PREFACE

Finding and using relevant information frequently is a major task for curriculum specialists, teachers, administrators, and students. The Center for Vocational and Technical Education is dedicated to making useful and vital information accessible so that educators may use it to improve school practice.

The Center quarterly assembles, under one cover, instructional materials relevant to the field of vocational-technical education. We are indebted to our colleagues within the profession for providing us instructional materials as they become available. We also appreciate the contributions of instructional materials laboratories, local school systems and professional associations such as the Vocational Instructional Materials (VIM) section of the American Vocational Association. Members of the profession are continually encouraged to forward instructional materials for possible inclusion in future issues of AIM to the Acquisitions Specialist at The Center.

HOW TO USE AIM

This volume of AIM (Abstracts of Instructional Materials in Vocational and Technical Education) has two major sections: resumes containing abstracts, and indexes.

Each abstract presents information about a document's content to help you to decide if you want to read the full text of the document. The abstract is part of the resume which provides information about the document, its source and availability. Abstracts are arranged in ascending VT-number order. A sample resume, preceding this Introduction, is explained in detail.

The indexes help you to locate the abstracts by page numbers and VT numbers. These indexes are: Subject Index, Author Index and Conversion of Document Number Index. Index terms used in the subject index are ERIC descriptors. Each document has been assigned several of these descriptors; therefore, each document title appears in the subject index several times.

The full texts of documents are available from the original sources or from the ERIC Document Reproduction Service (EDRS) as microfiche or Xerox reproductions. Ordering information for AIM and EDRS reproductions is provided in a following section.

DOCUMENT ORDERING INSTRUCTIONS

All documents cited in this publication are available in their full text. Availability is by one of the options listed below:

1. ORIGINAL, COPY FROM PUBLISHER OR SUPPLIER

These documents have an availability listed in the resume. Often such documents are not available by any other means.

2. MICROFICHE AND HARD COPY REPRODUCTIONS

Documents with ED numbers are usually available individually on microfiche (\$0.65 a title) or paper copy (xerox-\$3.29 per 100 pages or fraction thereof) from:

ERIC Document Reproduction Service (EDRS)
P.O. Drawer 0
Bethesda, Maryland 20014

Orders must specify ED number. A sample order form follows on page 461.

3. MICROFICHE SETS

Documents with VT numbers only are not available as individual microfiche, but most are part of VT-ERIC microfiche sets.

A microfiche set contains all the documents announced in a single issue of AIM which are not available by one of the options outlined above. These documents are filmed continuously in VT number order, and each set is assigned a single ED number.

VT-ERIC microfiche sets are available

- a. In any complete collection of ERIC microfiche.
- b. As VT-ERIC microfiche sets purchased individually. (See page 458 for price lists of these sets)
- c. From institutions (e.g., state research coordination units) which have the VT-ERIC microfiche sets and are willing to provide microfiche duplicates of individual VT number documents.

Since ED numbers are assigned after announcement in RIE, ED numbers for the microfiche set corresponding to this publication can be obtained from future issues of AIM and RIE.

PRICES OF VT-ERIC MICROFICHE SETS

Most documents announced in a single issue of AIM are available in a VT-ERIC Microfiche Set. Documents which are available from the publisher or supplier, or which have individual ED numbers, are usually not included in these sets and should be ordered as outlined on page 457.
