**ABSTRACT**

The guide is arranged in vertical columns relating seventh grade reading and composition concepts to curriculum performance objectives, career concepts, and career performance objectives, suggested teaching methods, and resource materials. Broad career concepts--such as "there are problems to face and overcome in any field of work" and "the newspaper may be a valuable source of information for job seekers"--are tied to specific curriculum concepts, performance objectives, teaching methods, teaching career concepts, and resource materials. Space is provided for teacher's additions, deletions, notes, and criticisms which will be useful when the guide is revised. Appendixes contain condensed job descriptions, a bibliography of career education library books, an index of films and records, and mythology notes. (NH)

## Preface

Meaningful existence is the goal of life in today's world. Living takes on meaning when it produces a sense of self-satisfaction. The primary task of education must be to provide each individual with skills necessary to reach his goal.

When children enter school, they bring with them natural inquisitiveness concerning the world around them. Normal curiosity can be the nucleus which links reality to formal training if it is properly developed. A sense of continuity must be established which places education in the correct perspective. Communities must become classrooms and teachers resource persons. Skills such as listening, problem solving, following directions, independent thinking and rational judgement then can merge into daily living procedures.

In classrooms especially designed to form a bridge between school and the world of work, experiences must be developed. On campus performance in job tasks and skills, following a planned sequence of onsite visitation, will fuse information into reality. Practical relationships developed with those outside the formal school setting will provide an invaluable carry-over of learned skills.

Search for a rewarding life vocation is never easy. Without preparation it becomes a game of chance. With a deliberate, sequential, and planned program of development, decisions can be made based upon informed and educated judgements.

A full range career education program, K-12, will offer opportunities for participants to enter employment immediately upon completion of training, post secondary vocational-technical education, and/or a four-year college career preparatory program.

C. N. Boggess, Superintendent  
Mariandale Independent School District

The Career Education Project has been conducted in compliance with the Civil Rights Act of 1964 and is funded by a grant from the U. S. Office of Education and the Texas Education Agency.

## Acknowledgments

Appreciation is expressed to the following teachers who contributed to the research and development of this curriculum guide.

Miss Pamela Braziel

Mrs. Cheryl Gonzales

Mrs. Carol Hall

Mrs. Hazel Hunt

Mrs. Sandra Wear

For their help and constructive suggestions in the compilation of this guide we acknowledge the following persons.

Mrs. Lucylle V. Deasey - Project Director - Career Education Program

Mr. William H. Bentley - Director of Vocational Education

Mr. William R. Marshall - Director of Curriculum

Miss Mary E. Dauxoy - Secondary Consultant

Mrs. Ruth Lewis - English Department Chairman

Mrs. Gozelle Loveless - Audio-Visual Coordinator

Gratitude is also expressed to the Texas Education Agency, Character Education Project, Education Service Center--Region 20, Minnie Stevens Piper Foundation, and the Career Education Project Staff.

The staff of the Harlandale Career Education Center is in the process of developing curriculum guides integrating state curriculum concepts with career education concepts. These guides embrace the philosophy that the purpose of public school education is to prepare the student to enter gainfully into the field of work or to prepare him to further his career training by entering college or seeking other training beyond high school.

The composition of this guide was influenced by the following factors: (1) the need to teach curriculum concepts required by the state, (2) the need to have a guide which could easily be adapted to the quarter system, (3) the need for inclusion of career education concepts and materials without disruption into the guide, (4) the need to write the guide in terms of student performance objectives, and (5) the need to build transportability into the guide so that it is easily adaptable to the needs and sources of other school systems.

It is reasonable to believe that individual teachers will find necessary the modification of this guide to their own classroom needs. Some will find the performance objectives too demanding as written; others may find their students unchallenged by the same objectives. Within the limits of the prevailing length of term within a school district, the instructor may choose to shift concepts from stated positions. Concepts may be taught repeatedly. This guide is intended to be a means for more fully educating the child and should not be considered as an inflexible pedagogical instrument.

Philosophy

Viewed from the standpoint of career education, the language arts program is an essential part of the "equipment" the student acquires as he becomes aware of the many kinds of careers, selects one to his liking, and finally leaves school to pursue it for the better part of his life. While preparing himself he must learn to speak, listen, write and read in a satisfactory manner; regardless of the vocation he chooses, he must communicate. Should he prepare himself for one of the more specialized careers, he may find that he needs to know how to write seemingly endless reports, edit someone else's writing, make public speeches, take notes and form them into news stories, articles, or creative writing, possibly teach school, or even do a combination of several of these activities plus others.

The function of his teacher is to lead him to think clearly, write correctly and speak properly. By guiding students through the reading and in-depth study of poetry and prose, the teacher aims at educating young minds in logical thinking. In pointing out the organization of an essay, for example, he helps students trace an idea from thesis statement through full development to conclusion. He continues to lead the young down the path of logic repeatedly until they are able to find their way by themselves.

During the long, often frustrating struggle involved in teaching students to think, the teacher must also instruct them in the use of tools by which to express their thoughts in spoken or written form. Grammar, mechanics and usage are consequently introduced. Like most tools, they are to be picked up and used when needed. It is hoped that proficiency in using them will also help students to speak and write effectively.

Instruction in effective expression in spoken and written English should not interfere with a student's natural feelings and leanings toward the language, customs, and culture of the contributing ethnic group in which he had his origin. Though the United States of America is a blend of many cultures, its national language is English; English is therefore taught as the leading rational means of communication. Students who can use a second language correctly should be looked upon as more richly endowed educationally and perhaps capable of wider service to their community.

As he instructs these future leaders and followers who will hold many-faceted careers in community life, the English teacher thus attempts to build upon the sturdy framework of reading, writing, and speaking and listening. He attempts to instruct in reading and listening so that his students may form constructive thoughts of their own; he endeavors to instruct in proper mechanics and usage so that they may speak and write those thoughts correctly. He may even suggest that a few of his students may move, like Carl Sandburg, from such jobs as milkman, barber-shop porter, dishwasher, truck driver, scene snifter, farmhand, and carpenter's assistant to the lofty position of well-loved rational

poet. May a dream has grown from the source of a so-called "lowly" job. And what are dreams for, if not for fulfillment?

Miss Mary Daunoy  
Secondary Consultant  
Harlandale Independent School District

## Use of the Guide

This guide uses state concepts for seventh grade reading and composition as outlined in the Texas Education Agency Bulletin 615 for instruction. English at the seventh grade level has been handled in a separate guide.

The performance objective mode is used for instruction and implies the necessary evaluation criteria. Each teacher must allow for student differences by selecting performance objectives and modifying levels of acceptable achievement according to the needs of individual students or groups of students.

Career education is included as an extension of the basic curriculum concept. Career concept performance objectives are employed to strengthen fundamental career concepts which are related to the stated curriculum concepts. These career performance objectives may build onto, or, in some cases, be used in place of, curriculum performance objectives. We cannot overemphasize that career education is an integral—not a separate—part of the curriculum.

A column of suggested teaching methods has been included to aid new teachers or to offer new or novel approaches to experienced instructors.

All audio visual media listed in the "Materials" column, unless otherwise specifically labeled, are from the Harlandale Independent School District Audio Visual Department.

Teachers will wish to preview all audio visual offerings to ascertain before class presentation their applicability to a particular instructional situation. The list of films and records is brief, and it is recommended that the teacher study the catalog prepared by the local audio visual center as well as those lists compiled by the Education Service Center, Region 20, and the Main Branch of the San Antonio Public Library for other useful materials.

"Appendix A" contains 38 selected condensed job descriptions from the Occupational Outlook Handbook and other sources; teachers may wish to use these for handy reference when dealing with careers which may be covered in the teaching of this course. One volume of the Occupational Outlook Handbook has been placed in each middle school for use by students and teachers. More than 800 jobs are covered in depth by this volume.

"Appendix B" lists over 100 books about careers; these publications have been placed in each of the middle school libraries. These brief, informative, simply written works should prove interesting and valuable to students wishing to read further into their career interests.

Other materials which may be used to advantage in conjunction with this guide are Job Clusters, a booklet prepared by the counseling component of the Career Education Center, and a comprehensive listing of resource personnel prepared by the Community Involvement Coordinator.

This guide must be revised, updated, and improved after actual use in the classroom. The teacher's comments, including names of books and other materials, and other constructive criticism will be of vast help in this task. All guides are to be turned in at the end of the school year so that these suggestions may be studied.

The credit for success of this guide will be due to the classroom teacher for the willingness to try the new approach, for the ability to adapt the guide to individual needs, and for an understanding that career education must be assigned a role in today's education to prepare the student for the demanding world of work.

Guide to Curriculum Concepts and Textbook Page References

All page references below refer to Adventures for Readers, Book One, Discovery through Reading, and Our Language Today 7, which are currently in seventh grade use in the Harlandale Independent School District. The page numbers shown are offered as suggested sources for teachers with these texts in hand, and these references should be narrowed, broadened, supplemented with or supplanted by other materials to meet the needs of individual classes and students. The concepts listed below should not be considered as a complete recording of concepts covered in this guide, since one fundamental is generally tied to a number of other basic learning foundations

Curriculum Concepts	Curriculum Performance Objectives	Career Concepts and Career Performance Objectives
SKILLS BASIC TO THE READING OF LITERATURE  •Elements of fiction          •Oral report	<p>The student is able to perform the following activities;</p> <p>1. List and define, after being given the information by the teacher, the essential elements of fiction: setting, conflict, plot, characters, and theme.</p> <p>2. Give an oral report of a favorite short story pointing out theme, characters, setting, conflict, and giving a brief summary of the plot.</p> <p>(Continued on following page)</p>	<p><u>Career Concept</u></p> <p>Positive attitudes are necessary to overcome conflicts and pressures encountered in all jobs.</p> <p><u>Career Performance Objectives</u></p> <p>The student is able to perform the following activities:</p> <p>1. List at least one conflict which might arise in a particular career. Some conflicts named may be those associated with personality, status, and job conditions.</p> <p>2. Participate in a class discussion of solutions to the conflicts named in Career Performance Objective 1 above.</p>

Suggested Teaching Methods for Curriculum and Career Concepts	Materials	Teacher's Comments
<p><u>For Teaching Curriculum Concepts</u></p> <p>1. You may wish to teach theme, setting, plot, conflict, and characterization by using short illustrative paragraphs or excerpts from fiction. Equate theme with the "idea about life" that the student finds in the excerpts. The student can name the time, place, and general environment from excerpts. Supply a list of events which the student can arrange in a natural order of occurrence to teach plot. Short selections from literature can show what a person is struggling to overcome, thus emphasizing conflict. If the student chooses two well-known people from a list you supply and describes their physical appearances, their personalities, and their outlooks on life, he will get an idea of characterization.</p> <p>2. This may be handled as a panel discussion, with each member of the panel (each having read the same story), reporting on one of the five areas of fiction.</p>	<p><u>Curriculum</u></p> <p>1. Harlandale ISD AV Dept. <u>Prose and Poetry</u>--- Album 2, "The Ransom of Red Chief" (record)</p> <p>2. Textbook materials</p>

Study and discuss a sample letter of job application provided by the teacher.</li> <li>2. Write a neat, correct letter of job application in response to an actual or teacher-written "Help Wanted" advertisement.</li> </ol>
--	---	---

Suggested Teaching Methods for Curriculum and Career Concepts	Materials	Teacher's Comments
<p><u>For Teaching Curriculum Concepts</u></p> <p>1. &amp; 2. Write on the chalkboard or duplicate a sample of a business letter. Discuss the necessity for each part, and explain the differences between a business letter and a friendly letter and the reasons why. A real thank-you business letter to a businessman who has addressed the class might be prepared and mailed as a practical exercise.</p> <p><u>For Teaching Career Concepts</u></p> <p>1. &amp; 2. The suggestions above apply; in addition, stress that a letter of application must be as nearly perfect in form, neatness, content as is humanly possible, since this is generally the only way the employer has of deciding whether to grant a personal interview.</p>	<p><u>Curriculum</u></p> <p>1. Textbook materials</p>	

03/04

**Appendix A**

**Selected Condensed Job Descriptions**

Following is a list of the condensed job descriptions which are alphabetically arranged in Appendix A.

1. Actor and actress
2. Aerospace engineer
3. Automobile mechanic
4. Automobile parts counterman
5. Barber
6. Building custodian
7. Clergyman
8. Data processing equipment serviceman
9. Day laborer
10. Developmental psychologist
11. Drama critic
12. Film editor
13. Floral designer
14. Front office clerk (hotel)
15. Insurance claims adjuster
16. Interior designer
17. Interpreter
18. Librarian
19. Locomotive engineer
20. Lyricist
21. Merchant marine licensed officer
22. New car salesman
23. Petroleum engineer
24. Podiatrist (chiroprapist)
25. Private household worker
26. Professional athlete
27. Purchasing agent
28. Real estate salesman
29. Service station attendant
30. State police officer
31. Steel worker
32. Taxi driver
33. Telephone operator
34. Television and radio service technician
35. Tire vulcanizer
36. Tuna fisherman
37. Urban planner
38. Women's clothing designer

<p><b>Actor and Actress</b></p> <p><b>Nature of work:</b> To perform in plays, radio productions, television productions, and motion pictures.</p> <p><b>Requirements:</b>          No specific education required. **Mythology Notes**

95/96

## A Partial Listing of Characters in Greek and Roman Mythology

Some of the important characters in Roman and Greek mythology are listed below. The accompanying descriptions are very brief and are meant to be only spurs to your memory. For a fuller review, please consult a good mythology source book, such as Bulfinch's Mythology by Frank Bulfinch or Edith Hamilton's Mythology.

Achilles, the central hero in Homer's Iliad, was vulnerable to injury only on his heel. He was killed by Paris' arrow during the siege of Troy.

Adonis was an extremely handsome lad who was loved by Venus. He expired on the horns of a wild boar.

Aphrodite (Venus) was the goddess of love and beauty.

Apollo held dominion over the sun, prophecy, music, medicine, and poetry.

Ares (Mars) represented war and battle.

Artemis (Diana) served as goddess of the hunt, of healing power, and disease.

Athene (Minerva) was the goddess of wisdom and power.

Atlas, as punishment, was forced to hold the world on his shoulders. His name has become a synonym for a person of great strength.

The Centaur possessed the upper torso of a man and the lower body of a horse.

Cerberus, a dog with saucer-sized eyes, guarded the gates of Hades, or the underworld.

The Chimera breathed fire, and was part lion, part goat, and part dragon.

Circe, an enchantress, changed men into swine. Odysseus, or Ulysses, landed on her island during his long journey home.

Cupid (Eros), the offspring of Venus, was the god of love.

The Cyclopes were one-eyed giants, cannibals, whom Odysseus encountered and outwitted during his travels.

Daedalus built the labyrinth to contain the monstrous Minotaur. He also created a pair of wings on which his son Icarus flew to his death.

The Gorgons, three evil sisters, had the power to turn people to stone with their glances.

Hades (Pluto) ruled as god of the underworld.

Hercules, a hero-god, won immortality by completing the twelve "impossible" labors assigned to him by Hera.

Hermes (Mercury) was the messenger of the gods.

The Hydra, a hundred-headed monster slain by Hercules, was able to grow two heads in place of each one severed. Hercules defeated the monster by searing with a torch the site of each decapitation.

Juno (Hera) reigned as the queen of Heaven. She was the wife of Jupiter (Zeus).

Jupiter (Jove, Zeus) occupied the throne as the highest Olympian deity.

Medusa, one of the Gorgons, had hair which had been changed into serpents. She was executed by Perseus, who used a mirror to avoid her petrifying glare.

The Minotaur, a creature half bull and half man, lived in the labyrinth on a diet of human flesh until he was destroyed by Theseus.

Morpheus was the god of dreams.

Neptune (Poseidon) had dominion over the seas.

Odysseus (Ulysses) fought heroically for the Greeks in the Trojan War. His adventures while he was homeward bound after the war are described by Homer in the Odyssey.

Perseus slew the Gorgon named Medusa.

The Sirens, sea nymphs who were part woman and part bird, lured sailors with their songs to the rocks on which the mariners' ships were dashed to pieces.

Theseus, with the aid of a ball of string, wended his way into the labyrinth to kill the Minotaur.

Vulcan (Hephaestus) was the god of fire.
