ABSTRACT

This document is a summary of state regulations and requirements affecting the international exchange of teachers. Included are a summary of state regulations, which discuss matters such as citizenship and loyalty oath requirements, certification and fees for foreign exchange teachers, and retirement and credits for American exchange teachers; a table listing exchange policy regulations for all 50 states; and a brief history and description of the U.S. Office of Education's Teacher Program. FOREWORD

This study is a valuable and timely contribution to a subject important for all concerned with leadership in teacher education and with enrichment of elementary and secondary education. We hope that State education agencies, local school boards, and leaders in teacher education will thoughtfully review the information contained in this survey and seriously consider ways and means to involve more of their teachers and schools in international teacher exchange programs. The benefits that exchange teaching can contribute to teacher, student, school, and community in terms of enhanced teaching and learning, international understanding, and more knowledgeable citizens are clearly considerable.

PREFACE

The improvement of international understanding in an increasingly interdependent world is clearly one of the educational imperatives of our time. The exchange of teachers between nations is one of the most important and effective means for helping achieve this goal, both in the short run and through its multiplier effect over time.

This summary of State requirements and regulations affecting the international exchange of teachers is intended to make pertinent, up-to-date information readily available to all concerned with the subject both at home and abroad.

Its value to foreign educators trying to find answers within our pluralistic and decentralized system is obvious. Its value to American teachers and prospective teachers is equally clear. No less significant is the comparative view on a nationwide basis that it offers to State authorities and the stimulus it will provide to many for new or continuing efforts to facilitate international teacher exchange through further development of State and local regulations appropriate to the needs of the times.

While the value of international teacher exchange is not yet as widely understood as it should be, the fact remains that there is a growing appreciation of its importance throughout the profession. As the decade of the seventies opened, for the first time participation in international teacher exchange programs of one type or another was legally permissible in all 50 American States. The challenge of the remainder of this decade is to liberalize further the regulations which currently constrict opportunities in order to improve participation rates throughout the Nation for the benefit of American education everywhere as well as for the larger general goal of increasing international understanding around the world.

The benefits to American education assume a special importance in the context of the forthcoming Bicentennial Celebration of the American Revolution. The international exchange of teachers has unique contributions to make to the renewal of our cultural heritage and to the deeper understanding and appreciation of the American ideal and experience of human enrichment through ethnic diversity and cultural pluralism.

THE VALUE OF TEACHER EXCHANGE

The modern teacher needs an awareness, understanding, and empathy for ethnic diversity and cultural pluralism. Thus first-hand experience in an unfamiliar cultural setting, abroad or at home, is an increasingly important part of teacher education. This is true even if the subject to be taught is not explicitly related to international studies.

If the teacher's subject includes any substantial involvement with other countries and international affairs, student interest is often greatly increased if the teacher has studied or taught abroad. Personal acquaintance with peoples and places under discussion in the classroom enhances both vividness and credibility of instruction. Experience in other countries is particularly important for teachers of language, geography, history, social studies, and art appreciation.

The experience of teaching in a foreign classroom is of special value. While operating in the generally familiar context of a classroom, the teacher is confronted with new professional points of view, other value systems, and a variety of cultural differences which require careful study and appropriate accommodation. In the process of learning more about others, one is likely to learn more about oneself and one's own cultural context.

Some of the values for American schools and the American people of participating in the international exchange of teachers are summarized as follows:

- 1** Teachers have an opportunity to compare their own educational organizations with the systems of other countries, with the view of sharing in both directions.
- 2** Teachers develop a better understanding of themselves and of their society through the perspectives gained by cross-cultural experience.
- 3** Teachers acquire new knowledge—educational and cultural—new enthusiasm, ideas, and points of view relevant to improving their teaching at home.

4 Students find their teachers more stimulating when they can draw on first-hand experience to produce or supplement instructional materials.

5 With exchange of teachers between an American and a foreign school, both schools can carry forward and enrich their regular instructional programs, not only in the new knowledge the foreign teacher may bring, but also in the valuable opportunity for students and teachers to have a sustained experience with a citizen and a professional educator from another country. As a living expression of another culture, the exchange teacher is a valuable source of information about life in his or her home country. What is learned or contributed in a variety of informal ways outside the classroom is often as important in helping students learn about the teacher's home country as what takes place in the classroom. The multiplier effect of an exchange teacher on his or her students and professional colleagues can be considerable.

6 Exchange teachers after returning from abroad often share their new knowledge and experiences widely at home—with civic groups and professional societies as well as with the teachers and students in the local school system. Thus there is an impact on public understanding of international relations as well as on instruction in the classroom.

7 From the exchange teaching experience can grow a continuation and expansion of bonds between the two schools and their respective communities for the long-range benefit of education and international understanding in both countries. Not only teachers, but also administrators, students, and community leaders can become involved in a variety of followup activities, including exchange visits.

When the teaching abroad is conducted under the Teacher Exchange program of the U.S. Office of Education or in other carefully planned programs, the experience is available in a carefully selected and supportive setting at minimal cost. If an interchange is involved, the exchange teacher normally serves as an appropriately matched replacement for the local teacher, and thus there is a minimum of administrative complications in both participating school systems.

SUMMARY OF STATE REGULATIONS

FOREIGN EXCHANGE TEACHERS

Citizenship

Until recently some States made no adjustment in their requirement that all teachers be U.S. citizens. Alaska, for instance, had or appeared to have an absolute bar against the use of foreign nationals in the schools. By 1967, however, the Rules and Regulations of the Alaska Department of Education were changed to include subchapter 11, entitled Exchange Teachers. It specifically excludes exchange teachers from having to meet the citizenship requirement and take Alaska's oath of office.

U.S. citizenship is not required as a condition for employment as an exchange teacher in 35 States. Fourteen States and the District of Columbia have a procedure authorizing some official or board to grant waivers to the requirement. In addition, Puerto Rico has a qualified exemption which limits contracts for teacher exchange to the continental United States of "other democratic countries" and Florida permits noncitizens to teach temporarily only if they are "a citizen of a nation not antagonistic to democratic forms of government."

Oath

Requirements for an oath of loyalty remain in effect in many States despite court decisions finding them unconstitutional in other States. Twelve States, the District of Columbia, and Puerto Rico require exchange teachers to subscribe to some kind of an oath of office. The U.S. District Court in New Hampshire upheld the requirement there as recently as 1971. On the other hand, in Illinois (1969) and Arkansas (1957), such oaths were found to be unconstitutional. California does not require an oath for certification but does for employment; a modified oath is used for noncitizens. Colorado adopted a new pledge in 1969 to replace one previously banned; it exempts temporary teachers and has stood the test of the courts. In six States loyalty oaths continue in force but are waived for exchange teachers, usually by law. Thirty-two States do not require an oath.

Certification

The kind of certificate made available to foreign exchange teachers on the basis of evaluation of their credentials varies greatly from State to State. Six States—Connecticut, Massachusetts, Michigan, Nevada, North Dakota, and Wisconsin—issue no kind of certificate in these cases; they simply permit employment of exchange teachers and take cognizance of their presence. Other States utilize provisional, temporary, emergency, and other special permits and certificates or letters of authorization. A number of States insist that the foreign teacher have formal education equivalent to that implied by possession of an American baccalaureate; the table that follows on pp. 7-11 shows the States that are explicit on this point. In most cases, it is possible for a foreign exchange teacher to extend for a second year. In a few States, however, such extension is not permitted.

Fee

Almost half the States charge a fee for issuing a teaching certificate to a foreign exchange teacher. Charges range from \$1 to \$20. In some States, exchange teachers are specifically exempt from payment for a temporary permit. In many States there is no fee for certification for any teacher.

Medical Examination

A majority of the States require that teachers coming from abroad undergo some kind of medical examination. In a few States, the local school board decides whether or not to require evidence of good health. It is usually possible for the teacher to have the examination before coming to the State. Illinois, however, requires that the examining physician be licensed in that State. In the State of Washington, the State Health Department issues a certificate based on the results of a locally taken chest X-ray.

Retirement Deductions

Deduction from salary for the local or State retirement plan is usually required if foreign exchange teachers receive local American salaries. In 13 States, however, the retirement system excludes temporary workers from coverage, thus freeing the foreign teacher from withholding. Retirement deductions do not consti-

tute a long-range problem even where they exist because the State systems provide for a refund payment when the teacher leaves the system. If the foreign teacher is not being paid in the State, there is no complication, since he or she is not enrolled in the State retirement plan.

Other Requirements

A few States have additional requirements that may reduce the opportunities for teacher exchange. In a number of cases State law provides that salaries be paid only to people physically present and working in the State; this precludes leave with pay and rules out the possibility of exchanges with teachers from Great Britain and Canada, who are paid by their home schools. Kentucky and South Carolina cannot accept foreign teachers who bring their salaries with them, nor can they send teachers abroad who are actively employed by the State. West Virginia can accept an exchange of teachers only when the State does not have to pay the foreign teacher. Until recently, North Dakota was also unable to pay a foreign teacher. In Georgia, the local district must use its own funds if it pays a foreign exchange teacher.

California cannot accept foreign teachers under the auspices of the Teacher Exchange program unless there is a reciprocal interchange of position with a California teacher. Nevertheless, it can employ foreign teachers on a one-way basis as "sojourn teachers" to provide bilingual or foreign language instruction. In a number of States, the superintendent of the local school district plays a major role in the determination of whether State agencies will permit an exchange. His role is decisive in Connecticut, Louisiana, Montana, and New Hampshire.

There are other requirements of varying sorts that are unique to one or a few States. For example, the State of Wyoming requires foreign exchange teachers to pass a test on the constitutions of the United States and Wyoming.

AMERICAN EXCHANGE TEACHERS

Retirement

American teachers remain covered by their retirement systems while abroad if they continue to receive their pay from home. If

they are on a leave of absence without pay, however, it is not always possible for them to make a special contribution to the State retirement fund to cover the time spent teaching abroad. In at least the following eight States, the State retirement arrangements do not make it possible for teachers to purchase credit when on a leave of absence:

Colorado	Tennessee
Iowa	Utah
Nebraska	Vermont
Nevada	Wisconsin

In other States, there is no statewide system or the determination is made at the district level as to whether retirement credit is purchasable for American exchange teachers who are or have been on leave. This applies to at least the following five States:

Montana	Virginia
South Dakota	Wyoming
Texas	

Credit for Experience Abroad

In many States, teaching abroad is counted in granting salary increases on the basis of years of service and other appropriate experience. Maine, Puerto Rico, and Texas appear to have no provision for such recognition. In 29 cases the local school boards determine how to treat overseas experience; generally the boards grant credit for it. In some cases, even foreign travel, if approved in advance, may be counted for part of the credit needed in renewing certificates or gaining salary increments.

SUMMARY TABLE OF REGULATIONS

The aforementioned aspects of regulations of the 50 States, the District of Columbia, and Puerto Rico concerning the international exchange of teachers are presented in tabular form on pp. 7-11.

INTERNATIONAL TEACHER EXCHANGE REGULATIONS BY STATE OR OTHER ENTITY 1: JULY 1972

THE TEACHER EXCHANGE PROGRAM ADMINISTERED BY THE U.S. OFFICE OF EDUCATION

BRIEF HISTORY

The Office of Education has been engaged in teacher exchange programs on a modest scale since the passage in 1946 of Public Law 79-584, commonly known as the Fulbright Act. This act authorized the use of specified amounts of foreign currencies owed the United States from the sale of war surplus material for the purpose of educational exchange. The first program involved an interchange of teachers with the United Kingdom, and 74 matched pairs of teachers exchanged positions for the 1946-47 academic year.

In 1948, Public Law 402, 80th Congress, the Smith-Mundt Act, provided the dollar support needed to supplement the foreign currency-financed program and to make possible projects with other countries. The teacher exchange program then began to expand rapidly in terms of the number of participating countries. In 1961, Public Law 87-256, the Mutual Educational and Cultural Exchange Act, often referred to as the Fulbright-Hays Act, was passed. It represented a consolidation of the various previous legislative acts concerned with educational exchange. As amended, it is the current basic authorizing legislation for the teacher exchange program of the U.S. Government.

CURRENT STATUS

The Teacher Exchange program administered by the U.S. Office of Education is carried out in conjunction with the Bureau of Educational and Cultural Affairs in the Department of State and the binational Fulbright commissions and American embassies in the cooperating countries abroad. Federal funds for the program are part of the Department of State appropriation. The Board of Foreign Scholarships, an independent body of 12 prominent citizens appointed by the President, provides general supervision of the program and makes the final selection of all grantees.

Regional interviewing committees in various parts of the United

States do the preliminary screening of applicants. These 59 committees conduct personal interviews with applicants in their respective areas. The National Advisory Committee for the Exchange of Teachers, composed of representatives of 17 national organizations interested in international educational exchange, provides valuable advisory assistance on a variety of program matters.

The Institute of International Studies in the U.S. Office of Education administers the educational exchange program for teachers from the American side. It publishes an annual announcement of opportunities and conducts the national competition for the grants to be awarded. The Institute staff reviews applications and arranges for the involvement of regional interviewing committees and the National Advisory Committee for the Exchange of Teachers.

After appropriate review of the qualifications of all applicants, the Institute staff recommends the best qualified American candidates to the Department of State and the Board of Foreign Scholarships for the exchange teaching grants available. After final selections by the Board, the Institute arranges the exchanges between American and foreign teachers. It also obtains positions in American schools for foreign teachers who have been selected by the board from among those recommended by the various binational educational commissions or foundations and approved by the American school officials.

Approximately 24 countries are engaged in the Fulbright-Hays Teacher Exchange program on either an interchange or a one-way basis. However, the number of teachers involved in this program has never been very large in relation to the total number of teachers in classrooms. During the 1972-73 school year, about 135 American teachers are teaching in another country and 135 teachers from other countries are teaching in American schools under this program.

Other Federal or federally assisted programs which provide opportunities for teaching abroad include the Peace Corps (2,967), the Department of Defense military dependent schools (7,575), and the overseas schools program assisted by the Department of State (3,032). The figures in parentheses indicate the number of Americans serving abroad in teaching capacities in each of the listed programs during the 1971-72 school year.

Some 110 different countries are involved in one or more of all of the aforementioned programs.

Additional exchange teaching opportunities are available under a variety of privately sponsored programs, but the total number of these is not believed to be large.

Opportunities for teaching assignments abroad under the OE Fulbright-Hays program are again expected to be available for American teachers for the 1974-75 school year. The deadline for applications from individuals wishing to teach abroad in 1974-75 is November 1, 1973. The largest number of two-way interchanges is again anticipated with the United Kingdom.

OE PROGRAM ARRANGEMENTS

The various opportunities available in the OE program may be categorized into three arrangements. Arrangements I and II provide for interchange (direct exchange) of positions by American teachers and foreign teachers. Arrangement III provides for one-way placement of American teachers abroad.

Arrangement I: Interchange positions with Canada and the United Kingdom.—The American teacher secures a leave of absence *with pay*. The school granting the leave must be willing to accept a foreign teacher in exchange. The foreign teacher also secures a leave of absence *with pay*. Each teacher is paid regular salary by the respective home school system. Teachers going to Canada or the United Kingdom are responsible for providing the full cost of transportation.

Arrangement II: Interchange positions with other countries.—The American teacher secures a leave of absence *without pay*. The school must be willing to accept a foreign teacher in exchange and to pay a salary based upon the latter's training and experience and the local salary schedule. The American and the foreign teachers receive grants to cover round trip transportation. While overseas, the American teacher receives a maintenance allowance in lieu of salary in the currency of the host country from the binational educational commission or foundation in that country. (American teachers in Switzerland receive no grants for round trip transportation and are paid by the host schools.)

The Arrangement II pattern is used with the following countries:

Belgium/Luxembourg
Federal Republic of Germany

New Zealand
Switzerland

Arrangement III: One-way positions abroad.—No exchange of positions is involved in this arrangement. The American teacher secures a leave of absence *without pay*, and while abroad, receives a maintenance allowance in lieu of salary in the currency of the host country. Round trip transportation is provided, except in the case of Switzerland. (American teachers in Switzerland receive no grants for round trip transportation and are paid by the host schools.)

The Arrangement III pattern is used with the following countries:

Belgium/Luxembourg	Iran
Burundi	Republic of Korea
Denmark	Laos
Federal Republic of Germany	Sweden
Greece	Switzerland
Indonesia	Republic of Viet-Nam

One-way positions may become available in other countries, particularly for teachers of English as a second or foreign language.

CONCLUSIONS

The United States is among the countries that send the largest numbers of teachers abroad to teach in the schools of other countries. A survey in 1964 of the countries employing foreign teachers in their schools, conducted by the International Bureau of Education (since 1968 a part of UNESCO), and published in connection with the 29th International Conference on Public Education at Geneva in 1966, showed 36 to 39 countries using teachers from France, the United States, or the United Kingdom. Canada ranked next; 21 countries reported Canada as a source of teachers.

Following the survey, the Conference adopted *Recommendation No. 61 on Teachers Abroad*. The recommendation of the member countries endorsed the international exchange of teachers and found it "desirable that an ever-increasing number of teachers should be able to perform a period of service abroad." It also called upon teacher-training institutions to "broaden their traditional range of studies to include the concept of teaching abroad as a means of interesting future teachers in this kind of service" and urged attention to the incentives and disincentives that might affect teaching abroad.

The availability of financial assistance is clearly a major factor in determining who goes abroad and where, as well as how many teachers are able to participate in the program. An increase in funds from whatever sources—Federal, State, local, private, or foreign—could increase the number of teachers participating and reduce the financial burden of the experience for many American teachers by providing the price of transportation for the individual and perhaps even the cost of one or more dependents. At present, some teachers are clearly deterred by such added expense for which travel grants are not available, especially those interested in going to the United Kingdom.

As is apparent from the preceding sections, regulations in some of the States make it difficult for many teachers to participate in an international exchange program. Some further flexibility is needed in order to give every American teacher more nearly equal access to an exchange teaching opportunity abroad and to enable American students and teachers to benefit from having a teacher from another country teach in their school or system. The following provisions are among those that would help facilitate teacher exchange:

1 State or local laws or regulations that permit teachers from other countries to be paid from State or local funds while teaching on an exchange basis in local schools.

2 State or local laws or regulations that permit American teachers to teach in other countries on leave-with-pay status.

3 State or local laws or regulations that permit American teachers to teach in other countries on a leave-without-pay status.

4 State or local laws or regulations that exempt foreign exchange teachers from the requirements of U.S. citizenship and from taking citizen or alien oaths of loyalty to the State and national governments. (All exchange teachers are, of course, expected to obey American laws and respect the Constitution while in the United States.)

5 State accreditation standards that permit the certification for 1 year of a foreign exchange teacher who has met the standards of the Fulbright-Hays program (recognized professional training, experience, and status at home, recommendation by binational commission or U.S. Embassy, and appropriate specialization) and the possibility of extending certification for 1 additional year if requested by the local superintendent.

6 State retirement systems that permit American teachers to purchase retirement credit while engaged in State or locally approved teaching abroad even when not being paid by the State or the local school district.

7 Regulations that recognize 1 year of exchange teaching experience for American teachers as equivalent to 1 year's teaching experience in the United States for purposes of calculating salary increments, retirement credit, or any other professional or financial benefits.

Equally important in stimulating growth would be fuller recognition by State and local authorities of the value of international educational exchange. A surprising number of returning American teachers have reported that their supervisors back home show relatively little interest in their experience abroad and that the

enhanced contribution they could make to the local school and community is sometimes not facilitated or appreciated. Similar complaints have been made in many cases by foreign teachers. With stronger encouragement by the local authorities in the United States and with more widespread publicity for the opportunities provided and the value of the experience gained, the number of teachers interested in participation would undoubtedly show a marked increase. Even so, at the present time, there are more than eight applicants for each opening in the OE exchange program with the United Kingdom, the most popular of the exchange opportunities among American teachers.
