 357 (83d Cong.) based on unpaid entitlements for the attendance of federally connected children prior to July 1, 1952 (see table E).

³ Construction by Federal agencies.

IV. FEDERAL DISASTER AID FOR SCHOOLS

Authorizing Legislation

Public Law 89-313, approved by the President on November 1, 1965, authorized the Commissioner of Education to provide financial assistance under certain conditions for the repair or rebuilding of damaged facilities and for operation of public elementary and secondary schools in areas affected by a major disaster.

This disaster assistance is authorized by section 16, added to P.L. 81-815, and section 7, added to Title I of P.L. 81-874. Thus, certain definitions, limitations, and requirements in Public Laws 81-815 and 81-874 apply to the School Disaster Assistance program.

Before P.L. 89-313 was enacted, schools affected by major disasters were provided emergency and temporary assistance under the Federal Disaster Act (P.L. 81-875) administered by the Office of Emergency Planning. P.L. 89-313 empowers the Commissioner of Education to provide permanent, rather than temporary, facilities for school buildings destroyed or damaged in a disaster, and when necessary to provide current operating expenses for a period not to exceed 5 years, on a reduced basis each year. The Commissioner is further authorized to provide public school facilities and funds for operating costs for children from nonpublic schools that are damaged or destroyed by a disaster.

When the President declares a "major disaster" for any area within the meaning of P.L. 81-875, the Office of Emergency Preparedness defines the geographic limits of the disaster area and notifies the Commissioner. School districts located within the delineated area are thereupon authorized to make application for major disaster assistance and the Commissioner may take action with respect to these applications. P.L. 89-313 authorized assistance with respect to major disasters occurring after August 30, 1965, and prior to July 1, 1967. P.L. 90-247, approved January 2, 1968, extended the school disaster aid provisions to apply to disasters occurring on or before June 30, 1970, and amended both P.L. 81-815 and 81-874 to authorize disaster school assistance to publicly operated schools providing technical, vocational, or other special education to children of elementary or secondary school age; eliminated the requirement for a determination of reasonable tax effort and the exercise of due diligence, by the local education agency or other public agency, in availing itself of State and other financial assistance, and substituted a requirement that such agency utilize all

State and other financial assistance available for the same purpose; and added a minimum-need provision (\$1,000 or one-half of 1 percent of the agency's current operating expenditures during the year preceding the disaster, whichever is the lesser) as a condition of eligibility for assistance.

Section 7 of Title I of P.L. 81-874 was amended to authorize assistance to provide a level of education equivalent to that maintained in the schools of the agency prior to the occurrence of the disaster, instead of the level maintained during the last full fiscal year prior to the occurrence of the disaster; and an amendment was added to subsection 7(b) to clarify the authority to use grant funds to make minor repairs to facilities where necessary in the case of a major disaster.

Section 16 of P.L. 81-815 was amended to permit financial assistance to a local education agency or other public agency for the construction of public school facilities to serve children who will attend public schools because the private schools they were attending had been destroyed or seriously damaged by a major disaster and will not be replaced. Under the original section, such assistance was authorized only if there had also been destruction of or damage to a public school facility.

Public Law 90-247 further amended both laws to authorize Federal assistance in the case of "pinpoint" disasters—that is, disasters which are localized and not of sufficient severity to be classed as a Federal disaster area. Assistance is authorized where the Commissioner determines that public elementary and secondary school facilities of a local agency have been destroyed or seriously damaged as a result of a flood, hurricane, earthquake, storm, fire, or other catastrophe, except any such catastrophe caused by negligence or malicious action, and the Governor of the State certifies the need for disaster assistance and gives assurances of the expenditure of a reasonable amount of State or local funds for the same purpose. The assistance authorized under section 16 of P.L. 81-815 in the case of a "pinpoint" disaster must be made in the form of a repayable advance. The "pinpoint" disaster assistance provisions have not been implemented because of the funding situation under both P.L. 81-815 and P.L. 81-874. Public Law 91-230 approved April 13, 1970 extended the disaster provisions of both laws to June 30, 1973.

Determinations by the Commissioner

Before a local education agency or other public agency which operates schools providing technical, vocational, or other special education to children of elementary or secondary school age may become eligible for major disaster assistance, the Commissioner of Education must determine that:

1. Public elementary or secondary school facilities of such agency have been destroyed or seriously damaged as a result of the disaster;
2. Such agency is utilizing or will utilize all State and

other financial assistance available for the same purpose;

3. The agency does not have sufficient funds available to it from State, local, or other Federal sources, or from the benefits of insurance, to provide for the repair, replacement, or restoration of the facilities destroyed or seriously damaged, or to meet the cost of providing free public education for the children attending the schools of such agency; and
4. It has made provision to accept in its schools children enrolled in private elementary or secondary schools whose operation was disrupted or impaired by the disaster.

Assistance That May Be Provided

The Commissioner may authorize, upon such terms and in such amounts as he determines to be in the public interest, the additional assistance necessary for a school district to provide free public education and needed facilities.

Section 7, Title I, P.L. 81-874

Financial assistance may be given to a local education agency or a public agency which operates schools providing technical, vocational, or other special education to children of elementary and secondary school age, to the extent necessary, to help finance the normal operation of the elementary and secondary school programs; to make minor repairs to damaged facilities, replace or repair equipment, materials (including books), and teaching supplies that were damaged or destroyed; to provide temporary school facilities while those destroyed or seriously damaged are being replaced or restored; and to assist in meeting the added operating costs of a local education agency which accepts children attending a private school whose operation was disrupted or impaired by a disaster.

The amount for any fiscal year is limited to what the Commissioner determines is necessary to enable such agency, with State, local, and other Federal funds available to it for such purposes, to provide a level of education equivalent to that maintained in the schools of the agency prior to the occurrence of the disaster. The additional costs of providing an educational pro-

gram under public auspices for children enrolled in disaster-stricken private elementary and secondary schools are taken into account.

Additional assistance may be provided for a period not longer than 5 fiscal years beginning with the fiscal year in which the President determined that the area suffered a major disaster. When assistance is provided for more than 1 fiscal year, payments made during the 2d, 3d, and 4th fiscal years following the President's determination may not exceed 75 percent, 50 percent, and 25 percent, respectively, of the amount provided for the educational program for the 1st fiscal year.

Section 16, P.L. 81-815

Financial assistance may be provided under section 16 for replacing or restoring school facilities destroyed or seriously damaged as a result of a major disaster, and for construction of additional public school facilities to house children from private schools seriously damaged or destroyed and which are not to be rebuilt or repaired.

Assistance provided under the Act may not exceed the construction costs of restoration or replacement of the school facilities destroyed or damaged. Where the Commissioner determines that the district is financially able to restore or replace a facility with its own funds but does not have the funds immediately available, he may advance Federal money to the district for immediate use, such advance to be repaid upon such terms and conditions as the Commissioner may determine.

Administration

The Commissioner has delegated responsibility for administering the program for Disaster Assistance for Schools to the Division of School Assistance in Federally Affected Areas, U.S. Office of Education. Regulations were first published in the *Federal Register* on March 16, 1966. Amendments to the regulations, to reflect the amendments made by P.L. 90-247, were published on September 6, 1968.

State Education Agencies

State education agencies participate in the administration of the program for disaster assistance for schools in much the same manner as under the "affected areas" programs. Applications under these programs are submitted to the Commissioner through the State education agency. The State-designated representative is required to review the application prior to forwarding it to the Commissioner, and to certify to its accuracy and completeness. For applications under section 16 of P.L. 81-815, the State agency certifies that the proposed construction project is consistent with overall State plans for the construction of school facilities.

Applications Required

Before payment for disaster assistance may be made to a local education agency, the agency must submit an application through the appropriate State education agency in accordance with regulations prescribed by the Commissioner.

Available Funds

Under section 7 of Title I of P.L. 81-874, certain considerations determine the amount of funds an applicant has available for urgent repairs to school facilities; or for the replacement of equipment (including equipment for a facility to be financed under section 16 of P.L. 81-815), supplies, and books; or for the leasing of temporary facilities. These are: all Federal, State, and local funds made available to the public education agency specifically for disaster assistance; all proceeds from insurance on damaged facilities, equipment, materials, or supplies for which the applicant requests assistance; and any unencumbered funds that have been set aside in the nature of an insurance reserve and which are in excess of the amount needed for the normal school program for the year.

In determining the funds available for providing free public education for any fiscal year after the 1st year of application, all Federal, State, and local funds practically

available to a public education agency for providing the basic educational program are considered as available.

In assessing the amount of funds an applicant has available under section 16 of P.L. 81-815 for repairing, replacing, or restoring school facilities (exclusive of equipment) seriously damaged or totally destroyed by a disaster, the Commissioner considers as available all insurance proceeds, all Federal, State, or local funds made available to the applicant specifically for repair or replacement of disaster damage, as well as funds from the sale of bonds, funds for construction from current revenues, and other building funds committed or earmarked for the replacement of the specific facility that was damaged or destroyed.

Priorities for Approval of Applications

Whenever the Commissioner determines that appropriated funds available for any fiscal year will be inadequate to provide the financial assistance requested under all approvable applications, he will, as provided by subsections 16(c) of P.L. 81-815 and 7(d) of Title I, P.L. 81-874, establish an order of priority for approval of applications after considering the relative educational and financial needs of all public education agencies which have submitted approvable applications.

Section 7, Title I, P.L. 81-874

Priority among approvable applications is determined by the percentage that the total Federal funds for which each applicant is estimated by the Commissioner to be eligible is of the total current operating costs of the applicant as estimated by the Commissioner, including the increased costs due to the major disaster.

Section 16 of P.L. 81-815

An order of priority is determined by the Commissioner for all applications for replacement or restoration of school facilities where the relocation of students in another school building or classroom is required because of destruction of or serious damage to such facilities. The priority index of each application is determined on the basis of the percentage, in descending order, that the number of children in the school district who are so relocated is of the total memberships of all schools in the school district.

Assurances Required under Section 16, P.L. 81-815

Subsection 16(c) provides that before payment can be made an application must meet the requirements of

subsection 6(b) (1) of the Act. In addition, applicants are required to give the same assurances as applicants under other provisions of P.L. 81-815 as to compliance with Titles VI and VII of the Civil Rights Act of 1964,

as to consideration of excellence of architecture and design, and as to accessibility and use of the facilities by handicapped persons.

Appropriations

Section 16 of P.L. 81-815 and section 7 of Title I, P.L. 81-874, both authorize the appropriation of funds for each fiscal year in such amounts as may be necessary to carry out the provisions of these sections. They also enable the Commissioner of Education, pending these appropriations, to use such funds appropriated under other sections of Public Laws 81-815 and 81-874 as may be necessary for immediately providing disaster assistance.

During fiscal year 1966, the 1st year of the program, funds appropriated for Title I of P.L. 81-874 and not needed for that year were obligated for all disaster payments under both Acts. Separate accounts of obligations and expenditures for disaster assistance are maintained on a current basis. For fiscal 1970, funds appropriated for P.L. 81-874 and for P.L. 81-815 were expended for applications made under each Act.

Summary of Disaster Assistance — Fiscal Years 1966 through 1970

Between August 30, 1965, the effective date of disaster school assistance legislation, and June 30, 1970, 80 declared disasters occurred, involving 35 States and two territories. School districts in 29 of these States have submitted 470 applications for assistance. To date, 420 applications have been determined eligible. A total of \$13,808,098 has been authorized in payments under section 7 of P.L. 81-874 for applications submitted to the Office of Education. A total of \$7,060,352 has been reserved under section 16 of P.L. 81-815.

During fiscal year 1970, 26 separate disasters occurred, involving 21 States. School districts in these 21 States submitted 144 applications for assistance under section 7 of P.L. 81-874, and 3 for school construction assistance under section 16 of P.L. 81-815. Of these, 127 districts have been determined eligible, and three ineligible. A total of \$4,044,470 has been authorized for payment under section 7 of P.L. 81-874 to school districts during 1970 and \$4,328,548 was reserved for 3 applications under section 16 of P.L. 81-815.

BASIC TABLES

DATA ON WHICH this report is based are presented as of June 30, 1970, and are primarily for fiscal year 1970 for P.L. 81-874 and cumulative (1951 through 1970) for P.L. 81-815.¹ In addition, entitlements for P.L. 81-874 applicants for fiscal year 1969, adjusted to reflect current figures as of June 30, 1970, are shown. For most applicants the 1969 data are final figures.

In these basic tables, references are made to specific sections and subsections of each of the Acts. The provisions of each law and of the principal sections are covered briefly in the text of the report.

P.L. 81-874 Tables: Show applications submitted, appropriations, net entitlements, and total current expenditures of eligible applicants; number of children eligible for payment, and local contribution rate; deductions from gross entitlements; value of transportation, custodial and other maintenance services provided by other Federal agencies; provision of free public education for certain children residing on Federal property; and number and acreage of Federal properties listed in applications for financial assistance.

P.L. 81-815 Tables: Show appropriations; estimated per-pupil cost of constructing minimum school facilities; applications and projects submitted and processed; increases in school membership eligible for payment and total enrollment; projects approved (those for which Federal funds were reserved, those under con-

struction, and those completed); reservations of funds; number of classrooms provided and to be provided; and number of pupils housed and to be housed.

Immediately following the P.L. 81-815 tables is a table showing Federal funds estimated for major disaster assistance for local educational agencies in fiscal year 1970.

Symbols and Terms Used:

- (1) Three dashes (---) are used in columns of certain of the basic tables to represent zero.
- (2) "Aggregate United States" as used in the tables includes the 50 States, the District of Columbia, and those outlying areas included under the provisions of each Act.
- (3) In tables 1 and 8, Congressional districts are given for each State. In most States, one Congressional district comprises a county; in some States a county may include more than one Congressional district. In these cases the number(s) of the Congressional district follows immediately after the name of the county. In other cases, the State is represented by one or more Congressmen at large. When this is true, the name of the State is followed by "1 at large," etc. In some counties a school district may be situated in one or more Congressional districts. In the latter case the Congressional district number(s) follows the name of the school district.
- (4) "Public Law 81-874" as used in these tables does not include data for title II (financial assistance to local education agencies for the education of children of low-income families). That program is administered elsewhere in the Office of Education.

¹ For comparative data for fiscal years 1951 through 1969, see the 19 preceding Annual Reports of the Commissioner on the Administration of these Acts, available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

¹ Includes cancellation.

² Includes cost prior to cancellation.

³ Funds reserved for Architect/Engineering Services only.

⁴ Ft. Richardson Alaska—Funds reserved for Architect/Engineering Services only. If this project is funded totally, 33 additional junior high school classrooms will be provided which will house approximately 1848 pupils.

⁵ L.G. Hanscom AFB—Funds reserved for Architect/Engineering Services only. If this project is totally funded, four (4) additional elementary classrooms will be provided to house approximately 100 pupils.

¹ The figures in Columns 3 and 4 and also in columns 6 and 7 will not add to the totals because section 5 and 14 funds were reserved and approved for 28 projects. These projects are counted under Section 5 and again under Section 14, but counted only once in the total column.

² Does not include 307 reimbursable projects under Section 202.

³ The figures in columns 9 and 10 will not necessarily give the total in column 8, because there were 222 classrooms provided in 28 projects financed with Section 5 and 14 funds combined. The 222 classrooms are reported in column 9 and again in column 10, but reported only once in column 8.

⁴ The figures in columns 12 and 13 will not necessarily give the total in column 11, because there were 5,950 pupils housed in 28 projects financed with Section 5 and 14 funds combined. The 5,950 pupils are reported in column 12 and again in column 13 but reported only once in column 11.

TABLE 15.—P.L. 815, Construction of school facilities by local education agencies and by the Federal Government, by section of the Act, amount of Federal funds, number of projects, type of facilities, and capacity. Aggregate United States, fiscal years 1951-1970
