ABSTRACT

This content analysis schedule for the Region XIII Bilingual Education Program of Austin, Texas, presents information on the history, funding, and scope of the project. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bicultural and community components, and means of evaluation. Inserts include information on staff development, general objectives, self esteem, and parental involvement. (SK)

2) a native E. speaking

SCOPE OF PROJECT

ó

Part II

I. ABSTRACT

The major objective of the Region XIII Bilingual Education Project is to develop model programs which can be demonstrated and replicated in any school in need of bilingual instructional programs. The first year of the project will involve five pilot and two control first grade classes on three elementary campuses. Three major components will be developed in the project. The first component being the organization and implementation of the instructional programs in the three schools. The second component will be the development of a system to identify, utilize, and evaluate a broad range of materials to support the model program. A third major component shall be the development of a parental program that will involve parents in the target areas and make them cognizant of the educational and cultural needs of Mexican-American children and adults.

Specific program objectives will include the development of communicative and computative skills in two languages, to instill an appreciation for the child's culture, and to expand the academic and vocational potential of the Spanish speaking child. Program procedures and objectives for both the materials and parental components are presented in detail in other sections of this proposal.

The project staff which will include a director, materials specialist, and parental coordinator will devote fifty to seventy-five percent of their time and effort to the three model schools or activities directly related to those schools. However, the staff will be available to work with other schools in the fifteen counties which comprise Region XIII to provide technical assistance in organizing bilingual programs.

In five years this project will develop comprehensive bilingual education programs, grades 1 - 6 in at least the three elementary schools in which the program is initiated. Through conferences and other dissemination efforts all schools in Region XIII will be made aware of the concept of bilingual education and the need for its implementation.

7.3 Languages Used by Bilingual. Teachers

IV. PROGRAM PROCEDURES

The activities of this project will be developed around three program components. These components will include the establishment of three model schools, identification, usage, and evaluation of materials, and parental involvement activities.

The development of the model programs will be the initial step in the implementation of the project. The model programs will involve seven first grade classrooms in Lockhart Elementary School, Zavala Elementary School, and Dolores School. Two first grade classes in both Lockhart and Zavala will be taught all subjects in both English and Spanish, with a third section on each campus serving as a control group. The Dolores first grade class will be taught by one bilingual teacher the entire day. One bilingual teacher and one English speaking teacher will be involved in the project at Lockhart. Both teachers at

Languages Used by Bilingual Teachers

Zavala will be bilingual, but one would instruct primarily in English. One full time and one half-time paraprofessionals will be assigned to both the Zavala and Lockhart project teachers. One full time paraprofessional will be assigned to the Dolores class. These persons will receive summer institute training from the University of Texas on new roles and responsibilities especially related to bilingual education. All paraprofessionals will be bilingual.

The daily schedule of the first grade classes would be as follows:

Spanish speaking teacher in charge of Group A in the morning Time 8:30 - 11:00

Reading
Two hours every day utilizing Spanish and English. Initially 25 percent in English and 75 percent in Spanish.
Should be 50 percent/50 percent by the fifth month of program

11:00 - 11:30

Aural/Oral Spanish taught 1/2 hour each day through Science (2 days per week) and social studies (3 days per week)

11:30 - 12:00 Lunch

English speaking teacher in charge of Group A in the afternoon

12:00 - 12:30

English as a second language - 15 to 20 minutes Aural/Oral English

12:30 - 1:15 Math (4 days per week)

Art (1 day per week)

1:15 - 1:45 Physical Education (daily)

1:45 - 2:15 Alternating Health and Safety with Music

The daily schedule will allow the bilingual teacher to work with both groups of students on the same subject areas by switching classes at noon with the English speaking teacher. The paraprofessionals should be invaluable to the English speaking teacher in the early stages of the project. This schedule will be employed in all three pilot schools. The only exception will be at Dolores School where there is only one section of first grade and only one teacher, who will stay with her class throughout the day.

The operational procedures for the model schools component of the program are as follows:

The native language of the pupils (Spanish) will be utilized 75 percent of the time in reading, spelling, and language arts through the first semester of the year

8,6 Role of Paraprofessional (Teacher Aides)

CONSIDERATIONS CONCERNING

CONTINUATION LETTER FROM USOE

Teacher-Aides

86

The memorandum dated March 31, 1971 which was received from the U.S.O.E. has several stipulations that are new to project personnel involved in third year projects. In order to clarify present needs of the Regiom XIII Bilingual Education Program, the following analysis is written for further clarification and/or justification of the budget request submitted in this proposal.

Teacher-aides under Title VII have been utilized in the project during its first two years of operation. The primary source of funding has been from Title VII. Needless to say, aides have proven to be an invaluable resource to teachers and students in helping the teaching-learning process become more humanized and and more meaningful. The success of the program is certainly to a great extent attributable to their valuable contributions.

School districts have been convinced that teacher-aides are an invaluable resource to the success of any program. LEA's are slowly implementing, as state funds are made available, teacheraides in their over-all programs. Minimum foundation funds are methodically being allocated to school districts for hiring aides that professionals and patrons are demanding. Other funding sources are constantly being investigated to supply this basic need that heretofore had been neglected. To cite an example, LEA's served by this project are continuing to hire aides through minimum foundation, Model Cities, Title I and the Experimental School Program being presently submitted for approval by federal sources by the Austin ISD. This shows an interest and commitment on the part of school districts to the need of this resource that will certainly enhance the teaching-learning process.

Further interest has been shown by school districts through their student-assistant programs. Both public school systems served by this project have student-assistants helping teachers as aides for high school credit. Of course, this credit course has several reasons for its existence, one of which is to help teachers teach more effectively.

Further serious consideration should be given to furnish first grade aides for this project since a great amount of work has been done in an attempt to individualize instruction in all the classrooms. It is well documented that individualized instruction yields positive results in the degree of learning achieved by pupils. In order to obtain favorable results in bilingual ducation, individualized instruction was considered an imperative

at its imitial implementation. At this stage, it is essential that continued emphasis be focused on this type of teaching-learning process. Meedless to say, a highly individualized program requires affitional personnel especially in the first grade. Without the support of aides, a different instructional approach closely resembling the traditional classroom will have to be implemented. This will be a necessity that is far from desirable.

Another are of concern is the unavailability of bilingual teachers. Effingual teachers are not yet available for all classrooms in the project. As has been stated repeatedly in the original and continuation proposals, Central Texas does not at this time have an unlimited supply of teachers capable of instructing in two languages. Bilingual aides are presently being utilized to help teachers who are not bilingual. Eliminating these aides will in effect hinder bilingual efforts in the project.

Aides in this project are already being shared by all teachers. Eliminating them during the most crucial year which is the first grade will certainly endanger the success of the program.

Furthermore, both public school districts have supported the program by initiating bilingual kindergartens during this year. The kindergartens are supported by state and local funds. Most of these children will enter the bilingual program in the 1971-72 school year. School districts have shown initiative and positive support for bilingual education through these efforts. Continued support for bilingual education has been shown by their own initiative in implementing bilingual programs on other campuses in the district. Over thirty new bilingual classes will be started this year. None of these classess will be supported by Title VII funds.

Teachers in the project are being paid by state and local funds. This is certainly an indication of the seriousness with which they view the impact of bilingual education on children and the learning process.

Title VII funds provided for this project were increased during the second year of operation; however, the per-pupil cost has decreased significantly. The slight increase in funds for the 1971-72 year is an indication of increased staff needs since the project is serving a larger school population.

10.1* team teaching-8 team teachers: 1 bilingual teacher & 1 monolingual English speaker

II. STATEMENT OF NEED

- The bilingual problem is very acute in the three Α. schools directly involved in the project. Mexican-American children comprise 97 percent of the enrollment in both Zavala and Dolores Schools, while Lockhart Elementary has over 60 percent of its total membership among Mexican-American students. It is anticipated that the majority of the project population will be made up of Mexican-American students, since Lockhart schools practice ability grouping and the language handicap generally places the Mexican-American children in the same groups. Throughout the fifteen-county area served by Region XIII Education Service Center approximately 22 percent of all students enrolled speak Spanish as their first language. of the schools are in need of bilingual education programs and will be able to secure technical assistance in implementing local programs through this project. A minimum of 35 school districts in the Region XIII area could benefit from bilingual instruction.
- B. Eighty-seven percent of the children in the target schools whose mother tongue is other than English, ages 3 to 18, come from low income families.

The target group was selected from districts with high C. concentrations of Mexican-American children. all percentage of Spanish-surnamed students in Austin ISD is only 19 percent, but 97 percent of the students in Zavala Elementary School are from Spanish speaking The Dolores Catholic School in Austin also has 97 to 98 percent Mexican-American students. Lockhart Independent School District has an overall enrollment of Spanish-surnamed youngsters of 46 percent, but the first grade projections for September 1969 are 60 percent Mexican-American enrollees. Since only three of the eight first grade sections of Lockhart will be directly involved in the project, 95 to 100 percent of the target group will be students whose mother tongue is other than English.

12.0 HETHODS OF SECOND LANGUAGE TEACHING

(Hark all that apply; some projects may use a combination of methods)

12.0 l,2,2a

(1) Audio-lingual habit skills or behavioral approach. Emphasis all grades use on communication. Includes contrastive analysis of sounds audio-lingual (units) in both languages by teacher and students, student modeling and repitition of tapes and/or fluent teachers' model sentence patterning-patterns until responses are automatic. Structural drills and systematic dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductivegeneralizations drawn from examples.

(2) Transformational-cognitive approach Acquiring an understanding of the structural patterns or grammatical rules of a language. 2nd grade only & above

*11.17 Formal instruction is in either 1 language or the other. Aide may be teaching one small group in Spanish and teacher in English or vice-versa. let grade there is some mixing in trying to be understood & not inhibit ents. "

P 17

See Xerox

P 17

2a-inductive -generative approach:	through listening to communication,
perhaps of peers, and attempting	the new language in situations which
call for the student to generate	sentences - test his understanding.
(the way native language is accu	ired)
Includes direct association between	een object, picture or action and
word in second language.	

2b-deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

Grammar - Translation Nethod
Formal study of rules of grammar and translation from first language to second. Emphasis on reading in second language rather than using it for oral communication.

- Specific instructional materials will be purchased from the various publishers and developmental projects throughout the duration of the program
- Local materials will be developed by teachers and staff to provide specific local needs
- Individualized instruction will be provided for correction of language usage and numerical symbols through the utilization of paraprofessionals and specific materials
- Field trips will be an integral part of the program to broaden concepts and increase real life experiences; these would include the zoo, museums, concerts, industries, sporting events, and nature hikes. Spanish would be utilized as an integral part of each activity
- Resource persons will be utilized to enrich the curriculum and to extend vicarious experiences
- Appreciation of the cultural heritage of the child will be emphasized in the social studies, art, music, and language programs
- Regular bi-monthly training sessions for staff and project teachers will be carried out throughout the year with consultants available from the University of Texas, Texas Education Agency, Southwest Educational Development Laboratory, and other agencies

Materials

18

- Aural/oral activity guides in both Spanish and English will present basic concepts in the first semester
- . The aural/oral guide in Spanish will serve as the introductory phase of the program
- Experience charts will be developed to provide the child with reginning reading materials in Spanish
- . The developed experience charts will be reproduced in Spanish for additional reinforcement of reading skills. Basal reading readiness materials will be utilized in Spanish translations and will help to prepare the children for reading in English
- . Social studies and science concepts will be introduced through auxal/oral Spanish
- . Math, English as a second language, art, health and safety, physical education, and music will be introduced by the English speaking teacher with assistance from a paraprofessional
- . Spanish and English games, songs, plays, poems, and dramatics will be correlated with the program
- Instruction in both languages will be utilized at intervals during each day covering similar materials
- Individualized instruction will be possible through
 the use of tape recordings, records, and various
 audio-visual devices

III. Objectives

A. General Objectives

The bilingual project proposed for Region XIII,
Education Service Center will include three closely
related components. The first of these components
will be to establish model bilingual programs in five
first grade classes on three separate campuses. The
second component shall be to identify, evaluate, and
adapt a wide range of bilingual instructional materials to the needs of the three elementary schools.
A third component will be to develop an extensive
parental involvement program for the parents of the
children in the pilot classes.

Success in this three-pronged program will lead to replication of the program in other schools in Central Texas with similar bilingual problems. The project staff will provide technical assistance to other schools in the region concerning program development and implementation. The Education Service Center can serve as the communications link between the project and other schools.

- B. Long Range Program Objectives
 - 1. To develop model elementary bilingual programs, grades 1 - 6 in at least three elementary schools in Region XIII (five years)

re criteria for grouping

The target group was selected from districts with high C. concentrations of Mexican-American children. The overall percentage of Spanish-surnamed students in Austin ISD is only 19 percent, but 97 percent of the students in Zavala Elementary School are from Spanish speaking The Dolores Catholic School in Austin also has 97 to 98 percent Mexican-American students. Lockhart Independent School District has an overall enrollment of Spanish-surnamed youngsters of 46 percent, but the first grade projections for September 1969 are 60 percent Mexican-American enrollees. Since only three of the eight first grade sections of Lockhart will be directly 17.3 involved in the project, 95 to 100 percent of the target group will be students whose mother tongue is other than English.

for

Project School	Total Enrollment	<u>Project</u> Participants	<u>Control</u> Participants
Zavala Elementary Austin ISD	562	60	30
Lockhart Elementary Lockhart ISD	1,060	60	30

20.0 COGNITIVE DEVELOPMENT

20.1 Cognitive development in early childhood grades is fostered through: 0-method not mentioned 20.1 1,2,3,4,5

1-structured envirionment rich with materials child can manipulate order, compare, match for perceptual-motor development

* 2-non-verbal materials, such as Montessori materials from which children can learn sensory discrimination, matching, seriation, counting, addition, subtraction

3-labeling and discussion of concepts related to time, space, distance, position

4-labeling and grouping actual objects to learn classification; grouping objects with common attributes and labeling their

attributes (i.e. colors, sizes)

5-direct experience of processes of science through discovery, using materials rather than text; active experimentation by child with teacher's

guidance rather than teacher demonstration. 6-direct experience of math through discovery rather than instruction 7-other (specify or xerox) p. no. and document:

*2-all classrooms have these materials influenced by the bilingual Montessori School.

*5-science kits used on limited basis because of lack of time

All these are done in classes-all classes contain materials for these purposes but mostly in 1st grade and some at 2nd grade.

20.2 Cognitive development in later grades (grade 4 and above) 0-method not mentioned 1-specify or xerox p. no. and document (only grade 1 & 2 in 1970-71) n.a.-no grade 4 or later grades

C,7

II. STATEMENT OF NEED

- The bilingual problem is very acute in the three Α. schools directly involved in the project. Mexican-American children comprise 97 percent of the enrollment in both Zavala and Dolores Schools, while Lockhart Elementary has over 60 percent of its total membership among Mexican-American students., It is anticipated that the majority of the project population will be made up of Mexican-American students, since Lockhart schools practice ability grouping and the language handicap generally places the Mexican-American children in the same groups. Throughout the fifteen-county area served by Region XIII Education Service Center approximately 22 percent of all students enrolled speak Spanish as their first language. of the schools are in need of bilingual education programs and will be able to secure technical assistance in implementing local programs through this project. A minimum of 35 school districts in the Region XIII area could benefit from bilingual instruction.
- B. Eighty-seven percent of the children in the target schools whose mother tongue is other than English, ages 3 to 18, come from low income families.

2. Plans for the Second Year of Operation

The activities of this project will be developed around four program components. These components will include implementation of the instructional program; identification, usage, and evaluation of materials which includes adaptation and development; staff development, and parental involvement activities.

The program will involve five first grade and five second grade bilingual classes and four control groups in three campuses, Lockhart Elementary School, Dolores Parochial School, and Zavala Elementary School. The classes in Lockhart will be organized with teachers working as a team; monolingual teachers will teach in English and bilingual teachers in Spanish.

Teachers in Dolores and Zavala Schools will have self-contained classroom organization with each teacher responsible for instruction in both languages.

Individualization of instruction will continue to be of major concern. Methods employed to create awareness of the need for this type of instruction will be dependent upon needs as determined from observations using instruments included in the evaluation design.

The instructional component consists of five major areas taught in two languages: communication skills which include oral

language development, reading and listening; computational skills; acceptance and appreciation of the child's cultural heritage and the dominant culture; and self-concept.

The materials component consists of identification, usage, and evaluation of a wide variety of instructional materials to determine those most effective for use in Central Texas schools. Acceptable materials will be identified early in preparation for teacher selection before the beginning of the school year. Included in this component are the adaptation of existing materials and the development of new materials as needs are determined. Other teaching aids needed to support the instructional program will be developed.

The initial step in the implementation of the project will involve orientation to the program of all personnel, administrators, teachers, and teacher-aides. This is the first activity of the staff development component. Included in this component are teacher-aide training on their role in the classroom and professional and para-professional awareness of the processes involved in the teaching-learning process. A continuous staff development program will be developed to expand the introduction to the teaching-learning process and other areas identified as important to the success of the program. Experts in these fields will be retained.

21.0 SELF-ESTEEM

Stated methods of project compenent expected to increase self-esteem: no-self-esteem not mentioned as an objective

O-self-esteem is an objective but methods not specified Teacher encourages pupil to verbally express his feelings:

1-through role-playing

puppetry

- (3+)languago-experience approach: students dictate stories from their own experience experience charts used extnesively
- (4) teacher accepts, aclmowledges ideas and feelings

5-teacher encourages non-verbal expression of child's feelings through painting, music, dancing

- 6-teacher provides experiences in which the various ways that children act are accepted by the teacher; their actions are discussed and the children are encouraged not to make fun of "different" ways
- 7-teacher provides experiences leading to competency and success
- 8-teacher provides experiences where occasional failure is acknowledged as part of everyone's experience; second attempts are encouraged
- 9-other (specify) (xerox or summarize) document page #

Teacher provides experiences in pupil self-direction and acceptance of responsibility, such as:

10-pupils act as tutors for other pupils

11-puils have some options in choice of curriculum

(12-pupils choose activities from a variety of interest centers

13-older puils participate in curriculum planning and/or development

14-pupils write a bilingual newspaper for dissemination to the community

15-other (specify)

Flanders system for interaction analysis is 22.0 LEARNING STRATEGIES used to determine if teacher helps child's self-image.

1-The project mentions the following specific learning strategies

as important for reaching a particular ethno-linguistic group: (specify or xerox) Document and Page no. Example: Navajo children resist participation in an authoritarian, traditional classroom. An open classroom where teacher participates rather than directs all activities and students or groups of students initiate activites, move about freely or sit in a circle or horseshoe rather than sit in rows, has been found more effective. 0-none mentioned

(44 teacher accepts, aclinowledges ideas and feelings 5-teacher encourages non-verbal expression of child's feelings through painting, music, dancing 6-teacher provides experiences in which the various ways that children act are accepted by the teacher; their actions are discussed and the children are encouraged not to make fun of "different" ways 7-teacher provides experiences leading to competency and 8-teacher provides experiences where occasional failure is acknowledged as part of everyone's experience; second attempts are encouraged 9-other (specify) (xerox or summarize) document page π Teacher provides experiences in pupil self-direction and acceptance of responsibility, such as: 10-pupils act as tutors for other pupils 1st grade 11 puils have some options in choice of curriculum children (12-pupils choose activities from a variety of interest centers select ac-13-older puils participate in curriculum planning and/or tivity from development interest cen-14-pupils write a bilingual newspaper for dissemination to the ters community 15-other (spenify) Flanders system for interaction analysis is 22.0 LEARNING STRATEGIES used to determine if teacher helps child's self-image.

1-The project mentions the following specific learning strategies as important for reaching a particular ethno-linguistic group: Document and Page no. (specify or xerox) Example: Navajo children resist participation in an authoritarian, traditional classroom. To organize advisory boards in each	C. GRADE LEVEL 1,2,3

Each school has a functioning bilingual advisory board with six to nine members in each. Their main functions have been to support and assist with the program activities. The specialist has received much assistance from them in these areas. Monthly meetings have been held since the project's implementation with 90 to 100 percent of parents in attendance.

Parent participation in meaningful school-related activities has been accomplished. Forty percent of the parents have participated in some activity from September to March. Parents in Zavala School have become more active since many already were serving the school in some capacity. They have participated as chaperones on field trips, aides in the classroom, as well as serving and baking for school projects. Dolores School has a similar parent participation program. In addition parents have relieved the teacher of supervision during recess and lunch activities. Parent conferences encouraged by the specialist and enthusiastically supported by the teacher and administration have become an integral part of the school routine. Lockhart parents slowly became involved in the parent participation program. Since it is mainly a rural area whose residents suffer economic deprivation of varying degrees, it was a slower process. Sewing curtains, baking for parties, and serving as aides during holiday activities have been their major contributions. Attendance at parent meetings has increased from five during the first meeting to forty for the April meeting. Parent attendance in meetings in the other two schools has ranged from 12 to 40.

Opportunities for classroom observations have been well received by parents. Final evaluation has not been done but over 300 observations are already documented.

B. First year operation of the program has been a general success with final evaluation still to be completed. An experienced teaching staff and administration plus the work done by the project staff have had a definite impact on the over-all program. Teaching methods have been modified to meet children's needs and the changes in the curriculum. Process objectives are being met as evidenced by planned observation procedures used in evaluation.

Parent participation in Spanish classes organized and implemented for them has met with very limited success. Questionaires sent to parents indicated interest but actual participation was not successful. A different approach will be implemented as part of the parent education program.

- C. Long range objectives remain as stated in original proposal.
- D. Program modifications consist of the addition of a parenteducation program to assist parents in helping their preschool children develop an experiental background before
 starting formal schooling. Since these children come to
 school with limited experiences that encourage development
 in either language, this is of major importance. Methods
 of assisting their children already in school will also be
 included. A more detailed explanation of the parent education program is included in the evaluation design.

Control rooms are difficult -all 3 schools have done this. page 20 to find because of this. 25.2 Project's impact: 25.2 1.2.3 (1) Project mentions that other classes in the school, but not in the program have picked up methods or material from the bilingual program (2)Project mentions other schools in the local educational system have started bilingual programs -3 school districts (3-Project mentions that a University has instituted teacher training courses in bilingual education to meet staff development needs - the 2 Universities have implemented bilingual education degree programs-U. of Texas and St. Edward's. 26.0 ROLE OF EVALUATOR Also Southwest Texas at San Marcos. 26.1 Evaluator has field tested, on a group of children who are of the same language, culture and grade levels as the children in the bilingual program: 26.1 2 0-not mentioned 1-published measures 2 staff developed measures = Cross Cultural Inventory; Mi Clase - My Class -3-staff translations of published measures mates - Self-Concept Scale 4-staff adaptations of published measures 26.2 Evaluator has personally observed students in the program: 0-not mentioned no-never 1-once or twice during the year 2-more than twice 3-regularly 4-other (specify) 26.3 Evaluator has met with teachers: 0-not mentioned no-never 1-once or twice during year 2-more than twice 3-regularly 4-other (specify) 27.0 EVALUATION PROCEDURE 27.1 0-not specified 1-A comparison group has been chosen 2-)A comparison group will be chosen 27.2 2,4,6,8 C,165 0-not specified (mark all that apply) 1-Pre-tests have been given to project group or sample " will be See Yerox 3-Post-tests have been given to project group or sample Fre-tests have been given to comparison group will be will be Copy 20a A-Post-tests have been given to comparison group
