IDENTIFIERS New Mexico

## ABSTRACT

Presented is a curriculum guide for a prevocational, vocational, and work study program to be used with educable mentally retarded (EMR) students, 12 to 21 years of age. Delineated are the following aspects of New Mexico's program for EMR students: definition, rationale, educational interventions, administration, psychoeducational diagnosis for placement, individual programming, and teacher qualifications. Provided for students 12 to 16 years of age in the prevocational level are objectives, activities, and instructional materials in the following skill areas: communication (such as reading), mathematics and science to achieve academic skills: interpersonal relationships, citizenship, safety/health/hygiene, and leisure time skills (such as music and physical education) to achieve social skills; and vocational training, job tasks, and home arts to achieve vocational skills. The vocational component for students 15 to 21 years of age is presented in the same format though science and leisure time skills are omitted. The work study program is described in terms of objectives (such as participation in a productive way of life), eligibility, school responsibilities, community canvassing, and task analyses of work stations such as the library aide. Illustrations show skill components for occupational areas of homemaking, housekeeping, food services building trades, auto skills, and garden/nursery work. Included are attachments such as child labor provisions. Given in the appendix are items such as a bilingual/bicultural model and a bibliography of approximately 300 instructional materials and sources. (MC)

## FOREWORD

The launching of planned, comprehensive, Special Education program expansion has begun in New Mexico. This thrust will provide opportunity for thousands of exceptional children in our state to receive a public school education that is commensurate with each child's individual need and designed to enable the child to reach his maximum potential.

One of the needs of human beings is to become self-sustaining members of our society. To help all children become contributing citizens, many programs have been developed for children with special problems. One such special program is for the educable mentally handicapped.

This publication is one of a two-part series of curriculum development in life experience areas designed for the educable mentally handicapped. The major goal of the publications is the improvement of instruction for these children.

The practical aspect of the guide forecasts a realistic preparation for life adjustment. Proper implementation of these guides will more nearly insure for each mentally handicapped pupil the development of adequate personal adjustment, appropriate work habits, and worthy social attitudes. Every effort has been made to present a format which compasses not only current philosophies, but also presents appropriate intervention strategies in a developmental sequence.

No program can be successful without creative teachers; therefore, teachers are urged to exercise their ingenuity in implementing the suggested activities and to explore freely the possibility of additional activities. Hopefully, this guide with its suggestions will foster unity rather than uniformity in the curriculum for the educable mentally handicapped.

Elie S. Gutierrez, Director  
Special Education

INTRODUCTION

"Much of Special Education for the mildly retarded is becoming obsolete. Never in our history has there been a greater urgency to take stock and to search out new roles for a large number of today's special educators."

In current literature, the educable mentally handicapped (EMH) child is referred to as mildly retarded. It is the education of the EMH child, then, that is discussed in the article by Lloyd Dunn from which the quotation is taken.

The current edition of Dunn's book *Exceptional Children in The Schools: Special Education in Transition*, reexamines nomenclature, labels, methods and traditional approaches to special programs for the mildly retarded.

It is quite possible that in a few years a guide such as this will be used only by regular class or resource teachers to get ideas for working with students who have what Dunn refers to as "sociointellectual inadequacy."

Special Educators are attempting to decrease their use of labels with exceptional students in favor of a noncategorical approach to programming. Learning styles and learning needs are being studied and students are being offered individualized programs which are responsive to styles and needs.

In view of these changes, the committee preparing this guide would like to urge teachers to use the guide as a springboard to new approaches rather than limiting the learnings of their students to the material found in the guide. It is a compendium of ideas; and it should not be thought of as either the only approach nor as if it contained everything necessary for the education of the educably mentally handicapped student.

Lloyd M. Dunn, "Special Education for the Mildly Retarded - Is Much of it Justifiable?" *Exceptional Children*, September, 1968.

## ACKNOWLEDGEMENTS

Acknowledgements and thanks are due the many individuals throughout New Mexico who contributed of their time and talents to the development of this Curriculum Guide, for the Guide could not have been completed without their cooperation. Many suggestions and articles were anonymous. Those who can be credited are listed below:

Charlene Hughes, LeRoy Martinez, Mary Roberts, Helen Michelson, Susan Rael, Lovella Millsap, Mary Louise Doran, Maxine Cooper, Susie Doran, Carl Baldwin, Don Whiteside, Sandra Ross, Patrick Hirner, Kit Doran, Herb Parks, David F. David, Cecilia R. Prelo, Vannie A. Graves, Kathryn J. Harrell, Janice M. Sleeper, Thomas B. Toney, Sandra Mueller, Jim Peterson, Beverly Vogel, Marjorie McCament, Bonnie Wakefield, Dr. Gary Adamson, Viola Sierra, Mario Baca, Tony Espinoza, Bill Gutierrez, Virginia Sanchez, Marigean Spayer, Héster Gault, Elva B. State Department of Education

## DEFINITION

State Standards define the Educable Mentally Handicapped (EMH) as follows: The educable mentally handicapped child shall be defined as a child whose intellectual development, mental capacity, adaptive behavior and academic achievement is so markedly below his peer age group in all essential learning processes that education in the public schools requires provision of special services.

Other definitions: Mental Retardation has been defined as "... sub-average general intellectual functioning which originates during the developmental period and is associated with impairment in adaptive behavior." (Heber, p. 3)

- Educable Mentally Handicapped—a term used to refer to mentally handicapped persons who are capable of some degree of achievement in traditional academic subjects such as reading and arithmetic. Also used to refer to those mentally handicapped who may be expected to maintain themselves independently in the community as adults, or to that group of mentally handicapped obtaining IQ scores between 50-75. Impaired adaptive behavior may be reflected during maturation by delay in acquisition of early developmental skills such as walking, talking, in the learning situation by poor academic achievement, and poor ability to acquire knowledge as a function of experience, and in social adjustment by relations with peers and others.

As the above quotations indicate, no rigid definition of the educable mentally handicapped can be arrived at because of the many factors to consider in such a definition; these include the difficulty in diagnosing retardation properly, the effects of nature and nurture, the fact that retardation during school years may not be so considered in adulthood. As Special Education has developed over past decades, children have been misplaced in classes for the educable mentally handicapped because they appeared retarded due to language, cultural, economic, emotional and neurological factors which caused them to differ significantly from the norm and/or norm referenced tests.

The children for whom this guide is being written are those who will not be able to think abstractly or in generalities. They are children in need of a special program or special individualized curriculums but who could be integrated into the total school program for the rest of the school day. They should be kept as much as possible in the main stream of public education. With proper educational planning these students can become contributing members of the community.

## RATIONALE

Educable Mentally Handicapped (EMH) students of school age require a special curriculum because their intellectual deficit prohibits their benefiting from the total academic program of the schools. Although they should be integrated into the regular school program whenever possible, a special program is indicated for at least a part of each school day.

Curriculum planning for the EMH should take into account their slower learning rate. The Special Education teacher and the regular classroom teacher need guidelines for educational planning for these children. The purpose of the guide is to develop parameters that will help children stay in the mainstream of education by guiding regular and/or special teachers in their education of students according to their abilities. EMH students may need a partially self-contained class, but in almost all cases some integration into the regular school program can be effected.

Many children who learn slowly should remain in the regular classroom with the teacher receiving support on curricular development from a resource teacher. In some instances, children with more serious learning problems may go from their regular class for part of the day to the Resource Room with a goal of complete integration to a regular class where feasible. There may also be a need for an EMH classroom where the student would receive as much support as he needed with integration into the regular classroom as a desirable goal when feasible.

Users of this guide should realize that the development of the guide does not imply a need for self-contained classrooms for all EMH students.

## EDUCATIONAL INTERVENTIONS

The State Standards for Special Education suggest the following educational interventions for the EMH student:

1. Itinerant Program (generally for less severe EMH) – one in which a fully certified teacher in Special Education may function as a methods and materials consultant to regular classroom teachers to facilitate keeping the child in the educational mainstream.
2. Resource Room Program (generally for the moderately to mildly handicapped EMH) – teacher provides services to exceptional children who are enrolled in the regular program. The services should be so concentrated that an individual prescription for each child can be determined. The resource teacher works closely with classroom teachers and parents in providing maximum benefits to each child in securing special equipment and materials, and in giving individual instruction.
3. Self-contained class program (generally for students who cannot adapt in an integrated or partially integrated program) – a group of students placed with a teacher for all or for a major portion of the day. (1)
4. Special Class with integration into regular program (for students who are expected to return to regular class after intervention) – students are identified with their special class and are integrated into regular class settings whenever feasible.
5. Cooperative or Joint Agreement Program – for two or more school districts contracting with each other for all services to the handicapped.
6. Innovative or Exemplary Programs – special approaches approved by the State Department of Education, Special Education Unit. (2)

(1) Integration in much of the school's activities can still take place.

(2) Specific Programs, Models and Techniques are presented in the appendix.

## PROGRAM ADMINISTRATION:

Regardless of the type of program an administrator plans to establish, he must consult the State Standards for Special Education<sup>1</sup> and become aware of the following regulations:

### I. Establishment of Classes

Special Classes for exceptional children may be established in any local public school system or jointly between systems upon petition of the local school superintendent(s) with the approval of the local board(s), to the State Superintendent of Public Instruction. It is not the responsibility of the State Department of Education to establish such classes or to provide such instruction for exceptional children. The State Department should serve in a consultive capacity and assist local school units interested in establishing such services to meet minimum standards for Special Education classes.

The program of education for exceptional children shall be approved by the State Department of Education and membership in such programs shall receive funding as provided by state law.

The State Department of Education shall set the minimum standards that the local district must meet to be eligible to receive Special Education funding. The autonomy of the local district is recognized in the supervision of the program.

### II. Organization

The Special Education programs shall be a part of the regular school program and housed in facilities which meet the particular needs of the children's exceptionalities.

Children should be placed in Special Education classes according to their dominant exceptionality. Combining two or more exceptionalities will be permitted only where it can be shown that the program will benefit all the children.

Each school system having Special Education classes shall submit to the executive officer of the State Board of Education or his delegated representative an annual report and such additional reports as may be requested.

Each school system shall maintain complete records of all students. Such records shall include the type of information normally contained in school cumulative records as well as special reports of examiners, case studies, and a general progress report by the Special Education teacher.

A Special Education Advisory Committee will be established to assist the State Director of Special Education.

<sup>1</sup> State Standards for Special Education, Revised April, 1973, p. PA-1-2.

### III. Financing

All children in programs of Special Education approved by the State Department of Education shall be counted in all censuses and be considered in all school financing arrangements in the normal manner for the purpose of distribution of basic State support funds, except that they shall receive Special Education funds as provided by law.

### IV. Supervision

- A. The State Department's program of supervision is concerned with assisting local schools in establishing the program of Special Education and determining whether or not the service meets the legal requirements and standards for approval of services for exceptional children. The department will also act in a consultative capacity regarding Special Education programs.
- B. The local school system has the responsibility for the following:
  1. The establishment of a well-planned program adapted to the needs, abilities or disabilities of each individual child.
  2. The selection, supervision and in-service training of Special Education teachers.
  3. Securing examiners reports on candidates for Special Education classes. Such reports should provide behavioral information and suggestions, in addition to intellectual level data, that will be of real value to teachers.
  4. The actual placement of children in Special Education classes.
  5. The interpretation of the program to teachers, parents and lay public.
  6. Special services shall be established and operated under the same criteria as those given above for the establishment and operation of Special Education classrooms.

## PLACEMENT AND PSYCHO EDUCATIONAL DIAGNOSIS

In order to determine the student's need for placement in a program for the educable mentally handicapped (EMH), a specific procedure for differential diagnosis should be established by the school district; this should relate to the procedure outlined in the State Standards. The results of the diagnosis should be reviewed by the Appraisal and Review Team. This team is a flexible, school level committee composed of teacher, nurse, Special Education coordinator, school administrator, guidance counselor and others directly related to providing a meaningful educational program for the child. The findings of this committee should be reviewed and approved in writing by the child's parents. Only after this careful diagnosis and review of findings should the child be placed in an EMH program.

Even then, errors may be made due to depression of scores because of emotional, social or linguistic problems. A careful review of findings should be made at least annually to note progress and to change program where necessary.

In accordance with accepted educational and psychological procedures, assessment of all students considered for placement in an EMH program will include the following:

- Social History, including a measure of adaptive behavior
- General Health Examination, including vision and hearing
- Academic History
- Psychological Evaluation
- Language Evaluation
- Educational Diagnosis

Psycho/educational diagnosis should also include a careful language evaluation (bilingual where necessary), an academic history and a careful educational diagnosis using such tools as the Illinois Test of Psycholinguistic Abilities, The Basic Educational Skills Inventory, The Durrell Reading Tests and other suitable tests and inventories of ability. These may be done by a psycho/educational diagnostician or by a qualified teacher (classroom). A synthesis of the information collected from the diagnosis should be made and a prescription written for the teacher's use.

# LET THE CHILD BE YOUR CURRICULUM GUIDE:

**A CURRICULUM GUIDE IS AN  
AID, NOT A SET OF LAWS**

### INDIVIDUAL PROGRAMMING

When one systematically programs for an individual or a group of children, the following PPE (Program, Planning and Evaluation) format is suggested:

1. Collection of Data
  - A. Case History
    - (1) social and developmental history
    - (2) medical history
  - B. Teacher Observations
    - (1) student's assets (What does he do best?)
    - (2) student's deficits (What are the weak areas?)
    - (3) classroom diagnostic test results may be integrated in total observation
  - C. Test Results (past and present) Standardized and Criterion Referenced
    - (1) individual tests
    - (2) group tests
    - (3) informal tests
2. State of the Problem
  - A. General Statement Regarding Student's Needs Based From Step No. 1
    - (1) academic
    - (2) behavior

3. Objective(s)

A. Refers to the statement of conditions or states of being that one wishes to develop in the student over a period of time. Must be able to measure or evaluate.

(1) criterion reference = the degree of how well the student must perform to be considered successful.

(2) time interval = the amount of time spent on task.

4. Procedure or Methodology

A. How will the objective(s) be accomplished?

(1) Key steps or task analysis — in stating key steps or tasks one may find that these can also be restated as new or daily objectives and the process starts over. Look at what you are asking the student to do; analyze steps to achievement.

B. How will objective accomplishment be measured? (By what standards?) — This refers to the yearstick that we use to measure the successful or unsuccessful completion of each objective.

C. How often will objective progress be measured? (Review dates) If you have one objective or several sub-objectives (based on task analysis) at what point in time will progress toward meeting these objectives be determined?

D. When will the objective be accomplished? (Completion date) To say we will accomplish something without committing ourselves to "when" has little value.

5. Materials Used to Meet Objective(s)

A. List materials used to meet objectives. (List source, page, title, etc.)

B. What modality was used?

6. Evaluation

A. Was the objective met?

B. Instrument used?

C. Show results:

**MUST YOUR CHILD TRY  
TO FIT YOUR PROGRAM**

**OR...  
IS YOUR PROGRAM  
TAILORED TO YOUR CHILD?**

## PRINCIPLES OF PRESENTATION

1. The tasks should be uncomplicated. The new tasks should contain the fewest possible elements, and most of the elements should be familiar, so he has very few unknowns to learn.
2. The tasks should be brief. This assures that he will attend to the most important aspects of the tasks and not get lost in a sequence of interrelated events.
3. The tasks should be sequentially presented so the learner proceeds in a sequence of small steps, each one built upon previously learned tasks.
4. Each learning task should be the kind in which success is possible. One of the major problems to be overcome is that of failure proneness. This major deterrent to learning can be effectively reduced through success experiences.
5. Overlearning must be built into the lessons. Drills in game form seem to lessen the disinterest in unimaginative drill.
6. Learning tasks should be applied to objects, problems, and situations in the learner's life environment. Unless the tasks are relevant, the learner has great difficulty in seeing their possible importance. (Kolstoe p. 22).

The program for the educable mentally handicapped should be aimed at developing skills of independent living (including homemaking) and skills and characteristics necessary for unskilled or semiskilled employment.

**MULTI-CULTURAL SUGGESTIONS**

The Curriculum Guide Committee encourages each teacher utilizing this guide to be sensitive to the uniqueness of New Mexico. Behavior patterns are expressions of life styles that differ as a result of adaptations to different environments. The pupil who exhibits a different life style will also have different interests and priorities. This has implications for curriculum and teaching strategies in making the system and learning environment more responsive to the incentive-motivational, human relational, and cognitive styles of each individual student.

Program models for bilingual/bicultural education, adaptable to Special Education programs, can be found in the appendix.

## PROFESSIONAL AND PERSONAL QUALIFICATIONS FOR TEACHERS AND AIDES

### TEACHERS

The State of New Mexico has developed guidelines for the training and certification of Special Education teachers and aides. Information about certification is available at the Certification Section, State Department of Education.

To these guidelines, the authors would like to add the following:

A teacher of the EMH children

- Must realize that her pupils are more like than different from other children.
- Must understand the behavior of mentally handicapped and the difficulties he will encounter in social groups.
- Must have a basic understanding of child development and growth.
- Must be skilled in the use of many methods by which she can teach to the learning patterns of each child.
- Must keep an open mind about diagnosis so that it does not limit the avenues of learning which she opens to the pupils.
- Must keep learnings at the success levels of pupils.
- Must continue her professional training to include methods that are specific to the learning characteristics of the EMH.
- Must keep abreast of current developments in the field.
- Must be able to measure pupil progress through the use of rating scales and other techniques.
- Must be able to talk with other professionals, such as social workers, psychologists, speech therapists, evaluators, physical and occupational therapists and counselors.
- Must be able to work with parents.
- Must be able to work with other teachers who may teach the student part of the day.
- Must be emotionally stable, patient, friendly, and willing to measure success by small gains.

## AIDES

"The school aide is a school employee who is qualified by education, experience and character to relieve one or more teachers of time-consuming, non-instructional tasks so that the teachers may devote more time to instruction."

The qualifications listed in the Guidelines are as follows:

- High School diploma or equivalency
- Health Certificate
- Knowledge of duties to which assigned
- Good command of the English language
- Attendance at School Aide Workshop
- Demonstration of highest ethical and moral standards
- School aide permit issued by Division of Certification, State Department of Education

Aides should

- Be able to work with children
- Enjoy working with children
- Be of an accepting and pleasant disposition
- Be emotionally stable
- Be willing to work with, and interested in learning from the teacher or any other professional working with children
- Be willing to follow directions and accept suggestions

**PROBLEM SOLVING**

**PROBLEM SOLVING**

# PRE - VOCATIONAL

# ACADEMIC SKILLS

Objectives

LISTENING

The student will:

listen and carry out instructions.

follow taped or recorded instructions.

use listening centers and other auditory equipment.

describe a story read to him or a movie, TV or record he has seen or heard.

Activities

Classroom instructions: set up oral instructions you expect student to follow; check list. See how well each one does.

Listening to recorded music, speeches, plays, class prepared recordings.

Listening to recorded directions and following them, i.e., taped lessons.

Have lesson(s) in use of each equipment item; have student review the lesson with you; give lesson to do on own; follow up to be sure it is being carried out correctly.

Draw a picture or diagram following step-by-step instructions.

Report listening experience.

Have students tape radio, TV or other experience, play tapes back to class; monitor sequence; discuss important points.

Instructional Aids and Materials

Scott Foresman - *Learn-to Listen, Speak and Write*  
 \*Educational Progress Corporation  
 Listening Skills Laboratory

Houghton, Mifflin *Listen, Think & Do*

EDL *Listen and Do*

Blank tapes

Record Player

Cassette tape recorders

Listening centers

Individual headsets

Aud-X - EDL

Language Master and cards, programs

Disneyland Records, Books Series  
 (Book with illustrations and a 7" long playing record with the narrator reading every word)

Bowman Reading Incentive Series

Reader's Digest skill builders with tapes

Picture to color

Colored pencils or magic markers

Taped instructions

SKILL AREA: Academic  
LEVEL: Pre-vocational  
COMMUNICATION

C. A. 12.0 - 15.11

Objectives

Activities

Instructional Aids and Materials

SPEAKING

Speak before his peers with ease.

Simulated telephone conversations (everyday conversations, business calls, ordering and purchasing, inquiries, etc.) - long distance calls, emergency calls.

Scope Magazine  
Schoastic Pub.

Role playing (family situations, school situations, personal problems and activities, etc.) Social activities.  
Some discussion of Body Language and Facial Expressions.

Pictures depicting various emotions, situations.

Present own TV programs on school happenings and current events news programs, weather forecasts, sports, broadcasts.

Portable video tape recorder and monitor

Put on short plays for elementary children.

Harcourt, Brace  
Short plays

Practice Roberts Rules (modified) in Simulated meetings (student body, committee government)

Newspaper Reading  
Gary Lawson Series

Speak pleasantly, courteously, and clearly.

Teacher-made tapes of harsh, shrill, cross voices and natural, pleasant voices.

Role play.

Recorded conversations (tape, video, etc.)

Activities.

Instructional Aids and Materials

SPEAKING (Continued)

speak pleasantly, courteously, and clearly.  
(Continued)

Oral discussion of procedures and directions:  
Fire in home, in school, injury, seizures, other emergencies.

Eye-gate, American Guidance Services and other programs indicating the value of courtesy.

Discuss and practice how to address guest speakers, questions and answers (firemen, policeman, doctor)

telephone for job or community activity information-using courteous manners.

Class discussion of what are good telephone manners.

Arrange with telephone company to use classroom phone equipment in your classroom for several weeks each year.

Play tapes; analyze problems in what kind of an impression do pleasant; unpleasant conversations make.

Phone the parks and recreation department for specific information pertinent to an individual's needs.

Arrange for school personnel officers to participate in phone interviews.

Arrange with Employment Security Commission personnel for students to call office regarding job possibilities.

make personal phone calls.

Mountain Bell

know rules for use of telephone.

Discuss use of personal or business phones, need to obtain permission to use phones.

report emergencies.

Telephone book for each student.  
Telephone book

SPEAKING (Continued)

report emergencies (continued)

Dial Operator.

Arrange with police and fire department to send representatives to talk to class.

Telephone book for each student.

List information to be reported in call.

Resource personnel from Police and Fire Departments.

Pre-tape simulated calls with good and poor information reported.

See if the students can analyze.

Poster/Bulletin Board regarding what to report in an emergency.

make and complete a long distance telephone call

Station to station.  
Person to person.

Mountain Bell equipment.

Direct dialing.

Use information given in phone book.

Phone books

Work with family on allowing student to place call when family plans such a call.

conduct and participate in committee or small group meetings.

Designate students to participate in planning a bulletin board.

A class party.

A class play.

Allow time for members to meet; have members report meeting to you; help structure next meeting, get chairman, if necessary.

demonstrate simple procedures for democratic meetings.

Class discussion.

What is meant by a democratic meeting.

How to select a chairman.

How to give everyone a chance to be heard.

Voting--secret or otherwise.

How to move with the decision of the group.

Instructional Aids and Materials

ObjectivesREADING

Many of these students have met with frustration in learning to read. The desire is there. The teacher must use all her skill and new methods and materials to motivate the student; to show him/her that he/she can succeed. The teacher must be able to diagnose problems and remediate them.

depending on individual capability, the teacher should aim at a minimum of 5th grade reading ability for student entering high school/work/study program. When one method does not work another should be tried.

The student will:

use word attack skills.  
letter sounds.

beginning blends and single consonants.

final blends and single consonants.

medial consonants.

vowels and digraphs.

prefixes.

suffixes.

Activities

Pre-test for placement; be sure to start the student where he/she is: at his/her instructional reading level.

Suggested instruments:

Wide range Achievement Test (Pre/Post)  
Basic Educational Skills Inventory

Dolch Word List

Gilmore Oral, Reading Test

Durrell Reading Tests

Informal Reading Inventory Accuracy and

Comprehension (See Appendix)

Slingerland Screening Tests for Identifying Specific Language Disability

Illinois Test of Psycholinguistic Abilities or others known by teacher

Sullivan Reading Placement Test

(Adapted by Regional Resource Center)

Reading pre-recorded materials (maintains interest for: students having vocabulary difficulty)

Newspapers and magazines (current events, feature articles, short stories, poetry)

Use of dictionary

class word lists

class dictionary with pictures for non-readers

Practical directions types of reading

cooking—following a recipe

models—putting together directions

telephone directory

Instructional Aids and Materials

Phono visual method

Fernald Techniques

Read Better with Jim King

Chas. Merrill—*Jet Plane Book* and others in the series

MacMillan Publishing Company

*Decoding for Reading*

MacMillan Reading Spectrum

Educators/Pupil Services  
Landon Phonis

Ideal

Fountain Valley Program

Activities

READING (Continued)

Objectives

develop and read detailed experience charts.

demonstrate sight word vocabulary at the 5th grade level.

Use as follow up on classroom activity or reporting i.e., class news bulletins.

Incomplete words, i.e., t h \_ n  
Sentences: I \_\_\_\_ the boy.

Various word drills.

Teacher-made word games.

Use whatever program ~~works~~ with the students; try to motivate with new approaches; filmstrips; tapes and the like.

comprehend selections read aloud.

Read or have read aloud to your class at least 20 minutes each day an interesting story, continued or complete.

Sometimes reading aloud books rewritten on their reading level (such as Pacemaker Series) stimulates them to read for themselves.

Interest Inventory  
Typewriter  
Typing keys to reading program

Powmar - Reading Incentive Series

Readers' Digest - Skill Builders with tapes

**Field Educational Enterprises:**

Kaleidoscope Readers

*The Wildlife Adventure Series*

*The Deep Sea Adventure Series*

*The Morgan Boy Mystery Series*

*The Checkered Flag Series*

read and follow instructions.

Recipes write cookbook of favorite recipes from class members cook in class.

Follow instructions for constructing models.

Follow instructions in magazines for crafts.

Bulletin board, art project, other class projects.

See if students can follow teacher's written instructions

use reading to get information.

Use of telephone directory.

Newspaper ads jobs, buying.

Women's Day  
Family Life

Telephone Directory

Daily newspaper

Activities

Instructional Aids and Materials

READING (Continued)

show some interest in pleasure reading.

Have a library center in classroom.  
Develop check-out system.  
Identify librarian.

Use school library.  
Regularly scheduled period with librarian to  
acquaint students with facilities.

Bookmobile

Visit neighborhood libraries.  
Work with parents on having student obtain  
library card.

read to complete application form  
correctly.

Job applications.

Census cards — Indians

**COMMUNICATION**

Instructional Aids and Materials

Activities

Objectives

WRITING

The student will:

demonstrate ability to write (cursive and/or manuscript) legibly.

write a good simple sentence.

Unfinished sentences.  
Unfinished stories.

Reports

Write a sentence or two to describe picture.

Teacher-made  
Tapes or worksheets

World Book Encyclopedia

Little Golden Encyclopedia

Laminated picture file

Picture magazines

write an acceptable letter.

Letter writing.  
Friendly letters.  
Notes.  
Thank you notes.  
Thank you letters.  
Job application letters.  
Messages.

Noble and Noble  
Adult Basic Education  
(letter-writing)

order by mail.

Provide catalog order blanks to be filled out.

Application forms.  
Social Security forms.  
Catalogs.

use straight typing.

Introduce typing instruction from basic text. Work for accuracy in copying printed material rather than original composition.

Typewriters

attempt creative writing through poetry.

When encouraging creative writing do not grade the product, award the effort.

Scholastic Creative Writing Magazines for junior high

Offer opportunities to compose poems through visual imagery, sound and rhythm.

Visual imagery: The rain dripped down  
down  
till it hit the ground  
then <sup>u</sup>n<sup>n</sup>ced.

Word patterns:

noun  
verb verb  
adjective adjective  
verb verb  
noun

trees  
swaying, bending  
deeply, silently, slowly  
growing, sl<sup>o</sup>wing  
trees

Haikus —unrhymed Japanese poem of three lines containing 5-7-5 syllables respectively and referring to a season of the year.

The thoughts of my mind  
1 2 3 4 5  
tremble and blow to and fro  
1 2 3 4 5 6 7

Objectives

WRITING (Continued)

attempt creative writing through:  
(Continued)

Activities

Instructional Aids and Materials

like leaves in a wind.

- 1
- 2
- 3
- 4
- 5

Before initiating rhyming, create names from words.

Example: trombone      T. Rom Bone  
 teacher                    T. Cher  
 lazy one                  Lay Z. Won

Limericks:

descriptive writing.

Provide skill drill with similes:

- Checks like roses.
- Neck like a giraffe.
- Hands like eagle's claws.

Direct the similes to create favorable, unfavorable, light, foreboding (etc.) feelings.

Metaphores: A ship plows the sea.  
 A man races the clock.

Draw pictures of the metaphor to enhance the visual imagery.

short stories.

Open-ended stories.

Let students continue a story begun by the teacher; (try a mystery). At the proper signal, the next student continues the plot with the last person developing the conclusion. Replay the story.

Tape recorder.

Read stories and let the students route the conclusion.

Objectives

WRITING (Continued)

short stories (Continued)

Activities

Instructional Aids and Materials

Place objects in view, (an old shoe, a fishing lure, and a trophy). Have the students write a story based on the objects.

Make an open-ended story video tape or Super 8 films. Let each group of children present their tape for viewing and have conclusion writing by the rest of the class.

Present tapes to parent groups or younger students on films concerning problem solving which would stimulate conversation.

Take field trip to TV studio to watch taping of a program.

Visit movie sets if location near town to observe a movie in the making. Write the NM Movie Commission for information.

Video tape recorder and monitor

Super 8 mm Camera, Projector

New Mexico Movie Commission  
Santa Fe, N.M. 87501

**SKILL AREA:** Academic  
**LEVEL:** Pre-vocational  
**C. A.** 13.0 - 15.11

## COMMUNICATION

### Objectives

The student will:

spell appropriate words for personal needs.

### SPELLING

#### Activities

Draw spelling word from a pile and use it in a sentence (oral game).

“What, when, where, how” game -- student tells a student to use one of the words; if correct he names another student and picks the word he has to use, etc.

Card games with words on cards (3" x4").

Mobiles with week's words.

Words hidden on a paper filled with letters.

Reading and Spelling for Self-Protection.

#### Instructional Aids and Materials

Dolch basic word list

Words from daily bulletins

Vocational Word list  
(see appendix)

Language Master

SPELLING (Continued)

follow spelling program appropriate to reading level.

spell appropriate words for vocational needs.

Activities

Class dictionary for words used in class

Spelling contests

Spelling "bees"

Spelling baseball

Word race games

Crossword puzzles

Hangman

Scrabble

Select words used in writing orders menus or specific job forms (auto parts, babysitting, etc.)

Instructional Aids and Materials

Activities

Instructional Aids and Materials

demonstrate verbal use of arithmetic vocabulary.

Addition terms and symbols.

- plus
- column
- carry
- adding
- sums

Subtraction terms:

- subtraction
- minus
- borrow
- remainder
- difference

Multiplication terms:

- times
- times table
- once
- twice
- double product

Division terms:

- divisor
- quotient
- remainder
- equal
- separate

Ordinals:

- first
- second
- third
- fourth
- fifth
- sixth
- seventh
- eighth
- ninth
- tenth
- first
- last

BASIC FACTS AND PROCESSES (Continued)

demonstrate verbal use of arithmetic vocabulary.  
(Continued)

Placing in track and field events.  
Line up for Indy and USAC car races.

Location terms:

- middle
- above, below
- far, near
- in front of, behind
- begin, end
- beside, around
- left, right
- center
- edge

Apply to experiences as arise.

Use terms in construction of models.

Shapes:

- square
- triangle
- rectangle
- circle
- half circle
- pentagon
- trapezoid

Size and amount terms:

- many - few
- heavy - light
- high - low
- tall - short
- all - enough - some - none
- double
- average
- reduce
- equal

Objectives

BASIC FACTS AND PROCESSES (Continued)

carry out directions using arithmetic vocabulary.

Activities

Draw "blueprints" follow first verbal and written directions on the length of lines--numbers of windows (etc.)

T-square  
Graph paper

Hand the students a number of objects, give verbal instructions on assembling objects (bolts, screws, etc.) without visual aids.

Nuts, bolts, screws, joints, wires, sockets.

Instructional Aids and Materials

**SKILL AREA:** Academic  
**LEVEL:** Pre-vocational  
**C. A.** 120 - 15.11  
**MATHEMATICS**

Objectives

BUSINESS MATH

The student will:

tell the value of coins to \$1.00 and bills to \$600.00.

Money-raising activity to learn use of money, change making, etc.

Real money

begin a budget on personal expenditures.

Assist with game concessions and ticket selling for school activities.

Continental Press--U. S. Money Series

Set up allowance or earnings budget.

Include cost of lunch or snacks.

Cost of entertainment.

Cost of improper behavior (breaking a window).

Cost of clothing if purchased.

from a tax chart, compute tax on purchases for budget.

Provide each student with a tax chart.

Reg. Res. City fee

Use multiplication with a decimal point to compute tax then add for total.

Follet - Money Makes Sense using dollars and cents

Activities

Instructional Aids and Materials

Objectives

Activities

## MATHEMATICS

### Instructional Aids and Materials

### Activities

### CONSUMER MATH

The student will:

measure and figure distance.

inch

foot

yard

mile

measure for making classroom and other equipment such as bookshelves.

**Sewing**

Purchasing household items:

curtains

rugs

stoves

Holt, Rinehart and Winston, Inc. - *Measure, Cut and Sew*

Follett Ed. Corp. - *Snip, Clip & Stitch*

Continental Press - *Measurement*

F. Richards, Artic, W. Sr. High

RMSEIMC # 2195

3312

3320

3322

estimate answers in simple problems of computation.

Approximate quantity that equals pound (lb.).

Use meat, fruits, flour (items possibly purchased by weight).

Measure to record actual weight in comparison to estimate.

Estimate height of ceiling length of room - width of district.

Compare actual measurement to named approximation.

Follett

Objectives

CONSUMER MATH (Continued)

apply computation\* skills to travel by car.

exhibit the ability to manage time in daily living.

Activities

Maps - one inch equal a mile - how many miles (by air - direct route)

Add distances between cities on state maps to compute total distance to selected destination.

Relate time to class schedules and school activities.

List times of favorite TV shows or other activities and draw a clock showing the times.

Games

Make calendars and mark off days

Identify holidays and birthdays.

Relate past events by computing days ago, months ago, years ago, etc.

Drills in correct writing of time and age.

Develop a vocabulary of time words:

- hours
- minutes
- weeks
- years
- afternoon
- tomorrow
- before
- after, etc.

Experiences with timeclocks and hours worked.

Bus, train, and airplane schedules.

Budgeting of time to include work time, leisure time, rest time.

Instructional Aids and Materials

Air maps

State and national highway maps

Judy Clock

Continental Press Time Series

Stop watch

Time punch clocks

Yearly calendars

Personal calendars

\* Apply to all vocational leisure time and social activities.

CONSUMER MATH (Continued)

write out dates in various methods.

mark a calendar according to "day after,"  
"weekends," "days of the week," "last year"  
and "next year."

Use written words and number equivalents, ask  
students to write in corresponding manner.

Have students keep individual calendar. Schedule  
assignments and activities in advance

Individual calendars

**AREA:** Academic  
**LEVEL:** Pre-vocational  
**C. A.** 12.0 - 15.11

**--SCIENCE--**  
**Interaction with Physical and Technological Environment**

Objectives

PHYSICAL ENVIRONMENT

The student will  
 carry out basic experiments.

- Use of plants, seeds for work with controlled environments.
- Build a small green house in the classroom.
- Study characteristics of plants buds, leaves, stems, produce received from plants.
- Have students draw charts and record data.

Instructional Aids and Materials

- BSCS Science Series
- Wood moldings
- Plastic
- Florescent lighting
- Educational Innovations, Inc.
- Filmstrips to Fill a Need
- Educational Marketing & Research, Inc.**
- Science Teaching Aids
- Balance scales, bulbs, batteries, wires, pulleys, magnets, prisms, etc.
- Carburetors to disassemble.

practice environmental care.

Discuss and run experiments on detergents, pesticides.

Study ways to diminish pollution (solid and liquid waste disposal).

Assist at auto emissions test centers.

Test water for impurities.

- Pictures
- Kits to measure carbon monoxide, test waters, purity, etc.
- Films

Objectives

PHYSICAL ENVIRONMENT (Continued)

expand awareness of the planet Earth in relation to the solar system.

recognize weather, seasons as determined by the tilt of the Earth on its axis.

experiment with air currents in causing lift in balloons, airplanes, kites.

Activities

Create a model of the solar system.  
 Display and rotate model of solar system.  
 View Saturn, Mars, through telescope.  
 Recognize solar energy, build a solar cell.  
 Visit a planetarium.  
 Study basic characteristics of the nine planets.  
 Work experiments with centrifugal force.

Introduce as many weather meters as can be located:  
 rain gauge  
 thermometer  
 barometer  
 wind speed and direction

Build a small weather station.

Send helium balloons aloft with notes and messages to be returned.

Construct box kites for kite flying races.

Decorate with free design or create individual "coat of arms."

Instructional Aids and Materials

Mechanical model of solar system

Solar heat kits.

String, object  
 Spin paint kits.

Weather indicators

Helium balloons

Newspaper, string, rags, balsa wood, plastic, paints

Academic Dimension Systems, Inc.  
 ADS System - *Sight, Sound, Touch*

Bell & Howell Program Builder Kit

Satellite weather pictures from TV stations

**AREA:** Academic  
**LEVEL:** Pre-vocational  
**C. A.** 12.0 - 15.11

- SCIENCE -  
 Interaction with Physical and Technological Environment

Objectives

Activities

Instructional Aids and Materials

TECHNOLOGICAL ENVIRONMENT

The student will:

associate consumer goods with energy source and raw materials.

Make paper from rags, wood pulp.

Paper recipe

Study source of materials: in clothing, cotton, wood, silk, synthetics.

Visit a ranch at sheep shearing time.

Pick seeds from cotton and ask local artisan to assist in spinning the wool and cotton.

Spinning wheel

Wool, cotton

Burn coal, wood, kerosene - note grime and residues.

Discuss industry and environmental issues.  
 Discuss industry to job potentials.

Clearing House  
 Santa Fe, New Mexico

Practice care and cleaning of household tools - hand tools, power tools, maintenance purchases.

Gardening tools (if appropriate)  
 Hand tools (if appropriate)

Build tool chest and storage places for household items.

Power tools  
 Power mower

Plumbing  
 Mechanics - (electrical)

Sewing machines  
 Toasters

Make storage places for tools at school.

**Objectives**

**TECHNOLOGICAL ENVIRONMENT (Continued)**

read and follow simple operating instructions.

make use of communication modes appropriately.

**Activities**

Bring instruction to read and follow on:  
 hair drivers      hot combs  
 electric toothbrushes      electric curlers  
 irons      dishwashers  
 washers      dryers

Follow directions on items, step by step.

Fill out warrantee forms and mail in.

Discuss and practice best means of communication for various reasons:  
 telegraph      cable  
 wireless      hot line  
 radio      TV  
 telephone      mail

Have local ham radio operator contact another operator. Discuss call numbers.

Know expense of each mode.

Solve problems: "How would you contact your uncle on a ship on his way to Hawaii?"

**Instructional Aids and Materials**

Common household appliances and equipment

Camera (Instamatic, Polaroid)

Wireless radio set - crystal set

## SOCIAL SKILLS

**INTER-PERSONAL RELATIONSHIPS**

Objectives

THE SELF

The student will

distinguish appropriate behaviors relative to different social situations

Situations to discuss:  
 school functions (dance, football game, etc.)  
 leisure time  
 boy/girl interaction  
 family situations  
 peer communication  
 adult/student communication  
 emotional interaction through role playing  
 (love, hate, fear, aggression, etc.)

Make bulletin board displays of different social situations.

demonstrate an understanding of his/her role in family and in school.

Group discussions

determine the roles of various participants.

Family names - how and why surnames may be legally changed - heritage and customs.

Class discussions of family roles with stress on clear expressions of their own feelings.

Discussions which provide opportunities for the child to express and explore his own morals and standards.

Discussion of job divisions in the home.

Discussion of foster homes and adoptions.

Visit from school counselor, welfare worker as resource person.

Discussions of dating - manners - (role playing)

Instructional Aids and Materials

Educational Activities, Inc. *Teaching Children Value*

Scholastic Books - *Maturity - Growing up Strong*

Frank E. Richards, Publ. - *You*

Palomares/Besell - *Human Development Training Program for Institutionalized Teenagers*

Benetic Press - *Learning for Living Series*

Projectors

Tape or cassette.

**SKILL AREA:** Social  
**LEVEL:** Pre-vocational  
**C. A.** 12.0 — 15.11

### INTER-PERSONAL RELATIONSHIPS

#### Objectives

#### **GROUPS**

#### Activities

Discussions of roles and responsibilities in marriage and family life.

Make slides of various situations and use in connection with tapes.

Camera  
Slide projector  
Video tapes

#### Instructional Aids and Materials

**INTER-PERSONAL RELATIONSHIPS**

**LEVEL:** Pre-vocational

**C. A.** 12.0 – 15.11

Objectives

GROUPS

The student will:

practice everyday courtesies, greet peers, adults.

Read stories stressing good manners.  
Provide games involving taking turns.

Discuss social situations such as: church, school, home and work.

Discuss good and poor manners.

Discuss formal and informal introductions with student role playing introductions.

Practice entering doors.  
Practice entering cars.  
Practice table manners.

Introduce each other.  
Pretend one is a teacher, parent, child, etc.

respect fellow students.

Discuss personality and why some people are liked more than others.

Teachers as model in classroom.

practice courtesies within a family unit.

Be aware of family living skills.

 C. A. 12.0 - 15.11

**CITIZENSHIP**

Instructional Aids and Materials

Activities

Objectives

HERITAGE

The student will:

relate facts about individual cultural heritage.

Localize curriculum to the various ethnic groups.  
 Use community resource persons.  
 Plan extra-curricular activities to aid local events:  
 • rodeo fiestas  
 Christmas decorations

Let students serve on community committees project.

Visit displays of traditional art.  
 Demonstrations of traditional crafts.  
 Discuss role of three cultures in history of state.  
 Compare holiday customs in different cultures.  
 Art and crafts projects in traditional style.  
 Myths and legends, folk songs.  
 Cook, using recipes from different ethnic groups.

describe the significance of holidays to historical personages and events.

relate current happenings to history and historical documents.

Triple A Southwestern Tour Guide  
 Cultural Awareness Centers at universities  
 Local celebrations

Cultural Awareness Units  
 Resource People  
 Field trip

State Library  
 Media Center  
 Santa Fe, New Mexico

*Profiles In Courage*  
 Film series

Southwest Media Center  
 Las Cruces, New Mexico

State Library Media Center  
 Santa Fe, New Mexico

Present New Mexico history in relation to United States history (Civil War, Louisiana Purchase, etc.)

## CITIZENSHIP

## Objectives

## FUNCTION OF GOVERNMENT

The child will:

tell about local governmental agencies.

Activities

Constitution, Declaration of Independence.  
Field trips to city hall, meet the mayor.

Be able to locate the library, sanitation department, police department, fire protection, schools, courts, public assistance health services, post office in own community. Take field trips where maps are followed to locate address.

Compare English terms and names for agencies and services to Spanish terms.

Make chart showing different phases of city government.

Attend City Council Meeting when relative subject is being discussed.

Role playing: how to get information or action on a problem (i.e., trash collection whom to call?).

Locate phone numbers in phone directory.

Use town maps found in telephone directories, write out directions from the map.

Resource units on family, government, community.  
City maps let each student have one to examine and write on.

Make models, make clay or wooden models of community agency buildings.

(e) *In Your Country*

**SKILL AREA** Social  
**LEVEL:** Pre-vocational  
**C.A.** 12.0 - 15.11

## SAFETY, HEALTH & HYGIENE

### Objectives

#### HEALTH AND HYGIENE

The student will

- practice good general health habits

Have guest speakers (school nurse, dental assistant, home economics teacher).

Role playing of good health habits (brushing teeth, skin care, food preparation - general cleanliness).

#### Demonstrations:

- hair care
- skin care
- neatness

relate proper use of drugs.

Drug and Narcotics Unit - demonstrations and resource people.  
AA people.

Drug Education Section  
State Department of Education  
Santa Fe, New Mexico

tell how the body functions

Model of body with removable parts.  
-Films and filmstrips on the body and the function of various parts.  
- Read pamphlets on the care of the body.

Film - "Wonder of our Body"  
State Library

Study motor functioning -- bones, muscles, systems -- organ, skeletal, circulatory.

**Mead Educational Services**  
3-D Molded Plastic Charts -- Zoology, Botany, and Human Body

Adapt local school program on sex education and adolescent growth.

### Instructional Aids and Materials

Instructional Aids and Materials

Activities

Objectives

HEALTH AND HYGIENE (Continued)

~ tell how the body functions. (Continued)

Experiment with plants, show what happens when deprived of water, oxygen, food, sunlight.

Educational Progress Corporation -  
*The Choice is Yours*  
*Human Growth and Development*

Resource Guide in Sex Education for the Mentally Retarded, NAHPER,  
1201 16th Street, NW  
Washington, D.C. 20036

Microscope  
Slides

Study microscopic cells of blood, hair, skin.  
Work on concept that cells ultimately receive the nourishment from our food.

recognize cellular structures.

Doctor's office  
Laboratory  
Public Health  
Indian Health Centers

Visit a medical laboratory.

Look at slides used in determining diseases, etc.

understand the need for regular dental and medical check-ups by trained professions.

Have dentist speak to class. (Bring X-rays of teeth to class).

Trip to County Health Office

County health service has a representative who can talk to class.

Have the student locate the public health departments.

Know services available, TB tests, vaccinations, etc.

Objectives

Activities

Instructional Aids and Materials

HEALTH AND HYGIENE (Continued)

practice health care to prevent disease.

Discuss measures which prevent disease: vaccinations, sufficient rest, clean water, properly stored foods.

understand matters pertaining to health and hospital care.

Discuss cost of dental services, glasses, medicine, etc.

Insurance forms

Practice how to make an appointment.

Role of the drugstore, pharmacist, medical clinics, emergency rooms.

Have students compile own medical, dental and vaccination records.

contact doctor, dentist, hospital or other medical personnel.

Have students list family doctor, dentist, etc., and their telephone numbers.

Telephone book

-discuss setting up appointments  
-visit a dentist

-discuss who to contact in case of a medical emergency, i.e., a hospital

make emergency phone call.

List of what to report.

Telephone directory

Learn emergency numbers.

use a fever thermometer.

Read thermometer and keep daily thermometer records.

Thermometers

measure prescribed doses of "medicines."

Follow directions on mock medicine bottle and prescription dosage and time element.

Nurse-made "prescriptions"

ObjectivesSAFETY

The student will:

use flammable materials with care.

use simple first aid in emergencies.

know how to stop bleeding by pressure.

Activities

Demonstration by a fireman on flammable material.

Discuss and make folders of flammable materials.

Film on First Aid—practice basic first aid measures.

Demonstrations by life guard.

School Nurse, representative of Red Cross, local doctor and nurse.

Make a first aid kit for the class, make personal first-aid kits.

Construct various "safety signs."

First Aid demonstrations by nurse Red Cross.

Instructional Aids and Materials

Fern Trip *Reading to Safety*

Safety films (National Safety Council).

Hudson & Weaver—*Plans for Living Health & Safety*

Chart showing flammable/inflammable materials.

Film—*"Artificial Respiration"*  
State Library

Red Cross Guide

Junior Red Cross Book

Munro, Leaf—*Lippincott—Safety Can Be Fun*

Instructional Aids and Materials

Activities

Objectives

SAFETY (Continued)

know how to stop bleeding by pressure. (Continued)	Role play an accident.	Opaque Projector
	Discuss safety involved.	
	Make safety posters for the school.	
use rules of water safety.	Film on water safety.	Red Cross Guide
	Have life guard speak.	
	Go to swimming pool.	
	Red Cross personnel.	
know how to give assistance in case of accident (keep injured warm, keeping crowd back, etc.)	Have Red Cross representative or nurse address class.	
report accidents.	Have policeman outline procedures to class.	
clean up unsafe liquids and other substances on floor of classroom and elsewhere.	Read warnings and directions on bottles.	Empty bottles of insecticides, poisons, lye, etc.
		Films

**SKILL AREA:** Social

**LEVEL:** Pre-vocational

**C.A.** 12.0 - 15.11

**LEISURE TIME**

Objectives

MUSIC\*

The student will:

have experience playing a musical instrument such as a guitar, autoharp, drum, resonator, bells, maracas, bongos.

Integrate in regular music classes whenever possible.

Practice instrument with color coded notes, chords or other appropriate aids.

Make simple instruments.

Listen to different instruments, describe sounds.

Classify (brass, woodwind; high, low, etc.)

Visit band practice: relate sound and appearance of instrument.

Instructional Aids and Materials

Activities

Larger districts consult music consultant

ENMU is providing training for Music Therapists, consult Special Education Department

Orff-Kodaly Materials

Instruments

Boxes, strings, straws, etc. for instrument making records, tapes

Passages—“Peter and the Wolf” “Young People’s Guide to Orchestra”

Live music and peer group musicians  
Passages from rock albums >

\*Integrate into regular music, art and physical education classes.

**MUSIC (Continued)**

Activities

Instructional Aids and Materials

name different music styles.

Listen to different kinds of music.

Tapes and records

Draw and/or write with different musical backgrounds.

Tell how different music makes you feel.

Informal rhythm accompaniment to different kinds of music (finger-snapping, desk-top drumming, etc.)

Play jazz, rock, folk, country-western, classical selections

Records and tapes

Marches make drill teams for marching routines.

Have a band twirler teach the girls baton twirling.

participate in small combos.

Obtain instruments for students' use.

participate in dances

Have square dances; Cultural-Costumed Programs for special days.

Modern P.E.

Relate to instrument activities.

Records for folk and square dancing

Make costumes.

Have fiesta type of program.

Have ceremonial dances combine music, art, sewing, reading, performing, speaking (cultural awareness).

Social

LEVEL: Pre-vocational

C. A. 12.0 15.11

LEISURE TIME

Objectives

Integrate into regular junior high art classes.

**ART\***

The student will

complete projects in leather, painting, model building, yarn, sewing

Tools for future crafts at home should be provided.  
When an interest in one particular hobby becomes apparent, encourage mastery.

*Leather work:*

- belts
- purses
- billfolds

*Painting:*

- water paints
- oils
- charcoal
- chalk

*Model building:*

- balsa wood
- boats in bottles
- doll houses and furniture

*Yarn and string:*

- knitting
- crocheting
- stitchery
- weaving
- ojos
- wall hangings
- macramé

Instructional Aids and Materials

- leather
- buckles
- tools
- dyes
- paints
- canvas
- brushes
- wood
- model glue
- paints and varnishes
- yarn
- wool
- cotton
- needles

\* Integrate into regular junior high art classes.

Objectives

Activities

Objectives

FREE TIME

The student will:  
locate free community recreational facilities.

Visit any available recreational facilities near or in the community.  
parks, baseball diamonds, tennis courts, lakes and rivers for fishing. (Note need for fishing license)  
recreation centers—M.R. Community Centers  
Public pools  
Group sponsored dances  
Card games  
Pool games  
Shuffleboard Courts  
Teams (basketball, softball)

locate commercial recreational facilities

Bowling alleys.  
Recreational Centers:

Pool  
Bowling

Swimming pools  
Movie theaters

Have students tabulate transportation cost and time involved with activities prior to field trips to the facilities.

order needed equipment.

Discuss proper names of sports equipment.  
Baseball, basketball, backpacking, boating, swimming, etc. Order by name and description of needed items.

Sporting Goods catalogs  
Department Store catalogs

**Objectives**

**FREE TIME (Continued)**

The student will:  
recognize cost of recreational activities.

**Activities**

**Instructional Aids and Materials**

Compare and place recreational costs into student's budget.

Movies \$1 to \$ \_\_\_\_\_ Theatre tickets  
popcorn \$ \_\_\_\_\_ Special events tickets (rodeo, plays)  
cokes \$ \_\_\_\_\_  
candy \$ \_\_\_\_\_  
total \$ \_\_\_\_\_

Bowling forms  
Bowling  
cost per game \$ \_\_\_\_\_  
rental of shoes \$ \_\_\_\_\_  
total \$ \_\_\_\_\_

Fishing license application  
Fishing  
license \$ \_\_\_\_\_  
pole \$ \_\_\_\_\_  
reel \$ \_\_\_\_\_  
total \$ \_\_\_\_\_

Bus tokens or tickets  
Gas--cost per gallon  
Transportation  
walking \$ \_\_\_\_\_  
bicycle \$ \_\_\_\_\_  
bus \$ \_\_\_\_\_  
car \$ \_\_\_\_\_  
Other sporting items \$ \_\_\_\_\_

select activity based on cost and preference. Discuss budgets and activity preference relative to cost: Sales catalogs for trailers and campers

- Camping: Campers  
Backpacking  
Hiking and picnics  
Jogging
- Outdoor Sports: Water skiing  
Fishing  
Tennis

# VOCATIONAL SKILLS

SKILL AREA: Vocational Competencies

LEVEL: Pre-vocational

C.A. 12.0 - 15.11

**VOCATIONAL PREPARATORY TRAINING**

Instructional Aids and Materials

Activities

Behavioral Objectives

DEVELOPING OCCUPATIONAL GOALS

The student will

develop a knowledge of job possibilities in the community.

Teacher should have knowledge of job opportunities in city. This may involve research at local Employment Security Commission office and discussions with local businessmen, TVI.

Field trips to job centers, i.e., Kirkland in Albuquerque.

Resource people for class discussions.

Career Fair -- coordinate with other classes.

Understand that there are governmental agencies which can help the individual.

Prepare transparencies showing how these agencies help the individual.

Role play interview.

SRA Kits on *Career Opportunities*

Guidance Assoc., Pleasantville, N.Y. 10570 *Work At All?*

DEVELOPING OCCUPATIONAL GOALS (Continued)

pay for lunches.

Set classroom up with work stations.

Frank Richards *Using Money Series*

Students buy lunches on weekly basis.

Real money

Make change in cafeteria - practice making change in classroom.

use public transportation, where applicable.

learn how to go from one part of the city to another

Have students draw maps of how school bus gets them from home to school.

Transparencies of parts of city

Practice map reading skills.

Scholastic Press--booklet -*Map Reading Skills*

Identify important areas in city - have students show how they would get there.

Use city maps and maps in telephone book to find out how to get places.

City maps and telephone books

Objectives

Activities

Instructional Aids and Materials

DEVELOPING OCCUPATIONAL SKILLS (Continued)

receive correct change.

Arithmetic lessons planned around money needed to ride bus; making change.  
Role playing riding on the bus.

Tokens  
Change  
Taped lessons

learn to read bus schedules.

Invite representative of the bus company to "rap" with class.

Bus schedules

ride public transportation with supervision.

Role play  
Field trips - ride bus to specified destination.

learn housekeeping skills such as sweeping, mopping, vacuuming, cleaning bathrooms and kitchens.

Learn by doing  
Develop notebook with pictures of tasks and descriptions of how they should be done.

Frank Richards - *The Happy Housekeeper*  
Mop, broom, vacuum cleaner

have a facility for the use of tools, machines and materials such as sewing machines, iron, hammer, saw, typewriter.

Projects involving use of tools and machines:  
Stuffed animals for pediatric wards  
Bookcases, tables for classroom or home

Workbench in classroom  
Tools  
Safety posters  
Sewing machine

Make notebook, typed, showing tools and how to use them.

Typewriter

have a facility for the use of tools, machines and materials. (Continued)

Request use of Mobile Workshop Units if your school district has them.

Ironing skills training.

Iron and board

Ginn & Co. - *Sewing Step by Step*  
R.W. Parkinson & Assoc. - *Snip, Clip & Stitch*

## VOCATIONAL PREPARATORY TRAINING

ObjectivesJOB APPLICATION

The student will:

understand ways of searching for a job.

give his own vital statistics for filling out application form.

Activities

Utilize Want Ads with discussion.

Vital statistics—what does it mean?

Sex

Eye color

Weight

Sex

Height

Height

Fill out teacher-made forms, drivers license forms, job application forms

fill out application forms.

Role play:

Student going to apply for job. Student unable to complete application because he does not know his own vital statistics. Poor man has to go home without job.

Study of the application by the entire class of each individual part.

Give matching word work.

Ask each child to bring his census number to class. For a period of a week or more call students by census number whenever possible.

At various intervals give out copies of applications and let the student check his own ability at completing them.

Instructional Aids and Materials

Fearon—*Getting a Job*

Full length mirror

Scale

Yardstick

Dittoed application forms made up by teacher to include just those statistics worked on

Formal application forms to show how questions are included in most applications

Secure actual job applications from the Navajo Tribe, Window Rock, Arizona and other companies.

Secure job openings and descriptions from Navajo Tribe and other companies.

Teacher-made forms  
Business forms

Prepared lists of words and what they mean

Copies of applications

Objectives

Activities

Instructional Aids and Materials

JOB APPLICATION (Continued)

fill out application forms. (Continued)

Role play:

Repeat the student going to apply for job and have the interviewer ask orally his vital statistics. Then let interviewer describe some of the jobs available. (The kids really enjoy this. You can tell their relationship with each other by the positions offered.) Also, the location of the job plays an important part at this point.

United Transparencies—*I Want A Job*

Finney Co.—*Help Yourself to a Job*

Follett—*Turner Career Guidance Series*

Study state road maps for job site. Study distance there, cost, approximate time, mode of travel, rest stops on the way, buy lunch or take your own.

New Mexico road maps

Discussion as to the cost of taking a job a great distance from home:

- Advantages of living in a city
- Advantages of living in a town

be well-groomed (see personal health and hygiene section).

understand how wages and hours are related.

C.A. 12.0 - 15.11

## VOCATIONAL PREPARATORY TRAINING

### Objectives

### ON THE JOB

The student will

accept criticism.

accept and follow directions.

participate in group projects.

work alone.

solve everyday problems such as:

know what to do if he has a problem concerning work schedule.

know what to do if he is late.

know what to do if he gets sick.

know what to do if he misses the

bus.

### Activities

Teacher should set up situations for students to learn to deal with job schedules, boss expectancies, reactions to criticism and the like.

Planning an activity.

Planning a mural, bulletin board.

Assembly line.

Committee assignments.

Follow-up on assignments given by teacher.

Define problem—come up with solutions through group discussion—decide on good approach—tell why.

Discussions relating to different causes of "lateness."

Role play situation:

Right/Wrong

Have students act out good and poor approaches; class decides better approach and tells why.

Group discussion.

Telephone reporting.

Carry schedule.

Report in by phone if going to be late.

Instructional Aids and Materials

Activities

HOME AND FAMILY LIVING

Objectives

The student will:

develop concept of home and family responsibilities.

- Family structure
- Legal responsibilities
- Obligations
- Expenses
- Rent
- Insurance
- Utilities
- Food costs
- Medical care

understand care of infants and young children.

Read teacher prepared information on child development.

Prepare notebook on child care.

Participate in a "watching" situation.

*Cooking:*

Provide cooking experiences with frozen, boxed foods. Provide experiences on reading directions.

Select foods to provide nutrition from four basic food groups.

Carry on basic cooking skills: boiling, baking, frying, broiling.

Make beds.

Wax furniture.

Compare costs of home cleaning materials.

HOME AND FAMILY LIVING (Continued)

function within a "batching" situation.  
(Continued)

select and care for clothing properly.

Activities

Bring different types of cleaners to class and discuss each.

Bring different sizes of clothes to class and learn to read labels.

Make card containing personal clothes and shoe sizes, slacks, shirts, visit clothing stores.

Make orders from catalogs based on sizes.

Practice hanging clothes properly.

List ways to prolong life of clothes.

Learn how to wash and iron different materials.

Polish shoes.

Discuss proper choice of clothing for weather.

Bulletin board or poster displays made by students showing safe use of washing machine, dryer, dishwasher, vacuum cleaner, hammer, saw, lawn mower.

Discuss and practice methods of daily, weekly and yearly tasks in keeping a residence clean and repaired.  
Learn to change a fuse in fuse boxes.

Notice frayed electrical wires, mend with electrical tape.

Invite senior citizens to class to teach simple repair procedures

Mending doors and frames.

Roofing repair, replacing glass.

Instructional Aids and Materials

Published by Junior-Senior High School Division of Scholastic Magazines, Inc., New York

Grolier—*Modern Consumer Education*

Catalogs

Bulletin board  
Poster board

Lawn mower

Poster showing parts of mower

Electrical tape

Hand tools for home repair

Instructional Aids and Materials

Activities

Objectives

HOME AND FAMILY LIVING (Continued)

use home utilities and tools safely. (Continued)

Electrical cord repair.

Let students locate service supplier in the telephone book:

- Plumbers
- Electricians
- Roofers
- Construction companies
- Glass companies
- Appliance repair

Telephone book

Asking for labor costs of each, compute repair costs with labor and parts. Discuss money saved by keeping things in repair.

relate knowledge in types of homes.

Discuss available housing: single homes, flats, apartments, rooms, trailers, rent lease, purchase.

Provisions for storage efficient kitchens.

select furnishings for home.

By catalog, newspaper ads, visits to stores.

Select furnishings for homes by attractiveness, style and color schemes.

Practice furniture arrangements:

Make a scrapbook of furnishings, appliances, equipment.

Make draperies, pot holders, pillow slips, bookends, shelves.

Follow aesthetic planning of home furnishings.

Instructional Aids and Materials

Activities

Objectives

HOME AND FAMILY LIVING (Continued)

select furnishings for homes. (Continued)

build furnishings (representative of culture) and "appliances" for the home.

Furnish one room apartments, two room apartments, four room house, six room house within pre-established budgets.

Have artisan teach the making of adobe bricks—let the class make and dry bricks, then build an outdoor oven.

Cook bread in the oven.

Build cabinets and shelves for the room.

Adobe bricks

Workshop equipment.

**SKILL AREA:** Vocational  
**LEVEL:** Pre-vocational  
**C. A.** 12.0 - 15.11

**PRACTICAL ARTS**

Instructional Aids and Materials

Activities

Objectives

TRANSPORTATION

The student will:  
 respect automobiles and trucks and know that they must be kept in good repair.

AAA has safety booklets, films.

Have shop teacher demonstrate.

Have students demonstrate (changing tires, etc.).

Have mechanic speak.

Students work on motor parts.

Read about car upkeep.

Compute price of keeping up a car and yearly depreciation rates.

use community transportation system, if available.

give directions to nearest train station, airport and bus terminal.

Driver Training Manuals

Car

Mechanics vocational books

Books on cars

Blue book

Maps of city

Instructional Aids and Materials

Activities

Objectives

TRANSPORTATION (Continued)

describe method of obtaining tickets for various means of transportation on time tables, state and U.S. maps.

plan trips to pre-determined places.

Practice ticket purchasing.

Purchase tickets on public transportation for one or two field trips.

Practice reading time tables.

Select points of interest within the city, county, state and country.

Determine mode of transportation, cost of transportation.

Write Chamber of Commerce and chain hotels and motels for cost of rooms.

Teacher-made tickets

Transportation ticket costs

Tourist information pamphlets, travel brochures, travel information.

# VOCATIONAL

**ACADEMIC SKILLS**

**SKILL AREA:** Academic  
**LEVEL:** Vocational  
**C. A.** 15.0 - 21.0

**COMMUNICATION**

Instructional Aids and Materials

Activities

Objectives

LISTENING

The student will:  
 display listening skills by being able to  
 attend to verbal instructions or directions.

Use Language Master for sight-word vocabulary.  
 Breakdown entire listening process into various  
 components, e.g., extracting main ideas.  
 Daily drill in listening to instructions for the  
 specified work for the day.

Verbal instructions on periodic trips around the  
 campus. Then expanding the geographic areas  
 which the student must learn about.

Each student should develop listening skills  
 relevant to obtaining and keeping his or her  
 specific job. Use cassettes to give explicit verbal  
 instructions. Answer the telephone and take  
 messages.

Such drill is dependent upon local and  
 community job placement and current  
 personnel.

use of second or native language  
 to give instructions.

Language Master (Bell & Howell)

EDL--Educational Developmental Laboratories--  
 Listen Series:  
 a) Listen and Think  
 b) Listen and Write  
 Tape recorder and record player activities

Audio-Visual English Set II  
 Purchase from:  
 Collier-MacMillan  
 866 3rd Avenue, NY 10022

Cassette tape series on:  
 Educational Resources, Inc.--Getting A Job

AREA: Academic  
 LEVEL: Vocational  
 C. A. 15.0 - 21.0

**COMMUNICATION**

Objectives

INTERPRETATION

The student will:

display skills to interpret and retain what has been heard.

Activities

Class discussions on different articles and topics.  
 "Rap" session - stressing listening skills.  
 Use popular songs (records for further development of listening skill(s)). Have students listen for specific parts or sections of the record.

Tape radio news broadcasts and have students select main ideas in newscast (social studies activity).

display skills to receive information through communication media.

Have students listen for specific facts in an assigned program and report to the class on the next day.

Look for TV references in magazines.

Practice in class with radio or TV news broadcasts.

Instructional Aids and Materials

Scope magazine  
 Daily newspaper

*You and Your World* and *Know Your World*

Tape recorder

Bowmar Reading Series - *Horses, Aquibikes, Motorcycles, Snowmobiles, Dune Buggies*  
 cassette tape, reading books and filmstrip

LEVEL: Vocational  
C.A. 15.0 - 21.0

**COMMUNICATION**

Objectives

Activities

Instructional Aids and Materials

SPEAKING

The student will:

make himself understood.

Have student describe his job and the job activities, duties and requirements.

Use tape recorder

Discuss with students their future plans. (e.g., marriage, jobs, field trips, including descriptions of what they have seen)

Have student demonstrate and explain a specific job skill:

How to sack groceries.

How to use a cash register.

improve speech pattern.

Student must be able to pronounce the relevant terminology which is used in job interviews and on job application forms.

express own thoughts.

Role playing (job interview, charades; buying a car [salesman and buyer]).

Movies

Objectives

SPEAKING (Continued)

ask for information.

Activities

Comparative language activity--Use any two languages. Pick out a number of words which are spelled correctly. Have the students use these words in a phonics type drill, e.g., general; pan (bread); pan (pan).

Send student to different people on campus and have them ask these people specific questions, e.g., How to get to a certain location.

Drill to improve speech patterns, pronunciations, and articulation. Teacher should recognize sound differences of other languages used by students and teach correct pronunciation in each.

use native language.

Read Spanish (or other language) stories, poems, songs, etc.

Have students translate.

carry on acceptable social conversation and discussion of ideas through socially acceptable language.

Have "rap" sessions - daily conversation. Use token reinforcement for not using cuss words in daily classroom discussions. Find substitute words for cuss words.

Through the use of newspaper and role playing learn how to ask about renting a sleeping room, renting a room in a boarding house, apartment, etc., and how to tell the owner you are interested or not interested, or to discuss with the manager financial problems you may have in making advance down payment.

Reinforcement - Free time; smoke breaks, games; listening to tapes and records.

Film - Production 5118 (NMSU extension film library contact Pat Krymitz) Film deals with verbal communication techniques

Instructional Aids and Materials

Objectives

SPEAKING (Continued)

carry on acceptable social conversation and discussion of ideas through socially acceptable language. (Continued)

carry on a telephone conversation.

Activities

Discuss words used, but not acceptable.

Discuss the appropriate manner in which to address others directly or when referring to them.

Use appropriate workbooks.

Have students talk over Army field telephones which can be purchased at any Army surplus store. Permit no visual contact while talking.

Practice on a teletrainer - Via Telephone Company.

display interview skills.

increase speaking vocabulary through functional activities.

Instructional Aids and Materials

Activity Records Inc. - *Social Perceptual Training for Community Living* - tapes-slides and guiding - some parts are excellent for high school because they show young people in real life situations.

Turner-Livingston Communication Series - *The Language You Speak*  
*The Phone Calls You Make*

Movie:

Telephone Company booklet - *Steps in Home Living* telephone section

Turner Career Guidance Series: *Wanting a Job*,  
*Starting a Job* - Steck-Vaughn

Movie:

Steck-Vaughn - *Getting A Job*

Language Master - Bell & Howell

Role play

Invite an outside person (adult) to come to class and interview. e.g., local businessmen.

Answer a want ad by phone.

Individualize practice on the terminology relevant to specific job applications.

Learning different ways of saying the same thing.

boss → employer

worker - employee

supervisor - foreman

"cool" - neat

Expressing the same idea in different ways.

Bilingual - give directions in English and then in Spanish.

**SKILL AREA:** Academic  
**LEVEL:** Vocational  
**C. A.** 15.0 - 21.0

**COMMUNICATION**

Instructional Aids and Materials

Activities

READING\*

The student will:

read for practical information in various news media such as magazines and newspapers.

Learn that newspaper or magazines have various sections - use of index and table of contents.

Read and collect information of their interest at that time and assemble into a scrapbook, notebook, bulletin board, etc.

Utilize advertisements such as sales, comparative buying, gimmicks such as 3 for \$1.00 or 25¢ each, or save 3 for 81¢ or 27¢ each.

Provide exposure to the different sections within the classified ads as:  
 for sale: cars, appliances, animals, homes  
 personal items  
 situations wanted

1-2-3 newspaper, magazines  
 In SEIMC

Turner-Livingston - *The Newspaper You Read*

Lawson Book Co. - *Newspaper Reading*. 9488 Sara St.,  
 Elk Grove, California 95624  
 1.60 ea. workbook

RMSEIMC Workbook 811

Noble & Noble - *Operational Alphabet Series*

Action Kit Scholastic Book Service, 904 Sylvan Avenue,  
 Englewood Cliffs, NJ 07632

\*Desired reading levels are 4th to 5th grade.

Objectives

READING (Continued)

locate information to help solve problems in resource books, simple reference materials, directories and dictionaries.

Activities

Use of the dictionary by learning alphabetical order in order to determine spelling or definition.

Utilize the classified section of the telephone directory to locate and identify types of services, businesses and merchandise.

Locate and study the map sections of the phone directory and index:

Directions NSEW of map

Various sections of the city

Reading sectioned maps of large towns—

Albuquerque, El Paso

Find specific location in street intersection

Locate the numbers for emergency, businesses, services personnel.

Locate information in employment manuals concerning sick leave, insurance, policies.

Provide opportunities to read and follow applicable booklets for care and operation of appliances, clothing labels, preparation of food.

Create a work order:  
delivery location  
items to be delivered.

Provide scavenger hunt with directions as well as items to collect.

Instructional Aids and Materials

Dictionary

Telephone-directory classified section

Map section

Medical guide

Dr. Spock—*Baby and Child Care*  
Medical Health pamphlets

Personnel manuals

Manufacturer's directions  
Packaged foods, cook books

Sears, etc., catalogues

Objectives

READING (Continued)

read and fill out application forms.

read information pertaining to bills, statements and job requirements.

Identify various terminology, i.e., print, sign last name, address, guardian, maiden name, forms for employment, credit, social security applications.

See objective A-1 under Vocational Competencies for more detailed information.

Develop vocabulary lists, flash cards, transparencies, related to various job opportunities.

Make simple organizational charts of various businesses.

Read occupational briefs on various jobs.

Use of purchase orders through catalogs — compute total, tax, shipping costs, description, quantity, size, color.

Include terminology pertaining to banking, credit and loans; i.e., balance, credit, interest payment, legal obligations.

Activities

Teacher-made directions

Language master  
Flash cards

Application forms

Occupational Education Fact Finding Series Part I, II, III Workbooks containing application forms for loans, credit cards, etc., Special Service Supply, Box 705, Huntington, NY 11743

Instructional Aids and Materials

 LEVEL: Vocational  
 C. A. 15.0 - 21.0

COMMUNICATION

Objectives

WRITING AND SPELLING

The student will:

write legibly with ease and reasonable speed.

Letters: personal, asking for information or requesting items, i.e., pictures, albums, posters.

If cursive writing is not legible, permit manuscript.

Provide formal exposure to lettering.

Use ink and pens with various styles. (Gothic, etc.)

Apply lettering skills to posters, awards.

Stress letter formation and spacing.

Writing checks

use punctuation and capitalization correctly and habitually in meeting his daily needs.

Practice personal letter format vs. business letters.

Activities

Instructional Aids and Materials

Color coded alphabet - cursive or manuscript

Local job application forms

Social security forms

Richards - *That English We Need*

Steck-Vaughn *English Practice for Mastery*

Listen Series

*Eddie In School*

Objectives

WRITING AND SPELLING (Continued)

demonstrate basic typewriting competency.

spell words needed in meeting his daily needs.

fulfill needs associated with occupational writing. (Signs and labels)

fulfill needs associated with occupational writing.

Activities

Adapt procedures for teaching typing in the classroom if students are not accepted into typing class.

Encourage typing for letters, friendly and business.

Fill in application forms.

Present the names of relatives, streets, cities, companies, schools. (Use telephone directory.)

Words used on job application forms.

Days of the week, months, seasons, and abbreviations for each.

Have students write work orders.

Have students label packages for mailing:

Fragile      Rush

Special delivery

Have students draw the various caution signs:

Stop

Caution

School zone

RR

Yield

Children at Play

Fill out information on an office or telephone memo.

Student should keep a personal data sheet, which may include information about employers, personal references and other personal data.

Keep a record of work hours.

Keep a record of savings accounts.

Keep a record of installment buying.

Instructional Aids and Materials

Typing Instruction Book

Standard or electric typewriters

Abbreviation and punctuation dictionary

Make cards with caution and informative words from posterboard:

Poison

Exit

Driver's manual

Danger

Etc.

Objectives

WRITING AND SPELLING (Continued)

fulfill needs associated with occupational writing. (continued)

complete sales slips, receipts, job orders, menu orders.

use writing as a tool to communicate ideas through business and personal letters and messages.

Activities

Keep track of tax.

Budgets!

Necessities.

Desires.

Practice filling out common sales slips.

Practice taking routine job orders.

Writing explanatory notes to boss or fellow workers about incident on the job.

For those who are capable — use standard typing manual to practice typing skills — good for those with problems in writing skills — also reading and spelling aid.

Practice personal letter writing.

Write letters of application.

Write letters to order articles found in news ads, magazines.

Write letters of complaint.

Instructional Aids and Materials

Pick up discarded sales slips from business in the community.

Quick order catalogues

Inter-office memos

Typing manual

Typewriters

Type of paper appropriate

AREA: Academic  
LEVEL: Vocational  
C. A. 15.0 - 21.0

MATHEMATICS

Instructional Aids and Materials

Activities

BASIC FACTS AND PROCESSES\*

Number concepts—very few arithmetic skills are developed at this level, but rather, it is a reinforcement and adaptive program of skills already learned as they apply to problem of daily and vocational living of the individual.

Design individual lessons based on needs of students and desired vocational place—such as baking, construction, traveling.  
Review basic facts using worksheets, chalkboard activities, workbooks.

Teacher-made worksheets

Miller Publications—*Sources of Free and Inexpensive Teaching Aids*  
Holt, Rinehart and Winston

McGraw-Hill & Co.—Wester Division—*Individualized Study Units in Arithmetic*—includes units in addition, subtraction, multiplication and division  
*Learning Skills Series*

The student will:

compute time and measurement of time units.

Using a clock—count minutes and hours.  
Use a split clock.

Time cards  
Clock

Make a map and mark off time zones.

Map of U.S.

tell difference between a.m. and p.m.

Use the calendar to show measurements of weeks, months, holidays, school term.

Calendar  
Compute time in other states  
Frank E. Richards, Phoenix, NY 13135—*Learning About Time*

compute linear measurements, weights and volume.

Mark off floor in square yards, feet, etc.  
Divide ruler and yardstick into inches, feet, fractions, etc.  
Measure classroom.

Scott, Foresman—*Activities in Mathematics, Measurement*  
Fearon Publisher—*Measure-Up*  
Chalk  
Ruler  
Yardsticks  
Steel tape

\*Apply diagnosis of arithmetic skills for use in effective grouping presented in pre-vocational arithmetic unit.

Objectives

BUSINESS MATH

Activities

Instructional Aids and Materials

The student will:

work computation problems.

Using the computation skill level of each student, create problems for solving.

Holt, Rinehart and Winston - Individualized study units in arithmetic

make change and work with money facts.

Money - Practice skills in recognizing denominations of coins and currency.

Teacher-made materials  
Adding machine

Count money and develop skills in making change.

Cash register  
Real money  
Play money

Make field trips to grocery store to locate items on list and write down the amount. Add tax and total.

Use a cash register.  
Use Commercial Workbook.  
Use teacher-made materials.

Study amounts used to fill rolls of money and practice rolling money.

operate business machines, such as adding machines.

Demonstrate adding machine and have students operate it in addition, subtraction, multiplication and division processes. Introduce basic bookkeeping with "debits" and "credits."

Adding machine  
Ledgers

read and draw graphs.

Use bar and pie graphs to show relationship of time to activities.

Fearon - Time and Telling Time

bar.  
line.  
pie.

Make a line graph for task completion of students in class.

Graph paper  
Mathematic compass

Divide individual budget expenditures into pie graphs (percentage).

Graphs: City population  
Miles traveled in drivers' training, etc.

**SKILL AREA:** Academic  
**LEVEL:** Vocational  
**C. A.** 15.0 - 21.0

**MATHEMATICS**

Objectives

CONSUMER MATH

The student will:

conduct banking activities, such as using checking and savings accounts.

Dramatize various activities in a bank savings program; checking-account, etc.  
 Fill in various deposit slips.  
 Special students, checking accounts.  
 Write checks.  
 Balance checking accounts.  
 Field trip to bank.

use money skills as related to time payment, credit and loans.

Discuss credit cards and credit rating.  
 Visit Credit Union, Small Loan companies.

compile Income Tax forms.  
 Use W-2 forms.

Do worksheets in *Math In Living IV* using fictitious situations, fill in current income tax forms.

know where to get tax computing assistance.

Visit Internal Revenue Service Building, commercial tax establishments.

solve problems of critical buying and money management.

Read newspaper ads for comparing prices.  
 Practice making catalog orders.  
 Use catalogs (Whitney - Automobile Part) to compare merchandise, such as Sears, Wards, etc.  
 Price articles of clothing worn.  
 Buy items using a specific amount of money.

Activities

Instructional Aids and Materials

Pruett Press-Boulder, Colo. - *Banking, Mathematics in Living Book III*  
 Bank booklets on savings accounts and checking accounts

Mafex Association, Inc., 111 Barron Avenue, Johnstown, Pa. 15906 - *Mathematics for Citizenship* - Series of Workbooks 1 - V

Special Service Supply, Box 705, Huntington, NY -  
*Arithmetic Skill Text for Daily Living*  
 Comparative shopping problems taken from grocery lists, clothing/hardware stores, automobiles

# SOCIAL SKILLS

## INTER-PERSONAL RELATIONS

ObjectivesSELF

The student will:

be aware of own strengths and weaknesses.

Do the *I Want To Work* series anytime and as often as possible for building self-confidence.  
 Have successful high school graduate student from Special Education class or any other handicapped area come and talk about his experiences.  
 Teacher help structure guest student so person tells:

His personal feelings

How he decided what to do with his capabilities/limitations

His successes and failures

His plans for future

Use arts and crafts, PE (volleyball) to build his self-confidence by showing what student has done and display individual work around school.

Use PE in competitive area especially when Special Education students can excel when competing with regular students.

Teacher's role should be continuous with sincere daily praise on positive aspects of student behavior, ideas, products, etc., to build self-image at every level.

Get students to praise each other (and praise student for praising another student).

A grooming unit - to help student do the best with what he has. Appropriate dress for - job, school, parties, job interview, weather, leisure time.

Instructional Aids and Materials

*I Want To Work Series* - has one section in self acceptance.

Frank Richard Co. - *You* - book and workbook

Turner Career Guidance - Turner-Livingston on *Personality Series* - #12 *Better Living* Gary Lawson RMSEIMC

Fashion magazines, catalogs

Objectives

SELF (Continued)

establish social relations and work toward realistic goals.

Activities

Discussion: men's and women's various roles in a family--who does what at home--or Role Playing responsibility to:

- Children
- Parents
- Girl and boy friends
- Peers
- Other adults

Compare "pioneer days to now" on social roles.

Masculinity--femininity--"mode of dress," behavior, posture.

Use film monitor of mirror (full length) to show how student walks or behaves on a private level.

Discuss students' heritage and acceptance and understanding of differences.

Explain meaning of term realistic by having each student write a list of their strengths (things they can do) and their "weaknesses." Continue by giving examples of stories of well-known people showing their strengths and weaknesses.

practice self-respect.

Discuss similarities and differences.

Instructional Aids and Materials

Human Development Skills- Institutionalized Clients Palomares and Bessel, La Joya, California

Set up *Who's Who* corner to give recognition to pupils who have developed special skills and abilities. Display samples of their work. Fashion magazines, catalogs

Objectives

SELF (Continued)

develop consideration of others.

express feelings socially.

Activities

Discuss speech — acceptance and appreciation of “native language.”

Discuss cultural customs (family response, immediate, expanded society).

Discuss social class values and attitudes.

Discuss and describe feelings. Use open-ended questions for discussion: “I feel very angry when \_\_\_\_\_.”

As problem arises of students teasing each other or any other pertinent problems discuss the feelings involved at that time.

Discuss “Success” — how it makes a person feel and how to handle this feeling.

Through discussion and role-playing help students become aware of “different” and “appropriate” behavior and language to be used in various social settings and with various groups.

Instructional Aids and Materials

Frank Richards *You*

Teacher-made worksheets or tape recorder to record students' answers.

*Human Development Training Program*

Secondary Level | Palo Mares, San Diego, Calif.

Holt — *Values in Action*

**C. A.** 15.0-21.0

**INTER-PERSONAL RELATIONS**

Instructional Aids and Materials

Activities

Objectives

GROUPS

The student will:

participate in group and community projects, activities and communities.

Discuss civic, neighborhood organizations and how they contribute to personal growth, leadership and what these groups do to the community.

Encourage students to participate in a community and/or school activity of their choice:  
 bowling team  
 child care  
 summer camps  
 etc.

function as a member of peer group and adult family member.

Discuss different types of families and roles each person plays (i.e., fatherless families, living with relatives).

accept responsibilities to groups and group members.

Discuss importance, and direct students to work in groups to plan and direct their social activities and trips (in and out of town).

Discuss differences between cultures and emphasize strengths of each.

Scope/Scholastic—Maturity Kit (record) (books, booklets)

American Book Co.—*The Mexican American*

Objectives

GROUPS (Continued)

develop social skills and practices in such areas as dancing, dating, etc.

know what to look for in a friend.

recognize acceptable code of values relating to community moral and spiritual matters, social behaviors, customs, traditions, laws, rules and authority.

Activities

Plan and give parties.  
Invite dance groups or community person to teach dancing.

Discuss definitions and examples of:  
courtesy            fair play  
respect             honesty  
ability to give and take  
allowance for mistakes

Read stories of true friendship.  
Show movies demonstrating true friendship.

Group discussion relating personal experiences in these areas and results of experience in terms of "material being" and "inner feelings."

Discussion -- Role Playing and reading for acceptable social behavior of teenagers and their boy-girl behaviors.

Instructional Aids and Materials

Records  
Dance teachers to invite to class

Film - *Everyday Courage and Common Sense*  
Workbook - 812 *Better Living*

Record and script - 7017 *Teaching Children Values*  
Scholastic Magazine, Inc. - Feb., 1971 Kit (records, books, posters) - *Getting Together: Problems You Face*

Scholastic Magazine - Kit (records, posters, books, booklets) - *Prejudice: The Invisible Wall*

Books edited by Aurelia Stowe - *Boy Meets Girl*  
*Girl Meets Boy*

Turner-Livingston Reading Series (6 books)

**AREA:** Social  
**LEVEL:** Vocational  
**C. A.:** 15.0 - 21.0

**CITIZENSHIP**

Objectives

**HERITAGE**

The student will:

have idea of origin of community.

know origin, purpose, and method of observing local and state celebrations and traditions.

Activities

Study names around the United States (towns, states, rivers, and historic places).

New England  
 Pennsylvania  
 Chippewa River  
 "China Town" San Francisco, etc.

Maps  
 Movies  
 (National Geographic)

Utilize guest speaker versed in local and state folklore.  
 Present relics and antiques in discussion.

Antiques  
 Relics

Help put on celebrations for younger classes.  
 (Piñata)

Invite local artisans for school assemblies.

Visit local historical places.

Instructional Aids and Materials

## CITIZENSHIP

ObjectivesLEGAL RESPONSIBILITIES

The student will:

demonstrate citizenship skills by displaying a functional knowledge of civil laws and legal resources as they pertain to juvenile and adult citizens.

Activities

Have a unit on law to include the following in a problem-solving situation:

You and Your Rights--example:

1. What to do when you get arrested;
2. When juvenile sentences vs. adult;
3. When juvenile age changes to adult;
4. Shoplifting;
5. Stealing;
6. Carrying weapons;
7. Public demonstrations.

Legal aspect of drugs -- "drugs as such covered under health."

Make a "student information guide" on whole unit to be kept and taken home.

Attorney -- civil rights -

Have student actually go to the Legal Aid Society and ask for aid.

Visit court.

Have an actual court trial in class with students.

Pros and cons of public demonstrations -- Legal rights.

Have a student spend a day with a law or probation officer.

Instructional Aids and Materials

People to come and speak:

Community resources attorney  
Probation officer  
Personnel from drugs  
Police department  
Legal aid society  
A rehabilitated convict  
Court judge

Scope (Senior Scholastic) record, booklets, posters  
Law: *Rights and Duties of Citizen*

See American Guidance Assoc. for filmstrip-record series on *You and Law*

See city and state or police offices for films and materials on justice.

Richards Publications - textbook - *Foundations of Citizenship Book 1 and 2*

Have tape recording of interviews with judges, etc.

People come in from Better Business Bureau

Objectives

LEGAL RESPONSIBILITIES (Continued)

demonstrate citizenship skills by displaying the functional knowledge of civil laws and legal resources as they pertain to juvenile and adult citizens. (Continued)

Activities

Drug Education Div.  
State Dept. for films and information  
Guidance Associates  
Catalog for materials on legal aspects  
See city offices for pamphlets  
Chamber of Commerce concerning city laws

Present units on major laws:

- Employment
- Marriage
- Driving.
- Hunting
- Drinking
- Child labor.

Study city laws and ordinances:

- Sanitation
- Humane regulations
- Fire
- Water
- Licenses
- Tax
- Permits
- Building
- Parade
- Soliciting
- Liability - Financial, Property

**SKILL AREA:** Social  
**LEVEL:** Vocational  
**C. A.** 15.0 - 21.0

**CITIZENSHIP**

Instructional Aids and Materials

Activities

FUNCTION OF GOVERNMENT

The student will:

become familiar with agencies which provide help for families and citizens in time of emergencies, such as social services, OEO office, Voc: Rehab., etc.

Visit the following agencies and make a student reference notebook called "Help."  
 Health and Welfare Motor Vehicle Dept.  
 Industrial and Construction Commission  
 Employment Securities  
 Highway Dept. OEO-HUD-Model Cities  
 Vocational Rehabilitation

Telephone numbers and addresses of all agencies

Have Social Security person to come talk and/or take to office.

Workmen's Compensation.

Take pictures and slides of these different agencies that have been-visited.

Camera, slide projector

Invite FHA people to talk about housing and financing - also some community Action Agencies to help find housing for low income people.

Have hospital personnel come and talk about health care, emergency ambulance.

Visit County Health Offices and Health Clinic for free health services.

Know where to locate information on mental health offices, Crippled Child Services, Services for Blind.

ObjectivesActivitiesInstructional Aids and MaterialsFUNCTION OF GOVERNMENT (Continued)

Meet and assist Community Civic Organizations--  
"Lions," "Elks," etc. Churches.

Be aware of district juvenile court services--for  
child abuse counsels for those students who are  
getting into trouble.

become familiar with agencies which provide  
services to families. (Continued)

Family welfare:

Family court

Divorce

Custody of children

Foster placements

Adoption

Guardianships

Welfare workers

Social workers

## CITIZENSHIP

Instructional Aids and MaterialsActivitiesObjectivesDEMOCRATIC PROCESS

The student will:

have knowledge of the selective service.

demonstrate a knowledge of the democratic processes that govern our country.

Have military people come in and explain about "selective service laws" and classification.  
Take boys to register for the draft.

Present a unit on voting to start out at the school level. Learn about "poll fees."

Hold elections (within class school elections).  
Campaign local and state headquarters.  
Have candidates from each political party to come and give talks.  
Attend rallies.

Write to candidates.  
Practice how to register for a political party, time, cost.

Have voting registra. come to class and explain and register students.

Help students register to vote.

Have students realize expenses of campaigning.

Let students donate time or money to selected candidate.

Hold election returns party on night of national or state returns.

Hold informal class discussion about political issues; encourage students to bring materials defending their viewpoint:

Compare different points of news by different TV and radio newscasters.

Compare advertising - propaganda tactics -

"don't believe everything you see."

Note privileges and obligations presented in constitution.

Military Recruiters or school counselors

**SKILL AREA:** Social Competencies

**LEVEL:** Vocational

**C. A.** 15.0 to 21.0

**HEALTH, SAFETY AND HYGIENE**

Objective

HEALTH AND SAFETY

The student will:

implement basic First Aid procedures.

Have representative from local Red Cross come to class.

Representative from rescue squad come to class.

Field trip to emergency room at local hospital.

Have students practice first aid procedures.

Water safety should be stressed, particularly in the Spring.

Student should understand home safety.

Water (spills/falls)

Electricity

Heat

Ladders

Glass

Cooking

Appliance shorts-

fuse box

furnace - floor, wall

Burns

Cuts - bleeding/pressure points.

Medicines

Combustion - wax, grease, fires /

water not used to smother.

Activities

*First Aid As It Happens*

American Red Cross First Aid Manual

*Metropolitan Life - Household Safety Booklet*

Instructional Aids and Materials

ObjectivesActivitiesInstructional Aids and MaterialsHEALTH AND SAFETY (continued)

observe home safety practices such as storage of toxic materials.	Have students fill out checklist at their home on poisonous liquids, fire hazards, faulty ladders, etc. Discuss ingredients in common household items and harm to humans.	Bring in common household items: Bleach, cleaners, detergents, aspirin, cold medicines, etc.
locate health services available in the community.	Know about services available through welfare agencies. Planned Parenthood. Know about local health centers. List of emergency numbers e.g. hospital, doctor, rescue squad, etc. Crisis Center.	Speakers with films from Planned Parenthood.
discuss dangers of smoking, alcohol and drugs.	AA - Get information from this organization. Drug unit - see local health center. Unit on household drugs. Have ex-addicts speak to class. Speakers from local health centers, police departments, etc. American Cancer Society.	EyeGate - 1972 - <i>Generation on Drugs Series</i> American Cancer Society has materials Phone company has films
realize importance of pre- and post-natal care and procedures.	School Nurse can talk to class. Psychiatrist or physician can talk to class on care and growth of an infant. Do some work on heredity.	Film available from Planned Parenthood Lawson Book Company, 9488 Sara Street, Elk Grove, California 95624 - <i>Safe and Sound Workbook</i> covers areas of planned parenthood, pre-natal care, baby care, accident prevention and first aid.
be aware of social, communicable diseases.	Visit health clinics or have nurse or physician speak. Epidemics, natural disasters, V.D.	
recognize symptoms and the care and preventive procedures of childhood diseases.	Measles, polio, mumps, chicken pox, diphtheria.	

Objectives

HEALTH & SAFETY (Continued)

understand the need for regular dental and medical check-ups by trained professionals.

understand matters pertaining to health and accident insurance plans.

Activities

Have dentist speak to class.

County health service has a representative who can talk to class.

Relate personal needs to needs of children and responsibilities as parents.

Student should know about the different types of insurance.

Teach unit on benefits of hospitalization.

Know the cost of staying in a hospital.

Have an insurance agent speak to class.

Get insurance (health, accident) forms and have students fill them out.

Explain differences between group and individual insurance.

Withholding payment from checks.

be aware of community health precautions.

Community health is concurred with minimizing spread of disease.

Community health in cafeterias and restaurants.

Cleaning

Cooking

Food poisoning

Pork-trichonosis

Public health inspector forms

Insurance representative

Insurance policies

Objectives

## HEALTH, SAFETY & HYGIENE

### Instructional Aids and Materials

### Activities

### Objectives

### HYGIENE

The student will:

understand and respect the human body and its functions.

Develop units on physiology and anatomy. Discuss and know life cycle.

Doctors and nurses can come and talk to class.

Establish units regarding the effects of alcohol, smoking and narcotics on the body functions.

Have students make posters for bulletin board. (Bulletin Activities)

demonstrate good nutritional habits.

Develop unit on nutrition - The Basic Four.

Teach the way the four food groups can be used with a variety of "cultural" foods:

Tacos give:  
 meat  
 vegetables  
 bread/cereal  
 milk (cheese)

Spaghetti gives:  
 meat  
 vegetable (tomato)  
 cereal  
 milk (cheese)

Foods do not have to be eaten at a specific meal:  
 Nutritional foods can be eaten at any time:  
 tortillas and chile for the morning meal rather than omitting the meal.

# VOCATIONAL SKILLS

Vocational  
Vocational  
15.0 - 21.0

## VOCATIONAL PREPARATORY TRAINING

LEVEL:

C. A.

### Objectives

#### PREPARATORY

The student will:

know how to fill out application forms, social security, withholding and union forms.

### Activities

Pretest—have students discuss answers they gave and questions they did not answer.  
Each student should compile personal papers to be kept in billfold which contains basic job application information, such as:  
address, city and zip code  
social security number  
first and last name of both parents, including mother's maiden name  
age of parents  
names, addresses, and phone numbers of persons to be called in case of emergency  
names, addresses, and phone numbers and occupations of three persons to be used for character references  
list of schools and years attended  
previous jobs, employers' names, addresses and dates of employment

Learn words on application and what information is required for an answer.  
Learn vocabulary words by games:  
relays  
bingo  
card games  
and oral discussion to see if student understands.

### Instructional Aids and Materials

Application forms from businesses in the area.  
Paper of bright color for information or small index card  
Small pocket-size notebook to keep in billfold or purse

Opaque or overhead projector

Vocational Education, State Department of Education,  
Santa Fe, NM 87501—Vocational Instructional  
Materials for Students with Special Needs

Objectives

PREPARATORY (Continued)

know how to fill out application forms, social security, withholding and union forms. (Continued)

analyze jobs by skills, benefits, requirements.

Activities

*Evaluation*  
Students fill out application forms. Emphasize neatness. Encourage students at junior and senior level to use the same method, or if they already seem competent in this area, give them an application form as a periodic review. For variety in evaluation and understanding of all parts of application forms, create mock information sheets and transfer that information to correct place on application form.

Tapes and filmstrips to demonstrate skills and requirements for a specific job.

Discuss job requirements.

Present information from a town and county listing business establishments and local industry. Analyze by skilled, unskilled positions.

Active or sedentary.

Compare "job descriptions" when available at larger establishments.

Have employer discuss duties of a job—visually and verbally.

Have students who have worked on the job tell what they were required to do, how they were required to act, etc.

Classroom discussion.

Visit training station of work-study students.

Scan daily newspaper.

Instructional Aids and Materials

Knowledge needed to obtain work

Know Program ... SKA Book and wallet size information

Teacher-made information sheets

Tapes—filmstrips

Teacher-made films and pictures of students on jobs in local area.

PREPARATORY (Continued)

demonstrate knowledge of banking departments and services.

Have students fill in spaces provided on bank floor plan:

savings checking  
loans charge cards  
trust mortgage dept., etc.

Set up a field trip in a bank.

Present financial problems for solutions by service needed.

Note paper, pencils, city map, permission slips, transportation ditto sheets with floor plan of the bank

American Bankers Assoc., 90 Parks Avenue, NY, NY—  
16 mm film—"Manage Your Money"—with film strips, teacher's guide and student practice materials

Discuss notification of loan agency when circumstances prevent payment on time.

First National Bank, Doña Ana, Box 610, Las Cruces, New Mexico 88001—*Personal Money Management*

continue or open a savings account.

Either a bank field trip or an individual visit; encourage each student to fill in signature card and deposit an amount of money in savings account.

Savings account passbook, pencil and paper, social security card, bank savings account signature card

rectify pass book, figure interest of bank savings.

Keep a record of the money he has deposited in his account.

Passbook, ledger, paper, pencil

Figure interest of banks and savings and loan at various rates.

*Dollar Sense*

set up and follow a realistic budget.

List each student's monthly income, and against it put budget items:

transportation, if any clothes recreation  
savings payments contribution to home, etc.

Review paychecks for withheld amounts and benefits.

Instructional Aids and Materials

Activities

Objectives

PREPARATORY (Continued)

know where to go for unemployment benefits.

be able to use the services of employment agencies.

use proper language in association with co-workers and supervisors.

evaluate his own efforts and production.

Discuss with individual employers. Eligibility.

Social security benefits.

Speaker and/or discussion of Vocational Rehabilitation Office.

Speaker and/or field trip to State Employment office.

State Employment Agency, private, vocational rehabilitation.

Class discussion relating personal experiences in this area.

Specific job vocabulary.

Differences of personalities of employer and employees:

- friendliness
- shyness
- cooperativeness
- aggressiveness
- assistance on your own way
- temperament
- beliefs and attitudes
- grouchiness
- sensitiveness
- personal appearance

Allow student to express self-evaluation. Employer - evaluation. Private - counseling session.

Objectives

PREPARATORY (Continued)

continue or open a checking account.

keep correct balance in checkbook.

demonstrate comparison of cost of credit.

write the consumer protection division of the New Mexico attorney general's office.

complete tasks within projected time period.

Activities

Keep record of deposits and checks. Encourage students to deposit into savings account from each pay check.

Give reasons for checks - budget, taxes.

Use practice checkbooks as exercises in writing and stubbing checks.

Note expenses which will effect taxes - medical expenses medicines donations to church and charity.

Encourage student to compare credit applications, interest rates, carrying charges, and other credit costs of various companies.

Using credit rates figure actual cost of large items, cars, appliances.

Ask the consumer protectionist to lecture on consumers' rights and responsibilities (door-to-door salesmen).

Review or continue to work on learning to read time.

In classroom encourage and require students to complete a worksheet or project within a given time period, emphasize working with speed and accuracy is also required on the job.

**ON THE JOB**

Objectives

WORK STATIONS

The student will:

be punctual and dependable.

Provide selected consequences for:

1. Coming back to the work station on time after breaktime.
2. Getting to work on time.
3. Calling in to school and/or job if he is ill or if he is going to be late.
4. Carrying out a specific task as assigned without doing unnecessary activities.

apply relevant safety procedures.

Wears appropriate safety or health garments when job related.

Follow warning signs and health procedures.

demonstrate acceptable inter-personal relationships with peers and supervisors.

No fighting on the job.  
Should be taught how to get along with fellow employees.  
Learn to be tolerant.  
Students should learn to be honest and not gossip among other employees.

Filmstrips are available

Consequences at school:

- Points
- Free time
- Tokens

John Day Company-How To Hold Your Job

Objectives

Activities

Instructional Aids and Materials

WORK STATIONS (Continued)

work at competitive pace in a prescribed length of time.

Contract for specific goals based on a prescribed length of time.

Students should be taught the importance of using one's time wisely.

Once a certain job or task has been completed the student should go to the supervisor and ask for additional duties.

practice good safety and develop the ability to read job related safety signs and warnings.

Student should be taught the importance of being aware of certain safety precautions relevant to different types of jobs. Should be taught to respect machinery, and the importance of no "horseplay" while on the job.

Student should know the function and use of protective equipment e.g. goggles, safety shoes, gloves, hard hats.

Safe driving practices if the student is in a driving type job, e.g. caution when backing, etc.

This can be accomplished by field trips to local businesses.

Outside speakers, e.g. State Police.

Be aware of explosive or inflammable products.

Student should be taught elementary First Aid procedures. (See General Safety unit).

perform simultaneous and sequential tasks.

Student should be taught how to operate a ditto or duplicating machine.

Students should be taught how to draw simple plans for woodworking.

Students should be taught how to follow instructions in the proper order.

The following areas can be used to teach this objective: cooking, woodworking, running machinery, etc.

Safety films are available from the phone company. Fire and fire prevention series. (Eyegate). First Aids as it happens series (Eyegate 1972).

**WORK STATIONS (Continued)**

perform simultaneous and sequential tasks.  
(continued)

demonstrate appropriate hygiene and grooming habits.

demonstrate employer loyalty.

develop skills in problem solving.

Making a test on following directions. First question: Read everything before you do anything. Test title is "Can You Follow Directions".

Full length mirror should be installed in the classroom so that students can check personal appearance daily, with sign over top of mirror saying "Would I hire me?"

Areas to evaluate - hair, make up, clothing, (zippers, buttons, pins) shoes.

Encourage class discussion regarding personal appearance and effect on getting a job. e.g. clean fingernails, hair combed, clean clothes, shoes shined. Field trip to barber shop or beauty shop.

Outside speaker from a cosmetic company.

Care of personal clothes.

Teach student the importance of not criticizing employer or company while in public.

Field trip to local company to talk with representative regarding loyalty to his company.

Practice verbally stating problems. Separate fact from rumor.

Teach student how to analyze specific problems before making a decision.

Student should seek advice from teacher, employer, counselor, etc., regarding problems for which they have no answer.

"Rap" Session discussing job related problems.

Eyegate, 1972- *Your Body and How To Take Care of It Series*

**PRACTICAL ARTS**

Instructional Aids and Materials

Activities

Objectives  
HOME ECONOMICS:

The student will:

compare commercial products for cleaning.

Compare the use of and storage needs of various cleaning compounds.

Commercial products

- Lye
- Powdered soaps and cleansers
- Liquid soaps
- Drain cleaners
- Window and wall cleaners
- Wax removers
- Dusting products
- Oven cleaners

demonstrate difference between home dishwashing and commercial dishwashing.

Provide for assisting in the custodial care of the school.

Assist in school cafeteria with the commercial washing of dishes.

be able to select proper skill and tools necessary for home repair.

Set up mock situations when the electricity goes off, or the drains plug up where students must determine probable cause and decide whether home repair or professional skilled labor will remedy the situation.

Home economics area

HOME ECONOMICS (Continued)

Activities

Instructional Aids and Materials

A home volunteered for use in practice.

Practice painting and repairing the outside surface of the home whether wood or adobe.  
Provide for on-site observation of painters, plumbers, electricians, brick layers doing remodeling work.

cook simple balanced meals.

Practice cooking basic meals for  
Breakfast  
Lunch and  
Supper  
based on a set income.  
Serve meals to the class.

Cooking supplies

compare commercial vs. home approach to preparation of meals.

Provide experience in school kitchen in the preparation of foods.  
Assist in school kitchen whenever possible.

**AREA:** Vocational  
**LEVEL:** Vocational  
**C. A.** 15.0 - 21.11

### PRACTICAL ARTS

#### Objectives

#### GARDENING

The student will:

design and implement simple yard and landscape design.

#### Activities

Provide for the mock selection of tools from a store or catalog by proper name.

Create models of simple to elaborate landscaping.

Provide for experience in lawn and grounds care.

#### Instructional Aids and Materials

Yard tools

Card board

Paint

Crepe paper

## PRACTICAL ARTS

### Objectives

### TRANSPORTATION

The student will:

obtain a provisional license.

### Activities

Study Driver's Manual, Laws, signs, responsibilities  
Integrate into driver education class.  
Enroll in private driver education program through Vocational Rehabilitation.  
Provide for student to obtain license.

### Instructional Aids and Materials

Driver's Manual  
Tapes on Driver Education  
Posters of common traffic signs  
Texts: *Sportsmanlike Driving Youth Behind the Wheel*

recognize car pool responsibilities.

Explain that if you ride with someone else you pay  
Discuss problems that occur if one person is late,  
not ready, not going, car problems, etc.  
Be courteous to other members; e.g., do not smoke  
if others find it offensive.

Safety films from local police,  
State Police, and Telephone Company

meet bus schedules for work.

Drive safely  
Explain importance of limited number of occupants in car.

Review method of transportation to work,  
Study situation.

Do individual follow up on transportation needs.

travel independently.

Compare modes of transportation by cost of ticket,  
time involved, meals (if necessary) and lodging (if  
necessary).

read and follow highway maps.

Plan trip - list stops and highways to follow - in-  
terstate, state, county, and road conditions.

Interstate and State Maps

# WORK STUDY PROGRAM

### INTRODUCTION

It is the purpose of this section of the Secondary Curriculum Guide to promote an understanding of the philosophy, objectives and methods of operation of the Special Education work/study program.

This manual is to be a source of information by persons within the schools to assure compliance with eligibility requirements, operational procedures, essential records, and compliance with federal and state laws pertaining to employment of minors and the handicapped.

**DEFINITION**

The Work/Study Program is a functionally organized program that integrates work and study as a balanced process of education.

It consists of learning experiences organized and coordinated by the work/study teacher and is designed to develop self-confidence, academic potential and vocational competencies.

**OBJECTIVES**

Activities should be designed to develop attitudes and skills which will

- a) lead to the formation of habits enabling students to understand themselves and to get along with others.
- b) lead to the formation of habits which promote physical development, health, safety and hygiene.
- c) enable students to develop to their maximum capabilities in the basic tool subjects through individualized instruction.
- d) lead to the application of communication and computational skills necessary to solve problems encountered in everyday living.
- e) enable students to participate in a productive way of life.
- f) assist with the selection of wholesome leisure time activities.
- g) lead to the acceptance of civil responsibility and awareness of the roles of local, state, and federal agencies.

### STUDENT ELIGIBILITY CRITERIA

Eligibility criteria are provided to the selection of prospective Special Education work/study students. Recommended participation for the Special Education Work/Study Program should come from the Educational Appraisal and Review Committee as established in the State Standards for Special Education.

Along with compliance with placement requirements into exceptional classes, the following criteria should be taken into consideration:

1. The students should be 16 years of age by January 1 of the current school year of enrollment. In special cases age 15 can be accepted.
2. The student should be seriously academically handicapped for age level.
3. The limitations that result from the disability should constitute a substantial handicap to employment.
4. There should be a reasonable expectation that through the services provided the individual will be able to engage in a remunerate occupation.

SCHOOL RESPONSIBILITIES

- A. Adopt a work/study plan that describes the roles of the student, the school, and the employer.
- B. Provide for on-site evaluation of training station work done by the student.
- C. Make certain programs comply with federal, state, and local laws and regulations (Exhibit 1)
- D. Develop a program which will permit fulfillment of necessary credit requirements for graduation. (Laboratory classes require 165 clock hours for one credit.)<sup>1</sup>
- E. Issue a diploma upon completion of a prescribed Special Education Curriculum.<sup>2</sup>

<sup>1</sup> *Minimum Standards for New Mexico's Schools*, Standard IV B, page 20.

<sup>2</sup> *State Standards for Special Education*, April 1973, page 2.

## ADMINISTRATION

The Superintendent is the key person in the success or failure of a work/study program. The school board is influenced by the superintendent's attitudes in developing policies regarding work-study coordination and the awarding of credits toward graduation.

The superintendent must verify to the Special Education Unit compliance with the following funding approval contingencies:

1. Compliance with State Standards for Special Education.
2. Availability of adequate facilities conducive to health and learning.
3. Employment of teachers endorsed or certified by the State Certification Section for the current school year to instruct handicapped children.
4. Local school districts requesting funds for a Resource Room: teacher program will be requested to submit additional personnel and pupil information for approval consideration.
5. Verification of transportation availability for all CONTINUING AND NEW CLASSES by the State School Transportation Unit.
6. Verification of Special Transportation availability for SPECIFIC handicapped enrollees.

### The Work/Study Teacher:

1. Is accountable for academic instruction in school and job training evaluation outside the school environment.
2. Cooperates with all agencies and businesses to place students in training positions.
3. Assists and counsels students; cooperates with the school counselors.
4. Counsels with parents to help them understand the limitations and assets of the student; solicits their cooperation in encouraging the young person to complete his training before dropping out of school; assists parents in viewing the child's future with pride; solicits parents' cooperation in signing job training agreements.
5. Is interested in the development and progress of the individual rather than devoted to the content of courses. Develops rapport easily.

The Work/Study Teacher (continued):

6. Is properly trained in the understanding of children and youth, and especially in the intellectually limited; he is able at any time to accept the retarded as a person with all his limitations.
7. Must be a vital, living part of the community and must be able to see "beyond the possible."

**FUNDING**

Special Education funds will be made available upon application to and approval of the state superintendent and chief for reimbursement of certified expenditures of approved programs.

Allowable reimbursements from Special Education funds include teacher salaries, educational supplies and materials and in-service training for staff, etc.

Student stipends for work stations, reimbursement to trainers, transportation must be acquired from other sources of revenue than Special Education state appropriated funds.

See Attachment II - Division of Vocational Rehabilitation  
Attachment IV - Vocational Education Division

## INTERPRETING WORK/STUDY TO THE SCHOOL STAFF

The non-teaching staff (cooks, custodians, librarian, etc.) who serve as job area supervisors must be helped to realize the important role they play in the in-school training.

Many school systems have found it effective in interpreting the idea of work/study if the superintendent or building administration assist the Special Education teacher or coordinator in explaining the program on an annual basis at a teachers' meeting, and at a meeting of the non-teaching personnel.

## INTERPRETING WORK/STUDY TO THE STUDENT

There are seldom problems in convincing high school age students of the benefits of the work/study phase of the educational program. However, there are some basic understandings that the student must grasp before this phase can be initiated. He must understand that:

1. That this is an EDUCATIONAL PROGRAM, and the student will receive grades and credits for successful work.
2. That he has certain obligations and responsibilities to the school as well as to his employer.
3. That before being placed in the community, certain work skills and habits must be developed and demonstrated in the in-school program.

Many work/study teachers have developed, with student participation, a list of responsibilities of the student trainee. This list might include such things as:

1. Time spent in employment during the school day is regarded as time spent in school, and regular attendance is required both at school and on the job.
2. Students must notify the employer and the school if illness or an emergency prevents them from reporting to work.
3. Students may not leave their jobs or accept jobs without consultation with the work/study coordinator.

## INTERPRETING WORK/STUDY TO PARENTS

Parents of high school age handicapped students are concerned about what is going to happen to their son or daughter. They want to know if he will be able to get and hold a job, if he will be able to function independently or if they must make provisions for his future. Parents are not too interested in statistics and research. They are interested instead in what is going to happen to their child. Before work/study is established, parents of the students who will participate in this phase must be given a complete explanation.

It should be made clear that work/study is an essential factor in the education of their youngsters. It offers an opportunity for practical work training under school supervision with the result in most cases of helping their child make an effective start as an adult. Their youngster's interests, aptitudes will be carefully evaluated to help determine appropriate placement, as well as training. He will receive continuous occupational guidance, evaluation, credit toward graduation, and wages commensurate with his ability to perform on the job. The program will also help their youngster learn how to budget his income effectively. Parental cooperation is most essential if the child is to benefit from work/study.

To interpret work/study to parents effectively, teachers should schedule parent conferences. The conference with parents should dwell upon:

1. the importance of work/study as part of the educational program
2. the need for the parents' child to participate in work-study
3. the specific objectives the school has for their child
4. the requirements for participation in work/study
5. the ways in which parents can help

### INTERPRETING WORK/STUDY TO THE COMMUNITY

To insure the success of work/study, it will be necessary to explain the school's endeavor to educate handicapped youngsters through this program and its importance to both the educable mentally retarded and society.

Although many work/study teachers start by knocking on doors, another approach might be to organize a committee of industrial and commercial leaders to assist in explaining the program to others in the community.

Another approach which has proved particularly effective in the smaller cities and rural areas is for a representative of the school (work/study coordinator or administrator) to approach local service organizations of professional and lay people to explain work/study and solicit their help. Groups such as Chamber of Commerce, Exchange Club, Jaycees, Kiwanis, Lions, Optimist International, Parent's Organization, and Rotary are prime examples.

Various news media have been used effectively by school work/study personnel as a method of promoting community awareness. Publicity through local news media is an effective tool which can and should be generalized in nature and needs to be positive, explaining goals, purposes, procedures and the like. The media should not be used to the point of alienating, through super-saturation, those considered friends of the program. Publicity, in good taste, stimulates employer interest in participating in this work training program. It also serves as a means of educating the largest number of people quickly and easily. The news media approach, however, does not supplant the need for personal contacts between school and community.

One general conclusion can be drawn. Not only too much publicity, but also the wrong kind of program publicity, is dangerous. In preparing various reactions of the students, parents, employers and persons unfamiliar with work/study or to Special Education.<sup>1</sup>

<sup>1</sup> Ohio Department of Education *Guidelines Work-Study Phase of EMR Programs*, 1972.

## COMMUNITY CANVASSING

Community work/study often reveals strengths and weaknesses of the student as a worker which the school program is unable to do in the less realistic school-work experiences it is able to provide. More effective counseling, guidance and training can thus be realized for the participating student.

Possible work stations should be carefully screened by the coordinator for appropriateness, working conditions and adequate supervision.

The work/study coordinator or teacher should make initial contact with the prospective employer regarding participation in the school work/study program. The teacher's visit should not be limited to just 15 minutes or two hours, but should be governed by the amount of time the employer or his designated representative is willing or able to devote to the visit. It is helpful to

1. inquire about the business
2. explain the school's work/study program
3. tour the facilities to help identify job areas
4. identify employer willingness to participate in the work/study program
5. evaluate whether the work station would be an effective training experience and whether the employer would be able to work with the child
6. fill in task analysis chart

## THE JOB SURVEY

One technique found helpful to many work/study teachers in the initial stages of program development is to survey the local area for potential placement stations. This survey should be executed by the coordinator prior to the time when students are placed on community work experiences.

A typical sequence in conducting such a survey is to start by collecting names, locations and telephone numbers of all possible employing establishments. Advertisements in the local newspaper and in the yellow pages of the telephone directory can provide much of this information. Usually local Chambers of Commerce have literature available which offers an overview of the various types of businesses and industries in the area as well as other related and pertinent information.

Once these general data are collected, written or personal contact is made with these establishments. A brief outline of the school's work/study program and request for permission to visit the establishment in the near future to explain the work program in more detail, and help identify possible job stations is included.

This written or personal contact with employers is initiated through the work/study teacher or the school administrator. It should be pointed out to the employer that the school is not expecting to place students at this time, but rather merely wishes to survey selected employers for possible job stations. This information will supply the school's work/study program with a "data bank" of various community placement stations to be considered for individual students coming through the program from year to year who demonstrate specific aptitudes for a given type of work.

#### ADVISORY COMMITTEE

Another approach is to develop an advisory committee consisting of local businessmen, community leaders, and people active in various civic organizations. This group can

- a. help locate job placement stations
- b. help disseminate information concerning the program to the community
- c. act as a sounding board of the community
- d. suggest approaches that would be most effective when working with other businessmen in the community

#### COMMUNITY AGENCIES

The most effectively organized programs are those which anticipate the need for involvement of the community. The responsibility for preparing handicapped students for adult living must be shared by the community and community agencies. The full utilization of services available through various local agencies results in maximum benefit to the children. It is more often found that the paucity of services of community agencies is due to inadequate solicitation rather than to the lack of their desire to be of service.

Particular emphasis should be given to explaining the school's program and purpose, as well as improving services to the children through a better understanding of the various services offered by community agencies. Community, county, state and federal agencies need to be utilized for an effective program.

## TASK ANALYSIS OF WORK STATION

The classroom instruction should involve the student in an exploration of many occupational areas. These areas can be selected on the basis of community availability and through the use of resources such as *Dictionary of Occupational Titles*, *The Occupational Outlook*, and *The Occupational Survey*.

Task analysis should provide answers for job requirement as follows:

- 1) Physical Demands
- 2) Working Conditions
- 3) Physical Activities
- 4) Personal and Academic Requirements
- 5) Employment Prerequisites

Analysis can be made by a trip to the resource people at the work station or by the resource people coming to the classroom.

The in-school classroom experience should provide opportunity for the student to become aware of specific skills for specific work areas and to evaluate his own competencies in relation to skill needs.

Completion of task analysis will permit the student teacher implement the student's training and instruction, perhaps in the Special Education class setting or a vocational class.

## JOB ANALYSIS REPORT

### **JOB REQUIREMENTS**

#### **I. PHYSICAL DEMANDS**

##### **A. How much strength is required?**

	Hands	Arms	Legs	Back
Great	_____	_____	_____	_____
Some	_____	_____	_____	_____
Little	_____	_____	_____	_____
None	_____	_____	_____	_____

Kind of speaking required: Little \_\_\_\_\_, giving messages \_\_\_\_\_;  
asking for materials or tools \_\_\_\_\_, giving directions \_\_\_\_\_.

_____	JOB TITLE _____
_____	LOCATION _____
_____	Kind of job _____
_____	_____ clerical _____ service
_____	_____ sales _____ self-employed
_____	_____ agriculture _____
_____	_____ factory _____
_____	_____ skilled _____
_____	_____ semi-skilled _____
_____	_____ unskilled _____

B. PHYSICAL ACTIVITIES

- \_\_\_ walking \_\_\_ sitting \_\_\_ working fast
- \_\_\_ running \_\_\_ standing \_\_\_ handling
- \_\_\_ jumping \_\_\_ kneeling \_\_\_ feeling
- \_\_\_ pulling \_\_\_ crawling \_\_\_ fingering
- \_\_\_ pushing \_\_\_ throwing \_\_\_ talking
- \_\_\_ turning \_\_\_ climbing \_\_\_ hearing
- \_\_\_ lifting \_\_\_ crouching \_\_\_ seeing color
- \_\_\_ carrying \_\_\_ balancing \_\_\_ perceiving depth
- \_\_\_ stooping

C. WORKING CONDITIONS

- Location: \_\_\_ inside \_\_\_ outside
- Mobility: \_\_\_ cramped \_\_\_ moving objects, \_\_\_ high places
- Work with: \_\_\_ others \_\_\_ around others \_\_\_ mechanical \_\_\_ wet \_\_\_ ventilation \_\_\_ exposure to burns \_\_\_ lighting \_\_\_ radiant energy \_\_\_ alone \_\_\_ noisy

II. PERSONAL AND ACADEMIC REQUIREMENTS

- Handle money? \_\_\_ yes \_\_\_ no
- Memory required? \_\_\_ much \_\_\_ little \_\_\_ none
- Arithmetic required? \_\_\_ add \_\_\_ subtract \_\_\_ multiply \_\_\_ measurement \_\_\_ fractions \_\_\_ divide \_\_\_ sales slips \_\_\_ invoices \_\_\_ other
- Reading required? \_\_\_ much \_\_\_ little \_\_\_ none \_\_\_ addresses \_\_\_ sales orders \_\_\_ patterns \_\_\_ directions \_\_\_ bulletins \_\_\_ letters
- Writing required? \_\_\_ none \_\_\_ listing \_\_\_ sales orders \_\_\_ production \_\_\_ records \_\_\_ information to be read by others
- Employee meet the public? \_\_\_ no \_\_\_ seen by public \_\_\_ talks to public \_\_\_ works with public all the time
- Kind of speaking required: \_\_\_ little \_\_\_ giving messages \_\_\_ asking for materials or tools \_\_\_ giving directions

Experience \_\_\_ not required \_\_\_ required

EMPLOYMENT PREREQUISITES

- Test given \_\_\_ employment test \_\_\_
- Licenses required \_\_\_ yes \_\_\_ no
- Driver's license \_\_\_ other
- Health certificate \_\_\_
- Written application \_\_\_ yes \_\_\_ no
- Belong to a union \_\_\_ yes \_\_\_ no
- How are employees found? \_\_\_ employment service \_\_\_ help-wanted ad \_\_\_ people come in \_\_\_ referral by friends \_\_\_ labor unions
- How much education is required? \_\_\_ no formal education \_\_\_ little formal education \_\_\_ elementary school \_\_\_ some high school \_\_\_ high school diploma

- How are employees paid? \_\_\_ by the hour \_\_\_ on the basis of piecework \_\_\_ weekly \_\_\_ monthly
- How much on-the-job training is given? \_\_\_ less than 6 weeks \_\_\_ 6 weeks to 6 months
- Can the school help in the training? \_\_\_
- How much supervision is the employee given? \_\_\_ none \_\_\_ little \_\_\_ some \_\_\_ much
- Adjustment to change required? \_\_\_ none \_\_\_ little \_\_\_ some \_\_\_ frequent
- Pressure on the job? \_\_\_ none \_\_\_ little \_\_\_ some \_\_\_ great

The following examples of work/study stations represent rough scales of three levels to use for reference when one is talking with administrators, and other on-campus personnel about job sites and placement of students:

### LIBRARY AIDE

#### Level I

1. Stack books in back room.
2. Clean library and straighten chairs.
3. Inspect and repair books.

#### Level II

1. Deliver and pick up books.
2. Stamp books with numbers.
3. Arrange bulletin boards.

#### Level III

1. Put returned books back on shelves.
2. Check out books.
3. File cards.

### OFFICE CLERK

#### Level I

1. Address and type envelopes.
2. Fold and staple material.
3. Stuff envelopes.
4. Operate photostat machine.
5. Carry messages in school.

#### Level II

1. Do copy typing.\*
2. Count and wrap in packages of 10, 15, 20, 25 for mail.
3. Operate ditto machine.
  - a. Put ditto on machine.
  - b. Check pressure level.
  - c. Use counter.

4. Carry messages between schools.
5. File alphabetically.

#### Level III

1. Operate telephone switchboard.
2. Tally.
3. Sort mail.
4. Operate mimeograph machine.
5. Operate addressograph machine.

3. Give information regarding locations of various school facilities.
4. (May) vacuum rugs and carpets and operate power sweepers.
5. Perform a variety of unscheduled custodial duties as requested by the principal or head custodian.

### GARDENER AIDE

#### Level I

1. Clean debris from yard drains.
2. Assist with planting.

#### Level II

1. Assist with laying out and marking of athletic and recreational areas.
2. Assist with care of turf on athletic fields and lawns by watering, weeding, reseeding.

### SCHOOL CUSTODIAN AIDE

#### Level I

1. Dust, sweep, clean, and mop cafeteria.
2. Remove spots from floors, walls, furniture, and fixtures and clean erasers.
3. Clean and dust hall, lockers, furniture, glass, fixtures and other installations.
4. Service soap dispensers, towel boxes, and similar facilities.

#### Level II

1. Dust, sweep, clean classrooms and cafeteria.
2. Sweep and hose blacktop, tennis courts, playgrounds, sidewalks, and parkways.
3. Gather and dispose of rubbish, paper, leaves, and debris. Supply and wash wastepaper baskets.
4. (May) raise and lower flags.

#### Level III

1. Learn to adjust, operate, and perform minor maintenance on mower, edges, sprayers, and other gardening equipment.
2. Care for trees shrubs, flowers and ground cover by cultivating, watering, weeding.

### TEACHER'S AIDE OR SHOP ASSISTANT

#### Level I

1. Collect waste materials.

#### Level III

1. Dust, sweep, clean offices.
2. Lock and unlock doors, gates, windows, transoms, and storerooms.

\* This is straight copying on the typewriter, entails the typing of lists and other simple material with no changes or modifications attempted by the student.

### TEACHER'S AIDE OR SHOP ASSISTANT (continued)

2. Sweep floors.
3. Clean tables and benches.

#### Level II

1. Mix paint or tempera.
2. Prepare and arrange supplies for lessons.
3. Duplicate follow-up lessons.

#### Level III

1. Arrange bulletin board.
2. Assist with arrangement of educational equipment and instructional aids.
3. Operate equipment in the listening center - overhead projector, slide projector, and other apparatus.

### FOOD SERVICE ASSISTANT

#### Level I

1. Clean tables.
2. Stack chairs.
3. Sweep floors.

#### Level II

1. Wash pots and pans.
2. Help to cook.
3. Sweep floors.

#### Level III

1. Make change.
2. Serve food.
3. Work at supply counter.

### SCHOOL LAUNDRY AIDE

#### Level I

1. Fold towels, sheets, and uniforms.
2. Fold and hang clothes.
3. Mend or repair clothes (by hand).

#### Level II

1. Count and shelve towels, sheets and uniforms.

2. (Boys) work with wet clothes.

3. Mend or repair clothes (by machine).

#### Level III

1. Work the presser.

- a. Uniforms

- b. Dresses

2. Wash laundry (by machine)

3. Operate clothes dryer.

### SCIENCE LABORATORY ASSISTANT

#### Level I

1. Wash bottles, trays, and instruments.
2. Feed animals.
3. Straighten classroom.

#### Level II

1. Put away equipment.
2. Prepare simple trays for students.

#### Level III

1. Set up equipment.
2. Help in giving directions.
3. Clean equipment.

### PHYSICAL EDUCATION AIDE

#### Level I

1. Hand out equipment.
2. Hand out towels.

#### Level II

1. Help at games.
2. Clean equipment.

#### Level III

1. Keep time.
2. Sort and store equipment.

### INTERSCHOOL MESSENGER

#### Level I

1. Deliver within one school.
2. Sort paper.

#### Level II

1. Delivery to two or more schools.
2. Read simple material.

#### Level III

1. Deliver to schools and other district facilities.
2. Receive and sort mail.

### GARAGE AIDE

#### Level I

1. Wash trucks and other mechanized equipment.

### GARAGE AIDE (Continued)

2. Clean windshields.
3. Maintain garage and premises in a clean and orderly condition.

#### Level II

1. Change oil in gasoline engines.
2. (May) assist in lubricating automotive equipment.

#### Level III

1. Repair tires and tubes.
2. Perform duties as assigned.

### OFFICE CLERK

#### Level I

1. Address and type envelopes.
2. Fold and staple material.
3. Stuff envelopes.
4. Operate photostat machine.
5. Carry messages between schools.

#### Level II

1. Do copy typing.
2. Count and wrap in packages of 10, 15, 20, 25 for mailing.
3. Operate ditto.
  - a. Put ditto on machine.
  - b. Check pressure.
  - c. Use counter.
4. Carry messages between schools.
5. File alphabetically.

#### Level III

1. Operate telephone switchboard.
2. Tally.
3. Sort mail.
4. Operate mimeograph machine.
5. Operate addressograph.

### STOCKROOM CLERK

#### Level I

1. Keep shelves and goods in a clean and orderly condition.
2. Load and unload trucks.
3. Seal cartons.
4. Use hand truck.

#### Level II

1. Rotate stock.
2. Store stock.
3. Wrap, pack, and prepare parcels and goods for shipping.

#### Level III

1. Issue custodial maintenance items and other school supplies.
2. Occasionally fill orders.

### X-RAY ROOM AIDE

#### Level I

1. Put on labels.
2. Act as messenger in office.

#### Level II

1. Develop X-rays.

2. Act as messenger in building.

#### Level III

1. File by color.
2. File by number.

### CENTRAL SERVICE AIDE

#### Level I

1. Cap bottles.
2. Take hair off towels.
3. Fold towels in stacks of 10.

#### Level II

1. Count 25 cotton balls and put them in paper bag.
2. Put instruments in small bags for sterilization.

#### Level III

1. Prepare trays of instruments.
2. Fold uniforms and various surgical cloths.

### MESENGER

#### Level I

1. Deliver messages on one floor.
2. Assist in sorting incoming gifts for delivery.

#### Level II

1. Deliver messages on two floors.
2. Receive incoming messages.

**MESSENGER (Continued)**

**Level III**

1. Deliver messages, gifts, and the like throughout the building.
2. (May) transmit incoming and outgoing messages.

**Level II**

1. Do copy typing.
2. Count and wrap in packages of 10, 15, 20, 25, for mailing.
3. Operate ditto machine.
  - a. Put ditto on machine.
  - b. Check pressure level.
  - c. Use counter.
4. Carry messages between schools.
5. File alphabetically.

**Level II**

1. Help supervise rest periods.
2. Help supervise outside play and group activities.
3. Assist children in performing health habits, washing hands and face, dressing.
4. Share in housekeeping duties related to children's activities and needs.

**LAUNDRY AIDE**

**Level I**

1. Fold towels, sheets, uniforms, and all other flat items.
2. Do the work of a sorter.
3. Check for unmarked laundry.

**Level II**

1. (Boys) work with heavy wet laundry.
2. Do the work of a loader.
3. Place identification in sorted basket of laundry.

**Level III**

1. Use presser for uniforms.
2. Operate hand ironer and folder.

**Level III**

1. Operate telephone switchboard.
2. Tally.
3. Sort.
4. Operate mimeograph machine.
5. Operate addressograph.

**CHILD-CARE CENTER AIDE**

**Level I**

1. Help with feeding.
2. Assist with play activities.
3. Deliver messages in center.
4. Assist with cleaning.

**Level II**

1. Use pill counter.
2. Label bottles.

**Level III**

Do the same as for Level I and Level II

**Level III**

1. Help prepare materials for instructional lessons.
2. Read stories to children.
3. Arrange bulletin boards and displays.

**PHARMACY AIDE**

**Level I**

1. Prepare packages for mailing.
2. Act as messenger.

# I. JOBS AND JOB AREAS IN COMPETITIVE EMPLOYMENT

## A.

Clerical  
 Cashier  
 Mail clerk  
 Stock clerk  
 Typist  
 File clerk  
 Duplicating machine operator's helper  
 Janitor or attendant  
 Packing clerk  
 Receptinist-clerk  
 Address-change clerk  
 General office clerk  
 Shipping clerk  
 Mailing clerk  
 Embossing machine operator  
 Machine operator  
 File clerk  
 Secretary  
 Library assistant  
 Delivery boy or messenger  
 Addressing machine operator  
 Inventory and receiving clerk  
 Clerk typist  
 Office worker  
 Switchboard operator  
 Stockroom worker  
 Stapling clerk  
 Taping machine operator's helper  
 Mimeographing helper

## B.

Labor (general, factory, assembly line, and the like)  
 Asphalt worker  
 Steel-laborer  
 Box worker  
 Clothing man  
 Lumber mill worker  
 Body and fender shopworker

Furniture hauler  
 Greenhouse man  
 Meat packer  
 Warehouseman  
 Parts man  
 Venetian Blind repairman  
 Air-conditioner factory employee  
 Food plant worker  
 Greeting card company employee  
 Staple machine worker  
 Forklift driver  
 Cannery worker  
 Ceramics worker  
 Sheetrock worker  
 Furniture worker  
 Textile mill worker  
 Car washer  
 Garage helper  
 Hatchery man  
 Moving van helper  
 Tool shed worker  
 Mason's helper  
 Painter's helper  
 Auto parts man  
 Candy worker  
 Furniture plant employee  
 Pen and pencil company employee  
 Milling machine worker  
 Drill press operator or helper  
 Bottle inspector and handler  
 Box maker  
 Metalworker  
 Beverage company employee  
 Welder  
 Carpet-layer trainee  
 Shy man's helper  
 Rug cleaner  
 Construction worker  
 Gardener's assistant

Kennelman's helper  
 Truck loader and driver  
 Carpenter's helper  
 Plumber's helper  
 Lumber salvage man  
 Auto tire worker  
 Electronics employee  
 Garment worker  
 Sewing machine operator  
 Laundress or laundryman - dry-cleaning operator  
 Packing clerk  
 Lumberyard helper

## C.

Service (general, health, hotel and restaurant, auto service occupations, and the like)  
 Child-care worker (baby sitter)  
 Copyboy  
 Housekeeper (domestic)  
 Ticket taker  
 Ticket puncher  
 Rug cleaner's helper  
 Warehouse clerk  
 Motion picture projectionist  
 Sign-printing operator  
 Dental laboratory assistant  
 Messenger  
 Janitorial worker  
 Beautician  
 Beautician's assistant  
 Delivery boy  
 Manicurist  
 Newsboy  
 Camp attendant  
 Handbill passer  
 Lubrication man  
 Florist's helper

I. JOBS AND JOB AREAS IN COMPETITIVE EMPLOYMENT (Continued)

Garbage-disposal serviceman	Nurseryman's helper
Nurse's aide	Farmhand
Laundry tumbler operator	Janitorial assistant
Hospital maintenance helper	Park Worker
Barber	Fruit picker
Window washer	Golf-course keeper II
Theater usher	Greenhouse worker
Porter, baggageman	Hedge trimmer
Tire recapper	Gardener's helper
Vendor	Yard maintenance worker and caretaker
Civilian employee of U.S. Army, U.S. Navy, U.S. Air Force, or U.S. Marine Corps	Nursery farm worker
Laundry washerman	Grass cutter
Laundry clothes folder	Campground caretaker
Rest home employee	Wood cutter
Service station attendant	
Used-car lot attendant	
Auto-wrecking yard worker	
Tire repairman	
Auto body repairman (mechanic's helper)	
Car washer	
Parking lot attendant	
Dishwasher	
Bus boy or bus girl	
Waitress	
Bellboy (bellhop)	
Soda fountain attendant	
Cook	
Cook's assistant	
Maid	
Porter	
Produce handler	
Snack bar attendant	
Sandwich maker	
Bakery helper	

D. Grounds, maintenance, and custodial  
 Grounds keeper  
 Groundsman

Skill Components for Nursery Assistant

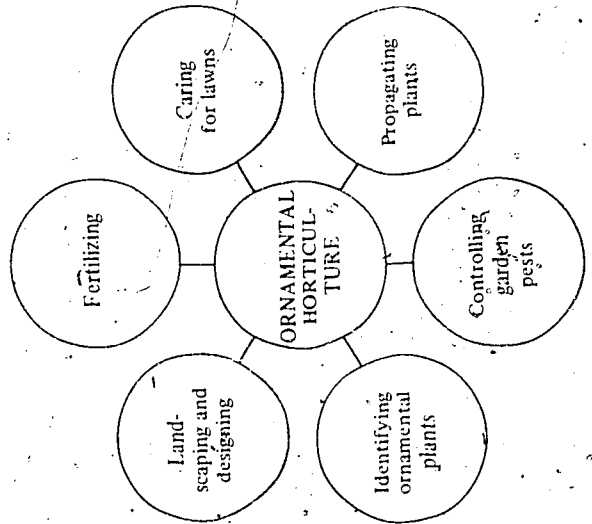

Skill Components for Gardener

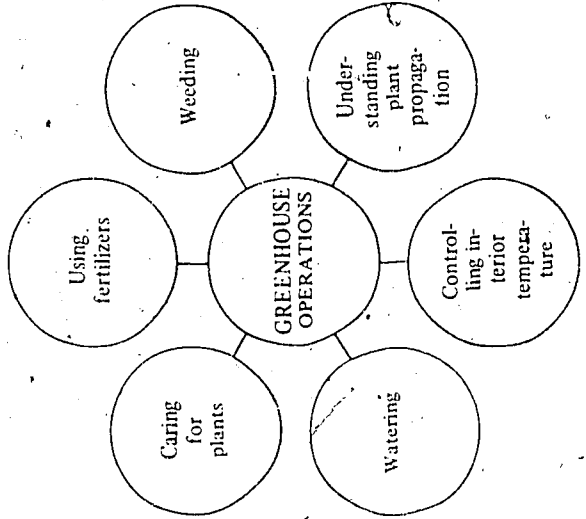

Skill Components for Landscaping

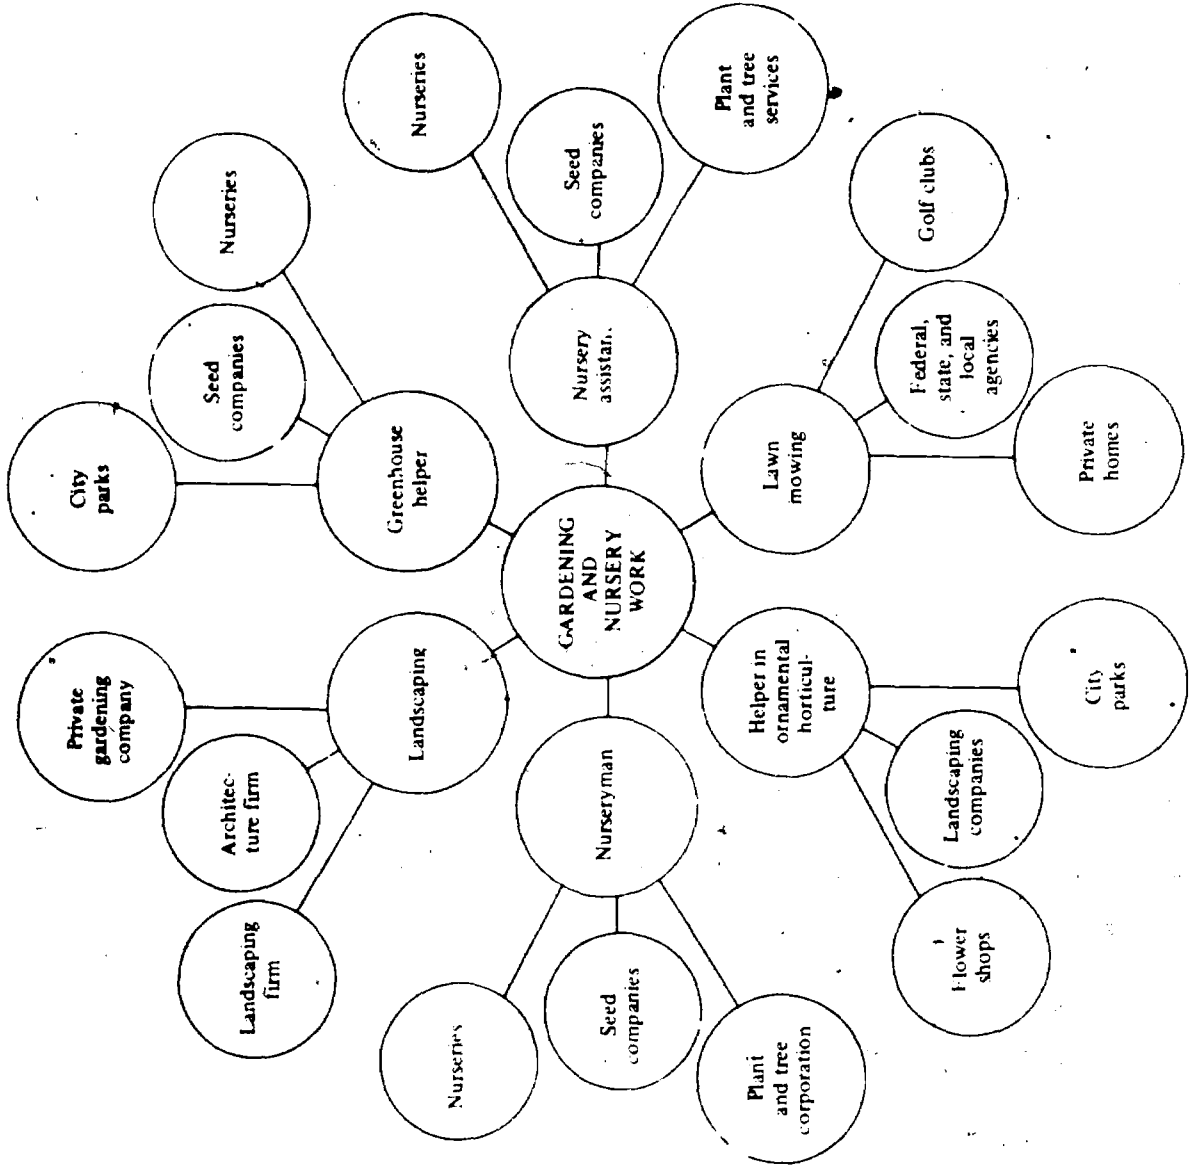

Skill Components for Nurseryman

Skill Components for Ornamental Horticulture

Skill Components for Working in Greenhouse Operations

The End Goal: Community Jobs in Gardening and Nursery Work

## ATTACHMENT I

### CHILD LABOR PROVISIONS

The following paragraphs, considered the most pertinent for the purposes of this manual, have been extracted from The Federal Wage and Hour Law, Child Labor Bulletin No. 101:

#### **AGE STANDARDS**

##### *16 - Basic minimum Age For Employment*

At 16 years of age, young people may be employed in any occupation other than an occupation declared hazardous by the Secretary of Labor. There are no other restrictions. Young people of this age may be employed during school hours, for any number of hours, and during any periods of time.

##### *18 - Minimum Age for Employment in Occupations Declared Hazardous By the Secretary of Labor (See Exemptions below).*

##### *14 - Minimum Age For Specified Occupations Outside School Hours*

Employment of 14- and 15-year-old youths is limited to certain occupations outside school hours only and under specified conditions of work as set forth in Child Labor Regulation No. 3 (cited below).

#### **HAZARDOUS OCCUPATIONS ORDERS**

Those occupations declared to be particularly hazardous for minors between 16 and 18 years of age are included in the seventeen Hazardous Occupations Orders listed below:

1. Occupations in or about plants or establishments manufacturing or storing explosives or articles containing explosive components.
2. Occupations of motor-vehicle driver and helper.
3. Coal-mine occupations.
4. Logging occupations and occupations in the operation of any sawmill, lath mill, slungie mill, or cooperage-stock mill.
5. Occupations involved in the operation of power-driven woodworking machines.
6. Occupations involving exposure to radioactive substances and to ionizing radiations.
7. Occupations involved in the operation of elevators and other power-driven hoisting apparatus.

**CHILD LABOR PROVISIONS (Continued)**

8. Occupations involved in the operation of power-driven metal forming, punching, and shearing machines.
9. Occupation in connection with mining, other than coal.
10. Occupations in or about slaughtering and meat-packing establishments and rendering plants.
11. Occupations involved in the operation of certain power-driven bakery machines.
12. Occupations involved in the operation of certain power-driven paper product machines.
13. Occupations involved in the manufacture of brick, tile, and kindred products.
14. Occupations involved in the operation of circular saws, band saws, and guillotine shears.
15. Occupations involved in wrecking, demolition, and ship-breaking operations.
16. Occupations involved in roofing operations.
17. Occupations in excavation operations.

**EXEMPTIONS**

The above Hazardous Occupations Order, Nos. 5, 8, 10, 12, 14, 16, and 17 contain exemptions for apprentices and student learners provided they are employed under the following conditions:

*Student Learners* (1) The student-learner is enrolled in a course of study and training in a cooperative vocational training program under a recognized State or local educational authority or in a course of study in a substantially similar program conducted by a private school; and such student-learner is employed under a written agreement which provides (a) that the work of the student-learner in the occupations declared particularly hazardous shall be incidental to his training; (b) that such work shall be intermittent and for short periods of time, and under the direct and close supervision of a qualified, and experienced person; (c) that safety instructions shall be given by the school and correlated by the employer with on-the-job training; and (d) that a schedule of organized and progressive work processes to be performed on the job shall have been prepared. Each such written agreement shall contain the name of the student-learner, and shall be signed by the employer and the school coordinator or principal. Copies of each agreement shall be kept on file by both the school and the employer. This exemption for the employment of student-learners may be revoked in any individual situation where it is found that reasonable precautions have not been observed for the safety of minors employed thereunder.

### CHILD LABOR REGULATION NO. 3

Employment of 14- and 15-year-old minors is limited to certain occupations under conditions which do not interfere with their schooling, health, or well-being.

14- and 15-year-old minors may not be employed: \*

1. During school hours.
2. Between 7 p.m. and 7 a.m.
3. More than 3 hours a day -- on school days.
4. More than 18 hours a week -- in school weeks.
5. More than 8 hours a day -- on nonschool days.
6. More than 40 hours a week -- in nonschool weeks.

*Permitted Occupations for 14- and 15-year-old Minors in Retail, Food Service, and Gasoline Service Establishments*

14- and 15-year-old minors may be employed in

1. Office and clerical work (including operation of office machines).
2. Cashiering, selling, modeling, art work, work in advertising departments, window trimming and comparative shopping.
3. Price marking and tagging by hand or by machine, assembling orders, packing and shelving.
4. Bagging and carrying out customers' orders.
5. Errand and delivery work by foot, bicycle, and public transportation.
6. Clean up work, including the use of vacuum cleaners and floor waxers, and maintenance of grounds, but not including the use of power-driven mowers or cutters.
7. Kitchen work and other work involved in preparing and serving food and beverages, including the operation of machines and devices used in the performance of such work, such as but not limited to, dish-washers, toasters, dumbwaiters, popcorn poppers, milk shake blenders, and coffee grinders.

8. Work in connection with cars and trucks if confined to the following:

Dispensing gasoline and oil.

Courtesy service.

Car cleaning, washing, and polishing.

Other occupations permitted by this section.

*But Not Including Work:* Involving the use of pits, racks, or lifting apparatus or involving the inflation of any tire mounted on a rim equipped with a removable retaining ring.

9. Cleaning vegetables and fruits, and wrapping, sealing, labeling, weighing, pricing, and stocking goods when performed in areas physically separate from areas where meat is prepared for sale and outside freezers or meat coolers.

\* Applicable to employment in a specific job; not necessarily in work-experience.

MANUAL OF OPERATING PROCEDURES  
DIVISION OF VOCATIONAL REHABILITATION

1-1 and 1-2

**SECTION I - PHILOSOPHY AND SCOPE OF AGENCY PROGRAM**

**1. PHILOSOPHY**

The basic philosophy of the New Mexico Vocational Rehabilitation Service is to provide services which cannot be secured from some other source, to physically and mentally disabled people of all types, of working age, in order to assist them to prepare for, remain in, or return to gainful employment suited to their individual needs. Such a philosophy recognizes that the Agency has responsibilities to the handicapped person, to society as a whole, and to the taxpayer who furnishes the financial support for the program.

In order to conform to the above philosophy and to discharge its responsibilities, the Agency is dedicated to the task of providing maximum services to the greatest number of eligible handicapped people, with a minimum expenditure of public funds, keeping in mind that all services must be provided within the framework of Federal and State Laws and limited by the amount of funds appropriated by Congress and the State Legislature.

**2. OBJECTIVES**

It is the objective of the State Agency to provide, to each individual, all the vocational rehabilitation services necessary to achieve the individual's rehabilitation.

**3. SERVICES**

"Vocational Rehabilitation Services" means any goods or services necessary to render a handicapped individual fit to engage in a gainful occupation or to evaluate his potentials for such employment, including:

- a. Evaluation, including diagnostic and related services required for and the nature and scope of services to be provided;
- b. Counseling and guidance;
- c. Physical restoration services;
- d. Training, including personal and vocational adjustment;
- e. Training materials (including necessary training tools and fees);
- f. Maintenance;
- g. Placement;
- h. Occupational tools, equipment, and initial stocks and supplies when indicated;
- i. Transportation;
- j. Occupational licenses;
- k. Services to members of the handicapped individual's family when such services will contribute substantially to the rehabilitation of the handicapped individual;
- l. Other goods and services necessary to render an eligible handicapped person able to engage in a gainful occupation and found by the diagnostic study to require such services.

ATTACHMENT III

VOCATIONAL EDUCATION DIVISION WORK STUDY PROGRAM

The purpose of the Vocational Work Study programs funded under the Vocational Education Amendment Act of 1968, Part H, is to provide meaningful work experience for students in need of the earnings from such employment to commence or continue his vocational education program. Work so performed will be adequately supervised and coordinated with selected instruction. Diversified occupational placements are limited to public agencies or non-profit institutions in the community.

Preference will be given to applications submitted by local educational agencies serving communities with high concentration of youth unemployment and school drop-outs. Local matching funds are required on an 80-20 matching basis.

Students participating in the program should be:

1. In need of earnings from such employment to commence or continue his or her vocational education program.
2. Enrolled in an approved vocational education class.
3. A full time student.
4. At least 15 years of age and less than 21 years of age at the age of commencement of employment.

Hours and Compensation -- Limitations

1. Maximum of 15 hours per week while classes in which student is enrolled are in session.
2. Maximum of \$350.00 per academic year.
3. Consider Social Security provision if situation deems necessary.

For further information concerning student stipends, cooperative programs (private enterprises), transportation work skills centers contact:

MINIMUM REQUIREMENTS

VOCATIONAL SPECIAL NEEDS PROGRAM FOR THE HANDICAPPED

10 Month Program

A. Occupational Awareness and Exploration

Industrial Arts Curriculum

Recommended Text: *World of Construction or World of Manufacturing*

B. Vocational Skills Training and Instruction

Classroom instruction concentrating on a minimum of *four* specific job clusters for men and *four* for women. Specific instruction and training offer the student an opportunity to acquire saleable skills in the occupational area of his choice and competency.

Recommended Text: *Vocational Instructional Material for Students with Special Needs*

C. Cooperative Work Experience Program

On the job training experience for preparation to take a job which is consistent with a student's knowledge, skills, and appropriate work attitude. The student should be able to demonstrate his ability on the job.

D. Vocational Related Academics

**MINIMUM REQUIREMENTS**

**VOCATIONAL WORK SKILLS CENTER FOR THE HANDICAPPED**

**12 Month Program**

**Phases**

1. Vocational Evaluation
2. Vocational Training

3. Job Trial - work experience
4. Job Placement

**Min. Hrs.**

1½

**A. Personal Communication and Social Skills**

Group sessions concentrating on interpersonal skills and introduction to the world of work. Acquaint students with what employers expect employees to be and what society expects of individuals.

**Recommended Text:** Vocational Instructional Material for students with Special Needs

**Min. Hrs.**

2½

**B. Pre-Vocational Evaluation**

This program will enable the students to explore the job opportunities in which he may be interested through sub-contract work.

A program of this type involves:

- a. exploration of skills
- b. basic work skills development and training
- c. work attitude development as it pertains to employability
- d. assessment of interest and ability

**Min. Hrs.**

2

**C. Vocational Skills Training**

Specific instruction and training offering the student an opportunity to acquire saleable skills in the occupational area of his choice and competency.

**Recommended Text:** Vocational Instructional Materials for students with Special Needs

**Min. Hrs.**

1

**D. Cooperative Work Experience Program**

On the job training experience for preparation to take a job which is consistent with a student's knowledge, skills, and appropriate work attitude. The student should be able to demonstrate his ability on the job.

# APPENDIX

## BILINGUAL/BICULTURAL PROGRAM MODELS, TESTS AND TECHNIQUES

Prepared by **Viola Sierra,**  
**Bilingual Consultant,**  
**Albuquerque Public Schools**

Since language plays a crucial role in the child's learning, the child's facility in language may affect to a great extent his acquisition of knowledge. The child's mother tongue is not only an essential part of his sense of identity, it is also his best instrument for learning, especially in the early stages. Differences between the first and second languages need to be understood if learning through them is to be sequenced effectively. Lack of understanding of the role that language interference, the use of a non-standard dialect, as well as the way in which the culture is reflected in the native language of the child can reduce the effectiveness of any educational program.

Certain factors must be taken into consideration in determining the type of bilingual program to be implemented. The objectives of the program must be considered as well as the degree of competency in either language the child brings with him and the type of community or geographical area involved.

### 1. Informal model

Informal unplanned usage of the child's native language in the classroom. The use of the child's native language is neither encouraged nor discouraged. Usually used as a means of easing the child's adjustment to the new school environment.

### 2. Supplementary model

Only a small percentage of the total instructional day is allotted for the instruction in the second language. The primary goals are to continue the oral native language development as well as providing the pupil with some reading and writing skills in the native language.

### 3. Transition Model (T) Acculturation

The use of the native language is used mainly as a bridge to the language of instruction. There are many variations of this model, the difference being in the manner and time in which native language instruction is phased out.

4. Two-Way Model

Instruction in content areas is given in two languages.

a. Dual Medium Differential Model (DDM)

The two languages are maintained for different purposes according to the cultures. For example, culture based subjects such as art, music, social studies and literature are taught in the pupils' dominant language, while the more traditional academic subjects are taught in the language of the dominant culture.

b. Dual Medium Equal Maintenance (DEM)

Equal time and treatment are given to the two languages with complete integration of children from both the dominant and minority culture.

II. Language Assessment

Very often intelligence and achievement tests give distorted results when used with a child lacking full command of the English language or familiarity with the dominant culture. At the same time these tests fail to draw out the strengths and abilities which these children may possess from their own range of experiences. In many cases non-native English speakers are placed in EMH classes because of a failure to recognize the reason for their low score on such tests. Therefore, some type of assessment should be made of the child's language abilities.

## III. Methods and Techniques

### A. Language development and reading in English and Spanish

There is a widely held misconception regarding Spanish speaking children in the Southwest. This is the belief that these children lack proficiency in either language, Spanish or English, and are, therefore, nonlingual. This belief is reinforced for many teachers by their observation of pupils who are inarticulate and unresponsive in the classroom and who appear not to understand what appears to be simple, clear language by the teacher. In reality, the child possesses a language that is rich in idiom and effectiveness in communicating but which can be characterized as a divergent form of speech. Children have concepts that they can express in their own dialect but they find that this is not the language of the classroom or of the basal reader.

Therefore, in working with the large numbers of children with divergent language, the approach should be not rejection of this language but expansion outward from their dialect and progressing to the expanded language of the general culture.

Various methods of teaching language have been suggested and tried at all levels of instruction and with varying degrees of success. Basically, these can be described as a structured and a non-structured approach, with a variety of techniques developing from each. It should also be noted that these approaches are equally effective in teaching children a second language, be it English or Spanish, and also to extend the language that the child already possesses.

1. Structured approaches

- a. ESL - The teaching of English as a second language centers around the audio-lingual method. This method utilizes oral drills of basic conversational sentences. The immediate goals of this type of second language instruction are to have the children be able to discriminate and produce the distinctive sounds of the target language in the context of words, to interpret and produce its basic sentence patterns and to use an adequate vocabulary.

Minimal-pair drills - This type of drill can be utilized to help learners discriminate phonemes that are not used in their native language and to help them see that using the wrong phoneme will change the word meaning.

bit	beat	lack	luck
dip	deep	dock	duck
ship	sheep	long	lung
		hot	hut
chair	share	mash	match
choose	shoes	dish	ditch
chip	ship	wash	watch

The teacher models the minimal pairs, illustrated with pictures of actions and has the children repeat them. It is important that the children know the meaning of the words used in the drills. The drills should be based on the features of the language that the teacher has observed as being troublesome for the children.

A variation of the minimal pair drill is to say the pairs of words and ask the child if they are the same or different.

cheap	sheep
chair	share
chip	ship

**Repetition drill** - This is the first and basic step in any oral practice. It is used to present new vocabulary, to establish accurate pronunciation and intonation and to teach the syntactical structure of the language. A typical lesson would be presented in the following way:

Hold up pictures of an airplane, bunny, hat, kitten, etc., and say with each -

This is a \_\_\_\_\_

As each sentence is modeled, the teacher must remember to use a natural tone of voice and to not give an unnatural emphasis to any part of the sentence.

The children repeat in a group, then in smaller groups, and finally, individually to allow teacher to check on each child's performance.

**Substitution drills** - These are exercises in which a word is replaced by another word of the same grammatical class. In the following examples, the teacher models, "John's at home." The class repeats, small groups and then individuals. Then the teacher says only the word "Dick" and the class repeats, "Dick's at home," etc.

<u>Teacher</u>	<u>Student</u>
John's at home	Dick's at home
Dick	He's at home
He	Sue's at home
Sue	She's at home
She	

**Transformation drills** - In this type of drill there is a change from word order, as from statement to question; the verb is changed to a noun, positive to negative statements, active to passive voice, kernel sentences into one sentence, etc.

Examples:

John's at home	Is John at home.
John works	John is a worker
Dick's in school	Dick isn't in school
Mary's home, she's helping my mother	Mary's home and she's helping my mother
The boy was lost, he was wearing a blue shirt	The boy who was wearing a blue shirt was lost

In the primary and intermediate grades oral language drill may be used as preparation for the reading lesson. By basing the drill on sentences to be read later, one may expect more fluent reading, with less tendency toward mere

word calling; and as a result, increased comprehension.

The teacher, in planning the reading lesson, will select sentences for oral drill with the needs of her own particular group in mind.

b. Basal readers

Many times a Spanish speaking child demonstrates enough functional knowledge of English to communicate in the classroom. This leads to the mistaken belief that the child has sufficient mastery of the language to come successfully with the expanded language used in basal readers and other textbooks. As has been noted in several studies, the traditional textbooks used in the classrooms contain a heavy load of figurative language, multiple meaning words and complicated sentence structures. Examples of this type of language are:

Jack was so surprised he stopped dead in his tracks.

She stood at the river bank.

The plane made a slow bank away from the mountains.

I wouldn't bank on it if I were you.

She took all her pennies out of the piggy bank.

Thus, a child with limited mastery of this aspect of language tends to interpret it on a literal word by word basis. He becomes confused and unable to read with comprehension, falling further and further behind as he is forced into textbooks with increasingly more complex language.

Teachers can assist second language learners in overcoming this difficulty by previewing lessons to be presented to the children, being alert to special aspects of the language which might prove troublesome. The teacher can then devise activities which will clarify these items before the reading lesson is presented. Suggested activities include drawing, illustrations depicting both the literal and idiomatic meanings of the phrases using either an opaque or overhead projector for class viewing, use of the language master matching the expression with its figurative interpretation and dramatizations.

## 2. Non-structured approaches

This is a more indirect approach to teaching language and reading in which an environment is created that will encourage children to stretch their language to the limits, to express their reaction to experiences and to interact with each other. In so doing, communicative needs occur that they cannot meet which stimulates them to reach for more language. As a result, they will be self motivated to expand their language.

Experience approach The learning environment is created both by the teacher's interaction with the learner and by the physical arrangement of the classroom. This type of orientation is usually associated with the experience approach to teaching.

In a language experience program, the development of the language arts skills are built around the experience that the child brings with him as well as those provided by the teacher in the classroom. There is confusion in the minds of many who tend to associate the experience approach with field trips. This is but one small aspect of teaching through language experience. The total picture is one in which the teacher capitalizes on activities which motivate and capture the child's interest, using these opportunities to model language and expand and elaborate on the child's language. This is done through allowing the child to share and discuss experiences, to dictate stories which the teacher writes down, to make books and to read or be read to, books developed by other children, plus a variety of other experiences.

Interest centers The use of interest or learning centers is an important, though not an essential, component of the experience approach to teaching. The concept of the interest center is much more than the rock or shell collection which goes under the guise of an interest center. This is largely ignored by the children and serves mainly as a dust collector as it remains undisturbed throughout the school-year. The interest centers should take advantage of the varied interests of the children, stimulate further exploration and provide for introduction of new concepts as well as extending learning in the subject areas. It also serves as a means of generating language in the children and motivating them to communicate orally as well as in a written form. For example, at any given time, a math center might include: many types of measuring devices—cups, spoons, rulers, tapes, scales, empty pint and quart bottles, stop watch, number games (both commercial and class-made), dominos.

Manipulative devices blocks, sticks, counters, geometric blocks, abacus, beads, magnetic board. Other types of centers are a writing center, the play house center, listening center, arts and crafts center.

Both the structured and non-structured approaches have their advocates as well as their detractors. A teacher should use an eclectic approach, selecting from each and combining these in a form that will meet the needs of the children with whom she is working.

IV. Materials (English and Spanish)

A. Existing materials for bilingual children

There is an abundance of Spanish language materials being produced in Mexico, Spain and the Latin American countries; however, these are generally not suitable for use in bilingual education programs. Because the culture, language and total environment of these countries are reflected in these textbooks, they are just as irrelevant to bilingual children from this country, particularly the Southwest, as are the traditional middle-class oriented English books produced here.

The most widely used textbooks in Spanish in bilingual programs are those which have been developed in this country.

Laidlaw Brothers — These books are available in the subject areas of math, social studies, health and music and games.

D. C. Heath — Parallel Science Series — These are published in both English and Spanish. These texts are available for the first four grade levels.

The Miami Linguistic Readers — One of the most widely used series for instructing Spanish speaking children in English as a second language. It is a comprehensive program which includes all the language arts: speaking, reading and spelling.

B. Adapting and relating existing materials for bilingual children

Although, as was noted above, some materials have been developed in this country for use in bilingual programs, the same

problems are posed as in the foreign-produced materials. These texts are written in a standard dialect which may be just as foreign to the child who speaks in a divergent dialect as any other textbook using another language. For this reason, it is necessary to adapt currently existing materials to fit the language environment and special needs of the program.

Such English language materials as the Roach Van Allen Language Experiences series lend themselves easily to adaptation and can be presented in the dialect of the child.

The Distar series in reading can be used in combination with the Language Experience approach with very effective results. Distar uses the method of direct instruction in teaching the basic decoding skills. The same techniques used in teaching reading in the Distar series can be used for instructing in reading in Spanish.

Other materials which can be used very effectively in working with bilingual children are the Goldstein Life Experience materials. Since these materials are based on those situations which children are expected to meet in their everyday experiences, they are even more meaningful to the children when presented in the dialect of their own language.

### C. Developing new materials

#### 1. Language Experience Readers

Many teachers are developing their own materials both in the English and Spanish dialects of the children. In addition to the benefits of instructing the child in books written in his dialect, these books have the added advantage of providing the child with his own book which he can take home. These serve to highly motivate the child to read as well as to enhance his self-concept.

Books can be developed in any subject which interests the child. Some examples are shape books, color books, books developed on walks, trips, activities in the classroom, classbooks, directories, etc.

#### 2. Films, slides, flannel board, games

Films can be used to develop a child's oral language. These can be used in a variety of ways. For example, a film can be shown first in its original form, then with the volume set low, and have the children supply the narration in either language, or a film can be shown and stopped at its most climactic moment. The children can then write a story or illustrate how they think the story ended. When the completed version is shown, children can then compare their version and discuss which ending is most satisfying to them. This is only one means of generating and motivating written and oral language.

Slides can also be used in the same manner with children providing captions for each frame.

Teacher developed games can be used to teach both English and Spanish language skills. Many inexpensive commercial games can be easily changed to teach Spanish vocabulary or reading. Card games can also be used in this manner.

The language master is a very useful device for teaching vocabulary, the phonemic elements of a language, for modeling sentences and at the same time allowing the child to see the written symbol, for self-correcting lessons, and a variety of other activities.

**PLANNING THE CURRICULUM FOR THE EMH IN TERMS OF THE LIFE EXPERIENCE APPROACH**  
(Unit Planning and/or Long Range Planning)

- I. Evaluation in terms of selection of Major Content
  - A. Are there prescribed units, a unit in progress, or other administratively determined units? (Is there a curriculum guide which suggests unit topics to be covered on a particular level in a set sequence? How much flexibility is permitted?)
  - B. What units have been undertaken with this particular group of children?
  - C. *What do these children know in terms of past experiences, units and general academics?* (This implies examination of cumulative records regarding academic progress and diagnostic testing and careful observation of children's behavior in different learning situations.)
  - D. *What do these children need to know?* What content material will build upon what they already know, at the same time providing maximum utility for present and future everyday life? (In terms of knowledge and academic skills)
  - E. What are these children interested in? What do they talk about in informal situations? What questions do they ask? (See Life Experience Interview)
- II. Social and Physical Considerations
  - A. What can a unit or a particular individual do to develop behavioral, attitudinal and social skills with these particular children?  
*What skills do they have?* (Largely evaluated through observation and plotted for individuals and the group)
  - B. What physical characteristics do these children exhibit which might have bearing on unit selection? *What sensory deficits are apparent from cumulative and observational data?*
  - C. *What is the expressive language level of these children?* What words do they appear to understand? What words do they recognize in print? (This forms the basis for "known words" when writing daily plans.) What words can they write? (Examination of written "story" of etc.)

- III. Feasibility — When a Tentative Unit Topic is selected, the following criteria are applied:
- A. How much time do I have? Can this study be undertaken in this amount of time? — Is it too broad? — not broad enough? Flexible enough to accommodate unanticipated preliminary skill building or lack of experiential background?
  - B. What resources are available? (Or unavailable) Can pertinent reading materials on the children's reading levels be obtained? What multi-media is available? (*Again on their levels*) Resource, persons, films, filmstrips, models, field trips? Pictures? etc. . . .
  - C. Is this unit economical in terms of the time it will require? Does it lend itself to integrating other core areas? Will these integrated areas really enhance one another, or is the integration likely to be too contrived? How many of the major deficits of the class (as determined through previously mentioned unit selection criteria) may be treated through this unit? — language deficits, sensory deficits, skill deficits, social and motor deficits, and experiential deficits.

READING AND THE LIFE EXPERIENCE APPROACH

- I. Whole Group Activities:
  - A. Planning the unit
  - B. Summarizing Unit Concepts
  - C. Class stories
  - D. Invitations and Thank You notes
  - E. Duties and Rules charts
- II. Small Group Activities:
  - A. Homogeneous Groups (formed for the express purpose of teaching reading skills):
    - 1. Construction of Chart (based on unit experience, an object or experience shared by a group member; a seasonal topic, and/or the like — procedure follows that of developing class charts.
    - 2. Reading of Chart:
      - a. reading individual contributions
      - b. reading entire chart
      - c. specific language skills in relation to linguistic elements present in completed chart, phonemes of greatest use, vocabulary enrichment (including synonyms), speech development, phonetic and structural analysis skills. This is largely evaluative in nature. The teacher plans the following day's developmental lesson from this. This preparation includes duplicating the story for the cumulative readers and in larger print, for the word banks.

3. Rereading of cumulative readers — with emphasis on language skills treated above.

- a. addition to word banks
- b. explanation of seatwork involving:

1. reconstruction of story from word banks
2. creative writing using word banks
3. illustration for stories

B. Heterogeneous Groups (formed for the purpose of locating information for the life experience unit and developing related study skills):

1. The group is given direction in the form of leading questions which are formulated:
  - a. by the class
  - b. by the teacher
2. The group is presented with a quantity of materials for reference.
  - a. trade books on the various reading levels of the group
  - b. magazines, pictures and other non-verbal resources
3. Direction for finding information, notations, drafting reports, oral and written presentations and visual aids is constantly provided.
4. Presentation of group reports to the class
5. Evaluation

### III. Individual Activities

Following the format for either A or B above, the pupils may engage in individualized reading instruction, and/or individual report presentation.

### NONCONSUMABLE SEATWORK

One way to reduce the after hours load of the teacher, provide variety, and allow for the special problems of certain children is to use non-consumable seatwork part of the time, rather than use an inevitable daily food of pencil and paper work. Following are some suggestions:

1. **Puzzles and Formboards:** May be used to develop a sense of spatial relationships or an awareness of color or form, or for other purposes according to the type of puzzle.
2. **Groups of pictures to categorize:** These tasks can be any level of complexity. Easiest: Into which of two predetermined categories does each picture go? Harder: What categories can you think of that will fit all pictures? Hardest: How many different ways can you group these pictures? (In the last, have child write the name of each category and list what goes into it, to allow checking, since he can't lay the pictures out in a number of ways simultaneously.)
3. **Picture matching:** Have two sets of identical pictures, e.g., all birds but only two of each variety, to match.

4. **Concept cards:** Nonidentical pictures to match, as a loaf of bread and a slice of bread, a cut apple and apples on a tree. More difficult are a pocket watch and a wheel which match because both fit the concept of *SOMETHING ROUND*.
5. **Pictures matched with word cards:** Match pictures with sentences describing them, or assemble sentences about the picture from separate word cards.
6. **Plastic placed over worksheet:** Place a large piece of heavy plastic over a worksheet and have the child mark answers on the plastic with a grease pencil. Connecting dots, solving mazes and choosing the right word to fit the sentence are exercises which are easy to handle this way.
7. **Stencils:** Tracing stencils or templates requires coordination between the two hands and a certain amount of planning to keep those two hands out of each other's way.
8. **Alphabet cards:** These may be placed in order, or used to spell words such as names of pictured objects or words from the reader.
9. **Number cards:** Place in order by 1's, 2's, 5's, etc. Use number cards for answers to number fact cards. This is especially good when poor coordination may make a child commit errors just because handling a pencil is too difficult.
10. **Counting cards:** Have the number symbol on one side and a picture with that many objects to count on the other side. Children may start on either side and check it against the reverse.
11. **Configuration card puzzles:** These may be made up for beginners with poor visual discrimination or those unaware of configuration cues as relevant.
12. **Stamp sets:** The child can use these for variety in matching pictures and words.
13. **Peg boards and tinker toys:** Assign peg boards (easy) or tinker toys (difficult) to reproduce a pattern or construction made by the teacher. Success requires counting, planning and awareness of spatial relationships.
14. **Word cards:** Sort word cards, putting together all those alike. The teacher could provide six to eight copies each of very similar words, such as *over, oven, omen, onto, unto; of, come, came, comb, cord, card*.
15. **Grouping pictures:** Pictures may be grouped, putting together all those whose names start with a given sound, those which end with a given sound, or those which simply contain it.

## SOCIAL LEARNING CURRICULUM

The Social Learnings Curriculum as developed by Dr. Herbert Goldstein at the Curriculum, Research and Development Center, Yeshiva University, as an important component to a total EMH Curriculum. The Social Learnings Curriculum encompasses all academic and non-academic areas except basal reading and math. The curriculum stresses problem solving or the life experience approach to teaching.

1. Essentially, the two pervasive characteristics necessary for social competence in a society such as ours are the abilities to think critically and to act independently. We present to the maturing individual no clear-cut criteria or lower limits for these characteristics. Irrespective of his physical or mental status, it is expected that the individual "read" his environment, recognize the criteria for social adjustment and then perform in such a way that he does not attract the disapproval awaiting those who in some way threaten the equilibrium. To put it another way, we leave it to him to weigh the facts and their implications for conclusions (think critically) and then to invoke a strategy for acting on these facts (act independently). If the individual perceptions of the facts are consistently accurate, and if his actions and strategies are in harmony with the world around him, he is, more likely than not, well assimilated in society.
2. By placing an educable mentally retarded child in a special class, we are virtually predicting that the probability of his becoming assimilated socially when he reaches maturity is small *unless* some kind of early intervention is applied. In the case of educational intervention, the assumption is made that the child's experiences in the classroom will lead to a level of critical thinking and independent action that will be consonant with the demand of his environment at maturity. By any means of evaluation, we are still far from perfect in our intervention. Some educable mentally retarded youngsters with long careers in special classes have disappeared into society, while others became *notorious failures* in one or more aspects of adjustment. At the other extreme, there are youngsters who have never been in a special class who leave school—some to disappear into society, others to become *notorious failures*.
3. In the final analysis, it seems that it really doesn't matter whether the mature retardate manifests one area of inadequacy or five. Studies show that if he becomes occupationally immobilized, there is a good chance that his entire adjustment pattern will crumble.
4. Taking into account the essentials for socio-occupational competence, the histories of mature retardates and the implications of these on educational programs for the retarded, one could say that the goal of educational programs for children is to evolve mature individuals who can think critically and act independently to such an extent that they are socially and occupationally competent.
5. The major focus for this goal is a curriculum that encompasses those social-occupational concepts, facts, and behaviors that are consonant with social adaptation during maturation and at maturity. This is not to say that existing curriculums disregard factors in social-occupational growth. On the contrary, many do incorporate these concepts someplace in the curriculum. To achieve the goals of education for the educable *mentally* retarded, however, factors in socio-occupational competence need to

constitute the central thrust learnings. We call this style of organization the Social Learning Curriculum.

In goals so broadly stated, the end necessarily invokes many related means. Some of these have been looked upon traditionally as ends in themselves.

The Social Learnings Curriculum is categorized into teaching-learning blocks that comprise the following need areas:

Social (adequacy, interaction, dependence, possessions)

Psychological (variation, self-respect, emotional stability, mastery, self-expression)

Physical (sensory stimulation, identification, physical maintenance)

If a teacher participates in the use of the Social Learnings Curriculum the following procedures are used:

1. Students' knowledge of each phase and/or function are pre- and post- tested. This enables each teacher to make specific additions and modifications.
2. Each phase or function contains overall objectives, materials, preparation, teacher information and teacher actions.
3. The Social Learning Curriculum allows for effective, easy tie-in of correlated subject areas.
4. The Curriculum, Research and Development Center asks that teachers evaluate experiences or activities as to their appropriateness for a specific class. The evaluations are computerized at the Curriculum, Research and Development to allow modifications of the Curriculum before the final published form.
5. Student data forms are used to establish class and geographical profiles throughout the country.

The Albuquerque Public Schools have participated for three years in the use of the Primary Level Social Learnings Curriculum field testing the Intermediate Level of the Social Learnings Curriculum.

The Social Learnings Curriculum appears to provide a comprehensive approach to teaching EMH students to "think critically and act independently." Problem solving of daily experiences is keynoted.

## FAIL-SAVE CONTINUUM

### A Child Service Demonstration Program

P.L. 94-230 - Title VI, Part C

Dr. Gary Adamson, Ph. D. - University of New Mexico

### PHILOSOPHY

To state that one type of educational program is appropriate for children with learning disabilities - or any exceptional child - is a falsehood.

In order to provide an effective and efficient program for children, regardless of the type of educational handicap, a continuum of services is necessary. The type of services most relevant to the individual must take into consideration the degree of severity of the handicap, the child's emotional and physical ability to adjust in the educational setting, and the parents' perception and ability to adjust to the problem - to name a few.

The following represents an ideal continuum of services that should be available to all children. It should be noted that each therapeutic

process of each must complement and support each other. There must also be a built in design to move a child along the continuum, dependent upon his progress.

### PROJECT DESIGN

The project is designed to provide a model educational program for children with learning disabilities in rural and urban school districts in New Mexico. In accordance with the Fail-Save operational model, future services are planned for children in any category of exceptionality. The "Fail" represents the system's failure to meet all children's needs. The "Save" represents the adaptation of the system to the child's individual needs.

There are several phases in the Fail-Save Continuum which involve predetermined instructional time limits. The main objective in each phase is to emphasize educational strategies, remediation and adjustment that will allow the child to function adequately in or near as possible to the regular classroom situation.

Continual evaluation takes place throughout every phase of the model. At any time, in any phase, a decision can be made to move the child along the continuum to accommodate the progress which he has demonstrated. However, before a child can be moved to a more intensive program, or recycled in the same phase, he must remain in that phase for the predetermined period of time.

#### PHASES I-V

**PHASE I** This phase utilizes a methods and materials consultant/teacher. During this time, the methods and materials consultant observes the child in the regular classroom, does an evaluation to identify the child's skills and deficits, and provides an educational plan with the proper methods and materials to be implemented in the regular classroom.

**PHASE II** This phase utilizes the Resource Room concept in which the child spends part of the day in the Resource Room where more intensive intervention by a specially trained teacher is available. The child is still in the regular class part of the day where contact is continued by the methods and materials consultant.

**PHASE III** This phase utilizes the special class/resource room where more intensive service is provided. There is also continued involvement with a methods and materials consultant, regular classroom teacher and the parents.

**PHASE IV** This phase involves special class placement. If the other phases have not been successful in providing remediation to the point that the child can be "saved" or returned to a higher phase, then special class placement is provided.

**PHASE V** This is an alternate phase or programming outside of the regular school system. This recommendation can be made at any time and includes such settings as homebound, day care, hospital or residential treatment.

#### DECISION MAKING ALTERNATIVES

##### ONE

The system has adapted an appropriate learning situation where it appears the child has been "saved." Therefore, he is moved to the regular classroom or one or more phases closer to that eventual goal.

##### TWO

The system has not provided an adequate situation for the child and it has "failed." However, the child has been making some gains and the decision is to recycle in the same phase another time.

### THREE

The system is not adequate to meet the needs of that individual child. Consequently, the decision is that the child should be moved downward one phase and provided a more intense program.

Any decision, either during a phase or at the end of a phase, must involve the regular classroom teacher, methods and materials consultant, Resource Room teacher or any person involved with the particular phase that the child is in, plus the administrator/coordinator and the parents.

### PARENT PROGRAM

This program is initiated during the first phase of the Project to help parents better understand and work with their children at home. Behavior modification is the theme of several workshops that are scheduled at times convenient for the parents and jointly implemented by members of the University of New Mexico staff, the methods and materials consultant and/or the Resource Room teacher, the Regular Class teacher and the administrators directly involved with the Project.

## BEHAVIOR MODIFICATION

Behavior modification, as a clinical concept or theoretical philosophy, has been around in its modern version for about twelve years; it is based on the laws of learning. Any learning situation has at least three basic components. They are: the stimuli, the response, and the consequence of that response—be it positive or negative reinforcement. In considering a behavior for modification, one should ask: (A) What are the significant stimuli? (B) What are the responses to these stimuli? (C) What are consequences of those responses? This must be asked of the behavior to be replaced and also the replacement behavior. If information can be gained on those three aspects of both behaviors, then it is possible to set up a program whereby the teacher can, in a pre-determined manner, modify the behavior in question.

The child is seen as an emitter of behavior. The child is continuously emitting behaviors in response to his environment. In the final analysis, there are no innately wrong behaviors. A person may make responses which society arbitrarily defines as wrong or inappropriate. However, these so-called inappropriate behaviors are the result of learning and are subservient to the laws of learning, just as are so-called "correct" behaviors. No behavior will persist in the fact of a consequence that is totally punishing. Although, on the face of it, the consequences may appear punishing to us, in terms of the emitter of the behavior the consequences may be rewarding.

A familiar example is the classroom situation where one child is a behavior problem. The teacher scolds repeatedly and disciplines the child, but the behavior persists. Now consider that if the child craves attention and when he misbehaves he gets attention (although maybe not the most desirable kind), then the misbehavior which resulted in the attention will persist. It is even strengthened by the fact that when he is not misbehaving, the special attention he seeks is withdrawn—and the teacher goes about her normal routine: If the teacher wishes to change the attention getting misbehavior, she can eradicate it by reinforcing the behaviors she wishes to strengthen, giving the child the attention for these behaviors and ignoring the misbehavior. The important question is what are the behaviors in the repertoire, what are the stimuli cueing them off and what are the rewarding factors that sustain the responses. Phrased another way, what are the dynamic contingencies of this situation and how can the teacher manipulate the stimuli and the reinforcements in order to modify the response in the desired manner.

The critical diagnostic issue is one of correctly defining the existing situation in terms of stimuli, response, reinforcement. Training them becomes a matter of manipulating the necessary stimulus reinforcement contingencies to effect the desired change in the behavior.

This principle applies throughout. It is of little consequence to the logic of the system whether the behavior in question is a faulty sound, a language problem, a reading problem or a discipline problem. Also, the specific techniques are not as important as the over-all philosophy and logic of behavior modification. It is the philosophy and logic that will determine the questions that will be asked and the variables to be controlled. Teachers should familiarize themselves with the work of Lloyd Homme, Ogden Linsley, Elizabeth Gullison, Norris Haring, William Gray and others who have developed specific behavior modification models to be used in the classroom. This type of intervention has been used effectively to motivate EMH students. It should not be used indiscriminately, however.

The following schedule indicates the manner in which a teacher can build behavior modification in her daily program. Low Probability Behaviors (lpbs) such as arithmetic drills and reading activities can be enhanced by offering perceptual motor activities, recess, lunch, free-time, and other high probability behaviors (hpbs) immediately after the lpbs. These hpbs, considered highly desirable by the student, reinforce completion of the lpbs which immediately precede them.

### INDIVIDUALIZED CONTRACTING IN THE CLASSROOM

The exceptional child's maladaptive behavior as it is manifested in the classroom has been a source of bewilderment and headache for special educators. It hinders and in some cases all but stops the teacher and student from initiating or recharging the vitally necessary learning processes and procedures which will enable the child to become a self-dependent individual.

Contingency management and its use in the classroom setting is an approach suggested by Dr. Lloyd Homme to reduce and, if possible, extinguish maladaptive behaviors. It is essentially the simple method of creating a contract with the student: If you do X, I will give you Y, or if you write ten sentences, I will give you ten minutes free time. It is relatively clear that this method is an effective technique for reinforcing a low probability behavior with a high probability behavior and, therefore, increasing the frequency of the low probability behavior.

Because contingency management is founded upon the concept of contracting, there are ten basic rules which apply to its use in the classroom:

1. The contract payoff (reward) should be immediate.
2. Initial contracts should call for and reward in small approximation.
3. Reward frequently with small amounts.
4. The contract should call for and reward accomplishment rather than obedience.
5. Reward performance after it occurs.

6. The contract must be fair.
7. The terms of the contract must be clear.
8. The contract must be honest.
9. The contract must be positive.
10. Contracting as a method must be used systematically.

These rules and their application provide both teacher and student with a clearly defined procedure. Adherence to them will prevent the pitfalls which often accompany contracting methods. Not only is the contracting technique organized and systematic but the physical environment of the classroom is organized as well.

The classroom is divided or organized into two distinct and separate areas: The task area and the reinforcing events areas. The names of these areas alone supply their definitions. The student performs his contracted task in the task area and pursues his earned reward for task completion in the reinforcing events area. The student should be provided with a "reinforcing events menu" which is simply a large poster or bulletin board that lists the available rewards. From this menu, he may choose the reward which he most desires and, thus, creates his own contract or contingency for task completion. The rewards should be changed occasionally so that saturation does not occur and, consequently, lower student motivation.

This approach serves a dual purpose in that it services academic behavior as well as non-academic behavior. And perhaps its most advantageous principle is that it stresses positive reinforcement rather than negative reinforcement. That is to say, it reinforces the child for what he has accomplished rather than for what he has not.

Contingency management as it is described in Dr. Homme's book **How to Use Contingency Contracting in the Classroom** and Mearchan and Wiessen's **Changing Classroom Behavior** may be utilized in any number of different learning situations. Because of its versatility, it may be practiced simply or elaborately, depending upon the teacher and the nature of the classroom.

## THE LISTENING CENTER

The listening-center approach is a major supplement to any system of instruction. The goal for its use is effective instruction; *need* is the key for its use. A Listening Center is not a substitute for good instruction but is a *part* of it.

### **Location**

The area for the Listening Center must be easily accessible and located in the classroom where its activities will not distract the rest of the class. To further eliminate distractions the area should be clearly defined, perhaps by placing a bookcase or movable blackboards at right angles to the wall. Connecting wires should be carefully placed where pupils will not fall over them or damage equipment.

### **Scheduling**

Use the Listening Center for both scheduled and unscheduled listening periods.

Individual children may use the Listening Center, or the teacher may prefer to use teams. The reason for the use of the Center will dictate the number of children participating.

Divide the pupils into teams of eight children each. A list of the teams with the names of the children should be posted in the center. The teacher also should post a schedule listing the teams which will use the center at stated intervals. A Chairman should be responsible for operation of the tape recorder, film projector, or record player.

A group should be chosen on the basis of the interests of the children. In a reading group both the able reader and the less able reader can benefit from listening-reading activities. By pairing the children, the more able reader can help the less able child keep pace with the reading aspect of the activity.

### **Selecting Materials**

Material used at a Center must be carefully selected and prepared to teach effectively. For example, is the teaching purpose to stimulate broader interest in a particular topic, enrich the reading program, strengthen skills in a subject area, or perhaps provide a specific pleasurable experience in art or music?

The teacher who tapes her own material may find that she will need to redo a tape several times before her tape is a good teaching aid. No materials should be offered at a Listening Center unless they can meet high standards as teaching aids.

Materials selected should be appropriate in interest and vocabulary. Do the tapes capture flavor and action? Does the tape stimulate and arouse children's interest? Can the children follow the story or instructions easily? Is the narration distinct, slow enough, and interesting enough to follow? Before being listened to by pupils, all materials should be presented by the teacher to arouse the pupils' interest. Any instructions for activity participation should be carefully explained.

Post-listening follow-ups are an important part of the listening program and provide excellent learning opportunities. Follow-up activities may be creative art projects, oral discussions, independent reading, or check-up activities prepared by the teacher, as following an arithmetic lesson, for example.

### SETTING UP A LISTENING CENTER

#### **Headset Unit**

Most headset units now contain eight earphones. Not all headset units have an individual, adjustable volume control so that the child can adjust the volume of the tape to the level most comfortable to him. When there are no individual volume controls, set volume on tape recorder or record player at a medium output. The teacher should be aware that there are individual aural differences.

The unit can be plugged into any commercial tape recorder or record player that has an "external speaker" outlet. The mixer box cord is plugged into the "output" or "external speaker" on the tape recorder or record player. Each headset is then plugged into the mixer box. When this is done, no sound will come from the speakers of the tape recorder or record player—only the earphones will transmit the sound. In this way, pupils not participating can continue working without distraction.

#### **Tape Recorder**

Determine at what speed the tape is to be played and set the correct speed on the tape recorder, either  $3\frac{3}{4}$  or  $7\frac{1}{2}$  inches per second. Always rewind a tape before putting it back into the box.

If a tape breaks, add to the take-up reel and continue the recording without repairing. Before reusing the broken tape, use mending tape, tape splicer or scissors for making repairs. Do not use scotch tape to repair a break. Teach your students how to operate the tape recorder.

#### **Record Player**

When the record player is used at the Listening Center, select one pupil to operate the machine. Teach all pupils how to operate the equipment and assign different individuals each time to be responsible for turning on the machine, changing the record, turning off the machine.

### Filmstrip Projector

Teach all pupils how to operate the film projector. Select one pupil for each showing, letting him be responsible for operating the machine. Check that the frame on the filmstrip is coordinated with the tape.

### Screen

Very often it is awkward to use a large screen at the Listening Center "Screens" may be improvised by taping poster board or white paper to a wall. Or, it is relatively easy to make an "L.C. Screen" - a small screen (15" x 15") that can be set on the table at the Listening Center.

The placement of a screen depends on the lens of the filmstrip or movie projector being used. In using a standard filmstrip projector place the screen six feet from the projector.

Directions for making an "L.C. Screen":

1. Secure screen fabric or use fabric from old screen.
2. Use a 15" x 15" square of heavy cardboard.
3. Use dry mount tissue or rubber cement for mounting screen fabric to cardboard. For dry mounting tack the dry mount tissue to the center of the fabric with the tacking iron.

For the rubber cement mount remember to put the rubber cement on both the cardboard and the screen fabric. Allow to dry until barely sticky to the touch. When using rubber cement, use two sheets of wax paper, meeting the two sheets in the middle of the cardboard. Take fabric and lay on top of the wax paper. Straighten. Slowly remove one side of the wax paper as you smooth from center to outer edge of fabric. Repeat for the other side. This procedure helps to eliminate wrinkles when applying fabric to cardboard.

4. Apply mystic tape around the edge of the mounted screen fabric. (Black mystic tape works well.) Lay tape on front edge of screen using a border of tape  $\frac{3}{4}$ " to 1" on all sides of screen. Fold remaining edge of tape under smoothing to back of cardboard. (Preferably, overlap edges at the corners rather than mitering corners.)
5. Groove a piece of wood (sixteen inches of 2x4) about one-half inch for holding the screen. Paint the wood to match the tape if desired.
6. Make the screen more rigid by mask taping, or gluing, two strips of wood vertically to the back of the cardboard. Use strips about an inch in width, about 14" long. Place the two strips two to three inches in from each outer edge.

### OBTAINING COPIES OF TAPES FOR LISTENING CENTERS

Tapes may be borrowed from KANW for a period of two weeks. If tapes are damaged, please enclose a note stating the type of damage. Do not repair tapes.

A supplementary sheet will be sent to schools for the A-V Catalog supplement recommending tapes for the Listening Center, as soon as some tapes being made by APS personnel are finished.

### LIBRARY SERVICES AND THE LISTENING CENTER

Selecting appropriate library books for use at the Listening Center is important. Certain criteria need to be considered: kinds of illustrations and print, is the story a good read-aloud story, etc.

### ART AT THE LISTENING CENTER

Many learning opportunities through art may be suggested by taped materials at the Listening Center. Art Activities could be: painting, drawing, working with clay, collages, paper sculpture, puppets, tissue paper, wax resist, weaving and other crafts. Do not limit art activities to drawing and painting.

The Listening Center provides an excellent opportunity to teach Art Appreciation and enrich the art program through instructional tapes for varied, more advanced art activities.

There are unlimited opportunities for creativity in art through the use of the Listening Center.

### MUSIC AT THE LISTENING CENTER

The Listening Center can present music in many ways, particularly in enriching the regular music program in the classroom and in developing appreciation of music. The Center can be used to supplement the basic music series but is not a teacher replacement for teaching the basic program. The Silver Burdett Program has recorded material about composers which could be effectively used at the Center.

There are available filmstrips and accompanying tapes, story and song records, taped operettas from a music book series to be used with the books, etc.

## SPECIAL EDUCATION REGIONAL CENTERS

The Special Education Unit has established strategically located Special Education Regional Centers. The major goal for the regional service is to provide a network to improve the education of all exceptional children in New Mexico. Regional boundaries were determined by the needs of each area by pupil population, and by the clustering of resources.

### PURPOSE:

The network is designed to provide services to all professional personnel and parents who are concerned and involved with the education of exceptional children. The following are specific objectives for New Mexico Special Education Regional Centers:

1. To develop and implement methods and media in inservice and preservice education in school districts and universities so that if achieved, the special educators in the region will demonstrate
  - a. increased knowledge of the various instructional materials available on the market.
  - b. increased skill in the use of instructional materials and equipment in the classroom.
  - c. increased skill in selecting appropriate and effective instructional materials according to individual student needs.
  - d. increased skill in bringing about desirable behavioral changes among handicapped children.
  - e. increased skill in the use of instructional materials in a prescriptive teaching approach. i.e. Prescriptive Modulation Retrieval System.
2. To develop and implement methods and media for obtaining and disseminating information regarding instructional materials so that if achieved, special educators will demonstrate
  - a. increased knowledge and teaching techniques to effectively achieve specific instructional objectives.
  - b. increased skill in evaluating the effectiveness of instructional materials.

### PROCEDURES:

Each center is presently staffed with a coordinator, secretary and/or graduate assistants. Individuals wishing service register in the Center in their region. Your local administration office can give you your district's regional center address or contact the Special Education Unit, Santa Fe, New Mexico.

Materials in each center are organized and cataloged on the Prescriptive Modulation Retrieval System. If a request cannot be honored in one center, another center may honor your request.

**PROGRAM:**

Inservice and preservice education to improve instruction is a primary program component of each center. Examples include workshops, group and individual conferences, materials exhibits, etc. The acquisition, distribution and evaluation of instructional materials, while vehicular in nature, are, at the present stage of development, also primary components.

Several centers are involved in the supervision of "mini" studies conducted in the Special Education classroom of a district. Such studies deal with the use of instructional materials and techniques in achieving specific instructional objectives. They are designed to demonstrate a direct impact on the learning behavior of handicapped children.

Materials are evaluated with regard to their effectiveness in the learning situation. This information is gathered through formal field testing procedures. For example, evaluation instruments have been developed to be completed by teachers each time materials are used. Information is compiled and disseminated throughout the state.

**SPECIAL EDUCATION REGIONAL ADVISORY COMMITTEES:**

Program needs are identified and strategies are accordingly developed and implemented through state and regional staff with the direct consultation of four advisory committees representative of the school districts receiving service.

**STATE TEXTBOOK ADOPTION:**

Special Education became an official part of the State Textbook Adoption cycle for the first time in 1971. Regional Center Coordinators serve on the adoption committee and will assist your school in previewing these materials prior to purchase. Materials listed for use in this guide may be borrowed from your Special Education Regional Center and many are on the current textbook adoption.

**THE PRESCRIPTIVE MATERIALS RETRIEVAL SYSTEM**

The Prescriptive Materials Retrieval System is an integral part of each of the SEIM's in the State of New Mexico. It is also the organizational system for the acquisition and cataloging of instructional materials appropriate for children with special learning problems.

**STEP I** Open the Thesaurus (dictionary of educational terms) and look through Section I. These are specific content descriptors.

For Example: 27. **Consonant Digraphs**  
When material is drilling on this type of phonetic element.  
Example: sh, th, wh, ch, ck, kn, wr.

These descriptors match precise educational requirements and are alphabetically arranged.

**STEP II** Select Descriptor Card Number 27 from the file box (417 cards total) and place it on the viewing apparatus (light box). Each material in the PMRS dealing with Consonant Digraphs will be represented by a pin-hole of light on the punched Descriptor Card.

**STEP III** Using the Thesaurus turn to page 33. Section Two contains Format and Special Characteristics coded cards.

Examples: 326. Tape  
314. Games and Aids (Models)  
331. Workbook - Worktext

Select the Descriptor Card for the desired format and place it on top of the first card on the light box. Some of the pin-holes of light will be eliminated, making more specific the selection of materials for this learning problem.

**STEP IV**

Turn to Section Three in the Thesaurus, Page 37. This section lists Grade Level and Chronological Age Descriptors.

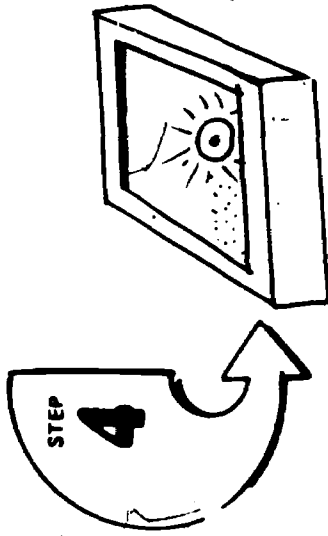

Example: 395. Grade Two CA-7

These Descriptor Cards range from Pre-school through Adult Basic Education (no. 402) and Remedial or Corrective (no. 403). Place the appropriate Descriptor Card from this section on the light box. Fewer pin holes of light will show through the cards, since you have narrowed the selection.

At this point you may be ready to read the graph on the Descriptor Card to make your selection of materials.

Left side of card = line 300  
Bottom of the card = line 04  
Number = 304

Count by 100's Count by 10's and 1's.

**STEP V**

Refer to the blue notebooks of Descriptive Analysis Sheets is the final step in locating materials. Each of the notebooks contain 500 DAS.

- Notebook I Pages numbered 1 to 500.
- Notebook II Pages numbered 501 to 1000.
- Notebook III Pages numbered 1001 to 1500.
- Notebook Pages numbered 1501 to 2000.

Each Descriptive Analysis Sheet includes a narrative description of the material, the author's name, the publisher, copyright date and price (if available). If the IMC has acquired the material, the shelf number will be found in the upper right-hand corner of the DAS.

Other possible Descriptors include Mental Age, Reading Level, Input-Output, Process (ITPA) and Major Area.

**STATE TEXTBOOK ADOPTION LIST**

LEVEL I indicates K-3 (most material for TMR's, K-3 EMR's, etc., will be Level I)  
 LEVEL II indicates 3-6 (note overlap depending on your children's ability range)  
 LEVEL III indicates 7-9, and LEVEL IV indicates 10-12.

- Adams, Frederick Karl. **Comparisons of Attitudes of Adolescents Toward Normal and Toward Retarded Brothers.** December, 1965; Ed. D. Dissertation, University of Florida.
- Barber, B. **A Study of the Attitudes of Mothers of Mentally Retarded Children as Influenced by Socioeconomic Status.** Dissertation Abstracts, 1963, 24 pages 415, Ph. D. Dissertation, University of Southern California.
- Baumeister, A. A., Ed. **Mental Retardation: Appraisal, Education and Rehabilitation.** Chicago, Aldine Publishing Company, 1967.
- Began, Frank A. **A Motor Perceptual Developmental Handbook of Activities for School and Parents.** La Porte, Texas: Perception Developmental Research Associates, 1966.  
Good perceptual motor activities for teacher to use and suggest for additional practice at home.
- Bernstein, Bebe. **Everyday Problems and the Child with Learning Difficulties.** New York: The John Day Company, 1965.
- Carlson, Bernice Wells and Ginglend, David R. **Play Activities for the Retarded.** Nashville: Abingdon Press, 1961.
- Condell, James F. **Parental Attitudes Toward Mental Retardation.** American Journal of Mental Deficiency; July, 1966; V. 71, #1: pages 85-92.
- Conner, Frances P. **An Experimental Curriculum for Young Mentally Retarded Children.** New York, New York: Teachers College, Columbia University, 1964.  
A description of the experimental curriculum for young mentally retarded children at Teachers College.
- Cratty, Bryant J. **Developmental Sequences of Perceptual Motor Tasks.** New York, New York: Educational Activities, Inc., 1967.  
This book presents appropriate movement activities which are designed not only for physical fitness but to assist in the learning processes of children with intellectual deficits.
- Cruikshank, William and Johnson, Orville. **Education of Exceptional Children and Youth.** Prentice Hall, 1967.
- Perception and Thought.** Palo Alto, California: Peek Publication, 1969.  
Another good book to use in development of movement.
- Doll, Edgar. **The Measurement of Social Competence.** Minneapolis: Educational Publishers, 1953.
- Dunn, Lloyd M. and others. **Exceptional Children in Schools.** New York, New York: Holt, Rinehart and Winston, 1963.  
An excellent book containing articles by some of the leaders in the field of exceptional children.

Frankel, Max G. Happ, F. William, and Smith, Maurice P. **Functional Teaching of the Mentally Retarded.** Charles C. Thomas, Publisher: Springfield, Illinois, 1969.

Frostig, Marianne and Horne, David. **The Frostig Program for the Development of Visual Perception.** Chicago, Illinois: The Follett Publishing Company, 1964.

Not the answer to all problems, but a program all teachers should be aware and learn to use.

Gitter, Lena A. **The Montessori Approach to Special Education.** Johnstown, Pennsylvania: Mafex Associates, 1969.  
\*Preparing classroom environments for self-teaching.

Inhelder, Barbel. **The Diagnosis of Reasoning in the Mentally Retarded.** New York: The John Day, Co.

Johnson, Doris J. and Myklebust, Helmer. **Learning Disabilities: Educational Principles and Practices.** New York: Greene and Stratton, 1967.

Jordan, Thomas. **The Mentally Retarded.** Charles Merrill Books, Inc., 1960.

Kephart, Newell C. **The Slow Learner in the Classroom.** Columbus, Ohio: Charles E. Merrill Books, Inc., 1960.

This book has two chapters which deal with motor training and specific sensory motor activities.

Kirk, Samuel. **Educating Exceptional Children.** Houghton Mifflin, 1972.

Koch, Richard and Dobson, James, Ed. **The Mentally Retarded Child and His Family.** New York: Brunner/Mazel Publishers.

Kolstol, Oliver. **Educating Retarded Children.**

**A High School Work Study Program for Mentally Sub-normal Students.** Carbondale, Illinois, Southern Illinois University Press, 1965.

Kugel, Robert B. et al. **The Pediatrician and The Child With Mental Retardation.** Evanston, Illinois: American Academy of Pediatrics, 1971.

Loewendahl, Evelyn. **Exercises for the Mentally Retarded.** Swarthmore, Pennsylvania: A. C. Crafts, Inco, 1967.

These exercises may be helpful for the less able EMH youngsters.

Mager, Robert F. **Preparing Instructional Objectives.**  
Palo Alto, California: Fearon Publishers, 1962.

Nelson, Leslie W. **Instructional - Aids.**  
Dubuque, Iowa: William C. Brown Publishers  
Many teachers have found helpful information in this book.

Robins, Ferris and Robbins, Jennet. **Educational Rhythmics for Handicapped Children.**  
New York, New York: Horizon Press, 1965.

This book contains movement exploration activities progressing from simple to difficult.  
These ideas were developed by a Swiss group to use with retarded.

Robinson, Holbert and Robinson, Nancy M. **The Mentally Retarded Child.**  
New York, New York: McGraw-Hill Book Company, 1965.  
One of the most current books on mental retardation. A must for every professional library.

Rothstein, Jerome H. **Mental Retardation.**  
New York, New York: Holt, Rinehart, and Winston.  
This book contains many articles defining mental retardation, its causes, and some curriculum ideas.

Siegel, Ernest. **The Special Child in the Regular Classroom.**  
The John Day Co.

Smith, Robert M. **Clinical Teaching: Methods of Instruction for the Mentally Retarded.**  
McGraw-Hill.

**The Exceptional Parent, Practical Guidance for Parents of Children with Disabilities.**  
Published by Psy-Ed Corporation, 264 Beacon Street, Boston, Massachusetts.

Vallett, Robert E. **Programming Learning Disabilities.**  
Palo Alto, California: Fearon Publishers, 2165 Park Blvd. 94306.  
Many teachers find some helpful ideas for teaching TMH in this book.
