ABSTRACT

This report is based on a questionnaire survey sent in Spring 1971 to all state foreign language supervisors. In those cases where state totals were not available, questionnaires were sent directly to the school districts. An analysis of the compiled figures showed that in Fall 1970, the public secondary schools in the 7-12 range reported a foreign language enrollment of over 4.57 million, comprising 24.8 percent of the total enrollment. The report consists of an introductory summary of results, summary tables, and individual tables by language which present a breakdown of enrollment data by region and state, with comparative data from 1965 and 1968.

ABSTRACT

Scebold, C. Edward

Foreign Language Offerings and Enrollments in Public Secondary Schools,
Fall 1970.

June 1973, 179 pp.

Modern Language Association of America, 62 Fifth Avenue, New York, N.Y. 10011.

U.S. Office of Education, Institute of International Studies, Project No. 1-1012, Contract No. OEC-0-71-2404(823)

This report is based on a questionnaire survey directed in Spring 1971 to all state foreign language supervisors. In those cases where state totals were not available, questionnaires were sent directly to the school districts.

An analysis of the compiled figures showed that in fall 1970, the public secondary schools (PSS) in the 7-12 range reported a foreign language enrollment of over 4.57 million, comprising 24.8 percent of the total PSS enrollment of 18.4 million students. Two years earlier, in 1968, 4.75 million foreign language enrollments were reported from the PSS population of 17.5 million students.

The report consists of an introductory summary of results, summary tables, and individual tables by language which present a breakdown of enrollment data by region and state, with comparative data from surveys undertaken in 1965 and 1968.

FOREIGN LANGUAGE OFFERINGS AND ENROLLMENTS IN PUBLIC SECONDARY SCHOOLS, FALL 1970

Jeffrey Meyerson, MLA Research Staff

C. Edward Scebold, ACTFL Executive Secretary

This study of foreign language enrollments in public secondary schools is the tenth in a series that has been prepared by the Modern Language Association since 1958. Taken collectively, these reports demonstrate the impact of the National Defense Education Act of 1958 on foreign language study and provide a quantitative measure of the progress made by FL study in the nation's high schools during the last twelve years. The present study deals primarily with enrollments in fall 1970, but it also presents comparative data from earlier reports, particularly from 1965 and 1968, the dates of the most recent studies.

In fall 1970, the public secondary schools (PSS) in the 7-12 range reported a foreign language (FL) enrollment of over 4.57 million, comprising 24.8 percent of the total PSS enrollment of 18.4 million students. Ten years earlier, in 1960, 2.8 million FL enrollments were reported from the PSS population of 11.8 million; and two years earlier, in 1968, 4.75 million FL enrollments were reported from the PSS population 17.5 million students. While the PSS population increased by about 863,000 between 1968 and 1970, the FL enrollment dropped by 181,000. During the two-year period, there was, therefore, a drop in total enrollment in foreign languages as well as a drop in the percentage of the total school population studying a foreign language.

Distribution of the FL Enrollment

In the fall 1970, the five leading modern foreign languages (MFLs)--Spanish, French, German, Russian, and Italian--accounted for 93.8 percent of the total language enrollment in grades 7-12, Latin for just over 6 percent, and "other" languages, about a dozen all told, for less than one-half of one percent.

Chart A supplies a comparison of FL enrollments in 1965 and 1968, the dates of the latest reports, and in 1970. Column 2 gives the national totals, columns 3-10 give a breakdown by region. New England continues to lead in proportion of PSS population enrolled in FL, with 44.6, and is the only region to show an increase over the 1968 figure. The Mideast follows, with a percentage of 38.5, followed by the Far West, with 25.8. The Great Lakes, 22.3, is the only other region to show a figure of over 20 percent.

Nationally, FL enrollment as a percentage of PSS population in grades 7-12 fell from 27.1 in 1968 to 24.8 in 1970, continuing a trend that began with the decrease from 27.4 in 1965 to 27.1 in 1968. An upward trend had continued unbroken from 1960 to 1965 (the 1960 percentage was 23.4).

Over half (51.5%) of the high school students (grades 9-12) of MFLs are studying Spanish (in 1968, the percentage was 48.5). French is in second place, with 35.0 percent of the total MFL enrollment, and German is third, with 11.7 percent.

Latin attracted approximately 283,000 students in 1970, and the share of Latin in the total FL enrollment dropped from one in twelve in 1968 to one in seventeen in 1970. Italian and Russian enrolled approximately 35,700 and 23,300, respectively. Italian was the only language other than Spanish to show an increase in total enrollment between 1968 and 1970.

A dozen "other" languages are taught in secondary schools, all with very limited enrollments. The total enrollment in "other" languages has dropped from 21,400 in 1968 to 17,000 in 1970. Some additional enrollments may be hidden in the unspecified "other" languages reported (see Table 9-A). Japanese has the largest enrollment with 8,511; Portuguese is second with 1,850, followed by Hebrew, 1,454, and Chinese, 1,345. The enrollment in Swahili nearly doubled in a two-year period, from an enrollment of 534 in 1968 to 1,011 in 1970; Xhosa remained at approximately the same total enrollment, 280 reported in 1970; no other African languages were reported. American Indian language

study appeared only in the figures for Navajo, a total of 25 students.

Chart B shows the enrollment pattern in advanced courses as reported annually from 1961 to 1965. In a comparison of the data compiled in 1965 with the 1970 data, the figures show significant growth in Spanish, French, German and Italian.

The summary table below constitutes a capsule history of foreign language study in the 9-12 grade span of U.S. high schools over the past 80 years. In 1890, one high school student in three was enrolled in Latin, and one in six was studying either German or French. By the turn of the century, the proportion of high school students enrolled in Latin had risen to half, and in German or French, to a fifth. In 1910, Spanish made its appearance in the high school curriculum, with an enrollment of less than one percent of the school population.

Following World War I there was a dramatic shift in the balance among the languages. German, formerly the leading modern foreign language, all but disappeared from the course of study, and French became the leader. In 1922, French enrolled 15.5 percent of the high school population, Spanish followed with 11.3, and German was in last place, with less than one percent. Latin, with 27.5 percent of the high school population, almost exactly equalled the combined modern language enrollment.

The 1930's and 1940's saw a general decline in foreign language study. By 1948, only one-fifth of the high school population was enrolled in any foreign language. Spanish had emerged as the leading modern foreign language, with 8.2 percent of the high school population; French, which had not yet recovered from the catastrophic drop it suffered in World War II, had less than 5 percent.

Beginning in 1958, the picture in modern language brightened year by year until the decline experienced between 1968 and 1970. The 1970 figures show that total foreign language enrollment dropped, while PSS enrollments continued to increase. Spanish was the only significant exception to the general downward trend: enrollment inched up from 13.3 percent in 1968 to 13.6 in 1970. French dropped from 10.4 to 9.3;

SUMMARY TABLE

Public High School Enrollments in Foreign Languages with Percents of Total

Year	PSS Enrollment	MFL Enrollment	% of MFLs in PSS Enrollment	Spanish Enrollment	% of Spanish in PSS Enrollment	French Enrollment	% of French in PSS Enrollment	German Enrollment	% of German in PSS Enrollment

1970	13,301,883	3,514,053	26.4	1,810,775	13.6	1,230,686	9.3	410,535	11.7

- Note: 1. All foreign language enrollments from 1890 through 1948 are estimated from percents of the total enrollment reported by William R. Parker, The National Interest and Foreign Languages, U.S. National Commission on Cultural Organization, 1957, pp. 52-53.
2. The totals of the modern foreign languages (columns 5, 7, 9, 13) do not equal the MFL enrollment because they include a small number of enrollments for "Other Languages." (See Table 9-A for a summary.)

ded from percents of the languages in the total high school enrollments given by
 s. National Commission for the United Nations Educational, Scientific, and

not equal the MFL enrollment totals in column 3, since the column 3 figures
 T. -A for a summary of "Other Languages" enrollments, 1970.)

German dropped from 3.3 to 3.1; Russian dropped from .2 to .1; Italian remained constant at .2; and Latin dropped from 2.9 to 2.0. The percentage of high school students enrolled in all foreign languages decreased from 30.6 in 1968 to 28.4 in 1970.

Special Explanations

In the tables that follow, language enrollment data comparing 1965, 1968 and 1970 figures are first given for grades 7-12. Succeeding tables give the same information broken down by grades 7-8 and 9-12.

The B Tables for each language and Table 2-D show a comparison in enrollments between 1965 and 1968 and between 1968 and 1970 for the secondary grades 7-12, and give the percent of change in the enrollment over each of the periods. An additional column gives the percent of change in the total PSS student enrollment over the same period of time, for comparison with the language enrollment changes. This high school population increase was obtained from enrollment figures published by the U.S. Office of Education.

Tables of data for the individual languages are organized by the following system: the numerals 3 through 8 designate the languages--Spanish, French, German, Russian, Italian, and Latin, in that order--and the letters A through G designate the nine tables into which the data for each language are organized. The pattern is consistent, so that comparisons between languages are easy to make. Table 3-A, for example, shows Spanish enrollments in grades 7-12 for fall 1970, by state, with breakdown by course; Table 4-A gives the corresponding information for French, 5-A for German, and so on. Table 9-A is devoted to enrollments in languages other than the six with the largest enrollments.

Finally, the summary table above gives a succinct history of foreign language study in the public high schools (grades 9-12) of the United States from 1890 to

the present date.

"General," "exploratory," and "after-school" courses were not included in the tabulation of enrollments.

A course is considered to be one full year of foreign-language study on the secondary level counted as a unit of credit toward graduation.

Percents have been rounded off to the nearest tenth except where they do not reflect distinctions unless carried to the hundredth place.

The following abbreviations have been used in the text, charts, and tables of this report:

FL(s)	foreign language(s), i.e., modern foreign languages plus Latin and Greek
MFL(s)	modern foreign language(s)
PSS	public secondary schools(s)
