ABSTRACT

This compilation includes descriptions and data for some 298,000 children and youth in 230 school systems. National Leadership Institute/Teacher Education (NLITE) staff estimates that this represents less than one-fifth of the number of effective programs in operation and compilation is therefore an on-going operation with expanded reports issued annually. One of the most heartening developments in school practices in recent years has been the increase in programs which enable disadvantaged children to receive a top-notch education in spite of poverty. Both the children and the nation benefit from the efforts of school teachers and administrators in this respect and a debt of gratitude is owed to a growing number. The National Leadership Institute/Teacher Education is a support and dissemination center sponsored by the U.S. Office of Education for which the University of Connecticut serves as host. This compilation of program descriptions was made by NLITE staff which gathered data from several sources including the annual Education Fair (Edu Fair) sponsored by the U.S. Office of Education, reports of the Council for Basic Education and the National Education Association, and invitations to school districts to submit reports and data from their programs. Data are presented in tabular form. The following information is provided for every program included in the compilation: name, place, number of students, curriculum, test gains in IQ points, and test gains in achievement score. (Author/JM)

### EXEMPLARY SCHOOL PROGRAMS FOR DISADVANTAGED MINORITY CHILDREN

One of the most heartening developments in school practices in recent years has been the increase in programs which enable disadvantaged children to receive a top-notch education in spite of poverty.

Both the children and the nation benefit from the efforts of school teachers and administrators in this respect and a debt of gratitude is owed to a growing number.

The National Leadership Institute/Teacher Education is a support and dissemination center sponsored by the U. S. Office of Education for which the University of Connecticut serves as host. The following compilation of program descriptions was made by NLITE staff which gathered data from several sources including the annual Education Fair (Edu Fair) sponsored by the U. S. Office of Education, reports of the Council for Basic Education and the National Education Association, and invitations to school districts to submit reports and data from their programs.

The compilation includes descriptions and data for some 298,000 children and youth in 230 school systems. NLITE staff estimates that this represents less than one-fifth of the number of effective programs in operation and compilation is therefore an on-going operation with expanded reports issued annually.

Again, every congratulation and good wish is due the teachers and administrators whose skill and dedication make it possible for children and youth to receive a good education despite the disadvantages of both poverty and minority status.

## EXEMPLARY SCHOOL PROGRAMS FOR DISADVANTAGED MINORITY CHILDREN

Name	Place	Number of Students	Curriculum	IQ Point Achievement Score	Test Gains
Wm. B. Travis Elementary School	Dallas, Texas	1,700	Emphasis on language development and development of positive self-concept.		Achievement at one grade level per year of instruction
ESEA Title I	Oakland, California	8,700	Individual approach based on diagnosis, prescription and treatment. Supplementary personnel were used.		Month for month or better gains in grades 1, 2, 4, and 6 in reading. Month for month or better gains in grades 2, 3, 5, and 6 in mathematics.
Preschool Program	Oakland, California	629	Low teacher-child ratio. Stress on skills such as recognizing similarities and differences, categorizing and language development.		Average gain of 29 percentile points on the "Preschool Inventory". Reached 91 percentile level in relation to national Head Start norm.
CO-PIUS (Cooperatively Planned Urban Schools) Project	Chicago, Illinois	7,570	A Board of Education sponsored Model Cities funded program for seven urban schools which provides a saturation of services aimed at upgrading achievement and self-concept through concern and services for the "whole" child, including nutrition and health services. CO-PIUS schools also operate community schools components. More than 110 special events were sponsored by CO-PIUS community school committees.		Exceeded the national average gain of a year in a year in mathematics computation; achieved the national average gains of a year in a year in mathematics concepts; and, of great significance, achieved the national average gain of a year in a year in that most important area of reading comprehension.

EXEMPLARY SCHOOL PROGRAMS FOR DISADVANTAGED MINORITY CHILDREN

Name	Place	Number of Students	Curriculum	IQ Points	Test Gains Achievement Score
Schome (School and Home) Project (In CO-PLUS Schools)	Chicago, Illinois	840	A prekindergarten program for children ages 3 and 4 and their parents to increase the physical, social, and academic readiness of the children for the regular school program, and thus increase the probability of their success.		As of June, 1972, one schome had been in operation a year. Of the 30 children, age 4, who had completed the year, 33% tested ready to read at entrance to kindergarten; at the close of the kindergarten year, 79% tested ready to read. These results may be compared to the approximately 35% usually ready to read at the end of kindergarten in this same school.
TESOL Program at Senn High School	Chicago, Illinois	350	Provision of extensive services, including counseling, to small groups of non-English speaking students who represent a broad variety of ethnic groups and nationalities; provision of two specially designed TESOL laboratories and of specialized personnel.		Test scores on the Comprehensive English Language Test compared favorably with those levels established for existing norm groups; students showed significant gains on the English structure inventory developed by staff; dropout rate was significantly lower than schoolwide rate.
Reading Center at Hess Upper Grade Center	Chicago, Illinois	1,800	A laboratory individualized program for seventh and eighth grade pupils to improve their reading achievement and the quality of reading instruction.		Average of nine months of gain for nine months of instruction was achieved as compared with the previous average 3.0 to 3.5 months of gain indicated for the city-wide test scores.
Saturation of Services to Improve Language Arts Facilities at Manley Upper Grade Center	Chicago, Illinois	1,100	Provision of reading laboratories and a project staffing pattern designed to facilitate pupil progress in reading.		Prorated for ten months of instruction, Manley pupils had gain scores in reading of 7 to 8.5 months, a rate more than twice that indicated for their West Target Area.

EXEMPLARY SCHOOL PROGRAMS FOR DISADVANTAGED MINORITY CHILDREN

Name	Place	Number of Students	Curriculum	IQ Points	Test Gains Achievement Score
Project R.E.A.D. (Reading Environment and Development)	Chicago, Illinois	2,800	<p>A multiunit, multimedia program of instruction in several content areas for three "inner city" schools which reflect three teaching/learning situations: one, where many children do not speak English as the primary language in the home; a second, where there is a lack of the type of language development required for success with most of the existing textbooks and with so-called "standard" English usage; and a third, where the student body is multi-ethnic and multi-cultural. This is a Board of Education and Chicago Teachers Union cooperatively planned program.</p>	<p>Prior to R.E.A.D., the average gain in reading at the schools was 5-7 months. The 1971-72 evaluation showed the following gains for the three schools: in word analysis, 10-8-10 months; in word knowledge, 7-8-10 months; and in reading comprehension, 6-8-11 months. Gains for non-English speaking and bilingual children are at a rate equal to or greater than their English-speaking counterparts. Mathematics gains for computation were 11-9-11 and for concepts were 10-6-12 months.</p>	
Extended School Year Program	Chicago, Illinois	5,650	<p>The voluntary participation of any Chicago public school in any one of three year-round plans, with an additional plan available to high schools; present participation involves three elementary schools and a middle school, each of which chose the 45-15 Plan; a high school began operation under the 45-15 Plan in July, 1973.</p>	<p>Achievement and attendance at all schools has improved since the program was initiated. Parents have voted for continuation of the program.</p>

APEX - English Electives	Flagstaff, Arizona	1800 students total in two high schools, grades 10-12. Approximately 650 of them are enrolled in lower phase electives for students disadvantaged in English skills.	Seventy non-graded phased electives are offered at the two district high schools. Twenty-seven of them are designed particularly for students deficient in English or reluctant learners.	Criterion referenced tests have been devised for all courses.	
Bilingual Education	Flagstaff, Arizona	100 in three elementary schools grades K-4; 35 in one junior high, grades 7-8.	Instruction in both the native language - either Spanish and Navajo - and in English. Teacher aides and ESL teachers used in the program. It is a pilot, new in our district this year.	Selection made by oral-language testing (Monroe) and by interview. No post testing has been done.	

## EXEMPLARY SCHOOL PROGRAMS FOR DISADVANTAGED MINORITY CHILDREN

Place	Number of Students	Curriculum	IQ Points	Test Gains
Flagstaff, Arizona.	Approx. 1,000	<p>Two Anglo certified counselor-coordinators, four Indians with degrees called teacher-counselors, and four Indians who are university students working as aides, serve in a counseling program in Flagstaff Public Schools for Indian students. The program is funded under Title IV and is a "first" for Flagstaff Public Schools.</p>	Gains will be noted at the end of the school year as evidenced by school records.	
		<p>The purpose of the counseling program is to help students academically and socially. Problems of absenteeism, alcohol, under-achievement, and dropouts are worked with. These goals will be measured by school records.</p>		
		<p>Even though the program is new, a lot of good feeling is evident. An Indian Advisory Committee representing six tribes made up of students, parents, and teachers monitors the progress and direction of the activities.</p>

K-3 EDP Program	Baltimore County, Maryland Greenwood 6901 North Charles St. Towson, Maryland 21208	*Not limited to minority students 2,308	Program for Reading Improvement involving teachers, paid aides, paid parent helpers, and non-paid volunteers.	The primary objective of the Title I program was for the identified pupils grades 1-3 to show average pre-post gains in reading of one month per month of instruction. The measuring device was the Gates-McGinitie Reading Tests, Levels A, B, and C, and the unit of measure was the publisher's grade equivalent scale. Pupils were identified for the most part by their scores on pre-test <u>Gates-McGinitie Reading or Readiness Tests.</u>	Data indicated the following: For 553 first graders, the average gain was 1.1 months per month of instruction: For 569 second graders, the average gain was 1.0 months per month of instruction: For 470 third graders, the average gain was 1.0 months per month of instruction. Additionally, the end of year post-test reading grade equivalent mean levels were 1.8, 2.4, and 3.0 for 1st, 2nd, and 3rd grades, respectively.

HOPE Program (Home Oriented Preschool Education)	Charleston, W. Virginia.	25,000	Home-oriented instructional system designed for 3, 4, & 5 year olds by the Appalachia Educational Laboratory. It consists of daily television lessons, weekly home visits by paraprofessionals and weekly group instruction staffed by trained teachers in a mobile classroom for convenience to parents and small children.	Learning was classified into cognitive, language, psychomotor, social skills, and interest categories. The following instruments and methods were employed to measure aspects of performance: 1. Cognition - PPVT Test scores on the PPVT favored HOPE children. The interaction of the paraprofessionals home visitor with parents and children was associated with substantial gains. 2. Language - ITPA HOPE children attained significantly higher scores on measures of the ability to describe objects verbally and to communicate by means of manual expression. 3. Psychomotor - Marianne Frostig Developmental Test of Visual Perception HOPE children achieved a significantly higher level of motor coordination and perceptual learning ability. 4. Social skills - interaction analysis technique Children who participated in the mobile classroom activities developed more constructive social skills than children who received only the home visitor and television program and that group return was more socially constructive than children who only watched TV programs.

Follow-Through Grade 1	East Hartford, Conn.	282	A continuing individual diagnostic-prescriptive program to increase school achievement in reading, language arts, math and other basic concepts and skills needed for school success.	As compared to a control group, test results on the ARC Inventory, Metropolitan Readiness Test, and TORE General Concept Test showed that the Follow-Through Grade one children maintained their general position in each successive testing. Teacher evaluations continued using checks and tests provided with reading program materials. These evaluations were shared with parents during two regularly scheduled conferences. Teacher evaluations report that the disadvantaged child would not have maintained this general position without the year's head start and the added program services provided during the following two years of his school life.		
English as a Second Lang.	East Hartford, Conn.	55 17 in Kindergarten 22 in 1st grade 5 in 5th grade 11 in 2nd grade	An individualized instruction program for non-English speaking children to help orient them in our English-Speaking Society. For non-readers, to be able to read on a primer or first reader level; for students already reading to be functioning at a level closer to their actual age-grade placement. Principal goal of program is to expand the child's vocabulary and help him acquire a grasp of the fundamentals of English structure and word order.	Test scores on the PPVT for 7 months of instruction showed an average growth of 1.8 years for 13 kindergartners, 1.3 yrs. for 9 1st graders, 1.5 yrs. for 6 2nd graders, and 1.8 yrs. for 3 3rd graders. Although many children scored below their age level, results indicate a positive growth toward a level of their age-grade placement.
