TITLE Report of Committee "Z" on the Economic Status of the Profession, 1972-73.

INSTITUTION American Association of Univ. Professors, Akron, Ohio.

PUB DATE Jan 73

NOTE 16p.

EDRS PRICE MF-\$0.65 HC-\$3.29

DESCRIPTORS *Educational Finance; Faculty; *Higher Education; *Personnel Policy; Salaries; *Salary Differentials; Sex Discrimination; *Teacher Salaries; Teacher Welfare; Wages; Women Teachers

ABSTRACT

This report represents the results of a salary study of the full-time faculty members listed in the Board of Trustees' minutes at the University of Akron. Tentative conclusions suggest: (1) While changes in salaries at the University of Akron over the last several years have generally kept pace with changes in the cost of living, the more recent pattern is a drop in the real value of those salaries. (2) On a rank-by-rank or an over-all basis, average salaries at Akron University compare quite favorably with other Ohio institutions. (3) These data do not appear to indicate the existence of a University policy to eliminate unjustifiable differences between male and female salaries. The appendix presents a listing, by college, department, and rank of all salaries of the faculty. (MJM)

REPORT OF COMMITTEE "Z" -- ON THE ECONOMIC STATUS OF THE PROFESSION

INTRODUCTION

This report represents the results of the salary study made by the Committee on the Economic Status of the Profession (Committee Z) of the Akron University Chapter of the American Association of University Professors. The study is intended primarily to serve members of the A.A.U.P. but may also benefit other individuals and groups within and outside the University who are interested in and affected by salary studies. In order to better serve your interests, the Committee requests your comments and suggestions regarding this Report.

The basic format of last year's report has been retained in order to provide comparable, meaningful data for the observation of trends in the course of salary revisions. To assist in the interpretation of the statistics, the "highlights" of each table are discussed. Where questions regarding procedures might arise, footnotes to the table(s) will hopefully provide answers. The accuracy of the data may not be of the level attained by some other chapters of the A.A.U.P. -- some chapters receive computer assistance directly from their administrations, while all work on this report was performed by members of Committee Z.

In view of individual differences in duties and contracts, questions may arise as to (1) who should be included in the principal summary of the report and (2) how salary figures should be adjusted to attain a comparable base for all individuals. The answers to these questions are necessarily somewhat arbitrary; but previous salary studies, as well as practices of the national A.A.U.P., provided some guidelines for the decisions reported in these two areas.

Who Is Included. Only those employees listed as full-time faculty in the Board of Trustees' Minutes are included in these tables. In some cases, these faculty also have duties other than teaching. If a note appeared in the Minutes indicating that non-teaching duties constituted one-half or more of the faculty member's assignment, then that faculty member was excluded; if no such notation appeared, then the faculty member was included. Lecturers are also included since some of them teach for at least one-half of their assignments, attend and vote at faculty meetings, and are therefore not distinguishable from other faculty.

Academic Year. For purposes of this report, all salaries were adjusted to a common base: the academic-year salary. A 9-month basis is used as this salary. Salaries for faculty members holding 12-month contracts have been converted, therefore, to a 9-month basis using a conversion factor of 10/12 (0.833).

GENERAL DATA

The data in Table I indicate the "history" of salaries at The University of Akron. The average change in salaries has been about 5.2% over the past nine years; however, the average percent change has fallen over the past two years.

Table II presents the basic data by rank and by college for the current academic year. These are 9-month salaries (12-month contracts were converted, using a factor of 10/12) for those faculty in the Board of Trustees' Minutes.

The overlap in these salaries continues to be of interest. The highest Instructor in Education earns more than the average Associate in Nursing. The highest Associate in Business Administration earns more than the highest Full Professor in Fine and Applied Arts. The lowest Full Professor in Education earns less than the average Assistant in Engineering and in Law.

TABLE I
AVERAGE SALARY AND PERCENT CHANGES, 1963-1973

<u>Year</u>	<u>Average Salary*</u>	<u>Percent Change</u>
1963-64	\$ 8,969	---
1964-65	9,442	5.3
1965-66	9,669	2.4
1966-67	10,107	4.5
1967-68	10,675	5.6
1968-69	11,320	6.0
1969-70	11,814	4.4
1970-71	12,932	9.5
1971-72	13,636	5.4
1972-73	14,177	4.0

*Values for the academic years 1963-64 through 1969-70 were obtained from the AAUP Bulletin. Values for 1970-71 were obtained from the April 1970 "Letter from the President." Values for 1971-72 and for 1972-73 were obtained from the Minutes of the Board of Trustees, April through October 1971 and April through October 1972, respectively.

The range by rank is also sizable. At the Full Professor level, a range of over \$10,000 exists; this means that the highest earns almost 175% as much as the lowest! At the Associate level, the range is over \$8,000; at the Assistant level, almost \$8,000; and at the Instructor/Lecturer level, over \$6,000. While these ranges may be defensible, such large ranges and overlaps do raise questions.

The data in Table III indicate the relative positions and percent changes in salaries by college. Law, Engineering, and Business continue to be the three top-ranked colleges while Fine & Applied Arts, Nursing, and Community & Technical continue to be the three bottom-ranked colleges. Note that, while the Community & Technical College is at the bottom in terms of over-all salaries, Nursing is at the bottom in two of the four ranks.

Lack of comparable data prohibits a comparison of current data for The University of Akron and other Ohio institutions. Data are available for the 1971-72 year, however. Table IV presents data for selected Ohio institutions. Among Category I institutions, Akron University ranks first at the Assistant level, second at the Associate level, third at the Instructor level, fourth at the Full Professor level, and fourth over-all. This showing is made to appear better if the two private institutions in Category I are omitted from the comparison.

SPECIAL GROUPS

Further analysis of Akron's salary data may be made by examining the salaries of "special groups." Table V summarizes the average salaries and percent changes for three of these "groups."

Table VI presents the average salaries and percent change for Department Heads by college. Law and Nursing do not have Department Heads, and the title used in the Community & Technical College is Division Head. Of some interest here is that the number of female Department Heads has been reduced from three to two during the past year and that only one college (Fine & Applied Arts) has any female Department Heads.

TABLE II
SUMMARY STATISTICS FOR 1972-73 UNIV. OF AKRON FACULTY SALARIES BY RANK AND COLLEGE

Associate	d	na	na
Assistant	11,286	11,639	+3.1
Instructor/Lecturer	8,933	8,933	0.0
Academic Deans (Deans of the Eight Academic Colleges):			
Average	\$22,396	\$23,750	+6.0

TABLE VI
AVERAGE SALARY AND PERCENT CHANGE FOR DEPARTMENT HEADS, BY COLLEGE

College	1971-72	1972-73	Percent Change
Arts & Sciences	\$20,300	\$21,650	+6.7
Bus. Administration	21,875	22,376	+4.6
Commun. & Technical	17,000	17,850	+5.0
Education	17,313	18,510	+6.9
Engineering	22,500	23,502	+4.5
Fine & Applied Arts	18,040	19,300	+7.0
All Colleges	19,617	20,947	+6.8

FEMALES

The position of the female at The University of Akron has been under study by the AAUP for over two years. Last year, Committee Z classified the salary data by sex and analyzed the results. That procedure indicated that some "improvement" (narrowing of the difference between male and female salaries) resulted last year in nearly all areas of the University. That same analysis is not so encouraging this year (Table VII). First, the "average gains" are generally not so large as they were last year; and second, in several areas the gap between male and female salaries even increased.

Table VIII presents data which may also reflect upon this matter. First, females continue to be employed primarily at the lower academic ranks, although some improvement does appear to exist. Second, the proportion of females on the faculty has not increased significantly; indeed, it remains zero in two colleges (Law and Engineering) and has decreased in three other colleges (Arts & Sciences, Business Administration, and Education).

In addition, the data in Table IX indicate that, while some promotion and hiring of females at the two upper ranks has occurred over the last three years, salary differences at those ranks have worsened. Over-all, there is no indication of a reduction in male-female salary differences nor of any significant increase in the proportion of females on the faculty.

CONCLUSIONS

Certainly, these data must be interpreted with great care. However, some tentative conclusions may be cautiously drawn.

1. While changes in salaries at The University of Akron over the last several years have generally kept pace with changes in the cost of living, the more recent pattern is a drop in the real value of those salaries.
2. On a rank-by-rank or an over-all basis, average salaries at Akron University compare quite favorably with other Ohio institutions. Indeed, the University ranks either first or second in two of the four academic levels.
3. These data do not appear to indicate the existence of a University policy to eliminate unjustifiable differences between male and female salaries. The Fine & Applied Arts College, however, has narrowed the salary gap for both last year and this year and has increased the proportion of females on its faculty. It is the only College (aside from Nursing) to have done so.

APPENDIX

The appendix to this report presents a listing by college, by department, and by rank of all salaries of the faculty. To avoid disclosure, data are omitted where there are fewer than three members at any given rank in a department.

This presentation of all salaries is (1) consistent with the practice begun by President Auburn and requested by the local Chapter at a meeting in Spring 1972; (2) consistent with recommendations of the national Committee T regarding "The Role of the Faculty in Budgetary and Salary Matters" [see AAUP BULLETIN, Summer 1972, Vol. 58, No. 2, pp. 170-172]; and (3) consistent with sound managerial practice [see especially, for example, E. E. Lawler III, "The Mythology of Management Compensation," CALIFORNIA MANAGEMENT REVIEW, 1966, Vol. 9, pp. 11-22; and PAY AND ORGANIZATIONAL EFFECTIVENESS (New York: McGraw-Hill, 1971)].

¹Gain or Loss refers to a relative gain or loss in female salaries. The values were obtained by subtracting values in the Percent Change in Means columns. A plus (+) sign indicates that the gap between male and female salaries was reduced; a minus (-) sign indicates that the gap widened.

²Average Gain is obtained by weighing the gain or loss values by the number of females at each rank. Only those ranks at which both males and females are employed were used.
