ABSTRACT

Some neighborhood based manpower agencies in the impacted areas do not possess the inhouse capability of informing their constituents of available manpower programs. The Manpower Administration funded a project to gather and disseminate manpower training information to some 60-70 neighborhood based agencies on standardized forms. Checks would be made on the utility of this information and the impact on the neighborhood agencies' practices. A directory of Manpower Services was also to be developed. Of the 98 agencies approached, 87 (89%) participated--over twenty more than anticipated. Thirty-six different training programs contributed information and provided over 5,500 training slots. Over 1,200 referrals were reported using the NYCMIB system. A steady increase of referrals was reported. For the first sixteen weeks, 252 referrals were made; over the last eighteen weeks, 924 referrals were made. A survey of a sample of participating agencies indicated that 63% of referrals resulted in placements. The utility of the project seems to be demonstrated. It is felt that a local agency should continue its operation. (Author)

I. Project's Objectives and Findings

A. Objectives

Some neighborhood based manpower agencies located in the impacted areas of inner cities do not possess the inhouse capability of informing their constituents of available manpower programs. Settlement Houses Employment Development Inc. proposed to the Manpower Administration to gather and disseminate manpower training information to some 60-70 neighborhood based agencies on standardized forms; and that checks would be made on the utility of this information and the impact on the neighborhood agencies' practices.

Three types of bulletins would be developed:

1. Gathering current manpower training openings from program agencies, publishing these on a standardized form and mailing them at regular (usually two week) intervals;
2. Distributing periodic analyses of current manpower problems and issues of interest to manpower staff which are prepared by New York City's Manpower Planning Council;
3. Developing and distributing local program descriptions as a Directory of Manpower and Related Services.

B. Findings

1. There was a good response to the project by neighborhood based agencies. Of the ninety-eight agencies approached, eighty-seven (89%) participated - over twenty more than anticipated.

2. There was no problem gathering training program information. Thirty six (1) different training programs contributed information and provided over 5,500 training slots.

3. Over 1,200 referrals were reported made as a direct result of the NYCMIB system.(2)

4. There was a steady increase in the use of the NYCMIB system. For the first sixteen weeks, 252 referral were made; over the last eighteen weeks, 924 referrals were made.(3)

5. A survey of a sample of participating agencies indicated that 63% of referrals resulted in placements.(4)

Footnotes:

(1) See appendix A "Program Agencies Providing Training Slots to NYCMIB."

(2) See Table Ia, page 7.

(3) See Illustration #1, page 4: "#of referrals plotted against program time period." Also see Illustration #2, page 10: "NYCMIB staff activity to obtain referrals. "

(4) "Special Sampling Report" to Manpower Administration by SHED, September, 1973.

6. The survey indicated that the percentage of placements of referrals was almost equally as high for training slots which lead to high, medium and low paying jobs as categorized by DOL DOT Codes.(5)
7. Findings from the project telephone log include the following(6)
- a. Requests for information about specific programs suggests a bell curve. Inquiries were reluctant at start, peaked during the middle and slackened as manpower personnel became adept at using the binder.
 - b. Requests for information in the use of the binder(6) is a somewhat sharper curve suggesting again, inquiries tapering off as manpower personnel became more knowledgeable in available manpower services.
 - c. Telephone training sessions in the use of the Bulletins remained high over a six month period as new agencies were introduced and personnel changes occurred at the referral agencies. An attenuation at the end of the project reflects greater knowledge on the part of referral agency personnel.
 - d. Persistent requests for referral data was a consistent feature of the project.
 - e. Other specific (7) requests from referral agencies for technical manpower information decreased as the project proceeded - while referrals reported to NYCMIB increased.
8. Table 3 (see Table 3, page 9) is a compilation of data secured through SHED's survey of twelve agencies to determine the utility of the program.
- a. Five indicated that NYCMIB had provided new training slots.
 - b. Three indicated that the formats and practices of NYCMIB had aided their agencies in refining the manpower practices of their agencies.
 - c. Three agencies indicated that their professional staff efficiency had been increased through the concentration of manpower information in the Bulletins.
 - d. Four agencies indicated that the Bulletins insured currency of information.
 - e. Three agencies recognized the duplication of most of the training information but indicated the concentration increases their productivity.

Footnotes:

- (5) Under Table Ia, (page 7) Column 5 (College Adapter), 8 (Driver Training), 16 (Recruitment and Training Program-formerly Joint Apprentices Program) and 23 (Warehouse Shipping and Receiving) are instructive. In each of these categories there are more referrals than openings. In the case of Programs under 16, these are low DOT Codes leading to good salaries; program under 5, although an educational program, this is associated with higher earnings. Program under Column 8 and 23 is a program dominated by minority males who can meet entry level requirements.
- (6) Illustration #2, page 10.
- (7) Specific requests included items including locations of agencies, criteria for applicant acceptance in programs, general entrance procedures for training agencies, locations of specific training programs not listed in the Bulletins.

II. Acknowledgement of Sponsorship

This report of a demonstration project was prepared under a grant from the Manpower Administration, U.S. Department of Labor, under the authority of the Manpower Development and Training Act. Organizations undertaking such projects under the Government sponsorship are encouraged to express their own judgement freely. Therefore, points of view or opinions stated in this document do not necessarily represent the official position or policy of the Department of Labor.

Illustration 1

NUMBER OF
REFERRALS
REPORTED

III. Results

1. Thirty-three referral agencies located in the five boroughs of New York City, grouped under a selection criteria, (8) responded to SHED's first mailing of an invitational questionnaire (9) to participate in the project.

At subsequent periods, sixty-five additional referral agencies were invited to participate in the project.

Of this total recruitment of sixty-five agencies, eleven referral agencies withdrew; (10) twenty-nine additional referral agencies requested participation but were not accepted due to the anticipated refunding problem.

Of the total eighty-seven participating referral agencies, twenty returned the invitational questionnaire.

Of the total twenty-nine referral agencies requesting participation, twenty-eight returned the invitational questionnaire.

2. 201 Training Information Bulletins (11) using a format designed by Manpower Specialists from New York City agencies were distributed from November 22, 1972 through November 11, 1973.

3. Three instruction sheets (12) to update information content were distributed at eight week intervals.

4. By the sixth month of the project, 250 copies of each training information bulletin sheet containing training slot information was mailed on an approximate two week basis to the eighty-seven referral agencies.

5. Using data as of September 11, 1973, thirty-six program agencies (13) provided approximately 5,647 (14) training slots for distribution.

Footnotes:

- (8) Criteria for selection included: (1) the "needs" concept, (2) the professional capacity of manpower agency personnel, (3) the agency service to "problem populations" e.g. ex-addicts, (4) the referral agencies' energetic response to SHED's invitation to participants. The total number of referral agencies served was 25% greater than the original condition of the grant. In addition, with multiple mailings, the total sheets distributed increased by 250%. Project costs reflect these changes in the original mailing estimates.
- (9) Appendix B. "Interview Questionnaire"... Distributed to Referral Agencies by SHED."
- (10) Appendix C. "Method of Selecting Referral Agencies and reasons for withdrawal." from Special Report on Manpower Information Bulletin to Manpower Administration"- 7/73.
- (11) Appendix D sample. "NYCMIB Training Information Sheet"
- (12) Appendix E. "Typical Instruction sheet for updating NYCMIB Training Information Bulletins' binder."
- (13) See Appendix B. List of program agencies providing NYCMIB project with training slot openings.
- (14) This total count excludes some totals in training categories noted as sev. (several) and +. In the letter case of the coded +, this number including general information sheets for JOBS, Neighborhood Youth Corps, etc. would increase the totals significantly.

6. Other training slot information was circulated as general information when the available slots were ongoing. (15) Table Ia summarizes the total slot distribution by training category as of September 11, 1973.

See Table Ia, page 7.

7. 1,079 referrals from referral agencies were reported as of September 11, 1973. Table Ia summarizes referrals submitted to NYCMIB by training category.

See Table Ib, page 7.

8. Forty six field visits were conducted to referral agencies in order to check the condition of the binder. Using an interview form questionnaire (16), visits to thirty-one agencies yielded the following table.

See Table 2, page 8.

9. Of the thirty-one agencies visited, twenty-seven were using the binders actively and an updated binder was observed. Four agencies were not using the binder. Twenty-two agencies requested that NYCMIB seek more training slots, particularly from private industry and slots relevant to males 16-20.

10. A NYCMIB Manpower Services Directory (17) has been distributed to thirty-seven referral agencies and to ten program agencies.

Divided under fourteen manpower service categories, the Directory lists 801 places to obtain services as supplied by 450 agencies.

Footnotes:

(15) Program example of continuing slots is the Neighborhood Youth Corps, the New York City Board of Education programs. An example of program slots deemed not proper for NYCMIB distribution is the Job Opportunities in Business (JOBS)

IV. Problems

The problems of executing the grant can be organized into four major groups.

A. SHED

1. The first person chosen as assistant project director did not possess a range of knowledge suitable for the project. The direct responsibility for the project implementation shifted to the project director. The program suffered through insufficient responses from referral agencies in returning their interview questionnaires (18) and a delay in initiating work for the Manpower Services Directory. (19)

2. The production time of the Manpower Services Directory was miscalculated since the instrument had to be constantly checked and brought up to date.

3. The misinterpretations of the initial measures led referral agencies to believe that NYCMIB was mandated to follow up applicants at the training site.

B. Referral Agencies

1. The major problem was the incessant prodding of NYCMIB referral agencies for information regarding their referrals. Illustration # 2, page 10, details the inquiries made for the referral information.

2. Once the referral agency began receiving the training bulletin, it was impossible to obtain the interview questionnaires that had not been promptly submitted in the early stages.

3. Some referral agencies insisted that NYCMIB should not distribute claims made by training agencies for future jobs based on training when, from their experience, such claims were false. NYCMIB discussed the feasibility of seeking guidance from the funding agency in respect to these charges. Referral agencies never submitted any formal documents that could serve as a basis for this procedure. In effect, we had maintained that we were not empowered to monitor; rather we were seeking inter agency cooperation within very strict confines of the grant condition.

C. Program Agencies

Delays in obtaining training slot information was due to the bureaucratic procedures of agency personnel authorized to decide if the agency wanted to participate.

D. Manpower Administration

The project was completed without a single field visit nor any written response to the reports dispatched to the funding agency. Even now, it is unclear what this means. Evaluating ourselves is not an

Footnotes:

(18) See appendix B.

(19) See appendix G.

easy task. Numerous staff discussions to discipline the referral agencies for not providing information, positive or negative, on their referrals, invariably ended with no action taken. Toward the end of the project NYCMIB had to decide whether an elaborate search for referrals was as important as the completion of the NYCMIB Manpower Services Directory.(20)

Footnote:

(20) See appendix G.

V. Learnings

The learnings relate to the grant conditions and are reported as improvements to problems leading to the grant request.

1. Complaints that training slot information is not as dispersed as it should be has been somewhat altered through the distribution of these slots as new slots.

2. Manpower Information presented in a single format is useful as an aid in undermanned neighborhood agencies.

3. The problems of assessing the relation of unfilled training slots and the referral mechanisms of referral agencies is an area requiring sharp study.

VI. Conclusion

As a Research and Development project, the NYCMIB understands the problem of why such a grant should not be renewed by the Manpower Administration. In large part we feel that the utility of the project rests on a realization by the local funding authority that the R&D aspect has been demonstrated. The project should, if worthwhile, be continued through local Department of Labor funds or funded by a City Agency.

NYC MANPOWER INFORMATION BULLETINS
101 EAST 15th STREET NYC 10003 677-0300 EXT. 24, 25

(Typical Instruction sheet for updating NYCMIB
Training Information Bulletins' binder)

August 22, 1973.

TO: NYCMIB Agencies

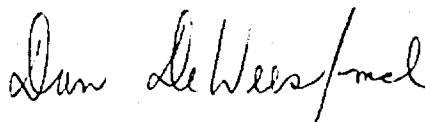

We here at New York City Manpower Information Bulletins are aware that pressing agency tasks may prevent your inserting the training sheets under their proper tabs and removing training sheets when the training period is ended.

We are listing the sheets that should be in your box as of this mailing. The sheets are listed as they should appear under the tabs beginning with the first tab.

Of course it is possible that some sheets were misplaced, never arrived, etc.

We are indicating the closing dates of each program in case you are missing programs that are still open. Please let us know if you need any of these sheets.

Sincerely,

Dan DeWees
Project Director

* will notify
