DESCRIPTORS *Abstracts; *Bibliographies; *Exceptional Child Education; Handicapped Children; *Nonprofessional Personnel; *Teacher Aides

ABSTRACT

The selected bibliography on teacher aides and nonprofessional personnel who work with handicapped children contains an explanation of indexing and approximately 100 abstracts to be drawn from the computer file of abstracts representing the Council for Exceptional Children Information Center's complete holdings as of August, 1972. Abstracts are said to be chosen using the criteria of availability of document to user, currency, information value, author's reputation, and classical content. Preliminary information explains how to read the abstract (a sample abstract is included which identifies the different parts of the abstract), how to use the author and subject indexes, how to purchase documents through the Educational Resources Information Center Document Reproduction Service (four order blanks are provided), an order blank for Exceptional Child Education Abstracts in which the abstracts are originally published, a list of indexing terms searched to compile the bibliography, and a list of journals from which articles are abstracted for the bibliography. Publication date of documents ranges from 1965 to 1971. (DB)

EC 051 1000

The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Special Education IMC/RMC Network. In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

How to Use This Bibliography

The *Exceptional Child Bibliography Series* was initiated by the CEC Information Center to answer the need for rapid responses to specific requests for information. The volume of information requests received by the Center is analyzed and used as a guide in preparing special topic bibliographies in the field of exceptional child education. Abstracts contained in the bibliographies are drawn from the computer file of abstracts which represents the CEC Information Center's complete holdings as of the date indicated on each bibliography.

Selective editing by Information Specialists is performed on each bibliography. From the total number of abstracts drawn from the file on a particular topic, selection is made of only those judged to best meet the following criteria: availability of the document to the user, currency, information value, author's reputation, and classical content. The number of abstracts selected to appear in a bibliography may vary from one to 100, depending on the amount of suitable information available. Updating of bibliographies as new material becomes available is accomplished when the volume of new material reaches 25 percent of presently available material on a given topic.

How to Read the Abstract

Each abstract contains three sections—bibliographic data, descriptors, and a summary of the document. The bibliographic section provides the document's identifying number (ED and/or EC), publication date, author, title, source, and availability. The descriptors indicate the subjects with which a document deals. The summary provides a comprehensive overview of the document's contents and in some cases document availability is announced here.

How to Use the Indexes

Some bibliographies in *Exceptional Children Bibliography Series* contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

How to Purchase Documents

Documents with an ED number and EDRS availability indicated may be purchased from the ERIC Document Reproduction Service (EDRS). For your convenience an order form is provided on the back cover of this bibliography.

Abstracts appearing in the bibliographies have also been published in *Exceptional Child Education Abstracts*, the quarterly abstract publication of the Council for Exceptional Children. Approximately 750 abstracts covering the broad range of exceptionality appear in each issue. (Subscription order form below.)

ABSTRACT 10078

EC 0 0078 ED 012 985
Publ. Date May 66 103p.
Role of the Cottage Personnel in Residential Care Facilities.
National Assn. for Retarded Children,
New York, New York,
American Assn. of Mental Deficiency,
Washington, D. C.
EDRS mf,hc

Descriptors: exceptional child education; personnel; mentally handicapped; attendants; inservice programs; attendant training; residential care; residential centers; trainable mentally handicapped; educable mentally handicapped; child care; federal aid; custodial mentally handicapped; medical services; supervisory education; supervisors; grants; program descriptions; teaching methods; inservice education; attitudes; Colorado; E R Johnstone Center; National Institute of Mental Health; Columbus State School; Southern Regional Education Board

Focusing on the cottage attendant as an educator and rehabilitator in residential centers, these papers presented at the 89th meeting of the American Association of Mental Deficiency in June 1965 discuss training programs for attendants and supervisors of attendants. Objectives and techniques from the Columbus State School (Ohio) and the Pinehurst State School (Louisiana) are cited and interrelationships between ward personnel and professional staff are examined. A survey made at the Rainier School (Washington) and the Fircrest School (Washington) reports counselor attitudes toward duties and relationships to parents. Available resources for the study and establishment of inservice training programs through National Institute of Mental Health programs, procedures used for review of grant applications, and suggestions for those applying for grants are outlined. The attendant counselor program at the Colorado State Home and Training School (Wheat Ridge) is discussed in terms of growth, content of program, and an evaluation. A 27-page outline of topics and teaching methods is presented. Evaluation of the program was conducted by means of a questionnaire. Ratings of topics in the training program are presented along with planned changes. Reference lists or bibliographies accompany several of the articles. (CF)

Teacher Aides and Nonprofessional Personnel

Supportive Personnel in Speech Pathology and Audiology.
Kansas University, Lawrence
Hearing and Speech News, Volume 35,
1967.
EDRS not available

Descriptors: exceptional child education; speech handicapped; personnel; recruitment; needs; nonprofessional personnel; professional personnel; speech pathology; audiology

The personnel shortage in speech pathology and audiology is discussed in the areas of direct service, education and training, and research. Possible solutions are explored--recruitment and training of additional professional personnel, an analysis of manpower utilization in speech and hearing, and other alternatives of funding, programing, case selections and evaluation, training, and use of supportive personnel. The use of supportive personnel in health related fields and in speech pathology and audiology is explored. Various problems in the use of supportive personnel are discussed definitions, status and recognition, role, education, recruitment, and relation with professional personnel. A reference list cites nine items. This article was published in Hearing and Speech News, Volume 35, Number 4, pages 32-40, July 1967. (JB)

Leibrock, John Beecher
Manual of Skilled Houseparentry.
EDRS not available

Descriptors: exceptional child services; delinquency; emotionally disturbed; personnel; institutionalized (persons); institutional environment; institutional personnel; nonprofessional personnel; adolescents; socially maladjusted; socially deviant behavior; rehabilitation programs; residential programs; qualifications; scheduling; youth agencies; management; staff role; males

Written by a former houseparent who has the responsibility for indoctrinating new houseparent personnel, the book examines what is required of mature, effective houseparents in a residential setting which serves disturbed adolescents. Topics on treatment include the treatment team, houseparents and emotions, a houseparent speaks out, so you want to be a houseparent, the runaway boy, togetherness, adolescence, relationship, delinquency, and staff responsibility in a child care agency. Information contained in a houseparent manual of

daily procedures treats the following--general cottage management, arising, chores, meals, shifting boys between areas, procedure of daily contact, the weekly cottage team meeting, staff committee procedures, intake, unauthorized items, transfer of cottage responsibility, end of day procedures, and the status of houseparents. This document was published by the Whitmore Publishing Company, Philadelphia, Pennsylvania, and is available for \$3.00. (DF)

Descriptors: exceptional child education; personnel; mentally handicapped; manpower needs; manpower development; personnel needs; teacher education; educable mentally handicapped; trainable mentally handicapped; behavior change; administrative personnel; administrator background; credentials; clinics; visiting homemakers; educational programs; community programs; community service programs; community services; standards; qualifications; nonprofessional personnel

The dilemma of an increasing need for educational and training programs for the mentally retarded and an increasing shortage of well qualified teachers leads to consideration of more efficient teaching methods or a greater manpower pool. Three jobs are explained in which personnel work under the supervision of a fully qualified person--teaching assistants in educable mentally retarded classes (not aides), trainable class teachers, and behavior shaping technicians. Additional needs could be met by training personnel for the development and coordination of community programs. Jobs that might be filled by persons with 2 years of college and practicum training are those of executive directors of associations for retarded children, mental retardation referral clinic workers, and homemaker service directors. This article was published in The Community College in Mental Health Training, Chapter 9, Report of a Conference to Explore the Role of the Community College in Training Mental Health Workers, pages 59-62, April 1966. Needs of Vocational Rehabilitation Clients Which Could Be Met by Middle-Level Mental Workers.

Southern Regional Education Board, Atlanta, Ga.

National Institute of Mental Health, Bethesda, Md.

EDRS not available

Descriptors: exceptional child services; vocational rehabilitation; personnel; counseling; mental health programs; vocational counseling; mental illness; manpower needs; institutional personnel; personnel needs; rehabilitation programs; counselors; counselor training; manpower development; counselor qualifications; counseling programs; guidance programs; institutionalized (persons); staff role; individual needs; nonprofessional personnel; emotional adjustment; psychiatric hospitals; community resources

The needs of vocational rehabilitation clients are discussed. Eight of those needs which could be met by middle-level mental health workers are explained--program orientation and clarification, psychological isolation reduced, treatment center resources mobilized, occupational exploration and training, social skills developed, self confidence and motivation, family and community support, and community resources mobilized. This article was published in *The Community College in Mental Health Training*, Chapter 14, Report of a Conference to Explore the Role of the Community College in Training Mental Health Workers, pages 75-79, April 1966. Descriptors: exceptional child education; administration; learning disabilities; emotionally disturbed; neurologically handicapped; curriculum; behavior change; children; class management; elementary grades; interprofessional relationship; parent school relationship; records (forms); teacher aides; teacher role; teaching guides; testing; physical facilities; program descriptions

Intended for teachers this manual resulted from a special workshop held in 1966 to plan a better program for emotionally disturbed and neurologically impaired elementary school age students. Admission policy, administration of both types of classes, and the duties of the teacher and teacher's aide are described. Relationships with parents, the principal, supportive personnel, student teachers,

and non-teaching personnel are discussed. The philosophy and techniques of management of behavior are presented. The academic program for the neurologically impaired which includes training for general academic improvement, improvement of perception, reading, handwriting, language and spelling, and mathematics is presented. Sources of materials are listed. Problems in testing intelligence and achievement and in preparing student reports and records are noted and some suggestions are given. Physical facilities for the class are described. Appendixes give examples of a report card and a check list of academic skills and behavior traits of brain-injured children. The bibliography lists 33 items. (JA)

Descriptors: exceptional child research; mentally handicapped; program planning; curriculum; personnel; attendants; attendant training; inservice programs; curriculum development; program evaluation; institutional personnel; program administration

A 5-year attendant training project for institutional attendants of the mentally retarded was begun in 21 institutions and expanded to 37 participating institutions in 15 southeastern states. A description of the actual events of the 5 years of the project is provided and is meant to serve as a guideline for those setting up or conducting similar programs. Participating institutions, their residents, employees, training programs, and the role of the attendant are discussed. The curriculum developed cooperatively during the project, frequently encountered problems in implementing training programs, methods which might be used in teaching adults, and the importance of evaluation as a part of any training program are also treated. An evaluation of the project and a summary with seven recommendations are included. Twenty-six references are distributed at the ends of the chapters. Appendixes present annotated lists of 105 books and pamphlets and 58 audiovisual aids, the information and opinion questionnaires used in the project, data on participating institutions, committee members, seminars and workshops sponsored by the project, the inservice exchange program, excerpts from project newsletters and seminars, and publications of the project. Teaching the Troubled Child.

EDRS not available

The Free Press, 866 Third Avenue, New York, New York 10022 (\$2.45).

Descriptors: exceptional child research; emotionally disturbed; learning disabilities; community programs; adjustment (to environment); minimally brain injured; individualized instruction; ancillary services; volunteers; nonprofessional personnel; teacher aides; psychotic children; cooperative programs; school community programs; program evaluation; case studies (education); Elmont Project

The Elmont Project was a community initiated, low cost program supported by the regular school system which began with the teaching of six disturbed children, aged 6 to 8. The principle was that the disturbed child is not to be isolated from his family, peers, and community, but rather helped by a team of educators, psychologists, psychiatrists, and a teacher-mom. The school system supplied a teacher to be in charge, transportation, supportive music, psychological and psychiatric services, and educational materials: snacks and insurance were supplied by the Kiwanis Club; classroom space was provided by the Elmont Jewish Center; and 12 volunteer teacher-moms worked with the teacher in charge with two moms alternating teaching one child on a one-to-one basis two mornings a week. For evaluation of how this project achieved its goals, six case histories describe children who were psychotic, neurotic, pseudo-retarded, sociopathic, brain damaged, and unteachable. In 5 years, 31 children were included in the project with 21 successfully returned to regular classrooms, one was hospitalized, and one entered part-time regular classes; the program was expanded to 38 teacher-moms who teach 11 children. So You Have an Aide; A Guide for Teachers in the Use of Classroom Aides.

Wilmington Public Schools, Delaware

EDRS not available

Descriptors: exceptional child education; personnel; teacher aides; educational improvement; educational needs; non-instructional responsibility; teacher role; teacher responsibility; teaching assistants; nonprofessional personnel; personnel evaluation; staff role; elementary school teachers; staff orientation; teacher attitudes

Developed to assist teachers in the use of aides, the guide interprets research in relation to teacher needs, duties of aides,

the expanding role of paraprofessionals, and the changing attitudes of professional educators toward these paraprofessionals. Aspects discussed include methods of developing positive relationships between teachers and aides, orientation, training and professional growth, and procedures and policies of the Wilmington (Delaware) School System concerning professional responsibilities and the ethics of teaching. A question and answer section considers fundamental principles, knowledge, and techniques that can be adapted to many varied teaching situations. Illustrated practical suggestions are offered for working with aides. Appendixes outline city policies regarding the use of aides, suggest schedules for kindergarten and primary aides, consider utilization of aides, and provide self evaluation and teacher evaluation forms for aides. A reference list cites 39 items. (Author/SN)

Teacher Aides in the Junior High Schools.
 Fairleigh Dickinson University, Teaneck, New Jersey
 EDRS not available
 Clearinghouse: V42 N4 P234-7 Dec 1967

Descriptors: exceptional child education; personnel; program planning; administration; disadvantaged youth; teacher aides; junior high schools; volunteers; program descriptions; instructional programs; program evaluation; reading instruction; homemaking education; individualized instruction

A program was established on a pilot basis in a junior high school and has developed over a 3-year period. Six aides were assigned in September 1964. A coordinator gathered information, recruited volunteers, gave out assignments, and generally supervised the program. Orientation was given to the aides, and the program was explained at faculty meetings. Several growing pains received attention over a period of time: clerical tasks were reassigned; aides worked more directly with individual instruction particularly in reading, students immigrating from Hong Kong required instruction in English as a foreign language; and the program was integrated with the compensatory and reading resources programs. Twelve aides currently work in the program: three aides assist the homemaking teachers in their classes, and the others work with individual students in reading and English as a foreign language. Each semester, 20 to 30 students receive an extra hour of individual attention weekly, which the school could not provide without such a service. The dedication of the aides to their responsibilities is seen as a significant factor in the program's success. (DF)

 Georgia Department of Education, Atlanta, Speech and Hearing Consultant Service
 Office of Education (DHEW), Washington, D. C.

EDRS not available
 Training School Bulletin; V66 N1 P23-31 May 1969

Descriptors: exceptional child research; mentally handicapped; language development; institutionalized (persons); staff utilization; verbal stimuli; reinforcement; language skills; attendant training; program evaluation

A program was instituted to raise the language skill levels of 100 mentally retarded institutionalized children by rewarding any attempts on the part of ward personnel (attendants) to stimulate these skills. Language development technicians, one for each 25-bed unit, remained on the ward daily to support and positively reinforce any attendant attempts to stimulate the ward environment of the children. Within three months, significant gains were shown in language skills of the retardates. Also, attendants expressed increased awareness of developmental needs of the patients, and increased confidence in working with patients throughout the day in both incidental and planned activities. Attendants' Views of Causes for Short-Term Employment at an Institution for the Mentally Retarded.
 EDRS not available
 Mental Retardation, V7 N4 P28-30 Aug 1969

Descriptors: exceptional child research; mentally handicapped; attendants; institutional personnel; salaries; personnel evaluation; personnel policy; job satisfaction; administrator attitudes

An overlooked but potentially valuable method for identifying causes of high attendant turnover rates is to survey the views of remaining attendants. Attendants, charge attendants, and supervisors at Lakeland Village completed a three-page questionnaire. The high return rate (82.8%) indicated considerable employee concern with the problem. A variety of causes were implicated; salient among them were the low wage level and limited creative opportunity. Responses suggested that short-term attendants were not appreciably different from remaining attendants. Respondent's suggestions for changes to reduce the turnover rate and differences among three groups of respondents are discussed. (Author)

Descriptors: exceptional child services; mentally handicapped; personnel; non-professional personnel; recruitment; program evaluation; personnel evaluation;

trainees; field experience programs; training; attendant training; demonstration programs; participant characteristics; low income groups; program development; program descriptions; job placement; employment; job skills

Unskilled personnel were recruited for a pilot training program in mental retardation. Of the 52 trainees, 50 were female and most were minority group members with low level employment. The average education was 11.5 years of school (63% were high school graduates) and residential stability was high. There was little evidence of family instability, and half had histories of regular fulltime employment. In all, 45 individuals (87%) completed the training program in three groups. Conducted by a social worker, the program was designed to provide awareness of developmental psychology and the facts of retardation, direct contact with the realities of retardates and their care, understanding of institutionalization as opposed to community maintenance, understanding of the role and functions of different fields in the handling of the problems of retardation, and practicum work in the specific skills needed. Methodology stressed relating training to the trainees' goal of a job and making the program's content meaningful. A stipend was provided, symbolic status rewards were used, and group interaction was utilized. The placement program resulted in 73% employment with 69% in mental retardation. Rated by their agencies on 15 traits 3 months after placement, trainees were high in motivation and commitment, social behavior and interpersonal skills, and low in level of knowledge, initiative, resourcefulness, and punctuality. Descriptors: exceptional child services; mentally handicapped; recruitment; college students; summer programs; student employment; institutionalized (persons); career opportunities; Student Work Experience and Training; SWEAT

The Student Work Experience and Training Program (SWEAT) is described. Federally funded, the vacation work program provides interested and qualified teenagers and college students with a chance to work with retarded children at 50 participating institutions, in the hope that they will choose careers in retardation. The brochure includes comments by SWEAT participants as well as pictures showing them with retarded children at the Southbury Training School in Southbury, Connecticut. (MS)

Selected Speeches from a Workshop for Aides to Teachers of the Trainable Mentally Retarded.

Michigan State Department of Education, Lansing, Division of Special Education;

Eastern Michigan University, Ypsilanti, Department Of Special Education and Occupational Therapy

Department of Health, Education, and Welfare, Washington, D. C.

EDRS mf, hc

Descriptors: exceptional child education; mentally handicapped; teaching methods; teacher aides; trainable mentally handicapped; nonprofessional personnel; staff role; group instruction; communication skills; parent school relationship; sheltered workshops; employment problems; class management

The responsibilities of teachers' aides in both institutional and community programs for the trainable mentally handicapped are reported. Papers presented treat the following topics: suggestions for teaching the trainable retarded; pupil management; developing communication skills in the trainable; the aide's relationship with parents; and employment of the retarded. AAHPER, Recreation and Fitness for the Mentally Retarded, 1201 16th Street, N. W., Washington D. C. 20036.

Appeared in Challenge, Published By Project on Recreation and Fitness for the Mentally Handicapped, American Association for Health, Physical Education, And Recreation.

Descriptors: exceptional child services; mentally handicapped; recreational activities; work experience programs; attendants; employment opportunities

The work and recreation program described has employed nine mentally retarded adults at a recreation center for the handicapped for the past 3 years. They work as aides or helpers for several hours and then participate in group recreational activities. Jobs include providing custodial care of small children, helping with the recreation program, or working as a transportation, housekeeping, janitorial, office or library aide. Three case histories illustrate progress made by participants. (LE)

Journal of Rehabilitation; V34 N2 P11-3
Mar-Apr 1968

Descriptors: exceptional child services;
nonprofessional personnel; unemployed;
trainees; recreation; young adults; partic-
ipant characteristics; on the job training;
course content; career opportunities

A 6-month program to train unemployed
or underemployed young adults as aides
to professional therapeutic recreational
personnel consisted of development of
skills and on the job training. Three
groups of 25 trainees participated. Crite-
ria for trainee selection were an interest
in working with disabled people and a
high school diploma or certificate or the
willingness to work for one. The training
program avoided the traditional class-
room atmosphere, utilizing question-
answer and role playing sessions, lec-
tures, seminars, and demonstrations.
Class content was basically the same for
all three groups and the sessions covered
record-keeping, leadership, and the de-
velopment of language and recreation
skills. Of the trainees, 85% completed
the course and 58% were subsequently
employed. Nine percent entered college
or vocational training. One problem of
the program was failure to provide a
thorough initial physical examination for
trainees including indicated medical psy-
chological care. Because of difficulty in
establishing jobs with real career oppor-
tunities, the training program was discon-
tinued until a job analysis could be im-
plemented. (JM)

Commuting Practices and Labor Transfer Potential.

EDRS not available
Training School Bulletin; V66 N3 P115-
26 Nov 1969

Descriptors: exceptional child research;
attendants; occupational surveys; age
differences; sex differences; residential
patterns; labor turnover; personnel
needs; institutional personnel; program
planning

This survey, based on 682 attendants' responses to a 23-item questionnaire, reflected an effort to define constraints that discourage effective utilization of existent manpower. Commuting practices, transportation modes, labor market boundaries, referral sources, and demographic characteristics of attendants from two institutions located within the same city were studied to determine how these parameters might relate to partial resolution of the manpower shortage. Results revealed the following factors: over 67% were 37 to 46 years old; in 5 years, age will deplete the existing work force 20%; over two thirds of the attendants were female; the index of discrepancy between actual and preferred residence indicated that as a group, willingness to relocate would be low; over 44% of the long-tenure, as opposed to 21.37% of new employees, preferred rural living. Additional results and population growth reports of the two institutions are reported. (Author/RJ)

nonprofessional personnel; inservice
education; program evaluation; rating
scales; employee attitudes

The need for qualified personnel in a
Mental Retardation Center makes it im-
perative that suitable training be provid-
ed. An evaluation of the Inservice Train-
ing program at the Arizona Children's
Colony by means of the SREB Informa-
tion Survey and Opinion Scale shows
significant gains in basic information and
improved attitudes in many employees.
The results also indicate the need for
further training and for effective changes
in training programs in order to achieve
the desired goals of better child care
programs for the mentally retarded.

The guide for employee training at a resi-
dential institution for the mentally retard-
ed is composed of the following four
units: general orientation, including
knowledges and experiences preparing
the attendant to help accomplish the
goals of the institution; the human body
and its care, including physical makeup
and basic health needs, health practices
and prevention of illness and injury, and
habilitation toward a full life; human
growth and development, including un-
derstanding of the self and the therapeu-
tic group and planning for the residents'
total care, training, and habilitation; and
devising new ways to promote resident-
centered environment. Each unit has a
counterpart of planned experiences for
student and/or attendant activity. Vocabu-
lary definitions of words used through-
out the guide are given. (LE)

Descriptors: exceptional child services;
emotionally disturbed; behavior; rein-
forcement; behavior change; behavior
problems; residential care; staff meet-
ings; staff role; behavior rating scales;
eating habits; nonprofessional personnel

Houseparents of the Devereux Academy and Gateway units met weekly with the Department of Psychological Research to focus on the houseparents' methods of dealing with specific problem behaviors rated as high in occurrence through the use of the Devereux Child Behavior (DCB) Rating Scale. Discussion focused upon a 13-year-old girl with a 6-year history of an eating disturbance. Tape recorded excerpts from the weekly meetings illustrate which methods had failed and how a new plan was devised. Staff discussions show how the child's behavior and attitude changed and improved in reaction to the new system of selective reinforcement. Eight generalizations summarize the procedures employed. Volunteers to Prevent Emotional Problems in Children, Summary Progress Report.

Counseling Service of Addison County, Inc., Middlebury, Vermont
 National Institute of Mental Health (DHEW), Bethesda, Maryland
 EDRS mf, hc

Descriptors: behavior problems; college students; elementary school students; mental health clinics; mental health programs; tutorial programs; prevention; student volunteers; underachievers; counseling services; emotional problems

The Counseling Service of Addison County, a community mental health clinic begun in 1966 as a four-year project to determine whether emotional problems could be prevented by the early assignment of college student volunteers to underachievers in the early grades of elementary school is presented. The progress report of the second year, records, report card grades, and achievement test scores are reviewed. The California Test of Personality, the Goodenough-Harris Drawing Tests and the Bender Visual Motor Gestalt Test are reported as administered along with a behavior-rating scale completed by the teachers. Although the data is not yet statistically significant, it is pointed out that observations by teachers and parents were favorable. It appears that the volunteer college student is generally more stable than the average student. While all data is tentative and too early for definite conclusions, the project has continued to progress in its second phase according to the original plans. (KP)

The Utilization of Supportive Personnel in Speech Correction in the Public Schools.

Colorado State Department of Education, Denver
 Office of Education (DHEW), Washington, D. C., Bureau of Education for the Handicapped
 EDRS mf, hc

Descriptors: exceptional child research; speech therapy; speech therapists; teacher aids; program evaluation; nonprofessional personnel; administration; standards; language development; speech evaluation; speech handicapped; aurally handicapped; auditory evaluation; teaching methods; teacher attitudes

A pilot program for supportive personnel in speech pathology and audiology began with 3 weeks of formal training. Ten speech aids then worked for 10 weeks in nine school districts. Speech correctionists evaluated the aids and indicated that they were most helpful in articulation and language drills, carry-over activities, ear training, preparation of therapy material, and record keeping. Eleven of 14 correctionists felt that they would like to have the continued services of an aide although many negative attitudes toward aides were in existence (many correctionists felt threatened). The speech aides also evaluated the program; favorable reactions were expressed toward the field of speech correction, and seven aids said they would like to continue their work. Speeches made to the trainees are presented and include the following: public school organization and administration; the role of the speech specialist; professional responsibilities and ethics; child growth, speech, and language development; the speech mechanism; disorders of speech and language and their evaluation and rehabilitation; the hearing mechanism; hearing disorders, evaluation, and rehabilitation; and identification audiometry. A Guide for Attendant Training in Institutions for the Mentally Retarded.

New Jersey State Department of Institutions and Agencies, Trenton, Division of Mental Retardation
 Public Health Service (DHEW), Washington, D. C.
 EDRS mf, hc
 OM-838

Descriptors: exceptional child education; attendant training; curriculum; lesson plans; mentally handicapped; mental retardation; program development; inservice education; institutional personnel

The guide is intended as a stimulus for the establishment of training programs for newly employed attendants and as an aid to the development of on-going inservice training. The instructor should select those subject areas which meet the needs of the institution and its residents. It is expected that additions and deletions will be made. The body of the manual is an outline which indicates the topic and purpose for each lesson and presents in parallel columns suggested content, teaching methods and aids, and reading references in relation to each sub-topic. Lesson topics include: background on mental retardation, growth and development, social and emotional needs, housekeeping in the cottage, safety, civil defense, training, feeding, and clothing the resident, personal health and hygiene, nursing care, common diseases and conditions, body mechanics, leisure time, sex education, religion, discipline, referring problems, and the responsibility of the attendant to the patient. The appendix includes a glossary, bibliography, film list, and list of agencies from which resource materials may be obtained. (JK)

Preparing Competent Special Education Teachers.

EDRS not available
 Education in Canada; V9 N4 P31-6 Dec 1969

Descriptors: teacher education; teacher improvement; handicapped children; educational needs; teaching skills; teacher certification; paraprofessional school personnel

Two ways of looking at the needs of exceptional children are considered with a focus on providing environments to enable individuals to learn effectively. Problems encountered in placing children in special classes and the status of special class teachers are examined. Suggestions are made for improving teacher education programs in the direction of developing five specific competencies. The process of implementation is described with attention given to teacher certification, the use of paraprofessional personnel, evaluation of teacher performance, and skill maintenance. (RJ)

The Changing Role of Volunteers in a Residential Facility for the Mentally Retarded.

EDRS not available
 Mental Retardation; V7 N6 P13-6 Dec 1969

Descriptors: exceptional child services; mentally handicapped; volunteers; volunteer training; institutional personnel; residential programs; program evaluation

Discussed is a project demonstrating that volunteers if properly trained can extend the services of professional staff in a state residential institution for the mentally handicapped. There were 17 program areas in which volunteers trained by resident staff acted as aides or instructors. The program was considered a success with the following factors deemed most essential in the volunteer: an acceptance of the real purpose of his work, a sense of belonging, an opportunity to express his own ideas, job responsibility according to capability, understanding of what is expected, proper recognition of accomplishments, knowledge that goals are attainable, free access to volunteer staff for conferences, and challenging assignments. Penny, Ruthanna Substitute Parents: Training the Profoundly Retarded Patient for Return to the Community.

EDRS not available
 Charles C Thomas, Publisher, 301-327 East Lawrence Avenue, Springfield, Illinois 62703.

Descriptors: exceptional child services; mentally handicapped; custodial mentally handicapped; trainable mentally handicapped; institutionalized (persons); training techniques; self care skills; nurses; attendants; case studies; communication (thought transfer); nonverbal communication

Profoundly and moderately retarded children are the focus of a discussion of training techniques for nursing personnel or others assuming the responsibility of care. The author believes that most severely retarded persons can learn self care and may be able to return to their own or to foster homes. An introduction provides training goals and methods, scheduling suggestions, and examples of rewards. The one-to-one relationship of an 8 year old institutionalized nonverbal boy and a psychiatric technician is described as he gradually began to talk and was eventually discharged. A project involving six females from 18 to 38 (IQs 20 to 60) is reported through excerpts from small group interaction meetings. Profound retardation accompanied by physical handicaps is considered as are communication in therapy and suggestions for training prospective foster parents. (RJ)

Psychotherapy and the Nonprofessional Therapist: Responses of Naive Therapists to Therapeutic Contact with Chronic Schizophrenics.
 EDRS mf, hc

Descriptors: college students; institutionalized (persons); nonprofessional personnel; psychotherapy; schizophrenia; student experience; training techniques; emotionally disturbed

The current interest in using non-professional therapists to work with chronic schizophrenics is usually focused on the effect on the patients. Relatively little attention has been paid to the effect this particularly intransigent patient population may have on clinically unsophisticated students, especially students who are planning a career as professional psychotherapists. The question is asked about the advisability of engaging naive students in the task of helping patients who are unlikely to exhibit identifiable behavior or personality change. Biographical and rating scale data from untrained student therapists are examined, and the conclusion is reached that in most instances, the experience has a positive outcome. Students attain insights into the nature of psychopathology and achieve a more realistic view of psychotherapy. The warning is issued, however, that the experience can be extremely frustrating and unnecessarily

disconcerting to the naive therapist who expects but does not receive reinforcement in terms of a productive patient relationship or observable patient behavior change. It is suggested that unless considerable supervision is available a more responsive group of patients might provide a more suitable patient sample for the first therapeutic encounter. (Author)

Descriptors: exceptional child research; mentally handicapped; nonprofessional personnel; language development; teacher aids; institutionalized (persons); speech instruction; speech improvement; language instruction; intellectual development; reinforcement; language programs; oral expression; custodial mentally handicapped

The utilization of non-professional personnel as language teachers was investigated using forty residents and an equal number of controls who were matched on the variables of CA, IQ, and Language Age (mean CA 13.28 and mean IQ 33). Two former psychiatric aids were trained as language developmentalists by classroom experiences, informal discussions and reading material pertinent to language acquisition. The language aids were provided with appropriate language development materials and supervised by a speech pathologist. A token reinforcement system was used in all classes. Results showed the children attending language classes made significantly greater raw score gains in the Illinois Test of Psycholinguistic Abilities than did the control group (CG) over the 18 month period. Significantly greater gains in IQ scores were made by the Language Training Group; their mean pre to post IQ score gains were 3.64 points compared to .22 points for the controls. Results suggested greater use of non-professional persons in the education of retarded children, while utilizing professionals as consultants. Lesson plans for

this project can be found in EC 004 827.

Descriptors: exceptional child education; volunteers; disadvantaged youth; remedial programs; paraprofessional school personnel; tutorial programs; volunteer training; program evaluation

A description of a remedial teaching project conducted by 25 undergraduates tutoring disadvantaged kindergarten, first, and second-grade children with learning problems is presented. Procedures of tutor orientation, student selection and testing, and implementation of the project are described. Favorable results, deficits, and implications of the project are also included. (RD)

Department of Training and Education Services, Arizona Children's Colony Mental Retardation Center, Randolph, Arizona 85243.

Descriptors: exceptional child education; mentally handicapped; inservice training; teacher aides; paraprofessional school personnel; Arizona Children's Colony Mental Retardation Center

Designed to help teacher aides, recreation aides, training aides, students, and others with little preservice training who work with the mentally handicapped, the manual discusses interpersonal relationships with the mentally handicapped. Proper procedures and situations to avoid are presented. Specific areas discussed are establishing rapport--communication, maintaining proper social-psychological distances, and assuming the responsibilities assigned. Illustrations are included. (MS)

Three Occupational Groups and Their Perceptions of Mental Retardates.
EDRS not available
Mental Retardation; V7 N6 P10-2 Dec 1969

Descriptors: exceptional child research; mentally handicapped; attitudes; institutional personnel; institutionalized (persons); behavior rating scales; performance; supervisors; teacher attitudes; attendants

The investigation examines the perceptions of three groups of employees in relation to the performance of a sample of institutionalized mentally retarded. Work supervisors, education and activities employees, and child care aides were asked to rate all residential subjects between the ages of 16 and 21 with IQ's ranging from 40 to 80 on 14 variables, using the Likert Rating Scale. Results indicate highly significant differences between the groups of raters. Work supervisors tended to rate residents' performance significantly higher than either of the other two groups. Child care aides in turn rated residents' performance lower than work supervisors did, but higher than education and activities employees did. (Author)

Evaluation Handicapped Component. Implementation of the Teacher and His Staff.

Grand Forks Public Schools, North Dakota

Office of Education (DHEW), Washington, D. C., Bureau of Elementary and Secondary Education
EDRS mf,hc

Descriptors: reinforcement; educable mentally handicapped; elementary school students; junior high school students; physical education; pilot projects; public schools; speech handicapped; staff utilization; tape recordings; teacher aides; teaching methods; behavior change

This document contains reports of three projects in the handicapped component of the Grand Forks, North Dakota, Teacher and His Staff program supported by ESEA Title III. The first project reported is A Pilot Study Using a Teacher Aide Employing Operant Procedures to Assist a Speech Clinician in a Public School Setting. Included is description of the development of new methods and materials (e.g., an innovative reinforcement device which dispenses the tokens, which are trading stamps) for use by the teacher aide in working with nine children with severe articulation disorders. The second report, an Evaluation of Teacher-Aide Directed Taped Instruction in the Educable Mentally Retarded Classroom, describes an attempt to determine whether seven educable retarded junior high school students could learn and retain information through directed audio tapes. It describes the use of a teacher aide to transcribe textbook information onto tapes, to direct instruction using the tapes, and to administer and record results of pre- and posttests used to determine the technique's effectiveness. The third paper reports The Development of a Physical Education Program for Mentally Educable Students in Winship Elementary School. General organization and content of the program are described. Each report contains description of project results, evaluation (all were considered generally successful), and recommendations for further study or modification. (JS)

Teacher Aide Attitudes Toward the Mentally Retarded.

EDRS not available
Training School Bulletin; V67 N1 P15-9 May 1970

Descriptors: exceptional child research; mentally handicapped; teacher aides; attitudes; semantics

A semantic differential was administered to ten teacher aides employed in a six-week summer program at a residential institution for the retarded. These subjects had had no previous contact with

retarded children. The following concepts were measured (pretest and post-test) with the semantic differential: State Training School, Children I Work With, Normal Children, and Institutionalized Retarded Children. The effect of contact with retarded children was found to be significant (p less than .05), with the subjects' attitudes becoming more positive on all four of the concepts. The means for the concepts were also found to differ significantly (p less than .01). (Author)

 EDRS mf,hc

Descriptors: exceptional child education; disadvantaged youth; remedial reading programs; tutorial programs; teacher aides; educational programs; volunteer training; program guides; child development; primary education; perceptual motor learning

Described is a training program to prepare teacher aides to tutor in a remedial reading program for children of low socioeconomic status. Instruction emphasized early childhood growth and development, visual motor perception training, language and auditory development, and emotional and social development. Trainee selection, the training program, its use in the regular school program, an evaluation of the project, and recommendations are discussed. The course curriculum, with suggested teaching techniques, materials, and approaches to classroom management, is included. (JM)

Utilization of Sub-Professional Personnel in Teaching Language Skills to Mentally Retarded Children: An Interim Report.

EDRS not available
 Mental Retardation; V8 N2 P17-23 Apr 1970

Presented By the Senior Author at the Annual Meeting Of the Missouri State Teachers Association, Kansas City (November 7, 1968), and the National Convention, Council for Exceptional Children, Denver (1969).

Descriptors: exceptional child research; mentally handicapped; teaching methods; subprofessionals; language instruction; psychiatric aides; institutionalized (persons)

Two psychiatric aides were trained as language developmentalists for small groups of severely and profoundly retarded children residing in a state institu-

tion. They were supervised by a speech pathologist who selected and prepared the materials used in the classrooms. Four experimental and control groups were compared over a nine month period: language training and special education, language training only, special education only, and neither language training nor special education. The Stanford-Binet and ITPA were administered to all groups prior to the program and nine months later. Results from these tests are presented with a discussion of the findings. Those who received both language training and special education made the greatest gains. (Author)

Investigation of Positive Behavioral Change as a Function of Genuineness, Nonpossessive Warmth, and Empathic Understanding.

EDRS not available
 Journal of Educational Research; V63 N5 P225-8 Jan 1970

Descriptors: exceptional child research; behavior problems; learning difficulties; elementary school students; nonprofessional personnel; volunteers; school aides

Each of 35 married women met voluntarily twice a week with a child with a behavior and academic problem. The women were instructed to establish a good relationship and choose their own activities. Helpers were rated for nonpossessive warmth, accurate empathy, and genuineness. Some of the helpers were found to be warm and understanding; they tended to have a therapeutic effect on the children with whom they worked. Those who were not warm and understanding tended to effect no positive change on the children. It is suggested that better selection procedures be used

in choosing school volunteers and that the volunteers be given training. (RJ)

Subprofessional Therapists' Use of Reinforcement Versus Traditional Psychotherapeutic Techniques with Schizophrenics.

Indiana University Medical Center, Indianapolis
 EDRS not available
 Journal of Consulting and Clinical Psychology; V34 N2 P181-3 1970

Descriptors: exceptional child research; psychotherapy; schizophrenia; reinforcement; adjustment (to environment); females; emotionally disturbed; psychiatric hospitals; nurses; therapists; patients (persons); institutionalized (persons)

Student nurses briefly trained in psychotherapeutic techniques worked with chronic schizophrenic women who were in long term care at a state mental hospital. Each nurse saw two matched patients one hour daily for seven weeks; one patient received reinforcement techniques and the other received traditional techniques. Pre and post tests used were the Hospital Adjustment Scale administered by ward attendants and a self concept scale completed by each patient. Results on the Hospital Adjustment Scale showed the reinforcement group superior to the traditional group on overall scores (p less than .01) and on the communication and interpersonal relations subscale (p less than .05). Both groups made significant improvements in self concepts (both p less than .05). Ratings by the therapists showed reinforcement superior to traditional methods (p less than .01). (MS)

Noise Levels in the Classroom.
EDRS not available
Bureau Memorandum; V11 N3 P7-9 Feb 1970

Descriptors: exceptional child research; mentally handicapped; educable mentally handicapped; school environment; classroom environment; class size; age differences; teacher aides; noise level

The influence of class size (standard versus a 50% increase), use of an aide, and the age of the students (primary versus intermediate) on classroom noise levels was studied. Noise levels were sampled in 21 educable mentally handicapped classes during a three-semester period. Results showed a general decline in noise level over the three semesters; primary classes consistently noisier than intermediate (with the difference increasing); a reduction in noise levels when an aide was used in standard-size classes, but not in classes of increased size. Descriptive data on recorded noise levels are included. (KW)

Project Expand: The Use of Communication Aides in Speech and Hearing Programs.

EDRS not available
ISHA; V28 P22-8 Spr 1970

Descriptors: exceptional child services; speech handicapped; aurally handicapped; speech therapy; hearing therapy; speech therapists; hearing therapists; paraprofessional school personnel; Elementary and Secondary Education Act Title III

Use of paraprofessionals in speech and hearing programs was examined by the Warwick County School Corporation (Indiana) in a Title III, ESEA project. Eight women who were mothers and had high school diplomas received three weeks of training. Aides had a mean age of 36, mean Otis Test score of 101, and scored highest in service and clerical-secretarial related areas on the Kuder occupational interest inventory. Aides worked with clinicians who each kept daily logs of how the aide was used. Positive responses to a questionnaire were received from building principals,

administrators, teachers, and parents in that order. Communication aides were noted to help in the challenge to provide maximal service. (MS)

Office of Education (DHEW), Washington, D. C., Bureau of Elementary and Secondary Education
EDRS mf, hc

Descriptors: exceptional child education; mentally handicapped; language development; instructional materials; teacher aides; educable mentally handicapped; special programs; audiovisual aids; morphology (languages); grammar

With the help of a consultant and the special teachers, a teacher aide provided language development work in primary and intermediate classes for educable mentally handicapped children. Speech activities and a language development kit were planned. The aide's role differed in different classes, but as the year progressed she worked more with specific language handicapped children. Over three-fourths of the document consists of the kit materials developed in the areas of plurals and singulars, verbs, names, and comparisons and analogies. (JD)

The Use of Indigenous Volunteers in a Rehabilitation Living Unit for Disturbed College Students. Research Report No. 1.

Kansas State University, Manhattan, Student Health Service
Rehabilitation Services Administration (DHEW), Washington, D. C.

EDRS not available
Director of Publications, Kansas State University, Manhattan, Kansas 66502.

Descriptors: exceptional child research; emotionally disturbed; college students; student volunteers; therapeutic environment; dormitories; peer relationship

Normal College student volunteers lived in a coeducational rehabilitation living unit with clients referred by counselors and psychiatric staff. Diagnostic categories in the group of 28 clients served in three semesters of the project were schizoid personality, schizophrenic, psychoneurosis, personality trait disturbance, and adjustment reaction of adolescence. During the project both volunteers and clients consistently ranked informal contacts with project members as first or second choice when choosing the most helpful type of assistance from five or six alternatives. Analysis of agreement among clients, volunteers, and

combined groups yielded statistically significant coefficients of concordance (p less than .05). Counselors and psychiatric staff judged the living unit a significant resource for use with conventional services in helping seriously disturbed college students. (MS)

A Community Helper Program for Children with Behavioral and Learning Disorders. Final Report.

Ohio State University, Columbus
Office of Education (DHEW), Washington, D. C., Bureau of Research
EDRS mf, hc
OEG-3-6-061181-1596
BR-6-1181

Descriptors: exceptional child research; learning difficulties; behavior problems; community service programs; volunteers; academic achievement; intervention; counseling; remedial instruction; individual characteristics; program effectiveness; student adjustment

A community helper project involved 37 untrained volunteers in a one-to-one relationship with children manifesting behavioral and learning problems in school. Most volunteers were nominated by principals; all passed screening and all were women despite efforts for recruiting men. Seventy-four problem children, from grades 1 through 6, and not manifesting mental retardation or physical or sensory handicaps were identified. Mean age of experimentals was 9.2; controls were an average of 1 year older, but of similar class (low to upper middle) and intelligence (low to high average). Experimentals met for 22 interviews over 18 weeks with a helper; 13 controls received remedial tutoring or counseling; 24 controls received no special services. Ratings of behavior, personality, academic achievement, and intelligence indi-

cated no significant differences between the groups. It was suggested that the treatment period be extended and need frequencies analyzed; also, it was recommended that selection procedures for subjects and volunteers be refined. Principals, teachers, and helpers all saw the program as effective. (Author/JD)

Staats, Arthur W. and Others
A Token-Reinforcement Remedial Reading Program Administered by Black Therapy-Technicians to Problem Black Children.

EDRS not available
Behavior Therapy; VI N3 P331-353 Aug 1970

Descriptors: exceptional child research; disadvantaged youth; remedial reading programs; reinforcement; paraprofessional school personnel; behavior change; teaching methods; motivation techniques

Thirty-two black ghetto children, considered problem learners, were studied in a four-to-five month experimental remedial program supervised by black subprofessional therapy-technicians under the direction of a behaviorally trained teacher. Reading materials in a stimulus-response presentation procedure were combined with a token reinforcement system of motivation. Detailed records were kept of each child's responses, the reinforcers received, and the words learned and retained, and test data was also used to evaluate results. Results showed that the procedures and reinforcement system used were effective in producing better attention and work behavior in the students and in the utilization and upgrading of unemployed black adults, although longer, more extensive programs are suggested to remediate long standing cases of educational failure, and to contribute to the solving of social as well as learning problems. Retardates in Residence: A Study of Institutions.
Hartford University, West Hartford, Connecticut
EDRS mf,hc

Descriptors: exceptional child research; mentally handicapped; institutionalized (persons); evaluation; institutional environment; institutional personnel; attendants; adjustment (to environment); interpersonal relationship; social relations; attitudes; behavior rating scales; rating scales; environmental influences; program descriptions; behavior; institutional facilities; comparative analysis

An introduction by Dr. David D. Komisar provides background and objectives for a study which eventually involved observations in six residential institutions. Two institutions were judged to be ineffective as residents appeared to be not happy or self-sufficient, showed little intellectual growth (or were rarely, if ever, retested), had many stereotyped behaviors, and manifested excessive needs for social reinforcement. One institution emerged as clearly effective and one as moderately so. In five of six institutions, other ward residents were the greatest source of interpersonal contacts; in only one institution did attendants and other nonretarded adults interact as frequently with residents. Between one third and one half of the time of severely retarded residents of the typical institution was spent in doing nothing. The attitudes of attendants at the different institutions showed remarkable consistency. While verbal and psychological attitudes of parents did not differentiate between effective and ineffective institutions, parents of children in an effective residence visited children more frequently. Additional research results and implications are presented, and schedules of a typical day at each institution are included. (RJ)

EDRS mf,hc
OEC-5-10-154

Descriptors: exceptional child research; reinforcement; reading achievement; disadvantaged youth; behavior change; paraprofessional school personnel; behavior change; remedial programs

Instructional technicians administered a token reinforcement remedial reading program to 32 black ghetto children who were problem learners. In the 40.2 mean hours of training, the subjects made a mean of 78,505 reading responses; learned a mean of 726.8 words, retaining 81% short term and 59% long term; and received a mean monetary amount of \$21.34 worth of reinforcers. Test results indicated that the subjects did significantly better than the controls on a 100-word sample from the training materials. They also excelled on a standard reading achievement test, including the vocabulary section, and on both the verbal and nonverbal portions of an intelligence test. (Author/JD)

The report covers a project concerned with the implementation of the teacher and his staff in the Grand Forks (N.D.) Public Schools, which had as its purpose the improvement of instruction through staff professionalization. Described are experiments and investigations of new ways to utilize staff, emphasizing the use of teacher aides. Major sections of the report deal with individual instruction, the significance of the impact of teacher aides, and the reports of three schools which worked with teacher aides in a three-year experimental program. The teacher aide in special education is covered, featuring their use in language development and the teaching of motor coordination, and in a comparative study of traditional procedures and operant conditioning procedures as applied to speech correction. A subjective evaluation and a list of disseminated information on the project are included. (KW)

Descriptors: exceptional child research; emotionally disturbed; personnel selection; personnel evaluation; personality assessment; child care occupations; nonprofessional personnel; screening tests; behavior change; psychological evaluation; Minnesota Multiphasic Personality Inventory

The study concerned the use of psychometric techniques in the selection and screening of child care personnel for residential treatment facilities. To determine whether child care workers whose children show behavioral improvement can be psychometrically differentiated from those whose children do not show behavioral improvement, 22 camp counselors, ages 18-33 years, of emotionally disturbed children were administered the Minnesota Multiphasic Personality Inventory, Form R (MMPI). Also employed were the Devereux Child Behavior Rating Scale and informal Staff and Children's Rating Scales used to rate the staff at the end of the camping session. Staff and campers rated the staff similar-

ly, and staff ratings and behavioral improvement were not significantly correlated (minus .005). However, two of the MMPI subscales, Interest and Hypochondriasis Scales, differentiated between workers in whose children improvement was not observed. The two subscales were negatively correlated (minus .550 and minus .517 respectively) with behavior ratings. (KW)

Guess, Doug And Others
The Role of Nonprofessional Persons in Teaching Language Skills to Mentally Retarded Children.

EDRS not available
Exceptional Children; V37 N6 P447-53
Feb 1971

Descriptors: exceptional child research; trainable mentally handicapped; non-professional personnel; language instruction; institutionalized (persons); small group instruction

The study reviews a 2 year research project in which two former psychiatric aides were trained to serve as language developmentalists for small groups of institutionalized severely retarded children. Forty children participating in the program were compared with a matched control group on variables of IQ, language age, and social quotient. Children attending language classes met daily for approximately one hour. They were taught from the Peabody Language Development Kits and a series of lessons developed during the project. Results showed significantly greater language scores made by the language training group. IQ score increases were equivocal, but again favored those children attending language classes. (Author)

Institutional Wisdom as Expressed Through Folklore.

EDRS not available
Mental Retardation; V8 N6 P2-8 Dec 1970

Descriptors: exceptional child research; institutional environment; attitudes; institutionalized (persons); language styles; attendants; mentally handicapped

A survey of public institutions for retarded was conducted to obtain knowledge of institutional folklore as expressed in cliches or old sayings. A total of 495 items received permitted classification into 23 inductively and deductively established categories. A hierarchy of concerns of institutional workers was derived from this analysis and cliches were discussed in relation to their geodistributions, origins, and potential value to researchers and to employee training programs. This excursion into institutional folklore indicated certain attitudinal sets and suggested facets of folk-wisdom that may be worthy targets for research. (Author)

Improving Teaching Skills for Working with the Mentally Retarded.

Greater Hartford Association For Retarded Children, Inc., Connecticut
Connecticut State Department Of Health, Hartford, Office Of Mental Retardation

EDRS not available
Greater Hartford Association For Retarded Children, Inc., 200 Retreat Avenue, Hartford, Connecticut 06102.

Descriptors: exceptional child education; mentally handicapped; day care programs; nonprofessional personnel; class activities; program development; professional personnel; multiply handicapped; institutes (training programs); community services

Presented are the proceedings of an inservice training program for par-professional staff in day care programs for the mentally retarded in Connecticut, which consisted of 10 weekly lecture sessions. The program was designed to provide an orientation to the nature and needs of the retarded, and to improve and increase the instructional skills of the day care nonprofessional staff. Phase 1 of the Institute provided a general orientation to mental retardation. The content of Phase 2, contained in the document, concentrated upon activities and materials for program development. The presentations by various professionals cover early childhood development, day care for the retarded, social skills, language and arithmetical development, speech and hearing handicaps, music and rhythmic activities, arts and crafts, physical and recreational activities, crippling and health handicaps, emotionally disturbed children, the role of various disciplines in day care, and utilization of community services. Descriptors: exceptional child education; trainable mentally handicapped; tape recordings; nonprofessional personnel; teaching methods; mentally handicapped

Described is the concept of using taped instruction for programs administered by subprofessionals to groups of severely and profoundly retarded children as a highly feasible means of increasing the scope of effective teaching. It is suggested that tapes prepared by professionals can be used in various settings by persons without special training in working with children, such as in Head Start groups, in classroom activities with aides or volunteers, or at home with parents to supplement or reinforce professional

prescriptions for learning. Appended is a detailed daily schedule for one group of retarded children with whom such taped instruction was used. (KW)

Descriptors: nonprofessional personnel; adjustment problems; self concept; interpersonal relationship

The article acquaints those interested in programs utilizing semiprofessionals with some of the problems as viewed by semiprofessionals. These problems cluster around three main areas: conflicts resulting from changes in self concepts, suspicion toward middle class supervisors, and problems with new careers. The source of these data was sensitivity training for semiprofessionals being prepared for a new program designed to screen children for deviations in development, hearing, vision, and articulation. Proceedings of the Symposium on Residential Care for The Mentally Retarded (Frankfurt, Germany, September 15-18, 1969).

Descriptors: mentally handicapped; residential care; institutionalized (persons); institutional administration; institutional environment; parent role; volunteers; trend analysis; conference reports

The document contains the working papers from the Symposium on Residential Care for the Mentally Retarded (Frankfurt, Germany, Sept. 15-18, 1969). Papers deal with the administration and management of institutions, the architect's contribution to the environmental needs of the retarded, and the involvement and participation of parents and volunteers. Also discussed are how to arrange the relation between institutions and day care centers for the mentally retarded, how to structure the institutional environment of the resident to meet the basic functions the environment must fulfill, current issues in residential care with special reference to the problems of institutional care, and the quality of life for institutionalized persons. Class Size and Teacher Aides as Factors in the Achievement of the Educable Mentally Retarded. Final Report. Wisconsin State Department of Public Instruction, Madison, Division for Handicapped Children
Bureau of Education for the Handicapped (DHEW/OE), Washington, D. C.
EDRS mf, hc
OEG-3-6-062620-1879
BR-6-2620

Descriptors: exceptional child research; educable mentally handicapped; class size; teacher aides; student behavior; mentally handicapped; behavior rating scales; teacher attitudes; primary grades; intermediate grades

The purpose of the study was to determine the effects of class size and the use of teacher aides on pupil behavior and teacher behavior in educable mentally handicapped classes at the primary and intermediate grade levels. In the course of the study 20 classes remained constant and 18 aides were employed throughout the project. Effects on pupil behavior were determined by contrasting the educational and linguistic achievement and social behaviors in the several instructional arrangements. Researchers concluded that the major impact of the aides alone appeared to be a reduction in undesirable behavior in the classroom and an enhancement of the spelling achievement; class size alone had an effect on arithmetic and classroom behavior, with the standard classes gaining more in math and manifesting less negative behavior than the increased classes. It was generally felt that the most pronounced effects of the study appeared in the primary classes and suggested to the researchers that administrative strategies other than aides and class size should be developed to enhance the behavioral, linguistic functioning of intermediate educable mentally handicapped pupils. Descriptors: school community relationship; tutoring; college students; program descriptions; program effectiveness; teacher aides; educational opportunities

A tutorial project conducted in a small college town is described. Planning, organization, and participation on the part of the students and their sponsors are detailed, and reactions on the part of the schools, children and parents are examined. The author emphasizes the positive reactions on both the students' and the community's parts to the program. Some of the problems encountered, such as hesitancy on the part of some of the schools and over zealotness of some students, are brought out. The project is followed from inception through its in-

corporation into the college curricula. (CD)

The collection of articles originally published in the journal *Childhood Education* is intended to assist day care workers in summer, before-and-after school, Saturday morning, and other day care programs. Articles were selected which would provide ideas useful in practical everyday planning in day care programs. The first three articles focus upon the role of aides, both volunteer and employed aides. Seven articles in Part 2 present basic information about the growth and development of children and the variety of cultural and experiential backgrounds which they bring to the program. The nine articles of Part 3, concerning the basics of programing, contain ideas and suggestions for trips, gift-making, music activities, using literature, play, and other creative and learning experiences. The Attendant Behavior Checklist: Measuring On-the-Ward Behavior of Institutional Attendants.

EDRS not available
American Journal of Mental Deficiency; V75 N5 P617-22 Mar 1971

Descriptors: mentally handicapped; institutional personnel; attendants; behavior rating scales; institutions; attendant training; behavior change

The reliability and validity of a time-sampling technique for measuring on-the-ward behavior of attendants in a state institution for the retarded was examined. An 11-category behavior checklist was constructed from previous work by Bensberg and Barnett. It was found that regular attendants behaved differently than behavior modification trainers; however, there were no significant differences between the trainers judged (by their supervisors) to be high or low in overall competence. The relationship between on-the-ward behavior and attitude, knowledge of mental retardation, and ability to apply behavior modification techniques was also examined. It was noted that inservice education produced a more efficient, effective attendant and that behavior of attendant personnel was capable of reliable quantification. (Author)

Volunteers as Tutors of Exceptional Children.

EDRS not available
Psychology in the Schools; V8 N2 P129-34 Apr 1971

Descriptors: exceptional child research; learning disabilities; disadvantaged youth; nonprofessional personnel; tutoring; check lists; volunteers; remedial programs; remedial instruction; demonstration projects

A pilot study was conducted to determine the feasibility of establishing a learning clinic for disadvantaged elementary school children staffed by supervised parent volunteers. The total staff was made up of eight people including six volunteers. The stated aim in staff training was for volunteers to learn to adapt tasks to the child's individualized requirements. Nine boys and one girl were selected for the intensive training group after individual screening and group testing of the children. Remedial sessions concentrated on language, fine and gross motor skills, perceptual development, social skills, and reading. Results were felt to indicate positive personality and behavior changes in five of the children. It was felt that the program created a core group of semitrained volunteer personnel available for future tutoring of exceptional children. A sample of the checklist, modified and used to screen the children, is provided in the article. (CD)

The report of the Task Force established by the Canadian National Institute on Mental Retardation concerns a comprehensive planning and organization program for training personnel, especially associate professionals, in the field of mental retardation to provide a more effective utilization of manpower. Summarized are results of surveys of existing training programs available for professional, associate professional, and volunteer personnel, including preschool, home care, residential, and occupational-vocational training programs. A training curriculum for associate professionals at four diploma levels is detailed. Improved methods for utilizing all personnel in the field of mental retardation and allied developmental handicaps are recom-

mended, as is a pattern of implementation indicating the specific roles and responsibilities of local, provincial, and national agencies and institutions. A total of 38 recommendations related to manpower training and utilization are presented. (KW)

tions; behavior change; preschool chil-
dren; intervention; nonprofessional per-
sonnel; mentally handicapped; positive
reinforcement; Wisconsin

The report describes an academic, com-
pensatory education preschool program
for educable mentally retarded children
3-5 years of age. Goals are to teach,
through behavior modification tech-
niques, language skills and behavior pat-
terns necessary to succeed in school.
Language teaching is based on an adap-
tation of the Bereiter-Englemann meth-
od, and the program makes extensive use
of paraprofessionals. Discussed are ef-
forts to foster healthy self-concepts,
techniques of behavior modification and
the schedule of tangible and social rein-
forcement, staffing and training proce-
dures, subject matter taught, and the
program of home visits to inform parents
of the child's progress and encourage
them in the use of positive reinforcement
management techniques. Evaluation re-
sults reported show IQ gains of 14-38
points, a 17-month average gain in lan-
guage over 7 1/2 months, improved be-
havior and self-concepts, longer attention
spans and ability to delay gratification,
and gains in academic skills. Appendixes
present controlling techniques, the ra-
tionale for heavy emphasis on language
teaching, examples of subject matter
taught and sample lesson plans, forms
for reporting on the home instruction
program, descriptions of staff job res-
ponsibilities, and details of in-service
paraprofessional training. (KW)

volunteers; tutoring

The article notes that evaluations of vol-
unteer efforts with learning disabled chil-
dren indicate that trained volunteer tu-
tors, working in a one-to-one relation-
ship, can contribute greatly to improved
educational development of such chil-
dren. Two volunteer tutoring programs
(at Maimonides Medical Center, Brook-
lyn, New York and the Reading Assis-
tance Program in Shreveport, Louisiana),
illustrating different but effective ap-
proaches to volunteer activities in the
field of learning disabilities, are de-
scribed. Methods of student referral and
volunteer training are noted. It is con-
cluded that similar effective volunteers
can do much to alleviate the present
shortage of persons trained to instruct
the failing reader. (KW)

Balow, Bruce

Teachers for the Handicapped.

EDRS not available

Compact; V5 N4 P43-6 Aug 1971

Descriptors: exceptional child education;
handicapped children; teacher supply and
demand; nonprofessional personnel; fed-
eral aid; grants; financial support; man-
power needs; special education teachers

Lack of highly skilled teachers and relat-
ed educational personnel for teaching the
handicapped is examined. In view of the
U.S. Commissioner of Education's ex-
pressed national commitment to assure
adequate education for all handicapped
children by 1980, a recent survey finds
that less than half of the U.S. school dis-
tricts now provide specialized programs
for handicapped children. It is pointed
out that in order to fulfill the national
commitment, 300,000 additional teachers
of the handicapped are needed immedi-
ately. Although special education needs
are shown to increase faster than federal
monies, representative results of grant
programming by the Bureau of Education
for the Handicapped are mentioned as
evidence that advances are being made
in improving quality of teachers, in using
more efficient and more effective training
models, and in reaching handicapped
persons not served previously. The abs-

ence of coordinated planning between state education agencies and institutions of higher education is cited as a reason for the existing lack of sufficient special education teachers. It is also pointed out that limited attention goes to manpower preparation for the most seriously handicapped children. Potential manpower sources are suggested and finally, special support services for handicapped children in regular classrooms are thought to be more beneficial in the long run than traditional segregated classes. (CB)

Utilization of a Nonprofessional Child-Aide School Mental Health Program.
 EDRS not available
 Journal of School Psychology; V9 N2 P131-6 1971

Descriptors: exceptional child services; emotionally disturbed; adjustment problems; primary grades; mental health, nonprofessional personnel; program descriptions

Fifty-five women were given focused, time-limited training for work as child-aides with ineffectively functioning primary grade school children. During the first 3-month program period, aides saw 329 children, 9% of the primary grade enrollment of the participating schools, for more than 7,500 contacts. The paper considered differential patterns of program utilization and the overall potential of the helping model for bringing needed services to otherwise unreached, maladapted school children. Evaluation of a Remotivation Program with Institutionalized Mentally Retarded Youngsters.
 EDRS not available
 Training School Bulletin; V68 N2 P82-6 Aug 1971

Descriptors: exceptional child research; custodial mentally handicapped; attendants; motivation techniques; attitudes; mentally handicapped

The purpose of the study was to evaluate the effectiveness of a remotivation program with institutionalized profoundly and severely mentally retarded children and to ascertain the effects upon the motivator-attendants. The remotivation technique is a structured simple group interaction designed to promote meaningful patient interchanges with adults, peers, and environment. Subjects were 24 retarded children (IQ 6-30) and three attendants. Each motivator-attendant met with a subgroup of the children for a 1/2 hour session three times a week for 3 months. Attendants used various props to interest the children in the objective world and stimulate them with attentional contacts stressed. Children were evaluated by a pre, post, and monthly administered battery of psychological and behavioral tests and techniques. Attendants were administered a questionnaire before and after the program. Results indicated that the remotivation program was most effective in motivating the students to become more sociable, more alert, and more responsive to environmental surroundings. Changes in basic personality structure or verbal development were not evidenced. Attitudes of motivator-attendants were positive and morale improvement was attained. (Author/KW)

Attitude Sampling of Institutional Charge Attendant Personnel: Cues for Intervention.
 EDRS not available
 Mental Retardation; V9 N4 P8-10 Aug 1971

Descriptors: exceptional child research; mentally handicapped; attendants; attitudes; institutional personnel; institutionalized (persons)

The Efron and Efron Scale of Attitudes toward the Mentally Retarded was administered to 41 Charge Attendants of a large southwestern state residential facility for the mentally retarded, together with a brief questionnaire regarding demographic variables. Of the six factors tapped by the Scale, three significant intercorrelations were discovered: Authoritarianism and Segregation via Institutionalization, Segregation via Institutionalization and Cultural Impoverishment, and Sex of the Respondent and Noncondemnatory Etiology. Implications for the development of intervention stratagems were discussed in relation to the reduction of the resistance of staff personnel to developmentally-oriented residential programs.  Thorne, Gareth D 21000.
 Tomlinson, T M and Others 21569.

SUBJECT INDEX

- Academic Achievement 22905.
 Adjustment Problems 31839, 33061.
 Adjustment (to Environment) 10742, 21000, 22474, 23457.
 Administration 10194, 10214, 10482, 10576, 10971, 11535, 20482, 20972, 22858, 30385.
 Administrative Organization 21680.
 Administrative Policy 21728.
 Administrator Attitudes 11500.
 Administrator Role 10214.
 Adolescents 10194, 33148.
 Adult Education 21680, 33073.
 Age Differences 20349, 22579.
 Agency Role 10194, 11885, 21680, 32677.
 Ancillary Services 10742, 30385.
 Arizona Childrens Colony Mental Retardation Center 21841.
 Attendant Training 10078, 10576, 11449, 11906, 20434, 20482, 21000, 21105, 21490, 21641, 21728, 22271, 32309.
 Attendants 10078, 10576, 11500, 20053, 20349, 20457, 20482, 20858, 21000, 21517, 21894, 23457, 31240, 31561, 32309, 33138, 33151.
 Attitudes 10078, 21894, 22122, 23457, 31561, 33138, 33151.
 Audiology 10138, 21500.
 Audiovisual Aids 22735.
 Auditory Perception 20972.
 Aurally Handicapped 20972, 21833, 22591.
 Behavior 20745, 23457, 31240.
 Behavior Change 10214, 10482, 11145, 20745, 22101, 22439, 23002, 23568, 31293, 32309, 32377.
 Behavior Patterns 21000, 31240.
 Behavior Problems 20745, 20790, 22414, 22905.
 Behavior Rating Scales 20745, 21894, 23457, 31918, 32309.
 Braille 32788.
 Canada 32373.
 Case Studies 21517.
 Case Studies (Education) 10742.
 Check Lists 32339.
 Child Care 10078, 21641, 32126.
 Child Care Centers 32126.
 Child Care Occupations 11535, 31293.
 Child Development 20482, 21000, 21641, 22227.
 Childhood 32126.
 Class Activities 31633.
 Class Management 10482, 11972.
 Class Size 22579, 31918.
 Classroom Environment 22579.
 Clinic Personnel School 21500.
 Clinical Diagnosis 21000.
 Clinics 10214.
 College Students 11964, 20790, 21569, 22781, 32031.
 Colorado 10078, 20482.
 Columbus State School 10078.
 Communication Skills 11972.
 Communication (Thought Transfer) 21517.
 Community Programs 10214, 10742, 21680.
 Community Resources 10215.
 Community Role 20064.
 Community Services 10214, 22905, 31633.
 Comparative Analysis 21062, 23457.
 Conference Reports 21500, 21563, 21782, 30385, 31855.
 Cooperative Programs 10742.
 Counseling 10215, 11535, 20790, 21000, 21500, 22905.
 Counselor Training 10215.
 Counselors 10215, 21500.
 Course Content 20280, 21782.
 Course Objectives 21782.
 Creative Expression 32126.
 Creativity 21062.
 Creativity Research 21062.
 Cross Age Teaching 22586.
 Curiosity 21062.
 Curriculum 10482, 10576, 21105, 33073.
 Curriculum Design 32373.
 Curriculum Development 10576.
 Custodial Mentally Handicapped 10078, 20858, 21517, 21770, 33138.
 Day Care Programs 31633.
 Day Schools 21833.
 Delinquency 10194.
 Demonstration Projects 11906, 22101, 32339.
 Dental Health 11535, 20858, 21490.
 Dietetics 11535.

Directories 32788.
 Disadvantaged Youth 10971, 11814, 21808, 22227, 23002, 23568, 32339.
 Discipline 21728.
 Dormitories 22781.
 Eating Habits 20745.
 Educable Mentally Handicapped 10078, 10214, 20858, 22101, 22579, 22735, 31918, 32377.
 Educational Improvement 10747.
 Educational Methods 11972.
 Educational Needs 10747, 21331, 30772, 31073.
 Educational Opportunities 32031.
 Educational Programs 10214, 11971, 21500, 21782, 22227, 31073.
 Educational Trends 30385.
 Effective Teaching 21331.
 Elementary and Secondary Education Act Title III 22591.
 Elementary and Secondary Education Act Title VI 31073.
 Elementary Education 10482, 10747.
 Elementary School Students 20790, 22101, 22414.
 Elmont Project 10742.
 Emotional Adjustment 10215.
 Emotional Problems 20790.
 Emotionally Disturbed 10194, 10482, 10742, 20745, 21563, 21569, 22271, 22474, 22781, 31293, 32725, 33061.
 Employee Attitudes 20434.
 Employment 11906, 20280.
 Employment Opportunities 11535, 11964, 20053, 20280, 30772.
 Employment Qualifications 20457, 30973.
 Environmental Influences 21000, 23457.
 Etiology 21000.
 Evaluation 23457.
 Exceptional Child Education 10078, 10138, 10214, 10482, 10747, 10971, 11972, 20064, 20457, 20482, 21105, 21500, 21560, 21641, 21782, 21808, 21833, 21841, 22101, 22227, 22735, 30314, 30385, 31073, 31633, 31782, 32377, 32625, 32725, 33040.
 Exceptional Child Research 10576, 10742, 11145, 11449, 11500, 20349, 20434, 20972, 21728, 21770, 21894, 22122, 22268, 22414, 22439, 22474, 22579, 22781, 22905, 23002, 23457, 23568, 31293, 31368, 31561, 31918, 32339, 33138, 33151.
 Exceptional Child Services 10194, 10215, 11535, 11814, 11885, 11906, 11964, 20053, 20280, 20745, 20858, 21000, 21399, 21490, 21517, 21563, 21680, 22271, 22591, 31240, 32373, 32677, 32788, 33061, 33148.

To order ERIC REPORTS include complete information for all order form items. Please print or type all information clearly.

1. Complete "bill to" and "ship to" addresses. Be sure to complete "ship to" address if different from "bill to". A like "ship to" address may be completed as "SAME". Include zip code.
2. Order by printing ED number in designated space. ED accession numbers are listed in Research in Education (RIE). RIE may be purchased from: Superintendent of Documents, GPO, Washington, D.C. 20402.
3. Include number of copies (1, 2, 3, etc.) to be ordered in appropriate space. Use MF space for microfiche copies, use HC space for hard copy (paper). Check RIE for availability of document in MF and HC.
4. Include price from the rate schedule. (Refer to price schedule on back.) Prices are also published in current issues of RIE.
5. Some ED numbers represent a series of titles, and will be billed by title, not ED number. A list of applicable ED numbers is available.
6. Extend number of copies and price for total price for each entry.
7. Add item. 1 through 15 and insert amount in "Sub-Total" box.
8. Add state sales tax for Illinois and Maryland or check box and cite tax exemption number for Illinois and Maryland only.
9. Add "Sub-Total" and "Tax" and insert amount in "Total" box.
10. Indicate payment method desired. Payment must accompany all orders of \$10.00 or less. Make all drafts payable to EDRS.
11. Sign AUTHORIZATION and date order.
12. Include only 15 entries per form. Complete and sign additional forms if required.
13. Quality warranty. LIPCO will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of LIPCO. Best available copy will be supplied.

ERIC DOCUMENT REPRODUCTION SERVICE is operated by Leasco Information Products, Inc. for the U.S. Office of Education.

Orders are filled only from ED accession numbers. Titles are not checked. Please be sure you have supplied the correct numbers.

AUTHORIZATION _____ DATE _____

PRICE LIST

Microfiche Copy – Each Title	.65
Hard Copy – Each Title by number of pages:	
Pages: 1 - 100	3.29
101 - 200	6.58
201 - 300	9.87
301 - 400	13.16
401 - 500	16.45
Each Additional 100 pages or portion thereof.	3.29

1. Book Rate or Library Rate postage is included in above prices.
2. The difference between Book Rate or Library Rate and first class or foreign postage (outside the continental United States) rate will be billed at cost.

TERMS AND CONDITIONS

1. PRICE LIST

The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

2. PAYMENT

The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

3. REPRODUCTION

Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due

to erroneous or incomplete information furnished by Customer.

5. LIABILITY

LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

8. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

9. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
