ABSTRACT

The role of the curriculum materials center at Northern Arizona University is one of providing materials for students who are working on lesson plans and curriculum planning, and for faculty who wish to utilize instructional materials in their lectures. The center, which is housed in the university library, contains textbooks, courses of study units, and other materials related to curriculum in elementary and secondary schools. The purpose of this study was to provide information and ideas regarding the policies and practices of selected curriculum materials centers so that the College of Education could more adequately approach the problems of establishing a center at the University. Included in this study were: discussions with the College of Education faculty, visits to instructional materials centers at five universities, 66 responses from 39 states to a questionnaire sent to colleges and universities with teacher education programs, and an examination of materials relevant to the establishment of a center. The results of these activities are reported upon, and suggestions are made for establishing the curriculum materials center. A copy of the questionnaire used is appended. (Author/SJ)

Appendix I - The questionnaire	

OVERVIEW OF THE STUDY

The purpose of this study is to provide me with information and ideas regarding the policies and practices of selected curriculum materials centers so that the College of Education might more adequately approach the problems of establishing a center at Northern Arizona University. At the present time the university library houses a curriculum collection of curriculum guides, textbooks, workbooks, teachers' manuals, reference books, and a number of tests and catalogs. The faculty in the College of Education have audiovisual materials as well as print materials in their offices, and it is hoped that in the near future definite provision may be made for a center to bring all of these materials together, along with audiovisual and production equipment.

Included in this study were:

1. Discussions with the College of Education faculty.
2. Visits to the IMC's at Arizona State University, The University of Arizona, The University of California at Los Angeles, California State University at San Diego, and the University of New Mexico.

3. Questionnaires mailed to institutions in each state.
4. Examination of materials that may be helpful in the establishment of a center.

I interviewed the following people, and they were especially helpful in providing me with ideas and showing me around their facilities:

Shirley Thurston, Librarian
Instructional Materials Collection
University of Arizona, Tucson

Dr. Vernon S. Gerlach, Director
Roger Parker, Coordinator of Equipment Services
Mary Ausman, Librarian
Instructional Resources Laboratory
Arizona State University, Tempe

Dr. M. Frances Klein, Director
Curriculum Inquiry Center
University of California at Los Angeles

Miss Johnnie L. Phillips, Co-Director
Education Resource Center
California State University, San Diego

Mrs. Gemma Morris, Coordinator of Curriculum Materials
Miss Lotsee Smith, Co-Director
Learning Materials Center
University of New Mexico, Albuquerque

The questionnaire (See appendix) was mailed to at least one, and in many cases, several colleges or universities within each state. Institutions surveyed included a wide range of sizes and purposes, but each one has a program for teacher education. Sixty-six schools responded to the questionnaire, and they are as follows:

<u>INSTITUTION, LOCATION, ZIP CODE</u>	<u>ENROLLMENT</u>
1. University of Alabama University 35486	13,000
2. Auburn University Auburn, Alabama 36820	14,000

65.	Wisconsin State University Whitewater 53190	7,712
66.	University of Wyoming Laramie 82070	8,000

Thirty-nine states are represented in the survey and the visits. There was no response from schools in Arkansas, Hawaii, Maine, Maryland, Mississippi, North Carolina, Rhode Island, South Carolina, South Dakota, Vermont, and Virginia. The purpose of the survey was to provide alternatives in policies of selection,

circulation, and administration, to determine methods of classifying and cataloging the curriculum collection, and to find which policies and methods are in most common use.

INSTRUCTIONAL RESOURCES LABORATORY
ARIZONA STATE UNIVERSITY, TEMPE

The IRL is a pleasant, new facility that is handled directly by one full-time librarian and three student helpers. It is divided into two general areas -- one for production and one for curriculum planning. The production area includes a copy-stand (A Pentax or one of several instamatic cameras may be borrowed by students or faculty.), a Thermofax copier, a paper-cutter, and a dry mount press. There is a small room just off the production area where students may purchase production materials at cost. Demonstration bulletin boards display samples to guide students in their work.

The curriculum area has a very limited collection, as most textbooks and curriculum guides are housed in the university library, and films and filmstrips are in the Central Arizona Film Cooperative. Besides a limited number of textbooks and guides, the IRL keeps recent audiovisual journals on display, as well as a rack of paperback books donated by Dell Publishing Company. There is an excellent collection of book catalogs, instructional materials catalogs, and Educators' Progress Service publications.

One room is set aside for preview of 16mm films, and another room is set up for the circulation of audiovisual

equipment. The amount of equipment the IRL has available and the free circulation of it seemed to be the greatest asset of the facility. Nine student assistants handle that particular area, under the direction of Dr. Vernon S. Gerlach. It is open to both students and faculty from 7:30 A.M. to 9:30 P.M., Monday through Thursday, and from 7:30 A.M. to 5:00 P.M. on Friday.

The IRL provides the following services:

- Distribution, set-up, and retrieval of equipment
- Operators for equipment
- Consultation regarding audiovisual equipment
- Distribution of films received from the Audiovisual Center

The equipment available includes:

- 16mm film projectors
- 8mm film projectors
- Filmstrip projectors
- Slide projectors
- Tape recorders
- Record players
- Lantern slide projectors
- Opaque projectors
- Overhead projectors
- Projection screens
- Craig readers
- Language Masters
- Portable lecterns

Other than the equipment room the IRL is open from 8:00 A.M. to 5:00 P.M., Monday through Friday and provides reference service, reserve service, and periodic demonstrations and workshops for faculty and students, dealing with the resources and services available in the IRL.

Close to the IRL is an audiovisual lab with eighteen stations, where one of each type of basic audiovisual machine is

kept on hand, and a television studio that links with a classroom and a 500-seat auditorium.

Classification and cataloging are kept simple, as shown by the next several pages.

1. Types of cards entered in the Card Catalog:

Main entry: The main entry for a book, series of books, or programmed instruction book is made under the author. The main entry for most other types of material is made under the title.

Added entries: These are made for titles, series, joint authors or editors, and producers of non-book materials.

Subjects: Entries are made under one or more subjects for each item. Subjects are indicated in red. Subject entries are made as specific as possible, i.e. ADDITION. If you want all materials in the general area of mathematics, check the Shelf List under that classification, or browse through the Math shelves.

2. The call number is in the upper left corner of the card. It consists of three lines:

1st line: Subject classification. A word or abbreviation indicating the general subject area of the material (see list).

2nd line: Medium classification. Two letters indicating the medium of the material (see list).

3rd line: Cutter number. One letter (the initial of the main entry) followed by two or three numbers. When there are several items in the same class and medium with the same main entry, an additional identifying letter will appear after this number.

3. Filing and shelving:

Cards in the Card Catalog are filed in alphabetical order by the first line of the card. Authors, titles, added entries, and subjects are interfiled in one alphabet.

Cards in the Shelf List are filed by call number in alphabetical and numerical order.

Materials are shelved by call number in alphabetical and numerical order.

INSTRUCTIONAL MATERIALS COLLECTION
UNIVERSITY OF ARIZONA, TUCSON

The IMC at the University of Arizona is located in the education building at the present time, but the librarian, Shirley Thurston, indicated that the collection may become part of a media center in the new university library, which will be completed in the near future. Housed in the IMC are children's books, elementary and secondary textbooks, curriculum guides, a vertical file, encyclopedias and other reference materials, records, art prints, pictures, charts, maps, kits, various other audiovisual materials, a small collection of books on education, and a reserve collection of professors' personal copies of materials. Materials are represented in a centrally-located card catalog. There is a photocopier in the study area.

An advisory council, composed of representatives from each department, provides assistance to the librarian in matters concerning the IMC. The librarian indicated the College of Education faculty were very much involved in the IMC, and this point was evidenced even in the short time I was there, as I noted several faculty members among the users of the facility.

The budget for materials comes through the university library. For acquisition of materials, the librarian found El-Hi Textbooks in Print and Curriculum Materials (Association for Supervision and Curriculum Development) very helpful. She also has a

list of members of the state booksellers' association that provides her with the names and addresses of people to contact for free educational publications.

The classification system used for textbooks is the Textbook Classification Scheme from the United States Office of Education. For the purposes of this report, I will not summarize details of the classification system, as Miss Thurston provided me with a complete copy of it. The classification system appears to be a thorough and well thought-out system, and I will give consideration to adopting it for use in the CMC at Northern Arizona University.

Miss Thurston pointed out that lack of space is fast becoming a problem. There is no room for materials production, but there are areas for listening and viewing. There is also an audio-tutorial facility.

Curriculum guides dated before 1964 have been weeded. Storage of curriculum guides differs from that found in any other facility I visited. Guides are placed in filing cabinets; whereas, the more common practice seems to be the use of pamphlet files.

The IMC offers a wide range of services to faculty, students, and other users of the facility, and emphasis on service is reflected in the objectives that follow.

The staff of the IMC at the University of Arizona set forth these objectives in January, 1973:

1. Provide a definition of instructional materials.
2. Display the various forms of instructional materials.
3. Plan use of various forms of instructional materials in teaching.
4. Select forms of instructional materials for courses and children.
5. Relate selection of instructional materials to methods, courses, and children.
6. Provide facilities to make instructional materials.
7. Illustrate teaching methods by use of instructional materials.
8. Provide sources of instructional materials.
9. Evaluate instructional materials for different instructional purposes.
10. Assist the professional community in selection of instructional materials.
11. Inform the professional community about instructional materials.

With these objectives in mind, the staff has recommended the acquisition of current textbooks, curriculum guides, literature about the construction of curriculum, fiction and non-fiction trade books, current books about children's literature, bibliographies of instructional materials, all audiovisual materials except 16mm films, periodicals reviewing instructional materials and describing developments in curriculum and methods, and current books on teaching methods.

UNIVERSITY OF CALIFORNIA, LOS ANGELES
CURRICULUM INQUIRY CENTER

The main purpose of the Curriculum Inquiry Center is "to facilitate inquiry into curriculum" -- so states a flyer distributed by the U.C.L.A. Graduate School of Education. This inquiry is facilitated by the center making available selected learning materials currently on the market, by providing a collection of publishers' and distributors' catalogs, and by having publishers and distributors display their newest materials in the center.

The CIC is a state depository for state-adopted textbooks, so the school of education is assured of having the most-used materials on hand. In the collection are all types of media except 16mm films. Audiovisual machines are available but must be used in the center. (Machines were formerly loaned, but that policy was discontinued because of damage and losses.) There is a complete set of all criteria available for evaluating teaching materials; however, the center makes no recommendation on materials. As many materials as possible are made available for evaluation, either through purchase or display. Special materials areas include Spanish materials, Black materials, and high-interest, low-level materials.

The director, Dr. Frances Klein, is trying to get producers of audiovisual materials to put new products on display in the center, and she has met with some success. She has alerted

publishers to the concern of the school of education for students' exposure to the latest materials, and she has asked all people who view materials on display to fill out critique forms to provide feedback to the publishers and also to provide them with proof of how many people are becoming aware of their products through the CIC.

The center maintains a collection of only up-to-date materials; there is no attempt to go historical with any type of educational materials. No teacher education materials are kept in the center, only learning materials. There is no set length of time for circulation of materials, and the due date is established according to the length of time a borrower needs the material.

An advisory committee of school of education faculty helps Dr. Klein in establishing policy. Dr. Klein is assigned to the center on a quarter-time basis; there is one full-time clerk, and a graduate student in library science handles the cataloging. The center has additional student help to shoulder routine operations. Hours for the center are 8:00 A.M. to 5:00 P.M. Monday, Wednesday, and Friday, 8:00 A.M. to 7:00 P.M. Tuesday and Thursday, and 1:00 to 5:00 P.M. on Saturday.

When professors in the school of education receive examination copies of elementary and secondary textbooks, they turn them over to the center. Several years ago, \$8,000 was set aside to build the collection, and the CIC has had a materials

budget of \$2,500 each year since then. Dr. Klein feels this is just barely adequate to keep them up-to-date.

The CIC is made-up of several rooms, each one containing materials in different subject areas. One room houses social studies materials, another has mathematics and science, a third room has music and art, and a fourth one contains reading materials. One large room provides a study and display area. There is also an office and a workroom.

The graduate student in charge of cataloging is presently trying to devise a new system of organizing the materials. Up to now the center has been using a modified Dewey, and the staff feels that Dewey is not at all suited to an instructional materials collection.

One set of material that was especially interesting to me was the Index to Curriculum for Teachers on Microfiche, 1968, produced by the University of the State of New York and the New York State Department of Education. It is available from 3M Company, Box 720, Times Square Station, New York 10036.

The CIC has typewriters for student use, as well as a photocopier. The copying machine is not self-supporting, but is considered important enough that the school of education sets aside funds to pay the rental.

Dr. Klein has had open house, during which she has set up displays and sent invitations to the faculty. Publishers' displays are not included in this one-day affair. During my visit, there was one company display and other displays on drugs, Japan,

and the Great Depression.

In addition to the main purpose for the center, already mentioned, Dr. Klein has this to say: "A second purpose of the center is to encourage students of curriculum to refine and to extend the existing sets of criteria for evaluating learning materials and to develop new sets. Development of criteria is a relatively new activity in the field of curriculum and, as yet, there is little general agreement among scholars as to the substance and form the criteria should take. As the various sets are utilized, modifications will be made, and new criteria will be developed."

EDUCATION RESOURCE CENTER
CALIFORNIA STATE UNIVERSITY, SAN DIEGO

The Education Resource Center occupies one wing on the fourth floor of the new Malcom A. Love Library. The inventory of materials numbers over 60,000 items, exclusive of the entire ERIC collection, which is also a part of the center. The center is staffed by three and one-half librarians, two full-time clerks, and a number of student assistants.

The ERC has a curriculum collection composed of 33,000 curriculum guides and pamphlets and 14,000 textbooks. Since the lab school at San Diego is no longer in existence, 14,000 children's books have become part of the collection.

Even though the Malcom A. Love Library has a government

documents collection, the administrators of the ERC worked out an agreement with the government documents department to allow placement of all U. S. Office of Education publications in the ERC, where it was felt those materials would receive the widest use. Publications of the California State Department of Education are also received by the center.

2,100 standardized tests are cataloged and placed in vertical files, current publishers' and distributors' catalogs are kept in filing cabinets, and there is a bulletin and newsletter file containing issues of over 100 continuations that are not classified as regular periodicals.

The ERC is expanding its collection of filmstrips, recordings, transparencies, multi-media kits, etc. Viewing and listening equipment is available for use either inside or outside the center.

Special services include reference assistance, a separate charging desk for checking out and returning all ERC materials, and a large conference room for group work with instructional materials.

The staff feels that since the collection is so well-established, the annual materials budget of \$2,000 is adequate to keep up-to-date, since government documents and ERIC do not come out of ERC funds. They have their eye on keeping up-to-date on those materials currently in use in the California schools, and they have no intention of trying to buy materials just because

they are new.

At this time, no cut-off has been established for weeding old curriculum guides and textbooks, but already several hundred items have been removed from the main collection and are placed on shelves in the conference room. These removed items are stamped HISTORICAL, as are the cards for those items in the card catalog. The staff felt it would be a mistake to destroy outdated instructional materials in good condition, because they would be useful to people making comparative studies in educational content and methods. (The director at U.C.L.A. discarded many older materials, only to discover too late that some of those materials were much sought after.)

The spaciousness of the San Diego facility is impressive. Stack areas, reading areas, conference rooms, offices and work-rooms are all much larger than what a person usually finds. In spite of the spacious quarters, the collection is growing at such a rate that the librarians contend they will be forced to discard some materials in the near future.

Since the ERC is part of the main library, it is open the same hours as the library. The co-director asserted that the ERC should more properly be located in the Education Building, and that if there is room, I should prefer location of the facility at N. A. U. within the College of Education rather than the library. Her main reason for feeling that way is that the great majority of their users are professors and students in

education, and lab work is lessened by the inconvenience of the present location.

The center encourages recommendation of materials to purchase from the faculty and students. When faculty request materials and those materials are received, the person making the recommendation receives a notice from the center informing him of the acquisition and the subsequent classification. Request cards for free curriculum materials are mailed to publishers regularly. Sample request cards and acknowledgements are shown on the next page, page 21.

The staff is involved in bibliographic work with other departments in the library, with faculty, and with administration. Two recent efforts, both excellent bibliographies, are Governance of the University and Bibliography of Basic Books in Education.

Policies on overdue and lost materials are not particularly desirable, but there is little choice about those policies, because fees are fixed by the chancellor and board of trustees of the California State Colleges. Any money that is collected must be sent to Sacramento. The policy is as follows:

1. Limited Loan Materials:
 - a. First hour \$.25
 - b. Each additional hour .25
2. 3 Day and 1 week loans .25/day
3. Regular stack loans (14-20 days) .15/day
4. Art prints .25/day
5. Lost books & other library items Replacement cost plus service charge- \$3.35
6. Damage or mutilation \$.50 up to replacement cost plus service charge - \$3.35
7. Failure to meet admin. appointment 2.00

Education Resource Center

Gentlemen:

We should like to add the following to the Education Resource Center:

If it is impossible to supply free of charge, may we have the necessary information? Cost of item(s)? Prepaid?
Paper bound?

_____ Librarian

EDUCATION RESOURCE CENTER, MALCOLM A. LOVE LIBRARY
CALIFORNIA STATE UNIVERSITY, SAN DIEGO

EDUCATION RESOURCE CENTER
MALCOLM A. LOVE LIBRARY
CALIFORNIA STATE UNIVERSITY, SAN DIEGO

We have just received the sample textbooks which you so generously sent us, and wish to thank you on behalf of the many pre-service and in-service teachers who will benefit from their use.

The classification system used for textbooks and curriculum guides is a detailed, 94-page schedule developed by Frances I. Schalles, Education Librarian. The schedule does double-duty, as it also serves as a subject heading list. There are 78 major subject divisions. Here is a sample of some of the major subjects listed, with their class numbers:

- B9p BUSINESS EDUCATION - PERSONNEL MANAGEMENT
Includes business behavior, human relations,
job evaluation, selection, training, super-
vising, rating employees
- B9sh BUSINESS EDUCATION - SHORTHAND
Includes dictation, transcription
- B9t BUSINESS EDUCATION - TYPING
- C75 CONSUMER EDUCATION
- D3 DEMOCRACY AND CIVICS
- D4 DICTIONARIES AND ENCYCLOPEDIAS
Includes atlases
- D7 DRIVER EDUCATION
- E12 ECONOMICS
- F7 FOREIGN LANGUAGES
- F7e FOREIGN LANGUAGES - ENGLISH
- F7f FOREIGN LANGUAGES - FRENCH
- F7g FOREIGN LANGUAGES - GERMAN
- F7i FOREIGN LANGUAGES - ITALIAN
- F7L FOREIGN LANGUAGES - LATIN
- F7r FOREIGN LANGUAGES - RUSSIAN
- F7s FOREIGN LANGUAGES - SPANISH

A close accounting is kept of all activity in the center,
as shown on the following two pages.

LEARNING MATERIALS CENTER
UNIVERSITY OF NEW MEXICO, ALBUQUERQUE

Due to legislative budget reductions for higher education in New Mexico, the very existence of the Learning Materials Center is threatened, according to the New Mexico Daily Lobo for April 5, 1973. There is some alarm in the College of Education in particular, because the center has a large collection used extensively by students in education. It is indeed a large collection, although not in comparison with the ERC in San Diego. The collection, numbering 30,000 items, is housed in an area among the deans' offices in the education building. Mrs. Gemma Morris, coordinator of curriculum materials, asserts that the center comprises the largest resource and demonstration facility for pre-school, elementary, and secondary teacher training within the state of New Mexico. The center is heavily used by evaluation and adoption teams from public, parochial, independent, government, and Indian schools within the state and the southwest area.

Although arrangements may be made for using the LMC at other times, the regular hours are 8:00 A.M. to 5:00 P.M. Monday through Friday and 9:00 A.M. to noon on Saturday. The facility includes an audiovisual production area containing ditto equipment, Thermofax and Diazo transparency equipment, dry mount presses, papercutters, mimeograph, typewriters, and work spaces. There is a darkroom equipped for black and white photography. The media

equipment display area has 16mm, 8mm, filmstrip, and slide projectors for use by students. There are also two soundproof rooms for listening to and production of audio tapes. Materials for production are sold at cost in the production area.

Materials making up the collection are textbooks, curriculum guides, education journals (donated by faculty), a bilingual collection, children's literature, and various types of audiovisual materials , except 16mm films.

The facility is staffed by one director, one co-director, one coordinator, and one secretary. There are six students on work-study, each of whom works ten hours per week.

Several years ago the center was budgeted \$5,000 to build up the audiovisual materials, and since then the budget has provided \$1,400 per year for materials and \$1,400 for equipment. The coordinator supplements this by writing letters constantly asking for free materials from publishers and state departments of education. She says that she has had tremendous success because, unlike most places, she writes individual letters rather than form letters; and she always follows up each donation of material with a thank-you letter that also includes information about reactions to and use of the product. She has persuaded some companies to display their latest audiovisual materials and to make them available for loan to students. The Society for Visual Education and Encyclopaedia Britannica display their materials often and welcome the chance to have them circulated

to students.

The coordinator shoulders a major responsibility for the center, as the director and co-director teach library science and devote only half of their time to the center. Besides writing for materials, she gives orientation sessions for classes in education, she catalogs all materials (It is all original cataloging.), and she supervises the work-study staff.

Anyone can check out materials, and circulation ranges from 50 to 200 items per day. A record is kept for circulation to faculty and to students. Estimated attendance is recorded, as are fines and exhibits.

Professors often place personal materials on reserve, and these are labeled with the professor's name. One of the students has taken the establishment and organization of a vertical file as a personal project.

Recently, all materials older than 1965 were weeded from the collection, labeled as discards, and placed on a shelf labeled FREE MATERIALS. Students very readily removed the materials from that shelf.

The classification scheme used was developed locally. A sample call number is given here with a breakdown of its various components:

LMC	B - text material	b - Author's last name
B04:2	0 - Language arts subject	
S11b	4 - Reading (Breakdown of specific subject)	1972 - date of publication
1972	2 - Grade level	1-3 - Grade level use
1-3	S - Company letter	
	11 - Company code number	

Direction is provided to the staff by an advisory board made up of faculty representatives from outside the College of Education as well as within. Following suggestions by the board, the staff is providing the service of assistance in selecting, locating, and obtaining books and nonbook materials, a graphic artist to provide design and production assistance, and assistance in setting behavioral objectives and in integrating LMC materials into instructional units.

RESULTS OF THE QUESTIONNAIRE

Although sixty-six institutions responded to the questionnaire, the totals for given items do not always come to that number, as some respondents omitted answers to some items. In synthesizing the results of the questionnaire, I have totaled responses and indicated averages and ranges where appropriate. Pertinent comments and explanations from the questionnaire are included in appropriate sections.

The questionnaire will be utilized by the College of Education to provide guidelines for the future, and for faculty reference to the policies and practices in particular institutions, particular types of institutions, or institutions with a given enrollment. I have retained the questionnaires themselves for this purpose.

THE PHYSICAL SETTING:

1. Enrollment: See the list of institutions surveyed, which is included in the overview of this study.

2. Location: In its own building	1
Part of the main library.	42
Education building.	18
Part of another building.	5

Those who indicated that the curriculum materials center is part of another building designated the teacher education center, the education library, the social science building, the old science building, and the industrial arts building.

3. Size: The average size of the CMC is 3,960 square feet. The range ran from 200 square feet to 19,000 square feet.

4. Inventory: Print materials - The average is 10,960 items, and the range is 1,000 to 134,400. For the high figure there was no indication if this might be the number of all materials in education at that university, so I can only assume that the figure represents the holdings of a CMC.

Non-print materials - The average is 3,800 items, with a range of responses all the way from zero to 34,300.

ADMINISTRATION:

<u>Funded by:</u>		<u>Directed by:</u>	
Main library	39	Library	36
Education dept.	13	Education dept.	19
Independent CMC	3	Directed jointly by lib. & educ.	2
Not funded	2		

2. Full-time director or librarian? Yes: 40 No: 20

Half-time director or librarian? Yes: 16 No: 9

Among the directors of CMC's, 20 hold the bachelors degree as their highest degree, 35 have a masters degree in library science, and 5 have a doctorate. Major subjects listed, other than library science, which the majority of respondents have, are:

Education	13
Social Science	5
English	4
Mathematics	2
Foreign Language	1
Humanities	1
Music	1

3. Full-time employees: The average number is eight; the range is zero to eighteen. The modal number of hours worked each week per employee is forty.

4. Part-time employees: The average number is nine; the range is one to forty. The modal number of hours worked each

week per employee is fifteen. Most part-time employees are student help, many of them on work-study.

CIRCULATION:

1. Time limit for materials to be checked out:

Not at all	5
Not at all (A-V)	1
Overnight	7
Two hours	1
One day	3
Two days	2
Three days	4
Three days (A-V)	1
Over the week-end	1
One week	22
Two weeks	19
One quarter (12 weeks)	1
No limit	1

One CMC has established the time limit as two weeks from the Friday of the week the materials are circulated.

2. Circulation privileges:

Faculty	61
Students	60
General public	22

Restrictions in circulation: (Number in parentheses indicates if more than one respondent stated a given restriction)

Old materials only (The respondent did not define OLD) (2)

Materials are circulated only to faculty and students in education (others may use materials in the center) (3)

Circulation to the public is only with the permission of the director

Special education materials, programmed instruction materials, and catalogs do not circulate

Address is required

Circulation is allowed for classroom demonstration only (3)

Special permit cards are required for the general public (3)

Nonprint materials do not circulate

Six pieces of material is the limit in one subject area to one person

Encyclopedia sets do not circulate (2)

Circulation is restricted to students enrolled in Family Relations and Child Development, education and library science classes that need the materials for class purposes

The general public can check materials only if they do not limit the use of them for faculty and staff (2)

The general public must pay a \$5.00 deposit (3)

Only teachers are allowed in the stacks

Faculty determine restrictions for materials supporting their courses

Three items may be checked out by one person at one time

Materials to be used by an entire class do not circulate

Some materials are on permanent reserve

CLASSIFICATION AND CATALOGING:

1. Classification in general use:

Dewey Decimal 37

Library of Congress 15

Other classification and cataloging systems in use are:

Lois Belfield Watts System (Letters are used to designate subjects)

Arrangement is by subject, then by publisher, then by grade (9)

U. S. Office of Education System (2)

University of Minnesota Scheme

Subject classification taken from Textbooks in Print (3)

Arrangement is by subject, then by grade, then by publisher (2)

Arrangement is by subject, then by author (2)

Arrangement is first by grade, then by subject (2)

"Curriculum guides are cataloged using ERIC format, general subject with state as main entry, with an accession number for shelving. Textbooks are shelved by publisher...Subjects used are those adopted by the state department of instruction."

"Dewey, L.C., accession number, and a special code are all used because we are responsible for training public school media personnel. We like them to see a variety of cataloging systems in utilization. -- Thus our center becomes a training laboratory."

Nine CMC's use a local, simplified classification system. No explanation was given about what the simplified systems are like. Three have no system at all, and one has yet to determine what classification will be used.

2. Classification of audiovisual materials:

Dewey Decimal	16
Library of Congress	4
Accession number	22
Alphabetically by subject	2

3. Divided catalog: Twenty-two institutions use a divided catalog. Some of them used more than one of the types of divisions listed.

Subject separate from author and title (6)

Author, title, subject all separate (7)

Curriculum guides - films and filmstrips -
recordings - juvenile books - vertical file

Publisher - series - title - subject (Vertical
file has one c.c. for the producer of the
material and one for the subject)

Audiovisual materials - textbooks - curriculum
guides

Curriculum guides - recordings - tests -
juvenile books

Subject - title

Separate publisher file (7) (CMC directors
set up this file because professors at their
schools usually referred to curriculum
materials by publisher)

SELECTION AND ACQUISITION:

1. Acquisition of materials:

Donation by company representatives	56
Donation by faculty	43
Purchase through dealers, jobbers, etc.	55

Included in two CMC collections are materials developed and made by students and teachers. Some CMC's in California are supplied by the state with whatever materials are state-adopted.

Two institutions had little success getting donations from companies and faculty. No reasons were given.

2. Involvement in selection:

Librarian	60
Faculty	56
Students	25

Other people involved in selection at some locations are inservice supervising teachers, teachers from the community, company representatives, library assistants in the education division, and the curriculum directors. In one case, the curriculum director handles all of the selection, and in another instance the director is the only one who selects curriculum guides and nonprint materials.

3. Thirty-four CMC's have a separate budget for materials.

4. Weeding of old materials in good condition:

Textbooks	49
Curriculum guides	45

Practices in weeding:

Weed old editions as new editions arrive (5)

Keep historical collection separate from current materials (5)

Discard materials over ten years old

Discard materials over five years old (3)

One respondent repairs all guides in poor condition, regardless of age.

5. Types of materials in the CMC: In your Curriculum

Materials Center, do you have the following materials?

Curriculum guides	62
Special education materials	53
Programmed instruction materials	56
Elementary children's books	52
Free materials catalogs	56
Conservation & Environmental materials	51
Children's records and/or filmstrips	37
Professional textbooks	36
Elementary teaching magazines	31
Secondary teaching magazines	27
Elementary textbooks	62
Secondary textbooks	59
Audiovisual materials	
Filmstrips	42
Slides	35
Transparencies	38
Microforms (Microfilm, microfiche, etc.)	19
Pictures	43
Flash cards	34
Study prints	40
Art prints	32
Charts	43
Maps	39
Motion pictures	21
Motion picture loops	33
Phonodiscs	38
Phonotapes	38
Dioramas	15
Models	31
Globes	35
Games	43
Kits	46

Other materials specified:

Video tape recordings	4
Collection of magazines for clipping	1
Professional periodicals	2
Books on exhibit	1
Reference materials (Bibliographies, encyclopedias, atlases)	2
Student research papers	1
Publishers' catalogs	1
Dissertations	1

One CMC has purchased all of the ASCD curriculum guides on microfiche. Several final notes were added to questionnaires to point out that production equipment, audiovisual equipment generally, and specifically reading machines, language masters, and Systems 80 are available in the CMC.

THE CURRICULUM MATERIALS CENTER
NORTHERN ARIZONA UNIVERSITY

The curriculum materials center is housed in the university library, where materials are available to all students during regular library hours. Textbooks, courses of study units, and other materials related to curriculum in elementary and secondary schools are used by students and faculty for curriculum and methods courses dealing with instructional materials.

The role of the curriculum materials center is one of providing materials for students who are working on lesson plans and curriculum planning and for faculty who wish to utilize instructional materials as they speak of them in their classes. Classes may be brought to the CMC at any time the main library is open.

Although housing in the university library makes related readings in education readily accessible, the curriculum materials could be best utilized by students and faculty if they were housed in the education building, as was suggested during the last visit of North Central. Location in the education building would make it more feasible for faculty to bring their classes to the materials center for lab work and would also allow students working with materials in the elementary school library to correlate their work with curriculum materials.

The Curriculum Materials Center is presently located on

the ground floor, west wing of the university library. The center is not physically separated from the rest of the library except for the curriculum coordinator's office and workroom. There are no square footage figures to set definite boundaries other than the office, which measures 80 square feet.

The proposed location for the CMC in Eastburn Education Center is Room 117 and Room 186, as the two are directly across the hall from each other, and Room 117 is next door to the N.A.U. Elementary School Library. Room 117 can continue to serve as the audiovisual viewing, listening, and production area, and Room 186 would contain curriculum materials, both print and nonprint. There is an office in each room. The two rooms are approximately the same size and provide a total space of 2800 square feet.

The amount of audiovisual materials held by the College of Education is not determined at this time, as the materials are scattered in various professors' offices, as are many current elementary and secondary textbooks. These scattered materials could be more easily brought together when the CMC is moved to the education building.

The materials making up the curriculum collection are as follows:

Textbooks	6,353	(5,232 separate titles)
Workbooks and manuals	1,532	
Reference books	94	
Curriculum guides	2,247	

Besides that core of materials, the center has catalogs from most major producers of instructional materials, a collection of 48 competency-based teacher education publications from the University of Georgia, and these testing materials:

Contemporary Mathematics Tests
Comprehensive Tests of Basic Skills
Metropolitan Achievement Tests
California Achievement Tests
Stanford Achievement Tests
Health Behavior Inventory
Diagnostic Reading Tests
Occupational Interest Survey
Adult Basic Education Tests
Multiple Aptitude Tests
Reading and Listening Tests
California Test of Mental Maturity
Otis - Lennon Mental Ability Tests

The CMC will soon become a depository for the publications of Phi Delta Kappa, a national education fraternity. The center will receive the fastbacks, education books, and the periodical Phi Delta Kappan.

Administration of the new center should be carried out by the present coordinator of curriculum materials (MLS) and the director of audiovisual services (MEd), with the dean designating one to have principal responsibility for the operation. Initially, sufficient work-study help will be needed to keep the center open 45 hours per week, from 8:00 A.M. to 5:00 P.M. Monday through Friday. As a need is demonstrated, the schedule might be expanded to include weekend hours.

The circulation department of the university library circulates curriculum materials for a period of two weeks, with the

privilege of renewal. Reference books and catalogs do not circulate. In the new center, the same policy would continue, but audiovisual materials would be limited according to the time they would be in use. Periodicals will not circulate. Materials will be available to anyone holding a university identification card, as this is general university policy. The general public will be allowed to use materials only in the center.

Of the classification schemes suggested in my study, the one I find most appealing is the code from the U. S. Office of Education. I have yet to decide between that and the simplified alphabetical arrangement presently used for textbooks, workbooks, and manuals. The alphabetical arrangements is in use because of suggestions from the College of Education faculty. They feel that materials of this type are best grouped by subject and by grade within each subject, for when a student is looking for material to be used in teaching, he is thinking in terms of subject and grade level.

Here is a description of the scheme in use:

Textbooks, workbooks, and manuals are arranged alphabetically by subject as indicated in the following list. Within each subject area, arrangement is by grade level, then alphabetically by the name of the publisher, and finally by copyright date.

<u>SUBJECT</u>	<u>ABBREVIATION</u>
Art	Art
Business Education	Bus Ed
Accounting	Acco
Bookkeeping	Book
Commercial Law	Com Law
Economics	Econ

<u>SUBJECT</u>	<u>ABBREVIATION</u>
Shorthand	Shor
Typewriting	Type
Driver Education	Driv Ed
Education	Educ
Guidance	Guid
Handwriting	Hand
Health	Health
Home Economics	Home Ec
Industrial Arts	Ind Arts
Journalism	Journ
Language	Lang
English	English
French	French
Latin	Latin
Russian	Russian
Spanish	Spanish
Literature	Lit
Mathematics	Math
Algebra	Algebra
Geometry	Geom
Trigonometry	Trig
Arithmetic	Arith
Music	Music
Physical Education	Phys Ed
Reading	Reading
Science	Science
Biology	Biology
Chemistry	Chem
Physics	Physics
Social Studies	Soc St
Geography	Geog
U. S. History	US Hist
World History	Wld Hist
Special Education	Spec Ed
Speech	Speech
Spelling	Spell

Curriculum guides are arranged alphabetically by subject. They are placed in pamphlet files, and guides within a given file have identical "call numbers," but they have accession numbers for positive identification. The number appearing on a curriculum guide may be E-1, meaning its proper location is in the first pamphlet file for English guides, also labeled E-1. Files are

added as needed, i.e., E-2, E-3, etc. The designations for guides are listed here:

A	Administration	J	Journalism
Ag	Agriculture	K	Kindergarten (Handbooks)
Art	Art	L	Literature
Aud	Audiovisual	Lib	Library services
B	Business education	M	Mathematics
C	Curriculum (General)	Mu	Music
D	Driver education	P	Physical education
E	English	R	Reading
F	Foreign language	S	Science
G	Guidance	So	Social studies
H	Health	Sp	Special education
Ho	Home economics	Spe	Speech
I	Industrial arts	Spell	Spelling

A card catalog will be established for curriculum guides, professional materials, and audiovisual materials, but not for textbooks, workbooks, and manuals, except to the extent of a publisher file. Rarely do our students call for a textbook by author or title, but rather by publisher. The alphabetical subject arrangement negates any need for a subject catalog. If the U. S. Office of Education scheme is adopted, a subject catalog will be prepared.

Audiovisual materials will be shelved separately from print materials and will be classified by the Dewey Decimal System.

The authority to be used in preparing the card catalog is Standards for Cataloging Nonprint Materials, published by the Association for Educational Communications and Technology. Sears List of Subject Headings will be used for all types of materials cataloged. There will be separate card files for guides, textbooks, and audio-visual materials.

The CMC receives most of its materials free through solicitation from educational materials publishers and representatives, and occasionally money is available for purchase of materials. I strongly recommend that an appropriation of funds be made specifically for curriculum materials each year.

Weeding of materials will be quite limited. I have gathered opinions from the faculty regarding this matter, and most of them feel that old materials in good condition have value to students doing research or comparative studies. They have proposed that after materials are ten years old they be placed in a separate historical collection (Materials and catalog cards would then be labeled HISTORICAL.), just as was done at California State University in San Diego.

Besides suggestions already incorporated into this paper, the faculty also suggested establishing closer contact with the Association for Supervision and Curriculum Development, and when writing to publishers for free materials, in order to get a better response, I should let them know the dates of their materials which we now have on the shelves.

Top priority items regarding the CMC are:

1. Move the CMC to Eastburn Education Center!
2. Establish a card catalog
3. Provide an annual budget
4. Hire sufficient work-study help

At the present time, the real holdings of curriculum materials in the College of Education are not represented by the Curriculum Materials Center, as there are many scattered collections in professors' offices. Establishment of a center in Eastburn Education Center would make it more feasible to build one central collection.

Much of what is included in the plan presented in this paper may change as I continue talking with faculty and other professionals, as I further analyze the results of my study, and as I continue to read the professional literature. The establishment of final policy will be done through an advisory council made up of faculty in each department within the College of Education.

CURRICULUM MATERIALS CENTER QUESTIONNAIRE

The Physical Setting

1. Approximate enrollment of your college or university _____
2. Where is your Curriculum Materials Center located? (Check one)
 - In its own building _____
 - Part of the main library _____
 - Department, School or College _____
 - of Education building _____
 - Part of another building _____ Name of the building _____
3. What is the approximate size of the Curriculum Materials Center in square feet?

_____ sq. ft.
4. How many volumes are in your Curriculum Materials Center?
 - Print materials _____
 - Nonprint materials _____

Administration

1. Under which department is the Curriculum Materials Center funded and directed?

Funded by _____ Directed by _____
2. Do you have a full-time director or librarian? Yes ___ No ___

If not, do you have a half-time director or librarian? Yes ___ No ___

What is his or her name? _____

Degrees: B.S. ___ M.L.S. ___ Ed. S. ___ Ph. D. ___ Major subject _____
3. How many full-time employees do you have? _____

What is the average number of hours per week? _____
4. How many part-time employees do you have? _____

What is the average number of hours per week? _____

Circulation

1. What is the general amount of time that your materials may be checked out? (Do not include special collections or reserve listings)
 - Not at all _____
 - One week _____
 - Two weeks _____
 - Other (explain) _____
2. Who may check out materials? (Check appropriate ones)
 - Faculty _____
 - Students _____
 - General public _____
 - Explanation of any restrictions in circulation _____

Classification and cataloging

1. Which of the following cataloging systems are in use in your center? (Check one)

Dewey Decimal _____
Library of Congress _____
Other (Explain briefly) _____

2. Which of the following classification systems do you use for audiovisual materials? (Check one)

Dewey Decimal _____
Lib. of Cong. _____
Accession No. _____
Other (Explain briefly) _____

3. Do you use a divided card catalog? Yes _____ No _____
If so, explain how the catalog is divided _____

Selection and acquisition

1. How are materials acquired? (Check appropriate ones)

Donation by company representatives _____
Donation by faculty _____
Purchase through dealers, jobbers, etc. _____
Other (Please specify) _____

2. Who is involved in selection of materials?

Librarian _____
Faculty _____
Students _____
Others (Please specify) _____

3. Do you have a separate budget for curriculum materials? Yes _____ No _____

4. Do you weed old textbooks and curriculum guides if they are in good condition?

Textbooks Yes _____ No _____
Curriculum guides Yes _____ No _____

5. In your Curriculum Materials Center, do you have the following materials?
Please check yes for those that apply.

	YES	NO
Curriculum guides.....	_____	_____
Special education materials.....	_____	_____
Programmed instruction materials.....	_____	_____
Elementary children's books.....	_____	_____
