ABSTRACT

This collection of appendices to the "Evaluation of School-Based Right to Read Sites" includes "Evaluation of Right to Read Materials," which presents an overview and discusses the evaluation procedure and evaluation results; "Instruments," which includes mail-out materials and regional conference materials; "Bibliography," which presents journal articles, books, and ERIC documents pertinent to the study; "Master Matrix of Right to Read Sites," which lists the codes used to describe participating schools and lists each school participating in the evaluation program; and "Consultants: Titles and Areas of Specialization," which lists the consultants who participated in this Right to Read study. APPENDIX A. EVALUATION OF RIGHT TO READ MATERIALS

I. Overview

A. <u>Description of Materials</u>

In order to provide a basic framework for program operations, the National Right to Read Office sent planning and implementation materials to every Right to Read site. These materials included the following:

• Right to Read General Plan of Action

This twenty-one page guideline delineated the roles of the Office of Education, State education agency (SEA), local school district (LEA), Unit Task Force, and Technical Assistance Teams in implementing local Right to Read programs.

Needs Assessment Package (NAP)

The NAP contained forty-five pages of directions for assessing site needs in terms of student achievement and attitude; personnel; material resources; curriculum and instructional techniques. The NAP also supplied charts for the display of pertinent data.

• Program Planning Procedure (PPP)

This fifteen-page package contained directions for selecting a basic approach to meeting program objectives; reviewing and selecting alternative methods, materials, and program organizations; and redirecting existing resources to support the new program. The kit also contained charts for displaying pertinent information.

Information Capsules (ICs)

As a part of the Program Planning Procedure, a set of five information capsules containing filmstrips, cassettes, charts, and booklets was sent to each site. These capsules described exemplary reading programs at the elementary, junior high, and high school levels.

• Statement of Work

The twenty-four page Statement of Work guidelines gave directions and a format for describing the Right to Read school--its objectives, reading approach, personnel, and budget.

• Status and Reporting Center (S&RC)

This package contained fourteen pages of directions and several charts for displaying information concerning program goals and progress.

B. Role of Right to Read Office and the Need to Evaluate Planning Materials

The National Right to Read Office believes it is an integral part of a team effort (along with State and local education agencies, and citizens of the school community) to bring about functional literacy by 1980 for 99 percent of all U. S. citizens 16 years of age or under and for 90 percent of those over 16 years of age. Therefore, the National Right to Read Office has assisted in the planning, operation, and evaluation of Right to Read programs. A part of this assistance has been to develop materials for a basic framework for planning and implementing such programs.

The Right to Read Office felt it was necessary to evaluate these materials to ensure the effectiveness of program planning and implementation; therefore, the Right to Read Office asked CRI to include this evaluation as a part of its 1972-73 assessment.

II. Evaluation Procedure

A. Development of Instruments

As a first step in the evaluation of these Right to Read materials, CRI staff reviewed the materials and simulated the needs assessment and program planning and implementation procedures to be followed at the Right to Read sites. A product of this task was the development of questionnaires and group discussion formats to be used in the Regional Workshops held in the summer of 1972. Instruments

were developed for parents, teachers, and principals, all of whom were to be members of the Unit Task Force (UTF) at each site. The questionnaires and group discussions elicited information concerning the materials' effectiveness in terms of the following objectives:

- <u>Full Utilization-- The extent to which the planning</u> materials and procedures were used.
- <u>Self-sufficiency--</u>The extent to which the materials were self-explanatory,
- <u>Uniqueness</u>--Whether the materials and procedures were unique or only a duplication of a system already available and in use by school districts.
- <u>Usefulness</u>--Extent to which materials were flexible enough to apply over a broad range of local conditions, schools, and school systems.

B. Regional Workshops

Regional Workshops were held in July 1972, in Atlanta, Philadelphia, Chicago, and San Francisco. The workshops were attended by representatives of each local Unit Task Force (from all sites, excluding satellite sites), Technical Assistance Teams, and National Right to Read staff. CRI also invited consultants to each of the regional workshops.

The workshops were designed to give UTF members (parents, teachers, and principals) the opportunity to make input to CRI on recommended changes and reactions to the program planning materials and procedures. At each workshop, participants were divided into role groups and were asked to fill out the questionnaires provided. A one-half day focused group discussion was then held to ensure that participants were able to fully contribute their ideas concerning the materials and procedures. In all, approximately fifteen parents, forty-three administrators, and twenty-seven teachers attended the conferences.

III. Evaluation Results

Based on the data gathered at the Regional Workshops, CRI revised the materials and procedures and submitted these revisions to the National Right to Read Office for approval. The revisions included omitting some procedures and materials (including the Information Capsules) which people felt were not useful or which were not utilized. Other revisions involved clarification of terminology in order to improve the self-sufficiency of materials. Although most respondents had participated in this particular approach to needs assessment and program planning before, they all agreed that the materials and procedures were useful and stated that they would recommend them to other schools and school districts.

After approval was received from the National Right to Read Office, CRI had 500 copies of the revised materials printed for immediate dissemination to Right to Read sites and other interested schools and school districts. End-of-year reactions to these materials as reported in the individual site self-evaluations are included as Section E (Volume III, Parts I, II, and III) in the Individual Site Assessments.

APPENDIX B. INSTRUMENTS

Six instruments were developed to assess program/process variables and student reading achievement. These instruments appear in Section I of this appendix. The eight forms developed for use at the regional conferences appear in Section II.

Dear (Project Director):

As you are already aware, Contemporary Research Incorporated is under contract with the U.S. Office of Education to undertake a descriptive assessment of all school-based Right-to-Read sites in the country. This assessment is to take place during the 1972-73 school year.

As an initial step toward implementing the assessment process, we are sending you the enclosed instruments (questionnaires) for the teachers in your Right-to-Read program. These instruments have been approved by the Right-to-Read Office in Washington. The ones entitled, "Process Variables", "Attitude Data", and "Achievement Data" are to be filled out by the teacher for each class the teacher is presently teaching in the Right-to-Read program. The others will be filled out once only by each teacher in the program. We have tried to estimate the total number of instruments your site will need and have sent you that number. If you need more, may I ask that you duplicate the amount needed? Use the enclosed preaddressed envelopes to return them to us by________.
Please ask each teacher to return his/her instruments in a separate envelope.

At a later date, we will ask for scores related to the pre- and post-tests on reading achievement and student attitude. The cover sheet attached to each set of instruments indicates the confidential manner in which we shall treat all data.

I would like to stress the importance of these instruments to our assessment program. May I ask you, as the project director at your school, to encourage each teacher in the program to fill out each instrument as completely as possible and that the instruments be returned by the date indicated above. Some type of follow-up on your part to assure their prompt return will be most appreciated.

If I may be of any assistance whatsoever, please do not hesitate to call me. Thank you kindly for your cooperation in this matter.

Sincerely,

Jim Vasquez Program Director, Right-to-Read Project Assessment

JV/cr cc: District Superintendent Dr. Ruth Holloway

1100 GLENDON AVENUE LOS ANGELES, CALIF. 90024 (213) 477-5066

Dear Teacher:

These instruments (questionnaires) constitute the initial step CRI is taking pursuant to fulfilling our contract with the U. S. Office of Education for an assessment of all school-based Right to Read sites in the country. Data pertinent to particular individuals and sites will be confidential and all reports will be released through the Right to Read Office in Washington.

The instruments entitled "Process Variables", "Attitude Data", and "Achievement Data" should be filled out as soon as possible for each Right to Read class you are presently teaching. The others will be filled out once only.

Dear (Project Director):

Contemporary Research Incorporated is completing the initial mailout for its assessment of Right-to-Read programs. This constitutes the first step CRI is taking pursuant to fulfilling its contract with the U.S. Office of Education. Data pertinent to particular individuals and sites will be confidential and all reports will be released through the Right-to-Read Office in Washington, D.C.

As yet we have not received from your site all the information needed in order to complete this assessment. Below we have checked the information that is lacking and have written the names of those teachers from whom we have not received information.

We have enclosed the corresponding instruments with a return, prepaid envelope. We will greatly appreciate receiving this information at the earliest possible date because of its importance to our assessment.

Dear (Project Director):

As a final step in the data collection schedule, Contemporary Research Incorporated is sending the enclosed instruments to schoolbased Right to Read sites. This assessment is being done pursuant to our contract with the U. S. Office of Education.

The instruments entitled, "Achievement and Attitude Data -- Class Scores" and "Achievement and Attitude Data -- Individual Scores" are to be filled out by each teacher and for each class the teacher presently is teaching in the Right to Read program. The other instrument, "Teacher Questionnaire Form A (or Form B)", will be filled out once only by each teacher. We have tried to estimate the total number of instruments your site will need and have sent you that number. If you need more, may I ask that you duplicate the amount needed? Use the enclosed pre-addressed envelopes to return them to us within two weeks of receipt. Please ask each teacher to return his/her instruments in a separate envelope. The cover sheet attached to each set of instruments indicates the confidential manner in which we shall treat all data.

May I request once again that due to the importance of these instruments to our assessment, you as the project director encourage each teacher in the program to fill out each instrument as completely as possible and that the instruments be returned at the earliest possible date? Thank you most kindly.

If I may be of any assistance whatsoever, please do not hesitate to call me.

Sincerely,

James Vasquez
Program Manager

TEACHER QUESTIONNAIRE FORM A

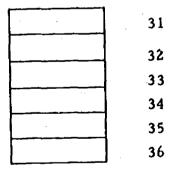

1. When teachers of reading find that their students have difficulty in learning to read they report a number of reasons for this phenomenon. (The following list contains some factors often mentioned as decisive in determining how well a child learns to read.) On the basis of your experience, indicate the extent to which you agree or disagree with each item below by checking the appropriate space.

-		ccess in learning to read well	Strongly Agree	Agree	Disagree	Strongly Disagree	
	is	usually traceable to:	1	2	3	4	ļ
		How carefully the student works.					13
•	ъ.	How much creativity the teacher has.					14
Refrança de la compansión de la compansi	c.	How much confidence the student has in himself.					15
	d.	Whether the teacher likes the student.					16
*****	e.	How difficult the reading material is.					17
	f.	The ability of the teacher to communicate with her students.					18
-	g.	How fortunate the student is in general					19
	h.	How alert the student is during reading instruction.					20
	i.	How much teacher preparation goes into a reading lesson.					21
	j.	How much the student cares about learning to read.					22
	k.	The socioeconomic background of the student.					23
	1.	How much competency the teacher has.					24
	m.	The ability of the teacher to individualize instruction.					25

		Strongly Agree	Agree	Disagree	Strongly Disagree	
		1	2	3	4	
<u> </u>	Whether the student's parents read at home.					26
0.	How much time the student spends in working on reading.					27
p.	Whether the student is a boy or a girl.					28
q.	Whether the student's parent(s) belong to an ethnic group that is verbally oriented.					29
r.	How much academic ability the student has.					30

2. Given the items on this questionnaire, choose the three that you believe are most decisive in determining how well a child learns to read and rank them 1, 2, and 3 on the lines provided to the left of the letters. Circle the letters for the three items you believe are least decisive in determining how well a child learns to read. Then rank them 1, 2, and 3 on the lines provided. (Note: 1 = least decisive of them all.)

TEACHER QUESTIONNAIRE FORM B

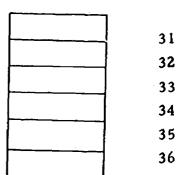

1. When teachers of reading find that their students have difficulty in learning to read they report a number of reasons for this phenomenon. (The following list contains some factors often mentioned as decisive in determining how well a child learns to read.) DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE OFFICE OF EDUCATION

WASHINGTON, D.C. 20202

A major component in the evaluation which Contemporary Research Incorporated (CRI) is undertaking for the U.S. Office of Education's Right to Read office will be the summarizing and reporting of information supplied by the schools in their own project evaluations. For this reason we are providing each Right to Read school with an outline that suggests the kinds of data that should be included in project self-evaluations. It may be that you will want to include additional items in your report. All such information is acceptable, but we consider the following items to be essential.

- Description of program objectives and degree to which they were accomplished
- Identification of present project Director (name and job title, e.g., Principal, Teacher, etc.)
- Total number of students in present Right to Read classes by grade level.
- Total number of students presently in school by grade level
- Ethnic breakdown (percentages) of students presently in Right to Read classes by grade level (please use the following categories in reporting all items related to ethnicity: American Indian, Black, Mexican American, Asian American, Puerto Rican, White, Other).
- Ethnic breakdown of teachers of Right to Read classes by grade level
- Nature and extent of in-service staff training
- Activities of the Unit Task Force during both Planning and Implementation phases
- Use of Right to Read Technical Assistants during both Planning and Implementation phases

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE OFFICE OF EDUCATION WASHINGTON, D.G. 20202

- Description of how the diagnostic-prescriptive approach was used
- Usefulness of the Program Planning Procedure and Status and Reporting Center materials
- If you have a Reading is Fundamental (RIF) program in your school, please describe the nature of this program (e.g., parent involvement, increased reading of books by students, attitude changes toward reading or other observed results related to this paperback book program)
- Student affective assessment (if attitude tests were administered, supply dates, scores, and a brief analysis of results)
- Parental involvement (e.g., how many parents were involved, types of activities, etc.)
- Procedure used in project evaluation (who participated in the evaluation, was evaluation ongoing or done at the end of year, approximate number of man-hours required for evaluation)
- Findings and recommendations of the evaluation

We are enclosing a form to be used for supplying CRI with the pre- and post-test achievement scores. Please complete the form and return it with your project evaluation to CRI by May 15, 1973.

This communication is the last which you will receive relative to this year's evaluation by CRI. We wish to express our gratitude to all school-based Right to Read sites for the full cooperation they have given CRI and our office during the course of this year's evaluation.

Sincerely yours,

Sister M. P. Hampton Coordinator of Evaluation

Right to Read Program

Needs Assessment Package Questionnaire

Contemporary Research Incorporated (CRI) is making an assessment of the Right to Read Needs Assessment Package for the Office of Education. You are the best source of information we have regarding these materials, therefore your answers to the following questions will be invaluable for our assessment. This questionnaire should only be filled out by the person/s involved in using the Needs Assessment Package.

We want to find out if these materials were useful in your needs assessment phase, and if not, what recommendations you can make for their revision.

Thank you very much for your cooperation.

NOTE: Wherever there is reference to Right-to-Read technical assistants, this includes technical assistant team members and reading specialists supplied by the National Right-to-Read office.

Program Planning Procedure Questionnaire

Name	of	School	

Contemporary Research Inc. (CRI) is making an assessment of the Right to Read Program Planning Materials and Procedures for the Office of Education. You are the best source of information we have regarding these materials; therefore, your answers to the following questions will be invaluable for our assessment. We want to find out if these materials were useful in your program planning phase, and if not, what recommendations you can make for their revision.

The questions below will cover each step in the Program Planning Procedure. A xeroxed copy of all charts, a set of objective cards, a set of definition cards, and a copy of all the directions are provided for your use in answering the questions.

Note: Whenever there is reference to Right to Read Technical
Assistants, this includes technical assistant team members
and reading specialists supplied by the National Right to Read
Office.

Please answer the following questions for each step in the Program Planning Procedure by placing a check (\checkmark) in the appropriate box. For "amount of time spent," please designate number of hours or days.

Step 6 Step 7 Step 8 Step 9 Step 10 Step 11													2. 機能を開発的は対象のである。 (1997年) 1997年 - 199							(2) 「大きないできない。 またいできる マン・マン・マー・マー・マー・マー・アー・アー・アー・アー・アー・アー・アー・アー・アー・アー・アー・アー・アー						· And

Office of Education Objectives Questionnaire

Name of School	.:		
			

Contemporary Research Inc. (CRI) is conducting an assessment of all Right-to-Read Centers for the Office of Education. Two types of assessment will be made: a general assessment and an in-depth assessment. The general assessment will include visits to 80 of the centers by one CRI staff member for not more than a day. The in-depth assessment will be conducted by a team of four CRI staff members who will visit each of the 20 centers for approximately four days.

* Your participation in a Right-to-Read program makes you uniquely qualified to help us determine which program objectives should be emphasized in the in-depth and general assessments.

The rating of the following objectives will give us an idea of which program objectives you would want CRI to include in the general assessment and in the in-depth assessment. These objectives were provided to each site merely as examples. You were encouraged to develop objectives that were appropriate to your program. Spaces are provided here for the inclusion and rating of the objectives you may have written.

1.	Did vou	receive	the	15	Office	of	Education	objectives?

1___YES

S NO

Directions: In the table below, check 6/ the box that shows how im-2. portant you feel it is for CRI to assess your program on the basis of each of the listed objectives. List any of your own objectives not previously mentioned in the spaces provided below. Indicate your feetings for those of the objectives you hope to accomplish in your first year of operation (immediate) and for those objectives you hope to accompilsh during your second year or later years of operation (long-range).

Use the following code to indicate how important you feel it is to assess the objectives:

= very important

1 = not important 2 = somewhat important

3 = important

5 = most important

15.	How important is it that CRI assess the effects of parent involvement in the school on student reading accomplishment?													
16.	How important is it that CRI assess the effects of student behavior in the classroom on student reading accomplishment?													
17.	How important is it that CRI assess the effects of student motivation on student reading accomplishment?													
18.	How important is it that CRI assess the effects of kinds of student attitudes on student reading accomplishment?													

Of the above CRI assessment areas, choose the three that you consider the most important for the general assessment.

- ı.
- 2.
- 3.

Of the above CRI assessment areas, choose the three that you consider the most important for the in depth assessment.

- 1.
- 2.
- 3.

APPENDIX C. BIBLIOGRAPHY

A major task that CRI completed in its evaluation of the Right to Read Program was an extensive review of pertinent literature. Although this literature search was particularly concentrated early in the study, it continued throughout the course of the project. The purpose was to relate the research design, data analysis, and instrument development to current research as reported in professional journals. Of particular importance were data on program and process variables that described the operational aspects of a program and which were antecedent to outcome variables such as student achievement. The continuing literature review focused on the different reading approaches identified by the Right to Read materials, the influence of parental involvement on student achievement, and on assuring that the CRI instruments were highly comparable to previously developed, widely used instruments.

APPENDIX D. MASTER MATRIX OF RIGHT TO READ SITES

The Master Matrix describes Right to Read school-based sites initially funded for the 1972-1973 school year in terms of various major categories. For various reasons a few of these sites did not continue in the program for the entire year. Listed below are the codes explaining column headings and information included in the columns. Where information was not available cells are blank. Forty-four of the 160 sites listed were selected for the evaluation.

Codes

S: Satellite site (receives help from nearby Impact site to plan and implement reading program).

R: Geographic Region (as designated by the Right to Read Office).

Impact: Refers to school with exemplary reading program selected to disseminate the program to nearby Right to Read (satellite) sites.

Bilingual: Reading is taught in English and the children's native language.

Ethnicity: Ethnic composition of all students in the school
(W=white, B=black, M=Mexican American, I=American
Indian, Or=Oriental, PR=Puerto Rican, Oth.=other).

Grade level: Grade levels included in the Right to Read program.

APPENDIX E. CONSULTANTS: TITLES AND AREAS OF SPECIALIZATION

Contemporary Research Incorporated (CRI) was pleased to have been able to use the expert assistance of a number of consultants throughout the evaluation. These consultants were specialists in psychology, psychometrics, sociology, sociolinguistics, speech, minority education, and reading.

The consultants who participated in the Right to Read study are listed below:

Consultant	Degree/Area of Specialization/ Present Practice
Dr. Howard S. Adelman	Ph. D., Psychology
	Developmental Psychology Special Education Competency-Based Teacher Education
Associate Professor, Departn Callfornia at Riverside,	nent of Psychology, University of
Dr. Edith Buchanan	Ed. D., Curriculum Reading Specialist
California State College, Dom	Program Director, Early Childhood M. A. Degree Program Inquez Hills.
Dr. Lester R. D'Andrea	Ph. D., Psychology
Self-Employed Consultant	Research, Group Work
Dr. Seymour Feshbach	Ph. D. (Psychology
1 Augustus pa	Cognitive and Motivational Disturbances in Children
Director, Fernald School, Uni	versity of California at Los Angeles.

Consultant	Degree/Area of Specialization/ Present Practice
Dr. Ralph Hoepiner	Ph. D., Psychology
	Educational Concepts Evaluation
Associate Research Educationis University of California at Los	t, Center for the Study of Evaluation, Angeles.
Mr. James A. Johnson, Jr.	M. A., Mental Retardation
	Cross-Cultural Differences
Director, Multi-Ethnic Education Laboratory for Educational Rese	onal Program, Division IV, Far West earch and Development.
Dr. Marilyn Kourilsky	Ph. D., Speech and Economics
	Instrument Development
Director, Center for Study of Ed California at Los Angeles.	conomics in Education, University of
