ABSTRACT

This teacher's guide is one of a series of publications focusing on the occupational preparation of persons with special education needs. The material was developed and tested by cooperating teachers over a period of three years. Task analysis information is presented using occupational descriptions from the Dictionary of Occupational Titles, covering entry level occupations generally available in Michigan. Instructional task modules are presented in detail under the headings: behavioral task knowledges/task skills, instructional methods, task-related competencies, instructional materials, basic information for cooperative teaching (language of the task and quantitative concepts), and suggestions. An instructional materials bibliography is included, followed by two appendixes, an instructional materials code indicating probable learning sensations, and a task-related competencies code. This guide describes 6 tasks common to the health occupations cluster, together with 48 tasks for seven selected entry occupations in the health care subcluster, 18 tasks for three selected entry occupations in the child care subcluster, and 25 tasks for five selected entry occupations in the hospital housekeeping subcluster. PREFACE

This teacher's guide is one of a series of publications focusing upon the occupational preparation of persons with special education needs. It is intended to be used jointly by concerned teachers as they work collectively to serve students with unique educational problems. Developed and tested by cooperating teachers, these materials represent the culmination of three years of intensive listening, communication, cooperation, and positive action between vocational and special education teachers. If the exciting ideas in these pages are actively and cooperatively implemented, the impact upon our young people could well be tremendous.

DICTIONARY OF OCCUPATIONAL TITLES

The following is a list of occupational descriptions taken from the third edition (1965) of the Dictionary of Occupational Titles. These represent the key analysis occupations for the Health Occupations Cluster.

Each occupational title represents an entry-level occupation which is generally available (in demand) across the state of Michigan at the present time. However, teachers and curriculum planners must carefully study the generalizability of this information/data to the specific community. Local or regional manpower information and data must be carefully reviewed and analyzed in making decisions related to local vocational programs offerings and specific curriculum or course content.

355.878 NURSE AIDE (Nurse Aide/Hospital Orderly) Assists in care of hospital patients, under direction of nursing and medical staff: Answers signal lights and bells to determine patients' needs. Bathes, dresses, and undresses patients. Serves and collects food trays and feeds patients requiring help. Transports patients to treatment units, using wheelchair or wheeled carriage, or assists them to walk. Drapes patients for examinations and treatments, and remains with patients, performing such duties as holding instruments and adjusting lights. Dusts and cleans patients' rooms. Changes bed linens, runs errands, directs visitors, and answers telephone. Takes and records temperature, pulse and respiration rates, and food and liquid intake and output as directed. May apply compresses and hot water bottles. May clean, sterilize, store, prepare, and issue dressing packs, treatment trays, and other supplies and be designated as Nurse Aid, Central Supply. May prepare patients for delivery and clean delivery rooms, and be designated as Nurse Aid, Delivery. May bathe, weigh, dress, and feed newborn babies and be designated as Nurse Aid, Nursery. May clean, sterilize, and assemble into packs, supplies and instruments used in surgery, and maintain cleanliness and order of operating room and be designated as Nurse Aid, Surgery.

355.878 ATTENDANT, PHYSICAL THERAPY (Physical Therapy Attendant) Prepares patients for treatment by Physical Therapist: Assists patients in dressing, undressing, and moving about. Sets up and assembles such equipment as hydrotherapy tanks and vibrators. Places patients in position for treatment. Times length of treatment. Changes linen on beds and treatment tables, and cleans work area. May assist in fitting patients with corsets, braces, and hand splints.

- 354.878 HOME HEALTH AIDE (*Home Attendant*) Cares for elderly, convalescent, or handicapped persons in patient's home, performing any combination of the following tasks: Changes bed linens, washes and irons patient's laundry, and cleans patient's quarters. Purchases, prepares, and serves food for patient and other members of family, following special prescribed diets. Assists patients into and out of bed, automobile, or wheelchair, to lavatory, and up and down stairs. Assists patient to dress, bathe, and groom self. Massages patient and applies nonmedical preparations and treatments, such as liniment or alcohol rubs and heat-lamp stimulation. Accompanies ambulatory patients outside home, serving as guide, companion, and aid. Entertains patient, reads aloud, and plays cards or other games with patient.
- 359.878 CHILD-CARE ATTENDANT (*Aide*) Cares for group of children housed in city, county, or other government institution, under supervision of superintendent of home: Awakens children each morning and insures that they are dressed, fed, and ready for school or other activity. Gives instructions to children regarding desirable health and personal habits. Provides and leads recreational activities and participates or gives instruction to children in games. Disciplines children and recommends or initiates other measures to control behavior. May make minor repairs to clothing. May supervise housekeeping activities of other workers in assigned section of institution. May counsel or provide similar diagnostic or therapeutic services to mentally disturbed, delinquent, or handicapped children.
- 323.887 MAID, HOSPITAL (*Housekeeping Aide*) Cleans hospital wards, rooms, baths, laboratories, offices, and halls: Mops and waxes floors. Cleans window sills, woodwork, and furniture. Scours and polishes bathtubs, sinks, and laboratory equipment. Polishes brass and glass panels in doors and partitions. Empties ashtrays and trash baskets. Washes bedframes, brushes mattresses, and remakes beds after dismissal of patients. Keeps utility and storage rooms in neat and orderly condition. Distributes laundered articles and linens in wards. May serve patients meals and remove trays and dishes. May disinfect and sterilize equipment and supplies, such as rubber gloves, syringes, and test tubes, using germicides and sterilizing equipment. May make up packs of linen supplies, instruments, dressings, and treatment trays preparatory to sterilizing. May mix sterilizing solution according to formula.

382.884 JANITOR Keeps hotel, office building, apartment house, hospital, or similar building in clean and orderly condition and tends furnace and boiler to provide heat and hot water for tenants, performing any combination of following duties: Sweeps and mops or scrubs hallways and stairs. Regulates flow of fuel into automatic furnace or shovels coal into hand-fired furnace. Empties tenants' trash and garbage containers. Keeps building in good repair, performing routine painting, plumbing, electrical wiring, and other related maintenance activities, using handtools. Cautions tenants regarding complaints about excessive noise, disorderly conduct, or misuse of property. Notifies management concerning need for major repairs or additions to lighting, heating, and ventilating equipment. Cleans snow and debris from sidewalk. Mows lawn, trims shrubbery, and cultivates flowers, using handtools and power tools.

75

SUBCLUSTER: HEALTH CARE

Code: HTH - HC19 TASK: Take and record pulses

Basic Information for Cooperative Teaching

Language of the Task		Quantitative Concepts
Pulse	Stethoscope	Measure time in minutes and 30 second intervals accurately. Multiply 30 second intervals by two for minute rates. Time half minute using different second hand positions on watch: 12-6, 1-7, etc.
Heart beat	Chart	
Artery		
Rhythm		
Irregular		
Expansion		
Contraction		
Arteries		
Count		
Relaxed		
Second hand		
Normal		
Abnormal		
Optical (heart)		
Radial (arm)		

Suggestions:

- Discuss the importance of relating the information to the right people.
- Report abnormal data immediately.
- Explain what can effect pulses.
- Check with vocational teacher for correct charting procedures.
- Drill deaf student extensively on language of the task.
- Teacher and deaf student should cooperatively develop some simple signs related to language of the task.

Supportive Instructional Materials:

Peers: take one another's pulse count at ease and with exercise
 "Temperature, Pulse, Respiration" from series - Parke Davis (Patients are People)

TASK: Take and record respiration

Code: HTH - HC20

Student Name: _____

Student Progress		Behavioral Task Knowledges/Task Skills	Instructional Methods															
Introduced	Involved		Productive	Employable														
		<p>Given the necessary tools, materials, equipment, and requisite knowledge, the learner will:</p> <ol style="list-style-type: none"> 1. observe, count, and calculate patient respiration rate, following a prescribed procedure: <ol style="list-style-type: none"> a. while checking pulse, watch the rise and fall of the patient's chest b. count each rise and fall as one respiration c. count for a half minute and multiply by two for respiration rate. 2. chart pertinent information regarding patient's respiration rate. 	<ul style="list-style-type: none"> • Students discuss a film on measuring and recording respiration • Instructor demonstrates and illustrates proper procedures for measuring and recording of respiration. Students return the demonstration on classmates. • "Show and Tell" using slides. • Instructor illustrates proper procedures for charting respiration using charts. • Teacher must allow time for student practice with peers.

SUBCLUSTER: HEALTH CARE

Code: HTH - HC2C TASK: Take and record respiration

Basic Information for Cooperative Teaching		Suggestions:
Language of the Task	Quantitative Concepts	
Oxygen	Measure time in minutes and 30 second intervals.	● Emphasize the importance of not letting people know you are counting respiration.
Carbon dioxide		
Breathe in/inhale/inhalation		● Practice remembering two quantities such as pulse rate and respiration rate before writing down.
Breathe out/exhale/exhalation	● Practice time measurement in class room.	
Respiration		● Determine average number of times per minute a person breathes in - breathes out.
Chest (rib cage)		
Rise		
Fall		
Lying quietly		
Hyperventilating		

Supportive Instructional Materials:

TASK: Take and record blood pressure

Code: HTH - HC21

Student Name: _____

SUBCLUSTER: HEALTH CARE

Code: HTH - HC21 TASK: Take and record blood pressure

Basic Information for Cooperative Teaching

Language of the Task

Quantitative Concepts

Suggestions:

Blood pressure

Force of blood

Blood flow

Arteries

Circulation system

Two pressures

highest - systaltic pressure

lowest - diastaltic pressure

Monometer (sphygmomonometer)

Stethoscope

Release bulb

Ear piece

Speed

faster - slower than normal

Louder and softer

Heart beat rate

- Check with nurse aide teacher for necessary information.
- Emphasize the importance of an assisting role for the profoundly deaf student.

Supportive Instructional Materials:

Resource person (R.N.) bring equipment and demonstrate

TASK: Feeds patient

Code: HTH - HC22

Student Name: _____

Student Progress		Behavioral Task Knowledges/Task Skills	Instructional Methods		
Introduced Involved Productive Employable		<p>Given the necessary tools, materials, equipment, and requisite knowledge, the learner will:</p> <ol style="list-style-type: none"> 1. follow a prescribed procedure for feeding disabled patients: <ol style="list-style-type: none"> a. wash hands b. raise back rest, if allowed, and prepare patient c. feed patient slowly or as indicated by patient d. use straws in feeding liquids e. show interest in patient during feeding f. when he is finished make him comfortable g. remove tray h. record intake if required. 2. chart quantities and types of food consumed by patient: <ol style="list-style-type: none"> a. How well did patient eat? 	<ul style="list-style-type: none"> ● Instructor demonstrates and discusses patient feeding procedures. ● Para-professionals provide sustained involvement with students having difficulty with this task. ● Students feed patients who are blindfolded and laying down. They must feed them tea, broth with noodles, pudding, and jello, and talk to them. ● Students discuss a film of feeding the patient. ● Students record intake of classmate.

Code: HTH- HC42 TASK: Provide cardio pulmonary resuscitation

Basic Information for Cooperative Teaching

Language of the Task	Quantitative Concepts
Emergency	Estimate or read measured amounts of time (i.e. 15 seconds, 1 minute).
Open airway	Pace counting to be consistent with seconds, minutes.
Tilting head back	Judgment of pressure applied during resuscitation.
Resume breathing	Judgment of depth (1/2 to 2") related to pushing on rib cage during resuscitation.
Artificial respiration	Judgment of normal and abnormal pupil size.
Seal	Recognize the ratio 5:1 (5 heart compressions to 1 lung inflation).
Inhale	
Exhale	
Restore circulation	
Sternum	
Chest	
Pupils	

Suggestions:

- Drill deaf student extensively on language of the task.
- Invite an R.N. or other medical person to demonstrate the role of an assistant for the task.

Supportive Instructional Materials:

Basic Information for Cooperative Teaching

Suggestions:

Language of the Task

Quantitative Concepts

Stairs

Measure width of stairs using ruler.

Risers

Measure height of riser between steps and width of step (tread).

Railing/bannister

Landing

Treads

Molding

Wipe

Width

Steps

Floor brush

Dry mop

Stroke

Terrazzo

Wood

Concrete

- Physical requirements:
travel up and down stairs
slide feet together across
step starting at top
back down stairs using stair
hand rail
use rag in one hand and another
rag in other hand
- Have students practice cleaning as they go up and down mock stairs with removable sides and rails.
- This task may be particularly appropriate for deaf student.
- Speak distinctly and slowly, use simple sentences, and look directly at lip reading deaf students.

Code: HTH - HH04 TASK: Wet mop floors

Basic Information for Cooperative Teaching

Language of the Task	Quantitative Concepts
Wet mop filler	Corrosive
Size/capacity	Application
Wringer	Concentrate
Bucket	Dilute
Detergent	Teach: one half ounce per gallon
Solution	Four one half ounce into a measuring cup from a bottle having the net weight of 8 oz. Pour the half ounce into a gallon of water. Observe 8 oz. bottle, determine how many times this operation could be performed.
Soak	
Mop handle	
Clamp	
Wing nut	
Crown	
Gear press	
Roller wringer	
Squeeze wringer	

Suggestions:

- Physical requirements
walk backward
swing arms while walking backwards
drag mop along molding
- Using foot square shapes, measure the square footage of a small room by laying the shapes out - determining the number which will fit in the room.
- Stress importance of using proper cleanser and tool for each task.
- This task may be particularly appropriate for deaf student.

Supportive Instructional Materials:

Squares of cardboard measuring a foot square. Enough to cover a small room.

BIBLIOGRAPHY REFERENCE

... complete ordering information for each of the commercially or teacher-produced instructional materials may be obtained by checking this reference number in the Instructional Materials Bibliography located in the back of the *Cluster Guide*.

TASK-RELATED COMPETENCIES

The task-related competencies are a summation of the specific skills, understandings, and/or attitudes that are necessary to satisfactorily accomplish the instructional tasks found in the ten cluster guides. The following listing is used for interpreting the Task-Related Competency code numbers found on each task sheet. A more detailed description of each of the identified competencies can be found either in the Program Guide or the Project Handbook.

A. SKILLS BASED ON KNOWLEDGE

1. Name one or more items
2. Request supplies and/or equipment
3. Check for accuracy and, if necessary, require correction of self and/or others
4. Discriminate sound cues, recognize normal sound as opposed to abnormal sound
5. Identify color
6. Identify form, size, shape, texture
7. Sequencing - Respond by pre-determined plan
8. Write identifying information of persons, places, and/or objects, serial no., weight, and/or types of products on slips or tags, etc.
9. Obtain information through sight, shape, size, distance, motion, color, and other unique characteristics
10. Discriminate olfactory cues

B. CONCEPT OF NUMBERS BASED ON KNOWLEDGE

1. Ordinal
2. Cardinal
 - a. read numbers and/or copy
 - b. count and/or record
3. Make change (money)
4. Measure
 - a. distance
 - b. weights - volume - balance
 - c. liquids - solids
 - d. time (measurement of)
 - e. degrees of circle
 - f. temperature, pressure and humidity
 - g. torque
 - h. electricity
 - i. plumb - level
5. Perform simple addition and/or subtraction
6. Perform simple multiplication and/or division

TASK-RELATED COMPETENCIES, continued. . .

C. COMPREHENSION AND PERFORMANCE

1. Forms
 - a. write
 - b. file, post and/or mail
2. Match
 - a. duplicate
 - b. sort
3. Check lists and/or fill out report forms
4. Time awareness
5. Follow verbal symbol and/or written direction
6. Recognize words (not numbers) or ability to read and/or write
7. Depth perception
8. Ability to select most appropriate solution
9. Concept of distance

D. SKILLS BASED ON PHYSICAL ABILITIES

1. Fine Coordination
 - a. coordinate eyes and hands or fingers accurately
 - b. make precise movement
 - c. move fingers to manipulate objects
 - d. move hands skillfully - placing and turning motion
 - e. coordinate hand and foot
 - f. feeling - perceiving objects and materials as to size, shape, temperature, moisture content, or texture by means of touch
2. Strength (lifting, carrying, pushing, and/or pulling)
 - a. sedentary work, 10# occasionally lifting and/or carrying small items such as tools, etc.
 - b. light work, 20#, requires a significant amount of standing or walking
 - c. medium work, lifting 50#, frequent lifting and carrying objects weighing 25#
 - d. heavy work, frequent lifting and/or carrying up to 50#
 - e. very heavy work - lifting objects in excess 100#, lifting and/or carrying objects weighing 50# or more
3. Gross Coordination (climbing and/or balancing)
 - a. maintain body equilibrium to prevent falling when walking, standing, crouching, or running on narrow, slippery or moving surfaces
 - b. ascend and descend ladders, stairs, scaffolding, ramps, poles, ropes, using feet and legs and/or hands and arms
 - c. reaching - extending hands and arms in any directions
 - d. crawling - moving on knees or hands and feet
 - e. kneeling - bend legs at knees to rest on knee or knees
 - f. stooping - bend downward and forward by bending legs and spine
 - g. bending - downward and forward by bending at the waist
