(Data); *Wages; *Working Hours

ABSTRACT

This report presents data on employment, work hours, and earnings by industry for 216 major labor areas in the United States. Employment data exclude farm workers, proprietors, self-employed, domestic workers in private homes, and unpaid family workers. Data are based on information from payroll records submitted voluntarily to State agencies by a representative sample of industrial, commercial, and government establishments, employing collectively about 30 million workers. A summary section precedes the main body of statistics. (Author/BH)

EMPLOYMENT AND EARNINGS

STATES AND AREAS 1939-70

Bulletin 1370-8

VT015729

U.S. DEPARTMENT OF LABOR—Bureau of Labor Statistics

MORE ABOUT
**EMPLOYMENT
AND EARNINGS**

STATE AND AREA NEWS RELEASES by cooperating State Agencies, present current employment, hours, earnings, and in many instances unemployment and labor turnover data for States and areas.

Available free--see addresses on inside back cover.

EMPLOYMENT AND EARNINGS, a monthly report by the Bureau of Labor Statistics, features national, State, and area statistics on employment, unemployment, hours, earnings, and labor turnover rates, plus timely analyses of current developments.

Annual subscription: \$10.00 (\$2.50 additional for foreign mailing).

Price per copy: \$1.00.

EMPLOYMENT AND EARNINGS, UNITED STATES, 1909-71 (BLS Bulletin 1312-8), covers historical national statistics for individual nonagricultural industries, including monthly and annual data from the beginning date of each series through early 1971. (Release date and price to be announced.)

HOW TO ORDER:

The monthly report *Employment and Earnings* and *Employment and Earnings, United States, 1909-71* (BLS Bulletin 1312-8), may be ordered through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 or any of the BLS Regional Offices listed on the inside back cover.

Geoffrey H. Moore, Commissioner

1971

INTRODUCTION

This bulletin is the ninth comprehensive historical reference volume of State and area employment and earnings statistics released by the Bureau of Labor Statistics, and replaces **Employment and Earnings, States and Areas, 1939-69** (BLS Bulletin 1370-7).

Consistent with previous editions, this volume is directed toward grouping together information available under the Current Employment Statistics Program for a State or area. A special section, containing analytical and summary data, precedes the main body of statistics.

Employment data relate to the nonfarm sector of the economy, and exclude proprietors, the self-employed, domestic workers in private homes, and unpaid family workers. Hours and earnings for manufacturing and mining relate to production workers, for contract construction to construction workers, and for the remaining nonagricultural components to nonsupervisory workers.

AREA COVERAGE

This edition presents detailed industry data on 216 major labor areas—most are Standard Metropolitan Statistical Areas. Definitions of all the areas may be found at the back of the book.

Data, on the following, are shown for the first time:

1. Employment, hours, and earnings—Delaware Valley, Pennsylvania.
2. Employment—Long Branch, New Jersey.
3. Hours and earnings—Lincoln, Nebraska; and Northern Virginia, Virginia.

SOURCES OF DATA

The Current Employment Statistics Program is a Federal-State undertaking conducted jointly by State employment security agencies, the Bureau of Labor Statistics, and the Manpower Administration in 44 States and the District of Columbia; in the remaining States, the program is a cooperative endeavor by State Departments of Labor and the Bureau of Labor Statistics.

Data are based on information from payroll records submitted voluntarily to State agencies

by a representative sample of industrial, commercial, and government establishments, employing collectively about 30 million workers. The Technical Note following the statistical tables describes the major characteristics of the program, such as scope, concepts, survey methods, estimating techniques, benchmark adjustments, and limitations.

INDUSTRIAL CLASSIFICATION

The industrial classification system used for these data is described in the Bureau of the Budget's **1967 Standard Industrial Classification Manual**. Industry titles are generally those recommended by the Bureau of the Budget in its standard list of short titles. All titles in this book are further identified by the appropriate SIC code(s). The specific industries selected for publication by the State agencies are generally those which best reflect the currently significant economic activities in the State or area. Available industrial detail are presented, except for "residual" groups (e.g., "other durable goods"). New series or industry combinations are introduced as shifts occur in the economy.

PUBLICATION OF CURRENT DATA

Current State and area statistics are published monthly by State agencies and may be secured upon request to the appropriate agency listed on the inside back cover of this bulletin. Timely statistics are also published by the Bureau of Labor Statistics in **Employment and Earnings**, which provides employment data for the major nonfarm industry divisions, and hours and earnings in manufacturing for all States and areas shown in this bulletin.

RELATED NATIONAL EMPLOYMENT STATISTICS

A companion volume, **Employment and Earnings, United States, 1909-71** (BLS Bulletin 1312-8), containing national data, will be released. All data in Bulletin 1312-8 will be adjusted to March 1970 benchmarks.

CAUTION

Each year the industry employment series for States and areas are adjusted to more recent benchmarks. (See page 644.) These adjustments may also affect the hours and earnings series since employment levels are used as weights. Although each of the cooperating State agencies adjusts series to benchmark data for the first quarter of the preceding year, the length of time required to accomplish this task varies among the agencies. Except as noted, all series in this volume have been adjusted to March 1970 benchmarks. Monthly data subsequent to the benchmark period, as well as the resultant annual averages, are subject to future revision.

This bulletin was prepared in the Division of Industry Employment Statistics under the direction of Robert O. Dorman. Data systems were developed under the direction of Marjorie G. Durst of the Office of Data Collection and Survey Operations.

Flint, Michigan	1963	1964
Fort Smith, Arkansas	—	1965
Grand Rapids, Michigan	1963	—
Greenville, South Carolina	1959	1959
Hartford, Connecticut	—	1968
Indianapolis, Indiana	1960	—
Jackson, Mississippi	1962	—
Kansas City, Missouri	—	1966
La Crosse, Wisconsin	1967	See individual series
Little Rock-North Little Rock, Arkansas	1963	1963
Memphis, Tennessee	1963, 1967	1963, 1967
Milwaukee, Wisconsin	1958	—
Minneapolis-St. Paul, Minnesota	1957	See individual series
Mobile, Alabama	1963	See individual series
Nashville, Tennessee	1964	1964
New Orleans, Louisiana	1958	—
Oklahoma City, Oklahoma	1958	—
Portland, Maine	1963	—
Richmond, Virginia	—	1958
Sacramento, California	1963	—
St. Louis, Missouri	1964	—
San Antonio, Texas	1959	1959
Seattle-Everett, Washington	1959	—
Stamford, Connecticut	1964	1964
Toledo, Ohio	1958	—
Tulsa, Oklahoma	1966	1967
Washington SMSA	1963	1963
Wichita, Kansas	—	—

^c Effective 1964, data exclude earnings of nonoffice salesmen and are not necessarily comparable with series for prior years.

^d Effective 1964, data relate to nonsupervisory workers. Data for prior years relate to production workers.

^e Federal employment in the Maryland and Virginia sectors of the Washington Standard Metropolitan Statistical Area is included in data for the District of Columbia.

¹ Area included in Chicago-Northwestern Indiana Standard Consolidated Area.

² Series adjusted to 1969 benchmark levels.

³ Series adjusted to 1967 benchmark levels and tabulated in accordance with the 1957 Standard Industrial Classification Manual as amended by the 1963 Supplement.

⁴ Series adjusted to 1968 benchmark levels and tabulated in accordance with the 1957 Standard Industrial Classification Manual as amended by the 1963 Supplement.

⁵ Series not necessarily comparable prior to 1958. The following estimates for 1958 are comparable with data for prior years:

MICHIGAN—Employment (in thousands):

Total, 2,119.7; mining, 14.1; contract construction, 89.6; manufacturing, 838.3; transportation and public utilities, 138.8; wholesale and retail trade, 438.5; finance, insurance, and real estate, 76.5; services, 243.7, and government, 280.1.

VERMONT—Hours and Earnings:

Manufacturing, weekly earnings, \$68.17; weekly hours, 40.1; hourly earnings, \$1.70.

⁶ Data prior to 1967 include mining.

⁷ Subarea of Philadelphia, Pennsylvania Standard Metropolitan Statistical Area.

⁸ Area included in New York-Northeastern New Jersey Standard Consolidated Area.

⁹ Subarea of Rochester Standard Metropolitan Statistical Area.

¹⁰ Subarea of New York Standard Metropolitan Statistical Area.

¹¹ Part of New York City.

¹² Includes ordnance prior to 1967. Data are continuous.

¹³ Subarea of Washington Standard Metropolitan Statistical Area.

NOTE: Miscellaneous manufacturing (SIC 39) is included as a part of nondurable goods in State and area data for the following: Maine, Massachusetts, Rhode Island, Vermont, and New York, except the New York-Northeastern New Jersey Standard Consolidated Area. All other States and areas include this industry as a part of durable goods.

Muskegon Heights		Muskegon County	
Saginaw		Saginaw County	
MINNESOTA			
Duluth-Superior		Duluth city, Minn.; Douglas County, Wis. (formerly excluded Douglas County, Wis.)	
Minneapolis-St. Paul		Anoka, Dakota, Hennepin, Ramsey, and Washington Counties (formerly excluded Washington County)	
MISSISSIPPI			
Jackson		Hinds and Rankin Counties (formerly limited to Hinds County and Beats 1 and 2 of Rankin County)	
MISSOURI			
Kansas City		Johnson and Wyandotte Counties, Kans.; Cass, Clay, Jackson, and Platte Counties, Mo. (formerly excluded Cass and Platte Counties, Mo.)	
St. Joseph		Buchanan County	
St. Louis		St. Louis city, and Franklin, Jefferson, St. Charles, and St. Louis Counties, Mo.; Madison and St. Clair Counties, Ill.; (formerly excluded Franklin County, Mo.)	
Springfield		Greene County	
MONTANA			
Billings		Yellowstone County	
Great Falls		Cascade County	
NEBRASKA			
Lincoln		Lancaster County	
Omaha		Douglas and Sarpy Counties, Nebr.; Pottawattamie County, Iowa	
NEVADA			
Las Vegas		Clark County; Beatty Township in Nye County	
Reno		Washoe County	
NEW HAMPSHIRE			
Manchester		Manchester city, and Bedford and Goffstown towns in Hillsborough County; Hooksett town in Merrimack County (formerly excluded Bedford town in Hillsborough County and Hooksett town in Merrimack County)	
NEW JERSEY			
Atlantic City		Atlantic County	
Camden		Burlington, Camden, and Gloucester Counties	
Jersey City		Hudson County	
Long Branch		Monmouth County	
Newark		Essex, Morris, and Union Counties	
Paterson-Cifton-Passaic		Bergen and Passaic Counties	
Perth Amboy		Middlesex and Somerset Counties	
Trenton		Mercer County	
NEW MEXICO			
Albuquerque		Bernalillo County	
NEW YORK			
Albany-Schenectady-Troy		Albany, Rensselaer, Saratoga, and Schenectady Counties	
Binghamton		Broome and Tioga Counties, N. Y.; Susquehanna County, Pa.	
Buffalo		Erie and Niagara Counties	
Elmira		Chemung County	
Monroe County		Monroe County	
Nassau and Suffolk Counties		Nassau and Suffolk Counties	
New York-Northeastern New Jersey		A Standard Consolidated Area comprised of New York, N. Y. SMSA; Newark, N. J. SMSA; Jersey City, N. J. SMSA; Paterson-Cifton-Passaic, N. J. SMSA; and the Perth Amboy, N. J. area	
New York SMSA		New York City, and Nassau, Rockland, Suffolk, and Westchester Counties	
New York City		Bronx, Kings, New York, Queens, and Richmond Counties	
Borough of the Bronx		Bronx County	
Borough of Brooklyn		Kings County	
Borough of Manhattan		New York County	
Borough of Queens		Queens County	
Borough of Staten Island		Richmond County	
Rochester		Livingston, Monroe, Orleans, and Wayne Counties	
Rockland		Rockland County	
Syracuse		Madison, Onondaga, and Oswego Counties	
Utica-Rome		Herkimer and Oneida Counties	
Westchester County		Westchester County	
NORTH CAROLINA			
Asheville		Buncombe County	
Charlotte		Mecklenburg and Union Counties (formerly excluded Union County)	
Greensboro-Winston-Salem-High Point		Forsyth, Guilford, Randolph, and Yadkin Counties	
Raleigh		Wake County	
NORTH DAKOTA			
Fargo-Moorhead		Cass County, N.D.; Clay County, Minn. (formerly excluded Clay County, Minn.)	
OHIO			
Akron		Portage and Summit Counties (formerly limited to Summit County)	

Area Definitions

OHIO—Continued

Canton	Stark County
Cincinnati	Clermont, Hamilton, and Warren Counties, Ohio; Boone, Campbell, and Kenton Counties, Ky.; Dearborn County, Ind. (formerly limited to Hamilton County, Ohio; Campbell and Kenton Counties, Ky.)
Cleveland	Cuyahoga, Geauga, Lake, and Medina Counties (formerly limited to Cuyahoga and Lake Counties)
Columbus	Delaware, Franklin, and Pickaway Counties (formerly limited to Franklin County)
Dayton	Greene, Miami, Montgomery, and Preble Counties (formerly excluded Preble County)
Toledo	Lucas and Wood Counties, Ohio; Monroe County, Mich. (formerly limited to Lucas County, Ohio)
Youngstown—Warren	Mahoning and Trumbull Counties

OKLAHOMA

Oklahoma City	Canadian, Cleveland, and Oklahoma Counties (formerly excluded Canadian and Cleveland Counties)
Tulsa	Creek, Osage, and Tulsa Counties (formerly excluded Creek and Osage Counties)

OREGON

Eugene	Lane County
Portland	Clackamas, Multnomah, and Washington Counties, Oreg.; Clark County, Wash.
Salem	Marion and Polk Counties

PENNSYLVANIA

Allentown—Bethlehem—Easton	Lehigh and Northampton Counties, Pa.; Warren County, N. J.
Altoona	Blair County
Delaware Valley	Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties
Erie	Erie County
Harrisburg	Cumberland, Dauphin, and Perry Counties
Johnstown	Cambria and Somerset Counties
Lancaster	Lancaster County
Philadelphia	Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa.; Burlington, Camden, and Gloucester Counties, N.J.
Pittsburgh	Allegheny, Beaver, Washington, and Westmoreland Counties
Reading	Berks County
Scranton	Lackawanna County
Wilkes—Barre—Hazleton	Luzerne County
York	Adams and York Counties

RHODE ISLAND

Providence—Pawtucket—Warwick	Central Falls, Cranston, East Providence, Pawtucket, Providence, and Woonsocket cities, and Burrillville, Cumberland, Foster, Glocester, Johnston, Lincoln, North Providence, North Smithfield, Scituate, and Smithfield towns in Providence County; Exeter, Narragansett, North Kingstown, and South Kingstown towns in Washington County; Warwick city, and Coventry, East Greenwich, West Greenwich, and West Warwick towns in Kent County; Jamestown and New Shoreham towns in Newport County; Bristol County, R.I.; Attleboro city, and North Attleboro, Rehoboth, and Seekonk towns in Bristol County; Bellingham, Franklin, Plainville, and Wrentham towns in Norfolk County; Blackstone and Millville towns in Worcester County, Mass.
------------------------------	--

SOUTH CAROLINA

Charleston	Berkeley and Charleston Counties (formerly limited to Charleston County)
Columbia	Lexington and Richland Counties
Greenville	Greenville and Pickens Counties (formerly excluded Pickens County)

SOUTH DAKOTA

Sioux Falls	Minnehaha County
-------------	------------------

TENNESSEE

Chattanooga	Hamilton County, Tenn.; Walker County, Ga.
Knoxville	Anderson, Blount, and Knox Counties; portion of Oak Ridge in Roane County

TENNESSEE—Continued

Memphis	Shelby County, Tenn.; Crittenden County, Ark. (formerly excluded Crittenden County, Ark.)
Nashville	Davidson, Sumner, and Wilson Counties (formerly excluded Sumner and Wilson Counties)

TEXAS

Amarillo	Potter and Randall Counties
Austin	Travis County
Beaumont—Port Arthur—Orange	Jefferson and Orange Counties
Corpus Christi	Nueces and San Patricio Counties
Dallas	Collin, Dallas, Denton, Ellis, Kaufman, and Rockwall Counties
El Paso	El Paso County
Fort Worth	Johnson and Tarrant Counties
Galveston—Texas City	Galveston County
Houston	Brazoria, Fort Bend, Harris, Liberty, and Montgomery Counties
Lubbock	Lubbock County
San Antonio	Bexar and Guadalupe Counties (formerly limited to Bexar County)
Waco	McLennan County
Wichita Falls	Archer and Wichita Counties

UTAH

Salt Lake City	Bountiful, Centerville, Farmington, North Salt Lake, South Bountiful, and West Bountiful precincts in Davis County; Salt Lake County
----------------	--

VERMONT

Burlington	Chittenden County; Grand Isle and South Hero towns in Grand Isle County
Springfield	Athens, Grafton, Londonderry, Rockingham (includes Bellows Falls), Westminster, and Windham towns in Windham County; Andover, Baltimore, Cavendish, Chester, Ludlow, Reading, Springfield, Weathersfield, Weston, West Windsor, and Windsor towns in Windsor County

VIRGINIA

Lynchburg	Lynchburg city, and Amherst and Campbell Counties
Newport News—Hampton	Newport News and Hampton cities, and York County
Norfolk—Portsmouth	Chesapeake, Norfolk, Portsmouth, and Virginia Beach cities
Northern Virginia	Alexandria, Fairfax, and Falls Church cities, and Arlington, Fairfax, Loudoun, and Prince William Counties
Richmond	Richmond city, and Chesterfield, Hanover, and Henrico Counties (formerly excluded Hanover County)
Roanoke	Roanoke and Salem cities and Roanoke County

WASHINGTON

Seattle—Everett	King and Snohomish Counties (formerly excluded Snohomish County)
Spokane	Spokane County
Tacoma	Pierce County

WEST VIRGINIA

Charleston	Kanawha County
Huntington—Ashland	Cabell and Wayne Counties, W. Va.; Boyd County, Ky.; Lawrence County, Ohio
Wheeling	Marshall and Ohio Counties, W. Va.; Belmont County, Ohio

WISCONSIN

Green Bay	Brown County
Kenosha	Kenosha County
La Crosse	La Crosse County (hours and earnings prior to 1966 limited to La Crosse city)
Madison	Dane County
Milwaukee	Milwaukee, Ozaukee, Washington, and Waukesha Counties (employment, and hours and earnings prior to 1967 do not include Washington County; employment, and hours and earnings prior to 1963 do not include Ozaukee County)
Racine	Racine County

WYOMING

Casper	Natrona County
Cheyenne	Laramie County

Technical Note

TECHNICAL NOTE

Measuring Employment, Hours, and Earnings in States and Areas

INTRODUCTION

The Current Employment Statistics Program is an integrated Federal-State undertaking, designed to produce estimates of nonfarm employment, hours, and earnings at the national, State, and area levels. It is conducted jointly by State employment security agencies, the Bureau of Labor Statistics, and the Manpower Administration in 44 States and the District of Columbia; in the remaining States, the program is a cooperative endeavor by State Departments of Labor and the BLS. The Bureau of Labor Statistics has contracted with these State agencies for collecting the data from establishments. Estimates are prepared and published monthly for each State and for major areas.

COLLECTION

Federal-State Cooperation. Under cooperative arrangements with State agencies, the respondent fills out only one reporting form, which is used for national, State, and area estimates. This eliminates duplicate reporting on the part of respondents, and together with the use of identical techniques at the national and State levels, insures maximum geographic comparability of estimates.

State agencies mail the forms to the establishments and examine the returns for consistency, accuracy, and completeness. After the States use the information to prepare State and area series, the source materials are sent to the BLS for use in developing estimates at the national level.

Shuttle Schedules. Form BLS 790—Monthly Report on Employment, Payroll, and Hours—is used to collect employment, payroll, and man-hours data. This schedule is of the "shuttle" type, with space for each month of the calendar year. The schedule is returned to the respondent each month by the State agency so that the next month's data can be entered. This procedure promotes maximum comparability and accuracy of reporting, since the respondent can see the figures he has reported for previous months.

The BLS 790 provides for entry of data on the number of full- and part-time workers on the payrolls of nonagricultural establishments, and, for most industries, payroll and man-hours of production and related workers, construction workers, or nonsupervisory workers for the pay period which includes the 12th of the month.

CONCEPTS

Industrial Classification. Establishments are classified into industries on the basis of their principal product or activity, in accordance with the **1967 Standard Industrial Classification Manual**. The classification is determined from information on annual sales volume collected each

year on a supplement to the monthly report. If an establishment makes more than one product or engages in more than one activity, the entire employment of the establishment is included under the industry indicated by the most important product or activity.

Industry Employment. Employment data, except for the Department of Defense, refer to persons on establishment payrolls who received pay for any part of the pay period which includes the 12th of the month. For civilian employees of the Department of Defense establishments, the figures represent the number of persons who occupied positions on the last day of the calendar month; intermittent workers are counted if they performed any service during the month.

The data exclude proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; Federal military personnel are excluded from the estimates of total nonagricultural employment.

Persons on an establishment payroll who are on paid sick leave (when pay is received directly from the firm), on paid holiday or paid vacation, or who work during any part of the pay period and are unemployed or on strike during the rest of the period, are counted as employed. Not counted as employed are persons who are laid off, on leave without pay or on strike for the entire period, or who are hired but do not report to work during the period.

Industry Hours and Earnings. Hours and earnings data are derived from reports of payroll and man-hours for production and related workers in mining and manufacturing, construction workers in contract construction, and nonsupervisory employees in all other industries. When the reported pay period exceeds one week, the payroll and man-hour figures are reduced to a weekly basis. The above items are further defined as follows:

Production and related workers include working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and record-keeping and other services closely associated with the above production operations.

Construction workers include the following employees in the contract construction division: Working foremen, journeymen, mechanics, apprentices, laborers, etc., whether working at the site of construction or in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairmen, salespersons, operators, drivers, attendants, service employees, linemen, laborers, janitors, watchmen, and similar occupational levels, and other employees whose services are closely associated with those of the employees listed.

Payroll covers the payroll for full- and part-time production, construction, or non-supervisory workers who received pay for any part of the pay period which includes the 12th of the month. The payroll is reported before deductions of any kind, e.g., for old-age and unemployment insurance, group insurance, withholding tax, bonds, or union dues; also included is pay for overtime, holidays, vacations, and sick leave paid directly by the firms. Bonuses (unless earned and paid regularly each pay period), other pay not earned in pay period reported (e.g., retroactive pay), and the value of free rent, fuel, meals, or other payment in kind are excluded.

Man-hours cover man-hours worked or paid for, during the pay period which includes the 12th of the month, for production, construction, or nonsupervisory workers. The man-hours include hours paid for holidays and vacations, and for sick leave when pay is received directly from the firm.

Average Hourly and Weekly Earnings. Average hourly earnings for manufacturing and nonmanufacturing industries are on a "gross" basis, reflecting not only changes in basic hourly and incentive wage rates, but also such variable factors as premium pay for overtime and late-shift work, and changes in output of workers paid on an incentive plan. Shifts in total volume of employment between relatively high-paid and low-paid work and changes in workers' earnings in individual establishments also affect the general earnings averages. Averages for groups and divisions further reflect changes in average hourly earnings for individual industries.

Averages of hourly earnings differ from wage rates. Earnings are the actual return to the worker, while rates are the amounts stipulated for a given unit of work or time. The earnings series do not measure the level of total labor costs to the employer since the following are excluded: Irregular bonuses, retroactive items, payments of various welfare benefits, payroll taxes paid by employers, and earnings by employees not covered under the production-worker, or construction-worker, or nonsupervisory-employee definitions.

Gross average weekly earnings in most cases are derived by multiplying average weekly hours by average hourly earnings. Therefore, weekly earnings are affected not only by changes in gross average hourly earnings, but also by changes in the length of the workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Average Weekly Hours. The workweek information relates to the average hours for which pay was received, and differs from standard or scheduled hours. Such factors as absenteeism, labor turnover, part-time work, and stoppages cause average weekly hours to be lower than scheduled hours of work for an establishment. Group averages further reflect differences in the workweek of component industries.

ESTIMATING METHODS

EMPLOYMENT. The principal features of the procedure used to estimate employment for the industry statistics

are (1) the use of the "link relative" technique, which is a form of ratio estimation, and (2) periodic adjustment of employment levels to new benchmarks.

The "Link Relative" Technique. From a sample of establishments, which reported for both the previous and current months, the ratio of current month employment to that of the previous month is computed. The estimates of employment (all employees, including both production and nonproduction workers) for the current month are obtained by multiplying the estimates for the previous month by these "link relatives."

At the aggregate industry level, i.e., divisions and groups, employment is the sum of the employment estimates for component industries. Annual average employment is the sum of the monthly estimates divided by 12.

Benchmark Adjustment. Each year employment estimates are compared with comprehensive counts of employment, which provide "benchmarks" for the various industries defined as nonagricultural, and appropriate adjustments are made as indicated. Normally, benchmark adjustments are made annually.

The primary source of benchmark information is the employment data, by industry, compiled quarterly by State agencies from reports of establishments covered under State unemployment insurance laws. These reports, covering about three-fourths of the total nonfarm employment in the United States, are collected and tabulated by State employment security agencies under the direction of the Manpower Administration. Benchmark data for the residual are obtained from the records of the Social Security Administration, the Interstate Commerce Commission, and a number of other agencies in private industry or government.

The estimates relating to the benchmark month are compared with the new benchmark levels, industry by industry. If revisions are necessary, the monthly series of estimates are adjusted between the new benchmark and the preceding one and the new benchmark for each industry is then carried forward progressively to the current month on the basis of trends shown in the sample. Under this procedure, the benchmark is used to establish the level of employment, while the sample is used to measure the month-to-month changes in the level.

Data for the periods subsequent to the last benchmark are subject to revision.

HOURS AND EARNINGS. These estimates are based on the sample that reported on employment. Estimates of average weekly hours and average hourly and weekly earnings apply only to production, construction, or nonsupervisory workers as distinguished from all employees.

For individual industries, monthly estimates of average weekly hours are obtained by dividing man-hours by production workers (or construction, or nonsupervisory workers). Average hourly earnings are computed by dividing payrolls by man-hours. Industry group and division averages are obtained by weighting the averages for individual industries by production-worker employment or production-worker man-hour aggregates in the particular groups or divisions.

To obtain annual averages of average weekly hours, the 12-month total of aggregate man-hours (average weekly hours multiplied by production-worker employment) is divided by the 12-month total of employment. The 12-month total of aggregate payrolls (weekly earnings multiplied by employment weights or hourly earnings multiplied by aggregate man-hours) is divided by the 12-month total of aggregate man-hours to yield average hourly earnings.

Average weekly earnings, except for industries where man-hours data are not collected, are the product of average weekly hours and average hourly earnings.

THE SAMPLE

Design. The sampling plan used in the survey is particularly well suited for a sample of establishments. It is an optimum allocation design known as "sampling proportionate to average size of establishment." The universe of establishments is stratified first by industry and then within each industry by size of establishment in terms of employment. For each industry the total size of sample is distributed among the size class cells on the basis of the ratio of employment in each cell to total employment in the industry. Within each stratum, the sample members are selected at random.

Under this design, large establishments fall into the sample with certainty. However, the proportion of total employment covered varies considerably from industry to industry. For example, sample coverage is high (65 percent on the average) in manufacturing industries in which a high proportion of total employment is concentrated in relatively few establishments. On the other hand, coverage is much lower (20 percent) in wholesale and retail trade industries which are made up of many small establishments. The large sample in manufacturing is also desirable because manufacturing industries have a greater tendency to fluctuate from regular cyclical or seasonal patterns than nonmanufacturing industries.

Reliability of the Employment Estimates. The estimates derived from the employment and payroll survey may differ from the figures that would have been obtained if it were possible to take a complete census using the same schedules and procedures. However, the relatively large size of the samples maintained by the State agencies and the annual adjustment of employment estimates to more recent benchmark levels assure a very high degree of accuracy. One measure of the reliability of an estimate projected from a benchmark is the amount by which it differs from the new benchmark at the next adjustment period. The BLS uses this criterion rather than the standard error of the estimates. Average benchmark revisions to State and area estimates for recent years are presented in Table 1. As indicated by Table 2, differences between estimates and benchmarks are concentrated in the ranges of less than 1.0 percent.

Table 1. Average percentage difference¹ between State and area benchmarks and estimates, by industry division, 1967-70

Industry division	1967		1968		1969		1970	
	States	Areas	States	Areas	States	Areas	States	Areas
Total	0.6	0.8	0.8	0.9	0.8	1.0	0.5	0.9
Mining	3.0	4.1	3.3	6.1	3.2	4.8	1.6	5.8
Contract construction	4.6	6.0	3.4	5.1	3.1	4.8	4.9	5.5
Manufacturing	1.0	1.2	.8	.9	1.2	1.0	0.8	1.4
Transportation and public utilities	1.3	1.9	1.1	1.5	1.5	1.9	1.5	2.3
Wholesale and retail trade	1.1	1.5	1.0	1.4	1.0	1.3	0.9	1.5
Finance, insurance, and real estate	1.3	1.0	1.5	1.8	1.0	1.6	1.3	1.5
Services	1.7	1.9	1.8	2.1	1.6	2.0	1.5	1.5
Government	1.0	1.6	.6	1.4	1.5	1.3	0.9	1.0

¹ Weighted by employment.

Table 2. Distribution of the percentage differences between State and area benchmarks and estimates for total nonagricultural employment, 1967-70

Percent difference	1967		1968		1969		1970	
	States	Areas	States	Areas	States	Areas	States	Areas
Total	51	170	51	184	51	177	50	193
Less than 0.5 percent	23	55	15	57	15	46	27	56
0.5 to 0.9 percent	13	37	20	37	19	42	8	41
1.0 to 1.9 percent	11	51	14	49	10	47	10	59
2.0 to 2.9 percent	2	14	2	26	6	26	4	24
3.0 to 3.9 percent	1	9	0	11	1	11	0	7
4.0 to 4.9 percent	1	1	0	3	0	2	1	2
5.0 percent and over	0	3	0	1	0	3	0	4

Differences between the benchmarks and the estimates, result from not only sampling and response errors but also from changes in the industrial classification of individual establishments (resulting from changes in their product), which are not reflected in the estimate levels until the data are adjusted to new benchmarks. At the more detailed industry levels, particularly within manufacturing, changes in classification are often the major causes of benchmark adjustments. Another cause of differences, generally minor, between the estimates and the benchmark arises from improvements in the quality of the benchmark data.

For employment, the sum of the State figures may differ slightly from the equivalent official U.S. totals on a national basis, because some States have more recent benchmarks than others and because of the effects of differing industrial and geographic stratification.

COMPARABILITY WITH OTHER SERIES

County Business Patterns. Data in this joint publication by the U.S. Departments of Commerce and Health, Education, and Welfare, differ from BLS establishment statistics in the treatment of central administrative offices and auxiliary units, in industrial classification, and reporting differences. In addition, CBP coverage is incomplete for some nonprofit activities, and interstate railroads and government are excluded.

Employment Covered by State Unemployment Insurance Programs. Not all nonfarm wage and salary workers are covered by the unemployment insurance programs. All workers in certain activities, such as interstate railroads, are excluded. Also many States exclude small firms (in general, establishments with fewer than four employees) in covered industries. Beginning in 1972, these establishments will be covered.

Statistics on Manufactures and Business, Bureau of the Census. BLS establishment statistics on employment differ from employment counts derived by the Bureau of the Census from its censuses or annual sample surveys of manufacturing establishments and the censuses of business establishments. The major reasons for some noncomparability are different treatment of business units considered parts of an establishment, such as central administrative offices and auxiliary units, the industrial classification of establishments, and different reporting patterns of multiunit companies. There are also differences in the scope of the industries covered, e.g., the Census of Business excludes professional services, public

utilities, and financial establishments, whereas these are included in BLS statistics.

Statistics on State and Local Government, Bureau of the Census. BLS statistics on State and local government employment differ slightly from the employment counts of the Bureau of the Census in its censuses and annual sample surveys. BLS excludes and Census includes certain nominal employment (such as paid elected officials of small cities) and Federal-State cooperative extension personnel serving under a Federal appointment. BLS classifies employees of local government libraries in education whereas Census includes them under other local functions. BLS counts employees in the State of the physical location of the job, but Census includes them in the State where the official personnel records are kept.

Federal Employment Statistical Bulletin, U.S. Civil Service Commission. The BLS Federal employment series by

State are derived from statistics based on coverage under Unemployment Compensation for Federal Employees. The Civil Service Commission Bulletin data, published for one month of each quarter, are based on reports collected by CSC. The BLS data include and CSC data exclude Defense Department workers paid from nonappropriated funds, employees of certain local agricultural committees of the Department of Agriculture, and Federal-State cooperative employees serving under a Federal appointment. The BLS data exclude and CSC data include a count of employees paid on a contract or fee basis, and certain interns, student nurses, and other student employees of Federal hospitals. BLS employment (except for Defense Department units) is for the pay period including the 12th of the month whereas the CSC count represents the number of persons employed on the last work day of the month plus all intermittent employees during the month.
