ABSTRACT

During the 1971-72 school year, Minneapolis secondary students were released from their classes every Tuesday at 2:00 to allow secondary staff members to participate in staff development activities. The purpose of the released time program was to give secondary personnel an opportunity to work on common concerns and objectives. Based on questionnaire returns from more than 80% of the teachers, more time was spent on department meetings than on any other activity. Other activities on which many teachers spent released time were attending quadrant consultant meetings, attending faculty meetings to discuss school policies, developing new courses and materials, and identifying department objectives. Almost 90% of the responding personnel would like to see the Secondary Released Time Program continued. (Author/CK)

Secondary Schools Released Time Evaluation 1971-72

Summary

During the 1971-72 school year, Minneapolis secondary students were released from their classes every Tuesday at 2:00 to allow secondary staff members to participate in staff development activities. The purpose of the released time program, as stated by the Minneapolis Public Schools' Department of Secondary Education, was to give secondary personnel an opportunity to work on common concerns and problems and to plan together for both short-range objectives and long-range goals. Except for once-a-month subject-area meetings for each quadrant division of schools, the individual schools had responsibility for using the released time to meet their own needs.

See p. 1

Based on questionnaire returns from more than 80% of the teachers, it appears that more time was spent on department meetings than on any other activity. Department meetings also received the highest rating on value. Fifty-seven percent of the teachers said department meetings were Very Valuable and another 40% said they were Of Some Value. Other activities on which many teachers spent released time and which received high ratings were attending quadrant consultant meetings, attending faculty meetings to discuss school policies, developing new courses and materials, and identifying department objectives.

See pp. 4, 5

Almost 90% of the responding personnel would like to see the Secondary Released Time Program continued, although half of this group would like to see some changes. Based on the results of the questionnaire and the suggestions for changes, the following recommendations were made: clarify the objectives of the program at all levels, from the Department of Secondary Education to subgroups or individuals within schools; devote more time and personnel to planning the activities; provide sufficient time for department meetings; more carefully assess the purpose and structure of subject-area consultant meetings.

Secondary Schools Released Time Evaluation
1971-72

During the 1971-72 school year Minneapolis secondary school students were released from their classes every Tuesday at 2:00 to allow secondary staff members to participate in in-service training. This was the second year of the released time program. As stated by the Minneapolis Public Schools' Department of Secondary Education, the purpose of the released time program was to give secondary personnel "an opportunity to work on common concerns and problems and to plan together for both short-range objectives and long-range goals."

At the request of the Department of Secondary Education, an evaluation was conducted by the Research and Evaluation Department in consultation with secondary staff members. In early May 1972 a questionnaire was distributed to all secondary certificated personnel. Responses to the questionnaire are summarized in this report. A copy of the questionnaire is in Appendix C.

Questionnaires were returned by 1,172 teachers, 162 support personnel (counselors, librarians, social workers, etc.), and 30 administrators (the instructions that went to the schools with the questionnaires did not clearly indicate whether or not administrators should complete the questionnaire). Based on the October 1971 "Sight Count of Personnel" compiled by the Information Services Center, about 84% of the teachers, 73% of the support personnel, and 45% of the administrators returned questionnaires.

Table 1 gives the participants' response to three general questions regarding the value of the released time program. More than one half (56%)

of the teachers felt that students, in the long run, would receive a better education as a result of released time; 16% of the teachers did not feel the students would receive a better education; and 28% were not sure. In response to a similar question asked in the previous year (1970-71), 61% of the teachers said students would receive a better education, 31% said they would not, and 8% said "Other Answer" ("Not Sure" was not a choice in 1970-71).

The Secondary Released Time program should be:	Continued without change	44	40	40
	Discontinued	12	10	11
	Continued with changes	44	50	49

What percent of their released time did teachers spend on activities that would benefit the education of students? Table 1 shows that 22% of the

teachers estimated 80-100% of their released time, 38% estimated 50-79%, and 40% estimated less than one-half of their released time.

Almost nine out of 10 teachers wanted the released time program continued, although half of these teachers wanted some changes in the program. About one in 10 wanted the program discontinued. A summary of suggested changes is presented on page 7.

Support personnel responded to these items in much the same fashion as teachers, while administrators gave somewhat more favorable ratings to the program's value.

Involvement in Planning

As in the previous year, many teachers indicated their involvement in planning released time meetings was not extensive (Table 2). Although 9% of the teachers had input into many meetings and 28% had input into some meetings, more than 60% had input into two or less meetings. Almost 60% of the teachers would like to have more input into planning released time meetings. On the other hand, two-thirds of the administrators said they would not like to have more input.

Released Time Schedule

When asked to indicate their preference between two choices for a released time schedule next year, 64% of the teachers indicated once-a-week from 2:00 - 3:45 and 36% of the teachers expressed a preference for once-a-month, half-days. A greater percentage of administrators (57%) and support personnel (48%) than teachers preferred the once-a-month, half-days schedule.

Write-in comments noted several reasons for changing to longer, less frequent meetings: a larger block of time to work on activities would be available, travel time to consultant meetings would not cut into the meeting time as much, and there would be less disruption of classes. Some teachers suggested morning meetings when teachers are not tired. Morning meetings would also avoid conflicts with extra-curricular activities, they said.

Released Time Activities

With the exception of subject-area meetings, which were coordinated by the central office consultants and scheduled once-a-month for each quadrant division of schools, the individual schools had responsibility for using the released time to meet their own needs. Department meetings were stressed as an appropriate use of released time in communications from the Department of Secondary Education. Teacher recommendations from the previous year had indicated the value of department meetings.

To determine the activities that actually occurred and the corresponding value of each activity, secondary personnel were asked to respond to a list of 20 activities by indicating (1) whether they spent A Lot, Some, A Little, or No Time on each activity, and (2) whether each activity on which they spent time was Very Valuable, Of Some Value, or Of No Value. Table 3 on page 5 gives the responses of the 1,172 teachers to these 20 activities.

It appears that more time was spent in department meetings than on

any other activity. Quadrant consultant meetings and faculty meetings to discuss school policies and procedures were the next most frequent uses of released time. Although more than 80% of the teachers said quadrant consultant meetings were valuable and more than 90% said faculty meetings were valuable, department meetings received the highest ratings. Ninety-seven percent of the teachers said department meetings were Of Some Value or Very Valuable, with 57% indicating they were Very Valuable.

Other activities on which many teachers spent released time and which received high ratings were developing new courses and materials with other members of their department or on their own, identifying and developing department objectives, and exchanging ideas with staff from other schools. Few teachers spent time planning interdisciplinary activities.

Readers of Table 3 should interpret the value ratings cautiously for the activities on which a large percentage of teachers said they did not spend time. Although the respondents were given instructions to omit the value rating if they did not participate in the activity, some made value ratings of activities in which they were not involved. For example, 74% did not attend any staff conferences on individual students, but some of these nonparticipants may have marked Of No Value, or they may have marked it as a valuable activity in theory, or based on past experience.

Response by School, Subject, and Position

Responses to all items in the questionnaire are given in Appendices A and B according to positions other than teacher and administrator, subject area taught, and school. The other positions include social workers, librarians, counselors, and an "other position" group for staff members that did not fit into any of these categories. In order to preserve anonymity, schools were not identified by name. Instead, they were randomly assigned code letters.

Suggestions for Changes

The several hundred responses to the open-ended question requesting suggestions for improving the Secondary Released Time Program were separated into groups with similar content. Responses that gave information identical to the more objective questions were excluded from further analysis. Suggestions to have more teacher involvement in planning and to discontinue the program fell into this exclusion category. The suggestions were grouped into eight areas. The number after each category, within an area, represents the number of staff members who made similar suggestions.

Goals and objectives: many staff members requested a clarification of the goals of the released time program with more planning and better organization to meet the goals.

Definition of goals and objectives	22
More planning of activities	36
Have meetings for a reason, not just to schedule them	19

Schedule of meetings: some staff members felt the schedule of meetings was not flexible enough to meet their needs.

Schedule too rigid	17
Need schedule to suit individual school needs	15

Type of meeting: many comments were made regarding the type of meetings that were scheduled.

More department meetings	58
Fewer department meetings	3
More faculty meetings	4
Fewer faculty meetings	9
More or longer consultant meetings	10
Fewer consultant meetings	41
More relevant consultant meetings	42
More city-wide or across-quadrant meetings	54
More planning and exchanging ideas with other schools	39

Individual time: many teachers would like to use more of the released time for individual activities.

Individual time.	34
Time for paperwork, grading.	26
Develop courses on my own,	18
Daily classroom preparation.	10

Curriculum and instruction: more time to work on curriculum and to become familiar with different instruction methods was suggested by teachers.

Department meetings on curriculum.	39
More time for curriculum development	26
Media and materials selection.	8
Interdisciplinary and interdepartment meetings	46
Grade level meetings	7
Plan and discuss different types of instruction, new techniques	24
Demonstration lessons.	6
Good speakers on instruction	11

Community contact:

Visit other schools.	27
Visit industry and business.	7
Visit community agencies.	9
More contact with parents.	19

Other uses of released time:

More time for specific school problems	14
Staff conferences on individual students	22
More student participation	6
Human relations and integration plans.	30
More sharing and relating to other staff members in the school.	11

Miscellaneous:

Insistence on participation of all staff	5
Accountability for participation	18

Summary and Recommendations

Almost 90% of the responding personnel would like to see the Secondary Released Time Program continued, although half of this group would like to have some changes made. Perhaps if some changes are initiated, secondary personnel will indicate that they are spending more of their released time on activities that will benefit the education of students.

Recommendation One: More time should be given to identifying the objectives of the released time program. A number of respondents indicated that the goals of the program were not clear. Perhaps the program would have a clearer sense of direction if objectives could be identified at the various levels of the secondary education structure; objectives from the Department of Secondary Education for all schools, objectives for the subject-area consultants, objectives for the individual schools, and objectives for subgroups or individuals within schools or across schools. The objectives from the Department of Secondary Education might be management objectives; such as, "All consultants, schools, and individuals will have stated objectives for released time."

Recommendation Two: More time and personnel should be devoted to planning. Results indicated that only a small percentage of teachers were extensively involved in planning released time activities, while more than one-half of the teachers would like to have greater involvement in planning.

Recommendation Three: Sufficient time should be provided in any city-wide or individual building schedule for meetings by department within schools. As in 1970-71, teachers spent more time in department meetings and found them more valuable than any other activity. Many respondents indicated that they wanted more department meetings, particularly to work on curriculum.

Recommendation Four: The purpose and structure of quadrant meetings should be assessed more carefully. Although the quadrant consultant meetings were seen as having some value by the majority of the teachers, a number of teachers suggested city-wide or cross-quadrant meetings. Some teachers commented that there should be fewer or at least more relevant, meaningful quadrant consultant meetings.

Appendix C
The Questionnaire

Minneapolis Public Schools
Secondary Released Time Evaluation 1971-72

The responses to this questionnaire will be used to provide feedback to members of the secondary staff within the schools and at the central office. Your reactions will be used to suggest improvements in the Secondary Released Time Program. With this in mind, give the questions some thoughtful attention. You should finish within 15 minutes. The questionnaire was designed for teachers so some of the questions may not apply to supportive personnel. If a question does not apply, leave it blank. Do not sign your name.

(1) To what extent were you involved in planning Secondary Released Time meetings.

- 1. I had input into planning many meetings
- 2. I had input into planning some meetings
- 3. I had input into planning one or two meetings
- 4. I did not have any input into planning the meetings

(2) Would you like to have more input into planning the released time meetings?

- 1. Yes
- 2. No

(3) Do you feel that your students, in the long run, will receive a better education as a result of the Secondary Released Time Program?

- 1. Yes
- 2. No
- 3. Not sure

(4) Estimate the percentage of your released time that was spent on activities that you think will benefit the education of students.

- 1. 80 - 100% of released time
- 2. 50 - 79% of released time
- 3. 20 - 49% of released time
- 4. 0 - 19% of released time

(5) Which released time schedule would you prefer next year?

- 1. Once a week, 2:00 - 3:45
- 2. Once a month, half-days

(6) The Secondary Released Time Program should be:

- 1. Continued without change
- 2. Discontinued
- 3. Continued with changes: indicate your suggested changes on page 3 after you complete pages 1 and 2.

(7) Indicate your position in the school.

- 1. Classroom teacher
- 2. Administrator
- 3. Librarian
- 4. School Social Worker
- 5. Counselor
- 6. Nurse
- 7. Other _____

(8 - 9) If you are a teacher, check the school in which you work. Do not check your school if you are not a teacher.
