PREFACE

The Commissioner of Education, in accordance with the congressional directive set forth in Title IV: General Provisions Concerning Education, of Public Law 90-247 as amended by Public Law 91-230, section 413, has compiled this catalog and its indexes. The descriptive information is derived from the *Catalog of Federal Domestic Assistance*, issued annually by the Office of Management and Budget. The selection of programs for inclusion and the design and choice of indexes have been based on a desire to assist the potential program beneficiary to find and take advantage of all Federal education assistance programs available to him.

The information contained in the catalog is subject to the standard forces of variability over time, especially in the structure of programs and the levels of funding estimated. Users of the catalog should therefore check with administering units for current information on specific programs.

Federal Education Assistance Catalog

INTRODUCTION

The *Catalog of Federal Education Assistance* is composed of brief descriptions of, and extensive indexes to, Federal programs which provide educational benefits to the American public. It includes all programs administered by the U. S. Office of Education as well as programs administered by other Federal agencies in support of educational services, professional training, or library services available to the general public.

Each program is described in terms of the specific type of assistance provided, the purpose for which it is available, who can apply for it and how to apply. The Federal offices to contact for additional information on each program are identified.

The catalog includes various programs, activities, and services which can be requested or applied for by a State or States, territorial possession, county, city, other political subdivision, grouping, or instrumentality thereof; any domestic profit or nonprofit corporation, institution, or individual, other than an agency of the Federal Government. It includes:

- Grants, loans, loan guarantees, scholarships, mortgage loans, and insurance or other types of financial assistance.
- Assistance in the form of provision of Federal property, facilities, equipment, goods or services, including the donation of surplus real and personal property.
- Technical assistance, counseling, and professional training.

The catalog does not include:

- Benefits or assistance available only to current employees of the Federal Government, either civilian or military.
- Federal procurement or contracting which is normally conducted through solicited competitive bidding.

HOW TO USE THE CATALOG

How the Catalog Is Organized

The catalog provides seven different indexes to help the user identify Federal programs that provide the type of assistance he is seeking. Each program as shown on a program description page is identified by a unique program number. (e.g. 13.430).

Several indexing techniques were utilized. Some are based on the traditional hierarchical structure. Others apply the philosophy that the actual word appearing in the text is the word that a user expects to find in the index. In addition to the index word, some of the context surrounding the word is shown so that the user may glean some insight as to how the word is used for each given citation of a program. Program citations are given in terms of the program identification number.

The key-word-in-context index that is used in this catalog for the program name, popular name, beneficiary information, and general indexes deserves a few words of explanation.

Shown alphabetically down the center of each page are the indexed words or phrases, and to the left and right of each word or phrase, the actual context in which it is used. This combination of context coupled with the alphabetical sequencing of the words following the indexed words makes it easier for the user to locate which of the many references to a given word is of particular interest to him.

The following annotated example of a key-word-in-context index should illustrate its general features.

- **PROGRAM DESCRIPTIONS** - This portion of the catalog contains detailed descriptions of the Federal Domestic Assistance Programs related to education. It is arranged in program number sequence, assigned in blocks by agency.

- **INDEXES** -

Program Name Index (key-word-in-context) which lists alphabetically each program by name, including popular name. Each program name is permuted so that it appears in this index under each significant word in its name. Popular names are shown in parentheses.

Authorization Index (hierarchical) which cites assistance programs according to the name, including popular name, of the act that authorized each program.

Public Law Index (hierarchical) which lists assistance programs according to the Public Law citation of the act that authorized each program.

U. S. Code Index (hierarchical) which lists assistance programs according to the U. S. Code citation of the act that authorized each program.

Administering Agency Index (hierarchical) which lists alphabetically each administering agency by name, citing all assistance programs over which each has jurisdiction. Office of Education programs are indexed to Division level.

Beneficiary Information Index (key-word-in-context) which lists key words and phrases of the beneficiary eligibility section for each assistance program.

General Index (key-word-in-context) which lists key words and phrases from selected portions of each assistance program description to provide a comprehensive general index to complement the more specific indexes mentioned above.

How To Find Programs that Provide Desired Assistance

Each index cites a program number. A full description of each assistance program is found in the first part of this volume in program number sequence. Program numbers are the same as those used in the *OMB Catalog of Federal Domestic Assistance*.

Which index to check first depends on what knowledge the user already has concerning the programs he wants to locate.

For example, if the user knows the assistance *program name* or *popular name*, *enabling act name*, *Public Law* or *U. S. Code* citation of the enabling act or the name of the *administering agency*, he would look at one of the first five indexes for a reference to a specific program number.

To locate all programs that name a specific type of beneficiary, (for example, U. S. citizen, registered nurse, widow, etc.) check *Beneficiary Information Index*. This will cite a program which can be found in the first part of this volume.

The *General Index* provides a listing of key words and phrases as they appear in the full program descriptions. It is the most comprehensive index, designed to be supplemented by the specific types of indexes mentioned above. It requires no knowledge of the existing Federal programs nor does it require assumptions concerning how an indexer may have described the program. The actual text of the program descriptions provides the index terms. The user should consider synonyms to his primary choice of terms in order to achieve a comprehensive search.

OBJECTIVES: To assist in provision of vitally needed educational services and to support local projects designed to demonstrate innovative and exemplary models of meeting the state's identified critical educational needs. Funds are also used to support state and local programs of guidance, counseling, and testing.

TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Innovative and exemplary projects which are designed to demonstrate solutions to the critical educational needs of the state, as specified in the state plan, are eligible for support. At least 15 percent of the funds must be reserved for special programs for handicapped children. For the purposes of guidance, counseling, and testing programs, each state must expend no less than 50 percent of the amount expended from fiscal year 1970 Federal grant funds for the purposes of Title V-A of the National Defense Education Act, which formerly authorized the guidance, counseling, and testing program. The Commissioner of Education is authorized to arrange for the testing of nonpublic school students in any state in which the state provides such testing in public schools, but is not authorized by law to make payments for such testing in nonpublic schools. An invitation to bid on testing materials and/or services is sent to test agencies by the Office of Education.

Applicant Eligibility: State education agencies submit state plans annually to the Commissioner of Education for approval and release of allotted funds.

Beneficiary Eligibility: Public and nonprofit private schools are eligible to participate in services and projects provided by and administered through local education agencies which submit proposal for grants to the state education agency.

An amount not more than 3 percent of the total allotment is made available for outlying areas and schools operated by the Bureau of Indian Affairs. The institutional contribution may appear as any item or group of items in the budget, including direct and indirect costs.

Length and Time Phasing of Assistance: Planning Grants are awarded ordinarily for a period of about 1 year. Development Grants cover a period of 3 to 5 years. Time phasing: Quarterly (Monthly when over \$100,000).

(NSYSP)**

FEDERAL AGENCY: PRESIDENT'S COUNCIL ON PHYSICAL FITNESS
AND SPORTS

AUTHORIZATION: Executive Order 11562, September 25, 1970.

OBJECTIVES: To join the resources of the U.S. Government with the facilities and professional expertise of the colleges and universities throughout the country in making the sports experience available to, mainly, inner-city poor girls and boys, whose social and economic environment, for the most part, has previously denied them opportunity to participate in sports on any supervised and instructional basis.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: Federal funds are used to defray the given college's direct costs in the following categories; personnel staffing, medical examination and follow-up, daily meal, medical and liability insurance, capital equipment depreciation attributable to the NSYSP, replacement of expendable supplies used in the program. A given college project must have average attendance of at least 200 students per day, 90 percent of whom must be residents of designated poverty areas. Programs must operate at least 4 days per week, at least 5 weeks of the summer. Direct costs only are reimbursable. A given college contribution is in-kind, i.e., capital facilities, capital equipment, etc., and the services of a full-time program director paid by the college.

Applicant Eligibility: Schools apply to the National Collegiate Athletic Association for participation in the NSYSP. The school need not be an NCAA member. Application forms are available from the NCAA at its headquarters in Kansas City, Missouri.

Beneficiary Eligibility: Same as applicant eligibility.

Credentials/Documentation: NCAA-NSYSP application forms when completed constitute the necessary documentation for application.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: To the National Collegiate Athletic Association, Midland Building, 1221 Baltimore Avenue, Kansas City, Missouri 64105, for forms.

Award Procedure: Applications received by the NCAA are considered by the NSYSP Administrative Committee made up of NCAA members and PCPFS staff. Awards are made on the basis of number of poor in the target area as well as the capability to carry on an effective project.

Deadlines: None specific. Generally, school application should be in hands of NCAA by March 1.

Range of Approval/Disapproval Time: Approximately 30 days from receipt of application.

Appeals: None.

Renewals: Each school application is judged each summer on the basis of youth need, college capability and, if a previous program participant, the record of the school in carrying out the project.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Participating schools become subcontractors of the NCAA. Upon demonstration of cost incurred at the school for its NSYSP project, the NCAA

reimburses the school for its direct costs. Three progress payments are made during the project duration, one which precedes the program, the last of which is made after the school has submitted its final voucher. The value of the school's in-kind contribution must be at least 20 percent of the total project valuation (school contribution plus Federal funds equals total project value).

Length and Time Phasing of Assistance: Duration of project plus final cost vouchering and reimbursement. Generally, this period is approximately 4 months. One-third of subcontractor value prior to project beginning, one third halfway through project, last payment includes all remaining costs and is the final payment.
