ABSTRACT

Accurate data related to current salaries are essential in developing and maintaining adequate compensation for administrative personnel. This is the first in a series of comprehensive ERS national studies of salaries and fringe benefits for administrative and supervisory personnel in public schools. This report gives precise information for school districts responding to a national survey of a stratified random sample of large, medium, and small school systems. The major part of the report consists of a system-by-system listing of the 562 districts that furnished usable salary schedule information. The listing gives each system's minimum and maximum scheduled salaries for associate and/or deputy superintendents, assistant superintendents, and certain other central-office positions; and scheduled minimum and maximum salaries for supervising and assistant principals. Salaries shown for superintendents are salaries actually being paid since the salaries of superintendents are usually based on an individual contract with the school board. The listing also includes detailed information regarding the scheduling of salaries for principals (e.g., differentials for days on duty, academic preparation levels, and size of school to which assigned). Also, methods of structuring schedules based on their relationship, or lack of relationship, to the schedules for teachers are shown in the listing. Summary tables are included that show mean, median, and ranges of minimum salaries scheduled and maximum salaries scheduled in reporting systems.

A National Resource for the Administrative Teams of School Systems

ERS is an independent, nonprofit corporation serving the research and informational needs of the nation's school systems, their administrative teams, related organizations, and the public.

Established and sponsored by

- American Association of School Administrators
- Council of Chief State School Officers
- National Association of Elementary School Principals
- National Association of Secondary School Principals
- National School Public Relations Association

Educational Research Service, Inc. is designed to meet the need of school administrators for objective, reliable, and timely research.

ERA represents a unique approach to data gathering and information reporting by tailoring its service specifically to the needs of the subscribing school districts. ERS serves as both a national source and a clearinghouse for research—collecting, storing, retrieving, and distributing information which fits the needs of busy school administrators. Its operation is geared for quick response to requests from the administrative teams of school systems.

To assure that small as well as large systems can benefit from ERS, a graduated subscription fee has been established. This enables subscribing school districts to share equitably in the cost of gathering and reporting the research needed by all. Services are available at reasonable rates to state and local associations of school administrators as well as university departments of school administration. Services may be provided to other groups by special action of the Board of Directors. Subscription rates are available upon request.

FOREWORD

Accurate data related to current salaries are essential in developing and maintaining adequate compensation for administrative personnel. This is the first in a series of comprehensive ERS national studies of salaries and fringe benefits for administrative and supervisory personnel in public schools. This report presents data on 1973-74 salary schedules for such personnel. A subsequent report will focus on the major fringe benefit provisions for administrative and supervisory personnel for 1973-74.

This report on salary schedules gives precise information system-by-system for school districts responding to a national survey of a stratified random sample of large, medium, and small school systems. Summary tables are included that show mean, median, and ranges of minimum salaries scheduled and maximum salaries scheduled in reporting systems. The summary tables also contain a variety of other information such as relationships of administrator schedules to those of teachers, number of days administrators are on duty, and differentials for preparation and experience.

In addressing the need for salary data for administrator and supervisory personnel, ERS in this study has made a special effort to collect salary schedules from small school systems as well as large and medium. Included in the national sample were 573 school systems with enrollments of 300 to 5,999; the results of the survey indicate that fewer than one-third of these systems had a salary schedule for administrators or supervisors, and many of those with scheduled salaries were in affluent suburban districts. Although the responses from this sample of small school systems are smaller than ordinarily would be published in an ERS study, they are included here in order to provide as much information as possible for small school systems. It is sincerely hoped that these data will be used only with the precautions described in the report.

The study was designed and conducted by Gertrude N. Stieber, a member of the Special Staff of ERS, and a person with years of experience in the study and analysis of salary and economic data relating to education.

ERS is particularly grateful to the staff members of the school systems who provided basic data through questionnaire replies and salary schedule documents. Without their help this series of salary schedule and fringe benefit studies would not be possible.

GLEN ROBINSON
Director of Research
Educational Research Service, Inc.

HIGHLIGHTS

5

- Top scheduled maximum 1973-74 salaries reported to ERS for school principals: elementary school, \$32,350; junior high, \$35,700; senior high, \$37,000.
- Average of maximum salaries scheduled for principals: elementary school, \$20,374; junior high, \$21,450; senior high, \$22,977.
- Average of salaries paid superintendents 1973-74 in reporting systems: \$31,525; range, low \$11,500, high \$56,000. Average of salaries paid superintendents reported for large systems (enrollments of 25,000 or more): \$36,938; range, low \$23,000, high \$56,000.
- Average of scheduled maximum salaries for assistant superintendents (all reporting systems): \$25,511; range, low \$12,200, high \$41,500. For systems with enrollments of 25,000 or more, average scheduled maximum salaries: \$27,218; range, low \$18,000, high \$40,000.
- Half of reported salary schedules for principals are derived by index, ratio, or specific dollar increment applied to teacher schedules. Among large systems, 60 percent of schedules for principals are independent of teacher schedules; 40 percent are related by index, ratio, or specific increment.
- 41 percent of index or ratio schedules relate to the step that individual principal would place on the teachers' schedule according to preparation and experience; 17 percent are based on teachers' M.A. maximum; 20 percent on B.A. minimum.
- 63 percent of salary schedules contain no differential for principals based on enrollment of school, number of teachers, or similar factors; 18 percent have salary differentials based on enrollment (or A.D.A.); 17 percent base differentials on number of teachers supervised.
- 72 percent of the schedules have different salary scales for elementary, junior high, and senior high principals; 13 percent have "single-salary" schedules with no differentials for grade level.
- During the past 10 years, the percentage spread between mean maximum scheduled salaries for principals and teachers has remained almost constant in reporting systems with enrollments of 25,000 or more. However, the percentage spread between mean maximum for central-office positions has narrowed (e.g., for supervisors the percentage spread decreased from 50 percent more than teachers in 1963-64 to 35 percent more in 1973-74). Narrowing of percentage differences has been greater for superintendents than for any other central-office administrative position: from 174 percent more than the maximum scheduled salary for teachers in 1965-66 to 144 percent more in 1973-74.
- During the two year period 1971 to 1973, average maximum scheduled salaries in large systems increased 8.5 percent for superintendents and 6.0 percent for assistant superintendents, compared with 9.9 percent for teachers. Scheduled maximum salaries for principals increased at rates similar to the maximums for teachers; elementary principals, 10.5 percent; junior high, 9.9 percent; senior high, 10.4 percent.
- Mean number of contract duty days for elementary school principals, 214; junior high, 221; senior high, 228.

INTRODUCTION

7

This report presents data on 1973-74 salaries scheduled for administrative and supervisory personnel in public schools. Salary data in the report are salaries scheduled in the rate structures of the reporting school systems. Means and medians are based on tabulations of minimum and maximum rates established for the various administrative and supervisory positions included in the survey.

A distinction should be made between "salary schedule" data and "salaries paid" data. The minimum and maximum salary schedule data reported in this study are the ranges of the established salary scale on which employees in a specific category may be paid; it is quite possible that no employee is presently being paid at either the minimum or the maximum. In contrast, the reported salaries paid are the actual salaries being paid to persons in those positions.

The major part of the report consists of a system-by-system listing of the 562 districts that furnished usable salary schedule information. The listing gives each system's minimum and maximum scheduled salaries for associate and/or deputy superintendents, assistant superintendents, and certain other central-office positions, and scheduled minimum and maximum salaries for supervising and assistant principals. Salaries shown for superintendents are salaries actually being paid since the salaries of superintendents are usually based on an individual contract with the school board.

The listing also includes detailed information regarding the scheduling of salaries for principals (e.g., differentials for days on duty, academic preparation levels, and size of school to which assigned). Also, methods of structuring schedules based on their relationship, or lack of relationship, to the schedules for teachers are shown in the listing.

Additionally, there are 18 summary tables of the distributions, means, medians, and ranges of scheduled minimum and maximum salaries, and summaries of certain administrative provisions in the salary schedules. These tables reflect *only* the data reported to

IRS; no attempt has been made to weight the data on a national basis. Nevertheless, the tabulations present a fairly representative summarization of salaries scheduled for administrative and supervisory personnel throughout the United States.

Scope Of The Study

In late summer 1973, a comprehensive questionnaire concerning salary schedule information, fringe benefit provisions, staffing data and statistical information was mailed to a stratified random sample of the 11,604 school systems in the nation with enrollments of 300 or more contained in the IRS comprehensive list of public school systems: 1,646 school systems were selected in the sample. All school systems (587) with 12,000 or more enrollment were sent a questionnaire. A stratified sample of smaller school systems was selected randomly. The table which follows shows the stratification and the response.

Of the 182 school systems with enrollments of 25,000 or more, 147 (81 percent) responded in time to be included in this report. Responses from 20 additional systems were received too late for tabulation. In several cases, this was due to the late settlement of local contracts and salary agreements. Usable salary schedule data were received from 143 of the 147 respondents. Of those systems responding, 3 percent reported that they do not have salary schedules for administrative or supervisory personnel.

In an effort to include a representative sample of smaller school systems in the survey, questionnaires were sent to 486 (51 percent) of the 955 systems with enrollments of 6,000 to 11,999; and to 573 (6 percent) of the 10,062 systems with enrollments of 300 to 5,999. Sampling was done on a nationally random basis without regard to the location of the systems.

Many of the small systems indicated that they have so few administrators that they do not use a structured salary schedule. Of the systems with enrollments of 6,000 to 11,999 in the sample, 247 (51 percent) responded; 162 (66 percent) of these furnished usable data; 85 (34 percent) indicated that they do not use salary schedules to establish salaries for administrative and supervisory personnel.

NUMBER OF 1973-74 SALARY SCHEDULES FOR SUPERVISORY AND
ADMINISTRATIVE PERSONNEL ANALYZED
(BY ENROLLMENT SIZE OF REPORTING SCHOOL SYSTEMS)

Enrollment Stratum	Number of systems queried ^{1/}	Total responses		Usable schedules submitted		Number reporting no schedules used or not available	
		Number	Percent of total queried	Number	Percent of total responses	Number	Percent of total responses
1	2	3	4	5	6	7	8
100,000 or more	24	24	100.0%	24	100.0%	--	--
50,000 to 99,999	53	44	83.0	44	100.0	--	--
25,000 to 49,999	105	79	75.2	75	94.9	4	5.1%
Total 25,000 or more	182	147	80.8	143	97.3	4	2.7
12,000 to 24,999	405	241	59.5	183	75.9	58	24.1
6,000 to 11,999	486	247	50.8	162	65.6	85	34.4
300 to 5,999	573	252	44.0	74	29.4	178	70.6
Total, all systems queried	1,646	887	53.9	562	63.4	325	36.6

^{1/} All of the approximately 587 school systems with enrollments of 12,000 or more as of September, 1972, were queried. Of the approximately 955 systems with enrollments of 6,000 to 11,999, 486, or 51 percent, were included in the survey. Six percent, or 573, of the 10,062 systems with enrollments of 300 to 5,999 were queried. Selection of districts to be included was made on a national random sampling without regard to location.

Of the smallest group (enrollments of 300 to 5,999) sampled, 252 (44 percent) responded; of these 74 (29 percent) provided usable salary schedule data. A total of 178 (71 percent) indicated that they do not use schedules for determining salaries of administrative and supervisory personnel.

In using the information in the summary tables of this report, caution should be exercised in making comparisons among the enrollment groups for systems with less than 12,000 because of the high degree of sampling variation associated with samples with so few cases and the possible non-response bias.

There are relatively small differences in salary schedule means and medians among the various enrollment groups. This may be due, in part, to the fact that many of the respondents among the small systems are affluent suburban districts, many of which have certificated employee agreements that include salary schedules for administrative and supervisory personnel as well as classroom teachers. Because of this tendency of the more affluent suburban districts to respond with more and higher salary schedules, the data for the small and very small school system groups

can be expected to be higher than would be expected for the total national population of school systems of comparable size. The extent of skewing toward the higher levels is not available from this study, but the user of the data should be aware of it and use the data for these groups of school systems only with due caution. Data for such small reporting samples normally would not be published by ERS, but because of the special effort of ERS to provide as much information as possible for the smaller school systems, all available data have been included. It is hoped that they will be used with adequate precaution.

Methods Of Tabulation

The school systems included in the listing on pages 30-71 are divided into three major enrollment categories: 12,000 or more, 6,000 to 11,999, and 300 to 5,999. Within these enrollment strata each system is listed alphabetically within states. Names of systems appear in Column 1; each system's enrollment appears in the second line of the same column. Enrollment data are as of October 1972, or as near to that date as possible. In a few cases enrollment figures are for a different date or are estimated and this is indicated with an appropriate footnote.

Column 2 gives the contract salary paid the superintendent. Minimum salaries are not shown for superintendents since, with a few exceptions, superintendents are paid on an individual contract with the school board.

Columns 3 through 7 give minimum and maximum salaries scheduled for central-office positions that occur most frequently. These include associate or deputy superintendent, assistant superintendent, director, consultant and/or coordinator, and supervisor. In cases where more than one salary range is shown for positions with the same title, the minimum salary given is for the lowest paid position and the maximum is for the highest paid position contained in the schedule. The positions of supervisor, consultant, coordinator, and director represent only those positions in instructional and/or curriculum areas.

It was not always possible to determine a minimum scheduled salary for one or more of these central-office positions, and none is shown. In some cases, the maximum salaries shown for the associate or deputy superintendent and for the assistant superintendent are actual salaries being paid rather than a scheduled salary. Some of the smaller systems use a salary schedule for principals only. In cases where a district has more than one associate or deputy superintendent, the salary shown is for the highest paid officer, usually the deputy superintendent.

Columns 8 through 13 are concerned with the minimum and maximum salaries scheduled for supervising and assistant principals in elementary, junior high, and senior high schools.

The maximum scheduled salaries shown for principals are for the highest preparation level recognized, the largest size group for which salary credit is given--enrollment, number of teachers supervised, etc.

Column 14 shows the minimum scheduled salary for classroom teachers with a bachelor's degree, and the maximum scheduled salary for the highest academic preparation level recognized in the schedule.

All maximum scheduled salaries shown in

this report are exclusive of long-service increments beyond regularly scheduled maximums; merit increments are also excluded unless otherwise specified by a footnote shown in Column 20 of the listing.

Columns 15 through 18 show additional detail on various bases for salary scheduling differentials among principals by position level (i.e., differentials in the salaries scheduled for elementary, junior high, and senior high school principals). Column 15 gives the number of contract days on duty for the three groups of principals. Column 16 shows whether the schedule differentiates for principals at different grade levels. The figure 3 indicates that the salary schedule is different for principals at the elementary, junior high, and senior high school levels; the figure 2 indicates it differs at 2 of the 3 levels. If no salary distinction is made by grade level, the words "single-salary" schedule appear in Column 16.

If salary differentials are made on the basis of academic preparation levels, the major levels recognized appear in Column 17; the most frequent preparation levels recognized are the M.A., 6 years (M.A. plus 30), and the doctor's degree. Recognition of fractional preparation levels, such as M.A. plus 15, for example, were not tabulated.

Minimum scheduled salaries used throughout this report for all administrative and supervisory personnel arbitrarily assume the holding of a master's degree when a distinction is made by academic preparation in the salary schedule. For classroom teachers, the minimum salary shown is for the bachelor's degree.

Salary differentials among principals frequently are made on the basis of size--that is, the number of teachers supervised, the enrollment of the school to which the principal is assigned, the number of rooms, and the like. This differential is indicated in Column 18.

All salary schedules for principals were classified into three major types in relation to schedules for classroom teachers--independent, ratio (or index), and dollar differential. These

data are shown in Column 19. If there is no apparent relationship between the salary schedule for principals to that for classroom teachers, the word "none" appears in Column 19. If principals receive definite amounts above the salary they would receive as a teacher, the words "above" appear in the column. The word "ratio" in Column 19 refers to those schedules in which salaries for principals are computed as a ratio to a specific step or steps on the teachers' schedule (e.g., the teachers' master's degree maximum). The ratio may also vary with school size, position level, length of work year, and years of administrative experience.

Explanatory footnotes appear at the end of the system-by-system listing, and the applicable footnote numbers are shown in Column 20. Most of the footnotes are concerned with the effective date of the schedule, the basis for derivation of index schedules, exclusion of long-service or merit increments, etc.

Summary Tables

Summary tabulations (Tables 1 through 19) bring together by enrollment stratification the minimum and maximum salary schedule distributions and the means and medians of the information shown in the system-by-system listing, plus additional information which was not shown in the listing because of space limitations.

The enrollment stratification used in the summary tables differs from that used in the system-by-system listing. Four groups are used in the tables to provide for more detailed analyses--25,000 or more; 12,000 to 24,999; 6,000 to 11,999; and 300 to 5,999. This classification permits a separate summarization of data from those systems in groups where all of the existing systems were queried and shows data for the sampled groups separately.

Table 1-A summarizes the means, medians, and range of *minimum* salaries scheduled for principals and assistant principals. Table 1-B summarizes the same information for *maximum* scheduled salaries for these groups of personnel.

Table 2 summarizes means, medians, and the range of the *maximum* salaries scheduled for certain central-office positions. Positions

included are supervisor, consultant or coordinator, director, assistant superintendent, deputy and associate superintendent, and superintendent. Means and medians of salaries shown for superintendents are actual salaries if whether or not the superintendent is on a salary schedule; most are not.

Tables 3 through 6 show percent distribution, as well as means and medians, of scheduled minimum and maximum salaries for principals and assistant principals classified by enrollment of reporting systems.

Tables 7 and 8 show a percent distribution and means and medians of scheduled salaries at both the minimum and maximum levels for certain central-office positions. These comprise central-office supervisors, consultants and/or coordinators, and directors of instruction or curriculum. It should be pointed out that these positions are sometimes defined differently from system to system and that the scope of responsibility may vary considerably from one district to another. An attempt has been made in analyzing the administrative salary schedules included in this study to group homogeneous positions together so far as possible from available information.

Table 9 shows the percent distribution of *maximum* scheduled salaries (or salaries actually paid) for assistant superintendents, associate and/or deputy superintendents, and superintendents by enrollment classification of reporting school systems. *Minimum* salaries for these positions were not summarized because in many cases, as shown in the system-by-system listing, minimum scheduled salaries are not available for these positions. Salaries for them frequently are based not on a regular salary schedule but are determined by individual contract or agreement with the superintendent or the school board. Sometimes ranges of salaries are given for administrative experience in the position but they are not actual rate structures.

Mean and median *maximum* scheduled salaries for supervising principals are shown in Table 10 for all reporting systems classified on a geographic or regional basis. This tabulation is based on the total responses from all systems of

all enrollment classifications in the survey.

Special caution should be taken when using the regional percentage distributions because of the large sampling variance that could be expected to be associated with the small number of cases for which data are available. The data are reported in this table, therefore, only to give a general indication of possible regional variations. The regional variations shown, however, in general show a pattern similar to that shown in previous studies made on the basis of surveying all operating systems with enrollments of 6,000 or more. For example, the Southeast region includes 22.5 percent of the total systems queried. This is in line with earlier surveys and the large percentage results from the fact that the majority of school systems in the Southeast are organized on a county-wide basis and, therefore, tend to be large or medium-sized districts, all of which are in the scope of this study. On the other hand, there are very few systems in the New England, Southwest, or Rocky Mountain areas which have sufficiently large enrollments to be included. The small number of reporting systems in the Plains region is affected by the large number of systems in this area which indicated that they do not compensate administrative or supervisory personnel on a salary schedule, but rather, negotiate such salaries on an individual basis.

Tables 11 and 12 show the percent distribution, mean, median, and range of scheduled minimum and maximum salaries for classroom teachers. Minimum scheduled salaries are for the bachelor's degree; maximums are for the highest salary scheduled for the highest academic preparation level recognized, exclusive of long-service or merit increments above the regularly-scheduled maximum.

It should be noted that salary information for classroom teachers shown in Tables 11 and 12 is based only on data received from school systems which also furnished salary schedule data for administrative and supervisory personnel. Neither table purports to present a complete picture of teachers' scheduled salaries for 1973-74. However, the information shown in these two tables is

appropriate for the general comparison of administrative and supervisory salary schedules with those for teachers.

Table 13 summarizes for each reporting system, the computed index relationship of the maximum scheduled salaries of principals and certain central-office positions to the maximum salaries scheduled for teachers. The maximums used for all positions are those scheduled for the highest academic preparation level recognized in the schedule, exclusive of any long-service or merit increments. If the administrative and supervisory schedule does not recognize preparation levels in its structure, the highest salary reported for each position is used in establishing the index relationship. The computed relationships are reported in the form of a distribution of index relationships and as the median relationship for all reporting systems.

Table 14 presents a comparison of average maximum scheduled salaries for teachers, principals, and certain central-office positions biennially, 1963-64 through 1973-74, for reporting systems with enrollments of 25,000 or more. The averages shown are the means of the groups of systems with enrollments of 25,000 or more which reported information for the respective years shown, and are not based on an identical group of districts from year to year; they are averages of maximum scheduled salaries reported by the group of districts which furnished data each of the given years.

All maximum salaries used in the tabulation of each of the foregoing tables are exclusive of long-service and merit increments, if any. Such information is footnoted to the system-by-system listing.

Table 15 gives a distribution of administrative salary schedules classified by their structural relationship to salary schedules for classroom teachers; they are either independent (no apparent relationship to the teachers' schedule), indexed to the teachers' schedule at a fixed base of reference, or definite amounts are added to the teachers' schedule at the grade and step where the administrators would be placed in accordance with their academic preparation and

experience.

Approximately one-half of all administrative and supervisory salary schedules are structured as an index to some base of reference on the schedule for teachers. Table 16 shows a distribution of these schedules classified by five major methods used in establishing index schedules for administrative personnel. The most common method is to relate the salary of the administrator or supervisor to the salary the individual would earn on the teachers' schedule in accordance with preparation and experience.

The establishment of varying salary classes or distinctions between elementary, junior high, and senior high school principals is a common practice in administrative salary scheduling structuring. If no distinction is made on the basis of position, the schedule is called a "single-salary" schedule. On the other hand, the schedule may specifically provide for different salaries for elementary, junior high, and senior high school principals. Part C of Table 17 shows a distribution of the administrative salary schedules included in this report, classified by the number of position levels recognized.

Salary schedule differentials among principals are frequently based on the number of teachers supervised, the enrollment (or A.D.A.) in the building to which the principal is assigned,

the number of rooms in the building, etc. A distribution of such differentials is shown in Part A of Table 17. When salary differences are shown by various size groupings, the minimum salary tabulated is for the smallest size group, and the maximum is for the largest size group.

Part B of Table 17 gives a distribution of the preparation levels recognized for salary schedule differentials among principals. Approximately one-third of the schedules analyzed provide salary differentials for the master's degree, six years (M.A. plus 3) and the doctorate. Another one-third do not differentiate in the salaries established for principals on the basis of academic preparation.

Salary differentials for principals are sometimes based on the length of the scheduled work year. Table 18 shows the distribution of contract days on duty for elementary, junior high, and senior high school principals. Elementary school principals, on the average, tend to have a work year about three weeks shorter than that for senior high school principals, and about seven days less than that of the average junior high school principal.

FOOTNOTES TO SYSTEM-BY-SYSTEM LISTING

1. Data for calendar year 1973.
2. Data for calendar year 1974.
3. Latest data available.
4. Enrollment estimated.
5. Salary shown for superintendent is for 1972-73 school year.
6. Salaries shown for associate and/or assistant superintendents are actual salaries paid.
7. No footnote assigned to number 7.
8. Salaries shown are exclusive of merit increments.
9. Salaries shown are exclusive of long-service increments.
10. Merit increments are included in maximum salaries shown.
11. Salaries shown for classroom teachers are for 1972-73.
12. Salaries shown may be exceeded for merit but not to exceed regularly scheduled maximums.
13. Ratio applied to top 7 steps of teachers' schedule.
14. Maximum shown for teachers is based on merit.
15. Salaries shown for all administrative and supervisory positions shown are salaries scheduled for 1972-73.
16. Ratio based on top 6 steps of teachers' B.A. plus 45 and B.A. plus 60 with the M.A. salary classes.
17. Minimum salaries shown for principals assume a minimum of 10 teachers supervised.
18. Senior high-school principals not on salary schedule.
19. Salaries shown for all central-office positions are actual salaries paid.
20. Ratio based on M.A. and M.A. plus 15 maximums.
21. Salaries scheduled for principals are based on number of teachers supervised--to a maximum of 25. (Georgia State schedule)
22. Salaries scheduled for principals are based on the number of teachers supervised--to a maximum of 20.
23. Ratio based on 14th step of teachers' M.A. plus 45 quarter hours.
24. Ratio based on M.A. scale for teachers.
25. Ratio based on Steps 10 to 15 of teachers' schedule for M.A. plus 15 and M.A. plus 24 hours.
26. Ratio based on Steps 8 to 13 of teachers' M.A. and M.A. plus 24 hours scales.
27. Ratio based on Step 10 and above of teachers' schedule where principal would be placed on basis of preparation level.
28. Ratio based on maximum of teachers' 6-year preparation level (B.A. plus 90 quarter hours).
29. Maximum salaries determined by merit evaluation.
30. Salaries shown for all administrative and supervisory positions are actual salaries paid, not scheduled.
31. Ratio based on Step 4 of teachers' M.A. plus 15 salary class.
32. Travel allowances for principals set by Board of Education.
33. Add \$25 for each teacher supervised beyond 25 teachers.
34. Ratio based on top 5 steps of teachers' B.A. plus 90 quarter hours scale.
35. Salaries shown for teachers are for calendar year 1973.
36. Salaries shown for deputy and assistant superintendent are for 1972-73.
37. Ratio based on teachers' M.A. plus 45 quarter hours.
38. Ratio based on Step 11 of teachers' schedule where principal would be placed on basis of preparation.
39. Ratio based on Step 11 of teachers' M.A. schedule.
40. Ratio based on top 8 steps of teachers' schedule.
41. Salaries of senior high and assistant senior high principals are individually negotiated.
42. Salary shown for senior high principal is actual salary paid.
43. Ratio based on teachers' B.A. maximum.
44. Ratio based on top 5 steps of teachers' schedule for M.A. and above.
45. Ratio based on top 6 steps of teachers' schedule for B.A. plus 30 and above.
46. Ratio based on maximum of teachers' M.A. plus 30 schedule.
47. Ratio based on top 6 steps of teachers' schedule for M.A. and above.
48. Ratio based on Step 10 of teachers' M.A. schedule and above.
49. Ratio based on Step 7 of teachers' schedule where principal would be placed on basis of preparation.
50. Ratio based on top 5 steps of M.A. and M.A. plus 15 salary classes for teachers.
51. Salaries shown for principals and assistant principals are for 1972-73.
52. Salary schedule for principals was not adopted at press time.
53. Salaries shown for principals are based on 1972-73 salary schedule for teachers.
54. All salaries shown are salaries actually paid.
55. Salaries shown are basic salaries scheduled and may be exceeded in varying amounts depending on number of teacher units supervised.
56. Salaries shown for principals are for 1972-73.
57. Salaries shown for principals and other supervisory positions assume a 12-month work year.
58. Ratio based on Step 10 or above of teachers' schedule for B.A. plus 48 hours.
59. Salaries shown are based on the North Carolina State schedule--it is assumed that local supplements are not granted.
