*Statistical Studies

ABSTRACT

This report is a statistical study of juvenile court cases in 1972. The data demonstrates how the court is frequently utilized in dealing with juvenile delinquency by the police as well as by other community agencies and parents. Excluded from this report are the ordinary traffic cases handled by juvenile court. The data indicate that: (1) in 1972, for the first time since 1961, delinquency cases decreased from the previous year; (2) that, although delinquency remains primarily a boys' problem, the disparity between the number of boys' and girls' delinquency court cases is narrowing; (3) between 1971 and 1972 the number of delinquency cases handled non-judicially (i.e., without the filing of a petition) increased slightly as contrasted with a decrease of 3% in those handled judicially. Data are not available on the types of offenses for which juveniles are referred to the courts. The Appendix contains an alphabetic listing of states with an analysis of all types of children's cases disposed of judicially and non-judicially by all juvenile courts reporting for 1972. JUVENILE COURT STATISTICS - 1972

INTRODUCTION

The information in this publication is based on children's cases disposed of by juvenile courts. The data are affected by several factors. For example, the ages of children and the types of cases over which courts have jurisdiction are established by State law and often vary in different States and sometimes vary within the same State. This discrepancy affects the number of cases reported and, consequently, the comparability of the reports from the various courts.

The number of children's cases reported by different courts is influenced also by the organization and scope of other agencies in the community. For example, in some communities where social service agencies are well established and abundant, the police, schools and parents often refer cases for service to those agencies rather than to the juvenile court. The latter is used mostly when its judicial authority is needed. In other communities, the juvenile court is one of only a few agencies providing social services for children and in such communities, the juvenile court is utilized to a much greater extent. Furthermore, whether or not a child ever comes to the attention of the court is often decided by varying community and parental attitudes toward a child's behavior.

Because of these and other limitations (many of which are not measurable), juvenile court statistics, when taken by themselves, cannot measure the full extent of delinquency, dependency, or neglect; and they can be particularly misleading when used to compare one community with another. They do, however, indicate how frequently the juvenile court is utilized in dealing with such cases.

SUMMARY OF FINDINGS

Delinquency Cases

Size of the problem (Table 1)

Over one million (1,112,500) juvenile delinquency cases, excluding traffic offenses, were estimated as being handled by all juvenile courts in the United States in 1972. The estimated number of children involved in these cases (959,000) was lower, however, since in some instances the same child was referred more than once during the year. These children represent 2.9 percent of all children aged 10 through 17 in the country.

Trend (Tables 5, 6, 7, 8 and chart)

In 1972, for the first time since 1961, delinquency cases decreased from the previous year. The overall decrease for the country was slight - only 1 percent - while at the same time the child population, aged 10 through 17, increased by less than 1 percent (0.5). This is a reversal of the recent trend where the delinquency cases not only increased each year but the increase generally exceeded that of the child population.

Both urban and rural courts experienced decreases in 1972 -- by 3 and 2 percent respectively. Semi-urban courts, however, had a 4 percent increase.

Comparison of police and court data

Juvenile court delinquency statistics cited in this report mainly show how frequently the court is utilized in dealing with juvenile delinquency by the police as well as by other community agencies and parents. Another source of data relating to juvenile delinquency is police arrests of juveniles. Both series of data--police arrests of juveniles reported by the Federal Bureau of Investigation and juvenile court delinquency cases reported here--show a remarkable similarity in their trends over a long period of time despite their differences in definitions, units of count, extent of coverage, etc. Both figures surged upward during World War II, fell off sharply in the immediate postwar years, and then began to climb again. Their trends have been steadily upward since 1949, with the exception of a slight decrease in court cases in 1961 and now again in 1972. In 1972, again, both series of data are close. Police arrests of juveniles increased only slightly by eight-tenths of 1 percent and, as mentioned above, juvenile court delinquency cases decreased slightly by 1 percent.

Types of offenses

Data are not available in the national juvenile court statistical reporting program on the types of offenses for which juveniles are referred to the courts. To examine these, one needs to rely upon the data on police arrests of juveniles reported by the Federal Bureau of Investigation in its Uniform Crime Reports. These include arrests for non-status offenses, which would be crimes if committed by adults, as well as two juvenile status offenses (running away and curfew violations). Inasmuch as the police are the major source of referral of delinquency cases to juvenile courts, the offenses for which juveniles are arrested should pretty well represent most offenses for which juveniles are referred to court.

In the 1972 edition of Uniform Crime Reports, the Federal Bureau of Investigation reported that despite the slight increase in 1972 in arrests of juveniles under 18 years of age, for all types of offenses combined, such arrests more than doubled (+124 percent) between 1960 and 1972. For a group of serious offenses selected as being most reliably reported (criminal homicide, forcible rape, burglary, robbery, aggravated assault, larceny and auto theft), the combined increase between 1960 and 1972 was 101 percent. When offenses against the person (homicide, forcible rape, aggravated assault and robbery), generally accepted as being the most serious crimes, are selected from the reliably reported group, the increase between 1960 and 1972 was 216 percent. Serious offenses against persons, however, still only represent about 4 percent of all arrests of juveniles.

Delinquency among girls

Delinquency remains primarily a boys' problem, but the disparity between the number of boys' and girls' delinquency court cases is narrowing. For many years, boys were referred to court for delinquency about four times as often as girls. Because of the recent faster increase in girls' cases as compared to boys', as outlined below, the ratio was reduced to three to one by 1972.

Nationally, girls' cases increased while the boys' cases decreased in 1972. The girls' cases increased 2 percent as compared to a 2 percent decrease for boys' cases. The overall increase in girls' cases in 1972 resulted primarily from large increases in semi-urban and in rural courts -- 11 and 8 percent respectively.

Girls' delinquency cases disposed of by juvenile courts have been rising faster than those of boys every year since 1965. Between 1965 and 1972, girls' delinquency cases increased by 101 percent whereas boys' cases increased by 49 percent.

Police arrest data also confirm that girls are participating in delinquency at a faster pace than boys. Between 1960 and 1972 arrests of girls under 18 years of age increased by 388 percent for "violent" crimes and by 301 percent for "property" crimes; for boys the percentage increases were 203 percent and 71 percent, respectively. (See Table 30, Uniform Crime Reports-1972, F.B.I.)

The rise in girls' delinquency has generally been attributed to their changing attitude towards society and society's changing attitude towards them. Instead of the passive role assumed by girls in the past and society's protective role towards them, girls are becoming more aggressive and more independent in their day-to-day activities. Unfortunately, some of this behavior has resulted in large increases in the incidences of running away from home and in participation in the use of drugs, often necessitating other crime-related activities, such as shoplifting, robbery, etc.

Method of handling (Tables 2, 4, and 7)

Almost three-fifths (59 percent) of the delinquency cases disposed of by juvenile courts in 1972 were handled nonjudicially (i.e. without the filing of a petition). The proportion of cases handled nonjudicially was higher in urban and semi-urban courts than in rural courts, due perhaps to the availability of specialized intake or probation staff in the larger courts. However, in 1971 and again in 1972, large percentage increases in nonjudicial handling have been occurring in the rural courts, thus reducing the gap in the proportion of cases handled in this way by the smaller rural courts as compared with the larger urban and semi-urban courts.

Between 1971 and 1972 the number of delinquency cases handled judicially by all courts decreased by 3 percent as contrasted with a very slight increase in those handled nonjudicially. This may mean that: (1) serious cases requiring judicial handling are leveling off; or (2) with the recent emphasis on diverting juveniles at every stage of their involvement in the judicial system, more and more delinquency cases, particularly in semi-urban and rural courts, are being handled without the filing of a petition (nonjudicially). When handled nonjudicially, a juvenile's further involvement in the judicial system can be averted. The juvenile is most likely to have his case adjusted or referred to other community resources. In this respect, then, diversion is occurring even after referral to the court.

The proportion of delinquency cases handled nonjudicially is very large. Even though it may be appropriate to handle as many cases as possible in this manner, it raises the question as to why so many that do not require judicial determination should even be referred to the court.

Rates (Tables 3, 5, and 6)

The rate of delinquency cases (the number of cases per 1,000 child population aged 10 through 17) was 33.6 in 1972 as compared to 34.1 in 1971. Between 1960 and 1972 the rate increased from 20.1 to 33.6. Of all the juvenile court delinquency cases in the country, 62 percent were handled by courts in urban areas, 31 percent by courts in semi-urban areas, and 7 percent by courts in rural areas.

Other Cases

Dependency and neglect (Tables 9, 10 and 11)

Dependency and neglect cases in the United States totaled 141,000 in 1972, an increase of 8 percent over 1971. This is a sharp reversal of the general downward trend in dependency and neglect cases starting in 1967. While it is not possible to pinpoint the actual cause for this rather sharp increase in 1972, one contributing factor might be the increased public attention directed towards the abused child. This could result in the increased finding and reporting of such cases to the juvenile court where they are handled as "neglect" cases.

Special proceedings (Appendix table)

A small portion of cases involve adoption, custody of children, consent to marry, or other "Special proceedings." Not all juvenile courts handle such cases.

SOURCES OF DATA

From 1957 through 1969, national estimates on the number of juvenile delinquency cases disposed of by juvenile courts were based on data derived from a national sample of juvenile courts which, drawn from the Current Population Survey sample of the Bureau of the Census, was considered to be representative of the country as a whole. Since 1970, taking advantage of the extremely high percentage of reporting coverage and in anticipation of developing a new national sample, utilizing more current information from the 1970 decennial census, data from all courts reporting provided the basis for the national estimates.

All courts in the U.S. and those reporting for both years were stratified by the size of the population served by the courts as shown in the table below. Estimates were made for each stratum, using as an inflation factor, the ratio of the population served by the reporting courts to the population served by all courts in the stratum.

Size of court <u>1/</u>	All courts		Responding courts		Percent responding	
	No.	Population served	No.	Population served	No.	Population served
1,000,000 or more	22	46,942,879	19	39,128,655	86.4	83.4
500,000-999,999	52	36,156,456	36	25,489,860	69.2	70.5
250,000-499,999	74	25,761,642	49	16,761,103	66.2	65.1
100,000-249,999	191	30,100,775	140	22,367,670	73.3	74.3
50,000- 99,999	335	23,404,387	245	17,190,058	73.1	73.4
25,000- 49,999	635	20,791,934	387	13,547,816	60.9	65.2
10,000- 24,999	970	15,810,158	690	11,328,917	71.1	71.7
Under 10,000	694	4,195,339	508	3,177,879	73.2	75.7
Total: U. S.	2,973	203,163,570	2,074	148,991,958	69.8	73.3

1/ Based on population served by court according to 1970 census population.

In 1972, 1,527 courts whose jurisdictions include more than two-thirds of the child population under 18 years of age reported on dependency and neglect cases. Data on dependency and neglect cases have always been based on all courts reporting.

The States Alaska, Florida, Illinois, New Mexico, Wisconsin and the District of Columbia did not report in 1972.

DEFINITIONS OF TERMS

JUVENILE DELINQUENCY CASES are those referred for acts defined in the statutes of the State as the violation of a State law or municipal ordinance by children or youth of juvenile court age, or for conduct so seriously antisocial as to interfere with the rights of others or to menace the welfare of the delinquent himself, or of the community. This broad definition of delinquency includes conduct which violates the law only when committed by children; e.g., truancy, ungovernable behavior, and running away. Excluded from this report are the ordinary traffic cases handled by juvenile courts, except where traffic cases, usually the more serious ones, are adjudicated as "juvenile delinquency" cases and are reported as such. Variations in types of courts having jurisdiction in traffic cases of juveniles and frequent changes in laws affecting this jurisdiction, together with changes in administrative practices and inadequate reporting of such cases, make it very difficult to determine meaningful national estimates on the extent and trends in juvenile traffic offenses.

DEPENDENCY AND NEGLECT CASES cover neglect or inadequate care on the part of parents or guardians; e.g., lack of adequate care or support resulting from death, absence, or physical or mental incapacity of the parents, abandonment or desertion, abuse or cruel treatment, and improper or inadequate conditions in the home.

SPECIAL PROCEEDINGS cover cases involving children in court for other than delinquency or dependency and neglect; e.g., adoption, institutional commitments for special purposes, application for consent to marry or to enlist in the armed forces, determination of custody or guardianship of a child, and permission (to hospitals) for an operation on a child.

THE UNIT OF COUNT is a case actually disposed of by a court. Such a case is counted each time a child is referred to court during the year on a new referral in delinquency, dependency, neglect, or in special proceedings. Referrals for alleged or adjudged delinquency cases are included.

TYPE OF COURT is determined by the percentage of the population it serves that live in urban areas (as classified by the Bureau of the Census in the 1970 decennial census); for "urban courts," 70 percent or more; for "semi-urban courts," 30-69 percent; for "rural courts," under 30 percent.

METHOD OF HANDLING CASES is classified into judicial and nonjudicial, sometimes referred to as official and unofficial. "Judicial cases" are those where the court has acted on the basis of a petition or motion; "nonjudicial cases," consequently, are those cases which have been adjusted by the judge, referee, probation officer, or officer of the court without the invocation of the court's jurisdiction through petition or motion.

SUMMARY TABLES

Delinquency Cases

Table 1. -- NUMBER OF DELINQUENCY CASES DISPOSED OF BY JUVENILE COURTS,
BY SEX, UNITED STATES, 1972

Type of court	Total		Boys		Girls

Dependency and Neglect Cases

Table 9. -- NUMBER AND RATE OF DEPENDENCY AND NEGLECT CASES DISPOSED OF BY JUVENILE COURTS, UNITED STATES, 1972 a/

Type of court	Number of cases	Rate per 1,000 child population b/			
		All courts	Age jurisdiction of court		
			Under 16	Under 17	Under 18 <u>c/</u>
Urban.....	84,000	1.8	1.1	1.8	2.2
Semi-urban.....	41,000	2.9	2.3	2.1	3.3
Rural.....	16,000	1.5	1.5	1.7	1.8

a/ Based on the data from 1,527 courts whose jurisdiction include more than two-thirds of the child population under 18 years of age.

b/ Calculated on basis of the 1970 child population at risk, that is, the child population under 16, for courts whose age jurisdiction is under 16, etc.

c/ A small number of courts having jurisdiction of children under 21 years of age are included here. The number of cases involved do not seriously affect the rates of the courts in this column.

Table 10. -- PERCENT CHANGE IN DEPENDENCY AND NEGLECT CASES DISPOSED OF BY JUVENILE COURTS, UNITED STATES, 1971-1972 a/

Type of court	Total	Judicial	Nonjudicial
Total	+8	+4	+36
Urban.....	-3	-6	+8
Semi-urban.....	+35	+21	+93
Rural.....	+18	+20	+3

a/ Based on data from 1,459 courts reporting both years, who jurisdiction includes about two-thirds of the child population under 18 years of age.

Table 11. -- NUMBER AND RATE OF DEPENDENCY AND NEGLECT CASES DISPOSED
OF BY JUVENILE COURTS, UNITED STATES, 1946-1972

Year	Dependency and neglect	Child population under 18 yrs. of age (in thousands)	Rate <u>b/</u>
1946.....	101,000	41,759	2.4
1947.....	104,000	43,301	2.4
1948.....	103,000	44,512	2.3
1949.....	98,000	45,775	2.1
1950.....	93,000	47,017	2.0
1951.....	97,000	48,598	2.0
1952.....	98,000	50,296	1.9
1953.....	103,000	51,987	2.0
1954.....	103,000	53,737	1.9
1955.....	106,000	55,568	1.9
1956.....	105,000	57,377	1.8
1957.....	114,000	59,336	1.9
1958.....	124,000	61,238	2.0
1959.....	128,000	63,038	2.0
1960.....	131,000	64,516	2.0
1961.....	140,000	65,789	2.1
1962.....	141,000	67,092	2.1
1963.....	146,000	68,371	2.1
1964.....	150,000	69,625	2.2
1965.....	157,000	69,699	2.3
1966.....	161,000	69,851	2.3
1967.....	154,000	69,878	2.2
1968.....	141,000	69,831	2.0
1969.....	127,000	69,694	1.8
1970.....	133,000	69,669	1.9
1971.....	130,900	69,576	1.9
1972.....	141,000	69,060	2.0

- a/ Data for 1955-1972 estimated from courts serving about two-thirds of the child population under 18 years of age in the United States. Data prior to 1955 estimated by the Children's Bureau, based on reports from a smaller but comparable group of courts. Inclusion of estimates from Alaska and Hawaii beginning in 1960 does not materially affect trend.
- b/ Based on dependency and neglect cases per 1,000 U.S. child population under 18 years of age.

- a/* NOTE WELL: This table includes all courts that transmitted reports to the National Center for Social Statistics. The data in this table should not be used to make comparisons between communities regarding the extent of delinquency. Questions concerning changes in an individual court's data from one year to another should be directed to that individual court.
- b/* Courts serving area with population of 100,000 or more are listed separately showing the chief city located in each area. Courts serving areas with less than 100,000 are combined for each State and are presented as "small courts."
- c/* Where the age under which the court has original jurisdiction is different for boys and girls, the age for boys appears first. In California the jurisdiction of the adult court rather than the juvenile court is usually invoked for those 18 years or over. In South Carolina, dependency and neglect "child" means under 21 years of age. In New York the age limit for neglect cases is 16 for boys and 18 for girls.
- d/* Those cases classified as PINS, unruly, undisciplined, etc. are included with delinquency cases for the purposes of this report.
